specific items of the audit report with which the provider disagrees, and such other material as
the provider wishes to submit in its behalf, and forwarding all material documentation in
support of the medical facility’s position.

(f) The medical facility shall be notified in writing of the determination of the
controverted items of the final audit report, including a statement of the reasons for such
adjustments and the appropriate citation to applicable law, regulation or policy. The audit
findings as adjusted in accordance with the determination of the bureau review shall be final, except that the medical facility may, within 30 days of receipt of the determination of the bureau review, initiate a hearing to refute those items of the audit report adverse to the interests of the medical facility presenting a factual issue by serving on the commissioner, by certified or registered mail, a notice containing a statement of the legal authority and jurisdiction under which the hearing should be held, a reference to the particular sections of the statutes and rules involved and a statement of the controverted items of the audit report and bureau determination, together with copies of any documentation relied on by the medical facility in support of its position.

(1) Upon receipt of such notice the commissioner shall:

   (i) designate a hearing officer to hear and recommend;

   (ii) establish a time and place for such hearing;

   (iii) notify the medical facility of the time and place of such hearing at least 15 days prior thereto; and

   (iv) include in a notice of hearing those issues of the audit report which are controverted in the notice served on the commissioner by the medical facility.

(2) The issues and documentation presented by the medical facility at such hearing shall be limited to the factual issues and documentation presented at the bureau review.
(3) The audit report shall be presumptive evidence of its content. The burden of proof at any such hearing shall be upon the medical facility to prove by substantial evidence that the items therein contained are incorrect.

(4) The hearing shall be conducted in conformity with section 12-a of the Public Health law and the State Administrative Procedure Act.

(5) At the conclusion of the hearing the medical facility may submit memoranda on any legal issues which it deems relevant to the proceeding. Such memoranda shall become part of the official record of the hearing.

(g) Rate revisions resulting from the procedure set forth in this section shall be made retroactive to the period or periods during which the rates based on the periods audited were established. Any resulting overpayment or underpayment shall be satisfied by either retroactive adjustment of the provisional rate paid, based on the period audited, or prospective adjustment of the current certified rate at the discretion of the State Commissioner of Health.

(h) [All overpayments resulting from rate revisions shall be subject to such penalties as the Commissioner of Health may impose for
the incorrect completion of the report or the failure to file required revisions of the report in the amount of up to 25 percent of the overpayment for negligent incorrect completion or negligent failure to file revisions and up to 100 percent of the overpayment for willful incorrect completion or willful failure to file revisions. The penalties assessed under this section are separate from and shall not be construed to be in mitigation of damages which may be recovered pursuant to section 145-b of the Social Services Law.]

reserved.

(i) Notwithstanding the provisions of this section, the commissioner may promulgate rate revisions based on audits completed by another State agency. Unless otherwise indicated, such audits shall not be considered final and shall not prelude conduct of a complete audit by the State Department of Health or its agent.
Section 86-1.9 Patient days. (a) A patient day is the unit of measure denoting lodging provided and services rendered to one inpatient between the census taking hour on two successive days.

(b) In computing patient days, the day of admission shall be counted but not the date of discharge. When a patient is admitted and discharged on the same day, this period shall be counted as one patient day.

(c) For reimbursement purposes, three newborn days shall be reported as the equivalent of one adult or child day. The following types of care shall not be treated as being rendered to newborns for patient day calculations: premature infant, newborn remaining in hospital after mother’s discharge, sick infant care requiring general hospital service, and infant care to those born outside the hospital and not placed in the newborn nursery.

(d) For reimbursement purposes, patient days for medical/surgical, pediatrics, and maternity shall be computed as follows:

(1) Medical-surgical patient days for facilities located in counties having an average population density of 100 or more persons per square mile shall be determined by using the higher of the minimum utilization factor of 85 percent of certified beds or actual patient days of care furnished by the facility. Medical-surgical patient days for facilities located in counties having an average population density of less than 100 persons per square mile shall be determined by using the higher of the minimum utilization factor of 80 percent of certified beds or actual patient days of care furnished by the facility.

(2) Pediatric patient days shall be determined by using the higher of the minimum utilization factor of 70 percent of certified beds or actual patient days of care furnished by the facility.

(3) Maternity patient days for facilities located in areas having a plan approved by the commissioner for the regionalization of obstetrical service, and subsequent to January 1, 1978 for all facilities including those services in areas not having an approved plan shall be determined as follows:

(i) Maternity patient days for facilities in counties with an average population density of 100 or more persons per square mile shall be determined by using the lower of the minimum utilization factor of 75 percent of certified beds or, if the facility generated less than 1,500 live births, the difference between 1,500 and the actual number of live births generated by the facility multiplied by the average length of stay for a maternity patient plus the actual days of care furnished by the facility or, if the facility generated more than 1,500 live births, the actual days of care furnished by the facility.

(ii) Maternity patient days for facilities in counties with an average population density of less than 100 persons per square mile shall be determined by using the lower of the minimum utilization factor of 60 percent of certified beds or, if the facility generated less than 500 live births, the
difference between 500 and the actual number of live births generated by the facility multiplied by the average length of stay for a maternity patient plus the actually days of care furnished by the facility or if the facility generated more than 500 live births, the actual days of care furnished by the facility.

(iii) Maternity service patients for purpose of computations pursuant to subparagraphs (i) and (ii) of this paragraph shall include obstetrical and gynecological patients housed in the maternity unit.

(4) The provisions of paragraphs (1) and (2) of this subdivision shall be waived in total or in part by the Commissioner of Health in those cases where waiver has demonstrated to be a matter of public interest and necessity. Where a facility could reach its minimum utilization factor by reducing the certified bed capacity by more than five beds or one percent of its certified bed complement, whichever is greater, the commissioner may grant a waiver only if the facility decertifies the total number of beds necessary to reach the minimum utilization factor. Where the minimum bed utilization factor would be reached by decertifying no greater than five beds or one percent of its certified bed complement, a waiver shall be granted and decertification of beds shall not be required.

(5) The provisions of paragraph (3) of this subdivision shall be waived by the Commissioner of Health in those cases wherein there is an approved regional plan and wherein the service in question, its capacity and operation are consistent with the approved regional plan. The provisions of paragraph (3) of this subdivision may be waived by the commissioner where it is a matter of public interest and necessity; if such a waiver is granted, maternity patient days shall be determined by using the higher of the applicable minimum utilization factor or live birth formula as set forth in paragraph (3) of this subdivision.

(6) The provision of paragraphs (1) – (3) of this subdivision shall be waived for rural hospitals as defined in this Title.

(7) No waiver pursuant to this subdivision shall be granted for periods predating the first day of the month following 30 days after receipt by the commissioner of the request and justification for the waiver, and fulfillment of conditions to the waiver, where such conditions exist.

(e) For reimbursement purposes, patient days for open heart surgery, cardiac invasive diagnostic procedures and kidney transplants shall be computed as follows for those facilities engaged in such operations or procedures:

(1) Patient days for any facility engaged in performing open heart surgery and carrying out less than 100 adult and/or 50 pediatric (less than age 21) operations during the reporting period shall be increased by an amount equal to the average length of stay for the adult and/or pediatric open heart surgery cases multiplied by the difference between 100 adult or 50 pediatric and
the actual number of adult or pediatric open heart surgery operations carried out by the approved cardiac surgical center as referenced in Part 405 of this Title.

(2) Patient days for any facility engaged in performing adult or pediatric (less than 21) cardiac invasive diagnostic procedures and carrying out less than 200 adult and/or 100 pediatric procedures during the reporting period shall be increased by an amount equal to the average length of stay for the adult or pediatric procedures multiplied by the difference between 200 adult and/or 100 pediatric cardiac invasive diagnostic procedures and the actual number of procedures carried out by the approved cardiac diagnostic center as referenced in Part 405 of this Title.

(3) Patient days for any facility engaged in kidney transplants and carrying out less than 25 such transplants during a reporting period shall be increased by an amount equal to the average length of stay for kidney transplants multiplied by the difference between 25 and the actual transplants carried out by the facility.

The provisions of this subdivision may be waived by the State Commissioner of Health upon application by the health facility in those cases where waiver is found to be a matter of public interest and necessity. No waiver shall be granted for periods predating the first day of the month following 30 days after receipt by the commissioner of request and justification for the waiver.

(f) Patient days for all alternate level of care (ALC) services shall be reported separately. Patient days for alternate level of care services shall be utilized in the determination of minimum utilization standards as set forth in section 86-1.9(d) of this Subpart.

(g) For rate year 1985 hospitals located in an HSA region where the average daily medical/surgical occupancy is less than the appropriate minimum utilization factor set forth in paragraph (1) of subdivision (d) of this section and the hospital itself has an average daily medical/surgical occupancy of less than the appropriate minimum utilization factor set forth in paragraphs (1) and (4) of subdivision (d) of this section and the hospital provides alternate level of care services, the hospital's title XIX rate shall be reduced by the difference between its title XIX rate and the facility’s allowable routine cost as determined pursuant to this Subpart and a statewide average of allowable ancillary costs for hospital-based skilled nursing or health related facilities, as appropriate to the level of care actually provided to the patient and as determined pursuant to Subpart 86-2 of this Title. Beds for which a facility has applied for decertification by January 1, 1986 and which are decertified by the commissioner shall not be counted in the calculation of occupancy rates for the purposes of this subdivision. The provisions of this subdivision shall be waived for hospitals which in 1985 meet the definition of rural hospital set forth in section 405.2(m) of this Title and which are not identified as unnecessary in the state and regional medical facilities plan established pursuant to section 710.13 of this Title.

TN #85-34 Approval Date July 23, 1987
Supersedes TN #81-36 Effective Date January 1, 1986
Section 86-1.10 Effective period of reimbursement rates. Certification of reimbursement rates of payment by governmental agencies shall be for a 12-month calendar year period or for such other period as may be prescribed. Certification of reimbursement rates by article IX-C corporations shall be for the periods specified in the reimbursement formula approved by the Commissioner of Health.
Section 86-1.11  Computation of basic rate -

(b) Payment rates for the period January 1, 1983 through December 31, 1983 shall be established on a prospective basis. Such payments shall be computed on the basis of allowable historical inpatient expense based on the fiscal and statistical data submitted by the medical facility for the fiscal year ended at least six months prior to January 1, 1983 and upon the data described below. The computed rates shall be all-inclusive rates taking into consideration total allowable costs and total inpatient days, except as stated in subdivision (1) of this section and section 86-1.41 of this Subpart. Total allowable costs of a facility shall be apportioned among beneficiaries of programs administered under titles XVIII and XIX of the Federal Social Security Act and article IX-C of the New York State Insurance Law and other patients, so that the share borne by each program is based upon actual services received by that program's beneficiaries. To accomplish this apportionment, for each program the ratio of beneficiary charges to total patient charges for the services of each ancillary department shall be applied to the cost of the department; to this shall be added the cost of routine services for program beneficiaries, determined on the basis of an average cost per diem.

(1) Hospitals with charge structures from which an apportionment of costs cannot be determined will be paid only on the basis of total average cost per diems, unless the hospital can provide adequate and verified statistical data to apportion ancillary costs among beneficiaries.

(2) After July 1, 1984 the apportionment computed in this section will be revised to reflect 1982 charge data and patient day data received by the Commissioner pursuant to section 86-1.3 of this Subpart.

(3) In 1983, costs of malpractice insurance premiums and self-insurance fund contributions must be separately accumulated and directly apportioned among programs on the basis of average cost. In 1984 and 1985, one-third and two-thirds, respectively, of malpractice costs will be apportioned on the basis of payor experience. Apportionment on the basis of experience shall be based on the dollar ratios for each payor of the facility's malpractice losses paid by that payor to its total paid malpractice losses for the current cost reporting period and the preceding four-year period. If a facility has no malpractice loss experience for the five-year, the costs of malpractice insurance premiums or self-insurance fund contributions must be apportioned among the programs based on the national ratio of malpractice awards paid to program beneficiaries to malpractice awards paid to all patients. If a facility pays allowable uninsured malpractice losses incurred by program beneficiaries, either through allowable deductible or coinsurance provisions, or as a result of an award in excess of reasonable coverage limits, or as

TN #85-34 Approval Date July 23, 1987
Supersedes TN #81-36 Effective Date January 1, 1986
a governmental provider, such losses and related direct costs must be directly assigned to a respective program for reimbursement.

(c) (1) To the allowable basic rate, computed in accordance with ceiling limitations and to the discrete alternate level of care rate if applicable, and prior to the addition of capital costs (depreciation, leases and interest), there will be added a factor to project allowable cost increases during the effective period of the reimbursement rate. This factor shall be developed in accordance with section 86-1.15 of this Subpart. The allowances specified in subdivisions (e)-(g) of this section shall be computed on the basis of, and added to, the trended basic rate plus capital costs.

(2) reserved

(d) General hospital inpatient revenue cap. (1) An inpatient revenue cap for each general hospital for each of the rate years 1984 and 1985 shall be established as follows and shall include only the revenues set forth below. An initial inpatient revenue cap shall be calculated for each general hospital by first trending to each rate year the allowable historical inpatient operational expenses reimbursed in 1983. The initial allowable historical inpatient operational expenses to be trended shall reflect all closed appeals and audit adjustments pursuant to this Subpart. The trend factors used shall be developed in accordance with section 86-1.15 of this Subpart. The following revenues shall then be added to trended allowable historical inpatient operational expenses for each rate year:

(i) capital related inpatient expenses determined in accordance with sections 86-1.29 and 86-1.30 of this Subpart;
(ii) the allowances provided for in subdivisions (e)-(g) of this section, calculated for each rate year utilizing the sum of trended allowable historical inpatient operational expenses and capital related inpatient expenses; and
(iii) any anticipated additional revenues generated by a general hospital’s charge schedule, developed in accordance with section 86-1.2 of this Subpart, for each respective rate year.

(2) The initial revenue caps for rate years 1984 and 1985 shall be adjusted to reflect the following:

(i) case mix changes pursuant to the provisions of subdivision (s) of this section and volume changes;

(ii) appeals filed and/or adjustments made pursuant to sections 86-1.16 and 86-1.17 of this Subpart; and
(iii) any adjustments made in payments under title XVIII of the Federal Social Security Act (Medicare) pursuant to section 86-1.43 of this Subpart.

(3)(i) The commissioner shall require direct repayment or adjust a subsequent year's inpatient revenue cap to reflect actual inpatient revenues received for inpatient services provided by a general hospital that exceed a previous year's inpatient revenue cap initially established or adjusted in accordance with this Subpart. A general hospital determined to have such excess revenues shall be subject to direct repayment or adjustment of a subsequent revenue cap when such excess is due to establishment of a charge schedule that is not in compliance with section 86-1.2(c) of this Subpart. Revenue received established as a result of the provisions of title XVIII of the Federal Social Security Act (Medicare) phase-in policies or from charges authorized under section 86-1.17(h) of this Subpart in excess of the revenue cap shall not be included in the adjustment.

(ii) A facility that maintains charge schedules less than the maximum set forth in section 86-1.2(c) of this Subpart such that it results in it receiving less than the maximum allowable charge paying rate shall not be compensated by other payors for the amount by which its charge revenues are less than the maximum amount allowed.

(4) That portion of the revenue cap that is related to utilization of inpatient services shall be apportioned among beneficiaries of programs administered under titles XVIII and XIX of the Federal Social Security Act and article IX-C of the New York State Insurance Law, and those enrolled in organizations operating in accordance with the provisions of article 44 of the Public Health Law, so that the share borne by each program is based upon actual services received by that program's beneficiaries. To accomplish this apportionment, for each ancillary department, the ratio of total department costs to total department charges will be applied to program beneficiary charges for the services of that ancillary department to develop an ancillary cost per day for beneficiaries of that program; to this shall be added the cost of routine services for program beneficiaries, determined on the basis of an average cost per diem.

(i) Any adjustment in the overall revenue cap in accordance with this Subpart shall be reflected in an appropriate adjustment to this portion of the revenue cap and payment levels by these programs.

(ii) After such adjustments, the portion of the revenue cap initially established, or as adjusted, that is related to the actual utilization of covered inpatient services of the above programs, shall constitute guaranteed revenue to the general hospital.
(iii) Hospitals with charge structures from which an apportionment of costs cannot be determined will be paid only on the basis of total average cost per diem, unless the hospital can provide adequate and verified statistical data to apportion ancillary costs among beneficiaries.

(f) reserved

(g) Bad debt and charity care regional pools and allowances. Regional pools will be established from which allowances will be added to hospital rates to help pay for the costs of bad debt and charity care for the three year period commencing January 1, 1983, and ending December 31, 1985. Such pools shall receive funds from hospitals pursuant to this subdivision and section 86-1.37 of this Subpart. For the rates established in 1983, the resources available for purposes of establishing the bad debt and charity care pools shall be calculated on the basis of two percent of the total statewide general hospital (including both major public hospitals and all other hospitals) reimbursable inpatient operating costs after application of the trend factor plus the addition of capital costs. For the rates established in 1984 and 1985, the resources available for establishing these pools shall be calculated on the basis of three percent and four percent, respectively of total statewide general hospital reimbursable inpatient operating costs in the respective rate year after application of the trend factor plus the addition of capital costs.

(1) To be eligible to receive an allowance from the bad debt and charity care pool funded by paragraph (4) of this subdivision and the financially distressed hospital pool funded by subdivision (g)(8) of this section, a facility must meet the following criteria. Compliance with these criteria shall be subject to audit.

(i) The costs of bad debt and charity care must be determined according to the following definitions and must be reported in the appropriate sections of the facility’s Institutional Cost Report.
(a) Bad debt. Bad debts are the amounts which are considered to be uncollectible from accounts and notes receivable which were created or acquired in providing services. “Accounts receivable” and “notes receivable” are designations for claims arising from rendering services, and are collectable in money in the next operating cycle. Bad debts shall be determined in accordance with generally accepted accounting principles which recognize the direct charge-off method, the reserve method, or a combination of the direct charge-off method and the reserve method. Additionally, the debt must be related to a service which the facility has been authorized by the commissioner to provide. If an amount previously written off as a bad debt is recovered in a subsequent accounting period, the amount written off must be used to reduce the cost of bad debt for the period in which the collection is made.

(b) Charity care. Charity care is the reduction in charges made by the provider of services because the patient is indigent or medically indigent. Reductions in charge for employees which are accounted for as fringe benefits, such as hospitalization and personal health programs, are not considered charity care. Courtesy allowances, such as free or reduced-charge services provided to other than the indigent or medically indigent, are not considered charity care.

(ii) The facility must maintain reasonable collection efforts and procedures.

(a) The hospital must utilize commonly accepted business methods and practices to collect unpaid amounts from all classes of payors. Such methods may differ for inpatient and outpatient services. The hospital shall utilize good business judgment and practices in determining the amounts to be collected.

(b) The hospital must determine the patient's ability to pay for the services rendered and document the method under which the determination was made.

(c) The hospital must generate and maintain written documentation of requests for payment for services provided.

(d) The hospital must take any subsequent actions as appropriate within good business practice such as subsequent billings, collection letters or telephone calls. These subsequent actions must be documented.

(e) The hospital may turn accounts over to a collection agency. Amounts turned over may be written off as a bad debt at the time of turnover. Amounts collected by the facility after write-off
constitute a recovery of bad debts in the period collected.

(f) The hospital shall not be required to pursue judgment claims before the account can be written off.

(g) A policy which is consistent and follows commonly accepted business methods and practices concerning the time period that must elapse between initial billing and the determination that an unpaid bill is a bad debt must be maintained from January 1, 1981 to December 31, 1985. A finding of inconsistency may be waived upon demonstration by the facility that a policy change served to make bad debt determination policies consistent with the requirements of this subdivision.

(iii) The facility shall submit by October 1, 1983 and thereafter within 120 days from the beginning of a rate year, a report containing an opinion by its independent certified public accountant or independent licensed public accountant in a form approved by the commissioner after consultation with the New York State Society of Certified Public Accountants, as to whether the facility meets the criteria of this subdivision for eligibility for a distribution from the bad debt and charity pool. The commissioner may accept a report containing an opinion that the facility is in compliance with the criteria of this subdivision as establishing initial eligibility as of the first day of each rate year for distribution from the pool. Thereafter if the commissioner determines that the facility is not in compliance, such noncompliance shall be applicable for the entire rate year. The facility may appeal this noncompliance determination pursuant to the provisions of section 86-1.17(i) of this Subpart. If the facility chooses to appeal the commissioner's determination, the facility will continue to receive payments from its regional pools, if otherwise eligible, until a final determination has been made. If it is finally determined that the facility is not in compliance or if the facility chooses not to appeal the commissioner's determination that it is out of compliance, the facility shall repay to its regional pools all monies received from these pools for the period during which it was out of compliance. If a facility fails to repay such monies to its regional pools within a reasonable period of time, major third-party payors shall adjust the facility's rate as directed by the commissioner to reflect money owed to the pools and shall pay these monies to the pool administrator.

(2) For the purposes of this subdivision only, the following words or phrases shall be defined as follows:

(i) Major public sector shall mean all State-operated general hospitals, all general hospitals operated by the New York City Health and Hospitals Corporation as established in chapter 1016 of the Laws of 1969, as amended and all other
public general hospitals having annual inpatient operating costs in excess of $25 million.

(ii) Voluntary sector shall mean all voluntary nonprofit, private proprietary and public general hospitals other than major public general hospitals.

(m) Payment rates for the periods January 1, 1986 through December 31, 1986 and January 1, 1987 through December 31, 1987 shall be established on a prospective basis and shall be based on the reimbursable operating costs used in determining payments for services provided during 1985. Such costs shall include the annualized cost impact of rate revisions or adjustments made with respect to such services. The computed rates shall be all-inclusive rates taking into consideration total allowable costs and total inpatient days, except as stated in section 86-1.41 of this Subpart.

(1) Total allowable costs of a facility shall be apportioned among beneficiaries of programs administered under titles XVIII and XIX of the federal Social Security Act and article 43 of the New York State Insurance Law and other patients, so that the share assigned to each program is based upon actual services received by that program's beneficiaries. To accomplish this apportionment, for each program the ratio of beneficiary charges to total patient charges for the services of each ancillary department shall be applied to the cost of the department; to this shall be added the cost of routine services for program beneficiaries, determined on the basis of an average cost per diem. This apportionment shall be based on 1984 data. Hospitals with charge structures from which an apportionment of costs cannot be determined will be paid only on the basis of total average cost per diems, unless the hospital can provide adequate and verified statistical data to apportion ancillary costs among beneficiaries.

(2) The costs of malpractice insurance premiums and self-insurance fund contributions must be separately accumulated and directly apportioned among programs on the basis of payor experience. Apportionment on the basis of experience shall be based on the dollar ratios for each payor of the facility's malpractice losses paid by that payor to its total paid malpractice losses for the 1984 cost reporting period and the preceding four-year period. If a facility has no malpractice loss experience for the five-year period, the costs of malpractice insurance premiums or self-insurance fund contributions must be apportioned among the programs based on the statewide ratio of malpractice awards paid to program beneficiaries to malpractice awards paid to all patients. If a facility pays allowable uninsured malpractice losses incurred by program beneficiaries, either through allowable deductible or coinsurance provisions, or as a result of an award in excess of reasonable coverage limits, or as a governmental provider, such losses and related direct costs must be directly assigned to a respective program for reimbursement.

(3) reserved
(4) To the allowable basic rates, computed in accordance with ceiling limitations and prior to the addition of a factor for capital costs, there will be added a factor to project allowable cost increases during the effective period of the reimbursement rate. This factor shall be developed in accordance with section 86-1.15 of this Subpart. The allowances specified in subdivisions (p) and (q) of this section shall be computed on the basis of, and added to, the trended basic rate plus capital costs.

(5) Adjustments to rates shall be made to reflect case mix and volume changes and appeals filed and/or adjustments made pursuant to this Subpart.

(p) Regional pools in 1986 and 1987: bad debt and charity care. Regional pools will be established from which allowances will be added to hospital rates to help pay for the costs of bad debt and charity care for the rate years 1986 and 1987. Such pools shall receive funds from hospitals pursuant to the provisions of this subdivision and section 86-1.37 of this Subpart. For the rates established in 1986 and 1987, the resources available for the purposes of establishing the bad debt and charity care pools shall be calculated on the basis of four and one-half percent of the total statewide general hospital (including both major public hospitals and all other hospitals) reimbursable inpatient costs after application of the trend factor excluding inpatient costs related to services provided to beneficiaries of subchapter XVIII of the federal Social Security Act, and inpatient uncollectible amounts.

(1) To be eligible to receive an allowance from the bad debt and charity care pool funded by paragraph (4) of this subdivision and the financially distressed hospital pool funded by subdivision (q) of this section, a facility must meet in 1986 and 1987 the criteria specified in paragraphs (1) and (2) of subdivision (g) of this section with the following exception: a policy which is consistent and follows commonly accepted business methods and practices concerning the time period that must elapse between initial billing and the determination that an unpaid bill is a bad debt must be maintained from January 1, 1981 to December 31, 1987. Compliance with these criteria shall be subject to audit.

(2) For the purpose of this subdivision only, the following words or phrases shall be defined as follows:

(i) Major public sector shall mean all State-operated general hospitals, all general hospitals operated by the New...
York City Health and Hospitals Corporation as established by chapter 1016 of the Laws of 1969, as amended, and all other public general hospitals having annual inpatient operating costs in excess of $25 million.

(ii) Voluntary sector shall mean all voluntary nonprofit, private proprietary and public general hospitals other than major public general hospitals.

(3) Hospital need shall be calculated pursuant to the provisions of paragraph (3) of subdivision (g) of this section.

(4) reserved

(p)(5) reserved
(s) A case mix adjustment to general hospitals’ rates of payment and revenue caps shall be made in 1984 and 1985 and to general hospitals’ rates of payment in 1986 and 1987 according to the provisions of this subdivision.

(1) For 1984 and 1985, a hospital shall have its case mix changes from 1981 to the appropriate rate year calculated on the basis of the patient discharge data submitted to the commissioner by the hospital pursuant to the provisions of subdivisions (f) and (g) of section 86-1.3 of this Subpart and section 405.29 of Chapter V of this Title, operating cost per day service intensity weights (SIWs) developed by the department, and diagnosis related group (DRGs). (The SIWs are the relative cost weights established by the department for DRGs such that the SIW for any given DRG indicates how expensive the average patient is in those DRGs compared to the average patient in all DRGs). The operating cost per day SIWs shall be all-payor SIWs.

(2) For 1986 and 1987, a hospital shall have its case mix changes from the previous rate year to the appropriate rate year calculated on the basis of the non-Medicare patient discharge data submitted to the commissioner by the hospital pursuant to the provisions of subdivisions (f) and (g) of section 86-1.2 of this Subpart and section 405.29 of Chapter V of this Title, operating cost per day service intensity weights (SIWs) developed by the department and diagnosis related groups (DRGs). The operating cost per day SIWs shall be non-Medicare payor SIWs.

(3) Hospitals whose case mix as measured according to the provisions of paragraphs (1) and (2) of this subdivision increased by an amount less than or equal to 1 percent but did not decrease by an amount greater than [or equal to] 2 percent shall not receive any adjustment. Hospitals whose case mix increased by more than 1 percent [or more] or decreased by more than 2 percent [or more] shall receive an adjustment to their operating rates of payment and revenue caps pursuant to the provisions of paragraph [(5)] (4) of this subdivision.

[(3) For 1986, a hospital shall have its case mix change from 1985 to 1986 calculated as follows:

(i) The department shall evaluate all hospitals’ patient discharge data used as the basis upon which the hospital’s case mix change is calculated for the percentage of patient records which, relevant to the data necessary to assign a patient to a diagnosis related group, are either inconsistent, incomplete, or not sufficiently specific.

(ii) A hospital having 10 percent or less of its discharge data which is incomplete, inconsistent or not sufficiently specific shall have its case mix change calculated on the basis of the patient discharge data submitted to the commissioner by the hospital pursuant to the provisions of subdivisions (f) and (g) of section 86-1.3 of this Subpart and section 405.29 of Chapter V of this Title, operating cost per day service intensity weights, and patient groupings which shall include major diagnostic categories and may include such factors as:

(a) presence of surgical procedures other than imaging procedures;

(b) sex; and

(iii) A hospital having more than 10 percent of its discharge data which is incomplete, inconsistent or not sufficiently specific shall have its case mix change calculated on the basis of the patient discharge data submitted to the commissioner by the hospital pursuant to the provisions of subdivisions (f) and (g) of section 86-1.3 of this Subpart and section 405.29 of Chapter V of this Title, operating cost per day service intensity weights, and patient groupings which shall include major diagnostic categories and may include such factors as:

(a) presence of surgical procedures other than imaging procedures;

(b) sex; and

Approval Date January 29, 1988
Effective Date January 1, 1987
(c) age.

The SIWs that shall be used shall be payor specific.

(4) In 1986, hospitals shall have their operating rates adjusted for only those payors whose case mix index calculated according to the provisions of paragraph (3) of this subdivision changes by 1 percent or more. Adjustment shall be made according to the provisions of paragraph (5) of this subdivision.

(5) The rates of payment and revenue caps of hospitals eligible for a case mix adjustment shall be adjusted as follows:

(i) [in no case shall the first 1 percent of change in case mix be reflected in an adjustment to hospital rates of payment and revenue caps, except as calculated for rate years 1984 and 1985 pursuant to paragraph (2) of this subdivision;]

(ii) for those hospitals receiving an adjustment pursuant to the provisions of paragraph (3) of this subdivision the operating cost per diems paid to hospitals shall be adjusted upward or downward in direct proportion to the percent of change in case mix, as measured according to the provisions of either paragraph (1) or (3) of this subdivision, as appropriate, that exceeds [1 percent, except as provided in paragraph (2) of this subdivision] the corridors established in paragraph (3) of this subdivision and in accordance with subparagraph (iii) of this paragraph; and

(iii) the commissioner shall not recognize the total upward case mix adjustment provided for in this subdivision if he finds that prior rate year adjustments have previously reimbursed a portion of all of such case mix associated cost increases. Such prior rate year adjustments shall include adjustments pursuant to section 86-1.12 of this Subpart which included an adjustment for case mix and that portion of any rate adjustment made pursuant to paragraphs (1), (3), (4) and/or (7) of section 86-1.17(a) of this Subpart which accounted for a change in case mix.
86-1.12* Volume adjustment. Within six months following the rate period, a volume adjustment to the rate will be made for those hospitals which meet the following criteria and which are entitled pursuant to the following calculations:

(a) The adjustment will be available for all hospitals except those:

(1) which closed during the rate year of the volume adjustment; and

(2) with rates calculated based on budget.

(b) The rate will be adjusted according to the following rules:

(1) The change in total certified days will be construed as the net change in total certified days attributable to a change in the facility's average length of stay from the base year to the rate year and a change in the facility's number of discharges from the base year to the rate year.

(2) And change of less than one percent in total certified days from the base year to the rate year, adjusted for leap years, will result in no rate adjustment.

(3) Any change of less than five percent but greater than or equal to one percent in total certified days from the base year to the rate year, adjusted for leap years, will result in an automatic rate adjustment, from which there shall be no administrative appeal.

(i) In calculating this automatic rate adjustment, it will be recognized that all of a facility's capital costs are fixed. Operating costs shall be considered fixed where there are decreases in volume as measured by discharges and/or average length of stay. Operating costs shall be considered variable where there are increases in volume as measured by discharges and/or average length of stay.

(ii) That portion of the automatic rate adjustment for operating costs attributable to the facility's change in average length of stay from the base year to the rate year shall be made incrementally according to the steps in the following table:

<table>
<thead>
<tr>
<th>Decrease in Patient Days</th>
<th>Increase In Patient Days</th>

(4) A change greater than or equal to five percent in total certified days between the base year and the rate year, adjusted for leap years, will result in a further rate adjustment which will be in accordance with subparagraphs (3)(i)-(iii) of this subdivision.

(i) A facility having a change in total certified days of greater than or equal to five percent may ask the commissioner to review the reasons for the change in volume and to revise the target volume and/or fixed and variable percentage(s). The commissioner shall determine the cause for the change and its relation to the efficient costs of providing patient care services. Based upon this review, the commissioner may adjust the target volume and/or the fixed and variable percentage(s) cited in paragraph (3) of this subdivision upward and/or downward, independent of the facility’s request to allow the hospital to be reimbursed for the costs of efficient production of services for the change in volume.

(ii) Facilities having a change in total certified days of greater than or equal to five percent shall have the right to administratively appeal their rate adjustment pursuant to section 86-1.17 of Subpart, within 120 days of receipt of the initial notice of said adjustment.

(c) Similarly, when utilization in the base year or rate year is affected by labor strikes, lockouts, or by the establishment of a certified hospital-based ambulatory surgery service as defined in section 405.2(n) of this Title, a proportionate revision to the target volume will be determined.

(d) All payment adjustments resulting from the application of this provision shall be made within six months following the republication of rate referred to above.

(e) Volume adjustment for 1986 and 1987. Within six month following the rate period, a volume adjustment to the rate will be made in accordance with subdivisions (a) through (d) of this section based upon changes in utilization between 1985 as the base year and 1986 as the rate year, and 1986 as the base year and 1987 as the rate year, with the following exceptions:

(1) The volume adjustment shall take into consideration only changes in total certified days for other than beneficiaries of title XVIII of the Federal Social Security Act.

(2) The commissioner may provide for the volume adjustment in the rate year if the facility submits in writing a request for such an adjustment and the facility decertifies at a minimum the equivalent of the number of beds comprising one nursing unit.

(3) If a hospital has experienced a change of greater than five percent in total certified days between 1981 (base year) and 1985.

TN #88-6 Approval Date August 1, 1991
Supersedes TN #87-5 Effective Date January 1, 1988
(rate year), and did not meet minimum medical/surgical utilization requirements of section 86-1.9 of this Subpart in 1985, and received a rate adjustment in accordance with this section, 86-1.12, for the 1985 rate year, the commissioner shall adjust such hospital's 1987 rate for changes in certified days from 1986 to 1987 and shall, in calculating such hospital's 1987 per diem inpatient rate, include those imputed medical/surgical days necessary to meet the minimum medical/surgical utilization requirements pursuant to section 86-1.9 unless such hospital submits in writing by December 31, 1987 a request to decertify the beds necessary to meet such minimum medical/surgical utilization requirements. In no event shall the volume adjustment computed in accordance with this paragraph result in a per diem rate greater than the hospital's actual rate year inpatient per diem costs.

TN #88-6
Supersedes TN #87-5
Approval Date August 1, 1991
Effective Date January 1, 1988
Section 86-1.13 Groupings. (a) For the purpose of establishing routine and ancillary cost ceilings (for other than specialty hospitals), peer groups of hospitals shall be developed taking into consideration, but not limited to, the following general criteria:

1. case mix;
2. service mix;
3. patient mix;
4. size of facility;
5. teaching activity; and
6. geographic location.

(b) Based on the variable listed in subdivision (a) of this section, the commissioner shall establish a group for each facility in which the facility is at the center of its group—called seed clustering. The size of each group may be variable and shall be determined using acceptable statistical parameters which define the degree of comparability within each group. For the purpose of grouping in accordance with seed clustering, hospitals will be stratified to separate facilities located in the Blue Cross/Blue Shield of Greater New York region from facilities in the rest of the State.

(c) In the event a hospital fails to submit the data required for inclusion in a group which is developed in accordance with subdivision (a) of this section, the commissioner, on the basis of available data, shall develop proxy measures for the required variables, and based on these measures shall construct a peer group. The proxy variables shall not have a financial impact on any facility except that which failed to submit the requisite data.
Section 86-1.14  Ceilings on payments.  (a)  Reimbursement rate ceilings will be established as specified in this section for comparable groups of medical facilities (except specialty hospitals) developed in accordance with section 86-1.13 of this Subpart.  The ceilings shall be established after the application of a wage equalization factor and a power equalization factor but prior to the addition of a factor to bring costs to projected expenditure levels during the effective period of the reimbursement rate.

(b) Facilities with ancillary costs less than 75 percent or over 125 percent of the peer group weighted average shall have such costs raised or lowered to the specified limits.  The peer group weighted ancillary average cost of the respective groups shall then be recomputed with these adjustments.  The original ancillary costs of such facilities shall be subject to the ceilings.

(c)(1) In computing the allowable costs for inpatient routine services for hospitals, no amount shall be included that is in excess of 107.5 percent of the weighted average per diem cost, using total expected patient days developed from application of the length of stay standards, of routine inpatient services of all hospitals in the peer group.  For the purposes of this calculation, the total expected patient days shall also include imputed days.  For the purpose of this computation, routine inpatient services shall not include capital costs, or costs of schools of nursing, ambulance services, interns and residents, supervising physicians and other physicians.  In computing the allowable costs for ancillary services for hospitals, no amount shall be included that is in excess of 105 percent of the weighted average per discharge cost of ancillary services (including imputed discharges) of all hospitals in the peer group.  For the purpose of this computation, ancillary services shall not include capital costs, costs of schools of nursing, ambulance services, interns and residents, supervising physicians and other physicians.  In determining a facility’s disallowances, its routine and ancillary ceilings shall subsequently be adjusted to consider differences in a hospital’s case mix complexity relative to its peers.

(2) For the purpose of establishing limits on allowable costs for interns and residents, supervising physicians and other individual physicians, no amount shall be included which is in excess of their operational cost per day in the prior year inflated by the price index used for physician services as developed in section 86-1.15 of this Subpart.  For the purpose of this computation, other costs excluded from peer group ceiling calculations as set forth in paragraph (1) of this subdivision, shall not be included.

(d) For the purposes of adjusting the allowable costs for inpatient routine services for other than specialty hospitals, a total length of stay standard for each hospital will be developed which shall take into consideration the following variables:

(1) patient mix characteristics;

(2) whether the hospital is a teaching or nonteaching institution;
(3) the diagnostic mix of the hospital, including whether the hospital has a certified hospital-based ambulatory surgery service;

(4) presence or absence of surgery; and

(5) the geographic region the hospital is located in.

For the purpose of establishing standards a teaching hospital is one which has a special educational index greater than 100, as determined by the commissioner.

(e) For the purpose of establishing limits on allowable costs for a specialty hospital, a weighted average percentage change in operational cost per day from the prior year to the base year will be computed for facilities in that hospital’s region. In computing the allowable cost for specialty hospitals no amount shall be included which is in excess of their operational cost per day in the prior year inflated by the aforementioned average percent change. For the purpose of this computation, costs excluded from peer group ceiling calculations, as set forth in subdivision (c) of this section shall not be included. In addition, reimbursement for specialty hospitals shall be limited to the movement in the application of the trend factor established under section 86-1.15 of this Subpart for 1984 and 1985 reimbursement periods. The allowances and pool distributions described in 86-1.11 shall be available to specialty hospitals pursuant to the conditions of that section.

* * *

(h) Limits on ceiling disallowances. (1) The total percentage of regional operational disallowances, excluding the minimum utilization disallowances, will be limited to the percentage of 1982 regional costs disallowed as a result of routine disallowances and one-half the length of stay disallowances, adjusted by a statewide adjustment factor, plus ancillary disallowances and the professional component limitation as set forth in subdivision (c) of this section. This maximum disallowance and the rate year disallowance subject to it will be adjusted to reflect appeals. Any excess disallowance in 1983 will result in proportionate relief to all hospitals subject to the disallowance within the affected region.

* * *
86-1.15* Calculation of trend factor. (a) The commissioner shall establish a trend factor for allowable operating cost increases during the effective period of the reimbursement rate. Such factor shall be determined as follows:

(1) The elements of a medical facility’s costs shall be weighted based upon data for the following categories:

   (i) salaries;
   (ii) employee health and welfare expense;
   (iii) nonpayroll administrative and general expense;
   (iv) nonpayroll household and maintenance expense;
   (v) nonpayroll dietary expense; and
   (vi) nonpayroll professional care expense.

(2) Each weight shall be adjusted by the appropriate price index for each category noted above, as well as for subcategories. Included among these cost indicators are elements of the United States Department of Labor consumer and wholesale price indices and special indices developed by the State Commissioner of Health for this purpose.

(3) Geographic differentials may be established where appropriate.

(4) The cost indicators used in determining the projection factors shall be compared on a semiannual basis with available data on such indicators, and any other economic indicators as deemed appropriate by the Commissioner of Health. Based upon such review the commissioner may, in his discretion, either certify new rates or adjust subsequent rates for any period or portion thereof when he determines that such new or adjusted rates are necessary to avoid substantial inequities arising from the use of previously certified rates.

(5) This subdivision has been superseded by section 2807-a(8) of the Public Health Law. The commissioner shall implement adjustments to the trend factor semiannually; provided, however, that adjustments, except for the final adjustment, in the trend factor, shall not be required unless such adjustment would result in the weighted average of the operating cost component of the rates of charge limits differing by more than one half of one percent from that which was previously determined.

(b) (1) The maximum increase in allowable charges shall be calculated by the use of the trend factors calculated in accordance with the methodology described in subdivision (a) of this section.

(2) The maximum allowable increase in gross inpatient charges shall be the product of allowable 1982 gross inpatient charges, the 1983 trend factor, and the ratio of 1981 inpatient costs to 1980 gross inpatient charges.

* Used in the calculation of rates for the period January 1, 1983 through December 31, 1987.
(3) The provisions of this subdivision shall expire on December 31, 1983.
Section 86-1.16 Adjustments to provisional rates based on errors.
Rate appeals pursuant to section 86-1.17(a)(1)-(2) of this Subpart, if not commenced within 120 days of receipt of the commissioner’s initial rate computation sheet, may be initiated at time of audit of the base year cost figures upon or prior to receipt of the notice of program reimbursement. Such rate appeals shall be recognized only to the extent that they are based upon mathematical or clerical errors in the cost and/or statistical data as originally submitted by the medical facility, or revisions initiated by a third-party fiscal intermediary or, in the case of a governmental facility, by the sponsor government, or mathematical or clerical errors made by the Department of Health. Such notice of appeal must be presented in writing prior to or at the exit conference for such audits.
Section 86-1.17 Revisions in certified rates

(a) The State Commissioner of Health shall consider only those applications for prospective revisions of certified rates and any established revenue cap in the current year which are in writing and are based on one or more of the following:

1. reserved
2. reserved
3. reserved
4. Documented increases in the overall operating costs of a medical facility resulting from capital renovation, expansion, replacement or the inclusion of new programs, staff or services approved for the medical facility by the commissioner through the certificate of need (CON) process. The provisions of this paragraph shall be applicable with respect to appeals filed with payors, including article 43 corporations and intermediaries responsible as payors for titles XVIII and XIX Social Security Act programs. To receive consideration for the reimbursement of such...
costs in the current rate year, a facility shall submit, at time of appeal or as requested by the commissioner, detailed staffing documentation, proposed budgets and financial data, anticipated unit costs and incremental costs for all directly and indirectly affected cost centers, initiated by the approved CON application involving any of the aforesaid activities pursuant to section 710.1 of this Title.

(i). reserved
(ii) If after the application of the programmatic and cost analyses, the commissioner determines that the budgeted incremental operating costs are more than 7.5 percent of the base year reimbursable operating costs for the rate(s) and rate year being appealed, a facility shall be reimbursed as follows:

(a) Net incremental costs, which are based on budgeted data, shall be determined by the commissioner after programmatic and cost analyses. Such analyses shall include, but not be limited to, a facility-wide review of cost centers directly and indirectly affected by the approved CON project. Such analyses shall result in a determination which limits budgeted costs as follows:

(1) Net increases in staffing shall be evaluated in accordance with the department peer group guidelines. For the purpose of establishing peer group staffing guidelines, at least the following general criteria shall be considered:

(i) number of certified beds;
(ii) allocation statistics appropriate to each cost center or unit of service; and

(iii) number of full-time equivalents (FTE's) per each cost center or unit of service.

Based on the groups established pursuant to the above, the commissioner shall develop staffing guidelines which shall be the average of staffing within a group for each cost center or unit of service. The guidelines developed through this process in conjunction with the programmatic review shall be used to evaluate the appealing facility’s requested FTE complement per cost center or unit of service.

(2) Nonsalary reimbursable operating costs shall be limited to the facility’s base year unit costs or, if these are not available, to group average unit costs, trended forward to the respective rate year by the trend factor established according to section [86-1.15] 86-1.58 of this Subpart, multiplied by the appropriate budgeted statistics.

(3) Energy costs shall be reimbursed in full if the facility can document that it has:

(i) performed an energy audit pursuant to the guidelines of the State Energy Office in the “Energy Audit Report, EA-1 10-80 (revised as of October 1980), General
New York
54(a)

Instructions, Grant Programs for Schools and Hospitals and Buildings Owned by Units of Local Government and Public Care Institutions” and the accompanying Energy Audit Report, which are hereby incorporated by reference. Copies of the Energy Audit General Instructions and Report may be obtained from the New York State Energy Office, Empire State Plaza, Agency Building 2, 20th Floor, Albany, New York 12223. A copy is available for inspection and copying at the Records Access Office of the New York State Department of Health, Erastus Corning 2nd tower, Empire State Plaza, Albany, New York 12237, and at the New York State Department of State, 162 Washington Avenue, Albany, New York 12231; and

(ii) adhered to Subchapter C, Chapter 2, Subtitle BB of Title 9 NYCRR (New York State Lighting Standards), as adopted by the New York State Energy Office on September 16, 1980, hereby incorporated by reference with respect to any new construction which is the subject of an appeal hereunder.
(4) If compliance with the above energy standards has not been documented, then energy costs shall be limited to the base year costs trended forward to the respective year by the trend factor established pursuant to section [86-1.15] 86-1.58 of this Subpart, multiplied by the appropriate budgeted statistics.

Approval Date July 21, 1992

Effective Date January 1, 1989
(c) An application by a medical facility for review of a certified rate is to be submitted on forms provided by the department and shall set forth the basis for the appeal and the issues of fact. Documentation shall accompany the application, where appropriate, and the department may request such additional documentation as determined necessary.

(1) The affirmation of revision of the rate upon such staff review shall be final, unless within 30 days of its receipt a hearing is requested, by registered or certified mail, before a rate review officer on forms supplied by the department. The request shall contain a statement of the factual issues to be re-
solved. The facility may submit memoranda on legal issues which it deems relevant to the appeal.

(2) Where the rate review officer determines that there is no factual issue, the request for a hearing shall be denied and the facility notified of such determination. No administrative appeal shall be available from this determination. The rate review officer, where he determines that there is factual issue, shall issue a notice of hearing establishing the date, time and place of the hearing and setting for the factual issues as determined by such officer. The hearing shall be held in conformity with the provisions of section 12-a of the Public Health Law and the State Administrative Procedure Act.

(3) The recommendation of the rate review officer shall be submitted to the Commissioner of Health for final approval or disapproval and recertification of the rate where appropriate.

(4) The procedure set forth in this subdivision shall apply to all applications for rate reviews which are pending as of April 1, 1978. Rate appeals filed prior to April 1, 1978 will not be required to be resubmitted subsequent to April 1, 1978.

(d) Reserved

(e) In reviewing appeals for revisions to certified rates, the commissioner may refuse to accept or consider an appeal from a medical facility:

(1) providing an unacceptable level of care as determined after review
(2) operated by the same management when it is determined by the department that this management is providing an unacceptable level of care as determined after review by the State Hospital Review and Planning Council in one of its facilities;

(3) where it has been determined by the commissioner that the operation is being conducted by a person or persons not properly established in accordance with the Public Health Law; or

(4) where a fine or penalty has been imposed on the facility and such fine or penalty has not been paid. In such instances subdivision (d) of this section shall not be effective until the date the appeal is accepted by the commissioner.

(f) Any medical facility eligible for title XVIII (Medicare) certification providing services to patients insured under title XIX which is not, or ceases to be, a title XVIII provider of care shall have its current reimbursement rate reduced by 10 percent. This rate reduction shall remain in effect until the first day of the month following certification of such a provider by the title XVIII program. Such rate reductions shall be in addition to any revision of rates based on audit exceptions.

Attachment 4.19-A

TN #89-6
Supersedes TN #85-34

Approval Date July 21, 1992
Effective Date January 1, 1989
86-1.18 Rates for services. (a) The State Commissioner of Health shall, in certifying schedules for government payments to hospitals, separately identify all-inclusive prospective rates for inpatient services, emergency services, clinic services and such other services for which a separate rate is deemed appropriate by the commissioner.

(b) Payment for newborns shall be made at one third of the mother’s rate.

(c) The State Commissioner of Health shall, in certifying schedules for government payments to hospitals, establish one all-inclusive prospective rate for inpatient hospital care to reflect the services provided by each facility possessing a valid operating certificate. In addition, the commissioner shall identify and certify all-inclusive prospective rates for emergency services, clinic services and for such other services as deemed appropriate.
Section 86-1.19 Rates for medical facilities without adequate cost experience. (a) This subdivision shall apply where the fiscal and statistical data of the facility are unavailable through no fault of the provider or its agents, and due to circumstances beyond its control, or when there is a new facility without adequate cost experience, or when there is a new service for which there is a discrete rate and which is without adequate cost experience.

(b) The rates certified for such medical facilities or approved services as set forth in subdivision (a) of this section, shall be determined on the basis of generally applicable factors, including but not limited to the following:

(1) the usual and customary rates, for comparable services, in the geographic area;

(2) satisfactory cost projections;

(3) allowable actual expenditures; and

(4) an anticipated utilization of no less than the average for the geographic area or the minimums established in this Part, whichever is greater.

* * *

(d) All rates of reimbursement certified pursuant to this section shall be subject to audit pursuant to section 86-1.8 of this Subpart. After audit, the facility shall receive a rate based upon actual allowable costs incurred during the rate period, consistent with the provisions of this Subpart.
Section 86-1.20 Less expensive alternatives. Reimbursement for the cost of providing services may be the lesser of the actual costs incurred or those costs which could be reasonably anticipated if such services had been provided by the operation of joint central services or use of facilities or services which could have served as effective alternatives or substitutes for the whole or any part of such service. In this respect, the chief executive officer of a medical facility will be required to submit to the State Department of Health as an attachment to the uniform financial report, effective with report periods beginning on or after January 1, 1977, an affidavit delineating the medical facility’s practices of pursuing joint central services or less expensive alternatives. There must be a letter accompanying the affidavit, reflecting the health systems agency’s acknowledgement that they have received such affidavit.
New York
63

Section 86-1.21  Allowable costs.  (a) To be considered as allowable in determining reimbursement rates, costs must be properly chargeable to necessary patient care. Except as otherwise provided in this Part, or in accordance with specific determination by the commissioner, allowable costs shall be determined by the application of the principles of reimbursement developed for determining payments under the title XVIII (Medicare) program.

(b) Allowable costs may not include costs for services that have not been approved by the commissioner.

(c) Allowable cost shall include a monetary value assigned to services provided by religious orders and for services rendered by an owner and operator of a facility.

(d) Allowable costs may not include amounts in excess of reasonable or maximum title XVIII (Medicare) costs or in excess of customary charges to the general public. This provision shall not apply to services furnished by public providers free of charge or at a nominal fee.

(e) Allowable costs shall not include expenses or portions of expenses reported by individual facilities which are determined by the commissioner not to be reasonably related to the efficient production of service because of either the nature or amount of the particular item.

(f) Any general ceilings applied by the commissioner, as to allowable costs in the computation of reimbursement rates, shall be published in a hospital memorandum or other appropriate manner.

(g) [Reserved]

(h) Allowable costs shall not include costs which principally afford diversion, entertainment or amusement to their owners, operators or employees.

(i) Allowable costs shall not include any interest charged or penalty imposed by governmental agencies or courts, and the costs of policies obtained solely to insure against the imposition of such a penalty.

(j) Allowable costs shall not include the direct or indirect costs of advertising, public relations and promotion except in those instances where the advertising is specifically related to the operation of the facility and not for the purpose of attracting patients.

(k) Allowable costs shall not include costs of contributions or other payments to political parties, candidates or organizations.

(l) Allowable costs shall include only that portion of the dues paid to any professional association which has been demonstrated, to the satisfaction of the commissioner, to be allocable to expenditures other than for public relations, advertising and political contributions. Any such costs shall also be subject to any cost ceilings that may be promulgated by the commissioner pursuant to subdivision (f) of this section.

TN  #85-34 Approval Date  July 23, 1987
Supersedes TN  #81-36 Effective Date  January 1, 1986
(m) [Reserved]

(n) Allowable costs shall not include any element of cost, as determined by the commissioner, to have been created by the sale of a medical facility.
Section 86-1.22 Recoveries of expense. Operating costs shall be reduced by the cost of services and activities which are not properly chargeable to patient care. In the event that the State Commissioner of Health determines that it is not practical to establish the costs of such services and activities, the income derived therefrom may be substituted for costs of these services and activities. Examples of activities and services covered by this provision include:

(a) drugs and supplies sold for use outside the medial facility;

(b) telephone and telegraph services for which a charge is made;

(c) discount on purchases;

(d) living quarters rented to employees;

(e) employee cafeterias;

(f) meals provided to special nurses or patients’ guests;

(g) operation of parking facilities for community convenience;

(h) lease of office and other space of concessionaries providing services not related to medical service;

(i) tuitions and other payments for educational service, room and board and other services not directly related to medical service.

TN #85-34 Approval Date July 23, 1987
Supersedes TN #81-36 Effective Date January 1, 1986
86-1.23 Depreciation. (a) Reported depreciation based on historical cost is recognized as a proper element of cost. Useful lives shall be the higher of the reported useful life or those useful lives from the Estimated Useful Lives of Depreciable Hospital Assets, 1983 edition, American Hospital Association, consistent with title XVIII provisions. This regulation is effective for depreciable assets purchased on or after January 1, 1978. Copies of this publication are available from the American Hospital Association, 840 North Lake Short Drive, Chicago, IL 60611, and a copy is available for inspection and copying at the offices of the records access officer of the Department of Health, Corning Tower, Empire State Plaza, Albany, NY 12237.

(b) In the computation of rates effective January 1, 1975 for voluntary facilities, depreciation shall be included on a straight-line method on plant and nonmovable equipment. Depreciation on movable equipment may be computed on a straight-line method or accelerated under a double declining balance or sum-of-the-years’ digit method. Depreciation shall be funded unless the Commissioner of Health shall have determined, upon application by the facility, and after inviting written comments from interested parties, that the requested waiver of the requirements for funding is a matter of public interest and necessity. Effective with the fiscal year starting on or after January 1, 1981 in instances where funding is required (that being the transfer of monies to the funded accounts), depreciation on major movable equipment shall be funded in the year revenue is received from the reimbursement of each expense and in the amount included in reimbursement for that year. In instances where funding is required, such fund may be used only for capital expenditures with approval as required for the amortization of capital indebtedness. Funding for plant and fixed equipment shall mean that the transfer of monies to the funded accounts shall occur by the end of the fiscal period in which the depreciation is recorded. Board-designated funds and the accrual of liabilities to the funded depreciation accounts (due to/from accounts) shall not be recognized as funding of depreciation. Deposits to the funded depreciation accounts must remain in such accounts [for six months or more] to be considered as valid funding transactions unless expended for the purposes for which it was funded.

(c) In the computation of rates effective January 1, 1975 for public facilities, depreciation is to be included on a straight-line method on plant and nonmovable equipment. Depreciation on movable equipment may be computed on a straight-line method or accelerated under a double declining balance or sum-of-the-years’ digits method.

(d) In the computation of reimbursement rates for proprietary facilities, depreciation is to be computed on a straight-line basis on plant and nonmovable equipment. Depreciation on movable equipment may be computed on a straight-line method or accelerated under a double declining balance or sum-of-the-years’ digits method.
New York
66(a)

(e) Medical facilities financed by mortgage loans pursuant to the Nursing Home Companies Law or the Hospital Mortgage Loan Construction Law shall conform to the requirements of this Subpart. In lieu of depreciation and interest, on the loan financed portion of the facilities, the State Commissioner of Health shall allow level debt service on the mortgage loan, for all loans approved for financing prior to January 1, 1990, together with such required fixed charges, sinking funds and reserves as may be determined by the Commissioner as necessary to assure repayment of mortgage indebtedness. For loans approved for financing on or after January 1, 1990, medical facilities shall receive reimbursement in the form of interest and depreciation in accordance with the remainder of this Subpart.

TN #92-36
Supersedes TN #90-6
Approval Date October 18, 1993
Effective Date July 1, 1992
Section 86-1.24  Interest. (a) Necessary interest on both current and capital indebtedness is an allowable cost for all medical facilities.

(b) To be considered as an allowable cost, interest shall be incurred to satisfy a financial need, and at a rate not in excess of what a prudent borrower would have had to pay in the money market at the time the loan was made. Also, the interest shall be paid to a lender not related through control, ownership, affiliation or personal relationship to the borrower, except in instances where the prior approval of the Commissioner of Health has been obtained. Financial need for capital indebtedness relating to a specified project shall exist when all available restricted funds designated for capital acquisition of that type have been considered for equity purposes.

(c) Interest expense shall be reduced by investment income with the exception of income from funded depreciation, qualified pension funds, trusted malpractice insurance funds, or in instances where income from gifts or grants is restricted by donors. Interest on funds borrowed from a donor restricted fund or funded depreciation is an allowable expense. Investment income shall be defined as the aggregate net amount realized from dividends, interest, rental income, interest earned on temporary investment of withholding taxes, as well as all gains and losses. If the aggregate net amount realized is a loss, the loss shall not be allowable. Rate year investment income shall reduce rate year interest expense allowed for reimbursement as follows:

(i) for all medical facilities, investment income shall

October 18, 1993

TN #92-06 Approval Date

March 11, 1992

Supersedes TN #85-34 Effective Date
(ii) any remaining amount of investment income, after application of paragraph (i), shall be used to reduce capital interest expense reimbursed that year for medical facilities; and

(iii) any remaining amount of investment income after application of paragraph (ii) shall not be considered in the determination of allowable costs.

(d) Interest on current indebtedness shall be treated and reported as an operating, administrative expense.

(e) Interest on capital indebtedness is an allowable cost if the debt generating the interest is approved by the commissioner, incurred for authorized purposes, and the principal of the debt does not exceed either the approval of the commissioner or the cost of the authorized purposes. Capital indebtedness shall mean all debt obligations of a facility that are:

(1) evidenced by a mortgage note or bond and secured by a mortgage on the land, building or nonmovable equipment; a note payable secured by the nonmovable equipment of a facility; a capital lease;

(2) incurred for the purpose of financing the acquisition, construction or renovation of land, building or nonmovable equipment;

(3) found by the commissioner to be reasonable, necessary and in the public interest with respect to the facility. Interest related to refinancing indebtedness shall be considered an allowable cost only to
New York
67(b)

the extent that it is payable with respect to an amount equal to the unpaid principal of the indebtedness then being refinanced. However, interest incurred on refinanced debt in excess of the previously unpaid balance of the refinanced indebtedness will be allowable on acceptance demonstration to the Commissioner of Health that such refinancing will result in a debt service savings over the life of the indebtedness; or

(4) incurred for the purpose of advance refunding of debt. [Losses] Gains and losses resulting from the advanced refunding of debt shall be treated and reported as a deferred charge or asset. This deferred charge or asset is to be amortized on a straight-line basis over the period to the scheduled maturity day of the refunding debt.
(f) Where a public finance authority has established a mortgage rate of interest such that sufficient cash flows exist to retire the mortgage prior to the stated maturity, the amount of the mortgage to be forgiven, at the time of such forgiveness, shall be capitalized as a deferred asset and amortized over the remaining mortgage life, as a reduction to the facility's capital expense.

(g) Voluntary facilities shall report mortgage obligations, financed by public finance authorities for their benefit and which they are responsible to repay, as liabilities in the general fund, when such mortgage obligations are incurred.
Section 86-1.25  Research.  (a) All research costs shall be excluded from allowable costs in computing reimbursement rates.

(b) Research includes those studies and projects which have as their purpose the enlargement of general knowledge and understandings, are experimental in nature and hold no prospect of immediate benefit to the hospital or its patients.
[Section 86-1.26   Educational activities. The costs of educational activities less tuition and supporting grants shall be included in the calculation of the basic rate provided such activities are directly related to patient care services.]
Section 86-1.27 Compensation of operators and relatives of operators. 

(a) Reasonable compensation for operators or relatives of operators for services actually performed and required to be performed shall be considered as an allowable cost. The amount to be allowed shall be equal to the amount normally required to be paid for the same service provided by a nonrelated employee, as determined by the State Commissioner of Health. Compensation shall not be included in the rate computation for any services which the operator or relative of the operator is not authorized to perform under New York State law and regulation.

(b) Any amount reported as compensation for services rendered by an operator or relative of an operator shall not be allowed in excess of the maximum allowance for full time services in carrying out his primary function.

(c) For purposes of subdivision (a) of this section, in determining a reasonable level of compensation for operators or relatives of operators, the commissioner may consider the quality of care provided to patients by the facility during the year in question.
Section 86-1.28 [Costs of related] Related organizations. (a) A related organization shall be defined as any entity which the medical facility is in control of or is controlled by, either directly or indirectly, or an organization or institution whose actions or policies the facility has the power, directly or indirectly, to significantly influence or direct, or a special purpose organization, or where an association of material interest exists in an entity which supplies goods and/or services to the medical facility, or any entity which is controlled directly or indirectly by the immediate family of the operator. Immediate family shall include each parent, child, spouse, brother, sister, first cousin, aunt and uncle, whether such relationship arises by reason of birth, marriage or adoption. A special purpose organization shall be defined as an organization which is established to conduct certain of the facility's patient-care-related or non-patient-care-related activities. The special purpose organization shall be considered to be related if:

(1) the facility controls the special purpose organization through contracts or other legal documents that allow direct authority over the organization’s activities, management and policies; or

(2) the facility is, for all practical purposes, the sole beneficiary of the special organization’s activities. The facility shall be considered the special purpose organization’s sole beneficiary if one or more of the three following circumstances exist:

(i) a special purpose organization has solicited funds in the name of and with the expressed or implied approval of the facility, and substantially all the funds solicited by the organization were intended by
the contributor or were otherwise required to be transferred to the facility or used as its discretion or direction:

(ii) the facility has transformed some of its resources to a special purpose organization, substantially all of whose resources are held for the benefit of the facility; or

(iii) the facility has assigned certain of its functions (such as the operation of a dormitory) to a special purpose organization that is operating primarily for the benefit of the facility.

(b) The costs of goods and/or services furnished to a medical facility by a related organization are included in the computation of the basic rate at the lower of the cost to the related organization or the market price of comparable goods and/or services available in the medical facility's region within the course of normal business operations.

(c) If the medical facility has incurred any costs in connection with a related organization, the final payment rate shall include the costs of such goods and/or services.

October 18, 1993

TN #92-06 Approval Date

March 11, 1992

Supersedes TN NEW Effective Date
Section 86-1.29 Return on investment. (a) In computing the allowable costs of a proprietary medical facility, there shall be included an allowance of a reasonable return on the average equity capital representing the investment by an owner used for the provision of patient care. The percentage to be used in computing the allowance shall be a rate determined annually by the commissioner as reasonably related to the then current money market.

(b) Equity capital is the net worth of the provider adjusted for those assets and liabilities which are not related to the provision of patient care. Equity capital consists of the provider's investment in plant, property and equipment, net of depreciation, and working capital for necessary and proper operation for patient care activities.
Section 86-1.30  Capital cost reimbursement. The capital cost of a facility for purposes of determining and certifying the capital cost component of a rate shall be determined and computed in accordance with the provisions of sections 86-1.23, 86-1.24, 86-1.29, 86-1.59 of this Subpart and be certified and audited as actually having been expended; provided, however, that:

(a) with respect to a facility for which a rate has been determined and certified by the Commissioner of Health prior to March 10, 1975, the Commissioner of Health may continue such method and computation of such rate or make such modifications and changes to lower such rate as in his judgement are necessary and proper and in the public interest; and

(b) with respect to a facility which has been established by the Public Health Council, and for which a rate has not been determined and certified by the Commissioner of Health prior to the effective date of this section, and a legally binding arms length lease was the basis for the establishment approval granted by the Public Health Council, the Commissioner of Health may determine and certify a rate on the basis of such lease. A lease with a related organization described in subdivision (a) of section 86-1.28 of this Subpart shall be deemed to be a non-arms length lease.

(c)(1) The provisions of this section shall not apply to any facility which, as of the effective date of this Subpart, is located in and operated from leased space pursuant to a lease:

   (i) which was entered into and approved for reimbursement prior to March 10, 1975;
New York 73(a)

(ii) which the commissioner finds to be bona fide, valid and noncancelable;
(iii) the terms of which the commissioner finds to be fair and reasonable; and
(iv) the payments, or portion thereof made pursuant to which, are found by the commissioner to be the proper basis for reimbursement of capital cost paid to such facility pursuant to article 28 of the Public Health Law prior to March 10, 1975.

(2) The capital cost component of any facility within the provisions of paragraph (1) of this subdivision shall consist of a payment factor sufficient to reimburse the facility for the total payments required under the base thereof to the extent approved by the commissioner pursuant to paragraph (1) of this subdivision.

(d) In computation of rates for voluntary medical facilities which are rented from proprietary interests, capital reimbursement shall be computed as if the facility were operated under proprietary sponsorship, except where the realty was previously owned by the voluntary medical facility, or where the proprietary interest has representation on the board of directors of the voluntary medical facility.

(f) Any capital expenditures associated with non-arms length leases shall be approved and certified to, if required, under the hospital certificate of need process. In the computation of reimbursement for non-arms length leases, the capital cost shall be included in allowable costs only to the extent that it does not exceed the amount which the facility would have included in allowable costs if it had legal title to the asset (the cost of ownership), such as straight-line depreciation, insurance, and interest. Accelerated depreciation on these assets may not be included in allowable costs under any circumstances.

October 18, 1993
TN #92-06 Approval Date
March 11, 1992
Supersedes TN NEW Effective Date
Section 86-1.31 Termination of service. The Division of Health Care Financing in the Department of Health shall be notified immediately of the deletion of any previously offered service or of the withholding of services from patients paid for by government agencies. Such notification shall include a statement indicating the date of the deletion or the withholding of such service and the cost impact on the medical facility of such action. Any overpayments by reason of such deletion of previously offered service shall bear interest and be subject to penalties both in the manner provided in section 86-1.8(f) of this Subpart.
Section 86-1.32 Sales, leases and realty transactions.

(a) If a medical facility is sold or leased or is the subject of any other realty transaction before a rate for the facility has been determined and certified by the Commissioner of Health, the capital cost component of such rate shall be determined in accordance with the provisions of sections 86-1.23, 86-1.24, 86-1.29 and 86-1.30 of this Subpart.

(b) If a medical facility is sold or leased or is the subject of any other realty transaction after a rate for the facility has been determined and certified by the commissioner, the capital cost component of such rate shall be considered to be continuing with the same force and effect as though such sale, lease or other realty transaction had not occurred. This subdivision shall not be construed as limiting the powers and rights of the commissioner to change rate computations generally under section 86-1.30 of this Subpart, or specifically when based upon previous error, deceit or any other misrepresentation or misstatement that has led the commissioner to determine and certify a rate which he would otherwise not have determined or certified. Further, this subdivision shall not be construed as limiting the powers and rights of the commissioner to reduce rates when one or more of the original property right aspects related to such a facility is terminated.

(c) If a facility enters into a sale and leaseback agreement with a nonrelated purchaser involving plant facilities or equipment prior to October 23, 1992, the incurred rental specified in the agreement is includable in allowable costs if the following conditions are met:

\[\text{Included in rates of payment effective on and after October 23, 1993.}\]

</tr>
</thead>
<tbody>
<tr>
<td>#93-46</td>
<td>May 7, 1996</td>
</tr>
</tbody>
</table>

Effective Date October 23, 1993
[(i)] (1) the rental charges are reasonable based on consideration of rental charges of comparable equipment and market conditions in the area; the type, expected life, condition and value of the equipment rented and other provisions of the rental agreements; and

[(ii)] (2) adequate alternate equipment which would serve the purpose are not or were not available at lower cost; and

[(iii)] (3) the leasing was based on economic and technical considerations.

[(iv)] (4) If all of these conditions are not met, the allowable rental cost shall not exceed the amount which the provider would have included in reimbursable costs had he retained legal title to the equipment, such as interest, taxes, depreciation, insurance and maintenance costs.

[(v)] (5) If a facility enters into a sale and leaseback agreement with a nonrelated purchaser involving land, the incurred rental for the cost of land is not includable in allowable costs.

(d) An arms length lease purchase agreement with a nonrelated lessor involving plant facilities or equipment entered into on or after October 23, 1992 which meets any one of the four following condition, establishes the lease as a virtual purchase.

(1) The lease transfers title of the facilities or equipment to the lessee during the lease term.
(2) The lease contains a bargain purchase option.

(3) The lease term is at least 75 percent of the useful life of the facilities or equipment. This provision is not applicable if the lease begins in the last 25 percent of the useful life of the facilities or equipment.

(4) The present value of the minimum lease payments (payments to be made during the lease term including bargain purchase option, guaranteed residual value and penalties for failure to renew) equals at least 90 percent of the fair market value of the leased property. This provision is not applicable if the lease begins in the last 25 percent of the useful life of the facilities or equipment. Present value is computed using the lessee’s incremental borrowing rate, unless the interest rate implicit in the lease is known and is less than the lessee’s incremental borrowing rate, in which case the interest rate implicit in the lease is used.

(e) If a lease is established as a virtual purchase under subdivision (d) of this section, the rental charge is includable in capital-related costs\(^2\) to the extent that it does not exceed the amount that the provider would have included in capital-related costs if it had legal title to the asset (the cost of ownership). The cost of ownership shall be limited to depreciation and interest. Further, the amounts to be included in capital-related costs are determined as follows:

(1) The difference between the amount of rent paid and the amount of rent allowed as capital-related costs is considered a deferred charge and is capitalized as part of the historical cost of the asset when the asset is purchase.

\(^2\)Included in rates of payment effective on and after October 23, 1993.
(2) If an asset is returned to the owner instead of being purchased, the deferred charge may be included in capital related costs in the year the asset is returned.

(3) If the term of the lease is extended for an additional period of time at a reduced lease cost and the option to purchase still exists, the deferred charge may be included in capital-related costs to the extent of increasing the reduced rental an amount not in excess of the cost of ownership.

(4) If the term of the lease is extended for an additional period of time at a reduced lease cost and the option to purchase no longer exists, the deferred charge may be included in capital-related costs to the extent of increasing the reduced rental to a fair rental value.

(5) If the lessee becomes the owner of the leased asset (either by operation of the lease or by other means), the amount considered as depreciation for the purpose of having computed the limitation on rental charges under subdivision (e) of this section, must be used in calculating the limitation on adjustments for the purpose of determining any gain or loss upon disposal of an asset.

(6) In the aggregate, the amount of rental or lease costs included in capital-related costs may not exceed the amount of the costs of ownership that the provider could have included in capital-related costs had the provider legal title to the asset.
(f) If a facility enters into a sale and leaseback agreement involving plant facilities or equipment on or after October 23, 1992, the amounts to be included in capital-related costs both on an annual basis and over the useful life of the asset shall not exceed the costs of ownership which shall be limited to depreciation and interest, and shall be determined as follows:

(1) If the annual rental or lease costs in the early years of the lease are less than the annual costs of ownership, but in the later years of the lease the annual rental or lease costs are more than the annual costs of ownership, in the years that the annual rental or lease costs are more than the annual costs of ownership, the facility may include in capital-related costs annually the actual amount of rental or lease costs, except that in any given year, the amount included in capital-related costs is limited to an amount which would not cause the aggregate rental or lease costs included up to that year in capital-related costs to exceed the costs of ownership that would have been included in capital-related costs up to that year if the provider had retained legal title to the asset.

(2) If the annual rental or lease costs in the early years of the lease exceed the annual costs of ownership, but in the later years of the lease the annual rental or lease costs are less than the annual costs of ownership, the facility may carry forward amounts of rental or lease costs that were not included in capital-related costs in the early years of the lease due to the costs of ownership limitation, and include these amounts in capital-related costs in the years of the lease when the annual rental or lease costs are less than the annual costs of ownership, provided, however, in any given year the amount of actual annual rental or lease costs plus the amount carried forward to that year

New York

---

3 Included in rates of payment effective on and after October 23, 1993.
may not exceed the amount of costs of ownership for that year.

(3) In the aggregate, the amount of rental or lease costs included in capital-related costs may not exceed the amount of the costs of ownership that the provider could have included in capital-related costs if the provider had retained legal title to the asset.

(4) If a facility enters into a sale and leaseback agreement involving land, the incurred rental for the cost of land is not includable in allowable costs.
Section 86-1.33 Hospital Closure/Conversion Incentive Programs.

(a) Hospital Closure Incentive Program. To reduce excess beds by encouraging the closure of hospitals, the Commissioner of Health may consider proposals by hospitals which mutually agree that one or more of the hospitals in the group shall close. The plan must be approved by the appropriate health systems agency prior to submission to the Commissioner of Health. The variable costs associated with the closed facility or facilities (which include personal costs) shall become part of the operating expenses of the remaining facilities in the group. The Commissioner of Health may consider a reasonable incentive structure for increased costs of the remaining facilities if coupled with a strict attrition program that would, within a reasonable period of time, assure a return to an appropriate level of staffing.

(b) Hospital Conversion Incentive Program. (1) To encourage hospitals to reduce excess acute care beds by substantially reducing the certified capacity or by converting a substantial number of such beds to a level of care for which the commissioner has determined a need exists, the commissioner may consider proposals by one or more hospitals which provide for the substantial reduction of acute care beds. Each facility undergoing conversion of beds must submit an individual proposal. The proposal must be reviewed by the appropriate health systems agency prior to submission to the commissioner. The variable costs associated with any layoffs at the converting facility may become part of the operating expenses of the converting facility or the other facilities which are the subject of the proposal. The commissioner may consider a reasonable incentive structure for increased costs of the converting facility or the other facilities if coupled with a strict attrition program that would, within a reasonable period of time, assure a return to an appropriate level of staffing.

(2) Paragraph (1) of this subdivision shall not apply in the case of a conversion caused by a determination under section 2806(6) of the Public Health Law, or where the commissioner finds that a conversion is entered into primarily to avoid the imposition of a utilization penalty.
Section 86-1.34 Pilot reimbursement projects. (a) The Commissioner of Health may waive the requirements of this Subpart to effect the development of additional knowledge and experience in different types of reimbursement mechanisms, contingent upon the approval of the United States Department of Health, Education and Welfare, and subject to the provisions of section 222(a) of the Social Security Act.

(b) Individual hospitals or groups of hospitals shall enter into such ventures with the understanding that the reimbursement received over the life of this pilot project shall be as defined in the experiment.

86-1.37 Fund administration. (a) The commissioner or his designee shall create and administer the following pools of funds in each region defined in this section: a financially distressed hospital pool which will be funded by the allowances provided in section 86-.11(g)(8) of the Subpart;

These pools shall be established for each of the following regions: Long Island (Nassau and Suffolk Counties); New York City (Richmond, Manhattan, Bronx, Queens, and Kings Counties); Northern Metropolitan (Delaware, Columbia, Ulster, Sullivan, Orange, Dutchess, Putnam, Rockland and Westchester Counties); Northeastern Blue Cross Region; Utica/Watertown Blue Cross Region; Syracuse Blue Cross Region; Rochester Blue Cross Region; Western Blue Cross Region. Hospitals not participating as of December 31, 1985 in the regional bad debt and charity care pools established pursuant to section 86-1.11 of this Subpart and no longer exempt from the provisions of section 2807-a of the Public Health Law shall be assigned to a region for purposes of calculating the bad debt charity care add-on percentage and making distributions from such pool pursuant to subdivision (p) of section 86-1.11 of this Subpart. Assignment to a region shall be based upon but not limited to the following factors:

(1) Numbers and types of hospitals within the region and

(2) Geographical proximity of the hospital requiring such assignment to a particular region.

(b) Monthly, each of the major third-party payors (Medicare, Medicaid and article 9C and article 44) will issue separate checks based upon the pool allowances to the pool administrator for each region, based on inpatient hospital claims with a service date on or after January 1, 1983 which were paid for the preceding monthly: one for the financially distressed hospital pool, and one for the bad debt/charity care pool.

(c) reserved

(1) reserved
category. For 1984 and 1985 the proxy for the “all other payor” category shall be similarly computed using the facility's 1983 and 1984 RCCAC logs, respectively. The facility shall pay to the pool administrator the regional allowances based upon these proxies on a monthly basis, by issuing three checks, one for each pool. Payments for January, February and March of 1983 must be submitted to the pool administrator on or before July 31, 1983. Payments for the months thereafter shall be submitted on or before the 20th day of the fourth month following the calendar month to which the payment applies. The January and February payments to be made to the pool administrator on or before May 20th and June 20th of each year shall be based upon the previous year's proxy. The methodology used to determine the proxy for the 1983, 1984 and 1985 payments received for the “all other payor” category shall not thereafter be adjusted to actual using cash receipts. However, on or about July 1, of each year when the previous year's RCCAC data becomes available, facilities shall recalculate their annual liability for pool contributions for the previous year using this data. This recalculated amount shall also represent a new estimated liability for the current year. Facilities shall compare the newly calculated annual for the previous year to

TN #87-48
Supersedes TN #-----
Approval Date November 21, 1988
Effective Date December 16, 1987
(d) Concurrent with the submission of pool contribution checks, hospitals shall submit to the pool administrator, information for the “all other payor” category of the facility’s RCCAC logs regarding patient days, gross charges, nonpatient care gross charges, such as telephone, television and personal care items, inpatient bad debt and charity care at gross charges, and payments received from billings to Workers’ Compensation, No-Fault, and other per diem payors not included in the “all other payor” category, together with such other information as shall be deemed necessary by the commissioner or his designee, to verify the amounts due to the pools.

(e) If any hospital shall fail to timely file reports or submit checks in accordance with subdivision (d) of this section, then the distribution of any funds to such hospital will be withheld until such time as the reports and checks are appropriately submitted by such hospital. In addition, in the event that a hospital will have 30 days from the date of receipt of notification to provide the required reports and checks. Failure to file the reports and checks within this 30-day time period will result in the withholding of 10 percent of that hospital’s payments from all major third-party payors until such time as the required reports and checks are received by the pool administrator.

(f) The commissioner or his designee shall receive and invest funds for the aforementioned pools and distribute such funds according to subdivision (g) of section 86-1.11 and 86-1.36 of this Subpart. Where the distribution of funds is not dependent on the processing of an application for the funds, the administrator of the pool will distribute any available funds to hospitals by the tenth business day of the month following the month in which such funds were received from the major third-party payors will be made on or before March 14, 1983.

(g) During 1983 in the initial funding process of the pools, the immediate demand for funds from a particular pool may exceed the available funds in such pool. Also, because of a lag in distribution from some pools associated with the application process, some pools may have cash available beyond immediate distribution needs. In order to meet distribution needs as they arise, the commissioner or his designee, may, in 1983, allow borrowing from one pool to another within a region. In no event, however, will such borrowing be allowed.
by one pool from other pools in an amount in excess of projected amounts to be paid for the year by the major third-party payors to the borrowing pool, and in no event will borrowing be permitted if it will impair the ability of the lending pool to meet its distribution needs. All amounts borrowed shall be fully repaid during the first half of 1984.

(h) The major third-party payors shall provide the commissioner or his designee, at the time of check submission, with reports showing the paid claims by region, including, but not limited to the name of each hospital, patient days paid, and the computation by region and by pool of the amounts for which payments to the pools are made.

(i) The commissioner or his designee shall retain amounts in each regional pool, as are projected to be necessary to cover any payments due to third-party payors because of retroactive rate adjustments.

(j) The commissioner is authorized to make contingent distributions from the financially distressed hospital pool upon filing of this regulation, to hospitals participating in the transitional reimbursement program as of December 31, 1982 and to such other hospitals as are found by the commissioner to be in serious financial jeopardy, in amounts necessary to stabilize and maintain operations, taking into account available pool funds. Distributions shall be contingent upon subsequent determinations by the commissioner of hospital participation in the financially distressed hospital pool pursuant to standards to be adopted by the State Hospital Review and Planning Council. After these determinations by the commissioner, any contingent amounts to which such hospitals are found by the commissioner to be unentitled shall be repaid by the hospitals to the pool.

(k) Fund administration in 1986 and 1987 regional pools. The commissioner or his designee shall establish and administer the pools created by the provisions of subdivision (p) and (q) of section 86-1.11 of this Subpart according to the criteria contained in this section applicable to the period January 1, 1985 through December 31, 1985, with the following exceptions for regional pools:

   (1) Article 43 corporations and Medicaid shall each issue separate monthly checks to the regional bad debt and charity care pools and to the regional financially distressed facility pools.

Approval Date August 1, 1991
Effective Date January 1, 1988
(3) Concurrent with the submission of pool contribution checks, hospitals shall submit to the pool administrator information from the “all other payor” category of the facility’s RCCAC logs regarding patient days, gross charges, nonpatient care gross charges, such as telephone, televisions and personal care items, inpatient bad debt and charity care at gross charges, and payments received from billings to Workers' Compensation, No-Fault, article 44 corporations, and other per diem payors not included in the “all other payor” category, together with such other information as shall be deemed necessary by the commissioner or his designee, to verify the amounts due the pools.

(4) If any hospital shall fail to timely file reports or submit checks in accordance with paragraph (3) of this subdivision, the distribution of any funds to such hospital in accordance with the distribution schedule in subdivisions (p) and (q) of section 86-1.11 of this Subpart shall be withheld until such time as the reports and checks are submitted by such hospital. In addition, in the event that a hospital fails to timely submit the required reports and checks, the hospital will have 30 days from the date of receipt of notification to provide the required reports and checks. Failure to file the reports and checks within this 30-day time period will result in the withholding of 10 percent of that hospital's payments from both major third-party payors until such time as the required reports and checks are received by the pool administrator.

(5) The commissioner or his designee shall receive and invest funds for the aforementioned pools and distribute such funds according to subdivisions (p) and (q) of section 86-1.11 and section 86-1.36 of this Subpart. Where the distribution of funds is not dependent on the processing of an application for the funds, the administrator of the pool will distribute any available funds to hospitals by the tenth business day of the month following the month in which such funds were received from both major third-party payors.

(6) Article 43 corporations and the New York State Department of Social Services shall provide the commissioner or his designee, at the time of the check submission, with reports showing the paid claims by region, including but not limited to the name of each hospital, patient days paid, and the computation by region and by pool of the amounts for which payments to the pools are made.

(7) The commissioner or his designee shall retain amounts in each regional pool as are projected to be necessary to cover any payments due to third-party payors because of retroactive rate adjustments.

TN  #88-6             Approval Date  August 1, 1991
Supersedes TN  #87-5             Effective Date  January 1, 1988
Section 86-1.38 Alternative reimbursement method for mergers or consolidations. As used in this section, the term merger shall mean the combining of two or more medical facilities, licensed under article 28 of the Public Health law, where such combination is consistent with the public need, would create a new, more economical entity, reduce the costs of operation, result in the reduction of beds and/or improve service delivery. The provisions of this section shall apply only if facilities seek an alternative reimbursement mechanism to complete the merger. Otherwise, reimbursement for merged facilities will be consistent with all other provisions of this Subpart.

(a) Application for merger. A merger shall meet all of the following qualifying criteria and conditions:

(1) There is a demonstrated public need for the existing hospital service in whole or in part at the current site(s) of the applicant. The determination of public need shall be made pursuant to section 2802 of the Public Health Law and in accordance with Part 709 of this Title.

(2) The application must include a demonstration of overall financial savings that can be obtained within three years from the date of inception. This projection of savings should demonstrate reduction of overall costs for the separate entities, and reduction of gross reimbursement based on costs from third-party payors due primarily to reduction in beds or services.

(3) The medical facilities must demonstrate that adequate health care services are and will be provided; that conformity with the State Hospital Code is, and will be, maintained, and an approved plan of correction for any operational and structural deficiencies in accordance with State Hospital Code has been filed.

(b) In order to meet the requirements of paragraph (a)(2) of this section, the facility(s) must submit to the commissioner a plan of merger. This plan should include, but not be limited to:

(1) a description and composition of the proposed governing structure of the facilities submitting the applications;

(2) the development of a market analysis of the population being served;

(3) development of a functional consolidation of services, outlining:

   (i) changes in the size and scope of the medical staff organization;

   (ii) clinic and outpatient activities;

   (iii) the integration of such areas as administration, operation of plant, laboratory, X-ray, therapies, for example;

   (iv) redeployment of existing employees and future labor practices; and
(v) such other information as the commissioner may require

(4) financial plan which provides for:

(i) expected changes in revenues and expenditures due to the actions to be taken by the facilities. This shall be presented in the form of a projected budget for the merged entity and shall include complete budgeted uniform statistical and financial reports; and

(ii) projected changes in salaries, fringe and union benefits;

(5) a capital plan which outlines expected capital outlays necessary to effectuate the planned merger; and

(6) changes in the quality and volume of health services to be provided as a result of the planned merger.

(c) Operating and capital costs reimbursement. Reimbursement under the provisions of this section for mergers meeting the requirements of subdivision (a) of this section shall be determined as follows and shall be for a period not to exceed three years from the date of approval of formal corporate merger of the involved facilities. Following a review of the budgeted statistical and financial data submitted by the facilities, the commissioner shall develop a new group for the merged institution, excluding the projected costs and statistics of the merged institution. All applicable ceilings shall be calculated as required by this Subpart.

(1) Mergers with ceiling penalties. In the event that the merged institution incurs ceiling penalties, the commissioner may waive these penalties for the first full year of operation under the merger. In the second year of operation, facility rates will be the initial approved base year budgeted costs and statistics reduced by an amount that is no less than one third of the amount waived in the first year, increased by the trend factor into the current rate period. In the third year of operation, facility rates will be the initial approved base year budgeted costs and statistics reduced by an amount that is no less than two thirds of the amount waived in the first year, increased by the trend factor into the current rate period.

(2) Mergers without ceiling penalties. In the event that the merged institution incurs no ceiling penalties, rates during the first year of operation will be determined by taking the approved budgeted costs and statistics increased by the appropriate trend factor into the current rate period. In the second year of operation, facility rates will be the initial approved budgeted costs and statistics increased by the appropriate trend factor into the current rate period less two percent. In the third year of operation, facility rates will be the initial approved base year budgeted costs and statistics increased by the appropriate trend factor into the current rate period less four percent.
Facilities reimbursed under this section will not be eligible for waiver of ceiling penalties in the fourth year of operation as a merged facility. In the fourth year, the facility's reimbursement rate will be based on budgeted costs for the immediate preceding year subject to the standard Part 86 methodology applicable in the fourth year. In all years subsequent to the fourth year, actual base year costs of the facility will be subjected to the standard Part 86 methodology applicable at the time.

Capital Reimbursement. Capital costs associated with a closure of a facility as part of an approved plan under this section will be reimbursable to the new, merged entity subject to appropriate Federal waiver.

Upon application to the commissioner, a volume adjustment as specified in section 86-1.12 of this Subpart may be implemented.

Where a facility(s) covered under this Subpart demonstrates to the commissioner, subsequent to its initial participation in this Subpart, that a deviation from the original approved plan and budget will provide a more cost effective result, a new plan and budget that has been approved by the commissioner will be accepted and utilized in formulation of revised reimbursement rates for the remaining time of participation in the Subpart.

Annual report. Each year a facility(s) covered under this Subpart must demonstrate to the commissioner the cost savings arising from the improved efficiencies and more effective delivery of care due to the merger, consolidation or closure of the facilities participating in the plan. This report should reflect the objectives outlined in the approved plan and be issued by the governing authority of the facilities participating.

Termination of facility(s) participation. Reimbursement under this section shall terminate if:

1. the facility deviates from its plan of merger without written approval of the commissioner;
2. the facility fails to continue to meet the criteria delineated in this section;
3. three years have passed from the date of certification of the rate established pursuant to this section.
86-1.39  [Workers’ compensation and not fault reimbursement rates.]  Reserved
Section 86-1.40 Alternative reimbursement method for medical facilities with extended phase-in periods. The current reimbursement system may not enable new or substantially changed facilities which require an extended start-up period to proceed in a financially viable manner and, therefore, the following alternative reimbursement method is established to insure that needed and qualifying medical facilities can develop.

(a) Facilities which apply for alternative reimbursement under this section must demonstrate that the following qualifying criteria have been met:

1. The commissioner is satisfied that adequate health care services are and will be provided by the facility.
2. There has been a finding by the commissioner that the projected expansion and phase-in of the medical facility is appropriate and in the public interest.
3. Pursuant to a plan of construction or expansion, approved by the commissioner, the facility will either be opening as a new facility or opening additional beds, commencing additional services, or projecting staffing increases.
4. The facility can demonstrate to the satisfaction of the commissioner that its staffing and operational costs will, by the end of its approved transition period, be within acceptable staffing guidelines and capable of operating under the standard reimbursement methodology.
5. The facility must demonstrate that it meets the criteria of a new facility or the criteria set forth in paragraph (4) of section 86-1.17 of this Subpart. A new facility is defined as one that has had no previous cost experience and no previous operating certificate.
6. There are such other related indications of substantial changes as the commissioner may specify.

(b) Facilities which apply for alternative reimbursement under this section will be required to submit, subject to the approval of the commissioner, the following information at least 60 days prior to the start of the alternative reimbursement period:

1. a market analysis of the population to be served;
2. an organization description of the hospital, including a description of the medical staff organization and composition of the governing body;
3. a detailed plan of the phase-in of routine and ancillary services, beds, staffing levels and expected utilization by major program area during the phase-in period in a manner prescribed by the commissioner;
4. a detailed transitional financial plan which reflects anticipated revenues, including annual tax levy support and expenditures during the phase-in period, including a facility

Approval Date July 23, 1987
Effective Date January 1, 1986
budget which reflects planned services expansion as described in paragraph (b)(3) of this section. If requested by the commissioner, the facility shall provide a line item budget with respect to staffing and personnel, and such detail as prescribed by the commissioner for other than personal service items, including capital.

(c) A facility which meets the criteria and informational requirements in subdivisions (a) and (b) of this section, and has received the commissioner’s approval of its detailed transitional financial plan, shall have the operating and capital components of its rate established as follows:

(1) A reimbursement rate established under this section shall only be for a time period as approved in the facility’s submitted plan, but no greater than five years.

(2) The capital cost component of the rate for each year of the plan will be based on approved annual budgeted cost, divided by the approved targeted patient volume for the rate year and retrospectively adjusted to actual certified cost.

(3) The operating component of the rate will be determined based on an approved budget subject to the following limitations and adjustments:

   (i) Changes in personal service and nonpersonal service costs from the base period to the rate period shall be limited to the same factors for inflation which affect the hospital industry, except that costs associated with the phase-in of beds, programs and services which were not existent in a previous period will be allowed, subject to the review and approval of their incremental costs.

   (ii) For each year in transition, a peer group will be simulated for the facility. The simulation will be based on the facility's approved budget and phase-in statistics for the facility. The operating component of the reimbursement rate will be subjected to a maximum of the peer group coiling increased by no greater than five percent times the remaining years of the transition period.

   (iii) If the facility’s volume is below the approved target volume, no adjustment shall be made.

   (iv) If the facility’s volume is above the approved targeted volume by five percent, the facility will be submitted to a volume adjustment to adjust their rate over the approved target for incremental costs.

   (v) The hospital will be expected to meet the length of stay standards specified in section 86-1.17 of this Subpart.

   (vi) The rates established under this section shall be prospective and be subject to adjustment and audit. A length of stay penalty, utilization penalty and volume adjustment

may be implemented in the year succeeding the rate period in which the respective requirements are not met.

(d) Reimbursement under this section shall terminate if:

(1) the facility significantly deviates from its approved plan without the written approval of the commissioner;

(2) the facility fails to continue to meet the criteria delineated in this section;

(3) the facility requests to withdraw from this program with the understanding that participation in subsequent rate years is prohibited.

(e) The effective date of the reimbursement rate established pursuant to this section shall be the day on which Federal approval is effective.

Section 86-1.42 Hospital-based Physician Reimbursement Program.

(a) Definitions. As used in this section:

(1) Physician shall mean hospital-based supervisory and other salaried physicians, excluding interns and residents.

(2) Fringe benefits shall mean fringe benefits required by law, plus health, welfare, retirement, and educational benefits given in lieu of direct compensation.

(3) Total physician compensation shall mean the prospectively set base year compensation for physicians responsible for a service or department plus a fringe benefit allowance not to exceed 25 percent of the base year compensation, less any portion of that compensation which is for other than that service or department.

(4) Total employee staff compensation shall mean the prospectively set base year compensation for nonphysician employees assigned to a service or department, plus a fringe benefits allowance, less any portion of that compensation which is for other than that service or department.

(b) Notwithstanding any other provision of this Subpart, allowable reimbursable costs for physicians responsible for the inpatient diagnostic and therapeutic services or departments of radiology, radiation therapy, ultrasonography, laboratory medicine and pathology, nuclear medicine, electrocardiography and hospital cardiology services, exclusive of cardiac catheterization, shall be 104 percent of total physician and employee staff compensation for each of these services. Allowable reimbursable costs for physicians responsible for clinical laboratory services shall be 103 percent of total physician and employee staff compensation for such services. Reimbursement paid pursuant to this subdivision in excess of actual salaries, fringe benefits, and incentive payments, if any, shall be called professional development funds. These funds shall be distributed by the hospital among the clinical laboratory service and the aforementioned inpatient diagnostic and therapeutic services and departments. These funds shall be considered departmental funds and may be used to improve the clinical care of patients receiving services from the department, to enhance or supplement the department's educational program, and for purchases of hospital patient care equipment. These funds shall be committed annually.

(c) Notwithstanding any other provision of this Subpart, hospitals shall be reimbursed for the cost of a single adjustment to total physician compensation for physicians who are responsible for the inpatient diagnostic and therapeutic services or departments of radiology, radiation therapy, ultrasonography, laboratory medicine including all clinical laboratories and pathology, nuclear medicine, electrocardiography and hospital cardiology services exclusive of cardiac catheterization, provided that the overall compensation for such physicians in aggregate does not exceed the 80th percentile as reported in the American Association of Medical Colleges faculty compensation survey for the base year. This adjustment shall be in an amount sufficient to provide funds for overall compensation of such physicians in the aggregate equivalent to the 80th percentile as reported in the survey. The cost of such adjustment in excess of the

TN #85-34

Effective Date January 1, 1986
limitation on allowable costs for such services as set forth in section 86-1.14(c) of this Subpart shall be excluded from the calculation of base period costs and shall be reimbursed.

(d) The provisions of this section shall apply only to those hospitals:

(1) which apply to the commissioner for participation in this program within six months of the effective date of this section;

(2) which have a written agreement with their physicians which specifies physician responsibility with regard to scope of service and education of all physicians on the prudent use of diagnostic services and which specifies productivity and utilization standards for all departments to reduce unit costs of services;

(3) which document a fixed prospective physician compensation arrangement set in advance of the rate year, which may include an incentive plan provided such plan does not exceed 15 percent of the aggregate prospective base compensation and provided such plan has been approved by the commissioner upon a showing by the hospital that incentive plan costs will be offset by equivalent productivity gains and cost savings; and

(4) which, following the first year of participation in the program, document annually an appreciable reduction in unit costs of services as a result of participation in the program.

(e) This section shall be contingent upon Federal financial participation.

Hospital Inpatient Reimbursement – Effective December 1, 2009

Definitions. As used in this Section, the following definitions shall apply:

1. Diagnosis related groups (DRGs) shall mean the 3M Corporation All-Patient-Refined (APR) classification system, which utilizes diagnostic related groups with assigned weights that incorporate differing levels of severity of a patient’s condition and the associated risk of mortality, and reflects such factors as the patient’s medical diagnosis, severity level, sex, age, and procedures performed.
   a. Effective January 1, 2013. Version 30 of the APR classification system will be used.

2. DRG case-based payment per discharge shall mean the payment to be received by a hospital for inpatient services rendered to each patient based on the DRG to which that patient has been assigned, as determined by multiplying the statewide base price by the applicable service intensity weight (SIW) and facility-specific wage equalization factor (WEF) and as further adjusted for teaching hospitals by the inclusion of reimbursement for direct and indirect graduate medical education (GME) costs and for all hospitals, the inclusion of non-comparable costs.

3. Service intensity weights (SIWs) are the cost weights established such that the SIW for any given DRG indicates the relative cost of the average cost of the patient in the DRG as compared to the average cost of all patients in all DRGs. Weights are developed using cost data from Medicaid fee-for-service, Medicaid managed care and commercial payors as reported to the Statewide Planning and Research Cooperative System (SPARCS).

4. Case mix index (CMI) shall mean the relative costliness of a hospital’s case mix relative to the case mix of all other hospitals as reflected in the weighted aggregate SIW for the hospital.

5. Reimbursable operating costs shall mean reported operating costs which relate to the cost of providing inpatient hospital services to Medicaid patients, adjusted for inflation between the base period used to determine the statewide base price and the rate period in accordance with trend factors determined pursuant to the applicable provisions of this Attachment, but excluding the following costs:
   a. ALC costs;
   b. Exempt unit costs;
   c. Transfer costs; and
   d. High-cost outlier costs.

Attachment 4.19-A
New York
103
6. ** Graduate medical education (GME).  
    
   a. **Direct GME costs** shall mean the reimbursable salaries, fringe benefits, non-salary costs and allocated overhead for residents, fellows, and supervising physicians trended to the rate year by the applicable provisions of this Attachment.  
   
   b. **Indirect GME costs** shall mean an estimate of the costs associated with additional ancillary intensiveness of medical care, more aggressive treatment regimens, and increased availability of state-of-the-art testing technologies result from the training of residents and fellows.  
   
7. **High-cost outlier costs** for payment purposes shall mean 100 percent of the hospital's charges converted to cost using the hospital's most recent ratio of cost-to-charges that exceed the DRG specific high-cost thresholds calculated pursuant to Exclusion of Outlier and Transfer Costs of this Section.  
   
8. **Alternate level of care (ALC) services** shall mean those services provided by a hospital to a patient for whom it has been determined that inpatient hospital services are not medically necessary, but that post-hospital extended care services are medically necessary, consistent with utilization review standards, and are being provided by the hospital and are not otherwise available.  
   
9. **Exempt hospitals and units** shall mean those hospitals and units that are paid per diem rates of payment pursuant to the provisions of Exempt Units and Hospitals of this Section, rather than receiving per discharge case-based rates of payment.  
   
10. **The wage equalization factor (WEF)** shall mean the mechanism to equalize hospital salary and fringe benefit costs to account for the differences in the price of labor among hospitals and groups of hospitals.  
   
11. **Statewide Base price** shall mean the numeric value calculated pursuant to Statewide Base Price of this Section, which shall be used to calculate DRG case-based payments per discharge as defined in paragraph (2) of this Section.  
   
12. **Non-comparable adjustments** shall mean those base year costs that are passed through the statewide base price calculation and applied to the case-based rate of payment as an add-on payment. The following shall be considered non-comparable adjustments:  
   
   a. Medicaid costs associated with ambulance services operated by a facility and reported as inpatient costs in the Institutional Cost Report (ICR); and
b. Medicaid costs associated with schools of nursing operated by the facility and reported as inpatient costs in the ICR; and

c. Medicaid costs associated with hospital-based physicians at hospitals designated under the Medicare program as meeting the criteria set forth in §1861(b)(7) of the federal Social Security Act.

13. Transfers. For purposes of transfer per diem payments, a transfer patient shall mean a patient who is not discharged as defined in this Section, is not transferred among two or more divisions of merged or consolidated facilities, is not assigned to a DRG specifically identified as a DRG for transferred patients only, and meets one of the following conditions:

a. is transferred from an acute care facility reimbursed under the DRG case-based payment system to another acute care facility reimbursed under this system; or

b. is transferred to an out-of-state acute care facility; or

c. is a neonate who is being transferred to an exempt hospital for neonatal services.

14. Discharges, as used in this Section, shall mean those inpatients whose discharge from the facility occurred on or after December 1, 2009, and:

a. the patient is released from the facility to a nonacute care setting;

b. the patient dies in the facility; or

c. the patient is transferred to a facility or unit that is exempt from the case-based payment system, except when the patient is a newborn transferred to an exempt hospital for neonatal services and thus classified as a transfer patient pursuant to this Section; or

d. the patient is a neonate being released from a hospital providing neonatal specialty services back to the community hospital of birth for weight gain.

15. Arithmetic Inlier Length of Stay (ALOS) shall mean the arithmetic average of the number of days a patient is in the hospital per admission as calculated by counting the number of days from and including the day of admission up to, but not including the day of discharge. The ALOS shall be calculated for each DRG on a statewide basis.

16. General hospital, as used in this Section, shall mean a hospital engaged in providing medical or medical and surgical services primarily to in-patients by or under the supervision of a physician on a twenty-four hour basis with provisions for admission or treatment of persons in need of emergency care and with an organized medical staff and nursing service, including facilities providing services relating to particular diseases, injuries, conditions or deformities.
17. *Charge converter* shall mean the ratio of cost to charges using total inpatient costs and total inpatient charges as reported by the hospital in its annual institutional cost reports submitted to the Department.

18. *IPRO* shall mean the Island Peer Review Organization, Inc., a New York not-for-profit corporation providing health related services.
Statewide base price.

1. For periods on and after December 1, 2009, a statewide average cost per discharge shall be established in accordance with the following:

   a. Reimbursable Medicaid acute operating costs, excluding costs related to graduate medical education, alternate level of care, exempt units, patient transfers, high-cost outliers, and non-comparables, derived from the base period in paragraph (3);
   b. Adjust subparagraph (a) for case mix and wage neutrality factors derived from the base period in paragraph (3);
   c. Divide subparagraph (b) by Medicaid inpatient discharges from the base period in paragraph (3); and
   d. Adjust subparagraph (c) for inflation between the base period and the rate period in accordance with trend factors determined pursuant to applicable provisions of this Attachment.

2. An adjustment will be made to the statewide average cost per discharge, calculated in accordance with subparagraph (1) of this section, to establish a “statewide base price” that generates the same level of total Medicaid payments for the reimbursement of operating costs as total Medicaid payments made for the reimbursement of operating costs during calendar year 2008 subsequent to the exclusion of prior period adjustments and the following reductions:

   a. One hundred fifty-four million five hundred thousand dollars; and
   b. Two hundred twenty-five million dollars.

   No further reconciliation adjustment to the statewide base price to account for changes in volume or case mix will be implemented.

3. For periods on and after December 1, 2009, the “base period” shall be the 2005 calendar year except as noted in subparagraph (a) below and “operating costs” shall be those reported by each facility to the Department prior to July 1, 2009.

   a. For those hospitals operated by the New York City Health and Hospitals Corporation, the base period shall be for the period ended June 30, 2005, and for those hospitals operated by New York State, excluding the hospitals operated by the State University of New York, the base period shall be the 12-month period ended March 31, 2006.

   b. Discharges to be used for direct graduate medical education and non-comparable adjustments in accordance with the Definitions section should be 2007, provided, however, that discharges for non-comparables adjustments shall not include those patients that are transferred to a facility or unit that is exempt from the case-based system, except when the patient is a newborn transferred to an exempt hospital for neonatal service and thus classified as a transfer patient pursuant to this Section.

TN ___ #10-33-B ________ Approval Date October 28, 2011
Supersedes TN ___ #09-34 ________ Effective Date July 1, 2011
4. To establish the Transition II Pool, effective October 20, 2010, the statewide base price will be reduced such that the level of total Medicaid payments shall be decreased for the periods specified on the ‘Transition II Pool’ section by the corresponding Transition II fund amount.

5. For the period effective July 1, 2011 through March 31, 2012, the statewide base price will be reduced such that the level of total Medicaid payments are decreased by $24.2 million.

6. For the period May 1, 2012, through March 31, 2013, and for state fiscal year periods on and after April 1, 2013, the statewide base price shall be adjusted such that total Medicaid payments are decreased for each such period by $19,200,000.
Exclusion of outlier and transfer costs.

1. In calculating rates pursuant to this Section, high-cost outlier costs from hospitals with ancillary and routine charges schedules shall be excluded from the statewide base price and shall equal 100 percent of the excess costs above the high cost outlier threshold which shall be developed using acute Medicaid operating costs derived from the base period used to calculate the statewide base price. The Medicaid discharges to be applied to the high-cost outlier thresholds shall be those that occurred in the base period used to calculate the statewide base price.

2. In calculating rates pursuant to this Section, transfer case costs shall be excluded from the statewide base price by excluding the transfer discharges that occurred in the base period used to calculate the statewide base price, except for those transfer cases that are assigned to a DRG specifically identified as a DRG for transferred patients only.
Service Intensity Weights (SIW) and average length-of-stay (LOS).

1. The table of SIWs and statewide average LOS for each effective period is published on the New York State Department of Health website at:
   http://www.health.ny.gov/facilities/hospital/reimbursement/apr-drg/weights/
   and reflects the cost weights and LOS assigned to each All-Patient Refined (APR) diagnosis related group (DRG) patient classification category. The SIWs assigned to each APR-DRG indicates the relative cost variance of that APR-DRG classification from the average cost of all inpatients in all APR-DRGs. Such SIWs are developed using three years of Medicaid fee-for-service cost data, Medicaid managed care data and commercial third party payor data as reported to the Statewide Planning and Research Cooperative System (SPARCS) for the years set forth in paragraph (2) below. Costs associated with hospitals that do not have an ancillary charge structure or associated with hospitals and services exempt from the case payment methodology, and costs associated with statistical outliers are excluded from the SIW calculations.

2. For periods on and after December 1, 2009 through December 31, 2010, the SIW and statewide average LOS table shall be computed using SPARCS and reported cost data from the 2005, 2006 and 2007 calendar years as submitted to the Department by September 30, 2009.

3. For periods on and after January 1, 2011 through December 31, 2011, the SIW and statewide average LOS table shall be computed using SPARCS and reported cost data from the 2006, 2007 and 2008 calendar years as submitted to the Department by June 30, 2010.

4. For periods on and after January 1, 2012 through December 31, 2012, the SIW and statewide average LOS table shall be computed using SPARCS and reported cost data from the 2007, 2008 and 2009 calendar years as submitted to the Department by September 30, 2011.

5. For periods on and after January 1, 2013 through [December 31, 2013)]une 30, 2014, the SIW and statewide average LOS table shall be computed using SPARCS and reported cost data from the 2008, 2009 and 2010 calendar years as submitted to the Department by September 30, 2012.
Wage Equalization Factor (WEF).

1. The statewide base price per discharge shall be adjusted by a facility-specific wage equalization factor (WEF) to reflect differences in labor costs between hospitals. Such WEF adjustment shall be used to adjust for the level of wage and fringe benefit costs for each hospital in accordance with the following:

   a. The WEF shall be based on each hospital's occupational mix and wages for registered nurses, licensed practical nurses, surgical technologists, nursing aides, orderlies, attendants and medical assistants as reported and approved by the federal Medicare program, and the hospital's proportion of salaries and fringe benefit costs to total operating costs as reported to the Institutional Cost Report (ICR). The WEF shall be computed as follows:

      I. For all occupations described in paragraph (a), a statewide average salary shall be calculated by dividing the statewide sum of hospitals' total dollars paid by the statewide sum of hospitals' hours paid; and

      II. For each hospital, an actual weighted average salary shall be calculated by dividing the total dollars paid for such occupations by the total hours paid for such occupations; and

      III. An initial WEF shall be calculated for each hospital by dividing the hospital-specific actual weighted average salary as calculated pursuant to subparagraph (ii) of this paragraph by the statewide average salary calculated pursuant to subparagraph (i) of this paragraph; and

      IV. The final WEF shall be calculated using the following formula:

      \[
      (1 / ((\text{Labor Share/Initial WEF}) + \text{Non-Labor Share}))
      \]

      where “Labor Share” is calculated by dividing the hospital’s total salary cost plus the hospital’s total fringe benefits by the hospital’s total operating costs as reported in the ICR for the same calendar year used to calculate the statewide base price for the applicable rate period. The “Non-Labor Share” equals 1 less the “Labor Share” of costs.

   b. A hospital may submit updated occupational service data as approved by the federal Department of Health and Human Services prior to January 1 of a rate year for use in calculating the WEF in accordance with this Section.

TN #09-34 Approval Date January 20, 2010
Supersedes TN NEW Effective Date December 1, 2009
c. For those hospitals that are in bankruptcy proceedings in the base year and that have subrogated their labor contracts, the Commissioner shall use the higher of the hospital-specific or regional average WEF. These regions will be consistent with those used in the development of exempt unit cost ceilings.
Add-ons to the case payment rate per discharge.

Rates of payment computed pursuant to this Attachment shall be further adjusted in accordance with the following:

1. A direct graduate medical education (GME) payment per discharge shall be added to the case payment rates of teaching general hospitals after the application of SIW and WEF adjustments to the statewide base price and shall be calculated for each hospital by dividing the facility’s total reported inpatient Medicaid direct GME costs by its total reported Medicaid discharges as defined in the Statewide Base Price Section. Direct GME costs shall be those costs defined in the Definitions Section, derived from the same base period used to calculate the statewide base price for the applicable rate period and trended forward to such rate period in accordance with applicable provisions of this Attachment, and shall be excluded from the cost included in the statewide base price.

2. (a) An indirect GME payment per discharge shall be added to the case payment rates of teaching general hospitals after the application of SIW and WEF adjustments to the statewide base price and shall be calculated by multiplying such rates by the indirect teaching cost percentage determined by the following formula:

\[
(1 - (1 / (1+1.03(((1+r)^0.0405)-1))))
\]

where “r” equals the ratio of residents and fellows to beds based on the medical education statistics of the hospital for the period ended June 30, 2005, as contained in the survey document submitted by the hospital to the Department as of June 30, 2009, and the staffed beds for the general hospital reported in the 2005 ICR and submitted to the Department no later than June 30, 2009, but excluding exempt unit beds and nursery bassinettes.

(b) Indirect GME costs are those costs defined in the Definitions Section, derived from the same base period used to calculate the statewide base price for the applicable rate period and trended forward to such rate period in accordance with applicable provisions of this Attachment, and shall be excluded from computation of the statewide base price. The amount of such exclusion shall be determined by multiplying the total reported Medicaid costs less reported direct GME costs by the following formula:

\[
1.03(((1+r) ^0.0405)-1)
\]

where “r” equals the ratio of residents and fellows to beds as determined in accordance with subparagraph (a) of this paragraph.
3. A non-comparable payment per discharge shall be added to case payment rates after the application of SIW and WEF adjustments to the statewide base price and shall be calculated for each hospital by dividing the facility’s total reported Medicaid costs for qualifying non-comparable cost categories by its total reported Medicaid discharges as defined in the Statewide Base Price Section. Non-comparable hospital costs are those costs defined in the Definitions Section, derived from the same base period used to calculate the statewide base price for the applicable rate period and trended forward to such rate period in accordance with applicable provisions of this Attachment, and shall be excluded from the cost included in the computation of the statewide base price.
4. For the rate periods on and after December 1, 2009, additional adjustments to the inpatient rates of payment for eligible general hospitals to facilitate improvements in hospital operations and finances will be made, in accordance with the following:

a. General hospitals eligible for distributions pursuant to this section shall be those nongovernmental hospitals with total Medicaid discharges equal to or greater than seventeen and one-half percent for 2007, and a total reduction in Medicaid inpatient revenue, as a result of the application of otherwise applicable rate-setting methodologies in effect for the period December 1, 2009 through March 31, 2010, in excess of 9.7%.

b. For the period December 1, 2009 through March 31, 2010, $33.5 million dollars shall be allocated. The allocation amount for each eligible hospital shall equal the amount of inpatient Medicaid revenue for that hospital that existed using the Medicaid reimbursement provisions in effect immediately prior to the revisions instituted on December 1, 2009, multiplied by that hospital's percentage of reduced Medicaid revenue that is in excess of the threshold set forth in paragraph (a)(ii).

c. For periods on or after April 1, 2010, funds distributed pursuant to this section shall be allocated to eligible hospitals based on a proportion of the eligible hospital's allocation of the funds distributed for the period December 1, 2009 through March 31, 2010, to the total funds distributed for that period applied to the appropriate funds available for the applicable periods below:

   i. for the period April 1, 2010 through March 31, 2011, $75 million;
   ii. for the period April 1, 2011 through March 31, 2012, $50 million; and
   iii. for the period April 1, 2012 through March 31, 2013, $25 million.

d. Payments made pursuant to this section shall be added to rates of payments and not be subject to retroactive adjustment or reconciliation. The amount per discharge to be added to the rates shall be established by dividing the total allocated funds in accordance with paragraph (b) and (c) by the hospital's total reported Medicaid discharges in the applicable base period.

e. Each hospital receiving funds pursuant to this section shall, as a condition for eligibility for such funds, adopt a resolution of the Board of Directors of each such hospital setting forth its current financial condition, including ongoing board oversight, and shall, after two years, issue a report as adopted by each such Board of Directors setting forth what progress has been achieved regarding such improvement, provided, however, if such report fails to set forth adequate progress, as determined by the Commissioner, the Commissioner will deem such facility ineligible for further distributions pursuant to this section and will redistribute such further distributions to other eligible facilities in accordance with the provisions of this section. The Commissioner shall be provided with copies of all such resolutions and reports.

TN #10-33-A
Supersedes TN #09-34
Approval Date June 22, 2011
Effective Date October 20, 2010
5. **Transition II Pool.** For the rate periods on and after October 20, 2010 additional adjustments to the inpatient rates of payment for eligible general hospitals to facilitate improvements in hospital operations and finances will be made in accordance with the following:

a. Hospitals eligible for distributions pursuant to this section shall be those governmental and nongovernmental general hospitals with:
   
   i. total Medicaid inpatient discharges equal to or greater than 17.5% for the 2007 period; and
   
   ii. total reduction in Medicaid inpatient revenue, as a result of the application of otherwise applicable rate-setting methodologies in effect for the period October 20, 2010 through March 31, 2011, in excess of 10.2%.

b. For the period October 20, 2010 through March 31, 2011, total funding equaling $37.5 million shall be allocated. The allocation amount for each eligible hospital shall equal the amount of inpatient Medicaid revenue for that hospital that existed using the Medicaid reimbursement provisions in effect immediately prior to the revisions instituted on December 1, 2009, multiplied by that hospital’s percentage of reduced Medicaid revenue that is in excess of the threshold set forth in paragraph (a)(ii).

c. For the periods on and after April 1, 2011, funds distributed pursuant to this section shall be allocated to eligible hospitals based on a proportion of the eligible hospital’s allocation of the funds distributed for the period October 20, 2010 through March 31, 2011, to the total funds distributed for that period applied to the appropriate funds for the applicable periods below:
   
   i. for the period April 1, 2011 through March 31, 2012, $75 million;
   
   ii. for the period April 1, 2012 through March 31, 2013, $50 million; and
   
   iii. for the period April 1, 2013 through March 31, 2014, $25 million.

d. The distributions authorized pursuant to this section shall be made available through a commensurate reduction in the statewide base price for the October 20, 2010 through March 31, 2011, and each applicable period thereafter, as otherwise computed in accordance with the Statewide Base Price Section.
New York
111(b)

e. Payments made pursuant to this section shall be added to rates of payments and not be subject to retroactive adjustment or reconciliation. The amount per discharge to be added on to the rates for the period October 20, 2010 through March 31, 2011 shall be established by dividing the total funds allocated in accordance with paragraph (b) by six months of the hospital's total reported Medicaid discharges in accordance with paragraph (3)(b) in the 'Statewide Base Price' section of this Attachment. For the periods on and after April 1, 2011 the amount per discharge to be added on to the rates shall be established by dividing the total funds allocated in accordance with paragraph (c) by the hospital's total reported Medicaid discharges in accordance with paragraph (3)(b) in the 'Statewide Base Price' section of this Attachment.

f. Hospitals receiving funds pursuant to this section that did not previously receive funds to facilitate improvements in hospital operations and finances beginning on December 1, 2009, shall, as a condition for eligibility for such funds, adopt and submit a restructuring plan that includes both an assessment of the hospital's current financial position and the plan to restructure and improve its financial operations. The plan must also provide for ongoing Board oversight of plan implementation, along with measurable objectives. Two years following receipt of funds, the Board of Directors must issue a report setting forth what progress has been made toward accomplishing the goals of the restructuring plan. The Commissioner shall be provided with copies of all such resolutions and reports. If such report fails to set forth adequate progress toward the goals of the hospital's restructuring plan as determined by the Commissioner, the Commissioner will deem such facility ineligible for further distributions and will redistribute such further distributions to other eligible facilities in accordance with the provisions of this section.

g. Unallocated funds awarded to hospitals deemed ineligible by the Commissioner, as a result of paragraph (f) of this section, shall be redistributed to all remaining eligible hospitals using the proportion of each eligible hospitals’ allocation of the funds distributed for the period October 20, 2010 through March 31, 2011, to the total funds distributed for that period.
Outlier and transfer cases rates of payment.

1. a. High cost outlier rates of payment shall be calculated by reducing total billed patient charges, as approved by IPRO, to cost, as determined based on the hospital's ratio of cost to charges. Such calculation shall use the most recent data available as subsequently updated to reflect the data from the year in which the discharge occurred, and shall equal 100 percent of the excess costs above the high cost outlier threshold. High cost outlier thresholds shall be developed for each individual DRG and adjusted by hospital-specific wage equalization factors (WEF) and increased by the U.S. Consumer Price Index for all Urban consumers from the base period to the rate period used to determine the statewide base price and the rate period.

b. Cost outlier thresholds for each base APR-DRG will be calculated as follows:
   i. using the applicable base year Medicaid claims data, organize costs per claim with each base APR-DRG from least to greatest value.
   ii. divide the listing of claims from subparagraph (i) for each base APR-DRG into three quartiles;
   iii. the first quartile (Q1) is the set of data having the property that at least one-quarter of the observations are less than or equal to Q1 and that at least three-quarters of the data are greater than or equal to Q1;
   iv. the third quartile (Q3) is conversely identified;
   v. determine the inter-quartile range (IQR) by identifying the spread of the difference between Q1 and Q3 (IQR = Q3-Q1);
   vi. cost outlier thresholds are determined by applying the IQR as follows:

\[ y \cdot IQR + Q3 \]

where \( y \) equals a predetermined standard multiplier. This multiplier is a factor of 5.5.

c. A non-public, not-for-profit general hospital which has not established an ancillary and routine charges schedule shall be eligible to receive high-cost outlier payments equal to the average of high-cost outlier payments received by comparable hospitals, as determined using the following criteria:
   i. downstate hospitals;
   ii. hospitals with a case mix greater than 1.75;
   iii. hospitals with Medicaid revenue greater than $30 million; and
   iv. hospitals with a proportion of outlier to inlier cases greater than 3.0 percent.

TN #09-34 Approval Date January 20, 2010
Supersedes TN NEW Effective Date December 1, 2009
2. Rates of payment to non-exempt hospitals for inpatients who are transferred to another non-exempt hospital shall be calculated on the basis of a per diem rate for each day of the patient’s stay in the transferring hospital, subject to the exceptions set forth in paragraphs (a), (b) and (c) of this paragraph. The total payment to the transferring facility shall not exceed the amount that would have been paid if the patient had been discharged. The per diem rate shall be determined by dividing the DRG case-based payment per discharge as defined in the Definitions Section by the arithmetic inlier length of stay (LOS) for that DRG, as defined in the Definitions Section, and multiplying by the transfer case’s actual length of stay and by the transfer adjustment factor of 120 percent. In transfer cases where the arithmetic inlier LOS for the DRG is equal to one, the transfer adjustment factor shall not be applied.

   a. Transfers among more than two hospitals that are not part of a merged facility shall be reimbursed as follows:
      
      i. the facility which discharges the patient shall receive the full DRG payment; and
      
      ii. all other facilities in which the patient has received care shall receive a per diem rate unless the patient is in a transfer DRG.

   b. A transferring facility shall be paid the full DRG rate for those patients in DRGs specifically identified as transfer DRGs.

   c. Transfers among non-exempt hospitals or divisions that are part of a merged or consolidated facility shall be reimbursed as if the hospital that first admitted the patient had also discharged the patient.

   d. Services provided to neonates discharged from a hospital providing neonatal specialty services to a hospital reimbursed under the case payment system for purposes of weight gain shall be reimbursed and assigned to the applicable APR-DRG upon admission or readmission.
Alternate level of care payments (ALC).

1. Hospitals shall be reimbursed for ALC days at the appropriate 1987 group average operating cost component of rates of payment for hospital-based residential health care facilities established pursuant to Attachment 4.19-D trended to the rate year.

   The determination of the group average operating rate for hospital-based residential health care facilities specified in this paragraph shall be based on the combination of residential health care facilities as follows:

   a. The downstate group consisting of residential health care facilities located in the five boroughs of New York City and Nassau, Suffolk, Westchester and Rockland counties.

   b. The upstate group consisting of all other residential health care facilities in the State.

2. Hospitals that convert medical/surgical beds to residential health care beds shall be reimbursed for services provided in the converted beds in accordance with Attachment 4.19-D.
Exempt units and hospitals.

1. **Physical medical rehabilitation inpatient services** shall qualify for reimbursement as an exempt unit/hospital pursuant to this paragraph for periods on and after December 1, 2009, only if such services are provided in a hospital specializing in such services or in a distinct unit within a general hospital designated for such services and only if:

a. Such hospital or such unit qualified for exempt unit status for purposes of reimbursement under the federal Medicare prospective payment system as of December 31, 2001; or

b. On or before July 1, 2009, the hospital submitted a written request to the Department for exempt status providing assurances acceptable to the Department that the hospital or unit within the hospital meets the exempt status for 2009 for periods prior to December 1, 2009.

i. For periods on and after January 1, 2010, a hospital seeking exempt status for a hospital or a distinct unit within the hospital not previously recognized by the Department as exempt for reimbursement purposes shall submit a written request to the Department for such exempt status and shall provide assurances and supporting documentation acceptable to the Department that the hospital or unit meets qualifying exempt status criteria in effect at the time such written request is submitted. Approval by the Department of such exempt status shall, for reimbursement purposes, be effective on the January 1 following such approval, provided that the request for such exempt unit status was received at least 120 days prior to such date.

ii. For days of service occurring on and after December 1, 2009, the operating component of rates of payment for inpatient services for facilities subject to this subdivision shall be a per diem amount reflecting the facility’s reported 2005 operating costs as submitted to the Department prior to July 1, 2009, not including reported direct medical education costs, and held to a ceiling of 110% of the average of such costs in the region in which the facility is located, as described in paragraph (9) of this section. Such rates shall reflect trend adjustments in accordance with the applicable provisions this Attachment.

iii. For days of service occurring on and after May 12, 2016, the rates of payment for inpatient services for physical medical rehabilitation will be revised to include costs for pediatric ventilator services that receive Certificate of Need (CON) approval. (1) A hospital that has been approved through the CON process to include pediatric ventilators within their physical medical rehabilitation unit will provide or report the following:

---

**TN #16-0029**

Approval Date **March 22, 2017**

Supersedes TN **#09-0034**

Effective Date **May 12, 2016**
(a) Documentation of CON approval of the pediatric ventilator service within their physical medical rehabilitation unit.

(b) Discretely report the costs and statistics for these services on a hospital’s Institutional Cost Report.

(2) A hospital that has a full year experience of pediatric ventilator service costs (defined as audited costs) and statistics will have their physical medical rehabilitation rate, which includes pediatric ventilator service, calculated as follows:

(a) A separate rate will initially be calculated for the physical medical rehabilitation service, using data in 1(b)(ii), and for the pediatric ventilator service using the same base year data as utilized for the medical rehabilitation service (subject to the provisions in paragraph 3 below). Two separate rates will then be combined as detailed in 2(c) to develop one physical medical rehabilitation rate for payment.

(b) The method for calculating the pediatric ventilator service rate, prior to developing the combined rate, will be the same as utilized for the physical medical rehabilitation rate, as described in this section, with the exception that the pediatric ventilator services will not be held to the 110% ceiling of the regional average costs. The pediatric ventilator service rate will not be included in the physical medical rehabilitation services 110% ceiling regional average.

(c) A combined per day payment rate for medical rehabilitation services will be developed from the two separate rates as follows:

(i) The percentage of Medicaid days for each of the two services to the total Medicaid days for the two services is multiplied by each service’s per day payment.

(ii) The Medicaid days utilized for this proportional calculation are those as referenced in 1(b)(iii)(2)(a).

(iii) The results of multiplying the respective proportional percentage to each service’s respective per day rate are then added together to develop the physical medical rehabilitation rate to be paid for both the physical medical rehabilitation and pediatric ventilator service days.
(3) A hospital without an initial full year of pediatric ventilator service cost and statistics experience will have their physical medical rehabilitation rate, which includes the pediatric ventilator service, calculated as above in 1(b)(iii)(2). Except rather than data from 1(b)(iii)1(b) the costs and statistics used for the pediatric ventilator service will be based on budgeted CON approved costs. The budgeted costs will be subject to review and limitation based on a comparison to other hospitals and nursing homes providing the service.

(a) Budgeted base year costs will be replaced with actual audited costs at the time a full year of actual audited costs are available using data in 1(b)(iii)(1)(b).

(b) The pediatric ventilator service rate developed from actual audited costs will be subject to the same review and limitation based on a comparison to other hospitals and nursing homes providing the service that was initially completed for budgeted costs.

2. Chemical dependency rehabilitation inpatient services shall qualify for reimbursement pursuant to this paragraph for periods on and after December 1, 2009, only if such services are provided in a hospital specializing in such services or in a distinct unit within a general hospital designated for such services and only if:
New York
116

a. The services provided in such hospital or unit are limited to chemical dependency rehabilitation care and do not include chemical dependency related inpatient detoxification and/or withdrawal services; or

b. Such hospital or unit is licensed to provide such services pursuant to both the Public Health Law and the Mental Hygiene Law and meets the applicable alcohol and/or substance abuse rehabilitation standards set forth in regulations:

i. Any such unit within a hospital must be in a designated area and consist of designated beds providing only chemical dependency rehabilitation inpatient services with adequate adjoining supporting spaces and assigned personnel qualified by training and/or by experience to provide such services and in accordance with any applicable criteria regarding the provision of such services issued by the New York State Office of Alcohol and Substance Abuse Services.

ii. For days of service occurring on and after December 1, 2009, the operating component of rates of payment for inpatient services for facilities subject to this subdivision shall be a per diem amount reflecting the facility's reported 2005 operating costs as submitted to the Department prior to July 1, 2009, not including reported direct medical education costs, and held to a ceiling of 110% of the average of such costs in the region in which the facility is located, as described in paragraph (9) of this section. Such rates shall reflect trend adjustments in accordance with the applicable provisions of this Attachment.

3. Critical access hospitals.

a. Rural hospitals shall qualify for inpatient reimbursement as critical access hospitals for periods on and after December 1, 2009, only if such hospitals are designated as critical access hospitals in accordance with the provisions of Title XVIII (Medicare) of the federal Social Security Act.

b. For days of service occurring on and after December 1, 2009, the operating component of rates of payment for inpatient services for facilities subject to this subdivision shall be a per diem amount reflecting the facility's reported 2005 operating costs as submitted to the Department prior to July 1, 2009, and held to a ceiling of 110% of the average of such costs for all such designated hospitals statewide. Such rates shall reflect trend factor adjustments in accordance with the applicable provisions of this Attachment.

a. Hospitals shall qualify for inpatient reimbursement as cancer hospitals for periods on and after December 1, 2009, only if such hospitals were, as of December 31, 2008, designated as comprehensive cancer hospitals in accordance with the provisions of Title XVIII (Medicare) of the federal Social Security Act.
New York

117

b. For days of service occurring on and after December 1, 2009, the operating component of rates of payment for inpatient services for facilities subject to this Section shall be a per diem amount reflecting the facility's reported 2005 operating costs as submitted to the Department prior to July 1, 2009. Such rates shall reflect trend factor adjustments in accordance with the applicable provisions of this Attachment.

5. **Specialty long term acute care hospital**.
   a. Hospitals shall qualify for inpatient reimbursement as specialty long term acute care hospitals for periods on and after December 1, 2009, only if such hospitals were, as of December 31, 2008, designated as specialty long term acute care hospitals in accordance with the provisions of Title XVIII (Medicare) of the federal Social Security Act.
   
   b. For days of service occurring on and after December 1, 2009, the operating component of rates of payment for inpatient services for facilities subject to this Section shall be a per diem amount reflecting the facility's reported 2005 operating costs as submitted to the Department prior to July 1, 2009. Such rates shall reflect trend factor adjustments in accordance with the applicable provisions of this Attachment.

6. **Acute care children's hospitals**. Hospitals shall qualify for inpatient reimbursement as acute care children's hospitals for periods on and after December 1, 2009, only if:
   
   a. Such hospitals were, as of December 31, 2008, designated as acute care children's hospitals in accordance with the provisions of Title XVIII (Medicare) of the federal Social Security Act; and
   
   b. Such hospitals filed a discrete 2007 institutional cost report reflecting reported Medicaid discharges of greater than 50 percent of total discharges.
      
      i. For days of service occurring on and after December 1, 2009, the operating component of rates of payment for inpatient services for facilities subject to this subdivision shall be a per diem amount reflecting the facility's reported 2007 operating costs as submitted to the Department prior to July 1, 2009. Such rates shall reflect trend factor adjustments in accordance with the applicable provisions of this Attachment.

7. **Substance abuse detoxification inpatient services**. For patients discharged on and after December 1, 2008, rates of payment for general hospitals which are certified by the Office of Alcoholism and Substance Abuse Services (OASAS) to provide services to patients determined to be in the diagnostic category of substance abuse will be made on a per diem basis. This includes inpatient detoxification, withdrawal, and observation services:
   
   a. MDC 20, DRGs 743 through 751 effective December 1, 2008 through March 31, 2013.
   
   b. MDC 20, APR-DRGs 770 through 776 effective April 1, 2013. APR-DRGs are more fully described in the Definitions section and the Service Intensity Weights (SIW) and Average Length-of-Stay section of this Attachment.

[will be made on a per diem basis. This includes inpatient detoxification, withdrawal, and observation services.]
Medically managed detoxification services are for patients who are acutely ill from alcohol and or substance related addictions or dependence, including the need or risk for the need of medical management of severe withdrawal, and/or are at risk of acute physical or psychiatric co-morbid conditions. Medically supervised withdrawal services are for patients at a mild or moderate level of withdrawal, or are at risk for such, as well as patients with sub-acute physical or psychiatric complications related to alcohol and/or substance related dependence, are intoxicated, or have mild withdrawal with a situational crisis, or are unable to abstain yet have no past withdrawal complications.

The per diem rates for inpatient detoxification, withdrawal, and observation services will be determined as follows:

a. The operating cost component of the per diem rates will be computed using 2006 costs and statistics as reported to the Department by general hospitals prior to 2008, adjusted for inflation. The inflation factor will be calculated in accordance with the trend factor methodology described in this Attachment. The average operating cost per diem for the region in which the hospital is located will be calculated using costs incurred for patients requiring detoxification services. The operating cost component of the per diem rates will be transitioned to 2006 as follows:

1. For the period December 1, 2008 through March 31, 2009, 75% of the operating cost component will reflect the operating cost component of rates effective for December 31, 2007, adjusted for inflation, and 25% will reflect 2006 operating costs in accordance with paragraphs (b) through (f).

2. For April 1, 2009 through March 31, 2010, 37.5% of the operating cost component will reflect the December 31, 2007 operating cost component, adjusted for inflation, and 62.5% will reflect 2006 operating costs in accordance with paragraphs (b) through (f).

3. For periods on and after April 1, 2010, 100% of the operating cost component will reflect 2006 operating costs in accordance with paragraphs (b) through (f).
b. For purposes of establishing the average operating cost per diem by region for medically managed detoxification and medically supervised withdrawal services, the regions of the state are defined as follows:

1. New York City - Bronx, New York, Kings and Richmond Counties;
2. Long Island - Nassau and Suffolk Counties;
3. Northern Metropolitan - Columbia, Delaware, Dutchess, Orange, Putnam, Rockland, Sullivan, Ulster and Westchester Counties;
5. Utica/Watertown - Franklin, Herkimer, Lewis, Oswego, Otsego, St. Lawrence, Jefferson, Chenango, Madison and Oneida Counties;
6. Central - Broome, Cayuga, Chemung, Cortland, Onondaga, Schuyler, Seneca, Steuben, Tioga, and Tompkins Counties;
7. Rochester - Monroe, Ontario, Livingston, Wayne and Yates Counties; and
8. Western - Allegany, Cattaraugus, Chautauqua, Erie, Genesee, Niagara, Orleans and Wyoming Counties.

c. For each of the regions, the 2006 operating costs incurred by general hospitals in such region for providing care to inpatients requiring detoxification services, as defined by OASAS, and reported in the 2006 ICR submitted to the Department prior to 2008, are adjusted by a length of stay (LOS) factor. This LOS factor reflects the loss of revenue due to the reduction of payments for services over the 5th day of stay. The total adjusted operating costs for each region, divided by the total regional days, is the average operating cost per diem for the region.

d. The per diem rates for inpatients requiring medically managed detoxification services will reflect 100% of the average operating cost per diem for the region in which the hospital is located, adjusted for inflation, for the first 5 days of service. However, such payments will be reduced by 50% for services provided on the 6th through 10th day of service. No payments will be made for any services provided on and after the 11th day.

e. Per diem rates for inpatients requiring medically supervised withdrawal services, will reflect 100% of the average operating cost per diem for the region in which the hospital is located, adjusted for inflation, for the period January 1, 2009 through December 31, 2009. For periods on and after January 1, 2010, the per diem rates for withdrawal services will reflect 75% of the average operating cost per diem for the region, adjusted for inflation, and will be reduced by 50% for care provided on the 6th through 10th day of service. No payments will be made for any services provided on and after the 11th day.
f. Per diem rates for inpatients placed in observation beds, as defined by OASAS, will reflect 100% of the average operating cost per diem for the region in which the hospital is located, adjusted for inflation, and will be paid for no more than 2 days of care. After 2 days of care the payments will reflect the patient’s diagnosis as requiring either detoxification or withdrawal services. The days of care in the observation beds will be included in the determination of days of care for either detoxification or withdrawal services. Furthermore, days of care provided in observation beds will, for reimbursement purposes, be fully reflected in the computation of the initial five days of care.

g. Capital cost reimbursement for the general hospitals which are certified by OASAS to provide substance abuse services will be based on the current reimbursement methodology for determining allowable capital for exempt unit per diem rates. Such capital cost will be added to the applicable operating cost component as a per diem amount to establish the per diem rate for each service.
New York
117(d)

8. Inpatient psychiatric services provided in general hospitals, or distinct units of general hospitals, specializing in such inpatient psychiatric services, for patients admitted on and after October 20, 2010, will be reimbursed on a per diem basis as follows:

a. Reimbursement will use the All Patient Refined Diagnostic Related Group (APR-DRG) patient classification system.

b. The operating component of the rate will be a statewide price, calculated utilizing 2005 Medicaid fee-for-service (FFS) inpatient costs developed using the ratio of cost to charges approach to determine costs and a regression model to price out various components of the costs to determine cost significance in such components. The components include patient age, rural designation, comorbidities, length of stay, and presence of mental retardation. The costs of these components as developed in the regression model were excluded in developing the statewide price.

i. The facility-specific old operating per diem rates were trended to 2010, and for each case, these rates were multiplied by the length of stay (LOS) to calculate the “old payment.”

ii. Facility-specific 2005 Direct Graduate Medical Education (DGME) costs were divided by 2005 patient days to calculate DGME per diem rates. These rates were then trended to 2010.

iii. The 2010 payment rate for Electroconvulsive Therapy (ECT) was established as $281 (based on the ECT rate in effect for Medicare psychiatric patients during the first half of 2010). This rate was then adjusted by each facility’s wage equalization factor (WEF).

iv. For each case, the proper DGME payment (DGME rate multiplied by the LOS) and ECT payment (WEF-adjusted ECT rate times the number of ECT treatments) was subtracted from the “old payments” to derive the “old payments subject to risk adjustment.”

v. For each case, a payment adjustment factor was derived based on the regression model, including the LOS adjustment factor as defined by the new payment methodology.

vi. The sum of the old payments subject to risk adjustment from step iv ($502,341,057), was divided by the sum of payment adjustment factors from step v ($831,319), which resulted in the statewide per diem rate of $604.27 as of October 20, 2010.

The current statewide per diem rate of $642.66 reflects the effect of restoring transition funds back into the statewide price pursuant to the Transition Fund Pool section of this Attachment.
c. The non-operating component of the rate will reflect the 2010 budgeted capital costs per diem and the 2005 Medicaid fee-for-service Direct GME costs (DGME). Capital costs will be calculated in accordance with this section including an adjustment to reflect allowable capital costs as reflect in the applicable rate year’s Institutional Cost Report. DGME costs are the 2005 reimbursable salaries, fringe benefits, non-salary costs and allocated overhead for residents, fellows, and supervising physicians. The DGME costs allocated to the psychiatric unit is divided by the total patient days spent in the psychiatric unit to derive the 2005 per diem cost of the DGME attributable to the psychiatric unit. This 2005 per diem psychiatric DGME cost is then inflated by 2.95% for 2006, 2.1% for 2007, and 0% thereafter to trend it to October 2010 payment levels.

d. The statewide price will be adjusted for each patient to reflect the following factors:

i. A facility-specific wage equalization factor (WEF), calculated in accordance with the Wage Equalization Factor (WEF) section of this Attachment, will reflect differences in labor costs between hospitals.

ii. A service intensity weight (SIW) associated with the case, calculated utilizing the grouper assigned APR-DRG, will be applied to the adjusted operating per diem. The SIWs for the APR-DRGs as noted in the Inpatient Psychiatric Services Service Intensity Weights (SIWs) table are different than those for the acute system. The SIWs reflect the cost weights assigned to each All Patient Refined (APR) diagnosis related group (DRG) patient classification category. The SIWs assigned to each APR-DRG indicates the relative cost variance of that APR-DRG classification from the average cost of all inpatients in all APR-DRGs. The SIWs are developed using two years of Medicaid fee-for-service cost data as reported to the Statewide Planning and Research Cooperative System (SPARCS) for the years 2005 and 2006. Costs associated with statistical outliers will be excluded from the SIW calculation.
Inpatient Psychiatric Services Service Intensity Weights (SIWs)

### iii.
A rural adjustment factor of 1.2309 will be applied to the operating per diem for those hospitals designated as rural hospitals. A rural facility is a general hospital with a service area which has an average population of less than 175 persons per square mile, or a general hospital with a service area which has an average population of less than 200 persons per square mile measured as population density by zip code. For dates of service beginning on or after July 1, 2014, rural designation will be applicable to hospitals located in an upstate region, as defined in subparagraph (l) of this section, and with population densities of 225 persons or fewer per square mile as determined based on the New York State 2010 Vital Statistics table of estimated population, land area, and population density. Accordingly, there are 27 rural facilities that provide inpatient psychiatric services.

### iv.
An age adjustment payment factor of [1.0872] 1.3597 will be applied to the per diem operating component for adolescents ages 17 and under. For ages 18 and over, an adjustment payment factor of 1 will be applied.
v. A payment adjustment factor of 1.0599 will be applied to the operating component for the presence of a mental retardation diagnosis.

vi. The payment methodology will include one comorbidity factor per stay and if more than one comorbidity is present during a patient's stay, the comorbidity that reflects the highest payment factor will be used to adjust the per diem operating component.

vii. A variable payment factor will be applied to the operating per diem for each day of the stay, with the factor for days 1 through 4 established at 1.2, the factor for days 5 through 11 established at 1.0, the factor for days 12 through 22 established at 0.96 and the factor for stays longer than 22 days established at 0.92.

viii. An annual adjustment for inflation will be applied as determined in accordance with the trend factor provisions of this Attachment.
New York
117(k)

ix. For dates of service beginning on or after July 1, 2014, an additional ten percent increase will be applied for hospitals located in an upstate region as defined in subdivision (l) of this section.

e. The first day of a patient's readmissions to the same hospital within 30 days of discharge will be treated as day four for purposes of the variable payment factor computed as aforementioned, with subsequent days treated in a conforming manner with the provisions.

f. Reimbursement for physician services will not be included in rates and such services may be billed on a fee-for-services basis pursuant to the Hospital Physician Billing Section in Attachment 4.19-B.

g. Reimbursement for electroconvulsive therapy will be established at a statewide fee of $281, as adjusted for each facility's WEF, for each treatment during a patient's stay.

h. New inpatient psychiatric exempt hospitals or units established pursuant to Article 28 of the Public Health Law will be reimbursed at the statewide price plus budgeted capital and Direct GME. Budgeted capital will be adjusted as described in this section and will be adjusted to actual costs in future years. Direct GME will be adjusted to actual costs based upon the first twelve months reporting following the calendar year after the opening of the new unit.

i. The base period costs and statistics used for inpatient psychiatric per diem rate setting operating cost components including the weights assigned to diagnostic related groups (DRG) designated as psychiatric DRGs for per diem reimbursement, will be updated [no less frequently than every four years and the new base period will be no more than four years prior to the first applicable rate period that utilized such new base period.] as soon as is practical at which time the State will submit a state plan amendment for the implementation of rebasing. The payment factors for rural designation, age, certain defined comorbidities, and the presence of mental retardation may also be updated to reflect more current data.

j. For rate periods through December 31, 2014, reimbursement will include transition payments of $25 million on an annualized basis, which will be distributed as follows:
i. Fifty percent of the payments will be allocated to facilities that experience a reduction in Medicaid operating revenue relative to payments prior to this new methodology in excess of threshold percentage set forth in this paragraph as a result of the implementation of rates set pursuant to this section. The payments will be allocated proportionally, calculated utilizing each eligible facility’s relative Medicaid operating revenue reduction in excess of the threshold, as determined by the Commissioner. The threshold percentage described in this paragraph will be 6.02%. Therefore, 50% of the $25 million will be allocated to hospitals such that they will not lose more than 6.02% of revenue from the existing payment to the new payments in year 1.

ii. Fifty percent of the payments will be allocated to facilities whose rates otherwise set pursuant to this section result in Medicaid revenue that is less than the facility’s calculated Medicaid costs by a threshold percentage in excess of 1.20%. The payments will be allocated proportionally, utilizing the degree by which each facility’s Medicaid operating revenue shortfall exceeds such threshold percentage. Therefore, with the utilization of 2006 data, 50% of the $25 million will be allocated to hospitals whose costs are above their revenues.

iii. In 2010-11, the $25 million investment will be allocated to a transition fund pool. In future years through December 31, 2014, the $25 million transition fund pool will be reduced, and the excess funds will be reinvested into the statewide base price as follows:

k. For the rate period October 20, 2010 through March 31, 2011, reimbursement will include transition payments totaling, in aggregate, $12 million and will be distributed to eligible hospitals as described below, provided, however, that if less than $12 million is distributed in such rate period then additional distributions of the $12 million will be made in subsequent rate periods as follows:

TN #10-03 Approval Date September 13, 2011
Supersedes TN New Effective Date October 20, 2010
New York
117(m)

i. Eligible hospitals will be those general hospitals which receive approval for certificate of need applications submitted to the Department of Health between April 1, 2010 and March 31, 2011 for adding new behavioral health inpatient beds in response to the decertification of other general hospital behavioral health inpatient beds in the same service area, or which the Commissioner of Health, in consultation with the Commissioner of Mental Health, has determined to have complied with Department of Health requests to adjust behavioral health service delivery in order to ensure access.

ii. Eligible hospitals will, as a condition of their receipt of the rate adjustments, submit to the Department of Health proposed budgets for the expenditure of the additional Medicaid payments for the purpose of providing inpatient behavioral health services to Medicaid eligible individuals. The budgets must be approved by the Department of Health, in consultation with the Office of Mental Health, prior to the rate adjustments being issued.

iii. Distributions will be made as add-ons to each eligible facility’s inpatient Medicaid rate and will be allocated proportionally, utilizing the proportion of each approved hospital budget to the total amount of all approved hospital budgets. Distributions will be subsequently reconciled to ensure that actual aggregate expenditures are within available aggregate funding.

For purposes of this section, the downstate region of New York State will consist of the following counties of: Bronx, New York, Kings, Queens, Richmond, Nassau, Suffolk, Westchester, Rockland, Orange, Putnam, and Dutchess; and the upstate region of New York State will consist of all other New York counties.
Hospitals or distinct units of hospitals that fail to maintain qualifying criteria for exempt status for reimbursement purposes, as set forth in this Attachment, shall continue to be reimbursed in accordance with such exempt status until the commencement of the next rate period, as determined by the Department.

Rates of payment for inpatient services described in paragraphs (1) and (2) above, which utilize regional averages for determining a cost ceiling shall utilize regions of the State set forth below, except that if the otherwise applicable region has less than five exempt hospitals or units in the service, facilities located in the nearest regions will be used to establish a minimum of five hospital or units for the purpose of determining ceilings. Such regions are as follows:

a. New York City, consisting of the counties of Bronx, New York, Kings, Queens and Richmond;
b. Long Island, consisting of the counties of Nassau and Suffolk;
c. Northern Metropolitan, consisting of the counties of Columbia, Delaware, Dutchess, Orange, Putnam, Rockland, Sullivan, Ulster and Westchester;
e. Utica / Watertown, consisting of the counties of Franklin, Herkimer, Lewis, Oswego, Otsego, St. Lawrence, Jefferson, Chenango, Madison and Oneida;
f. Central, consisting of the counties of Broome, Cayuga, Chemung, Cortland, Onondaga, Schuyler, Seneca, Steuben, Tioga and Tompkins;
g. Rochester, consisting of the counties of Monroe, Ontario, Livingston, Wayne and Yates; and
h. Western, consisting of the counties of Allegany, Cattaraugus, Chautauqua, Erie, Genesee, Niagara, Orleans and Wyoming.

Capital cost components of per diem rates determined pursuant to this Section shall be computed on the basis of budgeted capital costs allocated to the exempt hospital or distinct unit of a hospital pursuant to the capital cost provisions of this Attachment divided by exempt hospital or unit patient days reconciled to actual total expense.
12. *New hospitals and new hospital units.* The operating cost component of rates of payment for new hospitals, or hospital units, without adequate cost experience [shall] will be computed based on either budgeted cost projections, subsequently reconciled to actual reported cost data, or the regional ceiling calculated in accordance with paragraph (10) of this section, whichever is lower. The capital cost component of such rates [shall] will be calculated in accordance with the capital cost provisions of this Attachment.

13. Effective July 1, 2018, hospitals that have been approved by the Office of Mental Health to operate distinct units to provide specialized inpatient psychiatric care to stabilize adults with co-morbid mental illness and intellectual developmental disability diagnoses as defined in the Diagnostic and Statistical Manual of Mental Disorders published by the American Psychiatric Association, will be reimbursed a flat per diem operating rate of $1,177.11, and the rate-setting methodology provided in paragraph 8 of this section will not apply to services furnished in such units. Capital costs will be reimbursed on a per diem basis for the cost of capital in accordance with paragraph 11 of this section. Specialized inpatient psychiatric units are a new approach to treating dually-diagnosed individuals. The units are physically distinct and have been approved by the State to provide such care and services based on a review of the unit’s physical plant specifications, enhanced staffing, and adherence to specialized clinical protocols, which demonstrate sufficient specialization in the assessment and treatment of adults with co-occurring intellectual or developmental disability, including autism spectrum disorder, and mental illness diagnoses, who exhibit destructive behaviors, or an acute safety risk or decrease in functioning.
**Trend factor.**

1. The trend factor terms used in this section will be used to develop rates of payments on or after December 1, 2009.

2. The Commissioner shall establish trend factors for hospitals to project the effects of price movements on historical operating costs. Rates of payment excluding capital, as calculated pursuant to the provisions of this Attachment, shall be trended to the applicable rate year by the trend factors developed in accordance with the provision of this section for rate periods through March 31, 2000.

3. The methodology for establishing the trend factors shall be developed by a panel of four independent consultants with expertise in health economics or reimbursement methodologies for health-related services appointed by the Commissioner.

4. The methodology shall include the appropriate external price indicators and the data from major collective bargaining agreements as reported quarterly by the Federal Department of Labor, Bureau of Labor Statistics, for non-supervisory employees. For 1996 through December 31, 1999, the Commissioner shall apply the 1995 trend factor methodology.

5. The Commissioner shall implement one interim adjustment to the trend factors, based on recommendations of the panel, and one final adjustment to the trend factors. Such adjustment shall reflect the price movement in the labor and non labor components of the trend factor. At the same time adjustments are made to the trend factors in accordance with this subdivision, adjustments shall be made to all inpatient rates of payment affected by the adjusted trend factor.

6. Trend factors used to project reimbursable operating costs to the rate period April 1, 1995 to December 31, 1995 shall not be applied in the development of the rates of payment. This section shall not apply to trend factors, adjusted trend factors of final trend factors used for the January 1, 1995 through December 31, 1995, rate period for purposes of projecting allowable operating costs to subsequent rate periods.

7. Trend factors used to project reimbursable operating costs to the rate period commencing April 1, 1996 through March 31, 1997, shall not be applied in the development of the rates of payment. This section shall not apply to trend factors or final trend factors used for the January 1, 1995 through December 31, 1995 or January 1, 1996 to March 31, 1996, rate period for purposes of projecting allowable operating costs to subsequent rates periods.
8. Trend factors used to project reimbursable operating costs to rate periods commencing July, 1, 1999 through March 31, 2009, and on and after April 1, 2009 through March 31, 2011, shall reflect no trend factor projections or adjustments for the period April 1, 1996 through March 31, 1997.

9. For rate periods on and after April 1, 2000, the Commissioner shall establish trend factors for rates of payment for hospitals to project for the effects of inflation. The factors shall be applied to the appropriate portion of reimbursable costs calculated pursuant to this Attachment.
   a. In developing trend factors for such rates of payment, the Commissioner shall use the most recent Congressional Budget Office estimate of the rate year’s U.S. Consumer Price Index for all Urban Consumers published in the Congressional Budget Office Economic and Budget Outlook after June first of the rate year prior to the year for which rates are being developed.
   b. After the final U.S. Consumer Price Index (CPI) for all Urban Consumers is published by the United States Department of Labor, Bureau of Labor Statistics, for a particular rate year, the Commissioner shall reconcile such final CPI to the projection used in subparagraph (a) and any difference will be included in the prospective trend factor for the current year.
   c. At the time adjustments are made to the trend factors in accordance with this section, adjustments shall be made to all inpatient rates of payment affected by the trend factor adjustment.

10. The final 2006 trend factor shall be the U.S. CPI for all Urban Consumers, as published in the U.S. Department Labor Statistics, minus 0.25%.
11. The final 2007 trend factor shall equal 75% of the final trend factor determined in paragraph (b) above.
12. The applicable trend factor for the 2008 and 2009 calendar year periods shall be zero.
13. The applicable trend factor for the 2010 calendar year shall be zero for inpatient services provided by general hospitals on and after January 1, 2010.
14. Effective for services provided on and after April 1, 2011, the applicable trend factor for the 2011 calendar year period will be no greater than zero.

15. Effective for services provided on and after January 1, 2012, the applicable trend factor for the 2012 calendar year period will be no greater than zero.

16. The applicable trend factor for the 2013 calendar year will be no greater than zero for services provided on and after January 1, 2013.

17. The applicable trend factor for the 2014 calendar year period will be no greater than zero for services provided on and after January 1, 2014.

18. The applicable trend factor for the 2015 calendar year period will be no greater than zero for services provided on and after January 1, 2015 through March 31, 2015 and April 23, 2015 through December 31, 2015.

19. The applicable trend factor for the 2016 calendar year period will be no greater than zero for services provided on and after January 1, 2016.

20. The applicable trend factor for the 2017 calendar year period will be no greater than zero for services provided on and after January 1, 2017 through March 31, 2017 and April 1, 2017 through December 31, 2017.

21. The applicable trend factor for the 2018 calendar year period will be no greater than zero for services provided on and after January 1, 2018.

22. The applicable trend factor for the 2019 calendar year period will be no greater than zero for services provided on and after January 1, 2019 through March 31, 2019[.]and April 1, 2019 through December 31, 2019.

23. The applicable trend factor for the period on and after January 1, 2020 will be no greater than zero.
Potentially Preventable Negative Outcomes (PPNOs)

Potentially Preventable Complications (PPC)

For discharges occurring on and after July 1, 2011 through March 31, 2012 Medicaid rates of payment to hospitals that have higher than expected Medicaid payments related to potentially preventable complications, based on the criteria set forth in the Complication Criteria section, as determined by a risk adjusted comparison of the actual and expected Medicaid payments per case for each hospital as described by the Methodology section, will be reduced in accordance with the PPC Adjustment Factor section. Such rate adjustments for this period will result in an aggregate reduction in Medicaid payments of $31,257,000. For discharges occurring on and after April 1, 2013 through March 31, 2014, such rate adjustments will result in an aggregate reduction in Medicaid payments of $41,000,000. For discharges beginning April 1, 2014 through March 31, 2015, such rate adjustments will result in an aggregate reduction in Medicaid payments of $20,500,000.

Definitions. As used in this Section, the following definitions will apply:

1. **Potentially Preventable Complications** will mean harmful events or negative outcomes that develop after hospital admission and may result from processes of care and treatment rather than from natural progression of the underlying illness, as defined under version [28] 30 of the Potentially Preventable Complication grouping logic software developed and published by 3M Health Information Systems, Inc. (3M). The software identifies 1,450 ICD-9-CM diagnosis codes as a PPC diagnoses. Each ICD-9-CM code designated as a PPC diagnosis was assigned to one of 64 mutually exclusive complication groups called PPCs. A list of such PPCs, effective for periods on and after July 1, 2011, are available on the following Department of Health website link:

   www.health.ny.gov/health_care/medicaid/quality/ppo/complications

2. **Hospital** will mean a general hospital as defined pursuant to the Hospital Inpatient Reimbursement – Effective December 1, 2009 section, excluding, effective July 1, 2011, those hospitals exempt from the APR-DRG reimbursement methodology and critical access hospitals.

3. **Observed case** will mean all non-Medicare acute care cases.

4. **PPC Coefficient** will mean a dollar amount, the result of an indirect standardization, equal to the statewide average incremental Medicaid payment attributable to each of the 64 PPCs.

5. **Adjusted Admission APR-DRG** will be defined as the assigned hospital admission APR-DRG SOI for each observed case using version [28] 30 of the APR-DRG grouper and results from 3M’s PPC grouping logic software. The software results identify each PPC per admission, which has been adjusted to reassign all secondary diagnosis, not identified as a PPC or the direct cause of a PPC, as present on admission.

**TN #14-0026**

**Approval Date** June 26, 2015

**Supersedes TN #13-0041**

**Effective Date** April 1, 2014
Complication Criteria.

A complication is a condition that develops after admission to the hospital. Complications may or may not be preventable. For a complication to qualify as a PPC, the secondary diagnosis must meet the following criteria:

a. Shall not be redundant with the diagnosis that was the reason for hospital admission;
b. Shall not be an inevitable, natural, or expected consequence or manifestation of the reason for hospital admission;
c. Shall be expected to have a significant impact on short or long-term debility, mortality, patient suffering, or resource use; and
d. Shall have a relatively narrow spectrum of manifestations, meaning that the impact of the diagnosis on the clinical course or on the resource use must not be significant for some patients but trivial for others.

Methodology.

1. The actual Medicaid payment will be computed as the aggregate Medicaid payment for each hospital observed case assigned using version 28 of the APR-DRG grouper. The discharge APR-DRG severity of illness (SOI) service intensity weight (SIW) is multiplied by the Medicaid statewide base price for the applicable rate period.

2. The expected Medicaid payment will be computed as the aggregate Medicaid payment for each adjusted admission APR-DRG. The expected Medicaid payment will equal the adjusted admission APR-DRG SIW multiplied by the Medicaid statewide base price for the applicable rate period. The expected Medicaid payment will then be reduced by the sum of the PPC coefficient for the particular observed case.

3. For each hospital, a hospital-specific coefficient will be computed and equal to the aggregate actual Medicaid payment minus the aggregate expected Medicaid payment of all observed cases, divided by the total number of observed cases. In the event the hospital-specific coefficient is less than zero, the hospital coefficient shall be set to zero.

TN #11-82
Supersedes TN NEW
Approval Date April 25, 2013
Effective Date July 1, 2011
PPC Adjustment Factor.

1. Effective for the period July 1, 2011 through March 31, 2012, and for periods April 1, 2013 through March 31, [2014] 2015, rate adjustments for each hospital will be calculated using 2009 Medicaid claims data for discharges that occurred between January 1, 2009 and December 31, 2009.

2. The hospital-specific coefficient is multiplied by the total number of non-behavioral health Medicaid discharges to compute the PPC penalty. The PPC penalty is then multiplied by the hospital's wage equalization factor (WEF) and, for teaching hospitals, the indirect graduate medical education (IME) factor.

3. The Medicaid case payment rate for the applicable rate period shall be used to compute the total Medicaid operating payments for all non-behavioral health Medicaid discharges in each hospital.

4. For each hospital, a PPC adjustment factor will be computed as the ratio of the hospital’s PPC penalty and the hospital’s total Medicaid operating payments for all non-behavioral health Medicaid discharges in each hospital as determined pursuant to this section.

Adjustment for Hospitals With Unreliable Present On Admission (POA) Data.

Each hospital will be evaluated on five criteria for the reliability of the POA indicator in Medicaid discharge data. POA data was evaluated using 2009 Statewide Planning and Research Cooperative System (SPARCS) data. Two levels of POA quality will be established for each of the criteria, “red” and “grey” zones. The criteria and levels will be as follows:

1. The percent of pre-existing diagnoses that are coded as not present on admission: “red” will be greater than or equal to 7.5%, “grey” will be greater than or equal to 5%, but less than 7.5%.

2. Excluding pre-existing and exempt diagnoses, the percent of remaining diagnoses coded as uncertain: “red” will be greater than or equal to 10%, “grey” will be greater than or equal to 5%, but less than 10%.

3. Excluding pre-existing, exempt, and perinatal diagnoses, a high percentage of remaining diagnoses coded as present on admission: “red” will be greater than or equal to 96%, “grey” will be greater than or equal to 93%, but less than 96%.

4. Excluding pre-existing, exempt, and perinatal diagnoses, a low percentage of remaining diagnoses coded as present on admission: “red” will be less than or equal to 70%, “grey” will be greater than or equal to 70%, but less than 77%; and
5. For surgical cases only, the percent of secondary diagnoses coded as present on admission: “red” will be greater than or equal to 40%, “grey” will be greater than or equal to 30%, but less than 40%.

6. Hospitals are determined to have unreliable POA data if any of the five criteria are in the “red” zone, or if two or more of the five criteria are in the “grey” zone.

7. An upstate and downstate average PPC [adjustment factor] penalty will be [applied to each hospital deemed to have unreliable] calculated by computing a weighted average of the hospital-specific coefficients of all hospitals with reliable POA data located in each designated region using the total number of non-behavioral health Medicaid discharges of such hospitals. For each hospital deemed to have unreliable POA data the upstate and downstate average PPC penalty will be multiplied by the hospital’s WEF, and, for teaching hospitals, the IME factor. The [upstate and downstate] PPC adjustment factor will be [calculated using a weighted average of all hospitals with reliable POA data located in each designated region] computed pursuant to the PPC Adjustment Factor section.

8. For purposes of this section, the downstate region of New York State will consist of the New York counties of Bronx, New York, Kings, Queens, Richmond, Nassau, Suffolk, Westchester, Rockland, Orange, Putnam and Dutchess. The upstate region of New York State will consist of all other New York counties.

TN  #13-0041
Supersedes TN  #11-0082
Approval Date  June 1, 2015
Effective Date  April 1, 2013
Potentially Preventable Hospital Readmissions (PPR)

For discharges occurring on and after July 1, 2010 through March 31, 2012, Medicaid rates of payment to hospitals that have an excess number of readmissions based on the criteria set forth in the Readmission Criteria Section, as determined by a risk adjusted comparison of the actual and expected number of readmissions in a hospital as described by the Methodology Section, will be reduced in accordance with the Payment Calculation Section. Such rate adjustments will result in an aggregate reduction in Medicaid payments of $27.8 million for the period July 1, 2010 through March 31, 2011 and $12 million for the period April 1, 2011 through March 31, 2012. For discharges occurring on and after April 1, 2013 through March 31, 2014, rate adjustments will result in an aggregate reduction in Medicaid payments of $27.4 million and $13.7 million for the period April 1, 2014 through March 31, 2015.

Definitions. As used in this Section, the following definitions will apply:

1. **Potentially Preventable Readmissions (PPR)** will mean a readmission to a hospital that follows a prior admission from a hospital within 14 days, and that is clinically-related to the prior hospital admission, as defined under the PPR grouping logic software developed and published by 3M Health Information Systems, Inc. (3M), version 26.1 for the period July 1, 2010 through March 31, 2011; version 28 for the period April 1, 2011 through March 31, 2012; [and] version 29 for the period April 1, 2013 through March 31, 2014; version 30 for the period April 1, 2014 through June 30, 2014; version 31 for the period July 1, 2014 through December 31, 2014; and version 32 for the period January 1, 2015 through March 31, 2015.

2. **Hospital** will mean a general hospital as defined pursuant to the Hospital Inpatient Reimbursement – Effective December 1, 2009 Section, excluding, effective July 1, 2011, those hospitals exempt from the APR-DRG reimbursement methodology and critical access hospitals.

3. **Expected Potentially Preventable Readmissions**, for the period July 1, 2010 through June 30, 2011, are derived using a logistic regression analysis that produces a predicted probability (a number ranging from zero to one) that a hospital admission would be followed by at least one PPR. The total number of expected PPRs shall equal the sum of the expected probabilities of a PPR for all admissions at each hospital. Effective for the period July 1, 2011, through March 31, 2012; and April 1, 2013 through March 31, [2014] 2015, the Expected Potentially Preventable Readmissions will be derived using 2009 SPARCS Medicaid data through an indirect standardization. A statewide PPR rate, the number of at-risk admissions followed by at least one PPR divided by the total number of at-risk admissions, for every APR-DRG severity of illness (SOI) combination will be multiplied by the number of at-risk admissions in that APR-DRG SOI at each hospital. The sum of all APR-DRG SOI combinations will be the Expected PPRs.

4. **Observed Rate of Readmission** will mean the number of admissions in each hospital that were actually followed by at least one PPR divided by the total number of admissions.
5. **Expected Rate of Readmission** shall mean a risk adjusted rate for each hospital that accounts for the severity of illness, APR-DRG, and age of patients at the time of discharge preceding the readmission. It shall equal the number of expected PPRs divided by the total number of at risk hospital admissions at that hospital.

6. **Excess Rate of Readmission** shall mean the difference between the observed rate of readmission and the expected rate of readmission for each hospital.

7. **Behavioral Health**, for the period July 1, 2010 through June 30, 2011, shall mean an admission that includes a primary or secondary diagnosis of a major mental health related condition. Effective for the period July 1, 2011 through March 31, 2012, and for periods April 1, 2013 through March 31, 2014, Behavioral Health shall mean an admission that is assigned to a Major Diagnostic Category of 19-Mental Diseases and Disorders or 20-Alcohol/Drug Use and Alcohol/Drug Induced Organic Mental Disorders.

8. **Average Hospital Specific Payment** shall equal the Medicaid operating payment, using the applicable Medicaid rates for such period, of the total number of PPRs identified for each hospital divided by the total number of PPRs identified for each hospital.

**Readmission Criteria.**

1. A readmission is a return hospitalization following a prior discharge that meets all of the following criteria:
   a. The readmission could reasonably have been prevented by the provision of appropriate care consistent with accepted standards in the prior discharge or during the post discharge follow-up period.
   b. The readmission is for a condition or procedure related to the care during the prior discharge or the care during the period immediately following the prior discharge and including, but not limited to:
      i. the same or closely related condition or procedure as the prior discharge;
      ii. an infection or other complication of care;
      iii. a condition or procedure indicative of a failed surgical intervention; or
      iv. an acute decompensation of a coexisting chronic disease.
   c. The readmission is back to the same or to any other hospital.

2. Readmissions, for the purposes of determining PPRs, excludes the following circumstances:
The original discharge was a patient initiated discharge and was Against Medical Advice (AMA) and the circumstances of such discharge and readmission are documented in the patient's medical record.

For the period July 1, 2010 through June 30, 2011, the original discharge was for the purpose of securing treatment of a major or metastatic malignancy, multiple trauma, burns, neonatal and obstetrical admissions. Effective for the period July 1, 2011 through March 31, 2012, and for periods April 1, 2013 through March 31, [2014] 2015, the original discharge was for the purpose of securing treatments of the admissions listed on the following Department of Health website link:

www.health.ny.gov/health_care/medicaid/quality/ppo/outcomes

c. The readmission was a planned readmission that occurred on or after 15 days following an initial admission.

d. For readmissions occurring during the period up through March 31, 2012, and for periods April 1, 2013 through March 31, [2014] 2015, the readmissions involve a discharge determined to be behavioral health related.

Methodology.

2. The expected rate of readmission shall be reduced by:

   (a) 24% for periods prior to September 30, 2010;
   (b) 38.5% for the period October 1, 2010 through December 31, 2010;
   (c) 33.3% for the period January 1, 2011 through June 30, 2011.
   (d) 11.4% for periods on and after July 1, 2011.

3. The excess rate of readmission is multiplied by the total number of at risk hospital admissions at each hospital to determine the total number of risk adjusted excess readmissions.

4. In the event the observed rate of readmission for a hospital is lower than the expected rate of readmission, after the expected rate of readmission has been reduced by the applicable percentage in accordance with this section, the risk adjusted excess readmissions shall be set at zero.
Payment Calculation.

1. An average hospital specific payment will be used to compute the total Medicaid operating payments, excluding behavioral health, associated with the risk adjusted excess readmissions in each hospital.

2. The Medicaid case payment rate for the applicable rate period shall be used to compute the total Medicaid operating payments for all non-behavioral health Medicaid discharges in each hospital.

3. For each hospital, a hospital specific readmission adjustment factor shall be computed as the ratio of the hospital’s total Medicaid operating payments for the applicable rate period associated with the risk adjusted excess readmissions identified in the Methodology Section and the hospital’s total Medicaid operating payments for the same rate period for all non-behavioral health Medicaid discharges in each hospital as determined pursuant to this Section.
4. **Non-behavioral health related Medicaid operating payments to hospitals shall be reduced by applying the hospital specific readmission adjustment factor from this Section to the applicable case payment or per-diem payment amount for all non-behavioral health related Medicaid discharges for each hospital.**
Capital Expense Reimbursement.

1. The allowable costs of fixed capital including but not limited to depreciation, rentals, interest on capital debt, and major movable equipment shall be reimbursed based on budgeted data and shall be reconciled to total actual expense for the rate year and shall be determined and computed in accordance with the provisions of this section.

2. General hospitals shall submit a budgeted schedule of anticipated inpatient capital-related expenses for the forthcoming year to the Commissioner at least 120 days prior to the beginning of the rate year.

3. The following principles shall apply to budgets for inpatient capital-related expenses:
   a. The basis for determining capital-related inpatient expenses shall be the lesser of actual cost or the final amount specifically approved for construction of the capital asset.
   b. Any capital-related inpatient expense generated by a capital expenditure which requires or required approval pursuant to the Hospitals section of the Public Health Law, must have received such approval for the capital-related expense to be included in the rate calculation.
c. The submitted budget may include the capital-related inpatient expense of all existing capital assets, as well as estimates of capital-related inpatient expenses for capital assets to be acquired or placed in use prior to the commencement of the rate year.

d. Any capital-related expense generated by a capital expenditure acquired or placed in use during a rate year shall be carried forward to the subsequent rate year, provided all required approvals have been obtained. In instances where such approvals have been obtained or where approval is not required and such assets are acquired or placed in use during a rate year, the budget may include estimates for capital-related expenses relating to these assets.

4. Allocation of budgeted capital costs. In each rate year budgeted capital costs shall be allocated to exempt units and hospitals (including certified substance abuse detoxification services) and DRG case payment rates based on reported capital statistics for the year two years prior to the rate year.
5. **Payment for budgeted allocated capital costs.**

   a. Capital per diems for exempt units and hospitals shall be calculated by dividing the budgeted capital costs allocated to such rates pursuant to paragraph (4) above by budgeted exempt unit days, reconciled to rate year days and actual rate year exempt unit or hospital-approved capital expense.

   b. Capital payments for APR-DRG case rates shall be determined by dividing the budgeted capital allocated to such rates pursuant to paragraph (4) above by the hospital's budgeted, nonexempt unit discharges, reconciled to rate year discharges and actual rate year nonexempt unit or hospital-approved capital expense.

   c. Capital payments for transferred patients shall be determined by dividing the budgeted capital allocated to the APR-DRG case rate by the hospital's budgeted non-exempt unit days, reconciled to rate year days and actual rate year non-exempt unit or hospital approved capital expense.

6. **Depreciation.**

   a. Reported depreciation based on historical cost is recognized as a proper element of cost. Useful lives shall be the higher of the reported useful life or those useful lives from the Estimated Useful Lives of Depreciable Hospital Assets, American Hospital Association, consistent with title XVIII provisions. Copies of this publication are available from the American Hospital Association, 840 North Lake Shore Drive, Chicago, IL 60611, and a copy is available for inspection and copying at the offices of the Records Access Officer of the Department of Health, Corning Tower, Empire State Plaza, Albany, NY 12237.

   b. In the computation of rates for voluntary facilities, depreciation shall be included on a straight line method on plant and non-movable equipment. Depreciation on movable equipment may be computed on a straight line method, or accelerated under a double declining balance, or sum-of-the-years’ digit method. Depreciation shall be funded unless the Commissioner determines, upon application by the facility, and after inviting written comments from interested parties, that the requested waiver of the requirements for funding is a matter of public interest and necessity. In instances where funding is required, such fund may be used only for capital expenditures with approval as required for the amortization of capital indebtedness. Funding for plant and fixed equipment shall mean that the transfer of monies to the funded accounts shall
occur by the end of the fiscal period in which the depreciation is recorded. Board-designated funds and the accrual of liabilities to the funded depreciation accounts (due to/from accounts) shall not be recognized as funding of depreciation. Deposits to the funded depreciation accounts must remain in such accounts to be considered as valid funding transactions unless expended for the purpose for which it was funded. Failure to meet the funding requirements will result in a reduction amount reimbursed for depreciation equal to the unfunded amount.

c. In the computation of rates for public facilities, depreciation is to be included on a straight-line method on plant and non-movable equipment. Depreciation on movable equipment may be computed on a straight-line method, or accelerated under a double declining balance or sum-of-the-years’ digits method.

d. Medical facilities financed by mortgage loans pursuant to the Nursing Home Companies Law or the Hospital Mortgage Loan Construction Law shall conform to the requirements of this Subpart. In lieu of depreciation and interest, on the loan-financed portion of the facilities, the Commissioner shall allow level debt service on the mortgage loan, for all loans approved for financing prior to January 1, 1990, together with such required fixed charges, sinking funds and reserves as may be determined by the Commissioner as necessary to assure repayment of the mortgage indebtedness. For loans approved for financing on or after January 1, 1990, medical facilities shall receive reimbursement in the form of interest and depreciation in accordance with the remainder of this Attachment.
7. Interest

a. Necessary interest on both current and capital indebtedness is an allowable cost for all medical facilities.

b. To be considered as an allowable cost, interest shall be incurred to satisfy a financial need, be at a rate not in excess of what a prudent borrower would have had to pay in the money market at the time the loan was made, and exclude costs and fees incurred as a result of an interest rate swap agreement. Also, the interest shall be paid to a lender not related through control, ownership, affiliation or personal relationship to the borrower, except in instances where the prior approval of the Commissioner has been obtained. Financial need for capital indebtedness relating to a special project shall exist when all available restricted funds designated for capital acquisitions of that type have been considered for equity purposes.

c. Interest expense shall be reduced by investment income with the exception of income from funded depreciation, qualified pension funds, trustee malpractice insurance funds, or in instances where income from gifts or grants is restricted by donors. Interest on funds borrowed from a donor restricted fund or funded depreciation is an allowable expense. Investment income shall be defined as the aggregate net amount realized from dividends, interest, rental income, interest earned on temporary investment of withholding taxes, as well as all gains and losses. If the aggregate net amount realized is a loss, the loss shall not be allowable. Rate year investment income shall reduce rate year interest expense allowed for reimbursement as follows:

i. for all medical facilities, investment income shall first be used to reduce operating interest expense for that year;

ii. any remaining amount of investment income, after application of paragraph (i), shall be used to reduce capital interest expense reimbursed that year for medical facilities; and
iii. any remaining amount of investment income after application of paragraph (ii) shall not be considered in the determination of allowable costs.

d. Interest on current indebtedness shall be treated and reported as an operating, administrative expense.

e. Interest on capital indebtedness is an allowable cost if the debt generating the interest is approved by the Commissioner, incurred for authorized purposes, and the principal of the debt is the lesser of the approval of the Commissioner or the cost of the authorized purposes. Capital indebtedness shall mean all debt obligations of a facility that are:

i. evidenced by a mortgage note or bond and secured by a mortgage on the land, building or non-movable equipment; a note payable secured by the non-movable equipment of a facility; a capital lease;

ii. incurred for the purpose of financing the acquisition, construction or renovation of land, building or non-movable equipment;

iii. found by the Commissioner to be reasonable, necessary and in the public interest with respect to the facility. Interest related to refinancing indebtedness shall be considered an allowable cost only to the extent that it is payable with respect to an amount equal to the unpaid principal of the indebtedness then being refinanced. However, interest incurred on refinanced debt in excess of the previously unpaid balance of the refinanced indebtedness will be allowable on acceptable demonstration to the Commissioner that such refinancing will result in a debt service savings over the life of the indebtedness; or

iv. incurred for the purpose of advance refunding of debt. Gains and losses resulting from the advanced refunding of debt shall be treated and reported as a deferred charge or asset. This deferred charge or asset is to be amortized on a straight-line basis over the period to the scheduled maturity date of the refunding debt.

f. Where a public finance authority has established a mortgage rate of interest such that sufficient cash flows exist to retire the mortgage prior to the stated maturity, the amount of the mortgage to be forgiven, at the time of such forgiveness, shall be capitalized as a deferred asset and amortized over the remaining mortgage life, as a reduction to the facility's capital expense.
g. Voluntary facilities shall report mortgage obligations financed by public finance authorities for their benefit and which they are responsible to repay, as liabilities in the general fund, when such mortgage obligations are incurred.

8. Sales, leases and realty transactions.
   a. If a medical facility is sold, leased, or is the subject of any other realty transaction before a rate for the facility has been determined and certified by the Commissioner, the capital cost component for such rate shall be determined in accordance with the provisions of this Section.
   b. If a medical facility is sold, leased, or is the subject of any other realty transaction after a rate for the facility has been determined and certified by the Commissioner, the capital cost component of such rate shall be considered to be continuing with the same force and effect as though such sale, lease or other realty transaction had not occurred. This paragraph shall not be construed as limiting the powers and rights of the Commissioner to change rate computations generally or specifically when based upon previous error, deceit or any other misrepresentation or misstatement that has led the commissioner to determine and certify a rate which he would otherwise not have determined or certified. Further, this paragraph shall not be construed as limiting the powers and rights of the commissioner to reduce rates when one or more of the original property right aspects related to such a facility is terminated.
   c. An arms length lease purchase agreement with a non-related lessor involving plant facilities or equipment which meets any one of the four following conditions, establishes the lease is a virtual purchase.
      i. The lease transfers a title of the facilities or equipment to the lessee during the lease term.
      ii. The lease contains a bargain purchase option.
      iii. The lease term is at least 75 percent of the useful life of the facilities or equipment. This provision is not applicable if the lease begins in the last 25 percent of the useful life of the facilities or equipment.
      iv. The present value of the minimum lease payments (payments to be made during the lease term including bargain purchase option, guaranteed residual value and penalties for failure to renew) equals at least 90 percent of the fair market value of the leased property. This provision is not applicable if the lease begins in the last 25 percent of the useful life of the facilities or equipment. Present value is computed using the lessee’s incremental borrowing rate, unless the interest rate implicit in the lease is known and is
less than the lessee’s incremental borrowing rate, in which case the interest rate implicit in the lease is used.

d. If a lease is established as a virtual purchase under paragraph (c), the rental charge may be included in capital-related costs to the extent that it does not exceed the amount that the provider would have included in capital-related costs if it had legal title to the asset (the cost of ownership). The cost of ownership shall be limited to depreciation and interest. Further, the amounts to be included in capital-related costs are determined as follows:

i. The difference between the amount of rent paid and the amount of rent allowed as capital-related costs is considered a deferred charge and is capitalized as part of the historical cost of the asset when the asset is purchased.

ii. If an asset is returned to the owner instead of being purchased, the deferred charge may be included in capital-related costs in the year the asset is returned.

iii. If the term of the lease is extended for an additional period of time at a reduced lease cost and the option to purchase still exists, the deferred charge may be included in capital-related costs to the extent of increasing the reduced rental to an amount not in excess of the cost of ownership.

iv. If the term of the lease is extended for an additional period of time at a reduced lease cost and the option to purchase no longer exists, the deferred charge may be included in capital-related costs to the extent of increasing the reduced rental to a fair rental value.

v. If the lessee becomes the owner of the leased asset (either by operation of the lease or by other means), the amount considered as depreciation for the purpose of having computed the limitation on rental charges under this paragraph, must be used in calculating the limitation on adjustments for the purpose of determining any gain or less upon disposal of an asset.

vi. In the aggregate, the amount of rental or lease costs included in capital-related costs may not exceed the amount of the costs of ownership that the provider could have included in capital-related costs had the provider legal title to the asset.
e. If a facility enters into a sale and leaseback agreement involving plant facilities or equipment, the amounts to be included in capital-related costs both on an annual basis and over the useful life of the asset shall not exceed the costs of ownership which shall be limited to depreciation and interest, and shall be determined as follows:

i. If the annual rental or lease costs in the early years of the lease are less than the annual costs of ownership, but in the later years of the lease the annual rental or lease costs are more than the annual costs of ownership, in the years that the annual rental or lease costs are more than the annual costs of ownership, the facility may include in capital-related costs annually the actual amount of rental or lease costs, except that in any given year, the amount included in capital related costs is limited to an amount which would not cause the aggregate rental or lease costs included up to that year in capital-related costs to exceed the costs of ownership that would have been included in capital-related costs up to that year if the provider had retained legal title to the asset.

ii. If the annual rental or lease costs in the early years of the lease exceed the annual costs of ownership, but in the later years of the lease the annual rental or lease costs are less than the annual costs of ownership, the facility may carry forward amounts of rental or lease costs that were not included in capital-related costs in the early years of the lease due to the costs of ownership limitation, and include these amounts in capital-related costs in the years of the lease when the annual rental or lease costs are less than the annual costs of ownership, provided, however, in any given year the amount of actual annual rental or lease costs plus the amount carried forward to that year may not exceed the amount of the costs of ownership for that year.

iii. In the aggregate, the amount of rental or lease costs included in capital-related costs may not exceed the amount of the costs of ownership that the provider could have included in capital-related costs if the provider had retained legal title to the asset.

iv. If a facility enters into a sale and leaseback agreement involving land, the incurred rental for the cost of land may not be included in allowable costs.
New York
130

Reimbursable Assessment for Statewide Planning and Research Cooperative System (SPARCS).

The Commissioner will inform each such hospital of its actual fee to support the statewide planning and research cooperative system and each hospital will submit such fee on a quarterly basis to be received by the Commissioner no later than the 15th of February, May, August and November of each year. Failure to submit such fees in accordance with this schedule will result in a [one]two-percent reduction in the affected hospital's rate beginning on the first day following the due date and continuing until the last day of the calendar month in which said fees are submitted.
Federal upper limit compliance.

1. In the event the State cannot provide assurances satisfactory to the Secretary of the Department of Health and Human Services related to a comparison of rates of payment for general hospital inpatient services to beneficiaries of the Title XIX program in the aggregate to maximum reimbursement payments provided in Federal law and regulation for purposes of securing Federal financial participation in such payments, such rates of payments shall be adjusted proportionally as necessary to meet Federal requirements for securing Federal financial participation.
Adding or deleting hospital services or units.

1. Notification of the elimination of a general hospital inpatient service or identifiable unit of such a service in instances in which the costs of such service are reflected in the rate calculated pursuant to this Section shall be submitted in writing by the facility to the Department within 60 days of the elimination of such service or unit. If a rate is modified by the Department as a result of such service or unit elimination, such rate shall be effective as of the date of the elimination of the service or unit.

2. Notification of the establishment of a new hospital or of a new exempt unit of an existing hospital shall be submitted in writing by the facility to the Department within 60 days of the establishment of such new hospital or such new unit. Thereafter the Department shall establish inpatient rates for such new hospital or such new exempt unit in accordance with the provisions of this Attachment. Such rates shall be effective the first day of the month following 30 days after such a notification or the date of the approved certificate of need (CON) certification, whichever is later.
New hospitals and hospitals on budgeted rates.

1. New hospitals. Payments to new hospitals without adequate cost experience for inpatient acute care services that are not exempt from DRG case-based rates of payment shall be computed in accordance with this Attachment except as follows:
   a. Rates of payment shall be computed on the basis of 100 percent of the statewide base price multiplied by the service intensity weight for each DRG as determined and set forth with the provisions of this Attachment.
   b. The WEF used to adjust the statewide base price shall be equal to 1.0 until adequate data becomes available.
   c. The non-comparable operating costs of new facilities as defined by the Definitions Section and direct graduate medical education costs shall consist of the hospital's budgeted operating costs for these services.

2. Hospitals on Budgeted Rates. Payments to hospitals without adequate cost experience whose rates are based on budgeted cost projections for inpatient acute care services that are not exempt from DRG case-based rates of payment shall be computed in accordance with this Subpart except as follows:
   a. Reimbursement for the costs of graduate medical education and non-comparable services shall be calculated pursuant to the provisions of paragraph(1)(c) above.
   b. The WEF used shall be calculated for the facility based on available historical data.
Swing bed reimbursement.

1. Definitions.
   a. For purposes of this Section, a swing bed program operated by a rural hospital that has an approval from the Centers for Medicare and Medicaid Services (CMS) to provide post-hospital skilled nursing facility (SNF) care, shall mean beds used interchangeably as either general hospital or nursing home beds with reimbursement based on the specific type of care provided so that use of beds in this manner provides small hospitals with greater flexibility in meeting fluctuating demands for inpatient general hospital and nursing home care.
   b. Rate shall mean the aggregate governmental payment made to eligible facilities per patient day as defined in Attachment 4.19-D for the care of patients receiving care pursuant to Title XIX of the federal Social Security Act (Medicaid).

2. Rates of payment.
   Payments to eligible hospitals for patient days resulting from usage of swing beds in caring for patients for whom it has been determined that inpatient hospital care is not medically necessary, but that skilled nursing or health related care is required, shall be determined as follows:
   a. The operating component of the rate shall consist of the following:
      i. a direct component which shall be equivalent to the 1988 statewide average direct case mix neutral cost per day for hospital-based residential health care facilities, after application of the Regional Direct Input Price Adjustment Factor (RDIPAF) as determined pursuant to Attachment 4.19-D, adjusted for inflation with trend factors determined pursuant to the applicable provisions of Attachment 4.19-A;
      ii. an indirect component which shall be equivalent to the 1988 statewide average indirect cost per day for hospital-based residential health care facilities, after application of the RDIPAF pursuant to Attachment 4.19-D, adjusted for inflation with trend factors determined pursuant to the applicable provisions of Attachment 4.19-A; and
      iii. a non-comparable component which shall be equivalent to the 1988 statewide average non-comparable cost per day for hospital-based residential health care facilities, adjusted for inflation with trend factors determined pursuant to the applicable provisions of Attachment 4.19-A.
b. For general hospitals with more than 49 beds, the maximum number of days for which the operating component of the rate as defined in this Attachment shall be paid shall be equivalent to fifteen (15) percent of a hospital’s total annual patient days for acute, exempt unit, and alternate level of care services, excluding swing bed days.

c. The operating component of the rate as defined in this Attachment shall be paid for the first sixty (60) days per year during which a patient is receiving care as a participant in the swing bed program. Any patient stay in excess of sixty (60) days per year shall be reimbursed at the prevailing average rate paid for the care of Alternate Level of Care (ALC) patients pursuant to the Alternate Level of Care Payments provisions of this Attachment. The sixty-day period shall begin the first day on which the patient receives care as a participant in the swing bed program.  

d. A capital cost per diem shall be paid on the basis of budgeted capital costs allocated to the swing bed program, pursuant to the capital cost provisions of this Attachment, divided by patient days associated with the swing bed program, reconciled to actual total capital expense.
Mergers, acquisitions, consolidations, restructurings and closures.

1. Rates of Payment. [As used in this Section, the terms merger, acquisition, and consolidation, and restructuring, for the purpose of calculating a combined reimbursement rate, shall mean the combining of two or more general hospitals where such combination is a full asset merger or a full asset acquisition (hereinafter referred to as full asset merger) and is consistent with the public need, would create a new, more economical entity, reduce the costs of operation, result in the reduction of beds and/or improve service delivery and approved through the Department's Certificate of Need process. Payments for hospitals subject to a full asset merger, acquisition or consolidation for inpatient acute care services that are not otherwise exempt from DRG case-based rates of payment will be effective on the date the full asset merger transaction is effected and shall be computed in accordance with this Section except as follows:

a. The WEF used to adjust the statewide base price shall be calculated by combining all components used in the calculation pursuant to the WEF Section for all hospitals subject to the full asset merger, acquisition or consolidation.

b. The direct GME payment per discharge added to the case payment rates of teaching hospitals shall be calculated by dividing the total reported Medicaid direct GME costs for all teaching hospitals subject to the full asset merger, acquisition, or consolidation by the total reported Medicaid discharges reported by such hospitals in the applicable base period.

c. The indirect GME payment per discharge added to the case payment rates of teaching hospitals shall be calculated in accordance with the Add-ons to the Case Payment Rate Per Discharge Section, except the ratio of residents to beds used in the calculation shall be based on the total residents and beds of all such hospitals subject to the full asset merger, acquisition, or consolidation.

d. The non-comparable payment per discharge added to the case payment rates shall be calculated by dividing the total reported Medicaid costs for qualifying non-comparable cost categories for all hospitals subject to the full asset merger, acquisition, or consolidation by the total reported Medicaid discharges reported by such hospitals in the applicable base period.

e. Rates calculated for exempt units where the hospitals merging provide the same exempt service will not be merged until such time that the base used for the exempt service is updated. At the time of the base rate update, combined costs and utilization will be used to develop the exempt service rate. Until that time, each hospital will continue to be reimbursed their facility specific exempt unit rate based on the method approved for the exempt service.
1. A. Temporary rate change for full asset mergers and acquisitions.

a. For the period April 1, 2012 through August 31, 2016, the Commissioner may grant approval of a temporary change to rates calculated pursuant to this Section for hospitals that complete a merger, acquisition or consolidation provided such hospitals demonstrate through submission of a written proposal that the merger, acquisition or consolidation will result in an improvement to (i) cost effectiveness of service delivery, (ii) quality of care, and (iii) factors deemed appropriate by the Commissioner. Such written proposal shall be submitted to the Department sixty days prior to the requested effective date of the temporary rate change. The temporary rate change shall be in effect for no longer than such time as base year costs are updated for the development of these temporary rates or such time as statewide base year costs are updated for the development of rates, whichever is earlier, and shall consist of the various operating rate components of the surviving entity. At the end of the specified timeframe, the hospital will be reimbursed in accordance with the statewide methodology set forth in this Attachment. The Commissioner may establish, as a condition of receiving such a temporary rate change, benchmarks and goals to be achieved as a result of the ongoing consolidation efforts and may also require that the hospital submit such periodic reports concerning the achievement of such benchmarks and goals as the Commissioner deems necessary. Failure to achieve satisfactory progress, as determined by the Commissioner, in accomplishing such benchmarks and goals shall be a basis for ending the hospital’s temporary rate change prior to the end of the specified timeframe.

b. The Commissioner shall withdraw approval of a temporary rate change for hospitals which (i) fail to demonstrate compliance with and continual improvement on the approved proposal or (ii) an update to the base year is made by the Department.

c. For the period beginning September 1, 2016 and thereafter, the Commissioner may grant approval of a temporary change to the non-capital components of acute rates calculated pursuant to this Section for hospitals that have undergone a full asset merger:

i. The acute operating rate of all hospitals merged which represents the highest payment will be paid to all hospitals in the merged entity. The acute rates used in the development of the payment calculation to determine the highest payment will be based on all operating components of a hospital’s acute rate and not determined on an individual operating acute rate component basis.

TN #16-0044 Approval Date November 30, 2016
Supersedes TN #11-0024-D Effective Date September 01, 2016
Facilities seeking a rate change under this section will submit an appeal and demonstrate that the additional resources provided by a temporary rate change will achieve one or more of the following:

1. protect or enhance access to care;

2. protect or enhance quality of care; or

3. improve the cost effectiveness of the delivery of health care services.

The temporary rate change issued pursuant to this section will be effective as of the date the full asset merger transaction is effected and will be in effect for three years. At the expiration of the temporary rate change period, the facility will be reimbursed in accordance with the otherwise applicable rate-setting methodology as stated in this section and will be effective the first day of the month following the expiration of the three year period.

During the temporary rate change period each provider will continue to be reimbursed their facility specific acute capital rate payment.
New York
136(a)

2. Temporary rate adjustment for Vital Access Provider (VAP) Programs

a. A temporary rate adjustment will be provided to eligible hospital providers that are subject to or impacted by the closure, merger, and acquisition, consolidation or restructuring of a health care provider. The rate adjustment is intended to:

- Protect or enhance access to care;
- Protect or enhance quality of care; or
- Improve the cost effectiveness.

Eligible hospital providers, the [annual] amount of the temporary rate adjustment, and the duration of [the] each rate adjustment period [shall] will be listed in the table which follows. The total [annual] adjustment amount for each period shown will be paid quarterly during each period in equal installments [with the amount of each quarterly payment being equal to one fourth of the total annual amount established for each provider.] The [quarterly] temporary payment made under this section will be an add-on to services payments made under this Attachment to such facilities during the quarter.

To remain eligible, providers must submit benchmarks and goals acceptable to the Commissioner and must submit periodic reports, as requested by the Commissioner, concerning the achievement of such benchmarks and goals. Failure to achieve satisfactory progress in accomplishing such benchmarks and goals will result in termination of the provider’s temporary rate adjustment prior to the end of the specified timeframe. Once a provider’s temporary rate adjustment ends, the provider will be reimbursed in accordance with the otherwise applicable rate-setting methodology as set forth in this Attachment.
b. Temporary rate adjustments have been approved for the following hospital providers in the amounts and for the effective periods listed:

**Administrative rate appeals**

1. Administrative rate appeals of rates of payment issued pursuant to this Attachment must be submitted to the Department in writing within 120 days of the date such rates are issued by the Department to the facility. Such rate appeals must set forth in detail the basis for such appeal and be accompanied by any relevant documentation. Thereafter the Department shall respond to such rate appeals in writing and shall either affirm the original rates, revise such rates or request additional information. A failure to respond to the Department’s request for additional information within 30 days shall be deemed to constitute the withdrawal, with prejudice, of the facility’s rate appeal, provided, however, that the Department may extend that time period upon a request by the facility and for good cause shown. Upon its receipt of the requested additional information the Department shall issue a written determination of such rate appeal.

2. The Department’s written determination of a facility’s rate appeal shall be deemed final unless the facility submits a written request for further consideration of the rate appeal within 30 days of the date the Department issued such written determination, provided, however, that if such written determination advises the facility that its rate appeal is being denied on the ground that the appeal constitutes a challenge to the rate-setting methodology set forth in this Attachment, such denial shall be deemed to be the Department's final administrative determination with regard to such appeal and there shall be no further administrative review available. The Department shall otherwise respond in writing to such further appeal and either affirm or revise its original rate appeal determination and this response by the Department shall be deemed its final administrative determination with regard to such rate appeal.

3. Rate appeals which are rejected or precluded on the grounds of being untimely may be considered in connection with subsequent audits conducted pursuant to the audit provisions of this Attachment.

4. The Department shall consider only those rate appeals that reflect one or more of the following bases.

   a. Mathematical or clerical errors in the financial and/or statistical data originally submitted by the medical facility, including information reported to the New York State Statewide Planning and Research Cooperate System (SPARCS), or mathematical or clerical errors made by the Department. Revised data submitted by a facility must meet the same certification requirements as the original data and the Department may require verification of revised SPARCS data by an independent review agent at the cost of the facility; and
b. Any errors regarding a medical facility's capital cost reimbursement.

[5. The Department may refuse to accept or consider a rate appeal from a facility that:

a. is providing an unacceptable level of care as determined after review by the State Hospital review and Planning Council; or

b. is operated by the same management that operates a facility with regard to which a determination of an unacceptable level of care has been made in accordance with paragraph (a) of this subdivision; or

c. has been determined by the Department as being operated by a person or persons not properly established or licensed pursuant to the Public Health Law; or

d. is delinquent in the payment of a fine or penalty imposed on the facility pursuant to the Public Health Law.

6. Any hospital whose Medicaid inpatient rates are subject to this Subpart and which is determined by the federal Department of Health and Human Services to be no longer eligible for reimbursement pursuant to Title XVIII (Medicare) of the federal social security act shall not be eligible for reimbursement by Medicaid until re-certification of the facility by the federal Department of Health and Human Services as eligible for reimbursement pursuant to Title XVIII of the federal Social Security Act.]

c. i. Beginning on and after January 1, 2014, direct graduate medical education (DGME) and indirect graduate medical education (IME) costs, as defined under the Definitions Section of this Attachment for Graduate Medical Education, for hospitals where the teaching status has changed from non-teaching to teaching.

ii. Rate appeals and rate adjustments for new teaching hospitals.

1. Eligible for reimbursement.

   a. New teaching hospital (from non-teaching to teaching status)

   b. New residency programs which are started by the new teaching hospital during the 5-year ramp-up period as defined in subparagraph 4(c)(ii)(3)(d).

2. Not Eligible for reimbursement.
New York
138.1

a. New teaching program in an already existing teaching hospital.

b. Residency programs transferred to the new teaching hospital from an existing teaching hospital.

c. Affiliated existing teaching hospital training additional residents ‘based at’ the new teaching hospital. Affiliated hospital will not receive a rate adjustment.

3. Appeal requirements.

a. A hospital is required to submit a written request to the Department of Health (Department) for additional reimbursement due to the new teaching status.

b. An initial rate adjustment will be calculated for Program Year 1 (PGY 1) provided the Department has received the appeal request and all supporting documentation required 30 days prior to the start of the first teaching program. If an appeal is received subsequent to the start of PGY 1, the rate adjustment will be calculated based on the ramp-up period that the provider is in at the time of the appeal request.

c. Ramp-up schedules 1 and 2 are determined based on the Department’s receipt of the appeal request pursuant to subparagraph 4(c)(ii)(3)(b). Ramp-up appeal requests will only be accepted during the hospital’s determined schedule. The appropriate schedule will be noted in the Department’s response to the appeal request. A chart of the potential appeal schedules has been provided below:

</table>
d. Hospitals have 5 years to establish new programs. This time period is viewed as a 'ramp-up' period and year 1 of the program is defined as the first approved program year that the hospital received teaching status. Appeals for new teaching costs will only be accepted during this ramp-up period.

e. The hospital will provide the following data:

i. Documentation from the accrediting organization demonstrating the maximum number of approved positions eligible for the associated programs.

ii. Documentation from the new teaching hospital demonstrating the projected filled slots for the associated programs for the upcoming PGY. Documentation must include the resident name, residency program, program year, start date, and expected graduation date.

iii. Documentation from the new teaching hospital demonstrating the actual filled slots for the associated programs from the prior PGY if applicable. This includes resident name, residency program, program year, start date, and expected graduation date.

iv. Completion of the Department's New Teaching Hospital - Form (A) found on the APR-DRG website below:

   https://www.health.ny.gov/facilities/hospital/reimbursement/apr-drg/rates/

v. Budgeted DGME costs must be included in the New Teaching Hospital Form (A) and must reflect calendar year based on the effective date of the rate adjustment. Budgeted DGME Costs must be discretely reported consistent with the standard cost centers provided for interns and residents, and supervising physicians within the annual institutional cost report.

4. Additional reimbursement will be received based on:

a. The initial effective date for a rate increase due to an appeal will be in accordance with subparagraph 4 (c)(ii)(3)(b). This provides for reimbursement effective July 1st.

b. Subsequent appeals after the initial effective date will be accepted during the ramp-up period and in accordance with subparagraph 4(c)(ii)(3)(c).

c. A Direct Graduate Medical Education (DGME) payment per discharge will be added to the acute per discharge rate as stated in the Add-ons to the case payment rate per discharge section of this attachment.

TN #14-0009          Approval Date October 5, 2017
Supersedes TN NEW    Effective Date January 1, 2014
New York
138.3

i. For new teaching hospitals budgeted DGME costs will be submitted by the hospital and used until the first full year of actual DGME costs are available in a provider's Institutional Cost Report (ICR). The first full year of actual DGME costs for this purpose will be the first full year after the last ramp-up year. DGME budgeted costs can be submitted by a hospital for a rate revision each year during the ramp-up period.

1. If an appeal is not submitted with updated budgeted DGME costs, the budgeted DGME costs currently in the rate will continue.

ii. The DGME budgeted costs will be allocated between inpatient and outpatient services, however, there is no rate increase in the outpatient services for new teaching hospitals. Appeals for an initial rate adjustment are required to report the percentage of costs allocated to Inpatient and Outpatient services in section 6 of the New Teaching Hospital - (Form A). Once a full year of program costs have been included in an ICR submitted to the Department during the ramp up period, the total inpatient DGME traceback percentages for that year will be utilized for the remainder of the ramp-up period.

iii. At the time the Department updates the base year utilized for the DGME add-ons to the rate, if the provider is still in their ramp-up period, the new teaching costs will remain on budgeted costs.

iv. The DGME add-on to the rate will be calculated by dividing the total inpatient DGME budgeted costs by the total reported Medicaid discharges as defined in paragraph 3 (b of the Statewide base price section.

d. An Indirect Medical Education (IME) payment will be added to the acute per discharge rate as stated in the Add-ons to the case payment rate per discharge section of this attachment.

i. An IME percentage will be calculated for new teaching hospitals as follows and applied to the adjusted statewide base price to determine the per case add-on payment.

1. For IME rate adjustments, effective July 1st for program year, the IME Payment percentage will be calculated based on the formula \[1.03^*(((1+(r)) ^0.405)-1)\] where “r” equals the ratio of residents for the upcoming PGY, as provided with the appeal, to inpatient acute staff beds as reported in the base period defined in paragraph 3 of the statewide base price section.

2. For IME rate adjustments, effective January 1st for calendar year, the IME Payment percentage will be calculated based on the formula \[1.03^*(((1+(r)) ^0.405)-1)\] where “r” equals the ratio of calendar year residents as defined in paragraph 3 of this section to...
inpatient acute staff beds as reported in the base period defined in paragraph 3 of the Statewide base price section.

3. Calendar year residents are calculated as follows:
   i. Upcoming PGY Resident counts as provided in paragraph 4(c)(ii)(3)(e)(ii) are multiplied by six months
   ii. Prior PGY Resident counts as provided in 4(c)(ii)(3)(e)(iii) are multiplied by six months
   iii. The calendar year residents equal the sum of i and ii divided by twelve months.

   ii.IME residents will be calculated each ramp-up year until the final year ramp-up.

5. The Department may refuse to accept or consider a rate appeal from a facility that:
   a. is providing an unacceptable level of care as determined after review by the State Hospital review and Planning Council; or
   b. is operated by the same management that operates a facility with regard to which a determination of an unacceptable level of care has been made in accordance with paragraph (a) of this subdivision; or
   c. has been determined by the Department as being operated by a person or persons not properly established or licensed pursuant to the Public Health Law; or
   d. is delinquent in the payment of a fine or penalty imposed on the facility pursuant to the Public Health Law.

6. Any hospital whose Medicaid inpatient rates are subject to this Subpart and which is determined by the federal Department of Health and Human Services to be no longer eligible for reimbursement pursuant to Title XVIII (Medicare) of the federal social security act shall not be eligible for reimbursement by Medicaid until re-certification of the facility by the federal Department of Health and Human Services as eligible for reimbursement pursuant to Title XVIII of the federal Social Security Act.
New York

139

Out-of-state providers.

1. For discharges occurring on and after December 1, 2009, rates of payment for inpatient hospital services provided by out-of-state providers in accordance with the prior approval requirements shall be as follows:

   a. the weighted average of inpatient rates, including a teaching adjustment where applicable, in effect for similar services for hospitals located in the downstate region of New York State shall apply with regard to services provided by out-of-state providers located in the New Jersey counties of Sussex, Passaic, Bergen, Hudson, Essex, Union, Middlesex and Monmouth, in the Pennsylvania county of Pike, and in the Connecticut counties of Fairfield and Litchfield;

   b. For rates effective beginning March 5, 2014, the weighted average of inpatient rates, including a teaching adjustment where applicable, in effect for similar services for hospitals located in the downstate region of New York State shall also apply with regard to services provided by out-of-state providers located in cities where the city’s population census is 500,000 or greater based on the U.S. Department of Commerce, United States Census Bureau. This population test will be updated when the acute inpatient rates are updated to a new cost base and will remain constant while the cost base is in effect. For implementing the census population test, the latest census data that is available at that time will be used;

   c. the weighted average of inpatient rates, including a teaching adjustment where applicable, in effect for similar services for hospitals located in the upstate region of New York State shall apply with regard to all other out-of-state providers;

   d. high cost outlier rates of payment shall be calculated in accordance with the Outlier and Transfer Cases Rates of Payment section of this Attachment, with the exception of the wage equalization factor (WEF) being based upon the weighted average of the upstate or downstate region; and

   e. the weighted average of the capital component of the inpatient rates in effect for similar services for hospitals located in New York State shall apply with regard to services provided by out-of-state providers.

2. Notwithstanding any inconsistent provision of this Section, in the event the Department determines that an out-of-state provider is providing services that are not available within New York State, the Department may negotiate payment rates and conditions with such provider; provided however, such payments shall not exceed the provider’s usual and customary charges for such services.

3. For purposes of this Section, the downstate region of New York State shall consist of the New York counties of Bronx, New York, Kings, Queens, Richmond, Nassau, Suffolk, Westchester, Rockland, Orange, Putnam and Dutchess, and the upstate region of New York State shall consist of all other New York counties.
Supplemental indigent care distributions.

The methodology described in this section sunsets on December 31, 2012. The new methodology effective January 1, 2013 is described in the Indigent Care Pool Reform section of this Attachment.

1. From funds in the pool for each year, except as otherwise provided for in this section, $27 million shall be reserved on an annual basis for the periods January 1, 2000 through May 1, 2009, to be distributed to each hospital based on each hospital's proportional annual reduction to their projected distribution from the New York State Health Care Reform Act Profession Education Pool, relative to the statewide annual reduction to said pool, as authorized by State law, up to the hospital specific disproportionate share (DSH) payment limits.

2. Effective May 1, 2009 through December 31, 2009:

   a. Each hospital eligible for supplemental indigent care distributions in 2008 shall receive 90% of its 2008 annual award amount as Medicaid DSH payment.

   b. $307 million shall be distributed to facilities designated by the Department as teaching hospitals as of December 31, 2008, to compensate such facilities for Medicaid and self-pay losses. The payment amounts apply consistently to all teaching hospitals, and are reasonably related to costs, based on Medicare GME payments as a proxy, and are pursuant to the following schedule of payments:

c. Effective May 1, 2009 through December 31, 2009, $16 million shall be proportionally distributed to non-teaching hospitals based on their proportion of uninsured losses as determined according to the methodology contained in the High Need Indigent Care Adjustment Pool of this Attachment.

d. Effective December 1, 2009, $25 million shall be distributed to non-major public hospitals having Medicaid discharges of 40% or greater from data reported in each hospital’s 2007 annual cost report, based on each hospital’s decrease in Medicaid revenues resulting from the reductions in trend factors for 2008 and 2009 as contained in this Attachment and the inpatient and outpatient reimbursement methodology changes effective December 1, 2009.
3. For annual periods beginning on and after January 1, 2010 through December 31, 2012:
   a. From regional allotments specified below, $269.5 million shall be distributed to non-major public teaching hospitals on a regional basis to cover each eligible facility's proportional regional share of 2007 uncompensated care, as defined in the disproportionate share payment calculation provisions of this Attachment and offset by disproportionate share payments received by each facility during calendar year 2010 in accordance with the disproportionate share payment calculations provisions of this Attachment.

   b. $25 million shall be distributed to non-major public hospitals having eligible for payments based upon each facility's proportion of uninsured losses as determined according to the methodology in the High Need Indigent Care Adjustment Pool of this Attachment.

   c. $16 million shall continue to be proportionally distributed to non-teaching hospitals based on their proportion of uninsured losses as determined according to the methodology contained in the High Need Indigent Care Adjustment Pool of this Attachment.

   d. $25 million shall be distributed to non-major public hospitals having Medicaid discharges of 40% or greater from data reported in each hospital's 2007 annual cost report, based on each hospital's decrease in Medicaid revenues resulting from the reductions in trend factors for 2008 and 2009 as contained in this Attachment and the inpatient and outpatient reimbursement methodology changes effective December 1, 2009.
(l) High Need Indigent Care Adjustment Pool. Funds will be deposited as authorized and used for the purpose of making Medicaid disproportionate share payments within the limits established on an annualized basis pursuant to disproportionate share limitations, except as otherwise provided for in this section, for the period January 1, 2000 through December 31, [2014] 2012, in accordance with the following:

(1) From the funds in the pool each year:

(i) Each eligible rural hospital will receive a payment of $140,000 on an annualized basis for the period January 1, 2000 through September 30, 2009. Effective on and after October 1, 2009 through December 31, 2012, each eligible rural hospital will receive a payment of $126,000 on an annualized basis, provided as a disproportionate share payment; provided, however, that if such payment pursuant to this clause exceeds a hospital’s applicable disproportionate share limit, then the total amount in excess of such limit will be provided as a nondisproportionate share payment in the form of a grant directly from this pool without federal financial participation;

(ii) Each such hospital will also receive an amount calculated by multiplying the facility’s uncompensated care need by the appropriate percentage from the following scale based on hospital rankings developed in accordance with each eligible rural hospital’s weight as defined by this section:

<table>

(iii) “Eligible rural hospital”, as used in paragraph (1), will mean a general hospital classified as a rural hospital for purposes of determining payment for inpatient services provided to beneficiaries of title XVIII of the federal social security act (Medicare) or under state regulations, or a general hospital with a service area which has an average population of less than 175 persons per square mile, or a general hospital which has a service area which has an average population of less than two hundred persons per square mile measured as population density by zip code.
The average population of the service area is calculated by multiplying annual patient discharges by the population density per square mile of the county of origin or zip code as applicable for each patient discharge and dividing by total discharges. Annual patient discharges shall be determined using discharge data for the 1997 rate year, as reported to the commissioner by October 1, 1998. Population density shall be determined utilizing United States census bureau data for 1997.

(iv) “Eligible rural hospital weight”, as used in paragraph (1), shall mean the result of adding, for each eligible rural hospital:

(a) The eligible rural hospital’s targeted need, as defined in subparagraph (ii) of this section, minus the mean targeted need for all eligible rural hospitals, divided by the standard deviation of the targeted need of all eligible rural hospitals; and

(b) The mean number of beds of all eligible rural hospitals minus the number of beds for an individual hospital, divided by the standard deviation of the number of beds for all eligible rural hospitals.

(2) From the funds in the pool each year, except as otherwise provided for in this section, $36 million on an annualized basis for the periods January 1, 2000 through September 30, 2009, and for the periods on and after October 1, 2009 through December 31, 2012, $32.4 million on an annualized basis, of the funds not distributed in accordance with paragraph (1), shall be distributed in accordance with the formula set forth in paragraph (12) of the Medicaid disproportionate share payments section of this Attachment.

(3) From the funds in the pool each year, any funds not distributed in accordance with paragraphs (1) or (2), shall be distributed in accordance with the formula set forth in subparagraph (d) of paragraph (10) of the Medicaid disproportionate share payments section.
For annual periods beginning January 1, 2009 through December 31, 2012, disproportionate share hospital (DSH) payments shall be reduced to 90 percent of the amount otherwise payable. In addition, DSH payments to each general hospital will be distributed in accordance with the following:

(a) $13.93 million will be distributed to major government hospitals and will be allocated proportionally, based on each facility’s relative uncompensated care need as determined in accordance with (c);

(b) $70.77 million will be distributed to general hospitals other than major government general hospitals and will be allocated proportionally, based on each facility’s relative uncompensated care need as determined in accordance with (c);

(c) each facility’s relative uncompensated care need amount will be determined by multiplying inpatient units of services for all uninsured patients from the calendar year two years prior to the distribution year, excluding referred ambulatory units of services, by the applicable Medicaid inpatient rates in effect for such prior year, but not including prospective rate adjustments and rate add-ons, provided, however, that for distributions on and after January 1, 2010 through December 31, 2012, the uncompensated amount for inpatient services shall utilize the inpatient rates in effect as of July 1 of the prior year; and:

by multiplying outpatient units of service for all uninsured patients from the calendar year two years prior to the distribution year, including emergency department services and ambulatory surgery services, but excluding referred ambulatory services units of service, by Medicaid outpatient rates that reflect the exclusive utilization of the ambulatory patient groups (APG) rate-setting methodology, however, for those services for which APG rates are not available the applicable Medicaid outpatient rate shall be the rate in effect for the calendar year two years prior to the distribution year.

For distributions on and after January 1, 2010 through December 31, 2012, each facility’s uncompensated need amount will be reduced by the sum of all payment amounts collected from such patients. The total uncompensated care need for each facility will then be adjusted by application of the existing nominal need scale.
(d) (i) Continuing annually for periods on and after January 1, 2009 through December 31, 2012, no general hospital will receive DSH payment distributions that exceed the costs incurred by such hospital during the distribution period for providing inpatient and outpatient hospital services to Medicaid eligible patients or, uninsured patients. Such costs will be net of monies received from non-DSH related Medicaid payments and collections from uninsured patients.

(ii) DSH payment reductions will first be made from the public general hospital indigent care adjustment payments pursuant to this Attachment, and then from payments from this section.

(e) Distributions to voluntary sector general hospitals, excluding government general hospitals, made in accordance with the Medicaid Disproportionate Share Section, the Supplemental Indigent Care Distributions Section, and the High Need Indigent Care Adjustment Pool Section will be reduced proportionally by the final payment amounts paid to eligible voluntary sector general hospitals, excluding government general hospitals, made in accordance with the Additional Inpatient Hospitals Payments Section for the period commencing July 1, 2010, and annually thereafter through December 31, 2012.

(f) In addition to reductions noted in paragraph (e), distributions to voluntary sector general hospitals, made in accordance with the Medicaid Disproportionate Share Section, the Supplemental Indigent Care Distributions Section, and the High Need Indigent Care Adjustment Pool Section will be reduced proportionally by $69.4M for the period commencing July 1, 2010 through December 31, 2010 and by $73.2M annually for rate periods commencing January 1, 2011 [and thereafter] through December 31, 2012 excluding distributions made in accordance with subparagraphs (b), (c), and (d) of paragraph (3) of the Supplemental Indigent Care Distributions Section.
**Hospital physician billing.**

1. With the exception of hospitals designated under the Medicare program as meeting the criteria set forth in §1861(b)(7) of the federal Social Security Act, for discharges occurring on and after February 1, 2010, hospitals may bill for physician services in accordance with the applicable Medicaid physician fee schedule in addition to billing the applicable DRG.
Serious Adverse Events.
Effective October 1, 2008, through June 30, 2011, the New York State Medicaid program shall deny reimbursement or reduce payment for the higher DRG arising from the following three serious adverse events, defined as avoidable hospital complications and medical errors that are identifiable, preventable, and serious in their consequences to patients: foreign object left in patient after surgery, air embolism, and blood incompatibility. On and after November 1, 2009, hospitals will be required to bill all claims associated with one of the remaining ten (10) serious adverse events using the following procedures:

a. For those cases where a serious adverse event occurs and the hospital elects to receive no payment for the admission (i.e., it is expected that Medicaid will deny the entire payment based on the type of event), the hospital will notify Medicaid of this case by submitting a claim using a new rate code 2590 (non-reimbursable with serious adverse events), along with the requisite billing information submitted with a claim.

Department of Health will identify claims billed with rate code 2590 and instruct the Island Peer Review Organization (IPRO), the New York State Medicaid review agent, to request the medical record for the admission and conduct a case review.

b. For those cases where a serious adverse event occurs and the hospital anticipates at least partial payment for the admission, the hospital will follow a two-step process for billing the admission:

i. The hospital will first submit their claim for the entire stay in the usual manner, using the appropriate rate code (i.e., rate code 2946 for DRG claims or the appropriate exempt unit per diem rate code such as 2852 for psychiatric care, etc.). That claim will be processed in the normal manner and the provider will receive full payment for the case.
ii. Once remittance for the initial claim is received, it will be necessary for the hospital to then submit an adjustment transaction to the original paid claim using one of the following two new rate codes associated with identification of claims with serious adverse events:

- 2591 (DRG with serious adverse events), or
- 2592 (Per Diem with serious adverse events)

The adjusted claim will then pend to the Department and will be forwarded to Island Peer Review Organization (IPRO) for further review. IPRO will review the medical record for the case to determine appropriate payment. Once IPRO has completed its review of the medical record, a preliminary notification indicating their findings will be issued. Hospitals will be required to respond to this preliminary finding within thirty days indicating whether it agrees or disagrees with the finding. If the provider disagrees with this preliminary finding, they may appeal by submitting additional rationale and supporting documentation to the IPRO. IPRO will then re-review the case taking into account the provider’s rationale and supporting documentation. A final determination will be made at the conclusion of this process.

The thirteen serious adverse events are as follows:

1. Surgery performed on the wrong body part
2. Surgery performed on the wrong patient
3. Wrong surgical procedure on a patient
4. Foreign object inadvertently left in patient after surgery
5. Medication error
6. Air embolism
7. Blood incompatibility
8. Patient disability from electric shock
(9) Patient disability from use of contaminated drugs
(10) Patient disability from wrong function of a device
(11) Incidents whereby a line designated for oxygen intended for patient is wrong item or contaminated
(12) Patient disability from burns
(13) Patient disability from use of restraints or bedrails

Hospitals receiving payment under New York State Medicaid shall be required to provide information, through Present on Admission (POA) indicators, on each admission. These POA indicators shall designate which procedures or complications were present on admission, and which occurred during or as a result of hospital care.
This provision applies to all Medicaid supplemental or enhanced payments and Medicaid disproportionate share hospital payments.

TN #09-34
Supersedes TN NEW
Approval Date January 20, 2010
Effective Date December 1, 2009
Citation
42 CFR 447, 434, 438, and 1902(a)(4), 1902(a)(6), and 1903

Payment Adjustment for Provider Preventable Conditions
The Medicaid agency meets the requirements of 42 CFR Part 447, Subpart A, and sections 1902(a)(4), 1902(a)(6), and 1903 with respect to non-payment for provider-preventable conditions.

Health Care-Acquired Conditions
The State identifies the following Health Care-Acquired Conditions for non-payment under Section 4.19(A) of this State plan.

_X__ Hospital-Acquired Conditions as identified by Medicare other than Deep Vein Thrombosis (DVT)/Pulmonary Embolism (PE) following total knee replacement or hip replacement surgery in pediatric and obstetric patients.

Other Provider-Preventable Conditions
The State identifies the following Other Provider-Preventable Conditions for non-payment under Section 4.19(A) of this State plan.

_X__ Wrong surgical or other invasive procedure performed on a patient; surgical or other invasive procedure performed on the wrong body part; surgical or other invasive procedure performed on the wrong patient.

_X__ Additional Other Provider-Preventable Conditions identified below: [Not applicable.]

Effective July 1, 2011, reimbursement for inpatient hospital services shall be based on the Provider Preventable Conditions (PPC) policy defined in 42 CFR 447.26.

PPCs are defined as two distinct categories: Health Care-Acquired Conditions (HCAC) and Other Provider-Preventable Conditions (OPPC).

For APR-DRG cases, the APR-DRG payable shall exclude the diagnoses not present on admission for any HCAC. For per diem payments, the number of covered days shall be reduced by the number of days associated with diagnoses not present on admission for any HCAC.
For per diem payments, the number of covered days shall be reduced by the number of days associated with diagnoses not present on admission for any HCAC. Claims containing a diagnosis not present on admission will be subsequently reviewed by clinical review staff to determine if the diagnosis contributed to a longer length of stay. If the clinical review can reasonably isolate that portion of the actual length of stay that is directly related to the diagnosis not present on admission, payment will be denied for the directly related length of stay.

No payment shall be made for inpatient services for OPPCs. OPPCs are the three Medicare National Coverage Determinations:

1. Wrong surgical or other invasive procedure performed on a patient;
2. Surgical or other invasive procedure performed on the wrong body part; and
3. Surgical or other invasive procedure performed on the wrong patient.

No reduction in payment for a PPC will be imposed on a provider when the condition defined as a PPC for a particular patient existed prior to the initiation of treatment for that patient by that provider.

Reductions in provider payment will be limited to the extent that the following apply:

1. The identified PPCs would otherwise result in an increase in payment.
2. The State can reasonably isolate for nonpayment the portion of the payment directly related to treatment for, and related to, the PPCs.

Non-payment of PPCs shall not prevent access to services for Medicaid beneficiaries.
Graduate Medical Education - Medicaid Managed Care Reimbursement
Teaching hospitals shall receive direct reimbursement from the State Medicaid Agency for
gradient medical education (GME) costs associated with inpatient services rendered to patients
enrolled in Medicaid managed care or Family Health Plus plans.
GME payments for DRG based services shall include the following:
  a. A direct graduate medical education (GME) payment per discharge calculated for each
teaching hospital by dividing the facility’s total reported acute care Medicaid direct GME
costs by its total Medicaid acute care discharges in the applicable base period. Direct
GME costs shall be those costs defined in the Definitions Section, derived from the same
base period used to calculate the statewide base price for the applicable rate period,
and trended forward to such rate period in accordance with applicable provisions of this
Attachment.
  b. An indirect GME payment per discharge calculated for each teaching hospital by applying
the actual applicable Service Intensity Weight for the discharge, Wage Equalization
Factor Adjustment, and indirect teaching cost percentage described in this Attachment
to the statewide base price. Each of these variables will be for the applicable rate year
in which the discharge occurs.
GME payments for exempt unit or hospital services shall include a direct GME and an indirect
GME component calculated as follows:
  a. A direct GME payment per discharge for each exempt unit or hospital by dividing the
facility’s applicable exempt unit or hospital Medicaid direct GME costs by the total
Medicaid discharges for that exempt unit or hospital in the applicable base period.
Direct GME costs shall be those costs defined in the Definitions Section, derived from the
same base period used to calculate the average operating cost per diem for the
applicable rate period, and trended forward to such rate period in accordance with
applicable provisions of this Attachment.
b. An indirect GME payment per discharge for each exempt unit or hospital by applying the indirect teaching cost percentage calculated in accordance with this Attachment to the hospital’s operating cost per diem calculated in accordance with the provisions of this Attachment excluding the costs of direct GME calculated in (a) above, converted to a per diem basis, and trended forward to the rate period in accordance with the provisions of each applicable exempt unit or hospital’s average length of stay based on the latest available data reported on the Institutional Cost Report for the reporting period two years prior to the rate year.
Disproportionate Share Hospital (DSH) State Plan Rate Years

The State Plan Rate Year for Disproportionate Share Hospital payments made to general acute care and specialty hospitals in this Attachment and facility specific DSH caps shall be defined as running from January 1 through December 31 of the current calendar year and each subsequent calendar year thereafter.
Disproportionate share limitations.

1. Disproportionate share payment distributions made to general hospitals pursuant to this Attachment shall be limited in accordance with the provisions of this Section. The latest available annual cost report submitted by a hospital prior to the disproportionate share distribution period shall be used to determine eligibility pursuant to paragraph (2) and for projected limits pursuant to paragraph (5). Annual cost reports having an end date in the applicable annual disproportionate share distribution period, or for certain state-operated general hospitals, annual cost reports having an end date in the subsequent annual disproportionate share distribution period, shall be used to reconcile limits pursuant to paragraph (6).

2. General hospitals must meet the following conditions to receive disproportionate share distributions:
   a. The hospital must have at least two obstetricians who have staff privileges at the hospital and who have agreed to provide obstetric services to individuals who are entitled to medical assistance for obstetric services under a state plan. This requirement doesn't apply to a hospital if their inpatients are predominantly under 18 years old or if the hospital does not offer nonemergency obstetric services to the general population as of December 22, 1987. If the hospital is a rural hospital, an obstetrician is any physician with staff privileges to perform nonemergency obstetric procedures.
   b. The hospital must have a Medicaid inpatient utilization rate of at least one percent.

3. No general hospital shall receive in total from disproportionate share payment distributions an amount which exceeds the costs incurred during the periods described in paragraph (1) for furnishing inpatient and ambulatory hospital services to individuals who are eligible for medical assistance benefits pursuant to title XIX of the Federal Social Security Act (hereinafter referred to as “Medicaid cost”) or to individuals who have no health insurance or other source of third party coverage (hereinafter referred to as “self-pay cost”), reduced by medical assistance payments made pursuant to title XIX of the Federal Social Security Act (hereinafter referred to as “Medicaid revenue”), other than disproportionate share payments, and payments by uninsured patients. For purposes of this Section, payments to a general hospital for services provided to indigent patients made by the State or a unit of local government within the State shall not be considered a source of third party payment.

4. In order to ensure the continued flow of disproportionate share payments to hospitals, the Commissioner shall make projections of each hospital’s disproportionate share limitation based on the most current data available from the hospital’s annual cost reports. The
Commissioner shall use annual cost reports in accordance with the provisions of paragraph (5) to estimate Medicaid and self-pay costs in the projection methodology for a particular rate year. This shall be referred to as the "projection methodology". Subsequent to the receipt of a hospital's annual cost report having an end date in the applicable annual disproportionate share distribution period, or for certain state-operated general hospitals whose annual cost reports have an end date within the subsequent annual period, each hospital's disproportionate share limitation shall be reconciled to the actual rate year data. This shall be referred to as the "reconciliation methodology".

5. **Projection methodology.** Each hospital's projected disproportionate share limitation for each rate year shall be the sum of its inpatient and outpatient Medicaid and uninsured gains/(losses) as calculated using reported base year data and statistics from the year two years immediately preceding the rate year and as used for projection methodology purposes for that prior year. For the two thousand eleven calendar year, maximum disproportionate share payment distributions shall be determined initially based on each hospital's submission of a fully completed two thousand eight disproportionate share hospital data collection tool, and shall subsequently be revised to reflect each hospital's submission of a fully completed two thousand nine disproportionate share hospital data collection tool. For calendar years on or after January 1, 2012, inpatient and outpatient Medicaid and uninsured gains/(losses) based on data for the most recent calendar year available [2 years] prior to the DSH payment year submitted by hospitals as prescribed by the Commissioner shall be used to determine maximum disproportionate share payments. All such initial determinations shall subsequently be revised to reflect actual calendar year inpatient and outpatient Medicaid and uninsured gains/(losses) applicable to the DSH payment year.

6. **Reconciliation methodology.** The Commissioner shall revise the projected limitation based on actual audited and certified data reported to the Commissioner for such calendar year in accordance with the following and in accordance with final regulations issued by the federal Department of Health and Human Services implementing 42 USC §1396r-4. The Commissioner shall revise the projected limitations for each hospital within eight months from the date required reports are submitted to the Department, except if such reports are determined to be unacceptable by the Department. For hospitals which have submitted unacceptable reports, the Commissioner shall revise the projected limitations within eight months from the date acceptable reports have been resubmitted to the Department.
outpatient Medicaid and self-pay gains/(losses) during the cost reporting year. The disproportionate share limitation schedule shall be accompanied by a certification by the hospital's independent public accountant which provides the Commissioner sufficient assurance as to the accuracy of the information contained in such schedule.

i. The final limit shall be calculated by excluding inpatient and outpatient Medicaid revenue impacts resulting from prospective adjustments to rates for periods prior to the implementation of the federal hospital specific disproportionate share payment limits from the inpatient and outpatient Medicaid and self-pay gains/(losses) reported on the disproportionate share payment limitation schedule.

a. Failure of a hospital to submit the information required by this Section in a form acceptable to the Commissioner shall result in the immediate withholding of subsequent disproportionate share distributions. Such withholding shall continue until the hospital complies with the reporting requirements of this section.
New York
153

Government General Hospital Additional Disproportionate Share Payments

Government general hospital disproportionate share payments will be made to increase reimbursement to hospitals operated by the State of New York, the State University of New York. To be eligible, hospitals must be operating at the time the payments are made. The payments are subject to the payment limits established in this Attachment of this plan.

1. Government general hospitals operated by the State of New York or the State University of New York shall receive additional payments effective April 1, 1997 for the period April 1, 1997 through March 31, 1998, April 1, 1998 for the period April 1, 1998 through March 31, 1999, August 1, 1999 for the period April 1, 1999 through March 31, 2000, April 1, 2000 for the period April 1, 2000 through March 31, 2001, April 1, 2001 for the period April 1, 2001 through March 31, 2002, April 1, 2002 for the period April 1, 2002 through March 31, 2003, for the state fiscal year beginning April 1, 2005 through March 31, 2006, for the state fiscal year beginning April 1, 2006 through March 31, 2007 and April 1, 2007 through March 31, 2009, for the state fiscal years beginning April 1, 2009 through March 31, 2011, for the state fiscal years beginning April 1, 2011 through March 31, 2013, for the state fiscal years beginning April 1, 2013 through March 31, 2016 [and], for the state fiscal years beginning April 1, 2016 through March 31, 2019, and for state fiscal years beginning April 1, 2019 through March 31, 2022 subject to the limits established pursuant to this Attachment. Such payments shall be established based on medical assistance and uninsured patient losses for 1996, 1997, 1998, 1999, 2000, 2001 and 2002 after considering all other medical assistance based initially for 1996 on 1994 reconciled data as further reconciled to actual reported 1996 reconciled data, for 1997 based initially on reported 1995 reconciled data as further reconciled to actual reported 1997 reconciled data, for 1998 based initially on reported 1995 reconciled data, as further reconciled to actual reported 1998 reconciled data, for 1999 based initially on reported 1995 reconciled data as further reconciled to actual reported 1999 reconciled data, for 2000 based initially on reported 1995 reconciled data, as further reconciled to actual reported 2000 reconciled data, for 2001 based initially on reported 1995 reconciled data, as further reconciled to actual reported 2001 reconciled data, for 2002 based initially on reported 2000 reconciled data as further reconciled to actual reported 2002 reconciled data, for the state fiscal year beginning on April 1, 2005, based initially on up to one hundred percent of reported 2000 reconciled data as further reconciled to up to one hundred percent of actual reported data for 2005, and for the state fiscal year beginning on April 1, 2006, based initially on up to one hundred percent of reported 2000 reconciled data as further reconciled to up to one hundred percent of actual reported data for 2006.
Such payments shall continue to be established for periods beginning on April 1, 2007, through March 31, 2008, based initially on 100% of reported 2000 reconciled data and further reconciled to 100% of actual reported data for 2007. For periods beginning April 1, 2008, through March 31, 2009, such payments shall be based initially on 100% of reported 2000 reconciled data and further reconciled to 100% of actual reported data for 2008. The payments may be added to rates of payment or made as aggregate payments to eligible government general hospitals.

For periods beginning April 1, 2009 through March 31, 2010 [2011], such payments shall be established based initially on reported 2007 reconciled data, as adjusted for statutorily authorized Medicaid rate changes impacting this applicable payment year, and further reconciled to actual reported data for 2009[, and to actual reported data for each respective succeeding year]. For periods beginning on and after April 1, 2010, such payments shall be established based initially on reported reconciled data from the base year two years prior to the payment year, as adjusted for statutorily authorized Medicaid rate changes impacting this applicable payment year, and further reconciled to actual reported data from such payment year. The payments may be added to rates of payment or made as aggregate payments to eligible government general hospitals.
2. Government general hospitals operated by a county, which does not include a city with a population of over one million, shall receive additional payments effective April 1, 1997 for the period April 1, 1997 through March 31, 1998, April 1, 1998 for the period April 1, 1998 through March 31, 1999, August 1, 1999 for the period April 1, 1999 through March 31, 2000, April 1, 2000 for the period April 1, 2000 through March 31, 2001, April 1, 2001 for the period April 1, 2001 through March 31, 2002, April 1, 2002 for the period April 1, 2002 through March 31, 2003, for the state fiscal year beginning April 1, 2005 through March 31, 2006, for the state fiscal year beginning April 1, 2006 through March 31, 2007, and April 1, 2007 through March 31, 2008, and for the state fiscal year beginning April 1, 2008 through March 31, 2009, for the state fiscal years beginning April 1, 2009 through March 31, 2011, for the state fiscal years beginning April 1, 2011 through March 31, 2013, for the state fiscal years beginning April 1, 2013 through March 31, 2016 [and], for the state fiscal years beginning April 1, 2016 through March 31, 2019, and for the state fiscal years beginning April 1, 2019 through March 31, 2022 subject to the limits established pursuant to this Attachment. Such payments shall be established based on medical assistance and uninsured patient losses for 1996, 1997, 1998, 1999, 2000, 2001 and 2002, after considering all other medical assistance based initially for 1996 on 1994 reconciled data as further reconciled to actual reported 1996 reconciled data, for 1997 based initially on reported 1995 reconciled data as further reconciled to actual reported 1997 reconciled data, for 1998 based initially on reported 1995 reconciled data, as further reconciled to actual reported 1998 reconciled data, for 1999 based initially on reported 1995 reconciled data as further reconciled to actual reported 1999 reconciled data, for 2000 based initially on reported 1995 reconciled data, as further reconciled to actual reported 2000 reconciled data, for 2001 based initially on reported 1995 reconciled data, as further reconciled to actual reported 2001 reconciled data, for 2002 based initially on reported 2000 reconciled data as further reconciled to actual reported 2002 reconciled data, for the state fiscal year beginning on April 1, 2005, based initially on up to one hundred percent of reported 2000 reconciled data as further reconciled to up to one hundred percent of actual reported data for 2005, and for the state fiscal year beginning on April 1, 2006, based initially on up to one hundred percent of reported 2000 reconciled data as further reconciled to up to one hundred percent of actual reported data for 2006.
Such payments shall continue to be established for periods beginning on April 1, 2007, based initially on up to 100% of reported 2000 reconciled data as further reconciled to up to 100% of actual reported data for 2007, for state fiscal year beginning on April 1, 2008 through March 31, 2009, based initially on up to one hundred percent of reported 2000 reconciled data as further reconciled to up to one hundred percent of actual reported data for 2008. The payments may be added to rates of payment or made as aggregate payments to eligible government general hospitals.

For periods beginning April 1, 2009 through March 31, 2010 [2011], such payments shall be established based initially on reported 2007 reconciled data, as adjusted for statutorily authorized Medicaid rate changes impacting this applicable payment year, and further reconciled to actual reported data for 2009[, and to actual reported data for each respective succeeding year]. For periods beginning on and after April 1, 2010, such payments shall be established based initially on reported reconciled data from the base year two years prior to the payment year, as adjusted for statutorily authorized Medicaid rate changes impacting this applicable payment year, and further reconciled to actual reported data from such payment year. The payments may be added to rates of payment or made as aggregate payments to eligible government general hospitals.
Government general hospitals operated by a county, which does not include city of over one million, or beginning April 1, 1997, government general hospitals located in the county of Erie, shall receive additional payments effective April 1, 1997 for the period April 1, 1997 through March 31, 1998, April 1, 1998 for the period April 1, 1998 through March 31, 1999, August 1, 1999 for the period April 1, 1999 through March 31, 2000, April 1, 2000 for the period April 1, 2000 through March 31, 2001, April 1, 2001 for the period April 1, 2001 through March 31, 2002, April 1, 2002 for the period April 1, 2002 through March 31, 2003, for the state fiscal year beginning April 1, 2005 through March 31, 2006, for the state fiscal year beginning April 1, 2006 through March 31, 2007, and April 1, 2007 through March 31, 2008, and for the state fiscal year beginning April 1, 2008 through March 31, 2009, subject to the limits established in accordance with disproportionate share limitations. Such payments shall be established based on medical assistance and uninsured patient losses for 1996, 1997, 1998, 1999, 2000, 2001 and 2002 after considering all other medical assistance based initially for 1996 on 1994 reconciled data as further reconciled to actual reported 1996 reconciled data, for 1997 based initially on reported 1995 reconciled data as further reconciled to actual reported 1997 reconciled data, for 1998 based initially on reported 1995 reconciled data, for 1999 based initially on reported 1995 reconciled data as further reconciled to actual reported 1999 reconciled data, for 2000 based initially on reported 1995 reconciled data, as further reconciled to actual reported 2000 reconciled data, for 2001 based initially on reported 1995 reconciled data, as further reconciled to actual reported 2001 reconciled data, for 2002 based initially on reported 2000 reconciled data as further reconciled to actual reported 2002 data, for the state fiscal year beginning on April 1, 2005, based initially on up to one hundred percent of reported 2000 reconciled data as further reconciled to up to one hundred percent of actual reported data for 2005, and for the state fiscal year beginning on April 1, 2006, based initially on up to one hundred percent of reported 2000 reconciled data as further reconciled to up to one hundred percent of actual reported data for 2006. Such payments shall continue to be established for periods beginning on April 1, 2007, based initially on up to 100% of reported 2000 reconciled data as further reconciled to up to 100% or actual reported data for 2007 and to actual reported data for each respective succeeding year. The payments may be added to rates of payment or made as aggregate payments to eligible government general hospitals.
Government general hospitals, other than those operated by the State of New York or the State University of New York, located in a city with a population of over one million, shall receive 120 million dollars in additional disproportionate share payments effective January 1, 1997 and 120 million dollars in additional disproportionate share payments during each state fiscal year commencing April 1, 1997 and thereafter until March 31, 2000, 120 million dollars in initial additional disproportionate share payments each state fiscal year commencing April 1, 2000 and thereafter until March 31, 2003, $120 million during the state fiscal year April 1, 2005 through March 31, 2006, $120 million during the state fiscal year beginning April 1, 2006 through March 31, 2007, $120 million beginning April 1, 2007 through March 31, 2008, $120 million during the state fiscal year beginning April 1, 2008 through March 31, 2009, $420 million [annually] for the state fiscal year[s] beginning April 1, 2009 through March 31, 2010[1], $420 million for the state fiscal year beginning April 1, 2010 through March 31, 2011, and $120 million for the state fiscal year beginning April 1, 2011 through March 31, 2012 and annually thereafter, subject to the maximum payment amounts permitted under sections 1923(f) and 1923(g) of the federal Social Security Act after application of all other disproportionate share hospital payments[, $120 million annually for the state fiscal year beginning April 1, 2011, and annually thereafter]. Such facilities will also receive payments equivalent to any undistributed disproportionate share payment amount, after all other statewide disproportionate share payments, pursuant to the states’ allotment under 1923(f) and (g) of the federal Social Security Act. Such payments will be made to each qualified individual hospital based on the relative share of each such hospital's medical assistance and uninsured patient losses for 1997 after considering all other medical assistance payments to such government general hospitals based on 1994 reconciled data as further reconciled to actual reported 1997 reconciled data, for any payments made in 1998 based initially on reported 1995 reconciled data as further reconciled to actual reported 1997 or 1998 reconciled data, for payments made during the state fiscal year beginning April 1, 1998 based initially on reported 1995 reconciled data as further reconciled to actual reported 1998 or 1999 data, for payments made during the state fiscal year ending March 31, 2000 based initially on reported 1995 reconciled data as further reconciled to actual reported 1999 or 2000 data, for payments made during the state fiscal year beginning April 1, 2000 based initially on reported 1995 reconciled data as further reconciled to actual reported 2000 or 2001 data, for payments made during the state fiscal year beginning April 1, 2001 based initially on reported 1995 reconciled data as further reconciled to actual reported 2001 or 2002 data, for payments made during the state fiscal year beginning April 1, 2002 based initially on reported 2000 reconciled data as further reconciled to actual reported 2002 or 2003 data, for payments made for the state fiscal year beginning April 1, 2005 based initially on reported 2000 reconciled data, as further reconciled to actual reported 2005 or 2006 data, and for payments made for the state fiscal year beginning April 1, 2006, based initially on reported 2000 reconciled data, as further reconciled to actual reported 2006 or 2007 data.
Such payments shall continue to be established for the state fiscal year beginning on April 1, 2007 based initially on reported 2000 reconciled data, as further reconciled to actual reported 2007 or 2008 data, for the state fiscal year beginning on April 1, 2008 through March 31, 2009, based initially on reported 2000 reconciled data, as further reconciled to actual reported 2008 or 2009 data. The payments may be added to rates of payment or made as aggregate payments to eligible government general hospitals.

For periods beginning April 1, 2009 through March 31, 2010 [2011], such payments shall be established based initially on reported 2007 reconciled data, as adjusted for statutorily authorized Medicaid rate changes impacting this applicable payment year, and further reconciled to actual reported data for 2009[, and to actual reported data for each respective succeeding year]. For periods beginning on and after April 1, 2010, such payments shall be established based initially on reported reconciled data from the base year two years prior to the payment year, as adjusted for statutorily authorized Medicaid rate changes impacting this applicable payment year, and further reconciled to actual reported data from such payment year. The payments may be added to rates of payment or made as aggregate payments to eligible government general hospitals.

Beginning April 1, 2000 government general hospitals, other than those operated by the State of New York or the State University of New York, located in a city with a population of over one million are authorized to receive additional disproportionate share payments as projected or reconciled pursuant to this Attachment governing disproportionate share payments to hospitals, based on the relative share of each such non-state operated government general hospital of projected or reconciled medical assistance and uninsured patient losses after payment of all other medical assistance, including disproportionate share payments to such government general hospitals. For the period April 1, 2000 through March 31, 2001, an additional payment of $103 million is authorized. Effective April 1, 2001 through March 31, 2002, additional payments of $113 million are authorized. For the state fiscal years beginning April 1, 2002 and ending March 31, 2009, and each state fiscal year thereafter, additional annual payments of $210 million are authorized. The payments may be added to rates of payment or made as aggregate payments to eligible government general hospitals.
For state fiscal years beginning April 1, 2003 and ending March 31, 2005, the Department of Health is authorized to pay government general hospitals, operated by the State of New York or by the State University of New York additional payments for inpatient hospital services as medical assistance payments for patients eligible for federal financial participation under Title XIX of the federal social security act pursuant to the federal laws and regulations governing disproportionate share payments to hospitals 175 percent of each such government general hospital’s medical assistance and uninsured patient losses after all other medical assistance, including disproportionate share payments to such government general hospital, based initially on reported 2000 reconciled data. Such payments for the periods ending March 31, 2004 and March 31, 2005, shall be further reconciled to actual reported 2003 and 2004 data respectively, provided, however, that such payments for all eligible hospitals shall be reduced to the extent such payments would result in the exceeding of the State’s disproportionate share allotment limit, as determined in accordance with federal statute and regulations, provided, however, that such reduction shall be based on each such hospital’s proportionate share of the sum of all such payments that would be made without regard to such allotment limit. Such payments may be added to rates of payment or made as aggregate payments to an eligible government general hospital.

TN #10-20-B Approval Date July 29, 2011
Supersedes New Effective Date April 1, 2010
Reimbursable Assessment on Hospital Inpatient Services

Effective January 1, 2006, and thereafter, an assessment on net patient services revenue for hospital inpatient services rendered to Medicaid beneficiaries shall be considered an allowable cost and reimbursed through an adjustment to Medicaid services rates of payment.
Government General Hospital Indigent Care Adjustment.

For rate periods commencing January 1, 1997 [and thereafter,] through December 31, 2012 each eligible government general hospital [shall] will receive an annual amount equal to the amount allocated to such government general hospitals as determined pursuant to this Attachment for the period January 1, 1996 through December 31, 1996. The adjustment may be made to rates of payment or as aggregate payments to an eligible government general hospital and is contingent upon all federal approvals necessary by federal law and rules for federal financial participation for medical assistance under Title XIX of the federal Social Security Act based upon the adjustment provided herein as a component of such payments being granted.

For calendar years effective January 1, 2013, and for each calendar year thereafter, eligible major government general hospitals will receive in aggregate $412,000,000 proportionately allocated based on each eligible hospital's Medicaid and uninsured losses to the total of such losses for eligible hospitals. The Medicaid and uninsured losses will be determined based on the latest available audited annual data as of January 1 of the distribution year prepared in accordance with federal DSH Auditing and Reporting regulations 42 CFR Parts 447 and 455 and submitted annually to the Department of Health as required by the Commissioner of Health. Eligible major government hospitals are defined as all State operated general hospitals, all general hospitals operated by the New York City Health and Hospitals Corporation, and all other public general hospitals having annual inpatient operating costs in excess of $25 million dollars. Medicaid and uninsured losses will be calculated in accordance with federal DSH Auditing and Reporting regulations 42 CFR Parts 447 and 455. Payments will be calculated on an annual basis and distributed in four quarterly installments.
Additional Inpatient Governmental Hospital Payments

For the period beginning state fiscal year April 1, [2017] 2018 and ending March 31, [2018] 2019, the State will provide a supplemental payment for all inpatient services provided by eligible government general hospitals located in a city with a population over one million and not operated by the State of New York or the State University of New York. The amount of the supplemental payment will be [$421,376,757] $300,000,000 [and paid semi-annually in September and March.] It will be distributed to hospitals proportionately using each hospital's proportionate share of total Medicaid days reported for the base year two years prior to the rate year. Such payments, aggregated with other medical assistance payments will not exceed 100% of a reasonable estimate of the amount that would be paid for such services under Medicare payment principles for non-state government owned or operated government general hospitals for the respective period[s].
Additional Inpatient Governmental Hospital Payments (Continued)

For the state fiscal year beginning April 1, [2015] 2016 and ending March [31] [2016] 2017, the State will provide an additional supplemental payment for all inpatient services provided by eligible government general hospitals. To be eligible, hospitals must (1) be a government general hospital, (2) not be operated by the State of New York or the State University of New York, and (3) be located in a city with a population over one million. Also, all medical assistance payments when aggregated with both the supplemental payment and the additional supplemental payment will not exceed 100% of a reasonable estimate of the amount that would be paid for such services under Medicare payment principles for non-state government owned or operated government hospitals for this period.

The amount of the supplemental payment will be [$132,540,359] the difference between the amount of $393,987,995 and the previous supplemental payment amount of $337,471,812 within the same year. Medical assistance payments will be made for all inpatient services for patients eligible for federal financial participation under Title XIX of the Federal Social Security Act [initially] and calculated using each such hospital's proportionate share of total Medicaid days of all eligible hospitals reported for the [period from January 1, 2015 to December 31, 2015] base period two years prior to the rate year.

TN  #16-0035-A Approval Date June 8, 2017
Supersedes TN #15-0022-B Effective Date April 1, 2016
Voluntary Supplemental Inpatient Payments

Effective for the period July 1, 2010 through March 31, 2011, additional inpatient hospital payments are authorized to voluntary sector hospitals, excluding government general hospitals, for inpatient hospital services after all other medical assistance payments, of $235,500,000 for the period July 1, 2010 through March 31, 2011; $314,000,000 for the period April 1, 2011 through March 31, 2012; $281,778,852 for the period April 1, 2012 through March 31, 2013; $298,860,732 for the period April 1, 2013 through March 31, 2014; and $226,443,721 for the period April 1, 2014 through March 31, 2015; and $264,916,150 for the period April 1, 2015 through March 31, 2016; and $271,204,805 for the period of April 1, 2016 through March 31, 2017; and $319,459,509 for the period of April 1, 2017 through March 31, 2018 subject to the requirements of 42 CFR 447.272 (upper payment limit). Such payments are paid monthly to eligible voluntary sector owned or operated general hospitals, excluding government general hospitals.

Eligibility to receive such additional payments, and the allocation amount paid to each hospital, will be based on data from the period two years prior to the rate year, as reported on the Institutional Cost Report (ICR) submitted to the Department as of October 1 of the prior rate year.

(a) Thirty percent of such payments will be allocated to safety net hospitals based on each eligible hospital's proportionate share of all eligible safety net hospitals' Medicaid discharges for inpatient hospital services, including both Medicaid fee-for-service and managed care discharges for acute and exempt services;

(i) Safety net hospitals are defined as non-government owned or operated hospitals which provide emergency room services having either: a Medicaid share of total inpatient hospital discharges of at least 35%, including both fee-for-service and managed care discharges for acute and exempt services; or a Medicaid share of total discharges of at least 30%, including both fee-for-service and managed care discharges for acute and exempt services, and also providing obstetrical services.

(b) Seventy percent of such payments will be allocated to eligible general hospitals, which provide emergency room services, based on each such hospital's proportionate share of all eligible hospitals' Medicaid discharges for inpatient hospital services, including both Medicaid fee-for-service and managed care discharges for acute and exempt services;

(c) No payment will be made to a hospital described in (i) and (ii). Payment amounts will be reduced as necessary not to exceed the limitations described in (iii).

(i) did not receive an Indigent Care Pool (ICP) payment;
(ii) the hospital's facility specific projected disproportionate share hospital payment ceiling is zero; or,
(iii) the annual payments amount to eligible hospitals exceeds the Medicaid customary charge limit at 42 CFR 447.271.

(d) Any amounts calculated under paragraphs (a) and (b) but not paid to a hospital because of the requirements in paragraph (c) will be allocated proportionately to those eligible general hospitals that provide emergency room services and which would not be precluded by paragraph (c) from receiving such additional allocations.

TN #17-0039 Supersedes TN #16-0036 Approval Date September 29, 2017 Effective Date April 1, 2017
Medicaid disproportionate share payments.

1. For the rate periods commencing January 1, 1991 and thereafter, Medicaid disproportionate share payments shall be made to hospitals to reimburse a portion or all of the costs associated with serving those patients unable or unwilling to pay for services rendered.

2. For rate periods commencing January 1, 1997 [and thereafter] through December 31, 2012, uncompensated care need shall mean losses from bad debts reduced to cost and the costs of charity care of a general hospital for inpatient services. The cost of services provided as an employment benefit or as a courtesy shall not be included.

3. For rate periods commencing January 1, 1997 [and thereafter] through December 31, 2012, targeted need shall be defined as the relationship of uncompensated care need to reported costs expressed as a percentage. Reported costs shall mean costs allocated as prescribed by the Commissioner to government general hospital inpatient services. Targeted need shall be determined based on base year data and statistics for the calendar year two years prior to the distribution period.

4. Nominal payment amount shall be defined as the sum of the dollars attributable to the application of an incrementally increasing proportion of reimbursement for percentage increases in targeted need according to the scale specified in this section. This paragraph sunsets on December 31, 2012.

5. For rate periods commencing January 1, 1997 [and thereafter] through December 31, 2012, targeted need share shall mean the relationship of each general hospital’s nominal payment amount of uncompensated care need determined in accordance with the scale specified in this section to the nominal payment amounts of uncompensated care need for all eligible general hospitals applied to funds available for distribution pursuant to this section.

6. Major government general hospitals shall mean all State-operated general hospitals, all general hospitals operated by the New York City Health and Hospital Corporation and all other government general hospitals having annual inpatient operating costs in excess of $25 million. This paragraph sunsets on December 31, 2012.

7. Voluntary sector hospitals shall mean all voluntary non-profit, private proprietary and government general hospitals other than major government general hospitals. This paragraph sunsets on December 31, 2012.

8. For rate periods commencing January 1, 1997 [and thereafter] through December 31, 2012, uninsured care shall be defined as losses from bad debts reduced to cost and the costs of charity care of a general hospital for inpatient services, which are not eligible for payment in whole or in part by a governmental agency, insurer or other third-party payor on behalf of a patient, including payment made

TN #13-13 Approval Date January 28, 2014
Supersedes TN #09-34 Effective Date January 1, 2013
New York
161(b)

directly to the government general hospital and indemnity or similar payments made to the person who is a payor of hospital services. The costs of services denied reimbursement, other than emergency room services, for lack of medical necessity or lack of compliance with prior authorization requirements, or provided as an employment benefit, or as a courtesy shall not be included.

9. In order to be eligible for distributions, a general hospital's targeted need must exceed one-half of one percent. This paragraph sunsets December 31, 2012.

10. For rate years commencing January 1, 1991 and prior to January 1, 1997, each eligible major government general hospital shall receive a portion of its bad debt and charity care need equal to 110 percent of the result of the application of the percentage of statewide inpatient reimbursable costs excluding costs related to services provided to beneficiaries of Medicare, developed on the basis of 1985 financial and statistical reports, to the statewide resources for the rate year.

   a. Statewide resources shall mean the sum of the result of multiplying a statewide average 5.48% by each general hospital's (including major government general hospitals and all other hospitals) rate year reimbursable inpatient costs used in the initial promulgation of rates, adjusted of case mix and volume changes, excluding inpatient costs related to services provided to beneficiaries of Title XVIII of the federal Social Security Act (Medicare), and without consideration of inpatient uncollectible amounts, and including income from invested funds.

11. For rate periods commencing January 1, 1997 through December 31, 2012, each eligible major government general hospital shall receive an amount equal to the amount allocated to such major government general hospital for the period January 1, 1996 through December 31, 1996.

12. For rate periods commencing January 1, 1997 [and thereafter] through December 31, 2012, the balance of unallocated funds after the Medicaid disproportionate share payments are made in accordance with paragraph (11) of this section and funds are reserved for distribution as high need adjustments in accordance with paragraph (13) of this section and shall be distributed to eligible hospitals, excluding major government general hospitals, on the basis of targeted need share.

   a. Need calculations shall be based on need data for the year two years prior to the rate year.

TN #13-13 Approval Date January 28, 2014
Supersedes TN #11-08 Effective Date January 1, 2013
b. For the rate periods commencing January 1, 1991 and prior to January 1, 1997, the scale specified in this section, and for rate periods commencing January 1, 1997 [and thereafter] through December 31, 2012, the scale specified in subparagraph (d) of this section shall be utilized to calculate individual hospital’s nominal payment amounts on the basis of the percentage relationship between their need for the year two years prior to the rate year and their patient service revenues for the year two years prior to the rate year.

c. The scale utilized for development of each hospital’s nominal payment amount shall be as follows:

<table>
<thead>
<tr>
<th>Targeted Need Percentage</th>
<th>Percentage of Reimbursement Attributable to the Portion of Targeted Need</th>
</tr>
</thead>
<tbody>
<tr>

13. Payments described in paragraph 2 of the High Need Indigent Care Pool subdivision shall be distributed as high need adjustments to general hospitals, excluding major government general hospitals, with nominal payment amount in excess of 4 percent of reported costs as follows: each general hospital's share shall be based on such hospital's aggregate share of nominal payment amount above 4 percent of reported costs compared to the total aggregate nominal payment amount above 4 percent of reported costs of all eligible hospitals. This paragraph sunsets on December 31, 2012.
Indigent Care Pool Reform - effective January 1, 2013

The provisions of this section will be effective for the period January 1, 2013 through December 31, [2018] 2020.

(a) Indigent Care Pool Reform Methodology. Each hospital’s uncompensated care nominal need will be calculated in accordance with the following:

1. **Inpatient Uncompensated Care.** Inpatient units of service for uninsured (self-pay and charity) patients, as reported in Exhibit 32 of the Institutional Cost Report (ICR) for the calendar year two years prior to the distribution year for each inpatient service area which has a distinct reimbursement rate, excluding hospital-based residential health care facility (RHCF) and hospice units of service, will be multiplied by the applicable Medicaid inpatient rates in effect for January 1 of the distribution year.

   Medicaid inpatient rates for acute and psychiatric services will be the statewide base price adjusted for hospital-specific factors including an average case mix adjustment plus all rate add-ons except the public goods surcharge. Medicaid inpatient rates for all other inpatient services will be the per diem rate, excluding the public goods surcharge add-on. Units of service for acute care services will be uninsured patient discharges; units of service for all other inpatient services will be uninsured patient days, not including alternate level of care (ALC) days.

2. **Outpatient Uncompensated Care.** Outpatient units of service for those uninsured (self-pay and charity) patients reported in Exhibit 33 of the ICR for the calendar year two years prior to the distribution year, excluding referred ambulatory services and home health units of service, will be multiplied by the average paid Medicaid outpatient rates that reflect the exclusive utilization of the ambulatory patient groups (APG) rate-setting methodology; however, for those services for which APG rates are not available the applicable Medicaid rate in effect for January 1 of the distribution year will be utilized. The outpatient rates used are exclusive of the public goods surcharge.

   Units of service for ambulatory surgery services will be uninsured procedures, not including those which result in inpatient admissions; units of service for all other outpatient services will be uninsured visits, not including those which result in inpatient admissions.
3. **Adjusted Inpatient Uncompensated Care.** The inpatient uncompensated care will be summed and adjusted by an inpatient statewide cost adjustment factor calculated as the statewide aggregate sum of the inpatient uninsured units multiplied by the step-down cost per unit for each applicable inpatient service, excluding hospital-based RHCF and hospice services, divided by the statewide aggregate sum of the inpatient uncompensated care.

Allowable step-down costs include the direct and indirect costs from the ICR for the calendar year two years prior to the distribution year. The direct costs are reported for each of the hospital's inpatient service areas on Exhibit 11, and adjusted for reclasses, adjustments to expenses, and post step-down adjustments as reported on Exhibits 12, 14, and 15 respectively. Indirect routine and ancillary costs for each inpatient service area are allocated to such based on the cost allocation statistics reported on Exhibits 19 and 20 of the ICR. The resulting direct and indirect allowable step-down costs are adjusted for transfers and converted to a per unit amount for each inpatient service, excluding hospital-based residential health care facility (RHCF) and hospice services, by dividing such costs by the total units for the service as reported in Exhibit 32 of the ICR for the calendar year two years prior to the distribution year.

4. **Adjusted Outpatient Uncompensated Care.** The outpatient uncompensated care will be summed and adjusted by an outpatient statewide cost adjustment factor calculated as the statewide aggregate sum of the outpatient uninsured units of service multiplied by the step-down cost per unit for each applicable outpatient service, excluding referred ambulatory and home health services, divided by the statewide aggregate sum of the outpatient uncompensated care.

Allowable step-down costs include the direct and indirect costs from the ICR for the calendar year two years prior to the distribution year. The direct costs are reported for each of the hospital's outpatient service areas on Exhibit 11, and adjusted for reclasses, adjustments to expenses, and post step-down adjustments as reported on Exhibits 12, 14, and 15 respectively. Indirect routine and ancillary costs for each outpatient service area are allocated to such based on the cost allocation statistics reported on Exhibits 19 and 20 of the ICR. The resulting direct and indirect allowable step-down costs are adjusted for transfers and converted to a per unit amount for each outpatient service, excluding referred ambulatory and home health services, by dividing such costs by the total units for the service as reported in Exhibit 33 of the ICR for the calendar year two years prior to the distribution year.
5. Total Net Adjusted Uncompensated Care. The adjusted inpatient and outpatient uncompensated care will be summed and reduced by the sum of all uncompensated care collections (cash payments) collected from inpatient and outpatient uninsured patients as reported in Exhibits 32 and 33 of the ICR for the calendar year two years prior to the distribution year to determine total net adjusted uncompensated care.

6. Nominal Need Factor. A nominal need factor will be calculated as the sum of:
   a. 0.40; and
   b. the Medicaid inpatient utilization rate multiplied by 0.60.

The Medicaid inpatient utilization rate will be calculated as the sum of Medicaid fee-for-service and Medicaid managed care discharges divided by the total inpatient discharges for the applicable inpatient services. The inpatient discharges used in this calculation will be from Exhibit 32 of the ICR for the cost reporting year two years prior to the distribution year.

7. Uncompensated Care Nominal Need. The total net adjusted uncompensated care will be multiplied by the nominal need factor to determine uncompensated care nominal need used to proportionally allocate the available indigent care pool funding described in paragraph (b) of the following Indigent Care Pool section.
(b) Indigent Care Pool. Indigent care pool distributions will be made to eligible hospitals in the following amounts, which will be paid in twelve, approximately equal lump sum, monthly installments:

1. **Major Government General Hospital Pool Distributions.** $139.4 million, less the amount allocated pursuant to the Financial Assistance Compliance Pool section in subparagraph (7) below, will be distributed as Medicaid disproportionate share hospital (DSH) payments to major government general hospitals, including the hospitals operated by public benefit corporations, on the basis of each hospital's relative share of uncompensated care nominal need to the aggregate uncompensated care nominal need for all major government general hospitals determined in accordance with the Indigent Care Pool Reform methodology described in paragraph (a) of this section.

   Major government general hospitals are defined as all State-operated general hospitals, all general hospitals operated by the New York City Health and Hospital Corporation, and all other government general hospitals having annual inpatient operating costs in excess of $25 million. Hospitals eligible for distributions from this pool will be all such major government general hospitals which are open for all or part of the distribution year. Hospitals open for a partial year will receive a pro-rated share based on the number of months open.

2. **Voluntary General Hospital Pool Distributions.** $994.9 million, less the amount allocated pursuant to the Financial Assistance Compliance Pool section in subparagraph (7) below, will be distributed as Medicaid disproportionate share hospital (DSH) payments to eligible voluntary general hospitals, other than major public general hospitals, on the basis of each hospital's relative share of uncompensated care nominal need to the aggregate uncompensated care nominal need for all eligible voluntary general hospitals as determined in accordance with the Indigent Care Pool Reform methodology described in paragraph (a) of this section.

   Voluntary general hospitals are defined as all voluntary non-profit, private proprietary, and government general hospitals other than major government general hospitals. Hospitals eligible for distributions from this pool will be all such voluntary hospitals which are open for all or part of the distribution year. Hospitals open for a partial year will receive a pro-rated share based on the number of months open.
3. **Transition Pool.** A [six] eight-year transition pool utilizing a floor/ceiling model has been established to help hospitals avoid large funding swings. The transition pool funding will be generated through a redistribution of dollars from those hospitals which experience an increase in distributions using the new Indigent Care Reform Methodology to those that experience a decrease. Transition amounts will be determined based on a comparison of the distributions for the applicable calendar year 2013 through [2018] 2020 to an average of the annual distributions for the three year period January 1, 2010 through December 31, 2012.

A separate transition pool will be established for major government general hospitals and voluntary general hospitals. Individual hospital gains and losses in each pool will be capped by means of the following transition adjustments.

a. **Distribution Amount.** A hospital’s distribution will be determined by means of a comparison between their allocation as calculated in accordance with the Indigent Care Reform Methodology described in section (a)(1) through (a)(7), the Floor Amount in 3(c) below, and the Ceiling Amount in 3(d) below. If the Indigent Care Reform Methodology allocation is:
   i. less than or equal to the Floor Amount, the hospital will receive the Floor Amount.
   ii. greater than or equal to the Ceiling Amount, the hospital will receive the Ceiling Amount.
   iii. greater than the Floor Amount but less than the Ceiling Amount, the hospital will receive the Indigent Care Reform Methodology allocation payment.

b. Separate uniform Floor percentages and uniform Ceiling percentages are calculated for each of the major governmental and voluntary pools.

c. The Floor Amount for each hospital is equal to the average payment received in the three year period between 1/1/10 and 12/31/12 multiplied by the Floor Percentage for its respective pool. The Floor percentage is:
   i. 97.5% for 2013
   ii. 95.0% for 2014
   iii. 92.5% for 2015
   iv. 90.0% for 2016
   v. 87.5% for 2017
   vi. 85.0% for 2018
   vii. 82.5% for 2019
   viii. 80.0% for 2020

d. The Ceiling Amount for each hospital is equal to the average payment received in the three year period between 1/1/10 and 12/31/12 multiplied by the Ceiling Percentage for its respective pool. The ceiling percentage is calculated using an iterative process to obtain the unique percentage value such that:
   i. The total payments to all providers in each pool equals the amount of the respective pool in subdivision (b)(1) or (b)(2) and
   ii. The individual hospital payments will comply with the requirements described in paragraphs 3(a) through (c) above

e. For 2014 through [2018] 2020, these amounts will be further adjusted to carve out amounts used to fund the Financial Assistance Compliance Pool payments in paragraph 6.

**TN #19-0001**    Approval Date _May 2, 2019_    
**Supersedes TN #16-0001**    Effective Date _January 1, 2019_

### Statewide Totals

|               | $139,400,000 | $139,400,000 | $132,430,000 | $153,200,600 | $139,400,000 | $3,200,000 | $136,200,000 |

#### (1) Tentative Transition Period Payment:

- (a) Hospital name
- (b) The unadjusted amount that would otherwise be paid to each hospital under the new DSH pool allocation methodology beginning 1/1/2013
- (c) The actual average amount paid to each hospital under the prior DSH pool allocation methodology in CYs 2010 - 2012
- (d) The amount for each hospital in (c) multiplied by the Floor Percentage in (i)
- (e) The amount for each hospital in (c) multiplied by the Ceiling Percentage in (ii)
- (f) For each individual hospital, if the Indigent Care Pool Actual Transition Period Payment is:
  1. < the Floor Amount, the Transition Period Payment is the Floor Amount
  2. > the Ceiling Amount, the Transition Period Payment is the Ceiling Amount
  3. Otherwise it is the amount in (b) calculated using the new DSH pool allocation methodology effective 1/1/2013.

#### (2) Percentages:

- (i) The Floor Percentage equals 97.5% in 2013, 95.0% in 2014, and 92.5% in 2015
- (ii) A unique Ceiling Percentage is calculated using an iterative set of calculations where both:
  1. the total transition payments equal the respective pool amounts, and
  2. all the constraints in (f) are respected

#### (3) Financial Assistance Compliance Pool Carve-out for 2014 & 2015:

The carve out will be calculated by using each hospital's share of the $139.4M allocation and applying that percentage to the $3.2M in compliance pool funds.

#### (4) This same process would apply to the Voluntary Allocations of $994.9M
4. **Voluntary UPL Payment Reductions.** The distributions in this section will be reduced by the final payment amounts paid to the eligible voluntary general hospitals, excluding government general hospitals, made in accordance with the Voluntary Supplemental Inpatient Payments section.

5. **DSH Payment Limits.** The distributions in this section are subject to the provisions of the Disproportionate share limitations section.

6. **Financial Assistance Compliance Pool.** For calendar year 2014 through [2018] 2020, an amount equivalent to one percent of total DSH funds will be segregated into the Financial Assistance Compliance Pool (FACP) and allocated to all hospitals which prior to December 31, 2015 demonstrate substantial compliance with §2807-k(5-d)(b)(iv) of the Public Health Law (New York State Financial Aid Law) as in effect on January 1, 2013. There will be separate pool amounts for major governmental and voluntary hospitals.

The DSH funds in the FACP will be proportionately allocated to all compliant hospitals using the Indigent Care Reform Methodology described in subparagraph (3)(a) of this section. Compliance will be on a pass/fail basis. When a hospital is deemed compliant, one hundred percent of its share of the FACP funds will be released; there will be no partial payment for partial compliance. Any unallocated funds resulting from hospitals being non-compliant will be proportionally reallocated to compliant hospitals in each respective group based on their relative share of the distributions calculated in subparagraph (3)(a).
Additional disproportionate share payments.

Beginning April 10, 1997 and for annual periods beginning April 1, 1998 through December 31, 2011, additional disproportionate share payments shall be paid to voluntary non-profit general hospitals. Such payments shall be limited to each such general hospital’s cost of providing services to uninsured and Medicaid patients after taking into consideration all other medical assistance payments received, including disproportionate share hospital (DSH) payments made to such general hospitals and payments from and on behalf of such uninsured patients with the limitations based initially on reported data from the base year two years prior to the payment year and further reconciled to actual reported data from such payment year and shall also not exceed the amount of state aid for which the hospital or its successor would have been eligible pursuant to the Funding for Substance Abuse Services and the Local Unified Services Sections of the Mental Hygiene Law (as described below) for fiscal year 1996-97, the Base Year. Such additional disproportionate share payments will be calculated by aggregating net approved operating costs for such mental health and/or alcoholism or substance abuse programs in each hospital. Net operating costs are defined as operating costs offset by revenues, other income, federal aid and fees. The payments may be made as quarterly aggregate payments to an eligible hospital.

Such payments shall not exceed the limit specified on the Disproportionate Share limitations section of this attachment.

[Payments beginning April 1, 1998 and thereafter will be related to the hospital’s willingness to continue to provide services previously funded by state aid grants. The Commissioners of the Office of Mental Health (OMH) and the Office of Alcoholism and Substance Abuse Services (OASAS), in consultation with county directors of community services, will annually designate to the Department of Health those general hospitals eligible for the additional disproportionate share payment, and the amount thereof. If a hospital does not continue to provide substantially the same level of program and/or services as in the Base Year, the local governmental unit can recommend to the Commissioner of OMH and/or the Commissioner of OASAS that the provider not be designated to receive disproportionate share payments for mental health and/or substance abuse and alcoholism services in the future. In addition, if a hospital reduces its deficit from that of the Base Year, either as a result of increased program revenues, or as a result of program or service cutbacks, or as a result of lower costs, the local governmental unit can recommend to OMH and/or OASAS that the additional disproportionate share payment be reduced commensurate with the decrease in the deficit.

Services funded under the Local and Unified Services Section of the Mental Hygiene Law include mental health services. Alcoholism services funded under the Local and Unified Services section of the Mental Hygiene Law include health and alcoholism treatment services. Substance abuse services funded under Funding for Substance Abuse Services Section of the Mental Hygiene Law include health and substance abuse services.]

Payments to voluntary general hospitals providing mental health services for the period April 1, 2010 – December 31, 2010 and January 1, 2011 – December 31, 2011. The payment amounts apply consistently to voluntary general hospitals providing mental health services, and are reasonably related to costs, and are pursuant to the following schedule:

Approval Date: September 29, 2011
Effective Date: April 1, 2010
Reimbursement for language assistance services in hospital inpatient settings:

Effective for hospital inpatient services provided on and after September 1, 2012, a Medicaid rate of payment for language interpretation services provided to patients with limited English proficiency (LEP) and communication services provided for patients who are deaf and hard of hearing will be established as follows:

(1) Payment will be established on a per unit basis, with the unit of payment based on the number of minutes of language assistance services provided.

(2) A maximum of two billable units of language assistance services will be allowable per patient per day with the billable units defined as follows:

i) 1st billable unit – for encounters providing one to 22 minutes of language assistance service.

ii) 2nd billable unit – for encounters providing additional minutes (23+) beyond the initial 22 minutes of language assistance services during the given patient day.

(3) The rate of payment will be established at $11.00 per unit of language assistance services, with a maximum payment per inpatient day of care of $22.00. Such payment will be available on an “as provided only” basis via a separate and discretely billed rate, and will supplement the applicable DRG or exempt unit per diem payment for the given inpatient stay to account for the additional costs of inpatient services involving language assistance services.

(4) To be reimbursable, the language assistance services must be provided by an independent third party, a dedicated hospital employee or a third party vendor (e.g., telephonic interpretation service) whose sole function is to provide interpretation services for individuals with LEP and communication services for patients who are deaf and hard of hearing.

METHODS AND STANDARDS OF SETTING PAYMENT RATES FOR INPATIENT SERVICES PROVIDED BY HOSPITALS OPERATED BY THE NEW YORK STATE OFFICE OF MENTAL HEALTH

In accordance with the Mental Hygiene Law, the office of Mental Health (OMH) establishes Medicaid inpatient rates of reimbursement, subject to the approval of the Director of the State Division of the Budget, for the psychiatric hospitals it operates. Statewide average payment rates shall be established for each of the rate categories outlined below under section I. The rates shall be established on a prospective basis in advance of the payment year.

I. [GENERAL] RATE CATEGORIES
   [A separate rate is established for each of the following categories:]

   [1] A. Adult Services
   This rate category includes all inpatient units located at OMH Medicare and Medicaid certified Psychiatric Centers with the exception of Forensic Psychiatric Centers and discrete specialized unit for children and youth for which separate rate categories are established.

   [2] B. Children’s Services
   This rate category applies to those separate and distinct Children’s Units operated by the OMH. The Children’s Units provide psychiatric care and treatment exclusively to children and/or adolescents. These Children’s Units are located both within OMH Medicare and Medicaid certified psychiatric centers as well as in separately accredited Children’s Psychiatric Centers certified only under the Medicaid Program.

   This rate category applies to those separate and distinct inpatient facilities that provide services to clients involved with the criminal justice system. These facilities provide a highly secure treatment environment for patients who are too dangerous to be treated in State civil psychiatric centers.

   [Medicaid inpatient rates for each category are established prospectively on a statewide basis by averaging together each of the per diem rate components outlined below for all Medicaid certified facilities.]

II. BASE YEAR [OPERATING] PER DIEM
   [The operating per diem of the inpatient Medicaid rates is developed by averaging together the following:] Allowable base year costs shall be determined as follows:

TN #05-51 Approval Date June 1, 2006
Supersedes TN #00-22 Effective Date July 1, 2005
A. [For] Medicare Certified Psychiatric Centers (including Forensic Psychiatric Centers)
   [the Medicare (Title XVIII) per diem payment rates resulting from the final settlement of OMHs Medicare cost reports covering the fiscal year ended March 31, 1998.]
   1. Inpatient routine and ancillary per diem cost shall be obtained from the Medicare final settled cost reports for the fiscal year ended March 31, 2002. Medicare final settlements are issued by OMH's Medicare Fiscal Intermediary following their review and audit of the Medicare cost reports submitted by OMH for each of the Medicare participating providers it operates. [For purposes of Medicare reimbursement OMH Psychiatric Hospitals are treated as PPS exempt providers with payment rates developed in accordance with 42 CFR section 413.40.]
   2. Allowable inpatient cost shall be inclusive of capital cost and shall be determined without consideration of the Medicare facility-specific target rate limits or the Medicare national 75th percentile caps under 42 CFR § 413.40.
   3. Allowable cost shall include the professional services of hospital-based physicians. The allowable cost of physicians services shall be determined subject to the Medicare reasonable compensation equivalent (RCE) limits under 42 CFR § 415.70. For purposes of applying this limitation the most recently issued RCE limits shall be trended to the applicable rate year based upon the increase in the Consumer Price Index for All Urban Consumers (CPI-U).

B. [For] Children’s Psychiatric Centers
   Since the Children’s Psychiatric Centers are not Medicare participating providers Medicare final settlements are not processed for these providers. As such, the [base inpatient per diem] allowable inpatient cost for these facilities shall be determined [based on their average inpatient cost per day for the base year. The base year to be utilized shall be the same fiscal year as that used for the Medicare participating psychiatric centers as outlined under paragraph II.A. above.
   The inpatient cost per day for the Children’s Psychiatric Centers shall be determined] in accordance with the cost reporting and cost-finding methods developed by the Hospital industry as adopted by the Medicare (Title XVIII) and Medicaid (Title XIX) Programs. In determining those items of cost that shall be determined to be allowable, Medicaid (Title XIX) laws, rules and regulations shall be applied in accordance with paragraph III.A. below.
[C. Exclusion of Capital Cost]

In developing the statewide average base year operating per diem for each rate category, capital costs shall be eliminated from the amounts included in the per diems described above under the paragraphs II.A. and II.B. For purposes of this section capital costs shall be determined in accordance with the Medicare (Title XVIII) principles of reimbursement and accordingly will include depreciation on capital assets and interest expense on indebtedness incurred to construct or purchase capital assets.]

III. ADJUSTMENTS FOR MEDICAID PURPOSES

In determining the allowable base year operating per diem outlined under paragraph II above adjustments shall be made to reflect the following:

A. Differences in Medicare vs. Medicaid Covered Services

The final Medicare inpatient payment rates as referenced under paragraph II.A. above shall be adjusted to exclude the costs of any services included therein which have been determined to be non-reimbursable under the Medicaid Program [(i.e. patient education programs).] In addition the costs associated with any services covered under New York State’s Medicaid Program but not reimbursable under the Medicare program (e.g. dental services) shall be added [to the final Medicare payment rates] to determine Medicaid allowable costs.

B. Other Allowable Costs

The base year per diem operating component developed in accordance with paragraph II above shall be adjusted to include other costs allowed under the Medicare principles of reimbursement but not claimed in the individual facility Medicare cost reports for the base year as referenced under paragraph II. A. above. This adjustment shall include costs related to services which have historically been included in the calculation of the OMH statewide inpatient Medicaid payment rates and found to be reimbursable by the Health Care Financing Administration.]

IV. TREND FACTOR

A trend factor shall be utilized in order to project the base year operating per diems as developed under paragraph II above to the applicable rate year. This trend factor will be developed by compounding the applicable increases in the Medicare RPL (rehabilitation, psychiatric and long-term care) market basket index(es for each year] between the base year and the rate year. In calculating the current year’s rates the OMH shall utilize estimates in instances where the actual increase in the RPL market basket has
not yet been determined for any particular years between the base year and the rate year. Once the actual increases in the RPL have been determined the OMH will include an adjustment in the subsequent year's rate to compensate for any difference between the estimated and actual increases in the RPL market basket. For purposes of this section the Medicare RPL market basket index is that published by the Federal [Health Care Financing Administration (HCFA)] Centers for Medicare and Medicaid Services (CMS) [pursuant to 42 CFR section 413.40 for hospitals and units of hospitals which are exempt from the Medicare Inpatient Prospective Payment System (PPS)] for determining Medicare reimbursement to psychiatric hospitals under the inpatient psychiatric facilities prospective payment system (IPFs PPS).

V. ACCREDITATION ADJUSTMENT

A per diem adjustment shall be incorporated in the inpatient Medicaid rates for OMH facilities to account for additional costs incurred subsequent to the base year used to develop the operating per diem pursuant to paragraph II above in order to meet minimum Medicaid and Medicare facility accreditation requirements. In addition, this adjustment may include additional accreditation costs expected to be incurred during the year for which the payment rates are being computed. For purposes of determining expected accreditation costs to be incurred during the rate year the Governor's Executive Budget submission to the legislature shall be utilized.

[VI. CAPITAL-RELATED COSTS

The inpatient Medicaid payment rates for OMH facilities shall include an allowance for depreciation and interest expenses on buildings and equipment. Depreciation expense shall be computed utilizing the straight line method. Useful lives of depreciable assets shall be applied based upon the guidelines promulgated by the American Hospital Association.

The capital component of the rates shall be computed on a current basis. Accordingly the rates will reflect a projection of capital costs and patient days applicable to the rate year. A per diem adjustment shall be included in subsequent years rates to reflect any differences between projected and actual costs and patient days used in the calculation of the rate year capital per diem.]

VII. VOLUME ADJUSTMENT

A per diem adjustment will be incorporated in the inpatient Medicaid rates for OMH facilities to account for
significant changes in costs due to significant changes in the number of patient days. The adjustment will be made only if the change in total inpatient days between the base year and the rate year exceeds two percent (2%). In calculating the rate adjustment, it will be recognized that all the facility’s capital costs are fixed. Operating costs will be considered eighty percent (80%) fixed and twenty percent (20%) variable. Under this formula if days increase more than two percent (2%), the rate for the applicable rate category will be reduced to allow only twenty percent (20%) of the operating per diem for the additional days. Alternatively, if days decrease over two percent (2%), the rate for the applicable rate category will be increased to allow eighty percent (80%) of the operating per diem for the lost days to be spread over the actual days for the rate period.

An estimated volume adjustment will be calculated and included in the rate calculation. The estimated volume adjustment will be calculated based upon the projected patient days for the upcoming rate year vs. the actual patient days for the base year used to calculate the rates. Following the close of the rate year a comparison would be made between the projected days used in calculating the estimated volume adjustment and the actual days incurred for the rate year. The volume adjustment will then be recalculated to reflect the actual days for the rate year. The difference, in any, between the estimated volume adjustment and the final actual volume adjustment will be included as a retroactive adjustment in the rate for the following year.

VIII. REDUCED PAYMENT FOR INAPPROPRIATE LEVEL OF CARE

If it is determined by a utilization review committee that a Medicaid recipient no longer requires psychiatric hospital services but must remain in the hospital because a medically necessary skilled nursing facility or intermediate care facility bed is not available in the community (“alternate care day”) and it is determined that the statewide rate of occupancy
of operational beds at OMH hospitals is less than 80%, the hospital will be reimbursed at the average Medicaid skilled nursing facility or intermediate care facility rate within the State, as appropriate. Operational beds are defined as the projected census for the upcoming year for the Office of Mental Health psychiatric hospital system as derived from the Executive Budget. In determining whether the statewide occupancy rates meets the 80% requirement, for purposes of determining the applicable reimbursement rate, alternate care days will not be counted as occupied beds.
IX. **DISPROPORTIONATE SHARE ADJUSTMENT**

The Medicaid payment rates for OMH facilities will be adjusted in accordance with Sections 1902 (a)(13)(A) and 1923 of the Social Security Act to account for the situation of OMH facilities which serve a disproportionate number of low income patients with special needs. The adjustment will be made if either the Medicaid inpatient utilization rate for OMH hospitals is at least one standard deviation above the mean Medicaid inpatient utilization rate for hospitals receiving Medicaid payments in the State or if the low income utilization rate for OMH hospitals exceeds 25 percent.

The Medicaid inpatient utilization rate is defined as the total number of Medicaid inpatient days in a cost reporting period divided by the total number of hospitals inpatient days in that same period.

The low income utilization rate is defined as the sum (expressed as a percentage) of the fraction calculated as follows:

- Total Medicaid patient revenues paid to the hospital, plus the amount of cash subsidies received directly from State and local governments for the latest available cost reporting period, divided by the total amount of revenues of the hospital for patient services (including the amount of such cash subsidies) in the same cost reporting period; and
- The total amount of the hospital’s charge for inpatient hospital services attributable to charity care (care provided to individuals who have no source of payment, third-party or personal resources) in a cost reporting period less the portion of cash subsidies reasonably attributable to inpatient hospital services, divided by the total amount of the hospital’s charges for inpatient service in the hospital in the same period. The total inpatient charges attributed to charity care shall not include contractual allowances and discounts (other than for indigent patients not eligible for Medical assistance under an approved Medicaid State plan) that is, reductions in charges given to other third-party payers, such as HMO’s, Medicare and Blue Cross.
Those OMH hospitals that qualify as a disproportionate share hospital will receive a payment adjustment to [fully] reimburse the hospital for the unreimbursed costs incurred in providing services to individuals who are either eligible for medical assistance or who have no health insurance or other source of third party coverage for the services provided. The OMH hospitals, in aggregate, will be paid DSH equal to 100% of the federal mental health facility DSH allotment.

For OMH hospitals, the State Plan rate year shall be defined as running from April 1 of a calendar year through March 31 of the subsequent calendar year. The four-digit State Plan rate year will be the year that contains the end date of period. For example, State Plan rate year 2011 will be the period from April 1, 2010 through March 31, 2011.

Due to State’s reliance on Section 1923(e) of the Social Security Act, OMH hospitals will be deemed disproportionate share hospitals without regard to the requirements of Section 1923(d)(1) of the Social Security Act.

X. DISPROPORTIONATE SHARE LIMITATIONS

Effective April 1, 1994, and thereafter, for OMH facilities, disproportionate share payment distributions made pursuant to this Part of this Attachment shall be limited in accordance with the provisions of this section.

Effective April 1, 1994, OMH facilities whose inpatient Medicaid eligible patient days are less than one percent of total inpatient days shall not be eligible to receive disproportionate share distributions.

[Effective for the state fiscal year beginning April 1, 1994, disproportionate share payments to OMH facilities with inpatient Medicaid eligible patient days, as a percentage of total inpatient days, of at least one standard deviation above the statewide mean Medicaid patient day percentage shall be increased to 200 percent of the disproportionate share limit determined in accordance with this section. This increase shall be contingent upon acceptance by the Secretary of the federal Department of Health and Human Services of the Governor’s certification that the hospital’s applicable minimum amount is used for health services during the year. Federal funds associated with payments to OMH facilities in excess of 100 percent of unreimbursed costs shall not be distributed unless OMH submits to the Commissioner a written certification stating that all distributions in excess of the 100 percent limit will be used for health services.]
No OMH facility shall receive in total from disproportionate share payment distributions an amount which exceeds the costs incurred for furnishing inpatient and ambulatory hospital services to individuals who are eligible for Medicaid benefits pursuant to Title XIX of the federal Social Security Act or to individuals who have no health insurance or other source of third party coverage, reduced by medical assistance payments made pursuant to Title XIX of the federal Social Security Act, other than disproportionate share payments, and payments by uninsured patients. For purposes of this section, payments to OMH facilities for services provided to indigent patients made by the State or a unit of local government within the State shall not be considered a source of third party payment.

[For purposes of calculating disproportionate share (DSH) distributions pursuant to this section, if the hospital receiving the distribution is a public hospital (operated by the State, a city, county or other municipal subdivision), then the payments determined hereunder are further limited. Unless the hospital qualifies as a “high DSH” facility (as defined below), payments made during a distribution period shall not exceed the cost incurred by the hospital for furnishing hospital services to Medicaid recipients less non-DSH reimbursement and to uninsured patients less patient payments. In the case of a hospital defined as “high DSH”, payments made during a distribution period shall equal 200 percent of the amount described in the previous sentence. To be considered a “high DSH” facility, a hospital must have a Medicaid inpatient utilization rate of at least one standard deviation above the mean Medicaid inpatient utilization rate for hospital receiving Medicaid payments in the State, or have the largest number of Medicaid inpatient days of any hospital in the State in the previous distribution period.]
Previous years' data for both uninsured and Medicaid cost and payments shall be used to estimate the limitation. A cost determination of both the uninsured and the Medicaid inpatient cost shall be made upon receipt of an appropriate report.

Facility specific limitations will be estimated before the beginning of each fiscal year. The estimate will be based on the most recently available actual cost and revenue information as adjusted for expected changes in cost and revenue. These estimated facility-specific limitations will be recalculated to reflect actual information after the year has been completed and the necessary information has been compiled. Once the actual limitations for the year are known, adjustments will be made as necessary to the disproportionate share amounts paid to the facility. If it is determined that disproportionate share payments to a particular facility exceeded the facility-specific calculation, a recoupment will be made. Alternatively, if it is determined that additional disproportionate share payments are due the facility, such additional payments will be made.

If it is determined that disproportionate share payments to a particular OMH facility exceeded the facility-specific calculation, such excess amounts will be recouped and reallocated to OMH facilities proportionally based on each facility's remaining unreimbursed Medicaid and uninsured costs. If after such reallocation there remain additional unallocated amounts, such amounts will be allocated to governmental facilities, other than those operated by the State of New York or the State University of New York, located in a city with a population of over one million, whose disproportionate share payments were less than their respective facility-specific calculations, in accordance with the Disproportionate Share Limitations section of this Attachment. Such payments will be made to each such individual hospital based on the relative share of each hospital's actual medical assistance and uninsured patient costs for that DSH state plan rate year (SPRY). The federal share of any remaining unallocated excess amounts above shall be promptly refunded to the federal government.

For any federal mental health facility DSH allotment that remains unused by OMH, the excess reallocated to those other non-state governmental facilities will occur in the same four-digit State Plan rate year.

**XI. TRANSFER OF OWNERSHIP**

In establishing an appropriate allowance for depreciation and for interest on capital indebtedness and (if applicable) a return on equity capital with respect to an asset of a hospital which has undergone a change of ownership, the valuation of the asset after such change of ownership shall be the lesser of the allowable acquisition cost of such asset to the owner of record as of July 18, 1984 (or, in the case of an asset not in existence as of such date, the first owner of record of the asset after such date), or the acquisition cost of such asset to the new owner.
[XI. Additional Disproportionate Share Payment

The State’s methodology used to take into account the situation of disproportionate share hospitals also includes additional payments to meet the needs of those facilities which serve a large number of Medicaid eligible, low income and uninsured patients, including those eligible for Home Relief, who other providers view as financially undesirable. These payments are available to hospitals on behalf of certain low-income persons who are described below and are made in addition to, and not as a substitute for, the disproportionate share adjustment described in section IX. However, the calculations of hospitals’ bad debt and charity care costs which are partially covered by the disproportionate share adjustment described in section IX, does not include costs of services to any person for whom an additional disproportionate share payment has been made under this section.

These additional payment adjustments are made either by the Department or through an intermediary to disproportionate share hospitals which have provided services to persons determined to be low-income by reason of their having met the income and resource standards for the State’s Home Relief program (except for their current residential status). These persons must have demonstrated to a local social services district or the Department that their household income and resources do not exceed the income and resources standard established by the Department, which standards vary by household size and take into account the household’s regularly recurring monthly needs, shelter, fuel for heating, home energy needs, supplemental home energy needs and other relevant factors affecting household needs.

Each hospital, or an intermediary making a payment to a hospital, will determine which patients qualify as low-income persons eligible for additional payments by a verifiable process subject to the above eligibility conditions. Each hospital must maintain documentation of the patient’s eligibility for additional payments and must document the amounts claimed for additional payments. The supporting documentation must include written verification from a local social services district or the Department attesting to the person’s eligibility for Home Relief. Such supporting documentation may be in the form of a photocopy of the person’s current valid official benefits card or a copy of an eligibility verification confirmation received from the Department’s Electronic Medicaid Eligibility Verification System (EMEVES), which system includes information with respect to persons eligible for Home Relief and additional payments, or other verifiable documentation acceptable to the Department which establishes that the person has met the income and resource standards for Home Relief on the date the services were provided.]
[A “disproportionate share hospital” for purposes of receiving additional disproportionate share payments under this provision is any hospital which furnishes medical or remedial care to a qualified low income person without expectation of payment from the person due to the patient’s inability to pay as documented by his or her having met the income and resource standards for Home Relief benefits as set forth above, and meets the requirements of State Plan Amendment 94-26. In addition, a “disproportionate share hospital” (except hospitals serving an in-patient population predominantly comprised of persons under 18 years of age and hospitals which did not offer non-emergency obstetrical care on or before December 21, 1987) must have at least two obstetricians with staff privileges who have agreed to provide obstetrical care and services to Medicaid eligible patients on a non-emergency basis.

The amount of this disproportionate share adjustment will vary by hospital and reflect the dollar amount of payments either from the State directly, or through an intermediary, to the hospital for services provided to low income patients. For each hospital such adjustments shall be paid in the normal Medicaid payment process, or intermediary payment process; and according to established rates or fees, for fee-for-service program services or by the intermediary for its services. To receive payment of this adjustment each hospital must submit a claim in the form and manner specified by this Department, or the intermediary, as appropriate.

Disproportionate share payments under this plan cannot exceed the State disproportionate share allotment calculated in accordance with the provision of the Medicaid Voluntary Contribution and Provider Specific Tax Amendments of 1991 (P.L. 102-234), as set forth at 42 CFR Sections 447.296 through 447.299, and cannot exceed the facility specific disproportionate share payment limits required by the Omnibus Budget Reconciliation Act of 1993.]
METHODS AND STANDARDS OF SETTING PAYMENT RATES FOR HOSPITALS LICENSED BY THE
OFFICE OF MENTAL HEALTH

In accordance with the New York State Mental Hygiene Law, the State's Office of Mental
Health establishes Medicaid rates of reimbursement for hospitals issued operating certificates by
the Office of Mental Health. The class of facilities defined as hospitals includes the subclass of
Residential Treatment Facilities for Children and Youth ("RTFs") which furnish inpatient
psychiatric services for individuals under age 21 in psychiatric facilities or programs. Medicaid
rates established by the Office of Mental Health must be certified by the Commissioner and
approved by the Director of the Budget. The Methods and Standards set forth below do not
apply to hospitals operated by the Office of Mental Health or to hospitals licensed by the
Department of Mental Health.

A. HOSPITALS OTHER THAN RESIDENTIAL TREATMENT
   FACILITIES FOR CHILDREN AND YOUTH

1. OPERATING COSTS

Medicaid rates are established prospectively and are all inclusive, taking into account all
allowable patient days and all allowable costs and are effective for a twelve month period.
Payment rates for a rate year are based on base year financial and statistical reports submitted
by hospitals to the Office of Mental Health. The base year is the fiscal year two years prior to
the rate year. The financial and statistical reports are subject to audit by the Office of Mental
Health.

Allowable base year operating costs are determined by the application of the principles
developed for determining reasonable cost payments under the Medicare program. To be
allowable, costs must be reasonable and must relate to patient care. Allowable costs may not
include costs for services which have not been approved by the Commissioner.

Hospitals which have no previous costs or operating experience will submit a budget
report as the basis for calculating a prospective Medicaid rate. The budget report will contain
all proposed revenues and expenses for the period under consideration. The operating cost
component of the rate will be the lower of the calculated per diem, utilizing the approved
budgeted operating costs and the approved budgeted patient days, or 110% of the statewide
weighted average of the operating cost component of all private psychiatric hospitals. The
hospital is required to submit a cost report after it has operated for six months at a minimum
occupancy level of at least 75%. This cost report will be used to set a cost based rate for the
hospital effective the first day of the cost report period.

TN #92-15
Supersedes TN #91-15

Approval Date June 29, 1992
Effective Date May 28, 1992
In determining allowable operating costs for any base year there is applied a limitation, which is derived from the fiscal year one year prior to the base year, increased by the Medicare inflation factor for hospitals and units excluded from the prospective payment system. Both the base year and the limitation are subject to an administration cost screen. The administration cost screen is derived from the costs in the fiscal year one year prior to the base year (i.e. the same cost year the limitation is derived from), and is the group average cost plus ten percent. Separate administration cost screens are calculated for hospitals greater than 100 beds (group one), and hospitals less than 100 beds (group two). The allowable costs are the lesser of the base year operating costs or the limitation. The allowable operating costs are then increased for inflation to the rate year by the Medicare inflation factor described above, except that the 1996 Medicaid rates will not include an inflation factor for 1996 effective July 1, 1996, and the 2010 Medicaid rates will not include an inflation factor for 2010 effective January 1, 2010, and the 2014 Medicaid rates will not include an inflation factor for 2014 effective January 1, 2014. Such inflation factor shall be as determined by the Federal Government each year prior to the effective date of the payment rates calculated herein.

Rates of payment in effect on December 31, 2011, will continue in effect for the periods January 1, 2012 through December 31, 2012, and January 1, 2013 through December 31, 2013.

Appeals from rate determinations are heard by the Commissioner. The Commissioner may hear requests for rate revisions which are based on errors in the calculation of the rate or in the data submitted by the facility or based on significant changes in operating costs resulting from changes in services, programs or capital projects approved by the Commissioner in connection with OMH’s certificate of need procedures. Revised rates must be certified by the Commissioner and approved by the Director of the Budget.

[1]2. CAPITAL COSTS

Allowable capital cost will be added to allowable operating costs. Allowable capital costs are determined by the application of the principles developed for determining reasonable cost payments under the Medicare program. Allowable capital costs include an allowance for depreciation and interest. To be allowable, capital expenditures subject to the Office of Mental Health’s certificate of need procedures must be reviewed and approved by the Office of Mental Health.

The allowed capital cost component of the budget based rate will be based upon approved annual budgeted costs and approved budgeted patient days retroactively adjusted to actual certified costs divided by the higher of the actual patient days or the approved budgeted patient days.

Transfer of Ownership

In establishing an appropriate allowance for depreciation and for interest on capital indebtedness with respect to an asset of a hospital which has undergone a change of ownership, that the valuation of the asset after such change of ownership shall be the lesser of the allowable acquisition cost of such asset to the owner of record as of July 18, 1984 (or, in the case of an asset not in existence as of such date, the first owner of record of the asset after such date), or the acquisition cost of such asset to the new owner.

TN #14-0014 Approval Date March 16, 2015
Supersedes TN #12-0027 Effective Date January 1, 2014
3. **REDUCED PAYMENT FOR INAPPROPRIATE LEVEL OF CARE**

   If it is determined by a utilization review committee that a Medicaid recipient no longer requires inpatient psychiatric hospital services but must remain in the hospital because a medically necessary long term care bed is not available in the community ("alternate care determination"), and it is determined by the Commissioner that there is a significant excess of operational beds at the hospital or in private psychiatric hospitals located in the OMH region in which the hospital is located, the hospital will be reimbursed at a rate equal to the average Medicaid skilled nursing facility or intermediate care facility rate within the State, as appropriate, at the time such services were furnished. For purposes of this paragraph, a significant excess of operational beds exists if the occupancy rate for the hospital for the most recently reported twelve month period is less than 80%, of the hospitals bed capacity, as stated on the operating certificate issued by the Office of Mental Health. A significant excess of operational beds exists in the OMH region if the overall occupancy rate for private psychiatric hospitals in the region is less than 80%. Alternate care days are counted as occupied beds. Effective October 1, 1984, occupancy rates will be determined without including alternate care days.

   Alternate care determinations must be reported to the Office of Mental Health ("OMH") on such forms and in such manner as shall be prescribed by OMH. OMH will notify providers of procedures for collecting and reporting data.
[4. Additional Disproportionate Share Payment]

The State's methodology used to take into account the situation of disproportionate share hospitals also includes additional payments to meet the needs of those facilities which serve a large number of Medicaid eligible, low income and uninsured patients, including those eligible for Home Relief, who other providers view as financially undesirable. These payments are available to hospitals on behalf of certain low-income persons who are described below.

These additional payment adjustments are made either by the Department or through an intermediary to disproportionate share hospitals which have provided services to persons determined to be low-income by reason of their having met the income and resource standards for the State's Home Relief program. These persons must have demonstrated to a local social services district or the Department that their household income and resources do not exceed the income and resources standard established by the Department, which standards vary by household size and take into account the household’s regularly recurring monthly needs, shelter, fuel for heating, home energy needs, supplemental home energy needs and other relevant factors affecting household needs.

Each hospital, or an intermediary making a payment to the hospital, will determine which patients qualify as low-income persons eligible for additional payments by a verifiable process subject to the above eligibility conditions. Each hospital must maintain documentation of the patient’s eligibility for additional payments and must document the amounts claimed for additional payments. The supporting documentation must include written verification from a local social services district or the Department attesting to the person’s eligibility for Home Relief. Such supporting documentation may be in the form of a photocopy of the person’s current valid official benefits card or a copy of an eligibility verification confirmation received from the Department's Electronic Medicaid Eligibility Verification System (EMEVSS), which system includes information with respect to persons eligible for Home Relief and additional payments, or other verifiable documentation acceptable to the Department which establishes that the person has met the income and resource standards for Home Relief on the date the services were provided.

Due to State's reliance on Section 1923(e) of the Social Security Act, the reimbursement methodology for hospitals licensed by the Office of Mental Health does not include a disproportionate share adjustment.
[A “disproportionate share hospital” for purposes of receiving additional disproportionate share payments under this provision is any hospital which furnishes medical or remedial care to a qualified low-income person without expectation of payment from the person due to the patient’s inability to pay as documented by his or her having met the income and resource standards for Home Relief benefits as set forth above, and meets the requirements of State Plan Amendment 94-26. In addition, a “disproportionate share hospital” (except hospitals serving an in-patient population predominantly comprised of persons under 18 years of age and hospitals which did not offer non-emergency obstetrical care on or before December 21, 1987) must have at least two obstetricians with staff privileges who have agreed to provide obstetrical care and services to Medicaid-eligible patients on a non-emergency basis.

The amount of this disproportionate share adjustment will vary by hospital and reflect the dollar amount of payments either from the State directly, or through an intermediary, to the hospital for services provided to low income patients. For each hospital such adjustments shall be paid in the normal Medicaid payment process, or intermediary payment process, and according to established rates or fees, for fee-for-service program services or by the intermediary for its services. To receive payment of this adjustment each hospital must submit a claim in the form and manner specified by this department, or the intermediary, as appropriate.

Disproportionate share payments under this plan cannot exceed the State disproportionate share allotment calculated in accordance with the provision of the Medicaid Voluntary Contribution and Provider Specific Tax Amendments of 1991 (P.L. 102-234), as set forth at 42 CFR Sections 447.296 through 447.299, and cannot exceed the facility specific disproportionate share payment limits required by the Omnibus Budget Reconciliation Act of 1993.]
B. RESIDENTIAL TREATMENT FACILITIES FOR CHILDREN AND YOUTH

Medicaid rates for Residential Treatment Facilities for Children and Youth (“RTFs”) are established prospectively, based upon actual costs and patient days as reported on cost reports for the fiscal year two years prior to the rate year. The RTF fiscal year and rate year are for the twelve months July 1 through June 30. Actual patient days are subject to a maximum utilization of 96 percent and a minimum utilization of 93 percent. For the rate years July 1, 1994 through June 30, 1995 and July 1, 1995 through June 30, 1996 the base year for both rate years for the purpose of setting rates will be July 1, 1992 through June 30, 1993.

Effective July 1, 2011 through June 30, 2012, the rate of payment shall be that which was in effect June 30, 2011.

Effective July 1, 2012 through June 30, 2013, the rate of payment shall be that which was in effect June 30, 2011.

Effective [September 1, 2012] July 1, 2015, such rate of payment will be lowered to reflect the removal of pharmaceutical costs, except as provided for in Section 1, below.

1. OPERATING COSTS

Allowable operating costs are subject to the review and approval of the Office of Mental Health, and will exclude eligible pharmaceuticals which will be reimbursed using the Fee-for-Service Program through the Medicaid formulary administered by the New York State Department of Health. The Fee-for-Service Program will be utilized for the purchase of eligible pharmaceuticals commencing on the date the child is determined to be Medicaid eligible. [Notwithstanding this program change, for those children who are deemed eligible for Medicaid subsequent to admission, and the eligibility is retroactive to date of admission, and who have received clinically documented necessary medications during the entire first 90 days of their stay, the pharmacy will bill the Medicaid formulary for the medications provided to the child beginning on day 91 of the stay.] The cost of medications provided to the [Medicaid eligible] child before the determination of Medicaid eligibility [during the first 90 days of stay] will be the responsibility of the RTF, and considered an allowable cost in the development of the provider's reimbursement rate for inpatient stays. In determining the allowability of costs, the Office of Mental Health reviews the categories of cost, described below, with consideration given to the special needs of the patient population to be served by the RTF. The categories of costs include:

(i) Clinical Care. This category of costs includes salaries and fringe benefits for clinical staff.

(ii) Other than Clinical Care. This category of costs includes the costs associated with administration, maintenance and child support.

Allowable per diem operating costs in the category of clinical care are limited to the lesser of the reported costs or the amount derived from the number of clinical staff approved by the Commissioner multiplied by a standard salary and fringe benefit amount. Clinical services such as dental services, purchased on a contractual basis will be considered allowable and not subject to the clinical standard if the services are not uniformly provided by all RTFs and thus not considered by the Commissioner in the establishment of the approved staffing levels.

TN #15-0004 Approval Date November 25, 2015
Supersedes TN #13-0049 Effective Date July 1, 2015
Allowable per diem operating costs in the category of other than clinical care are limited to the lesser of the reported costs or a standard amount.

The standard amounts for the clinical and other than clinical categories are computed as follows. For RTFs located in the New York City metropolitan statistical area and Nassau and Suffolk counties the standard is: the sum of 50[%] percent of the average per diem cost for all RTFs in this geographic area and 50[%] percent of the average per diem cost for all RTFs in the state; increased by seven and one half percent. For RTFs located outside the New York City metropolitan statistical area and Nassau and Suffolk counties the standard is: the sum of 50[%] percent of the average per diem cost for all RTFs located outside the New York City metropolitan statistical area and Nassau and Suffolk Counties and 50[%] percent of the average per diem cost for all RTFs in the state; increased by seven and one half percent.
Allowable operating costs as determined in the preceding paragraphs will be increased annually by the Medicare inflation factor for hospitals and units excluded from the prospective payment system except for the rate periods effective July 1, 1995 through June 30, 1996, July 1, 2009 through June 30, 2010, July 1, 2013 through June 30, 2014 and July 1, 2014 through December 31, 2014, where no inflation factor will be used to trend costs. Effective January 1, 2015, allowable operating costs will be trended by the Medicare inflation factor.

2. CAPITAL COSTS
To allowable operating costs are added allowable capital costs. Allowable capital costs are determined by the application of principles developed for determining reasonable cost payments under the Medicare program. Allowable capital costs include an allowance for depreciation and interest. To be allowable, capital expenditures which are subject to the Office of Mental Health’s certificate of need procedures must be reviewed and approved by the Office of Mental Health.

Transfer of Ownership
In establishing an appropriate allowance for depreciation and for interest on capital indebtedness and (if applicable) a return on equity capital with respect to an asset of a hospital which has undergone a change of ownership, that the valuation of the asset after such change of ownership shall be the lesser of the allowable acquisition cost of such asset to the owner of record as of July 18, 1984 (or, in the case of an asset not in existence as of such date, the first owner of record of the asset after such date), or the acquisition cost of such asset to the new owner.

3. APPEALS
The Commissioner may consider requests for rate revisions which are based on errors in the calculation of the rate or in the data submitted by the facility or based on significant changes in operating costs resulting from changes in service, programs, or capital projects approved by the Commissioner in connection with OMH’s certificate of need procedures. Other rate revisions may be based on additional staffing required to meet accreditation standards of the Joint Commission on Accreditation of Hospitals, or other Federal or State mandated requirements resulting in increased costs. Revised rates must be certified by the Commissioner and approved by the Director of the Budget.
4. RESIDENTIAL TREATMENT FACILITIES WITH INADEQUATE COST EXPERIENCE

Rates of payment for a residential treatment facility with inadequate cost experience shall be determined on the basis of satisfactory cost projections as submitted to the Commissioner. The rate of payment shall take into consideration total allowable costs, total allowable days and shall be subject to staffing standards as approved by the Commissioner and a limitation on operating expenses as determined by the Commissioner.

Financial reports, reflecting actual cost and statistical information, in a form prescribed by the Commissioner, shall be required within one hundred twenty days following the first six month period during which the Residential Treatment Facility has operated at an average utilization of at least ninety percent or one

Attachment 4.19-A Part III

</table>

The minimum wage adjustment will be developed and implemented as follows:

1. Minimum wage costs will mean the additional costs incurred beginning January 1, 2017 and thereafter, as a result of New York State statutory increases to minimum wages.

2. The 2017 facility specific minimum wage add-on will be developed based on collected survey data received and attested to by nursing facility providers. If a facility does not submit a survey, the minimum wage add-on will be calculated based on the facility’s Consolidated Fiscal Report (CFR) wage data from two years prior to the period being calculated. If a facility fails to submit both the attested survey and the CFR cost report, the facility’s minimum wage add-on will not be calculated.

   i. Minimum wage cost development based on survey data collected.
      a. Survey data will be collected for facility specific wage data.
      b. Facilities will report by wage bands, the total count of FTEs and total hours paid to all employees (contracted and non-contracted staff) earning less than the statutory minimum wage applicable for each region.
      c. Facilities will report an average fringe benefit percentage for the employees directly affected by the minimum wage increase.
      d. The minimum wage costs are calculated by multiplying the total hours paid by the difference between the statutory minimum wage and the midpoint of each wage band where the facility has reported total hours paid. To this result, the facility’s average fringe benefit percentage is applied and added to the costs.

   ii. Minimum wage cost development based on the CFR cost report data.
       a. The average hourly wages of employees where the reported average hourly wage is below the regional statutory minimum wage are identified.
       b. The total payroll hours of the employees identified are then multiplied by the regional statutory minimum wage resulting in a projected payroll. The actual payroll as reported in the cost report is then subtracted from the projected payroll resulting in the expected wage costs increase.
       c. The facility’s fringe benefit costs directly affected by the wage increase are identified, and the average fringe benefit percentage is calculated.
       d. The fringe benefit percentage is applied to the increased wage costs and added resulting in the minimum wage costs.
3. The facility specific cost amount will be adjusted by a factor calculated by dividing the facility’s average dollar per hour under minimum wage by the regional average. The resulting amount will be divided by patient days to arrive at a rate per diem add on, which will be applied to only Medicaid days for purposes of Medicaid reimbursement.

4. In subsequent years until the minimum wage is completely implemented statewide, the Department will survey facilities utilizing the methodology employed in year one. If a facility fails to submit the minimum wage survey, the calculation for minimum wage costs will default to the personnel wage data reported on the Facility’s latest available CFR cost report. If a facility fails to submit both the survey and the CFR cost report, its minimum wage add-on will not be calculated. Once the minimum wage costs are included in the development of the nursing home rate, the minimum wage add-on will be excluded from the rate.

5. **Minimum Wage Reconciliation** - After the end of each calendar year, the Department of Health will survey providers to obtain the following information for the purpose of reconciling annual minimum wage reimbursement. The state will release the reconciliation survey by the end of March and providers will have two weeks to complete the survey or request an extension if a provider determines it is unable to complete the survey within that time. Approval of extensions, and the time of the extension, is at the discretion of the state. If the reconciliation survey is not submitted within the two weeks or within the extension time frame, should one be granted, the provider’s minimum wage add-on for the calendar year covered by the survey will be recouped.

   a. **Total annual minimum wage funding paid to the provider** (as determined from the minimum wage add-on to claims paid for services rendered in the prior calendar year) for the Medicaid share of the minimum wage law increase requirement. (This information will be supplied by the Department of Health.) Medicaid’s share is the percentage of minimum wage costs that are attributable to Medicaid services based on the proportion of Medicaid services to a provider’s total services.

   b. **Medicaid’s share of the total amount the provider was obligated to pay to bring salaries up to the minimum wage for the calendar year.** (This information will be completed by the provider.)

   c. **Minimum wage funds to be recouped or additional funds to be received by the provider.** (This information will be completed by the provider.) This will be the difference between the amount paid to the provider for the Medicaid share of the minimum wage law increase requirement and the corresponding amount the provider determined it was actually obligated to pay.

   d. **The State agency will review providers’ submissions for accuracy and reasonableness, following which it will process associated payments and recoupments via retroactive per unit rate adjustments as quickly as practical thereafter.**

The agency’s Chief Executive Officer or Chief Financial Officer must sign an Attestation verifying the data that is supplied in the survey.

**TN #17-0010**

**Approval Date** January 12, 2018

**Supersedes TN NEW**

**Effective Date** January 1, 2017
year after the first resident was admitted to the Residential Treatment Facility, whichever event occurs earlier. The Commissioner may, at his discretion, utilize this cost report to adjust the RTF's budget-based rate of payment to more accurately reflect the costs of operating the facility. In any event, the Commissioner will calculate a cost-based rate for the facility no later than two years after the facility has opened, unless the Commissioner determines that the facility has not achieved the status of a stable, ongoing operation with reliable cost information, in which case the budget based rate will be continued, adjusted as necessary, for updated budget projections as appropriate.

5. REDUCED PAYMENT FOR INAPPROPRIATE LEVEL OF CARE

Effective twelve months after the date the RTF submits financial reports reflecting actual operating costs or two years after the RTF begins operating, whichever is earlier, if it is determined by a utilization review committee that a Medicaid recipient no longer requires inpatient psychiatric hospital services but must remain in the RTF because a medically necessary long term care bed is not available in the community, and it is determined by the Commissioner that there is a significant excess of operational beds at the RTF or in the RTFs located in the OMH region in which the RTF is located, the RTF will be reimbursed at a rate equal to the average Medicaid skilled nursing facility or intermediate care facility rate within the State, as appropriate, at the time such services are furnished. For purposes of this paragraph, a significant excess of operational beds exists if the occupancy rate for the RTF for the most recently reported twelve month period is less than 80 percent in the case of RTFs with certified bed capacities greater than 20 beds or 60 percent in the case of RTFs with certified bed capacities of 20 beds or less, as stated on the operating certificate issued by the Office of Mental Health. A significant excess of operational bed exists in an OMH region if the overall occupancy rate for RTFs in the region is less than the weighted average of 80 percent for RTFs in the region with certified bed capacities greater than 20 beds and 60 percent for RTFs in the region with certified bed capacities of 20 beds or less. The occupancy rate shall be determined without including alternate care days. The determination of average occupancy rate for RTFs in the region is applied to each of the five geographical OMH regions and is based on RTFs which are subject to the provisions of this section and which are located within the same OMH Region.

Alternate care determinations must be reported to the Office of Mental Health on such forms and in such manner as shall be prescribed by OMH. OMH will notify providers of procedures for collecting and reporting data prior to the effective date of the reduced payment provision.
6. Additional Disproportionate Share Payment

   The State’s methodology used to take into account the situation of disproportionate share hospitals also includes additional payments to meet the needs of those facilities which serve a large number of Medicaid eligible, low income and uninsured patients, including those eligible for Home Relief, who other providers view as financially undesirable. These payments are available to hospitals on behalf of certain low-income persons who are described below.

   These additional payment adjustments are made either by the Department or through an intermediary to disproportionate share hospitals which have provided services to persons determined to be low-income by reason of their having met the income and resource standards for the State's Home Relief program. These persons must have demonstrated to a local social services district or the Department that their household income and resources do not exceed the income and resource standard established by the Department, which standards vary by household size and take into account the household's regularly recurring monthly needs, shelter, fuel for heating, home energy needs, supplemental home energy needs and other relevant factors affecting household needs.

   Each hospital, or an intermediary making a payment to a hospital, will determine which patients qualify as low-income persons eligible for additional payments by a verifiable process subject to the above eligibility conditions. Each hospital must maintain documentation of the patient’s eligibility for additional payments and must document the amounts claimed for additional payments. The supporting documentation must include written verification from a local social services district or the Department attesting to the person’s eligibility for Home Relief. Such supporting documentation may be in the form of a photocopy of the person’s current valid official benefits card or a copy of an eligibility verification confirmation received from the Department’s Electronic Medicaid Eligibility Verification System (EMEVS), which system includes information with respect to persons eligible for Home Relief and additional payments, or other verifiable documentation acceptable to the Department which establishes that the person has met the income and resource standards for Home Relief on the date the services were provided.]

Due to State’s reliance on Section 1923(e) of the Social Security Act, the reimbursement methodology for residential treatment centers for children and youth does not include a disproportionate share adjustment.
[A “disproportionate share hospital” for purposes of receiving additional disproportionate share payments under this provision is any hospital which furnishes medical or remedial care to a qualified low-income person without expectation of payment from the person due to the patient’s inability to pay as documented by his or her having met the income and resource standards for Home Relief benefits as set forth above. In addition, a “disproportionate share hospital” (except hospitals serving an in-patient population predominantly composed of persons under 18 years of age and hospitals which did not offer non-emergency obstetrical care on or before December 21, 1987) must have at least two obstetricians with staff privileges who have agreed to provide obstetrical care and services to Medicaid-eligible patients on a non-emergency basis.

The amount of this disproportionate share adjustment will vary by hospital and reflect the dollar amount of payments from the State to the hospital for services provided to low income patients. For each hospital such adjustments shall be paid in the normal Medicaid payment process and according to established rates or fees. To receive payment of this adjustment each hospital must submit a claim in the form and manner specified by this Department.

For purposes of calculating disproportionate share (DSH) distributions pursuant to this section, if the hospital receiving the distribution is a public hospital (operated by the State, a city, county or other municipal subdivision), then the payments determined hereunder are further limited. Unless the hospital qualifies as a “high DSH” facility (as defined below), payments made during a distribution period shall not exceed the cost incurred by the hospital for furnishing hospital services to Medicaid recipients less non-DSH reimbursement and to uninsured patients less patient payments. In the case of a hospital defined as “high-DSH”, payments made during a distribution period shall be limited to 200 percent of the amount described in the previous sentence. To be considered a “high-DSH” facility, a hospital must have a Medicaid inpatient utilization rate of at least one standard deviation above the mean Medicaid inpatient utilization rate for hospitals receiving Medicaid payments in the State, or have the largest number of Medicaid inpatient days of any hospital in the State in the previous distribution period. Previous years’ data for both uninsured and Medicaid cost and payments shall be used to estimate the limitation. A cost determination of both the uninsured and the Medicaid inpatient costs shall be made upon receipt of an appropriate report.]
New York State Office of Alcoholism and Substance Abuse Services (OASAS)

SUMMARY OF INPATIENT MEDICAID PAYMENT METHODOLOGY FOR SERVICES IN PRIVATE PSYCHIATRIC HOSPITALS

OASAS establishes all inclusive program specific per diem rates on a prospective basis. Rates are established on the basis of certified cost reports which are submitted at least one year prior to the first day of the rate year which is the calendar year. For example, rates for the 1994 calendar year rate year were based upon 1992 calendar year data. A rolling base year is utilized, i.e. each year, rates are re-calculated using a new base year.

Allowable operating and capital costs from the base year are determined in accordance with Medicare Principles of Reimbursement (HIM-15) and Generally Accepted Accounting Principles (GAAP). Increases in operating costs from base year to base year are limited by application of a growth factor. The growth factor changes each year and is defined as the trend factor for the base year plus 2%.

A trend factor is then added to the lower of a program’s base year operating costs or the operating costs as limited by the growth factor. The trend factor is developed for OASAS by the NYS Office of Health Systems Management (OHSM). The trend factor has two components, personal services and non-personal services. Calculation of the personal services component is multi-step process. First, personal services costs are broken down into various categories, i.e., managerial and administrative, professional and technical, clerical, service occupations and blue collar. Each category is then assigned a sub-weight representing its percentage relationship to total personal services costs. The assigned subweight is then multiplied by the price movement for each of these categories using United States Department of Labor, Bureau of Labor statistics. The sum percentage of these calculations is then multiplied by a percentage representing personal services costs to total costs. The non personal services component is determined by multiplying the GNP implicit price deflator by a percentage representing non personal costs to total costs. The trend factor for the 1994 rate year is 2.99%.

The program specific per diem rate is then calculated by dividing the sum of allowable trended adjusted operating costs and allowable capital costs by the higher of actual patient days (in the base year) or 90% of possible base year days for inpatient rehabilitation programs; for primary care (detoxification) programs, the higher of actual base year patient days or 85% or possible base year days is used. Possible days for each program is calculated by multiplying the certified bed capacity by the number of days in the base year, i.e. either 365 or 366. Rates which are based upon actual certified costs data are provisional pending audit. There is a process for a provider to appeal a provisional rate.
For new providers with inadequate cost experience, rates are calculated on the basis of a program specific 12 month budgeted cost report. As with actual cost based rates, allowable operating and capital costs are determined in accordance with HIM-15 and GAAP. Unlike actual cost based programs, operating costs will be limited to 115% of the statewide average for similar programs. The sum of allowable adjusted operating costs and allowable capital costs is then divided by the higher of budgeted days or 90%/85% of possible days to arrive at a budgeted per diem. Budgeted base rates are adjusted to actual rates upon receipt of actual certified cost reports. Program specific provisional rate are then established retroactively to the effective date of the budgeted rate.
Inpatient Psychiatric Services for Individuals under 21

Inpatient Psychiatric Services for individuals under 21 who are admitted to Residential Rehabilitation Services for Youth (RRSY) programs that are certified by the New York Office of Alcoholism and Substance Abuse Services. Services are limited to those provided for those recipients who are medically certified as requiring this level of care in accordance with 42 CFR 441.152. Service are limited to individuals under the age of twenty-one (21), or receiving services immediately before attaining the age of twenty-one (21), not to extend beyond the earlier of:

(1) the date the services are no longer required; or

(2) the date the individual reaches the age of twenty-two (22).

Coverage of services will be limited to those services provided within a residential rehabilitation services program for youth that is certified by the New York Office of Alcoholism and Substance Abuse Services.

[Residential Rehabilitation Services for Youth]

Medicaid fees for Residential Rehabilitation Services for Youth (“RRSY”) services are established using a cost model based on service requirements established by the Commissioner of the Office of Alcoholism and Substance Abuse Services (“the office”) pursuant to regulation at 14 New York Code of Rules and Regulations Part 817 (“Part 817”).

Definitions.

(1) “Eligible residential rehabilitation services for youth provider” will mean a residential rehabilitation services for youth provider that has been certified by the Office to provide services pursuant to Part 817.

(2) “Allowable costs” will mean those costs incurred by an eligible residential rehabilitation services for youth provider which are eligible for Medicaid payments. To be allowable, costs must be reasonable and necessary for efficient provision of chemical dependence services, related to patient care, recurring, and approved by the commissioner.]

Attachment 4.19-A Part III

New York

10

New York State Office of Alcoholism and Substance Abuse Services (OASAS)

June 11, 2019

TN #19-0013 Approval Date June 11, 2019

Supersedes TN #05-0054 Effective Date January 1, 2019
Medicaid fees for RRSY services shall be based on both bed size and the county in which the facility is located. The fees shall be inclusive of both operating and capital reimbursement. There shall be no capital add-on to these fees or any separate Medicaid reimbursement for capital costs. These fees shall be effective on and after January 1, 2019.

For both existing and new facilities, the “bed size” shall be based on the OASAS-certified capacity of the program site. To calculate the fee, the “statewide fee” based on bed size shall be taken from the first table below and then adjusted by the applicable regional factor from the second table. If the certified bed size changes, the rate shall be revised accordingly and shall be effective on the date of the bed size change. Facilities with fewer than 14 certified beds shall use the 14 bed fee. Facilities with 60 or more certified beds shall use the 60 bed fee.

*Supersedes TN #05-0054*

*Approval Date: June 11, 2019*

*Effective Date: January 1, 2019*
(6) With the approval of CMS, the service operating fees may be updated to adjust for programmatic changes or service operating cost variations not addressable by the annual trend factor. The process of updating service operating fees may include one or more of the following:
   (i) the establishment of a new base year and fee cycle;
   (ii) a change in the number of fee levels;
   (iii) a change in the upper and/or lower service capacities of the fee levels; or
   (iv) other necessary changes not specifically addressed above.

Capital add-on.

To be considered as allowable, capital costs must be both reasonable and necessary to patient care under Part 817. Allowable capital costs shall be determined in accordance with the following:

(1) The Office shall use, as its major determining factor in deciding on the allowability of costs, the most recent edition of the Medicare Provider Reimbursement Manual, commonly referred to as HIM-15, published by the U.S. Department of Health and Human Services’ Centers for Medicare and Medicare Services.

(2) Where HIM-15 is silent concerning the allowability of costs, the commissioner shall determine allowability of costs based on reasonableness and relationship to patient care and generally accepted accounting principles.

Allowable capital costs may include:

(1) the costs of owning or leasing real property;

(2) the costs of owning or leasing moveable equipment and personal property; and

(3) the cost of up to three months of pre-operational program start-up expenses, and associated interest, for new services, programs, or facilities for which initial reimbursement levels are being established. Pre-operational start-up costs may include, but are not limited to, rent, employee compensation, utilities, staff training and travel, and expensed equipment.

No capital or start-up expenditure for which approval by the office is required in accordance with the operating requirements of the office shall be included in allowable capital cost for purposes of computation of provider reimbursement unless such approval shall have been secured. For projects requiring approval by the office, reimbursement for capital costs shall be limited to the amount approved by the commissioner. To be considered allowable for

TN #05-54
Supersedes TN NEW
Approval Date June 1, 2006
Effective Date January 1, 2006
reimbursement, capital and start-up costs must be both reasonable and necessary, incurred by
the provider, and chargeable to necessary patient care.

The capital add-on to the service operating fee shall be calculated for each fee period on
a provider-specific basis by dividing the provider’s allowable capital costs for that fee
period by the allowable patient days for that fee period. The capital add-on may be
adjusted by the office on a retroactive or prospective basis to more accurately reflect the
actual or anticipated approved capital cost.

New eligible RRSY providers.

(1) Once a new eligible RRSY provider has at least six months of cost and operating
experience, they shall submit reports at least 180 days prior to the beginning of the fee
period for which a fee is being requested unless otherwise waived by the commissioner.
(2) Each new eligible RRSY provider which has less than six months of cost and
operating experience shall prepare and submit to the commissioner a budget cost
report. Such report shall:

(i) include a detailed projection of revenues and a line item expense budget with
regard to staffing, non-personal service costs including capital;
(ii) include a detailed staffing plan;
(iii) include a projected month by month bed utilization program;
(iv) cover a 12 month period; and
(v) such budget report shall be completed and submitted at least 180 days prior
to the beginning of the rate year for which a rate is being requested.

(3) The service operating fee and capital add-on for each new eligible RRSY provider
shall be calculated and reimbursed pursuant to these requirements.

(4) Upon submission of the financial reports the commissioner may adjust retroactively
the eligible RRSY provider’s existing capital add-on to more accurately reflect the
reported operating costs and program utilization, based on patient days of the eligible
RRSY provider.
METHODS AND STANDARDS FOR SETTING PAYMENT RATES
FINGER LAKES AREA HOSPITALS

TN #87-10
Supersedes TN

Approval Date March 15, 1988
Effective Date January 1, 1987
BACKGROUND

The Finger Lakes Hospital Experimental Payment Program (FLHEP) was implemented as of January 1, 1981 as a Medicare and Medicaid demonstration system under the authority of sections 402 and/or 222 of the Social Security Amendments of 1967 and 1972, respectively. This program continued until December, 1986. From January 1, 1987 to December 31, 1994, the Finger Lakes Area Hospitals’ Corporation (FLAHC) had received approval from the Federal Health Care Financing Administration (HCFA) for a waiver of Medicare reimbursement principles, to permit the continuation of the Finger Lakes Hospital Experimental Payment Program system under the authority of section 1886(c) of the Social Security Act, as amended. Section 1886(c) requires that the State hospital reimbursement control system for which a Medicare waiver is granted also apply to Medicaid revenues and expenses. Hence, in 1987, FLHEP was continued as a cost control system under section 1886(c) (known as FLHEP-2) rather than as a demonstration system. FLHEP was also continued for the 1988-1990 periods as FLHEP-3, and for the 1991-1993 periods (as FLHEP-4). FLHEP will continue as a cost control system under section 1886(c) for the period January 1, 1994 through June 30, 1996 as FLHEP-4E and for the period July 1, 1996 through December 31, 1996 as FLHEP-4EE. For 1995 and 1996, FLAHC member hospitals will no longer be covered under a waiver of section 1886(c) of the Social Security act. Beginning in 1995 member hospitals will be reimbursed for Medicare patients in the same manner as other hospitals in New York State. Medicaid and Blue Cross continue to be participating payers in the FLHEP system. The hospitals participating in this program are F.F. Thompson, Geneva General, Myers Community, Newark-Wayne Community and Soldiers and Sailors.

SYSTEM OVERVIEW

For the period January 1, 1996 through December 31, 1996 all FLHEP hospitals will continue to participate in a total revenue system, with the revenue allocated among Medicare and non-Medicare payers using standard Medicare apportionment techniques. Inpatient reimbursement for all major third-party payers (Medicaid, Blue Cross) will be through a DRG-based case payment methodology similar to the case payment methodology followed by New York State for its non-Medicare inpatients. The case payment rates for the participating hospitals will be based on their historical payment base (1987 costs trended forward and adjusted). The design of FLHEP-4E and FLHEP-4EE includes continuation of the demonstration for the use of a severity measure that was started under the FLHEP-3 contract. Medicaid funds will be used to fund inpatient services only. The severity study will be funded from a statewide pool in which there is no federal financial participation.
This plan covers the third year extension of the FLHEP-4 contract which runs through December 31, 1996. Extending this agreement will continue all existing FLHEP programs while providing the Finger Lakes Corporation sufficient time to transition to a modified reimbursement system.

The FLHEP-4E and 4 contracts, like the previous FLHEP contracts, are based on the concept of regional cooperation in the planning and delivery of services in the most cost effective manner possible. To that end, the participating hospitals shall engage in cooperative community service planning to ensure that changes in services or facilities continue to conform to this concept of cost effective delivery and organization of care in the area.

To calculate the rates, FLHEP-2 1987 hospital costs are aggregated and allocated to each member hospital using the following percentages:

- FF Thompson Hospital: 22.8119%
- Geneva General Hospital: 32.1315%
- Myers Community Hospital: 11.1376%
- Newark-Wayne Community Hospital: 24.4871%
- Soldiers and Sailors Memorial Hospital: 9.4318%

This cost, also known as the gross aggregate dollar amount, is the basis for the FLHEP-4E and 4EE rate calculations. The following amounts are subtracted from each hospital’s gross aggregate dollar amount: The cost of actual 1987 capital, physician coverage, and the amount included for medical education. The 1987 reimbursable operating costs are increased by a factor of .5% to provide funding for advances in medical technology, and by the 1987 through 1996 trend factor to reflect inflation, and then apportioned to inpatient and outpatient services, acute units, Medicare, and non-Medicare, using 1987 FLHEP-2 final settlement data.

The trend factors are calculated, using the Panel of Health Economists’ methodology, for various groups of hospitals depending on their geographic location (upstate, downstate), urban or rural setting, and size (as measured by the number of patient days during a calendar year). This methodology is detailed in section 86-1.58 of attachment 4.19-A, Part I of the Plan. The FLHEP hospitals fall into three categories:

1. Upstate urban, less than 30,000 patient days
2. Upstate urban, greater than 30,000 patient days
3. Upstate rural, less than 15,000 patient days

TN #96-02 Approval Date August 3, 1999
Supersedes TN #95-02 Effective Date January 1, 1996
The values of the trend factors for 1996 for these three categories are provided below:

<table>
<thead>
<tr>
<th>Category</th>
<th>1996 (Initial)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2.80</td>
</tr>
<tr>
<td>2</td>
<td>2.81</td>
</tr>
<tr>
<td>3</td>
<td>2.80</td>
</tr>
</tbody>
</table>

The initial trend factors are calculated using the latest data available; these values are subject to change as more current data become available. Consequently, the interim trend factors are adjusted up or down and these revised trend factors are then used to make prospective payment rate adjustments.

The inpatient acute, non-exempt, non-Medicare portion of each hospital’s 1996 reimbursable operating costs are converted to an inpatient case payment rate for each hospital which is uniform for all of the non-Medicare payers. Each hospital’s 1996 hospital specific case payment rate is blended with a group rate calculated in accordance with the State specified methodology, as detailed in section 86-1.53 of Attachment 4.19A, Part I of the Plan except that rural hospitals have the option of choosing a rate which is entirely the hospital specific rate. Each hospital’s blended 1996 case payment rate will consist of two components. Forty five percent of the rate will be hospital specific case payment rate and the remaining 55% will be the group average case payment rate. Hospitals will be grouped under the methodology described in section 86-1.54 of attachment 4.19A, Part I of the Plan.

Each hospital also receives an add-on for pass-through costs which reflect (1) the hospital’s actual cost for capital; (2) the 1979 physician coverage costs trended forward in accordance with section 86-1.58 of attachment 4.19A, Part I of the Plan and adjusted for changes in physician billing practice; and (3) the amount included in the regional aggregate dollar amount in 1987 for Medical Education trended in accordance with section 86-1.58 of attachment 4.19A, Part I of the Plan.

Each hospital is paid for each inpatient discharge, which is not an outlier or exempt as defined below, on or after January 1, 1996 the hospital’s blended non-Medicare case payment rate, adjusted by the Service Intensity Weight related to the discharge, plus the medical education, the physician coverage and the capital add-ons.
The hospitals shall be paid for Exempt Unit Services by the payers on the same methodology and cost base as such units are paid in other hospitals in New York State. This methodology is detailed in section 86-1.57 of Attachment 4.19-A, Part I of the Plan.

Alternate Level of Care ("ALC") reimbursement is paid according to the New York State reimbursement methodology described in section 86-156 of Attachment 4.19-A, Part I of the Plan. The rate will be paid at the regional average nursing home per diem rate.

Hospitals transferring patients are paid a per diem rate which is calculated under the methodology detailed in section 86-1.54 of attachment 4.19-A, Part I of the Plan.

Outliers shall be paid in accordance to section 86-1.55 of Attachment 4.19-A, Part I of the Plan.

Future funding of expansion of services or facilities which require State Certificate of Need (CON) approval will occur through an adjustment determined according to State procedure and consistent with methodology described in section 86-1.61 of Attachment 4.19-A, Part I to the adjusted gross aggregate dollar amount for incremental non-volume related operating costs and adjustment to the capital add-ons when such projects are approved and implemented.

The payers participating in the contract have agreed to pay, on final settlement, their respective shares of the amount, if any, needed to assure that the hospitals receive their actual capital, and trended 1987 medical education costs and physician coverage costs.

The Health Department will certify the rates under the FLHEP-4E and 4EE Agreement for Medicaid as the rates for each hospital, contingent upon approval by HCFA of the Title XIX State Plan Amendment providing for reimbursement pursuant to this methodology.

The participating hospitals will each contribute to an administration and research fund which will be used for administrative costs of the program, data base development, to support programs designed to increase efficiency, and the severity study. The data base will include sufficient data to assign a severity measure to each case, and will allow for a statistical analysis of the changes in severity that occur, and how severity varies across hospitals and over time.

Each hospital is required to purchase or provide through a state pool excess physician malpractice insurance pursuant to New York Law. There is no federal financial participation for these malpractice costs.
For each year of the FLHEP-4E and 4EE contract the case payment rates are adjusted to include changes to the hospitals’ adjusted gross aggregate dollar amounts for capital and non-volume related costs of approved CON projects and to reflect inflation by means of a trend factor adjustment. The per diems are similarly adjusted. Capital, medical education and physician coverage cost add-ons are adjusted to reflect actual and trended 1987 costs and payments, respectively.

Adjusting the Case Mix Penalty for Severity Increase

The purpose of this material is to describe the method of calculating the increase in severity of illness using the SysteMetrics Staging Measure, and then applying that increase as an offset against the creep component of the case mix penalty which is detailed in section 86-1.61 and 86-1.75 of Attachment 4.19A, Part I of the Plan. This offset began to be applied within the FLHEP-3 contract starting in 1989. The base year for the measurement of severity is 1987, the same base year as was used for the rate calculations in the FLHEP-3 contract.

The Finger Lakes area hospitals are currently being paid on the basis of the DRG assigned to each patient. The disease staging (Q scale) software program produces two outputs on severity; one written DRG and another relating to overall severity. The severity measure will be used as an offset to the case mix penalty which is applied if the criteria stipulated in section 86-175 of attachment 4.19A, Part I of the Plan are met.

The offset shall only be applied if the severity increase is positive, and the offset shall not exceed the amount of the creep component of the case mix penalty calculated by OHSM, i.e., the offset shall not turn the creep component of the case mix penalty to a positive adjustment.

Calculation of the Severity Increase

The change in severity is calculated for each FLAHC hospital from 1987 to the rate year (1989 and subsequent years). The methodology used to calculate this severity increase is described in the following paragraph.

Calculate the average aggregate severity of all the non-Medicare cases in the base year and in the rate year, T(\(b\)) and T(\(r\)) respectively. Calculate the average DRG weight for these cases, W(\(b\)) and W(\(r\)). The average severity in the base year is then T(\(b\))/W(\(b\))=S(\(b\)) and the average severity in the rate year is T(\(r\))/W(\(r\))=S(\(r\)). Then the percentage increase in severity is

\[100 \times (\frac{S(\(r\)}{S(\(b\))} - 1).\]
New York

6

If this increase in severity is positive, then it shall be used as an offset to the creep component of the case mix penalty to be applied for the year. If the creep component of the case mix penalty calculated by OHSM is \( P \) (as a percentage), and the percentage increase in severity is \( Q \), then the case mix penalty shall be reduced to \( P - Q \), but not to less than zero.

An example of the severity offsets calculation is illustrated in Attachment A. This reduction shall be applied to the case mix penalty for 1989 and for subsequent years of the FLHEP.
Amendment providing for reimbursement pursuant to this methodology.

The participating hospitals will each contribute to an administration and research fund which will be used for administrative costs of the program, data base development, to support programs designed to increase efficiency, and the severity study. The data base will include sufficient data to assign a severity measure to each case, and will allow for a statistical analysis of the changes in severity that occur, and how severity varies across hospitals and over time.

For each year of the FLHEP-4 contract after 1991, the case payment rates are adjusted to include changes to the hospitals’ adjusted gross aggregate dollar amounts for capital and non-volume related costs of approved CON projects and to reflect inflation by means of trend factor adjustment. The per diems are similarly adjusted. Capital, medical education and physician coverage cost add-ons are adjusted to reflect actual and trended 1987 costs and payments, respectively.

The term of the FLHEP-4 Agreement is January 1, 1991 through December 31, 1993. The term of the FLHEP-4E Agreement will be January 1 through December 31, 1994.
Severity Adjustment Measurement System

The Medicare program, New York State and other states and payors, have been using the Diagnosis Related Groups (DRGs) for payment purposes. While the DRGs are reasonably homogeneous in regard to resource use, they are far from ideal, and they may not take adequate account of the severity of illness of patients. A number of adjustments have been included in payment systems to partly remedy this problem. For example, the indirect medical education adjustment in the Medicare Prospective Payment System, and the disproportionate share adjustment, are added partly to deal with this problem. A better way to deal with the problem may be to measure severity of illness within the DRG and adjust for it directly. The purpose of the severity study that is being undertaken by FLAHC is to incorporate a severity measure to obtain a better understanding of the operation of the health care system, e.g., are patients who are travelling to obtain services in urban hospitals doing so because they are more severely ill or for some other reason?

This study will be funded through hospital payments made to a Statewide Pool for which there is no federal financial participation. Medicaid moneys will be sued to pay for inpatient hospital services.

The purpose of this demonstration is to develop a payment
system which incorporates a measure of the severity of illness of the patient into the
determination of the appropriate payment rate, to show that it is feasible to implement such a
system in a group of rural hospitals, and to carry out some research on the variation in severity
over time, across payor classes, across hospitals, and between cases treated in the area and
cases treated outside of the area.

After considerable discussion, review of the literature, and presentations from several of
the severity system vendors, Disease Staging (Q-scale), which is distributed by SysteMetrics,
was chosen to support the development of the severity adjustment payment system. The
FLAHC hospitals are currently being paid on the basis of the DRG assigned to each patient. The
Disease Staging software program produces two outputs on severity level—one within the DRG
and one overall—which could be useful in refining the DRGs in a payment demonstration. After
discussions with the Office of Health Systems Management, it was decided that the severity
measure would not be used to adjust payment rates directly, but would be used as an offset to
the case mix limit that is applied if the case mix of the hospital and the State as a whole
increase above certain thresholds. The case mix limit for 1989 and subsequent years is to be
offset by an increase in case mix severity within the hospitals participating in the
demonstration.
Adjusting the Case Mix Penalty for Severity Increase

The purpose of this material is to describe the method of calculating the increase in severity of illness using the SysteMetrics Staging Measure, and then applying that increase as an offset against the creep component of the case mix penalty applied under the FLHEP contract. This offset began to be applied within the FLHEP-3 contract starting in 1989. The base year for the measurement of severity is 1987, the same base year as was used for the rate calculations in the FLHEP-3 contract.

The offset shall only be applied if the severity increase is positive, and the offset shall not exceed the amount of the creep component of the case mix penalty calculated by OHSM, i.e., the offset shall not turn the creep component of the case mix penalty to a positive adjustment.

Calculation of the Severity Increase

The change in severity is calculated for each FLAHC hospital from 1987 to the rate year (1989 and subsequent years). There are two ways in which the increase in severity can be calculated:

1. Calculate the average within DRG severity for the base year (1987) and for the rate year (1989 or a subsequent year). This is the weighted average severity per case, with the
New York

11

weighing being the DRG weight for the case.

\[
\frac{\text{SUM} ( s(i) \times w(i) )}{\text{SUM} (w(i))} = S
\]

Where \( s(i) \) is the DRG severity of case \( i \), \( w(i) \) is the DRG weight of case \( i \), and the sum is taken over all non-Medicare cases \( i \).

Let \( S(b) \) be the severity in the base year, and \( S(r) \) be the severity in the rate year. Then the percentage increase in severity is \( 100 \times \frac{S(r)}{S(b)} - 1 \).

2. Calculate the average aggregate severity of all the non-Medicare cases in the base year and in the rate year, \( T(b) \) and \( T(r) \) respectively. Calculate the average DRG weight for these cases, \( W(b) \) and \( W(r) \). The average severity in the base year is then \( T(b)/W(b)=S(b) \) and the average severity in the rate year is \( T(r)/W(r)=S(r) \). Then the percentage increase in severity is:

\[
100 \times \left( \frac{S(r)}{S(b)} - 1 \right)
\]

Method 2 is the more precise, therefore it is the one that should be offset against the case mix penalty.
New York
12

If this increase in severity is positive then it shall be used as an offset to the creep component of the case mix penalty to be applied for the year. If the creep component of the case mix penalty calculated by OHSM is $P$ (as a percentage), and the percentage increase in severity is $Q$, then the case mix penalty shall be reduced to $P - Q$, but not to less than zero.

This reduction shall be applied to the case mix penalty for 1989 and for subsequent years of the FLHEP.

Future analyses are planned to determine how severity changes over time within individual hospitals, how stable the measures of severity are, whether the patients who are migrating to urban providers are doing so because they are more severely ill, and other studies that will enable the hospitals to obtain a better understanding of the needs of their patients. For example, a study may be performed to determine whether patients are being admitted to a hospital at an appropriate point in the course of their illness. Admission at too early as stage when treatment could equally well be performed on an ambulatory basis could indicate inappropriate resource use, while admission at too late a stage may result in higher resource use because the patients are more severely ill than they would be if they had been admitted at an earlier stage. The hospitals may also start to use the severity system to augment their utilization review function within the hospital.
The following are the major components of the trend factor methodology as adopted by the Panel of Health Economists.

**Projection Methodologies**

**Salaries.** In order to quantify the salary price movement component of the trend factor, four national salary proxies are used, adjusted by a Regional Adjustment Factor (RAF). The four salary proxies are the Collective Bargaining Agreements (Nonmanufacturing), Employment Cost Index – Private Industry Workers, Employment Cost Index – Managers and Administrators, and Employment Cost Index – Professional and Technical Workers. There four proxies are weighted to produce a composite salary price movement. (Separate weightings are used for teaching and non-teaching hospitals and the Health and Hospitals Corporation.) In calculating the initial trend factors for a given year, a projection methodology for salary price movements is used. The projections are based on the compounding of quarterly increases in the salary proxies for the four latest available quarters of data. The final trend factor calculations are based on actual proxy data for the trend factor year compared to the preceding year.

**Fringe Benefits.** The trend factor methodology uses a Total Compensation Factor (TCF) that measures the relationship between increases in total compensation (i.e. salaries and fringe benefits) and increases in salaries. This factor is then applied to the composite salary price movement to yield a total compensation price movement, hence reflecting the fringe benefits. Two national proxies are used to determine the total compensation factor: Employment Cost Index – Total Compensation – Private Industry workers, divided by Employment Cost Index – Wages and Salaries – Private Industry Workers. In calculating the initial trend factors for a given year, the TCF is projected based on the latest four quarters data on these two proxies. For the final trend factor calculation, actual data are used.

**Labor.** The labor portion of the trend factor refers to the combined salary and fringe benefits components. Hence, the labor price movement is the salary price movement, adjusted by the Total Compensation Factor (TCF) and by the Regional Adjustment Factor (RAF).

**Non-labor.** A number of different proxies are used to measure price movements in non-labor related expenses incurred by hospitals. In calculating the initial trend factors, an estimate of the non-labor component of the trend factor is made by using the projected Gross National Product Implicit Price Deflator as published by the American Statistical Association and National Bureau of Economic Research, Business Outlook Survey. The final trend factor calculations are made using the actual changes in the non-labor proxies.
Additional Disproportionate Share Payment

The State’s methodology used to take into account the situation of disproportionate share hospitals also includes additional payments to meet the needs of those facilities which serve a large number of Medicaid eligible, low income and uninsured patients, including those eligible for Home Relief, who other providers view as financially undesirable. These payments are available to hospitals on behalf of certain low-income persons who are described below and are made in addition to, and not as a substitute for, the disproportionate share payment described in sections 86-1.65, 86-1.74 and 86-1.84 of Part I. However, the calculations of hospital’s bad debt and charity care experience used to determine the disproportionate share payments made under sections 86-1.65, 86-1.74 and 86-1.84 of Part I does not include the costs of services to any person for whom an additional disproportionate share payment has been made under this section.

These additional payment adjustments are made either by the Department or through an intermediary to disproportionate share hospitals which have provided services to persons determined to be low-income by reason of their having met the income and resource standards for the State’s Home Relief program. These persons must have demonstrated to a local social services district or the Department that their household income and resources do not exceed the income and resources standard established by the Department, which standards vary by household size and take into account the household’s regularly recurring monthly needs, shelter, fuel for heating, home energy needs, supplemental home energy needs and other relevant factors affecting household needs.

Each hospital, or an intermediary making a payment to a hospital, will determine which patients qualify as low-income persons eligible for additional payments by a verifiable process subject to the above eligibility conditions. Each hospital must maintain documentation of the patient’s eligibility for additional payments and must document the amounts claimed for additional payments. The supporting documentation must include written verification from a local social services district or the Department attesting to the person’s eligibility for Home Relief. Such supporting documentation may be in the form of a photocopy of the person’s current valid official benefits card or a copy of an eligibility verification confirmation received from the Department’s Electronic Medicaid Eligibility Verification System (EMEV5), which system includes information with respect to persons eligible for Home Relief and additional payments, or other verifiable documentation acceptable to the Department which establishes that the person has met the income and resource standards for Home Relief on the date the services were provided.
A “disproportionate share hospital” for purposes of receiving additional disproportionate share payments under this provision is any hospital which furnishes medical or remedial care to a qualified low-income person without expectation of payment from the person due to the patient’s inability to pay as documented by his or her having met the income and resource standards for Home Relief benefits as set forth above, and meets the requirements of State Plan Amendment 94-26. In addition, a “disproportionate share hospital” (except hospitals serving an in-patient population predominantly comprised of persons under 18 years of age and hospitals which did not offer non-emergency obstetrical care on or before December 21, 1987) must have at least two obstetricians with staff privileges who have agreed to provide obstetrical care and services to Medicaid-eligible patients on a non-emergency basis.

The amount of this disproportionate share adjustment will vary by hospital and reflect the dollar amount of payments either from the State directly, or through an intermediary, to the hospital for services provided to low income patients. For each hospital such adjustments shall be paid in the normal Medicaid payment process, or intermediary payment process, and according to established rates or fees, for fee-for-service program services or by the intermediary for its services. To receive payment of this adjustment each hospital must submit a claim in the form and manner specified by this Department, or the intermediary, as appropriate.

Disproportionate share payments under this plan cannot exceed the State disproportionate share allotment calculated in accordance with the provision of the Medicaid Voluntary Contribution and Provider Specific Tax Amendments of 1991 (P.L. 102-234), as set forth at 42 CFR Sections 447.296 through 447.299, and cannot exceed the facility specific disproportionate share payment limits required by the Omnibus Budget Reconciliation Act of 1993.
Examples of the Application of the Severity Offset to the Case Mix Penalty

The FLHEP-4E and 4EE contracts specify that any increase in severity, on an individual hospital basis, will be offset against the creep component in the case mix penalty.

Suppose that the case mix penalty for a given FLAHC hospital for 1992 was 2%. Once the severity data for 1992 has been analyzed, the increase in severity from 1987 to 1992 will be used to reduce this case mix penalty. Three different examples are described below to illustrate the three situations which can arise in the relationship between the case mix penalty and the change in severity.

1. Suppose that the severity of illness of the discharges from the hospital increases by 0.5% from 1987 to 1992. Then the case mix penalty will be reduced by the 0.5% to 1.5%:

   \[ 2.0\% - 0.5\% = 1.5\% \]

2. Suppose the severity of illness increases by 3% from 1987 to 1992. Then the case mix penalty will be reduced to 0%, since the increase in severity is far greater than the case mix penalty.

   \[ 2.0\% - 3.0\% = -1.0\% \]

   Since this is negative the case mix penalty is set at zero.

3. Suppose the severity change from 1987 to 1992 is negative. Then there is no adjustment to the case mix penalty.

   \[ 2.0\% - 0\% = 2.0\% \]
TITLE XIX (MEDICAID) STATE PLAN AMENDMENT

This State Plan amendment is contingent upon an approved contract among the HEP participating hospitals, the Rochester Area Hospitals' Corporation (RAHC), and the contracting payors.

Effective January 1, 1988, Medicaid hospital inpatient reimbursement for all HEP-III participating hospitals will be through a DRG-based case payment methodology similar to the case payment methodology for the rest of the State. However, the Medicaid case payment rates for the HEP-III participating hospitals will be based on their 1987 HEP-E payment bases (which were the original 1978 HEP cost bases trended forward and adjusted). The 1987 total payment base for each hospital is allocated to non-Medicare patients using 1987 utilization data and then trended to 1988 by an inflation factor. The non-Medicare inpatient acute portion of each hospital’s 1988 payment base is then converted to an inpatient Medicaid case payment rate for each DRG. There is a blending of the hospital specific case payment rate and a group pricing component, in proportions identical to those followed by hospitals in the rest of the State. Medicaid Alternate Level of Care (ALC) patients will be reimbursed at the regional nursing home per diem rate, according to the same methodology as under the State’s overall system.

Whereas, in most respects, the Medicaid inpatient reimbursement methodology in the proposed HEP-III system is the same as that for the rest of the hospitals in the State, there are unique features of the system. The chief of these is the development (in 1988) and implementation (in 1989 and 1990) of a completely new system to provide financial incentives for quality patient care which may be able to be used in the future on a wider scale if its feasibility is demonstrated among the HEP-III hospitals. The quality assurance system will use the MEDISGRPS severity classification system and develop standards against which each hospital’s inpatient care will be assessed. The hospital will face financial incentives (within limitations) to assure that these standards are met.

The HEP-III hospitals will also continue to pool capital costs, medical education and physician coverage costs (through the concept of levelling).
New York

[Methods and Standards for Establishing Payment Rates

Out of State Services

I. Inpatient Hospital Care

New York reimburses out of state hospitals at the facility's Medicaid rate established by the State in which the institution is located; or when no such rate exists, at the lowest of the following charges:

1. the Medicare rate set for the hospital; or
2. the hospital’s customary charge for public beneficiaries; or
3. the maximum New York State Title XIX rate for similar inpatient care.

Reimbursement for those days where recipients are awaiting placement to an alternate level of care (ALC) while they are inpatients at out of state hospitals will be at the facility's approved Medicaid ALC rate.

II. Additional Disproportionate Share Payment

The State’s methodology used to take into account the situation of disproportionate share hospitals also includes additional payments to meet the needs of those facilities which serve a large number of Medicaid eligible, low income and uninsured patients, including those eligible for Home Relief, who other providers view as financially undesirable. These payments are available to hospitals on behalf of certain low-income persons who are described below.

These additional payment adjustments are made either by the Department or through an intermediary to disproportionate share hospitals which have provided services to persons determined to be low-income by reason of their having met the income and resource standards for the State’s Home Relief program. These persons must have demonstrated to a local social services district or the Department that their household income and resources do not exceed the income and resources standard established by the Department, which standards vary by household size and take into account the household’s regularly recurring monthly needs, shelter, fuel for heating, home energy needs, supplemental home energy needs and other relevant factors affecting household needs.]
Reserved

[Each hospital, or an intermediary making a payment to a hospital, will determine which patients qualify as low-income persons eligible for additional payments by a verifiable process subject to the above eligibility conditions. Each hospital must maintain documentation of the patient's eligibility for additional payments and must document the amounts claimed for additional payments. The supporting documentation must include written verification from a local social services district or the Department attesting to the person's eligibility for Home Relief. Such supporting documentation may be in the form of a photocopy of the person's current valid official benefits card or a copy of an eligibility verification confirmation received from the Department's Electronic Medicaid Eligibility Verification System (EMEVS), which system includes information with respect to persons eligible for Home Relief and additional payments, or other verifiable documentation acceptable to the Department which establishes that the person has met the income and resource standards for Home Relief on the date the services were provided.

A "disproportionate share hospital" for purposes of receiving additional disproportionate share payments under this provision is any hospital which furnishes medical or remedial care to a qualified low-income person without expectation of payment from the person due to the patient's inability to pay as documented by his or her having met the income and resource standards for Home Relief benefits as set forth above, and meets the requirements of State Plan Amendment 9426. In addition, a "disproportionate share hospital" (except hospitals serving an in-patient population predominantly comprised of persons under 18 years of age and hospitals which did not offer non-emergency obstetrical care on or before December 21, 1987) must have at least two obstetricians with staff privileges who have agreed to provide obstetrical care and services to Medicaid-eligible patients on a non-emergency basis.

The amount of this disproportionate share adjustment will vary by hospital and reflect the dollar amount of payments either from the State directly, or through an intermediary, to the hospital for services provided to low income patients. For each hospital such adjustments shall be paid in the normal Medicaid payment process, or intermediary payment process, and according to established rates or fees, for fee-for-service program services or by the intermediary for its services. To receive payment of this adjustment each hospital must submit a claim in the form and manner specified by this Department, or the intermediary, as appropriate.]
Rates for specialty hospital services delivered on and after July 1, 2011 will be determined in accordance with the following described methodology.

(a) “Specialty hospital” as used in this Part of this Attachment is the program and site for which OPWDD has issued an operating certificate to operate as a specialty hospital for persons with developmental disabilities. “Provider” as used in this Part of this Attachment is the corporation or other organization operating a specialty hospital.

(b) **Unit of service** - The unit of service will be a day.

(c) **Rates** will be as follows:

<table>
<thead>
<tr>
<th>Rate period</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>07/01/2011-12/31/2014</td>
<td>$895.16</td>
</tr>
<tr>
<td>01/01/2015-03/31/2015</td>
<td>$898.93</td>
</tr>
<tr>
<td>On and after 04/01/2015</td>
<td>$910.94</td>
</tr>
</tbody>
</table>

(d) **Rate appeals** - A provider may appeal for an adjustment to its rate that would result in an annual increase of $5,000 or more in the provider’s allowable costs and that is needed because of bed vacancies. A bed vacancy appeal may be requested when the occupancy rate of the specialty hospital is less than 100 percent. The appeal request must be made within one year of the close of the rate period in which the bed vacancies occurred or within six months of the notification to the provider of the rate amount, whichever is later. OPWDD will only grant the appeal if the provider has demonstrated that the vacancies were unavoidable. No amount granted on appeal will result in Medicaid payments exceeding the provider’s specialty hospital costs of providing Medicaid services for the rate period.
(e) Additional Disproportionate Share Payment - Specialty Hospital

Disproportionate share hospital payments under this plan cannot exceed the State disproportionate share allotment calculated in accordance with section 1923(f) of the Social Security Act and cannot exceed the facility specific disproportionate share hospital payment limits at section 1923(g) of the Social Security Act.

Effective October 1, 2014, the State will make disproportionate share hospital (DSH) payments to privately operated specialty hospitals certified by the New York State Office for People With Developmental Disabilities (OPWDD). The annual total aggregate amount of the payment will be $10,000. Currently Terence Cardinal Cooke Health Care Center is the only privately operated specialty hospital certified by the New York State Office for People with Developmental Disabilities (OPWDD). Should additional hospitals qualify for this DSH payment, the total aggregate amount of payment will be distributed proportionately based on each hospital’s relative percentage of Medicaid days to total Medicaid days of all hospitals eligible for a payment under this provision.
New York
14

[(b)] Costs (including legal fees, accounting and administrative costs, travel costs, and the costs of feasibility studies) attributable to the negotiation or settlement of the sale or purchase of any capital asset (by acquisition or merger) for which any payment has been previously made under Medicaid, shall not be allowable for reimbursement.

(c) If a facility's real property assets are sold or leased, or subject to any other transaction which results in a net decrease in the real property cost to the provider, the real property cost portion of a facility's rate shall be prorated accordingly. For the purpose of this section, real property assets refer to buildings, building improvements and fixed equipment. Real property costs are the costs directly related to real property assets.

(ix) A facility's annual rental payments for real property may be considered an allowable cost subject to the following conditions:

(a) The lease is reviewed by and acceptable to Office of Mental Retardation and Developmental Disabilities and any other State agency which must by law or regulation review and approve reimbursement rates.

(b) The lease agreement must be considered 'an arm's-length transaction' not involving either an affiliate controlling person, immediate family or principal stockholder.

(c) The arm's-length transaction requirement may be waived by the commissioner upon application for those corporations holding title to the specialty hospital's physical plant, created pursuant to the Not-for-Profit Corporation Law with the approval of the commissioner.

(d) For the purposes of this section, affiliate means:

(1) With respect to a partnership, each partner thereof.

(2) With respect to a corporation, each office, director, principal stockholder and controlling person thereof.
(3) With respect to a natural person, each member of said person's immediate family or each partnership and each partner of such person or each corporation in which said person or any affiliate of said person is an officer, director, principal stockholder or controlling person.

(e) For the purposes of this section, controlling person of any corporation, partnership, or other entity means any person who by reason of a direct or indirect ownership interest (whether of record or beneficial) has the ability, acting either alone or in concert with others with ownership interest, to direct or exert a controlling influence on the direction of the management policies of said corporation, partnership or other entity. Neither the commissioner, nor any employee of the OMRDD, nor any member of a local legislative body of a county or municipality, nor any county or municipal official except when acting as the administrator of a facility, shall by reason of his or her official position be deemed a controlling person of any corporation, partnership or other entity. Nor shall any person who serves as an executive director, officer, administrator, principal employee or other employee of any corporation, partnership or other entity or as a member of a board of directors or trustees of any corporation be deemed to be a controlling person of such corporation, partnership or other entity solely as a result of such position or his or her official actions in such position.

(f) For the purposes of this section, immediate family means brother, sister, grandparent, grandchild, first cousin, aunt or uncle, spouse, parent or child of such person whether such relationship arises by reason of birth, marriage or adoption.

(g) For the purposes of this section, principal stockholder of a corporation means any person who beneficially owns, holds or has the power to vote, 10 percent or more of any class of securities issued by said corporation.

(h) The rental amount is comparable to similar leases for properties with similar functions in the same geographical area.
New York

16

(j) If the above criteria are not met, reimbursement for lease costs will be determined in accordance with section (d)(8)(x) and (xii).

(j) Lease options to renew shall not be exercised without review and approval of the parties listed in section (d)(8)(ix)(a). Such review and decision shall occur whenever possible more than 30 days before the last date the option may be exercised, the date of which the facility has notified OMRDD in accordance with section (d)(8)(ix)(k).

(k) Request for approval of lease renewals shall be submitted whenever possible at least 120 days prior to the last date for the exercise of the lease renewal option.

(x) Depreciation shall be an allowable cost when based upon factors of historical costs and useful life of buildings, fixed equipment and/or capital improvements. For the purposes of this section:

(a) Unless an exception is made by the commissioner, the useful life shall be the higher of the reported useful life or those from the Estimated Useful Lives of Depreciable Hospital Assets (1983 edition), published by the American Hospital Association and available by writing the American Hospital Association, 840 Lake Shore Drive, Chicago, IL 60611. On an exception basis, a useful life that is based upon historical experience as shown by documentary evidence and approved by OMRDD may be allowed.

(b) The depreciation method used shall be the straight-line method.

(c) In the event that the historical cost of the facility cannot be adequately determined by the commissioner, an appraisal value shall be the basis for depreciation. The appraisal shall produce a value approximating the cost of reproducing substantially identical assets of like type, quality and quantity at a price level in a reasonably competitive market as of the date of acquisition. Such appraisal shall be conducted by an appraiser approved by OMRDD and pursuant to a method approved by OMRDD and the cost of the appraisal is also allowable.

August 17, 2001

Supersedes TN #88-14

Effective Date October 1, 2000

TN #00-49 Approval Date August 17, 2001

Effective Date January 1, 2001
Costs related to moveable equipment, furniture and fixtures may be considered an allowable cost subject to the following:

(a) Depreciation based upon historical cost of moveable equipment, furniture and fixtures is considered an allowable cost. The useful life shall be the higher of the reported useful life, or those from the Estimate Useful Lives of Depreciable Hospital Assets (1983 edition), published by the American Hospital Association and available by writing to the American Hospital Association, 840 Lake Shore Drive, Chicago, IL 60611. On an exception basis, a useful life that is based upon historical experiences as shown by documentary evidence and approved by OMRDD may be allowed.

(b) The facility shall use the straight-line, double-declining balance or sum-of-the-year’s digits depreciation method. The depreciation method utilized must remain consistent throughout the useful life of an asset.

(c) Lease payments may be an allowable cost if the payments are made under a lease which is an arm’s-length transaction as described in section (d)(8)(ix)(b).

(d) Any personal property and equipment transactions shall be through a multiple bid process and entered into at a fair market value price.

(e) If lease payments are not made pursuant to an arm’s-length agreement, allowable costs will include allowable depreciation, the associated interest expense, if any, and other related expenses, including but not limited to maintenance costs.

Interest cost may be considered an allowable cost subject to the following:

(a) Interest for capital indebtedness, where the capital indebtedness does not exceed the current Office of Mental Retardation and Developmental Disabilities approved value of the property, will be considered allowable.

(b) An interest rate shall not be in excess of the amount a prudent borrower would pay at the time the loan was incurred.
(c) The loan agreement must be entered into between parties not related through control, ownership, affiliation, or personal relationship as defined in section (d)(8)(ix)(d), unless this provision is waived by the commissioner. Such waiver shall be based on, but not limited to, a demonstration of need for the program and cost savings resulting from the transaction.

(d) Interest income generated from the facility’s revenues for the operation of the facility shall be used to offset interest expense incurred during the same reporting period.
Notwithstanding the foregoing, a facility is not required to use the following to offset interest expense: income earned on qualified pension funds, income from gifts or grants which is donor-restricted, or income earned on secure investments pursuant to section (d) (10).

(e) Interest on working capital indebtedness in accordance with standards contained herein will be considered allowable. In the event that a loan is not in accordance with the standards listed above, the approval of the commissioner is required.

(xiii) Costs of related organizations, other than costs incurred pursuant to a lease, rent or purchase of real property, may be considered an allowable cost subject to the following:

(a) A “related organization” means any entity of which the provider is in control or which the provider is controlled by (subject to the limitations in section (d)(8)(ix)(e), either directly or indirectly, or where a common ownership or financial interest exists in an entity which supplies goods and/or services to the facility.

(b) The costs of goods and/or services furnished to a facility, within the course of normal business operations, by a related organization are allowable at the cost to the related organization, or the market price of comparable goods and/or services available in the facility’s region, whichever is lower.]
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT
MEDICAL ASSISTANCE PROGRAM

Description of the Policy and the Methods
to be Used in Establishing Payment Rates

The Division of Health Economics of the New York State Department of Health has been charged with the responsibility of studying and determining fees for providers of medical and paramedical care.

In pursuit of these fee studies, the Division of Health Economics meets with the representative professional groups, studies published and unpublished fee surveys, makes comparisons with schedules of insurance carriers and Workmen’s Compensation, and conducts informal surveys as the occasion demands.

When the Division of Health Economics develops a fee schedule which approximates average prevailing fees in the State, a fee schedule and supporting position paper are sent to all members of the Interdepartmental Committee on Health Economics. This Committee is composed of representatives from the Departments of Education (Division of Vocational Rehabilitation, Social Services, Health, Mental Hygiene, Correction, Civil Service, Insurance, Workmen’s Compensation and the Division of the Budget. The Committee may approve the schedule as presented or make modifications. The schedule is then recommended to the Commissioner of Health who, if in agreement, recommends approval to the Director of the Division of the Budget. The Budget Director may then approve and promulgate the schedule.

Promulgated schedules apply to all State programs except Workmen’s Compensation, and supersede all existing schedules including those previously promulgated by the Department of Education, Health and Social Welfare.

Fees contained in the schedules are to be considered full payment of the services rendered. Under the Medicaid Assistance Program, which is administered by local welfare districts, these fees represent maximum allowances for purposes of State reimbursement. Each local welfare district may determine the fees paid to practitioners for services to eligible recipients.

Fees for services or procedures which are not included in the fee schedule may be determined on an individual basis by the appropriate public agency. However, such determinations must be reported promptly to the Division of Health Economics which reviews the fee for the given procedure and subsequently recommends a fee for approval by the Interdepartmental Committee on Health Economics and for possible incorporation in the fee schedule.

TN #74-2 Approval Date December 31, 1974
Supersedes TN --- Effective Date January 1, 1974
Across the Board Reductions to Payments

(1) For dates of service on and after September 16, 2010, through and including March 31, 2011, payments for services as specified in paragraph (2) of this Attachment shall be reduced by 1.1%, provided payment is made no later than March 31, 2011.

(2) Payments in this Attachment subject to the reduction in paragraph (1) include the following:

a) Physician Services.

b) Statewide Patient Centered Medical Home and the Adirondack Medical Home Multipayer Program for physicians, hospital based clinics and diagnostic and treatment centers. Pages 1(A)(i-1(A)(iii); 1(c)(i)(A)-1(c)(i)(H)

c) E-prescription financial incentive payments to dentists, podiatrists, optometrists, nurse midwives, and nurse practitioners. Page 1(A)(iv)-1(A)(viii)

d) Reimbursement for dental services, podiatrists, optometrists, chiropractic services, nurse midwives, nurse practitioners, and clinical psychologists. Page 1(a)

e) Methadone Maintenance Treatment Program (MMTP) services. Page 1(b)

f) Outpatient reimbursement for Acute Care Children’s Hospitals. Page 1(b)(ii)

g) Ordered Ambulatory Services. Pages 1(c)-1(c)(i)

h) Methadone Maintenance Treatment Program (MMTP) services and day health care services rendered to patients with HIV/AIDS which are provided in Freestanding Clinics certified under Article 28 of the State Public Health Law. Page 1(c)-1(d)

i) Additional funding for Freestanding Clinics licensed under Article 28 of the State Public Health Law providing services to persons with developmental disabilities. Page 1(d)-1(d)(i)

j) Services for medically supervised chemical dependence treatment and medically supervised withdrawal services provided in Freestanding Clinics licensed by Article 28 of the State Public Health law, excluding Federally Qualified Health Centers. Page 1(d)(i)
k) Ambulatory Patient Group (APG) reimbursement for hospital outpatient and ambulatory surgery services; and for freestanding clinics and ambulatory surgery centers services, except for those services provided on federally recognized Indian nations to Native Americans.

l) Ordered Ambulatory Services performed by a freestanding clinic on an ambulatory basis.

m) AIDS/HIV Adult Day Health Care Services provided by a freestanding clinic.

n) Services to AIDS/HIV positive patients; medically supervised chemical dependence treatment; and medically supervised withdrawal services provided in Hospital Based Outpatient Departments and Freestanding Clinics certified under Article 28 of the State Public Health law.

o) Workforce Recruitment and Retention payment for freestanding clinics.

p) Products of Ambulatory Care reimbursement for Hospital Based Clinics and Freestanding Clinics.

q) Office of Mental Retardation and Developmental Disabilities (OMRDD) Clinic Treatment Programs and OMRDD Clinic Day Treatment Programs provided in facilities certified under Article 16 of the State Mental Hygiene Law.

r) Chemical Dependence Medically Supervised Treatment and Chemical Dependence Medically Supervised Withdrawal Services provided in facilities certified solely under Article 32 of the State Mental Hygiene Law.

s) Office of Mental Health Outpatient Programs licensed under 14 NYCRR Parts 579 and 585; including Clinic, Day and Continuing Treatment Programs.

t) Office of Mental Health Intensive Psychiatric Rehabilitation Treatment programs including, rehabilitative services for residents of community based residential programs; Personalized Recovery Oriented Services (PROS) Community Rehabilitation and Support program; Intensive Rehabilitation; Ongoing Rehabilitation and Support programs; and Assertive Community Treatment (ACT) programs.

42 CFR 447, 434, 438, and 1902(a)(4), 1902(a)(6), and 1903

Payment Adjustment for Provider Preventable Conditions

The Medicaid agency meets the requirements of 42 CFR Part 447, Subpart A, and sections 1902(a)(4), 1902(a)(6), and 1903 with respect to non-payment for provider-preventable conditions.

Other Provider-Preventable Conditions

The State identifies the following Other Provider-Preventable Conditions for non-payment under Section 4.19 (B) of this State plan.

_X_ Wrong surgical or other invasive procedure performed on a patient; surgical or other invasive procedure performed on the wrong body part; surgical or other invasive procedure performed on the wrong patient.

___ Additional Other Provider-Preventable Conditions identified below:

Effective July 1, 2011, Medicaid will not pay the incremental cost associated with the above situations occurring within an ambulatory health care setting. Implementation of this provision will include a ramp-up period and will be fully implemented on July 1, 2012. During the ramp-up implementation period, in the event cases are identified, Medicaid payment will not be made for such cases.

Physician Services

Fee Schedules are developed by the Department of Health and approved by the Division of the Budget.

For primary care and specialty physicians meeting the eligibility and practice criteria of and enrolled in the HIV Enhanced Fees for Physicians (HIV-EFP) program, and the Preferred Physicians and Children’s program (PPAC), fees for visits are based on the Products of Ambulatory Care (PAC) structure: fees are based on recipient diagnosis, service location and visit categories which reflect the average amount of physician time and resources for that level of visit. The PAC fee structure incorporates a regional adjustment for upstate and downstate physicians. Reimbursement for the initial and subsequent prenatal care and postpartum visit for MOMS is based on the Products of Ambulatory Care (PAC) rate structure. Reimbursement for delivery only services and total obstetrical services for physicians enrolled in MOMS is fixed at 90% of the fees paid by private insurers. Ancillary services and procedures performed during a visit must be claimed in accordance with the regular Medicaid fee schedule described in the first paragraph above. HIV-EFP, PPAC and MOMS fees were developed by the Department of Health and approved by the Division of the Budget. For services provided on and after June 1, 2003, a single fee, regionally adjusted (upstate and downstate) and based on program specific average cost per visit shall be established for the HIV-EFP and PPAC programs, respectively, and shall be paid for each visit. Visits for these programs shall be categorized according to the evaluation and management codes within the CPT-4 coding structure.

Effective September 1, 2012, reimbursement will be provided to physicians for breastfeeding health education and counseling services. Physicians must be currently registered and licensed by the State in accordance with 42 CFR 440.60(a) and also International Board Certified Lactation Consultants (IBCLC). Date of implementation will occur on the first day of the month following 30 days after Federal approval of this provision of the State Plan.

Effective January 1, 2018 reimbursement will be provided to outpatient clinics of general hospitals (outpatient clinic) and diagnostic and treatment centers (D&T) for primary care practitioners who provide home visit primary care services to a patient who is unable to leave his or her residence to receive services at the outpatient clinic or D&T without unreasonable difficulty due to circumstances, including but not limited to, clinical impairment.

1. The patient must have a pre-existing clinical relationship with the outpatient clinic or D&T, or with the health care professional providing the service.

2. The primary care practitioner must be employed by either the outpatient clinic or D&T and acting at the direction of that provider.

3. These services are provided by a primary care practitioner which includes the following: physician, physician assistant, nurse practitioner or licensed midwife.

4. Primary care services are defined as services ordinarily provided to patients on-site at the outpatient clinic or D&T and cannot be home care services as stated in Chapter 3602, subdivisions 1 and 2. https://codes.findlaw.com/ny/public-health-law/pbh-sect-3602.html

Supersedes TN#: #12-0016 Effective Date: 1/1/18
 Collaborative Care Services: Reimbursement for Physicians' Services

Effective January 1, 2015, reimbursement will be provided to physicians for Collaborative Care Services provided to patients diagnosed with depression pursuant to the methodology for Collaborative Care Services for Freestanding Clinics outlined in Attachment 4.19-B, except reimbursement for Physicians' Services does not include a retainage withholding or payment. Reimbursement shall be a monthly case rate of $112.50 per month for each patient enrolled in Collaborative Care Services. Reimbursement will be provided for a maximum of 12 months. With the approval of the New York State Office of Mental Health, reimbursement will be provided for an additional 12 months at a rate of $75.00 per month. Physicians must provide the minimum amount of services to enrollees as set forth in item 9 of the Supplement to Attachment 3.1-A of the Plan. Effective January 1, 2018, reimbursement will be provided to physicians for Collaborative Care Services provided to patients with other mental illness diagnoses pursuant to the methodology described in this paragraph.
Supplemental Medicaid Payments for Eligible Professional Services

1. State University of New York (SUNY)

(a) Effective April 1, 2011, supplemental payments will be made to State University Eligible Medical Professional Providers for services eligible under this provision (“Eligible Services”). Supplemental payments for Eligible Services will be equal to the difference between the Average Commercial Rate, as defined below, and Medicaid payments otherwise made under this state plan. The supplemental payment will only be applicable to the professional component of the services provided.

(b) State University Eligible Medical Professional Providers are:

(1) Physicians, nurse practitioners and physician assistants;

(2) Licensed in the State of New York; and

(3) Participating in a plan for the management of clinical practice at the State University of New York.

Excluded providers are federally qualified health centers (FQHCs) and rural health centers (RHCs).

(c) Eligible Services include only those services provided by a State University Eligible Medical Professional Provider while acting in their capacity as a participant in a plan for the management of clinical practice at the State University of New York. The following clinical practices will participate:

(1) SUNY Syracuse

(2) SUNY Buffalo, and

(3) SUNY Stony Brook

(d) Services excluded are those utilizing procedure codes not reimbursed by Medicaid, clinical laboratory services, dual eligibles except where Medicaid becomes the primary payer, and Managed Care. Managed Care data will be included only when a separate fee for service payment has been made to an eligible provider. Non commercial payers such as Medicare are excluded. Additionally, supplemental payment will not be allowed on all inclusive payments where the base payment includes the physician cost.

(e) Supplemental payments will be made as an annual aggregate lump sum payment, based on the Medicaid data applicable to dates of service in the calendar year. Initial payments will be based on claims processed within 3 months after the calendar year for those dates of service. A final payment will be made one year following the initial payment to capture those claims for the payment year date of service processed subsequent to the initial payment. Supplemental payments will not be made prior to the delivery of services.

TN #11-07-A Approval Date February 25, 2013
Supersedes TN NEW Effective Date April 1, 2011
New York
1.2

(f) Calculating the Average Commercial Rate (ACR) For Matched Procedures

(1) The ACR will be calculated separately for each plan for the management of clinical practice at the State University of New York. The ACR will be based on the applicable rates for the appropriate region, and all commercial payers are utilized except for the New York State Health Insurance Program (NYSHIP) Empire Plan.

(2) The ACR will be calculated annually using commercial payer data from the most recently completed twelve month period by Date of Service between July and June. The initial calculation, effective beginning April 1, 2011, will be based on commercial payer data from the period of July 1, 2009, through June 30, 2010 Date of Service.

(3) For Eligible Service procedures (additionally distinguished by modifier and point of service) that are billed to Medicaid using codes that correspond to those recognized by commercial payers (“Matched Procedures”), a Procedure-Specific ACR will be calculated for each Matched Procedure by dividing the sum of total commercial payments for the Matched Procedure by the total number of the Matched Procedures paid by commercial payers. For services where physician extenders may be used the applicable percentage of the ACR will be applied.

g) Calculating ACR For Non-Matched Procedures

(1) For Eligible Service procedures that are billed to Medicaid using codes that do not correspond to those recognized by commercial payers (“Non-Matched Procedures”), a Procedure-Specific ACR will be calculated for each Non-Matched Procedure by calculating the overall average percentage of the matched procedures commercial payments to Medicaid payments.

(2) This percentage is applied to the average Medicaid payments per unit for the non matched services to establish an ACR proxy payment per unit. The units for each non matched Medicaid service is multiplied by the ACR proxy, and then totaled to determine the payment ceiling.

(3) The difference between the total Medicaid payments for the unmatched services and the ACR proxy total is the supplemental payment for unmatched services.
Determining the Supplemental Payment Amount

1. For each Eligible Service procedure, the Procedure-Specific Ceiling Amount is the product of the Procedure-Specific ACR and the number of times the procedure was paid by Medicaid to State University Eligible Medical Professional Providers. The sum of all Procedure-Specific Ceiling Amounts for all Eligible Service procedures is the Supplemental Payment Ceiling.

2. The Supplemental Payment Amount is calculated by subtracting total Medicaid payments made for Eligible Services from the Supplemental Payment Ceiling.

ACR Calculation Example

Example 1. Calculation of Average Percentage of Commercial Payments to Medicaid Payments

Attachment 4.19-B

New York

1.3

(h) Determining the Supplemental Payment Amount

1. For each Eligible Service procedure, the Procedure-Specific Ceiling Amount is the product of the Procedure-Specific ACR and the number of times the procedure was paid by Medicaid to State University Eligible Medical Professional Providers. The sum of all Procedure-Specific Ceiling Amounts for all Eligible Service procedures is the Supplemental Payment Ceiling.

2. The Supplemental Payment Amount is calculated by subtracting total Medicaid payments made for Eligible Services from the Supplemental Payment Ceiling.

Total Fees $48,509.88 $132,658.13

Average percentage of Commercial Payments to Medicaid Payments 273%
(i) **Agreed Upon Procedures Requirement for ACR and supplemental payment calculation**

(1) An independent accountant must conduct an Agreed Upon Procedures engagement to evaluate the ACR and supplemental payment calculations. Each plan may choose its own independent accountant, but the actual core Agreed Upon Procedures to be conducted must be presented to the State for approval. In order to evaluate the ACR and supplemental calculation, the following minimum core procedures are to be conducted by the independent accountants:

   (a) Validate if the Average Commercial Rate fee schedule utilized in the calculation is appropriate for the time period of the calculation.

   (b) Select a random sample of at least 40 procedure codes with the highest amount of total payments to verify the mathematical accuracy of the calculation.

   (c) Validate that only eligible providers are present in the calculation as described under this provision.

The independent accountants will design techniques that will enable them to render an “Independent Accountant’s Report on Applying Agreed-Upon Procedures” to the practice plan for the State.
Supplemental Medicaid Payments for Eligible Professional Services

2. Roswell Park Cancer Institute: Payment up to the Average Commercial Rate

(a) Effective April 1, 2011, supplemental payments will be made to Roswell Park Cancer Institute Clinical Practice Plan providers for services eligible under this provision (“Eligible Services”). Supplemental payments for Eligible Services will be equal to the difference between the Average Commercial Rate, as defined below, and Medicaid payments otherwise made under this state plan. The supplemental payment will only be applicable to the professional component of the services provided. However, supplemental fee payments will not be available for services provided at facilities participating in the Medicare Teaching Election Amendment.

(b) Roswell Park Eligible Medical Professional Providers are:

(1) Physicians, Nurse Practitioners and Physician Assistants; who are

(2) Employed by a public benefit corporation, or a non-state operated public general hospital operated by a public benefit corporation or who are providing professional services at a public benefit corporation facility as either a member of a practice plan or an employee of a professional corporation or limited liability corporation under contract to provide services to patients of such a public benefit corporation for those patients eligible for Medicaid; and are

(3) Licensed by the State of New York.

Excluded providers are federally qualified health centers (FQHCs) and rural health centers (RHCs).

(c) Eligible Services include only those services provided by a Roswell Park Eligible Medical Professional Provider while acting in their capacity as a participant in a plan for the management of the clinical practice at Roswell Park.

(d) Services excluded are those utilizing procedure codes not reimbursed by Medicaid, clinical laboratory services, dual eligibles except where Medicaid becomes the primary payer, and Managed Care. Managed Care data will be included only when a separate fee for service payment has been made to an eligible provider. Non commercial payers such as Medicare are excluded. Additionally, supplemental payment will not be allowed on all inclusive payments where the base payment includes the physician cost.
New York
1.6

(e) Supplemental payments will be made as an annual aggregate lump sum payment, based on the Medicaid data applicable to dates of service in the calendar year. Initial payments will be based on claims processed within 3 months after the calendar year for those dates of service. A final payment will be made one year following the initial payment to capture those claims for the payment year date of service processed subsequent to the initial payment. Supplemental payments will not be made prior to the delivery of services.

(f) Calculating the Average Commercial Rate (ACR) For Matched Procedures.

(1) The ACR will be calculated for Roswell based on applicable rates for the appropriate region, utilizing the top 5 commercial payers based on volume.

(2) The ACR will be calculated annually before each state fiscal year using commercial payer data from the most recently completed twelve month period by Date of Service between July and June. The initial calculation, effective beginning April 1, 2011, will be based on commercial payer data from the period of July 1, 2010, through June 30, 2011 Date of Service.

(3) For Eligible Service procedures (additionally distinguished by modifier and point of service) that are billed to Medicaid using codes that correspond to those recognized by commercial payers (“Matched Procedures”), a Procedure-Specific ACR will be calculated for each Matched Procedure by dividing the sum of total commercial payments for the Matched Procedure by the total number of the Matched Procedures paid by commercial payers. For services where physician extenders may be used the applicable percentage of the ACR will be applied.

(g) Calculating ACR for Non-Matched Procedures

(1) For Eligible Service procedures that are billed to Medicaid using codes that do not correspond to those recognized by commercial payers (“Non-Matched Procedures”), a Procedure-Specific ACR will be calculated for each Non-Matched Procedure by calculating the overall average percentage of the matched procedures commercial payments to Medicaid payments.

(2) This percentage is applied to the average Medicaid payments per unit for the non matched services to establish an ACR proxy payment per unit. The units for each non matched Medicaid service is multiplied by the ACR proxy, and then totaled to determine the payment ceiling.

(3) The difference between the total Medicaid payments for the unmatched services and the ACR proxy total is the supplemental payment for unmatched services.
(h) Determining the Supplemental Payment Amount

(1) For each Eligible Service procedure, the Procedure-Specific Ceiling Amount is the product of the Procedure-Specific ACR and the number of times the procedure was paid by Medicaid to Eligible Medical Professional Providers. The sum of all Procedure-Specific Ceiling Amounts for all Eligible Service procedures is the Supplemental Payment Ceiling.

(2) The Supplemental Payment Amount is calculated by subtracting total Medicaid payments made for Eligible Services from the Supplemental Payment Ceiling.

Supplemental Payment $20,609.02

TN #11-07-B Approval Date February 25, 2013

Supersedes TN NEW Effective Date April 1, 2011
(i) **Agreed Upon Procedures Requirement for ACR and supplemental payment calculation**

(1) **An independent accountant must conduct an Agreed Upon Procedures engagement to evaluate the ACR and supplemental payment calculations.** Each plan may choose its own independent accountant, but the actual core Agreed Upon Procedures to be conducted must be presented to the State for approval. In order to evaluate the ACR and supplemental calculation, the following minimum core procedures are to be conducted by the independent accountants:

   (a) Validate if the Average Commercial Rate fee schedule utilized in the calculation is appropriate for the time period of the calculation.

   (b) Select a random sample of at least 40 procedure codes with the highest amount of total payments to verify the mathematical accuracy of the calculation.

   (c) Validate that only eligible providers are present in the calculation as described under this provision.

The independent accountants will design techniques that will enable them to render an “Independent Accountant’s Report on Applying Agreed-Upon Procedures” to the practice plan for the State.
Supplemental Medicaid Payments for Professional Services

3. Medicare Fee Equivalent Calculation

a. Effective April 1, 2011, supplemental payments will be made to physicians, nurse practitioners and physician assistants who are employed by a Public Benefit Corporation (PBC), or a non-state operated public general hospital operated by a PBC or who are providing professional services at a PBC facility as either a member of a practice plan or an employee of a professional corporation or limited liability corporation under contract to provide services to patients of such a public benefit corporation for those patients eligible for Medicaid. The supplemental payments will be applicable only to the professional component of the eligible services provided.

b. Eligible providers are affiliated with:
   i. New York City Health and Hospital Corporation (HHC), excluding facilities participating in the Medicare Teaching Election Amendment.
   ii. Nassau University Medical Center, [and]
   iii. Westchester Medical Center, and
   iv. Erie County Medical Center, effective July 1, 2015.

Excluded facilities are Federal Qualified Health Centers and Rural Health Centers.

c. Supplemental payments for eligible services will equal the difference between the Medicare Part B fee schedule rate and the average Medicaid payment per unit otherwise made under this Attachment.

d. Supplemental payments will be made as an annual aggregate lump sum, and be based on the Medicaid data applicable to the calendar year. Initial payments will be based on claims processed within 3 months after the calendar year. A final payment will be made one year following the initial payment to capture those claims for the payment year dates of service processed subsequent to the initial payment. Supplemental payments will not be made prior to the delivery of services.

e. Services excluded are those utilizing procedure codes not reimbursed by Medicaid, clinical laboratory services, dual eligibles except where Medicaid becomes the primary payer, and Managed Care. Managed Care data will be included only when a separate fee-for-service payment has been made to an eligible provider. Non-commercial payers such as Medicare are excluded. Additionally, supplemental payment will not be allowed on all inclusive payments where the base payment includes the physician cost.
Calculating the Supplemental Payment

(1) Each group will calculate their own supplemental payments for professional services using the following methodology:

(a) The identification of claims will be based on individual Current Procedural Terminology (CPT) codes contained in the New York State Medicaid program claims processing system- eMedNY.

(b) Supplemental payments for eligible professional services are available only for benefits covered by Medicare.

(2) For Medicaid matched services, a Medicare Part B fee equivalent payment will be calculated by multiplying the Medicaid equivalent services/procedures by the applicable Medicare Part B fee schedule amount.

(3) For eligible service procedures that are billed to Medicaid using codes that do not correspond to the applicable Medicare fee schedule (“non-matched” procedure), the percentage computed using a calculation of the overall average percent of the Medicaid payment to Medicare payment for the matched procedures will be applied to the non-matched Medicaid procedures.

(4) The supplemental payment will equal the difference between the Medicare payment per procedure calculated in accordance with the methodology multiplied by the number of Medicaid claims for each procedure, and the applicable Medicaid payments for such procedures. For services where physician extenders may be used the computation will be based on the applicable percentage of the Medicare equivalent not the full physician payment.

(5) The date of service will dictate the fee schedule to be used. The supplemental payment will be calculated annually using the most recent Medicare Part B fee schedule in effect applicable to the dates of service of the eligible services. The calculation will be based on the Medicare Part B fee schedule for each provider's geographic region and the Medicaid data applicable to the calendar year.

(6) The Department will review the submitted computation and attest that the data and computation used to compute the supplemental payment are accurate and comply with the methodology included in the State Plan.
Increased Primary Care Service Payment 42 CFR 447.405, 447.410, 447.415

Physician Services 42 CFR 447.405 Amount of Minimum Payment

The state reimburses for services provided by physicians meeting the requirements of 42 CFR 447.400(a) at the Medicare Part B fee schedule rate using the Medicare physician fee schedule rate in effect in calendar years 2013 and 2014 or, if greater, the payment rates that would be applicable in those years using the calendar year 2009 Medicare physician fee schedule conversion factor. If there is no applicable rate established by Medicare, the state uses the rate specified in a fee schedule established and announced by CMS.

☐ The rates reflect all Medicare site of service and locality adjustments. [refer to Addendum]

☐ The rates do not reflect site of service adjustments, but reimburse at the Medicare rate applicable to the office setting.

☐ The rates reflect all Medicare geographic/locality adjustments.

☐ The rates are statewide and reflect the mean value over all counties for each of the specified evaluation and management and vaccine billing codes.

The following formula was used to determine the mean rate over all counties for each code:

Method of Payment

☐ The state has adjusted its fee schedule to make payment at the higher rate for each E&M and vaccine administration code. [refer to Addendum]

☐ The state reimburses a supplemental amount equal to the difference between the Medicaid rate in effect on July 1, 2009 and the minimum payment required at 42 CFR 447.405.

Supplemental payment is made: ☐ monthly ☐ quarterly

Primary Care Services Affected by this Payment Methodology

☐ This payment applies to all Evaluation and Management (E&M) billing codes 99201 through 99499.

☐ The State did not make payment as of July 1, 2009 for the following codes and will not make payment for those codes under this SPA (specify codes). [refer to Addendum]

99288, 99318, 99339, 99340, 99358, 99359, 99360, 99363, 99364, 99366, 99367, 99368, 99374, 99375, 99377, 99378, 99379, 99380, 99401, 99402, 99403, 99404, 99408, 99409, 99411, 99412, 99420, 99429, 99441, 99442, 99443, 99444, 99445, 99450, 99455, 99456, 99461, 99464, 99499, 90461

TN #13-04 Supersedes TN NEW Approval Date May 30, 2013 Effective Date January 1, 2013
(Primary Care Services Affected by this Payment Methodology - continued)

☑ The state will make payment under this SPA for the following codes which have been added to the fee schedule since July 1, 2009 (specify code and date added).

99224 (4/1/11), 99225 (4/1/11), 99226 (4/1/11), 90460 (1/1/13), 90471 (1/1/13), 90472 (1/1/13), 90473 (1/1/13) & 90474 (1/1/13)

**Physician Services - Vaccine Administration**

For calendar years (CYs) 2013 and 2014, the state reimburses vaccine administration services furnished by physicians meeting the requirements of 42 CFR 447.400(a) at the lesser of the state regional maximum administration fee set by the Vaccines for Children (VFC) program or the Medicare rate in effect in CYs 2013 and 2014 or, if higher, the rate using the CY 2009 conversion factor.

☐ Medicare Physician Fee Schedule rate

☑ State regional maximum administration fee set by the Vaccines for Children program

☐ Rate using the CY 2009 conversion factor

**Documentation of Vaccine Administration Rates in Effect 7/1/09**

The state uses one of the following methodologies to impute the payment rate in effect at 7/1/09 for code 90460, which was introduced in 2011 as a successor billing code for billing codes 90465 and 90471.

☐ The imputed rate in effect at 7/1/09 for code 90460 equals the rate in effect at 7/1/09 for billing codes 90465 and 90471 times their respective claims volume for a 12 month period which encompasses July 1, 2009. Using this methodology, the imputed rate in effect for code 90460 at 7/1/09 is: __________.

☑ A single rate was in effect on 7/1/09 for all vaccine administration services, regardless of billing code. This 2009 rate is: $17.85.

☑ Alternative methodology to calculate the vaccine administration rate in effect 7/1/09: For VFC vaccines the vaccine product was billed with the “SL” modifier. The VFC administration fee was reimbursed.

Note: This section contains a description of the state’s methodology and specifies the affected billing codes.
Effective Date of Payment

E & M Services

This reimbursement methodology applies to services delivered on and after January 1, 2013, ending on December 31, 2014 but not prior to December 31, 2014. All rates are published at

https://www.emedny.org/ProviderManuals/Physician/index.aspx

Vaccine Administration

This reimbursement methodology applies to services delivered on and after January 1, 2013, ending on December 31, 2014 but not prior to December 31, 2014. All rates are published at

https://www.emedny.org/ProviderManuals/Physician/index.aspx

(refer to Addendum)

TN #13-04 Approval Date May 30, 2013
Supersedes TN NEW Effective Date January 1, 2013
Addendum

Increased Primary Care Service Payment 42 CFR 447.405, 447.410, 447.415

1. Attachment 4.19-B: Physician Services 42 CFR 447.405 Amount of Minimum Payment

New York’s rates will reflect all Medicare site of service and locality adjustments. The Deloitte rates provided by CMS in the file CMS New York – Primary Care Payment Rates for EM vaccine administration ser.xlsx provided on March 28, 2013 and the 2014 file will be used. New York will not update the rates throughout the year.

2. Method of Payment

New York’s MMIS is being modified to make payment at the higher rate to each E&M and vaccine administration code.

3. Primary Care Services Affected by this Payment Methodology

This section contains a description of New York’s methodology and specifies the affected billing codes. New York will not make payment under this SPA for certain listed codes, as described in this section, for which it did not make payment for as of 7/1/09. New York will make payment under this SPA for the following codes (as described in this section) which have been added to the fee schedule since 7/1/09:

- **Subsequent observation care services** were covered and reimbursed by New York State Medicaid as of 7/1/09. Provider Manual Reference for: New York State Medicaid Program Physician – Procedure Codes Section 2 – Medicine, Drugs and Drug Administration (Revised 4/1/09), p 20: “The following codes are used to report the encounter(s) by the supervising practitioner with the patient when designated as “observation status.” This refers to the initiation of observation status, supervision of the care plan for observation and performance of periodic reassessments.”(emphasis added).

  https://www.emedny.org/ProviderManuals/Physician/PDFS/Physician%20Procedure%20Codes%20Sect2_2009-1.pdf

- **Vaccine administration services** were covered and reimbursed by New York State Medicaid as of 7/1/09. Refer to item #5 of the Addendum, Documentation of Vaccine Administration Rates in Effect 7/1/09, for more details.

4. Physician Services – Vaccine Administration

Since the VFC Regional Maximum is the “lesser of” rate for children, New York will reimburse $25.10 to qualified physicians.

**Attachment to Addendum**

---

**Supersedes TN** | NEW

**Approval Date** | May 30, 2013

**Effective Date** | January 1, 2013
Addendum (continued)

Increased Primary Care Service Payment 42 CFR 447.405, 447.410, 447.415

5. Documentation of Vaccine Administration Rates in Effect 7/1/09

The documentation is available from the: New York State Medicaid Program Physician – Procedure Codes Section 3 Drugs and Drug Administration (Revised 4/1/09), page 5:

**VFC:** “For dates of service on or after 7/1/03 when immunization materials are supplied by the Vaccine for Children Program (VFC), bill using the procedure code that represents the immunization(s) administered and **append modifier - SL State Supplied Vaccine** to receive the VFC administration fee.”

**Adults/ non-VFC:** “The maximum fees for immunization injection codes are adjusted periodically by the State to reflect the current acquisition cost of the antigen. For immunizations not supplied by the VFC Program insert acquisition cost per dose plus a two dollar ($2.00) administration fee in amount charged field on claim form.”

https://www.emedny.org/ProviderManuals/Physician/PDFS/Physician%20Procedure%20Codes%20Sect3_2009-1.pdf

For further illustration, the following crosswalk is provided for reference between vaccine immunization administration codes activated for 1/1/13 and New York State Medicaid billing instructions for the service on 7/1/09:

90460 Immunization administration through 18 years of age via any route: Reported vaccine immunization code plus SL modifier for reimbursement of VFC supplied vaccine(s).

90471 Percutaneous, intradermal, subcutaneous, intramuscular administration, one vaccine: Included in payment for vaccine code for adults; add $2.00 administration fee to the charge for the vaccine immunization code.

90472 Percutaneous, intradermal, subcutaneous, intramuscular administration, each additional vaccine: Included in payment for vaccine code for adults; add $2.00 administration fee to the charge for the vaccine immunization code.

90473 Oral or nasal administration; 1 vaccine: Included in payment for vaccine code for adults; add $2.00 administration fee to the charge for the vaccine immunization code.

90474 Oral or nasal administration, each additional vaccine: Included in payment for vaccine code for adults; add $2.00 administration fee to the charge for the vaccine immunization code.
Increased Primary Care Service Payment 42 CFR 447.405, 447.410, 447.415

6. **Effective Date of Payment**

Physicians were notified of the effective date of the payment for the primary care rate increase in the December 2012 Medicaid Update, available at:

When the SPA is approved, the fee schedule for qualified physicians will be available at

https://www.emedny.org/ProviderManuals/Physician/index.aspx
New York
1(A)

Statewide Patient Centered Medical Home - Physicians and/or Nurse Practitioners

Fee schedules developed by the Department of Health and approved by the Division of Budget will be augmented by incentive payments to physicians and/or nurse practitioners certified by the Department as patient centered medical homes.

Effective for periods on and after December 1, 2009, the Commissioner of Health is authorized to certify certain physicians' and nurse practitioners' practices as patient centered medical homes to improve health outcomes and efficiency through patient care continuity and coordination of health services. Certified providers will be eligible for incentive payments for primary care services provided to recipients eligible for Medicaid Fee-For-Service (FFS).

To improve access to high quality primary care services the statewide Medicaid Patient Centered Medical Home initiative will provide incentive payments to providers who meet “medical home” standards established by the Department. Those standards will be consistent with the National Committee for Quality Assurance’s Physician Practice Connections ® -- Patient Centered Medical Home™ (PPC®-PCMH ™) Recognition Program. Physicians and/or nurse practitioners achieving NCQA PPC®-PCMH ™ recognition will be eligible for incentive payments for providing services to Medicaid FFS patients.

Per visit incentive payments will be made to physicians' and/or nurse practitioners’ practices that meet the Department standards for certification as a patient centered medical homes, consistent with the NCQA PPC®-PCMH ™ Program. There are three levels of “medical home” recognition: Levels 1, 2 and 3. Eligible providers will receive a per visit incentive payment commensurate with their level of “medical home” recognition. Incentive payments will be added to claims from NCQA recognized providers for visits with evaluation and management codes identified by the Department as “primary care.”

To determine appropriate incentive payment amounts, the NY Medicaid Program conducted a review of “medical home” incentive payments nationally. Most programs paid medical home incentive payments on a per member per month (PMPM) basis. To work in the fee-for-service payment context, PMPM benchmark amounts used by programs in several other states ($2, $4, and $6) were converted to per-visit payment amounts by first multiplying the PMPM payment by twelve (12) to calculate an annual per member payment, and then dividing the annual amount by the average number of annual primary care visits to practitioners' offices to arrive at a per-visit incentive payment amount for each level of medical home recognition.
Except as otherwise noted in the plan, state-developed fee schedule rates are the same for both governmental and private providers recognized as patient centered medical homes. The agency's fee schedule rates were set as of December 1, 2009 and are effective for services provided on and after that date. All rates are published on the State Department of Health's website.

Once a physician and/or nurse practitioner practice advances to a higher level of "medical home" recognition he/she will no longer be eligible for the lower level incentive payment per Evaluation and Management visit. A physician and/or nurse practitioner practice may only receive one level of incentive payment at a time for each eligible visit. Medical home incentive payments are only applicable to claims when Medicaid is the primary payer.

To maintain eligibility for incentive payments physicians' and/or nurse practitioners' practices must (a) renew their "patient centered medical home" certification at a frequency determined by the Commissioner; and b) provide data to the Department of Health to permit the Commissioner to evaluate the impact of patient centered medical homes on quality, outcomes and cost.
Advanced Primary Care - Physicians and/or Nurse Practitioners

Fee schedules developed by the Department of Health and approved by the Division of Budget will be augmented by incentive payments to physicians and/or nurse practitioners recognized by the Department as Advanced Primary Care (APC) practices.

Effective for periods on and after January 1, 2017, the Commissioner of Health is authorized to recognize physicians’ and nurse practitioners’ practices as advanced primary care practices to improve health outcomes and efficiency through patient care continuity and coordination of health services. Recognized providers will be eligible for incentive payments for primary care services provided to recipients eligible for Medicaid Fee-For-Service (FFS).

To improve access to high quality primary care services, the Medicaid Advanced Primary Care initiative will provide incentive payments to Physicians and/or Nurse Practitioners that meet advanced primary care standards established by the Department. The Department developed the Advanced Primary Care model in consultation with diverse stakeholders as part of the State Health Innovation Plan. The Advanced Primary Care model is a statewide integrated primary care delivery and payment model that was created as part of a Centers for Medicare and Medicaid Innovation (CMMI) State Innovation Model (SIM) Testing grant. The model requires providers to obtain and maintain specific capabilities around patient care quality, access, and outcomes.

Per visit incentive payments will be made to physicians’ and/or nurse practitioners’ practices that meet the Department standards for recognition as an advanced primary care practice. There are three levels that correspond to providers’ capabilities: Levels 1, 2, and 3. Eligible providers will receive a per-visit incentive payment commensurate with their level of Advanced Primary Care recognition. Incentive payments will be added to claims from recognized advanced primary care providers for visits with evaluation and management codes identified by the Department as primary care. Advanced primary care incentive payments are only applicable to claims when Medicaid is the primary payer.

Appropriate incentive payment amounts will be aligned with established incentive payments for primary care services for Medicaid FFS. Incentive payment amounts were determined based on historic data from an established incentive payment paid to primary care providers. Factors that were part of the determination included average primary care visits per year, panel size, and level of advanced primary care practice transformation.

Except as otherwise noted in the plan, state-developed fee schedule rates are the same for both governmental and private providers recognized as Advanced Primary Care practices. The agency’s fee schedule rates were set as of January 1, 2017, and are effective for services provided on or after that date. All rates are published on the State Department of Health’s website, https://www.health.ny.gov/technology/innovation_plan_initiative/pcmh/docs/ffs_incentive_payment_rates.pdf.

To maintain eligibility for incentive payments physicians’ and/or nurse practitioners’ practices must provide data to the Department of Health to permit the Commissioner to evaluate the impact of advanced primary care practices on quality, outcomes, and cost.
Adirondack Medical Home Multipayor Program – Physicians and/or Nurse Practitioners

Fee schedules developed by the Department of Health and approved by the Division of the Budget will be augmented by incentive payments to physicians and/or nurse practitioner practices certified by the Department as participants in the Adirondack Medical Home Multipayor Program.

Effective for periods on and after December 1, 2009, certain clinicians and clinics in the upper northeastern region of New York State will be certified as health care homes to improve health outcomes and efficiency through patient care continuity and coordination of health services. Certified providers will be eligible for incentive payments for services provided to recipients eligible for Medicaid fee-for-service; enrollees eligible for Medicaid managed care; and enrollees eligible for and enrolled in Family Health Plus organizations pursuant to Title 11-D of Article 28 of the Public Health Law (PHL).

The Adirondack Medical Home Multipayor Program is a primary care medical home collaborative of health care service providers including hospitals, diagnostic and treatment centers and private practices serving residents and eligible recipients in the counties of Clinton, Essex, Franklin, Hamilton, Saratoga and Warren. Incentive payments to physicians and/or nurse practitioner practices that meet “medical home” standards will be established jointly by the State Department of Health, participating health care service providers and payors. Medical home certification includes, but is not limited to, existing standards developed by national accrediting and professional organizations, including the National Committee for Quality Assurance (NCQA) Physician Practice Connections® - Patient Centered Medical Home™ (PPC®-PCMH™) Recognition Program.

Under this program, incentive payments will be made for one year to participating providers to support conversion of physicians and/or nurse practitioner practices to certified medical homes. Within one year, providers in the Multipayor Program must achieve either Level 2 or Level 3 including additional criteria (referred to as Level 2 Plus and Level 3 Plus) as determined by the program participants in order to continue to receive the incentive payment. Eligible providers will receive the same incentive payment commensurate with the following levels of “medical home” designation: conversion support; Level 2 Plus; or Level 3 Plus. There will be no incentive payment for Level 1 designation. Incentive payments will be added to claims from program physicians and /or nurse practitioner practices for visits with Evaluation and Management codes identified by the Department of Health as “primary care”.

TN  #09-56-A    Approval Date  July 19, 2010
Supersedes TN NEW    Effective Date  December 1, 2009
New York 1(A)(iii)

The incentive amount was determined by the Department of Health and participating payors based on a market analysis of the cost to support the conversion of a practice to provide “medical home” patient care and management information systems related to meeting the objectives of this initiative. The participating payors agreed to a per member per month (PMPM) incentive payment of $7. To calculate the per-visit incentive payment amount the PMPM was multiplied by twelve (12) to calculate an annual per member payment ($84) and then this annual amount was divided by the average number of annual primary care visits to clinics and practitioners’ offices to arrive at a per visit incentive payment. The average annual visit rate, based on two years of claims data (January 1, 2007 – December 31, 2008) for a specific list of providers who agreed to participate in the Multipayor Program, was 3 visits per year. Therefore, the per visit incentive payment is $28. The incentive amount will be approved by the Division of the Budget.

Except as otherwise noted in the plan, state-developed fee schedule rates are the same for both governmental and private providers of primary care “medical home” services in the Multipayor Program. The agency’s fee schedule rate was set as of December 1, 2009 and is effective for services provided on or after that date. All rates are published on the Department of Health public website.

Patient and health care services participation in the Adirondack Medical Home Multipayor Program is on a voluntary basis. While physician and/or nurse practitioner practices are participating in the Multipayor Program they are precluded from receiving incentive payments from the statewide patient centered medical home program established pursuant to section 364-m of the Social Services Law.

[E-prescription]

An e-prescription financial incentive will be paid to physicians for the purpose of encouraging the electronic transmission of prescriptions and fiscal orders for select over-the-counter medications prescribed and dispensed in accordance with State and federal requirements. Reimbursement is determined by the State Department of Health at 80 cents per electronic prescription/fiscal order dispensed.]

May 5, 2014

TN #14-08 Approval Date ____________

April 1, 2014 Effective Date ________

Supersedes TN #09-56-A
Dental Services (including dentures)
Payments are limited to the lower of the usual and customary charge to the public or the fee schedule developed by the Department of Health and approved by the Division of the Budget.

Podiatrists
Fee schedule developed by the Department of Health and approved by the Division of the Budget.

Optometrists
Fee schedule developed by the Department of Health and approved by the Division of the Budget.

Chiropractor’s Services
Fee schedule developed by the Department of Health and approved by the Division of the Budget.

Nurse Midwives
Fee schedule developed by the Department of Health and approved by the Division of the Budget.

Effective September 1, 2012, reimbursement will be provided to nurse midwives for breastfeeding health education and counseling services. Nurse midwives must be currently registered and licensed by the State in accordance with 42 CFR 440.60(a) and also International Board Certified Lactation Consultants (IBCLC). Date of implementation will occur on the first day of the month following 30 days after Federal approval of this provision of the State Plan.

Nurse Practitioners
Fee schedule developed by the Department of Health and approved by the Division of the Budget.

Effective September 1, 2012, reimbursement will be provided to nurse practitioners for breastfeeding health education and counseling services. Nurse practitioners must be currently registered and licensed by the State in accordance with 42 CFR 440.60(a) and also International Board Certified Lactation Consultants (IBCLC). Date of implementation will occur on the first day of the month following 30 days after Federal approval of this provision of the State Plan.

Other Practitioner Services

Clinical Psychologists
Fee schedule developed by the Department of Health and approved by the Division of the Budget.

Outpatient Hospital Services/ Emergency Room Services
For those facilities certified under Article 28 of the State Public Health Law: The Department of Health promulgates prospective, all inclusive rates based upon reported historical costs. Allowable operating costs per visit are held to legislatively established ceiling limitations. Reported historical operating costs on a per visit basis, which are below or limited by ceilings, are deemed reimbursable and trended forward to the current rate period to adjust for inflation. Non-operating costs (such as capital costs) are not subject to the legislatively established ceiling and are added to the product of reimbursable operating costs times the roll factor.

TN #12-16 Approval Date December 28, 2012
Supersedes TN #95-25 Effective Date September 1, 2012
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

STATE: New York

METHODS AND STANDARDS FOR ESTABLISHING PAYMENT RATES – OTHER TYPES OF CARE

Non-Physician Licensed Behavioral Health Practitioner Services (EPSDT only)

Reimbursement for EPSDT NP-LBHP as outlined in Item 6.d(i). per Attachment 3.1-A, are paid based upon Medicaid rates established by the State of New York.

Except as otherwise noted in the State Plan, the State-developed rates are the same for both governmental and private providers. The provider agency’s rates were set as of January 1, 2019 for Other Licensed Practitioner, Community Psychiatric Support and Treatment, and Psychosocial Rehabilitation Supports, and are effective for these services provided on or after that date. Additionally, the agency’s rates were set as of July 1, 2019 for Family Peer Support Services and are effective for these services provided on or after that date. All rates are published on the Department of Health website:

METHODS AND STANDARDS FOR ESTABLISHING PAYMENT RATES - OTHER TYPES OF CARE

Non-Physician Licensed Behavioral Health Practitioner Services (EPSDT only - cont.)

The rate development methodology will primarily be composed of provider cost modeling, through New York provider compensation studies and cost data. Rates from similar State Medicaid programs may be considered, as well. The following list outlines the major components of the cost model to be used in rate development.

- Staffing assumptions and staff wages.
- Employee-related expenses — benefits, employer taxes (e.g., Federal Insurance Contributions Act (FICA), unemployment, and workers compensation).
- Program-related expenses (e.g., supplies).
- Provider overhead expenses.
- Program billable units.

The rates will be developed as the ratio of total annual modeled provider costs to the estimated annual billable units.

EPSDT services provided as Tuberculosis/Directly Observed Therapy (TB/DOT) Services

Effective for dates of service on or after July 1, 2018, payments for Tuberculosis Directly Observed Therapy (TB/DOT) shall be based on fees established by the Department of Health.

Reimbursement for TB/DOT therapy is at the following rates:

Upstate
Rate code 5317 (Level I) equal to $33.92
Rate code 5318 (Level II) equal to $82.58

Downstate
Rate code 5312 (Level I) equal to $38.82
Rate code 5313 (Level II) equal to $95.90

Please note that for Level I the Local Health Department (LHD) is serving TB patients for purposes other than DOT on a routine basis. Level II means the LHD is serving patients who would not otherwise be seen.

LHDs bill through their Diagnostic and Treatment Center category of service 0160.

Reimbursement is determined by the State Department of Health at 80 cents per electronic prescription/fiscal order dispensed.

Effective April 1, 2014, the e-prescription financial incentive for nurse practitioners will cease and reimbursement at 80 cents per electronic prescription/fiscal order will end.
(two year trend movement) on a per visit basis, except that commencing April 1, 1995 through March 31, 1999 and on and after July 1, 1999 through March 31, 2000 and on and after April 1, 2000 through March 31, 2003, and on and after April 1, 2003 through March 31, 2009, and on and after April 1, 2009 through March 31, 2011, and on and after April 1, 2011 through March 31, 2013, and on and after April 1, 2013 through March 31, 2015, and on and after April 1, 2015 through March 31, 2017, and on and after April 1, 2017 through March 31, 2019 for rates of payment for patients eligible for payments made by state governmental agencies, the capital cost per visit components will be adjusted by the Commissioner to exclude such expenses related to 1) forty-four percent of the costs of major moveable equipment and 2) staff housing. A return on equity is recognized in those instances where the hospital is organized under the auspices of proprietary sponsorship. MMTP services may be reimbursed on a uniform fixed weekly fee per enrolled patient basis. Renal dialysis services are reimbursed on the lower of a facility's actual cost or statewide ceiling of $150.00 per procedure. Payment rates for renal dialysis services are adjusted to reflect utilization patterns for CAPD, CCPD, hemodialysis and extended peritoneal dialysis services. Effective October 1, 1995, the rate for primary care clinic services provided in primary care hospitals, will be a per visit rate based on allowable reportable operating costs subject to a cap on operating costs of $67.50 per visit. For dates of service beginning on December 1, 2008 through March 31, 2010, primary care clinic and renal dialysis services will be reimbursed using the Ambulatory Patient Group classification and reimbursement system. Allowable reportable capital costs will be reimbursed on a per visit basis not subject to a ceiling on reimbursement, provided however that for the period October 1, 1995 through March 31, 1999 and on and after July 1, 1999 through March 31, 2000 and on and after April 1, 2000 through March 31, 2003, and on and after April 1, 2003 through March 31, 2009, and on and after April 1, 2009 through March 31, 2011, and on and after April 1, 2011 through March 31, 2013, and on and after April 1, 2013 through March 31, 2015, and on and after April 1, 2015 through March 31, 2017, and on and after April 1, 2017 through March 31, 2019, the capital cost per visit components will be adjusted by the Commissioner to exclude such expenses related to 1) forty-four percent of the cost of major movable equipment and 2) staff housing. A return on equity is recognized in those instances where the hospital is organized under the auspices of proprietary sponsorship.

Effective October 1, 1995, the rate for emergency services provided in primary care hospitals, will be a per visit rate based upon allowable reportable operating costs and limited to a cap on operating costs of $95 per visit provided however, that for the period January 1, 2007 through December 31, 2007 the maximum payment for the operating component will be $125 per visit; and during the period January 1, 2008 through December 31, 2008, the maximum payment for the operating cost component will be $140 per visit; and during the period January 1, 2009 through March 31, 2010 emergency department services will be reimbursed through the Ambulatory Patient Group (APG) classification and reimbursement system. Allowable reportable capital costs will be reimbursed on a per visit basis not subject to a ceiling on reimbursement, provided however that for the period of October 1, 1995 through March 31, 1999 and on and after July 1, 1999 through March 31, 2000, and on and after April 1, 2000 through March 31, 2003, and on and after April 1, 2003 through March 31, 2009, and on and after April 1, 2009 through March 31, 2011, and on and after April 1, 2011 through March 31, 2013, and on and after April 1, 2013 through March 31, 2015, and on and after April 1, 2015 through March 31, 2017, and on and after April 1, 2017 through March 31, 2019, the capital costs per visit components will be adjusted by the Commissioner to exclude such expenses related to 1) forty-four percent of the cost of major moveable equipment and 2) staff housing. A return on equity is recognized in those instances where the hospital is organized under the auspices of proprietary sponsorship.
For outpatient services provided by general hospitals as noted in the proceeding paragraphs of this Section, beginning on and after April 1, 2006, the Commissioner of Health shall apply a trend factor projection of 2.25% attributable to the period January 1, 2006 through December 31, 2006. Upon reconciliation of this trend factor, in accordance with the previously approved state methodology, the final 2006 trend factor shall be the U.S. Consumer Price Index (CPI) for all Urban Consumers, as published by the U.S. Department of Labor, Bureau of Labor Statistics, minus 0.25%.

For reimbursement of outpatient hospital services provided on and after April 1, 2007, the Commissioner of Health shall apply a trend factor projection equal to 75% of the otherwise applicable trend factor for calendar year 2007.

For reimbursement of outpatient hospital services provided on and after April 1, 2008, the Commissioner of Health shall apply a trend factor projection equal to 65% of the otherwise applicable trend factor for calendar year 2008, as calculated in accordance with the general Trend Factor section of this Attachment.

For rates of payment effective for outpatient hospital services provided on and after January 1, 2009 through March 31, 2009, the otherwise applicable final trend factor attributable to the 2008 calendar year period shall be adjusted such that any increase to the average trend factor for the period April 1, 2008 through December 31, 2008 shall be reduced, on an annualized basis, by 1.3%. However, no retroactive adjustment to such trend factor will be made for the period April 1, 2008 through December 31, 2008. Effective on and after April 1, 2009, the otherwise applicable final trend factor attributable to the 2008 calendar year period shall be zero.

For rates of payment effective for outpatient hospital services provided on and after January 1, 2009 through March 31, 2009, a trend factor equal to the otherwise applicable trend factor attributable to the period January 1, 2009 through December 31, 2009, less 1% shall be applied. Effective on and after April 1, 2009, the otherwise applicable final trend factor attributable to the 2009 calendar year period shall be zero.

For rates of payment effective for outpatient hospital services provided on and after January 1, 2010 through March 31, 2010, the otherwise applicable final trend factor attributable to the 2010 calendar year period shall be zero.

For rates of payment effective for outpatient hospital services provided on and after April 1, 2010, the otherwise applicable trend factor attributable to the 2010 calendar year period shall be zero.

For rates of payment effective for outpatient hospital services provided on and after April 1, 2011, the otherwise applicable trend factors attributable to the 2011 through 2014 calendar year periods shall be no greater than zero. For such rates effective for the period January 1, 2015 through March 31, 2015 and for the period April 23, 2015 through December 31, 2015 otherwise applicable trend factors attributable to the 2015 calendar year period shall be no greater than zero. For rates of payment effective for outpatient hospital services provided on and after January 1, 2016 through March 31, 2017 and for the period April 1, 2017 through December 31, 2017, the otherwise applicable final trend factor attributable to the 2016 and 2017 calendar year periods shall be zero. For rates of payment effective for outpatient hospital services provided on and after January 1, 2018 through March 31, 2019, the otherwise applicable final trend factor attributable to the 2018 and 2019 calendar year periods shall be zero.

TN  #17-0034  Approval Date September 25, 2017
Supersedes TN  #15-0044  Effective Date April 1, 2017
New York
1(b)(i)(1)

All rates are subject to approval by the Division of the Budget. For emergency room services only, a retrospective adjustment may be made if it is determined that patients requiring general clinical services are provided such services in the emergency room for the sole purpose of maximizing reimbursement.

New York
1(b)(i)(1)(a)

Exempt acute care children's hospitals

1. Exempt acute care children's hospitals.

Hospitals shall qualify for outpatient reimbursement for specialty day hospital services as exempt acute care children's hospitals for periods on and after December 1, 2009, only if:

   a. Such hospitals were, as of December 31, 2008, designated as exempt acute care children's hospitals in accordance with the provisions of Title XVIII (Medicare) of the federal Social Security Act; and

   b. Such hospitals filed a discrete 2007 institutional cost report on or before December 1, 2008, including such adjustments as the Commissioner deems appropriate, reflecting reported Medicaid discharges of greater than 50 percent of total discharges.

2. The operating component of the rate for dates of service occurring on and after December 1, 2009; the base period reported operating costs shall be divided by the base period total visits to establish an all-inclusive operating cost per visit. The base period used to establish the operating component of rates of payment for outpatient services for facilities subject to this section shall be updated no less frequently than every two years and each such hospital shall submit such additional data as the Commissioner may require.

3. The non-operating component of the rate for dates of service occurring on and after December 1, 2009; the base period reported non-operating costs used to establish the non-operating component of rates of payment, such as capital costs, for outpatient services for facilities subject to this section shall reflect the current methodology in accordance with the Outpatient Hospital Services/Emergency Services reimbursement section of this Attachment.
Designated Preferred Primary Care Provider for Hospital-Based Outpatient Clinics and Hospital-Based Specialty Clinic Services

Hospital-Based clinics seeking reimbursement as designated preferred primary care providers are required to enter into a provider agreement with the New York State Department of Health. Providers seeking reimbursement for certain outpatient specialty clinic services are required to document in writing and through site inspection or records review that they are in fact organized as and providing specialty services. For dates of service on and after December 1, 2008, for hospital outpatient clinic and ambulatory surgery services, and until March 31, 2010, the operating component of rates for hospital based outpatient services shall be reimbursed using a methodology that is prospective and associated with resource utilization to ensure that ambulatory services are economically and efficiently provided. The methodology is based upon the Ambulatory Patient Group (APG) classification and reimbursement system. This methodology incorporates payments for the separate covered Medicaid benefits in accordance with the payment methods for these services, as modified by the APG methodology.

Reimbursement for providers designated as preferred primary care providers or for hospital based programs providing specialty clinic services is prospective and associated with resource use patterns to insure that ambulatory services are economically and efficiently provided. The methodology is based upon the Products of Ambulatory Care (PAC) classification system. Federally Qualified Health Centers (FQHCs) may choose to be paid under the APG methodology, or may choose to continue to receive payment under the existing prospective payment system (PPS) rate methodology. The payment methodology selected by the FQHC will apply to all claims submitted. PAC rates will continue to be available as a payment mechanism only for those FQHCs that opt to continue using them instead of switching to APG payments. In addition, FQHCs may apply for temporary rate adjustments under the alternate payment methodology as described in the sections entitled “Mergers, acquisitions, consolidations, restructurings, and closings.” FQHCs that are granted such adjustments will be listed in the section “Mergers, acquisitions, consolidations, restructurings, and closings” for hospital-based outpatient or freestanding clinics, whichever is applicable.

Under the PAC reimbursement method, facility specific payment rates are established for each of the PAC groups. For each service, a rate is established to cover all labor, ancillary services, medical supplies, administrative overhead, general and capital costs. The rates have been set prospectively by applying an economic trend factor.

For outpatient services provided by general hospitals, beginning on and after April 1, 2006, the Commissioner of Health shall apply a trend factor projection of 2.25% attributable to the period January 1, 2006 through December 31, 2006. Upon reconciliation of this trend factor, in accordance with the previously approved state methodology, the final 2006 trend factor shall be the U.S. Consumer Price Index (CPI) for all Urban Consumers, as published by the U.S. Department of Labor, Bureau of Labor Statistics, minus 0.25%.

Effective Date April 1, 2012
New York
1(b)(iii)

For services provided on or after April 1, 1995 by providers designated as preferred primary care providers, rates of payment may be established pursuant to the reimbursement payment methodology described in this section only for services provided by providers which submitted bills prior to December 31, 1994 based on the reimbursement payment methodology described in this section, or by a general hospital designated as a financially distressed hospital, which applied on or before April 1, 1995 for designation as a preferred primary care provider. The reimbursement methodology described in this section is an alternative to the prospective average cost per visit reimbursement method used for non-participating hospitals. There are unique features present in the reimbursement program designed to encourage provider participation and foster quality of care. The most notable of these is the financial responsibility of providers for selected laboratory and other ancillary procedures and Medicaid revenue assurances. Financial incentives are employed (within limitations) under this system to assure that these and other features are complied with.
[medical supplies, administrative overhead, general and capital costs. The rates are regionally adjusted to reflect differences in labor costs for personnel providing direct patient care and clinic support staff. The rates have been set prospectively by applying an economic trend factor.

For outpatient services provided by general hospitals, beginning on and after April 1, 2006, the Commissioner of Health shall apply a trend factor projection of 2.25% attributable to the period January 1, 2006 through December 31, 2006. Upon reconciliation of this trend factor, in accordance with the previously approved state methodology, the final 2006 trend factor shall be the U.S. Consumer Price Index (CPI) for all Urban Consumers, as published by the U.S. Department of Labor, Bureau of Labor Statistics, minus 0.25%.

For services provided on or after April 1, 1995 by providers designated as preferred primary care providers, rates of payment may be established pursuant to the reimbursement payment methodology described in this section only for services provided by providers which submitted bills prior to December 31, 1994 based on the reimbursement payment methodology described in this section, or by a general hospital designated as a financially distressed hospital, which applied on or before April 1, 1995 for designation as a preferred primary care provider. The reimbursement methodology described in this section is an alternative to the prospective average cost per visit reimbursement method used for non-participating hospitals. Ordered Ambulatory Services (specific services performed by a hospital on an ambulatory basis upon the order of a qualified physician, physician's assistant, dentist or podiatrist to test, diagnose or treat a recipient or specimen taken from a recipient)

Fee schedule developed by the Department of Health and approved by the Division of the Budget for each type of service, as appropriate.

Payment for these services will not exceed the combined payments received by a provider from beneficiaries and carriers or intermediaries for providing comparable services under Medicare.
New York
1(c)(i)

[Payments received by a provider from beneficiaries and carriers or intermediaries for providing comparable services under Medicare.]

Trend Factors

Notwithstanding any inconsistent provision of this state plan, effective April 1, 2000, in those instances when trend factors are used in determining rates of payment for hospital outpatient services, diagnostic and treatment centers unless otherwise subject to the rate freeze set forth herein, certified home health agencies, and personal care services, the Commissioner of Health shall apply trend factors in accordance with the following:

(1) For rate periods on and after April first, two thousand, the Commissioner shall establish trend factors for rates of payment for state governmental agencies to project for the effects of inflation except that such trend factors shall not be applied to services whose rate of payment are established by the commissioners of the Department of Mental Hygiene. The factors shall be applied to the appropriate portion of reimbursable costs.

(2) In developing trend factors for such rates of payment, the Commissioner shall use the most recent Congressional Budget Office estimate of the rate year's U.S. Consumer Price Index for all urban consumers published in the Congressional Budget Office Economic and Budget outlook after June first of the rate year prior to the year for which rates are being developed.

(3) After the final U.S. Consumer Price Index (CPI) for all urban consumers is published by the U.S. Department of Labor, Bureau of Labor Statistics, for a particular rate year, the Commissioner shall reconcile such final CPI to the projection used in number two of this section and any difference will be included in the prospective trend factor for the current year.

Nothing in this section is intended to produce a change in any existing provision of law establishing maximum reimbursement rates.
Statewide Patient Centered Medical Home - Hospital Based Clinics

Effective for periods on and after December 1, 2009, the Commissioner of Health is authorized to certify certain clinics as patient centered medical homes to improve health outcomes and efficiency through patient care continuity and coordination of health services. Certified providers will be eligible for incentive payments for services provided to recipients eligible for Medicaid fee-for-service (FFS).

Clinic shall mean a general hospital providing outpatient care, licensed under Article 28 of the Public Health Law.

To improve access to high quality primary care services, the statewide Medicaid Patient Centered Medical Home initiative will provide incentive payments to Clinics that meet "medical home" standards established by the Department. Those standards will be consistent with the National Committee for Quality Assurance's Physician Practice Connections® - Patient Centered Medical Home™ (PPC®-PCMH™) Recognition Program. Clinics achieving NCQA PPC®-PCMH™ recognition will be eligible for incentive payments for providing services to Medicaid FFS patients.

Per visit incentive payments will be made to Clinics that meet the Department standards for certification as a patient centered medical homes, consistent with the NCQA PPC®-PCMH™ Program. There are three levels of "medical home" recognition: Levels 1, 2 and 3. Eligible Clinics will receive a per visit incentive payment commensurate with their level of "medical home" recognition. Incentive payments will be added to claims from NCQA recognized Clinics for visits with evaluation and management codes identified by the Department as "primary care."

TN #09-49-B
Supersedes TN NEW
Approval Date September 23, 2011
Effective Date December 1, 2009
To determine appropriate incentive payment amounts, the NY Medicaid Program conducted a review of “medical home” incentive payments nationally. Most programs paid medical home incentive payments on a per member per month (PMPM) basis. To work in the fee-for-service payment context, PMPM benchmark amounts used by programs in several other states ($2, $4, and $6) were converted to per-visit payment amounts by first multiplying the PMPM payment by twelve (12) to calculate an annual per member payment, and then dividing the annual amount by the average number of annual primary care visits to general hospitals providing outpatient care, free standing diagnostic and treatment centers, and Federally Qualified Health Centers to arrive at a per-visit incentive payment amount for each level of medical home recognition.

Except as otherwise noted in the plan, state-developed fee schedule rates are the same for both governmental and private providers recognized as patient centered medical homes. The agency’s fee schedule rates were set as of December 1, 2009 and are effective for services provided on or after that date. All rates are published on the State Department of Health’s website.

The “medical home” recognition level for Clinics is site-specific. Once a Clinic advances to a higher level of “medical home” recognition it will no longer be eligible for the lower level incentive payment per Evaluation and Management visit. A Clinic may only receive one level of incentive payment at a time for each eligible visit. Medical home incentive payments are only applicable to claims when Medicaid is the primary payer.

To maintain eligibility for incentive payments, Clinics must: (a) renew their “patient centered medical home” certification at a frequency determined by the Commissioner; and (b) provide data to the Department of Health to permit the Commissioner to evaluate the effect of patient centered medical homes on quality, outcomes, and cost.
Effective for periods on and after January 1, 2017, the Commissioner of Health is authorized to recognize certain clinics as Advanced Primary Care (APC) practices to improve health outcomes and efficiency through patient care continuity and coordination of health services. Recognized providers will be eligible for incentive payments for primary care services provided to recipients eligible for Medicaid Fee-For-Service (FFS).

Clinic shall mean a general hospital providing outpatient care, licensed under Article 28 of Public Health Law.

To improve access to high quality primary care services, the Medicaid Advanced Primary Care initiative will provide incentive payments to Hospital Based Clinics that meet advanced primary care standards established by the Department. The Department developed the Advanced Primary Care model in consultation with diverse stakeholders as part of the State Health Innovation Plan. The Advanced Primary Care model is a statewide integrated primary care delivery and payment model that was created as part of a Centers for Medicare and Medicaid Innovation (CMMI) State Innovation Model (SIM) Testing grant. The model requires providers to obtain and maintain specific capabilities around patient care quality, access, and outcomes.

Per visit incentive payments will be made to Clinics that meet the Department standards for recognition as an Advanced Primary Care practice. There are three levels that correspond to providers’ capabilities: Levels 1, 2, and 3. Eligible providers will receive a per-visit incentive payment commensurate with their level of Advanced Primary Care recognition. Incentive payments will be added to claims from recognized advanced primary care providers for visits with evaluation and management codes identified by the Department as primary care. The advanced primary care recognition level for Clinics is site-specific. Advanced primary care incentive payments are only applicable to claims when Medicaid is the primary payer.

Appropriate incentive payment amounts will be aligned with established incentive payments for primary care services for Medicaid FFS. Incentive payment amounts were determined based on historic data from an incentive payment paid to primary care providers. Factors that were part of the determination included average primary care visits per year, panel size, and level of advanced primary care practice transformation.

Except as otherwise noted in the plan, state-developed fee schedule rates are the same for both governmental and private providers recognized as Advanced Primary Care practices. The agency’s fee schedule rates were set as of January 1, 2017, and are effective for services provided on or after that date. All rates are published on the State Department of Health’s website, https://www.health.ny.gov/technology/innovation_plan_initiative/pcmh/docs/ffs_incentive_payment_rates.pdf.

To maintain eligibility for incentive payments, Clinics must provide data to the Department of Health to permit the Commissioner to evaluate the impact of advanced primary care practices on quality, outcomes, and cost.
Adirondack Medical Home Multipayor Program - Hospital-Based Clinics

Effective for periods on and after December 1, 2009, the Commissioner of Health is authorized to certify certain clinicians and clinics in the upper northeastern region of New York as health care homes to improve health outcomes and efficiency through patient care continuity and coordination of health services. Certified providers will be eligible for incentive payments for services provided to recipients eligible for Medicaid fee-for-service.

Clinic shall mean a general hospital providing outpatient care, licensed under Article 28 of the PHL.

The Adirondack Medical Home Multipayor Program is a primary care medical home collaborative of health care service providers including hospitals, diagnostic and treatment centers and private practices serving residents and eligible recipients in the counties of Clinton, Essex, Franklin, Hamilton, Saratoga and Warren. Incentive payments to clinics that meet “medical home” standards will be established jointly by the State Department of Health, participating health care service providers and payors. Medical home certification includes, but is not limited to, existing standards developed by national accrediting and professional organizations, including the National Committee for Quality Assurance’s (NCQA) Physician Practice Connections® - Patient Centered Medical Home™ (PPC®-PCMHTM) Recognition Program.

Under this program, incentive payments will be made for one year to participating providers to support conversion of these clinic practices to certified medical homes. Within one year, providers in the Multipayor program must achieve either Level 2 or Level 3 including additional criteria (referred to as Level 2 Plus and Level 3 Plus) as determined by the program participants in order to continue to receive the incentive payment. Eligible providers will receive the same incentive payment commensurate with the following levels of “medical home” designation: conversion support; Level 2 Plus; or Level 3 Plus. There will be no incentive payment for Level 1 designation. Incentive payments will be added to claims from program clinics for visits with Evaluation and Management codes identified by the Department of Health as “primary care.”

The incentive amount was determined by the Department of Health and participating payors based on a market analysis of the cost to support the conversion of a practice to provide “medical home” patient care and management information systems related to meeting the objectives of this initiative. The participating payors agreed to a per member per month (PMPM) incentive payment of $7. To calculate the per-visit incentive payment amount, the PMPM was multiplied by twelve (12) to calculate an annual per member payment ($84) and then this annual amount was divided by the average number of annual primary care visits to clinics.

TN #09-56-B Approval Date September 23, 2011
Supersedes TN NEW Effective Date December 1, 2009
New York
1(c)(i)(D)

and practitioners' offices to arrive at a per visit incentive payment. The average annual visit rate, based on two years of claims data (January 1, 2007 – December 31, 2008) for a specific list of providers who agreed to participate in the Multipayor Program, was 3 visits per year. Therefore, the per visit incentive payment is $28. The incentive amount will be approved by the Division of the Budget.

Except as otherwise noted in the plan, state-developed fee schedule rates are the same for both governmental and private providers of primary care “medical home” services in the Multipayor Program. The agency’s fee schedule rate was set as of December 1, 2009 and is effective for services on or after that date. All Medicaid rates are published on the Department of Health’s public website.

Patient and health care services participation in the Adirondack Medical Home Multipayor Program is on a voluntary basis. While clinics and clinicians are participating in the Multipayer Program, they are precluded from receiving incentive payments under the statewide patient centered medical home program established pursuant to section 364-m of the Social Services Law.
New York  
1(c)(i)(E)

Statewide Patient Centered Medical Home – Freestanding Clinics

Effective for periods on and after December 1, 2009, the Commissioner of Health is authorized to certify certain clinics as patient centered medical homes to improve health outcomes and efficiency through patient care continuity and coordination of health services. Certified providers will be eligible for incentive payments for services provided to recipients eligible for Medicaid Fee-For-Service (FFS).

Clinic shall mean a general hospital providing outpatient care or a freestanding diagnostic and treatment center, licensed under Article 28 of the Public Health Law.

To improve access to high quality primary care services, the statewide Patient Centered Medicaid Medical Home initiative will provide incentive payments to Clinics meeting “medical home” standards established by the Department. Those standards will be consistent with the National Committee for Quality Assurance's Physician Practice Connections ® -- Patient Centered Medical Home™ (PPC®-PCMH ™) Recognition Program. Clinics achieving the NCQA PPC®-PCMH ™ recognition will be eligible for incentive payments for providing services to Medicaid FFS patients.

Per visit incentive payments will be made to Clinics that meet the Department standards for certification as a patient centered medical homes, consistent with the NCQA PPC®-PCMH ™ Program. There are three levels of “medical home” recognition: Levels 1, 2 and 3. Eligible Clinics will receive a per visit incentive payment commensurate with their level of “medical home” recognition. Incentive payments will be added to claims from NCQA recognized Clinics for visits with evaluation and management codes identified by the Department as “primary care.”

To determine appropriate incentive payment amounts, the NY Medicaid Program conducted a review of “medical home” incentive payments nationally. Most programs paid medical home incentive payments on a per member per month (PMPM) basis. To work in the fee-for-service payment context, PMPM benchmark amounts used by
programs in several other states ($2, $4, and $6) were converted to per-visit payment amounts by first multiplying the PMPM payment by twelve (12) to calculate an annual per member payment, and then dividing the annual amount by the average number of annual primary care visits to general hospitals providing outpatient care, free standing diagnostic and treatment centers, and Federally Qualified Health Centers to arrive at a per-visit incentive payment amount for each level of medical home recognition.

Except as otherwise noted in the plan, state-developed fee schedule rates are the same for both governmental and private providers recognized as patient centered medical homes. The agency's fee schedule rates were set as of December 1, 2009 and are effective for services provided on and after that date. All rates are published on the State Department of Health's website.

The “medical home” recognition for clinics is site-specific. Once a Clinic advances to a higher level of “medical home” designation it will no longer be eligible for the lower level incentive payment per Evaluation and Management visit. A Clinic may only receive one level of incentive payment at a time for each eligible visit. Medical home incentive payments are only applicable to claims when Medicaid is the primary payer.

To maintain eligibility for incentive payments, Clinics must (a) renew their “patient centered medical home” certification at a frequency determined by the Commissioner; and (b) provide data to the Department to permit the Commissioner to evaluate the impact of patient centered medical homes on quality, outcomes and cost.
**Advanced Primary Care – Freestanding Clinics**

Effective for periods on and after January 1, 2017, the Commissioner of Health is authorized to recognize certain clinics as Advanced Primary Care (APC) practices to improve health outcomes and efficiency through patient care continuity and coordination of health services. Recognized providers will be eligible for incentive payments for primary care services provided to recipients eligible for Medicaid Fee-For-Service (FFS).

Clinic shall mean a general hospital providing outpatient care or a freestanding diagnostic and treatment center, licensed under Article 28 of Public Health Law.

To improve access to high quality primary care services, the Medicaid Advanced Primary Care initiative will provide incentive payments to Freestanding Clinics that meet advanced primary care standards established by the Department. The Department developed the Advanced Primary Care model in consultation with diverse stakeholders as part of the State Health Innovation Plan. The Advanced Primary Care model is a statewide integrated primary care delivery and payment model that was created as part of a Centers for Medicare and Medicaid Innovation (CMMI) State Innovation Model (SIM) Testing grant. The model requires providers to obtain and maintain specific capabilities around patient care quality, access, and outcomes.

Per visit incentive payments will be made to Clinics that meet the Department standards for recognition as an advanced primary care practice. There are three levels that correspond to providers' capabilities: Levels 1, 2, and 3. Eligible providers will receive a per-visit incentive payment commensurate with their level of Advanced Primary Care recognition. Incentive payments will be added to claims from recognized advanced primary care providers for visits with evaluation and management codes identified by the Department as primary care. The advanced primary care recognition level for Clinics is site-specific. Advanced primary care incentive payments are only applicable to claims when Medicaid is the primary payer.

Appropriate incentive payment amounts will be aligned with established incentive payments for primary care services for Medicaid FFS. Incentive payment amounts were determined based on historic data from an established incentive payment paid to primary care providers. Factors that were part of the determination included: average primary care visits per year, panel size, and level of advanced primary care practice transformation.

Except as otherwise noted in the plan, state-developed fee schedule rates are the same for both governmental and private providers recognized as Advanced Primary Care practices. The agency's fee schedule rates were set as of January 1, 2017, and are effective for services provided on or after that date. All rates are published on the State Department of Health’s website, https://www.health.ny.gov/technology/innovation_plan_initiative/pcmh/docs/ffs_incentive_payment_rates.pdf.

To maintain eligibility for incentive payments, Clinics must provide data to the Department of Health to permit the Commissioner to evaluate the impact of advanced primary care practices on quality, outcomes, and cost.

TN #17-0024 - C  Approval Date 06/14/2018
Supersedes TN #NEW  Effective Date 01/01/2017
Adirondack Medical Home Multipayor Program – Freestanding Clinics

Effective for periods on and after December 1, 2009, the Commissioner of Health is authorized to certify certain clinicians and clinics in the upper northeastern region of New York as health care homes to improve health outcomes and efficiency through patient care continuity and coordination of health services. Certified providers will be eligible for incentive payments for services provided to recipients eligible for Medicaid fee-for-service; enrollees eligible for Medicaid managed care; and enrollees eligible for and enrolled in Family Health Plus organizations pursuant to Title 11-D of Article 28 of the Public Health Law (PHL).

Clinic shall mean a general hospital providing outpatient care or a freestanding diagnostic and treatment center licensed under Article 28 of the Public Health Law that is designated as a Federally Qualified Health Center pursuant to Section 1861(aa) of the Social Security Act.

The Adirondack Medical Home Multipayor Program is a primary care medical home collaborative of health care service providers including hospitals, diagnostic and treatment centers and private practices serving residents and eligible recipients in the counties of Clinton, Essex, Franklin, Hamilton, Saratoga and Warren. Incentive payments to clinics that meet “medical home” standards will be established jointly by the State Department of Health, participating health care service providers and payors. Medical home certification includes, but is not limited to, existing standards developed by national accrediting and professional organizations, including the National Committee for Quality Assurance’s (NCQA) Physician Practice Connections® - Patient Centered Medical Home™ (PPC®-PCMH™) Recognition Program.

Under this program, incentive payments will be made for one year to participating providers to support conversion of these clinic practices to certified medical homes. Within one year, providers in the Multipayor Program must achieve either Level 2 or Level 3 including additional criteria (referred to as Level 2 Plus and Level 3 Plus) as determined by the program participants. Eligible providers will receive the same incentive payment commensurate with the following levels of “medical home” designation: conversion support; Level 2 Plus; or Level 3 Plus. There will be no incentive payment for Level 1 designation. Incentive payments will be added to claims from program clinics for visits with Evaluation and Management codes identified by the Department of Health as “primary care”.

TN #09-56-C Approval Date July 19, 2010
Supersedes TN NEW Effective Date December 1, 2009
New York
1(c)(i)(H)

The incentive amount was determined by the Department of Health and participating payors based on a market analysis of the cost to support the conversion of a practice to provide “medical home” patient care and management information systems related to meeting the objectives of this initiative. The participating payors agreed to a per member per month (PMPM) incentive payment of $7. To calculate the per-visit incentive payment amount the PMPM was multiplied by twelve (12) to calculate an annual per member payment ($84) and then this annual amount was divided by the average number of annual primary care visits to clinics and practitioners’ offices to arrive at a per visit incentive payment. The average annual visit rate, based on two years of claims data (January 1, 2007 – December 31, 2008) for a specific list of providers who agreed to participate in the Multipayor Program, was 3 visits per year. Therefore the per visit incentive payment is $28. The incentive amount will be approved by the Division of the Budget.

Except as otherwise noted in the plan, the state-developed fee schedule rates are the same for both governmental and private providers of primary care “medical home” services in the Multipayor Program. The agency’s fee schedule rate was set as of December 1, 2009 and is effective for services provided on or after that date. All rates are published on the Department of Health’s Public website.

Patient and health care services participation in the Adirondack Medical Home Multipayor Program is on a voluntary basis. While clinics and clinicians are participating in the Multipayor Program, they are precluded from receiving incentive payments from the statewide patient centered medical home program established pursuant to section 364-m of the Social Services Law.

---

TN #09-56-C
Supersedes TN NEW
Approval Date July 19, 2010
Effective Date December 1, 2009
Statewide Patient Centered Medical Home – Federally Qualified Health Centers

Effective for periods on and after December 1, 2009, the Commissioner of Health is authorized to certify certain clinics as patient centered medical homes to improve health outcomes and efficiency through patient care continuity and coordination of health services. Certified providers will be eligible for incentive payments for services provided to recipients eligible for Medicaid Fee-For-Service (FFS).

A Federally Qualified Health Center shall mean a general hospital providing outpatient care or a free standing diagnostic and treatment center licensed under Article 28 of the Public Health Law that is designated as a Federally Qualified Health Center pursuant to Section 1861(aa) of the Social Security Act.

To improve access to high quality primary care services, the statewide Medicaid Patient Centered Medical Home initiative will provide incentive payments to Federally Qualified Health Centers that meet “medical home” standards established by the Department. Those standards will be consistent with the National Committee for Quality Assurance’s (NCQA) Physician Practice Connections ® -- Patient Centered Medical Home™ (PPC®-PCMH ™) Recognition Program. Federally Qualified Health Centers achieving the NCQA PPC®-PCMH ™ recognition will be eligible for incentive payments for providing services to Medicaid FFS patients.

Per visit incentive payments will be made to Federally Qualified Health Centers that meet the Department standards for certification as a patient centered medical homes, consistent with the NCQA PPC®-PCMH™ Program. There are three levels of “medical home” recognition: Levels 1, 2 and 3. Eligible Federally Qualified Health Centers will receive a per visit incentive payment commensurate with their level of “medical home” recognition. Incentive payments will be added to claims from NCQA recognized Federally Qualified Health Centers for visits with evaluation and management codes identified by the Department as “primary care.”
To determine appropriate incentive payment amounts, the NY Medicaid Program conducted a review of “medical home” incentive payments nationally. Most programs paid medical home incentive payments on a per member per month (PMPM) basis. To work in the fee-for-service payment context, PMPM benchmark amounts used by programs in several other states ($2, $4, and $6) were converted to per-visit payment amounts by first multiplying the PMPM payment by twelve (12) to calculate an annual per member payment, and then dividing the annual amount by the average number of annual primary care visits to general hospitals providing outpatient care, free standing diagnostic and treatment centers, and Federally Qualified Health Centers to arrive at a per-visit incentive payment amount for each level of medical home recognition.

Except as otherwise noted in the plan, state-developed fee schedule rates are the same for both governmental and private providers recognized as patient centered medical homes. The agency's fee schedule rates were set as of December 1, 2009 and are effective for services provided on and after that date. All rates are published on the State Department of Health’s website.

The “medical home” recognition level for Federally Qualified Health Centers is site-specific. Once a Federally Qualified Health Center advances to a higher level of “medical home” recognition it will no longer be eligible for the lower level incentive payment per Evaluation and Management visit. A Federally Qualified Health Center may only receive one level of incentive payment at a time for each eligible visit. Medical home incentive payments are only applicable to claims when Medicaid is the primary payer.

To maintain eligibility for incentive payments, Federally Qualified Health Centers must (a) renew their “patient centered medical home” certification at a frequency determined by the Commissioner; and b) provide data to the Department of Health to permit the Commissioner to evaluate the effect of patient centered medical homes on quality, outcomes and cost.
Advanced Primary Care – Federally Qualified Health Centers

Effective for periods on and after January 1, 2017 the Commissioner of Health is authorized to recognize certain clinics as Advanced Primary Care (APC) practices to improve health outcomes and efficiency through patient care continuity and coordination of health services. Recognized providers will be eligible for incentive payments for primary care services provided to recipients eligible for Medicaid Fee-For-Service (FFS).

A Federally Qualified Health Center shall mean a general hospital providing outpatient care or a freestanding diagnostic and treatment center, licensed under Article 28 of Public Health Law that is designated as a Federally Qualified Health Center pursuant to section 1861 (aa) of the Social Security Act.

To improve access to high quality primary care services, the Medicaid Advanced Primary Care initiative will provide incentive payments to Federally Qualified Health Centers that meet advanced primary care standards established by the Department. The Department developed the Advanced Primary Care model in consultation with diverse stakeholders as part of the State Health Innovation Plan. The Advanced Primary Care model is a statewide integrated primary care delivery and payment model that was created as part of a Centers for Medicare and Medicaid Innovation (CMMI) State Innovation Model (SIM) Testing grant. The model requires providers to obtain and maintain specific capabilities around patient care quality, access, and outcomes.

Per visit incentive payments will be made to Federally Qualified Health Centers that meet the Department standards for recognition as an advanced primary care practice. There are three levels that correspond to providers’ capabilities: Levels 1, 2, and 3. Eligible providers will receive a per-visit incentive payment commensurate with their level of Advanced Primary Care recognition. Incentive payments will be added to claims from recognized advanced primary care providers for visits with evaluation and management codes identified by the Department as primary care. The advanced primary care recognition level for Federally Qualified Health Centers is site-specific. Advanced primary care incentive payments are only applicable to claims when Medicaid is the primary payer.

Appropriate incentive payment amounts will be aligned with established incentive payments for primary care services for Medicaid FFS. Incentive payment amounts were determined based on historic data from an incentive payment paid to primary care providers. Factors that were part of the determination included average primary care visits per year, panel size, and level of advanced primary care practice transformation.

Except as otherwise noted in the plan, state-developed fee schedule rates are the same for both governmental and private providers recognized as Advanced Primary Care practices. The agency’s fee schedule rates were set as of January 1, 2017, and are effective for services provided on or after that date. All rates are published on the State Department of Health’s website, https://www.health.ny.gov/technology/innovation_plan_initiative/pcmh/docs/ffs_incentive_payment_rates.pdf.

To maintain eligibility for incentive payments, Federally Qualified Health Centers must provide data to the Department of Health to permit the Commissioner to evaluate the impact of advanced primary care practices on quality, outcomes, and cost.
Adirondack Medical Home Multipayor Program – Federally Qualified Health Centers (FQHCs)

Effective for periods on and after December 1, 2009, the Commissioner of Health is authorized to certify certain clinicians and clinics in the upper northeastern region of New York State as health care homes to improve health outcomes and efficiency through patient care continuity and coordination of health services. Certified providers will be eligible for incentive payments for services provided to recipients eligible for Medicaid fee-for-service; enrollees eligible for Medicaid managed care; and enrollees eligible for and enrolled in Family Health Plus organizations pursuant to Title 11-D pursuant to Article 28 of the Public Health Law (PHL).

A Federally Qualified Health Center shall mean a general hospital providing outpatient care or a free-standing diagnostic and treatment center licensed under Article 28 of the Public Health Law that is designated as a Federally Qualified Health Center pursuant to Section 1861(aa) of the Social Security Act.

The Adirondack Medical Home Multipayor Program is a primary care medical home collaborative of health care service providers including hospitals, diagnostic and treatment centers and private practices serving residents and eligible recipients in the counties of Clinton, Essex, Franklin, Hamilton, Saratoga and Warren. Incentive payments to FQHCs that meet “medical home” standards will be established jointly by the State Department of Health, participating health care service providers and payors. Medical home certification includes, but is not limited to, existing standards developed by national accrediting and professional organizations, including the National Committee for Quality Assurance’s (NCQA) Physician Practice Connections® - Patient Centered Medical Home™ (PPC®-PCMH™) Recognition Program.

Under this program, incentive payments will be made for one year to participating providers to support conversion of these FQHC practices to certified medical homes. Within one year, providers in the Multipayor Program must achieve either Level 2 or Level 3 including additional criteria (referred to as Level 2 Plus and Level 3 Plus) as determined by the program participants. Eligible providers will receive the same incentive payment commensurate with the following levels of “medical home” designation: conversion support; Level 2 Plus; or Level 3 Plus. There will be no incentive payment for Level 1 designation. Incentive payments will be added to claims from program FQHCs for visits with Evaluation and Management codes identified by the Department of Health as “primary care”.

TN #09-56-D Approval Date July 19, 2010
Supersedes TN NEW Effective Date December 1, 2009
New York
1(c)(i)(L)

The incentive amount was determined by the Department of Health and participating payors based on a market analysis of the cost to support the conversion of a practice to provide “medical home” patient care and management information systems related to meeting the objectives of this initiative. The participating payors agreed to a per member per month (PMPM) incentive payment of $7. To calculate the per-visit incentive payment amount, the PMPM was multiplied by twelve (12) to calculate an annual per member payment ($84) and then this annual amount was divided by the average number of annual primary care visits to clinics and practitioners’ offices to arrive at a per visit incentive payment. The average annual visit rate, based on two years of claims data (January 1, 2007 – December 31, 2008) for a specific list of providers who agreed to participate in the Multipayor Program, was 3 visits per year. Therefore, the per visit incentive payment is $28. The incentive amount will be approved by the Division of the Budget.

Except as otherwise noted in the plan, the state-developed fee schedule rates are the same for both governmental and private providers of primary care “medical home” services in the Multipayor Program. The agency’s fee schedule rate was set as of December 1, 2009 and is effective for services provided on or after that date. All Medicaid rates are published on the Department of Health’s Public website.

Patient and health care services participation in the Adirondack Medical Home Multipayor Program is on a voluntary basis. While FQHCs are participating in the Multipayor Program, they are precluded from receiving incentive payments under the statewide patient centered medical home program established pursuant to section 364-m of the Social Services Law.
Freestanding Clinic Services (diagnostic and treatment facilities) Facilities Certified Under Article 28 of the State Public Health Law

Prospective, all inclusive rates calculated by Department of Health, based on the lower of the allowable average cost per visit or the group ceiling trended to the current year. For purposes of establishing rates of payment for diagnostic and treatment centers for services provided on or after April 1, 1995 through March 31, 1999, and on or after July 1, 1999 through March 31, 2000, and on and after April 1, 2000 through March 31 2003, [and] on and after April 1, 2003 through March 31, 2011, and on and after April 1, 2011 through March 31, 2013, the reimbursable base year administrative and general costs of a provider, excluding a provider reimbursed on an initial budget basis, shall not exceed the statewide average of total reimbursable base year administrative and general costs of diagnostic and treatment centers. For the purposes of this provision, reimbursable base year administrative and general costs shall mean those base year administrative and general costs remaining after application of all other efficiency standards, including, but not limited to, peer group cost ceilings or guidelines. The limitation on reimbursement for provider administrative and general expenses shall be expressed as a percentage reduction of the operating cost component of the rate promulgated for each diagnostic and treatment center with base year administrative and general costs exceeding the average. Facilities offering similar types of services and having similar regional economic factors are grouped and ceilings are calculated on the cost experience of facilities within the group taking into account regional economic factors such as geographic location. Costs at or below these ceilings have been determined to be reasonable. The facility-specific impact of eliminating the statewide cap on administrative and general costs, for the period April 1, 1999 through June 30, 1999 shall be included in rates of payment for facilities affected by such elimination for the period October 1, 1999 through December 31, 1999.
The rates include a capital cost component. For fiscal year ending March 31, 1994, such rates are trended and extended to September 30, 1994. Commencing October 1, 1994 and thereafter, such rates shall be calculated as above for fiscal years beginning October 1, and ending September 30 except that rates of payment for the period ending September 30, 1995, shall continue in effect through September 30, [2007] 2009, provided however that, effective May 1, 2005, such rates may be adjusted to include additional capital costs not previously included in the corresponding rate. MMTP services may be reimbursed on a uniform fixed weekly fee per enrolled patient basis. For the period October 1, 2004 through December 31, 2004, freestanding clinic MMTP services shall be reimbursed on a uniform weekly fee per enrolled patient at the rate of $173.13. For the period beginning on January 1, 2005 and thereafter, the uniform fixed weekly fee for MMTP services will equal 100% of the weekly rate for hospital based MMTP service providers. Payment rates for renal dialysis services of $150.00 per procedure are adjusted to reflect utilization patterns for CAPD, CCPD, hemodialysis and extended peritoneal dialysis services. A single price per visit for day health care services rendered to patients with acquired immunodeficiency syndrome (AIDS) and other human immunodeficiency virus (HIV) related illnesses is determined based on reasonable projections of necessary costs and utilization and trended to later rate years. Price components may be adjusted for service capacity, urban or rural location and regional differences. Rates are subject to approval of the Division of the Budget.

Additional Funding for Diagnostic and Treatment Centers for the period October 1, 1999 through December 31, 1999

Rates for diagnostic and treatment centers for the period October 1, 1999 through December 31, 1999 shall include, in the aggregate, the sum of fourteen million dollars ($14,000,000) which shall be added to rates of payment based on an apportionment of such amount using a ratio of each individual providers estimated Medicaid expenditures to total estimated Medicaid expenditures for diagnostic and treatment centers, as determined by the Commissioner, for the October 1, 1999 through September 30, 2000 rate period.

Additional Funding for Diagnostic and Treatment Centers Providing Services to Persons with Developmental Disabilities

For the period July 1, 2000, through March 31, 2001 and annual state fiscal periods thereafter, fee-for-service rates of payment for medical assistance services provided to patients eligible for federal financial participation under title XIX of the federal social security act by diagnostic and treatment centers licensed under article 28 of the public health law that provide services to individuals with developmental disabilities as their principal mission, shall be increased by
New York
1(d)(i)

annual amounts of two million two hundred eighty thousand dollars ($2,280,000) in the aggregate. Each such diagnostic and treatment center shall receive a proportionate share of these funds based upon the ratio of its medical assistance units of service to the total medical assistance units of service of all such facilities during the base year. The base year shall be the calendar year immediately preceding each annual period. There shall be no reconciliation of the amount added to rates of payment pursuant to this section to reflect the actual number of Medicaid units of service for affected providers for the period July 1, 2000 to March 31, 2001 and annual state fiscal periods thereafter.

Facilities Certified Under Article 28 of the Public Health Law As Freestanding Diagnostic and Treatment Centers

Services for medically supervised chemical dependence treatment and medically supervised withdrawal services

For dates of service beginning on July 1, 2002, facilities providing these services shall be reimbursed at their existing rate for provision of comprehensive diagnostic and treatment center services as described in the paragraphs of the section of this plan titled Freestanding Clinic Services (diagnostic and treatment facilities) Facilities Certified Under Article 28 of the State Public Health Law; Including Federally Qualified Health Centers.

Designated Preferred Primary Care Provider for Freestanding Diagnostic and Treatment Centers

Freestanding Diagnostic and treatment centers seeking reimbursement as designated preferred primary care providers are required to enter into a provider agreement with the New York State Department of Health.

Reimbursement for providers designated as preferred primary care providers is prospective and associated with resource use patterns to insure that ambulatory services are economically and efficiently provided. The methodology is based upon the Products of Ambulatory Care (PAC) classification system.

Under the reimbursement method, facility specific payment rates are established for each of the PAC groups. For each service a rate is established to cover all labor, ancillary services, medical supplies, administrative overhead, general and capital costs. A supplemental capital add-on is available to facilities participating in the preferred primary care program which finance capital acquisitions through public authorities. The per visit rate add-on is calculated by dividing the related capital cost by current patient visit volume.
New York 1(e)

The rates are regionally adjusted to reflect differences in labor costs for personnel providing direct patient care and clinic support staff. The rates have been set prospectively by applying an economic trend factor, except that rates of payment for the period ending September 30, 1995, shall continue in effect through September 30, [2007] 2009, provided however that, effective May 1, 2005, such rates may be adjusted to include additional capital costs not previously included in the corresponding rate. A supplemental bad debt and charity care allowance will be established annually for diagnostic and/or treatment centers approved as preferred primary care providers and paid as an addition to the facility's rate of payment. Each facility's allocation shall be based on its losses associated with the delivery of bad debt and charity care and computed on the basis of projected and allowable fiscal and statistical data, adjusted to actual, submitted by the facility. The amount paid per visit shall be based on each facility's allocation divided by projected Medicaid threshold visits adjusted to actual visits. This supplemental bad debt and charity care allowance shall be in effect until December 31, 1996.

For services provided on or after April 1, 1995, by providers designated as preferred primary care providers, rates of payment may be established pursuant to the reimbursement payment methodology described in this section only for services provided by providers which submitted bills prior to December 31, 1994, based on the reimbursement payment methodology described in this section, or by a diagnostic and treatment center operated by a general hospital designated as a financially distressed hospital, which applied on or before April 1, 1995, for designation as a preferred primary care provider. The reimbursement payment methodology described in this section is an alternative to the prospective average cost per visit reimbursement method used for non-participating diagnostic and treatment centers. There are unique features present in the reimbursement program designed to encourage provider participation and foster quality of care. The most notable of these is the financial responsibility of providers for selected laboratory and other ancillary procedures and Medicaid revenue assurances. Financial incentives are employed (within limitations) under this system to assure that these and other features are complied with.
Ambulatory Patient Group System: Hospital-Based Outpatient

For dates of service beginning December 1, 2008, for hospital outpatient clinic and ambulatory surgery services, and beginning January 1, 2009, for emergency department services, through December 31, 2019, the operating component of rates for hospital based outpatient services shall be reimbursed using a methodology that is prospective and associated with resource utilization to ensure that ambulatory services are economically and efficiently provided. The methodology is based upon the Ambulatory Patient Group (APG) classification and reimbursement system. This methodology incorporates payments for the separate covered Medicaid benefits in accordance with the payment methods for these services. Reimbursement for the capital component of these rates shall be made as an add-on to the operating component as described in the APG Rate Computation section.

If a clinic is certified by the Office of People with Developmental Disabilities (OPWDD), reimbursement will be as specified in the OPWDD section of the State Plan.

The Ambulatory Patient Group patient classification system is designed to explain the amount and type of resources used in an ambulatory visit by grouping patients with similar clinical characteristics and similar resource use into a specific APG. Each procedure code associated with a patient visit is assigned to an APG using the grouping logic developed by 3M Health Information Systems. When evaluation and management codes are coded, the APG grouping logic also uses the diagnosis code to make the APG assignment. Ultimately, the procedures and diagnoses coded for a patient visit will result in a list of APGs that correspond on a one-for-one basis with each procedure coded for the visit.
APG Reimbursement Methodology – Hospital Outpatient

*For Clinic (effective 12/1/08) & School-Based Health Center (SBHC) (effective 4/1/09), while they share the same base payment rates, please note that their rate codes and effective dates differ.

(2) Statewide Base Price is not a service but used for APGs which do not have a payment differentiation for upstate and downstate providers.

Hospital-based Article 28 Medicaid rates can also be found at the Department of Health’s website at: http://www.health.ny.gov/health_care/medicaid/rates/apg/baserates.htm

TN 10-0041 Approval Date: Aug 25, 2016

Supersedes TN 10-0017 Effective Date: Jan 1, 2016
Ambulatory Patient Group System - Hospital Outpatient

The following is a list of definitions relating to the Ambulatory Patient Group reimbursement system. Links to detailed APG Reimbursement Methodology lists are located in the APG Reimbursement Methodology - Hospital Outpatient section.

**Allowed APG Weight** shall mean the relative resource utilization for a given APG after adjustment for bundling, packaging, and discounting.

**Ambulatory Patient Group (APG)** shall mean a group of outpatient procedures, encounters or ancillary services, which reflect similar patient characteristics and resource utilization and which incorporate the use of [ICD-9-CM] |ICD-10-CM| diagnosis and HCPCS procedure codes, as defined below. APGs are defined under 3M Health Information Systems’ grouping logic outlined in the APG Definitions Manual. A link to the APG Definitions Manual versions and effective dates is available in the APG Reimbursement Methodology - Hospital Outpatient section.

**APG Relative Weight** shall mean a numeric value that reflects the relative expected average resource utilization (cost) for each APG as compared to the expected average resource utilization for all other APGs. A link to the APG relative weights for all periods is available in the APG Reimbursement Methodology- Hospital Outpatient section.

TN # 15-0019 Approval Date February 17, 2016
Supersedes TN #09-0065-A Effective Date October 1, 2015
**Associated Ancillaries** shall mean laboratory and radiology tests and procedures ordered in conjunction with an APG visit. A link to the list of associated ancillaries for all periods is available in the APG Reimbursement Methodology - Hospital Outpatient section.

**APG Software** shall mean the New York State-specific version of the APG computer software developed and published by Health Information Systems, Inc. (3M) to process HCPCS/CPT-4 and ICD-9-CM ICD-10-CM code information in order to assign patient visits, at the procedure code level, to the appropriate APGs and apply appropriate bundling, packaging, and discounting logic to in turn calculate the final APG weight and allowed reimbursement for a patient visit. Each time the software is updated, 3M will automatically send updated software to all license holders. Providers and other interested parties that do not purchase the grouper software can perform the computations by accessing the APG definitions manual, which is available on the 3M web site.

**Base Rate** shall mean the dollar value that shall be multiplied by the allowed APG weight for a given APG, or by the final APG weight for each APG on a claim to determine the total allowable Medicaid operating payment for a visit.

**Carve-outs** shall mean certain procedures which are not paid using the APG reimbursement methodology. Procedures that are not payable in APGs may be reimbursed through the NYS Medicaid ordered ambulatory fee schedule or the dental fee schedule for orthodontia only. If the procedure is not reimbursable thru the APG methodology or on the fee schedules as stated, they are not reimbursable in Medicaid. The NYS Medicaid fee schedules are provided on the eMedNY website under provider manuals.

**Case Mix Index** is the actual or estimated average final APG weight for a defined group of APG visits.

**Coding Improvement Factor** is a numeric value used to adjust for more complete and accurate coding for visits upon implementation of the APG reimbursement system. A link to the coding improvement factors for all periods is available in the APG Reimbursement Methodology - Hospital Outpatient section.

**Consolidation/Bundling** shall mean the process for determining if a single payment amount is appropriate in those circumstances when a patient receives multiple APG procedures during a single patient visit. In some cases, a procedure will be considered part of a more complicated procedure. In this case the payment for the less complicated procedure will be included in the payment for the more complicated procedure and the claim line for the less complicated procedure will show zero payment for that procedure. Consolidation logic is defined in the 3M Health Information Systems’ APG Definitions Manual, a link to which is provided in the APG Reimbursement Methodology - Hospital Outpatient section.

**Current Procedural Terminology-fourth edition (CPT-4)** is the systematic listing and coding of procedures and services provided by physicians or other related health care providers. It is a subset of the Healthcare Common Procedure Coding System (HCPCS). The CPT-4 is maintained by the American Medical Association and the HCPCS is maintained by the Centers for Medicare and Medicaid Services. Both coding systems are updated annually.

TN____#15-0019____________ Approval Date _February 17, 2016_ 
Supersedes TN__#09-0065-A____ Effective Date _October 1, 2015_
Discounting shall mean the reduction in APG payment that results when related procedures or ancillary services are performed during a single patient visit. Discounting [is always] will be at the rate of 50% until January 1, 2010, with the exception of those discounts listed in the link to the Non-50% Discounting APG List provided in the APG Reimbursement Methodology - Hospital Outpatient Section.

"Episode" shall mean a unit of service consisting of all services coded on a claim. All services on the claim are considered to be part of the same APG visit and are not segmented into separate visits based on coded dates of service as would be the case with "visit" billing. Under episode billing, an episode shall consist of all medical visits and/or significant procedures that are provided by a hospital-based outpatient clinic, ambulatory surgery center, or an emergency department to a patient on a single date of service plus any ordered ancillaries, ordered on the date of the visit or date of the significant procedure(s), resulting from the medical visits and/or significant procedures, some of which may have been done on a different date of service from that of the medical visits and/or significant procedures. Multiple episodes coded on the same claim would not pay correctly; therefore, multiple episodes should not be coded on the same claim. The calculation of the APG payment by the APG software may be either visit based or episode based depending on the rate code used to access the APG software logic.

Final APG Weight shall mean the allowed APG weight for a given visit as calculated by the APG software using the logic in the APG definitions manual, including all adjustments applicable for bundling, packaging, and discounting.
“HCPCS Codes” are from the Healthcare Common Procedure Coding System, a numeric coding system maintained by the Centers for Medicare and Medicaid Services (CMS) and used to identify services and procedures for purposes of billing public or private health insurance programs. CPT (Common Procedure Terminology) codes are a subset of the HCPCS coding system.

International Classification of Diseases, [9th] 10th Revision-Clinical Modification ([ICD-9-CM]) ICD-10-CM) is a comprehensive coding system maintained by the federal Centers for Medicare and Medicaid Services in the US Department of Health and Human Services. It is maintained for the purpose of providing a standardized, universal coding system to identify and describe patient diagnosis, symptoms, complaints, condition and/or causes of injury or illness. It is updated annually.

Modifier shall mean a HCPCS Level II code used in APGs, based on its meaning in the HCPCS lexicon, to modify the payment for a specific procedure code or APG.

Never Pay APGs shall mean an APG where all the procedure codes that map to the APG are carved out of APGs and will not be paid using the APGs reimbursement methodology. Procedures that are not payable in APGs may be reimbursed through the NYS Medicaid ordered ambulatory fee schedule or the dental fee schedule for orthodontia only. The Never Pay APG file details if there is an alternative payment available. If an alternative payment is available, providers should review the NYS Medicaid fee schedules as stated to determine the payment. The NYS Medicaid fee schedules are provided on the eMedNY website under provider manuals.

Never pay procedures shall mean procedure codes that are carved out of APGs and will not be paid using the APGs reimbursement methodology. Procedures that are not payable in APGs may be reimbursed through the NYS Medicaid ordered ambulatory fee schedule or the dental fee schedule for orthodontia only. The Never Pay Procedures file details if there is an alternative payment available. If an alternative payment is available, providers should review the NYS Medicaid fee schedules as stated to determine the payment. The NYS Medicaid fee schedules are provided on the eMedNY website under provider manuals.

No-blend APG shall mean an APG that has its entire payment calculated under the APG reimbursement methodology without regard to the historical average operating payment per visit for the provider. A link to a list of no-blend APGs for all periods is available in the APG Reimbursement Methodology - Hospital Outpatient section.

TN #15-0019____________ Approval Date __February 17, 2016______

Supersedes TN #09-0065-A__ Effective Date __October 1, 2015________
Packaging shall mean those circumstances in which payment for routine ancillary services or drugs shall be deemed as included in the applicable APG payment for a related significant procedure or medical visit. Medical visits also package with significant procedures, unless specifically excepted in regulation. There is no packaging logic that resides outside the software. A link to a list of the uniform packaging APGs for all periods is available in the APG Reimbursement Methodology - Hospital Outpatient section.

“Peer Group” shall mean a group of providers or services that share a common APG base rate. Peer groups may be established based on a geographic region, service type, or categories of patients. The sixteen hospital peer groups are:

1. Clinic - Upstate;
2. Clinic - Downstate;
3. Ambulatory Surgery Services - Upstate;
4. Ambulatory Surgery Services - Downstate;
5. Emergency Department - Upstate;
6. Emergency Department - Downstate;
7. Clinic Mental Retardation, Developmental Disability, Traumatic Brain Injured - Upstate
8. Clinic Mental Retardation, Developmental Disability, Traumatic Brain Injured - Downstate
9. Opioid Treatment Program (Clinic) - Upstate
10. Opioid Treatment Program (Clinic) - Downstate
11. Mental Health Clinic - Upstate;
12. Mental Health Clinic - Downstate;
13. Chemical Dependence Outpatient Clinic - Upstate; [and]
14. Chemical Dependence Outpatient Clinic - Downstate.
15. Outpatient Rehabilitation Clinic - Upstate; and
16. Outpatient rehabilitation Clinic - Downstate.

“Procedure-based Weight” shall mean a numeric value that reflects the relative expected average resource utilization (cost) for a given HCPCS/CPT code as compared to the expected average resource utilization for other HCPCS/CPT codes or APGs. If a procedure code has not been assigned a procedure-based weight, the APG relative weight for the APG to which that procedure code groups will be used as the basis for reimbursement for that procedure code (subject to the consolidation, discounting and packaging logic).

“Region” shall mean the counties constituting a peer group that has been defined, at least in part, on a regional basis. The downstate region shall consist of the five counties comprising New York City, as well as the counties of Nassau, Suffolk, Westchester, Rockland, Orange, Putnam, and Dutchess. The upstate region shall consist of all other counties in New York State.

“APG Visit” shall mean a unit of service consisting of all the APG services and associated ancillary services performed for a patient that are coded on the same claim and share a common date of service.
"Episode" shall mean a unit of service consisting of all services coded on a claim. All services on the claim are considered to be part of the same APG visit and are not segmented into separate visits based on coded dates of service as would be the case with "visit" billing. Under episode billing, an episode shall consist of all medical visits and/or significant procedures that are provided by a hospital-based outpatient clinic, ambulatory surgery center, or an emergency department to a patient on a single date of service plus any ordered ancillaries, ordered on the date of the visit or date of the significant procedure(s), resulting from the medical visits and/or significant procedures, some of which may have been done on a different date of service from that of the medical visits and/or significant procedures. Multiple episodes coded on the same claim would not pay correctly; therefore, multiple episodes should not be coded on the same claim. The calculation of the APG payment by the APG software may be either visit based or episode based depending on the rate code used to access the APG software logic.
Reimbursement Methodology - Hospital Outpatient

I. The criteria for using a procedure-based weight or the relative weight in the methodology is as follows: If a procedure-based weight is available for a particular procedure code, then the procedure-based weight is used. If a procedure-based weight is not available for a particular procedure code, then the relative weight (i.e., “APG weight”) is used.

II. The initial calculation of the APG relative weights were developed using line level charges from 2005 New York Medicaid claims converted to cost using the ratio of cost to charges methodology. The line level costs were brought up to the APG level to determine the average cost of each APG.

   a. The APG relative weights will be updated no less frequently than every [six] seven years. These APG and weights are set as of December 1, 2008, and are effective for specified services on and after that date. A link to the list of APGs and their relative weights is available in the APG Reimbursement Methodology - Reimbursement Components section.

   b. The APG relative weights will be reweighted prospectively. The initial reweighting will be based on Medicaid claims data from the December 1, 2008 through September 30, 2009 period. Subsequent reweighting’s will be based on Medicaid claims data from the most recent twelve-month period and will be based on complete and accurate line level procedure and charge data and ratio of cost to charge data.

   c. The Department will correct material errors of any given APG relative weight. Such corrections will make use of benchmarking data consisting of payment information from other payers (including Medicare) reimbursing comparable services. Corrections to material errors in individual APG relative weights will be made on a prospective basis.

III. Case mix index is an expression of the average paid APG weight for a given peer group after consolidation, packaging, and discounting. Case mix indices will be calculated by running applicable claims data through the latest version of the APG software to determine the average final APG weight of the visits. Outlier claims or claim lines may be excluded from this calculation to assure overall accuracy of the final case mix. The initial calculation of case mix indices for periods prior to January 1, 2010, will be based on Medicaid data from the December 1, 2008, through April 30, 2009 period. The January 1, 2010, calculation of case-mix indices will be based on Medicaid data for the period December 1, 2008, through September 30, 2009. Subsequent calculations will be based on Medicaid claims data from the most recent twelve-month period.

TN #18-0056 Approval Date December 14, 2018
Supersedes TN #17-0055 Effective Date July 01, 2018
III. The APG base rates [shall] will be updated at least annually. Updates for periods prior to January 1, 2010 will be based on claims data from the December 1, 2008 through April 30, 2009 period. The January 1, 2010, update will be based on claims data for the period December 1, 2008, through September 30, 2009. Subsequent updates will be based on Medicaid claims data from the most recent twelve-month period, and will be based on complete and accurate billing data. APG base rates [shall] will be rebased each time the APG relative weights are reweighted.

   a. If it is determined by the Department that an APG base rate is materially incorrect, the Department [shall] will correct that base rate prospectively so as to align aggregate reimbursement with total available funding.

IV. APG base rates [shall] will initially be calculated using the total operating reimbursement for services and associated ancillaries and the associated number of visits for services moving to APG reimbursement for the period January 1, 2007 to December 31, 2007. APG payments [shall] will also reflect an investment of $178 million on an annualized basis for periods prior to December 1, 2009, [and] $270 million on an annualized basis for the period December 1, 2009, through April 30, 2012, and $245 million for the period May 1, 2012, through March 31, 2013, and $245 million on an annualized basis for periods thereafter. A link to the allocation of all APG investments across peer groups for all periods is available in the APG Reimbursement Methodology - Hospital Outpatient section. The case mix index [shall] will initially be calculated using 2005 claims data.

   a. Re-estimations of total operating reimbursement and associated ancillaries and the estimated number of visits [shall] will be calculated based on historical claims data. Re-estimations for periods prior to January 1, 2010, will be based on claims data from the December 1, 2008 through April 30, 2009 period. The January 1, 2010, re-estimation [shall] will be based on claims data from the December 1, 2008, through September 30, 2009, period. Subsequent re-estimations will be based on Medicaid claims data from the most recent twelve-month period, and will be based on complete and accurate data.

   b. The estimated case mix index [shall] will be calculated using the appropriate version of the 3M APG software based on claims data. Re-estimations for periods prior to January 1, 2009, will be based on claims data from the December 1, 2008 through April 30, 2009 period. The January 1, 2010, re-estimation [shall] will be based on Medicaid data for the period December 1, 2008, through September 30, 2009. Subsequent re-estimations will be based on Medicaid claims data from the most recent twelve-month period, and will be based on complete and accurate line level procedure and charge data and ratio of cost to charge data.
c. APG base rates shall be adjusted for the following to reflect policy changes for services, not reimbursed as a discrete peer group in APGs or reimbursed prior to APGs on discrete rate codes, which are carved in to or out of APGs. The adjustment to the base rate is to maintain budget neutrality on overall Medicaid expenditures.

   (i) Effective beginning January 1, 2011 and thereafter, $5M will be removed from the clinic base rates for the carve in of occupational, physical and speech therapy from ordered ambulatory providing for payment using the APG reimbursement method;

   (a) For Article 28 hospitals offering occupational, physical and speech therapy services that do not have a clinic rate, these providers will submit claims using the ordered ambulatory fee schedule.

   (ii) Effective beginning April 1, 2011 and thereafter, $30M will be removed for physician costs from the clinic and emergency department base rates to allow providers to submit a separate claim for physicians services to the physician fee schedule.

d. APG base rates shall be adjusted for the following to reflect policy changes for services, not reimbursed as a discrete peer group in APGs or reimbursed prior to APGs on discrete rate codes, which are carved out of APGs. The adjustment to the base rate is to remove costs for a discontinuation of payment.

   (i) Effective beginning January 1, 2011 and thereafter, $2M will be removed from the clinic base rates for the removal of the Community Support Program from APG reimbursement.
VI. Rates for new facilities during the transition period

(1) General hospital outpatient clinics which commence operation after December 31, 2007, and prior to January 1, 2012, and for which rates computed pursuant to Public Health Law §2807(2) are not available shall have the capital cost component of their rates based on a budget as submitted by the facility and as approved by the Department and shall have the operating component of their rates computed in accordance with the following:

(2) For the period December 1, 2008 through [December 31] November 30, 2009, 75% of such rates shall reflect the historical 2007 regional average payment per visit as calculated by the Department, and 25% of such rates shall reflect APG rates as computed in accordance with this Attachment;

(3) For the period January 1, 2010 through December 31, 2009, 50% of such rates shall reflect the historical 2007 regional average payment per visit as calculated by the Department, and 50% of such rates shall reflect APG rates as computed in accordance with this [Subpart]Attachment;

(4) For the period January 1, 2011 through December 31, 2011, 25% of such rates shall reflect the historical 2007 regional average payment per visit as calculated by the Department, and 75% of such rates shall reflect APG rates as computed in accordance with this [Subpart]Attachment;

(5) For periods on and after January 1, 2012, 100% of such rates shall reflect APG rates as computed in accordance with this [Subpart]Attachment.

(6) For the purposes of this subdivision, the historical 2007 regional average payment per visit shall mean the result of dividing the total facility specific Medicaid reimbursement paid for general hospital outpatient clinic claims paid in the 2007 calendar year in the applicable upstate or downstate region for all rate codes reflected in the APG rate-setting methodology except those specifically excluded pursuant to §86-8.10 of this Subpart, [divided] by the total visits on claims paid under such rate codes.

(7) The phase-in described in the preceding paragraphs [(2) through (5)] is also applicable to hospital-based outpatient clinics in operation prior to January 1, 2008.
**APG Rate Computation – Hospital Outpatient**

The following is a description of the methodology to be utilized in calculating rates of payment for hospital outpatient department, ambulatory surgery, and emergency department services under the Ambulatory Patient Group classification and reimbursement system.

I. Claims containing [ICD-9-CM] ICD-10-CM diagnostic and CPT-4/HCPCS procedure codes are submitted to the Department on appropriate forms or in the accepted electronic format.

II. Claims are reviewed electronically to assign each valid procedure code to the appropriate APG using the APG software logic. Invalid codes will be assigned to an error APG and not given further consideration in the payment process.

III. Each valid APG on the claim is assigned a relative weight. At this time the software logic also determines an allowed weight based upon whether each APG on the claim is to be paid in full, packaged, consolidated, or discounted.

IV. The allowed weights for each valid APG on the claim are then summed to arrive at the final weight for this claim. This final weight is multiplied by an operating base rate that is specific to the peer group to which the claim has been assigned resulting in the APG operating cost reimbursement amount for this claim. For hospital outpatient and emergency services, capital will continue to be paid as an add-on using the existing, previously approved methodology. The capital cost component for ambulatory surgery services shall be the result of dividing the total amount of capital cost reimbursement paid to such facilities pursuant to the current Products of Ambulatory Surgery (PAS) system for the 2005 calendar year for the Upstate Region and for the Downstate Region and then dividing each such regional total amount by the total number of claims paid through the PAS system within each such region for the 2005 calendar year.

V. A separate base rate calculation shall be calculated for each peer group established by the Department. All Medicaid reimbursement paid to facilities for services moving to the APG reimbursement system (e.g., outpatient department, ambulatory surgery, and emergency department services) during the 2007 calendar year and associated ancillary payments will be added to an investment of $178 million on an annualized basis for periods through November 30, 2009, and $270 million on an annualized basis for periods thereafter to form the numerator. A link to the base rates can be found in the APG Reimbursement Methodology – Hospital Outpatient section.

---

**TN #15-0019**  **Supersedes TN #09-0065-B**  **Approval Date February 17, 2016**  **Effective Date October 01, 2015**
VI. The base rates will be adjusted for the carve in or out of services, not reimbursed as a discrete peer group, as described in the APG Base Rate Calculation section.

The peer group-specific case mix index multiplied by the coding improvement factor and the 2007 base year visits will form the denominator resulting in a base rate for that peer group.

TN#: 10-0041 Approval Date: Aug 25, 2016
Supersedes TN#: 09-0065-B Effective Date: Jan 1, 2011
New York
1(l)

The following is an example of a sample APG base rate calculation:

a. 2007 Peer Group Reimbursement $51,000,000  
b. Additional Investment $25,000,000  
c. Case Mix Index 8.1610  
d. Coding Improvement Factor 1.05  
e. 2007 Base Year Visits 50,000

\[
\frac{($51,000,000 + $25,000,000)}{(8.1610 \times 1.05 \times 50,000)} = 177.38 \text{ (Base Rate)}
\]

VII. Rates for existing facilities during the transition period

During the transition period, reimbursement for hospital based outpatient department services shall consist of a blend of each facility's average 2007 Medicaid rate and the APG calculation for that visit. The average 2007 Medicaid rate for purposes of blending is computed by dividing the amount paid in calendar year 2007 for all rate codes reflected in the APG rate setting methodology, by the total visits paid through those codes for the same time period. In the initial phase (ending [December 31] November 30, 2009) 25% of the operating payment for each visit will be based upon the APG reimbursement methodology and 75% will be based upon the provider specific average operating payment for calendar year 2007. For the period December 1, 2009, through December 31, 2010 (During 2010), the blend will be 50/50. During 2011, the blend will be 75/25. Hospital outpatient department payments will be based upon 100% of the APG operating component beginning on January 1, 2012. Both the emergency department and ambulatory surgery services will move to 100% APG payment upon implementation with no transition period. [Per the enabling statute, as new services the Education APGs, and the Extended Hours APGs are not subject to the blend requirement.

Effective for dates of service on and after September 1, 2009, smoking cessation counseling services provided to pregnant women on any day of her pregnancy, during a medical visit provided by a general hospital outpatient department shall be reimbursed entirely on the APG methodology.] A link to a list of APGs that are not subject to the blend is available in the APG Reimbursement Methodology - Hospital Outpatient section.

TN  #09-65-A     Approval Date  February 6, 2013
Supersedes TN  #09-62     Effective Date  December 1, 2009
Effective September 1, 2009, immunization services provided in a general hospital outpatient department, when no other medical services are provided during that patient visit, shall be reimbursed entirely on the APG methodology.

Effective for dates of service on and after January 1, 2009, payments to general hospital outpatient departments for the following services shall be based on fees or rates established by the Department of Health: (1) wheelchair evaluations, (2) eyeglass dispensing, and (3) individual psychotherapy services provided by licensed social workers to persons under the age of 21, and to persons requiring such services as a result of or related to pregnancy or giving birth. Except as otherwise noted in the plan, state-developed fee schedule rates are the same for both governmental and private providers. The agency’s alternative payment fee schedule rates for the services listed in this paragraph were set September 1, 2009 and are effective for services provided on or after that date. A link to the APG alternative rates for all periods is available in the APG Reimbursement Methodology – Hospital Outpatient section. [The rates are published on the Department of Health web-site at the following link: http://www.health.ny.gov/health_care/medicaid/rates/apg/docs/apg_alternative_payment_fee_schedule.pdf]

VIII. Rates for services provided in hospital outpatient facilities located outside of New York State shall be as follows:

- APG rates in effect for similar services for providers located in the downstate region of New York State shall apply with regard to services provided by out-of-state providers located in the New Jersey counties of Sussex, Passaic, Bergen, Hudson, Essex, Union, Middlesex and Monmouth; in the Pennsylvania county of Pike; and in the Connecticut counties of Fairfield and Litchfield; and rates in effect for similar services for providers located in the upstate region of New York State shall apply with regard to all other out-of-state providers.

- In the event the Department determines that an out-of-state provider is providing services which are not available within New York State, the Department may negotiate payment rates and conditions with such a provider up to but not in excess of the provider’s usual and customary charges. Prior approval by the Department shall be required with regard to services provided by such providers.
For APG reimbursement to out-of-state hospitals, the downstate region of New York State shall consist of the New York counties of Bronx, New York, Kings, Queens, Richmond, Nassau, Suffolk, Westchester, Rockland, Orange, Putnam and Dutchess, and the upstate region of New York State shall consist of all other New York counties.

System updating

The following elements of the APG reimbursement system shall be updated no less frequently than annually:

- the listing of reimbursable APGs and the relative weight assigned to each APG;
- the base rates;
- the applicable [ICD-9-CM] ICD-10-CM codes utilized in the APG software system;
- the applicable CPT-4/HCPCS codes utilized in the APG software system; and
- the APG software system.
[The following shall be excluded from the APG reimbursement system:

- Drugs and other pharmaceutical products and implantable family planning devices for which separate and distinct outpatient billing and payment were authorized by the Department as of December 31, 2007, and as set forth by the Department in written billing instructions issued to providers.

- HIV counseling and testing visits, HIV counseling (no testing), post-test HIV counseling visits (positive results), day health care service (HIV).

- TB/directly observed therapy - downstate levels 1 and 2, TB/directly observed therapy.

- Upstate levels 1 and 2, AIDS clinic therapeutic visits in general hospital outpatient clinics.

- Child rehabilitation services provided under rate code 2887 in general hospital outpatient clinics.

- Medicaid obstetrical and maternity services (MOMS) provided under rate code 1604.

- Visits solely for the purpose of receiving ordered ambulatory services.

- Visits solely for the purpose of receiving pharmacy services.

- Visits solely for the purpose of receiving education or training services, except with regard to services authorized pursuant to clause (A) of subparagraph (ii) of paragraph (f) of subdivision 2-a of §2807 of the Public Health Law.

- Visits solely for the purpose of receiving services from licensed social workers, except with regard to psychotherapy services provided by Federally Qualified Health Centers or Rural Health Centers choosing to participate in the APG system, or as authorized pursuant to clauses (C) and (D) of subparagraph (ii) of paragraph (f) of subdivision 2-a of §2807 of the Public Health Law.

- Visits solely for the purpose of receiving group services, except with regard to clinical group psychotherapy services provided by Federally Qualified Health Centers or Rural Health Centers choosing to participate in the APG system and provided, however, that reimbursement for such group services shall be determined in accordance with state regulation.

- Offsite services, defined as medical services provided by a facility's outpatient staff at locations other than those operated by and under the facility's licensure under Article 28 of the Public Health Law, or visits related to the provision of such offsite services, except with regard to offsite services provided by Federally Qualified Health Centers or Rural Health Centers.]
Effective for hospital outpatient services, on or after July 1, 2013, the administration of a Long-Acting Reversible Contraceptive (LARC) will be carved out of the APG reimbursement methodology when it is provided on the same Date of Service (DOS) as an abortion. The facility will be reimbursed with state funds only for the abortion procedure through APGs which is a prospective payment system that pays based on a facility’s base rate and the service intensity weight of the procedure(s) rendered. The facility will submit a separate claim that will pay $208 which will cover the cost of the LARC insertion ($158) and the associated Evaluation and Management services ($50). The facility will submit a third claim to be reimbursed for the cost of the LARC device at the provider's actual acquisition cost.
[The following APGs shall not be eligible for reimbursement through the APG system:

065  RESPIRATORY THERAPY
066  PULMONARY REHABILITATION
094  CARDIAC REHABILITATION
117  HOME INFUSION
118  NUTRITION THERAPY
190  ARTIFICIAL FERTILIZATION
311  FULL DAY PARTIAL HOSPITALIZATION FOR SUBSTANCE ABUSE

Reimbursement information for some Hospital Outpatient Services that are licensed by the Office for People with Developmental Disabilities (OPWDD), Office of Mental Health (OMH), and Office of Alcoholism and Substance Abuse Services (OASAS) is located in later pages of this section which contain the reimbursement information for the same or similar services that are provided by Freestanding Clinics.
Behavioral Health Utilization Controls - Hospital-based Clinics

Effective April 1, 2011, the Office of Mental Health (OMH) and the Office of Alcoholism and Substance Abuse Services (OASAS) will establish utilization thresholds for their hospital-based clinics. These thresholds will target unusually high utilization with payment reductions and will be established by the licensing state agency as follows:

For Article 31 clinics licensed by OMH in or operated by general hospitals licensed under Article 28 of the Public Health Law, Medicaid payments shall be subject to the following reductions:

1. For persons 21 years of age or older at the start of the state fiscal year, payment for the 31st through 50th visits in a state fiscal year at one or more clinics operated by the same hospital will be subject to a 25% reduction in the otherwise applicable payment amount.

2. For persons 21 years of age or older at the start of the state fiscal year, payment for visits in excess of 50 in a state fiscal year at one or more clinics operated by the same hospital will be subject to a 50% reduction in the otherwise applicable payment amount.

3. For persons less than 21 years of age at the start of the state fiscal year, payment for visits in excess of 50 in that state fiscal year at one or more clinics operated by the same hospital will be subject to a 50% reduction in the otherwise applicable payment amount.

4. Off-site visits (rate codes 1519 and 1525), medical visits (rate codes 1588 and 1591) and crisis visits (rate codes 1576 and 1582), when billed under their applicable rate codes, will be disregarded in computing the number of visits pursuant to the preceding paragraphs. For off-site visits provided by OMH-licensed clinics to homeless individuals, Medicaid will only claim expenditures for off-site clinic services when the services meet the exception in 42 CFR 440.90(b) that permits Medicaid payment for services furnished outside of the clinic by clinic personnel under the direction of a physician to an eligible individual who does not reside in a permanent dwelling or does not have a fixed home or mailing address. Off-site services provided by OMH-licensed clinics to other than homeless individuals may be reimbursed with State-only funding and will not be claimed for federal financial participation.
For hospital-based Article 32 clinics licensed by OASAS, Medicaid payments shall be subject to the following per person reductions:

(1) Payment for the 76th through 95th visits in a state fiscal year at one or more clinics operated by the same hospital will be subject to a 25% reduction in the otherwise applicable payment amount.

(2) Payment for visits in excess of 95 in a state fiscal year at one or more clinics operated by the same hospital will be subject to a 50% reduction in the otherwise applicable payment amount.
Temporary Rate Adjustments for Mergers, Acquisitions, Consolidations, Restructurings, and Closures - Hospital-Based Outpatient

A temporary rate adjustment will be provided to eligible providers of outpatient services that are subject to or impacted by the closure, merger, and acquisition, consolidation, or restructuring of a health care provider. The rate adjustment is intended to:

- Protect or enhance access to care;
- Protect or enhance quality of care; or
- Improve the cost effectiveness.

Eligible providers, the annual amount of the temporary rate adjustment, and the duration of the adjustment shall be listed in the table which follows. The total annual adjustment amount will be paid quarterly with the amount of each quarterly payment being equal to one fourth of the total annual amount established for each provider. The quarterly payment made under this section will be an add-on to services payments made under this Attachment to such facilities during the quarter.

To remain eligible, providers must submit benchmarks and goals acceptable to the Commissioner and must submit periodic reports, as requested by the Commissioner, concerning the achievement of such benchmarks and goals. Failure to achieve satisfactory progress in accomplishing such benchmarks and goals will result in termination of the provider’s temporary rate adjustment prior to the end of the specified timeframe. Once a provider’s temporary rate adjustment ends, the provider will be reimbursed in accordance with the otherwise applicable rate-setting methodology as set forth in this Attachment.

Temporary rate adjustments have been approved for the following providers in the amounts and for the effective periods listed:

Effective Date __________________

January 1, 2018
Integrated Licensing Program - Hospital-based Clinics Licensed by the New York State Office of Mental Health (OMH)

Effective January 1, 2013 through December 31, 2017, the new Integrated Licensing Program (ILP) reimbursement methodology is established for authorized providers providing integrated physical health, behavioral and/or substance abuse services in hospital-based clinic sites licensed pursuant to Article 31 of the Public Health Law. The following providers’ hospital outpatient departments are authorized to participate in the ILP:

- Flushing Hospital Medical Center (NPI 1154461622, Loc Code 006)
- Mercy Medical Center (NPI 1659330173, Loc Code 006); and
- Montefiore Medical Center (NPI 1952476988, Loc Code 061)

For the time period in which the ILP is in effect, authorized providers have access to a new clinic base rate that is equal to 105% of the facility’s usual base rate; with the new base rate reimbursed only at authorized sites where integrated physical, behavioral and/or substance services were available. Payment amounts are determined via the usual Ambulatory Patient Group reimbursement methodology, utilizing the applicable base rate and the procedure(s) and diagnose(s) codes submitted on each claim.

The goal of the Integrated Licensing Program was to facilitate and promote the availability of physical, behavioral and/or substance abuse services at authorized hospital-based clinic sites, in order to: economize the number of visits for patients with co-morbidities; provide more comprehensive, integrated care; improve health outcomes and decrease rates of utilization of emergency room and inpatient services. Individuals with serious mental illness and/or addictions at these sites had the opportunity to receive an integrated array of care at the same location to address a range of physical, mental, and/or behavioral healthcare needs.
Ordered Ambulatory Services (specific services performed by a free-standing clinic on an ambulatory basis upon the order of a qualified physician, physician’s assistant, dentist or podiatrist to test, diagnose or treat a recipient or specimen taken from a recipient).

Fee schedule developed by the Department of Health and approved by the Division of the Budget for each type of service, as appropriate. Payment for these services are in compliance with 42 CFR 447.325.

[AIDS/HIV] Adult Day Health Care Services For Persons with HIV/ AIDS and Other High-need Populations Diagnostic And Treatment Centers

Medical assistance rates of payment for adult day health care services provided on and after December 1, 2002 to patients with AIDS/HIV and other high-need populations by a free standing ambulatory care facility shall be increased by three percent.

This increase to rates of payment will be for purposes of improving recruitment and retention of non-supervisory workers or any worker with direct patient care responsibility. Programs are prohibited from using the funds for any other purpose. The Commissioner of Health is authorized to audit each program to ensure compliance with the purpose for which this funding is provided and shall recoup any funds determined to have been used for purposes other than recruitment and retention.

To generate a threshold day care bill, the provider must ensure that clients receive a core service [and be in attendance for a minimum of three hours, and over the course of the week, receive a minimum of three hours of health care services.] in accordance with clients’ comprehensive care plans. Health care services are defined as both the core services and health related services that are therapeutic in nature and directly or indirectly related to the core services, which must be identified on the client’s comprehensive care plan. Each visit must include a core service. A bill cannot be generated unless one or more services are provided in accordance with a client’s comprehensive care plan [if these two requirements are not met].

**Core services include:**

- Medical visits
- Nursing visits

TN #17-0006 Approval Date December 11, 2017
Supersedes TN #07-06 Effective Date September 1, 2017
Health related (non-core) services include:

- Group exercise sessions
- Acupuncture
- Breakfast and/or lunch
- Therapeutic massage
- Yoga
- Pastoral care
- Therapeutic recreation and structured socialization services
- Tai-chi

For adult day health care services provided to patients diagnosed with HIV/AIDS and to other high-need populations on and after January 1, 2007, medical assistance rates of payment to diagnostic and treatment centers shall be increased up to an annual amount of $2.8 million in the aggregate. Such amount shall be allocated proportionally among eligible providers based on the medical assistance visits reported by each provider in the most recently available cost report, as submitted to the Department of Health. Such allocated amounts will be included as an adjustment to each provider’s daily rate of payment for such services.

Effective for adult day health care services rendered on and after January 1, 2007 through December 31, 2009, and for adult day health care services provided to patients diagnosed with HIV/AIDS and to other high-need populations on and after April 1, 2009, medical assistance rates of payments shall reflect trend factor adjustments computed in accordance with the previously approved trend factor methodology. Such adjustments shall be applied to the operational cost component of the rate.

Effective April 1, 2011 through June 30, 2011, rates of payment for adult day health care services provided to patients with AIDS or other HIV related illnesses shall be increased by an additional aggregate amount of $1,156,650 to be allocated proportionally among such providers based on the Medicaid visits as reported in the most recently available cost report submitted to the State by January 1, 2011.
New York

Hospital Based Ambulatory Surgery Facilities Certified Under Article 28 of the Public Health Law

Case based rates of payment have been calculated for the Products of Ambulatory Surgery Payment groups. All procedures within the same payment group are reimbursed at a single discrete base price. The applicable base price for each payment group is adjusted for regional differences in wage levels, space occupancy, and plant over-head costs. An economic trend factor is applied to make the prices prospective. Rates of payment in effect on March 31, 2003, shall continue in effect for the period April 1, 2003 through November 30, 2008, provided however that, effective May 1, 2005, such rates may be adjusted to include additional capital costs not previously included in the corresponding rate.

For dates of service beginning December 1, 2008, for hospital outpatient ambulatory surgery services, services shall be reimbursed through the Ambulatory Patient Group (APG) classification and reimbursement system.

[The agency may pay the usual and customary rates of such medical facilities or approved services but must not pay more than the prevailing rates for comparable services in the geographic area.]

For dates of service beginning September 1, 2009, for freestanding-diagnostic and treatment ambulatory surgery facilities, services will be reimbursed through the Ambulatory Patient Group (APG) classification and reimbursement system.
Hospital Based Outpatient Department

Facilities Certified Under Article 28 of the Public Health Law

Services for AIDS and HIV positive patients

Visit based rates of payment have been calculated for five discrete clinic services provided to AIDS and HIV positive patients. For each service a discrete price has been established. The prices have been regionally adjusted to reflect regional differences in labor and facility overhead costs and an economic trend factor has been applied to make the prices prospective. For dates of service beginning on December 1, 2008 through March 31, 2010, the discrete services for comprehensive initial visit, post-test HIV counseling (negative result), and monitoring – asymptomatic HIV disease shall be reimbursed through the Ambulatory Patient Group (APG) classification and reimbursement system.

For outpatient services provided by general hospitals, beginning on and after April 1, 2006, the Commissioner of Health shall apply a trend factor projection of 2.25% attributable to the period January 1, 2006 through December 31, 2006. Upon reconciliation of this trend factor, in accordance with the previously approved state methodology, the final 2006 trend factor shall be the U.S. Consumer Price Index (CPI) for all Urban Consumers, as published by the U.S. Department of Labor, Bureau of Labor Statistics, minus 0.25%.

Freestanding Diagnostic and Treatment Centers

Facilities Certified Under Article 28 of the Public Health Law [A]s Freestanding Diagnostic and Treatment Centers

Services for AIDS and HIV positive patients

Visit based rates of payment have been calculated for five discrete clinic services provided to AIDS and HIV positive patients. For each service a discrete price has been established. The prices have been regionally adjusted to reflect regional differences in labor and facility overhead costs and an economic trend factor has been applied to make the prices prospective, except that rates of payment for the period ending September 30, 1995 shall continue in effect through September 30, [2009] 2011, provided however that, effective May 1, 2005, such rates may be adjusted to include additional capital costs not previously included in the corresponding rate.
New York 2(b)(i)

Hospital Based Outpatient Department

Facilities Certified Under Article 28 of the Public Health Law

Services for medically supervised chemical dependence treatment and medically supervised withdrawal services

For dates of service beginning on July 1, 2002, for those facilities certified under Article 28 of the State Public Health Law, the Department of Health promulgates prospective, all-inclusive rates based upon reported historical costs. Allowable operating costs per visit are held to legislatively established ceiling limitations. Reported historical operating costs on a per visit basis, which are below or limited by ceilings, are deemed reimbursable and trended forward to the current rate period to adjust for inflation. Non-operating costs (such as capital costs) are not subject to the legislatively established ceiling and are added to the product of reimbursable operating costs times the roll factor (two year trend movement) on a per visit basis, except that commencing April 1, 1995 through March 31, 2009, for rates of payment for patients eligible for payments made by state governmental agencies, the capital cost per visit components shall be adjusted by the Commissioner to exclude such expenses related to 1) forty-four percent of the costs of major moveable equipment and 2) staff housing. A return on equity is recognized in those instances where the hospital is organized under the auspices of proprietary sponsorship. Effective October 1, 1995, the rate for primary care clinic services provided in primary care hospitals, shall be a per visit rate based on allowable reportable operating costs subject to a cap on operating costs of $67.50 per visit.

For outpatient services provided by general hospitals, beginning on and after April 1, 2006, the Commissioner of Health shall apply a trend factor projection of 2.25% attributable to the period January 1, 2006 through December 31, 2006. Upon reconciliation of this trend factor, in accordance with the previously approved state methodology, the final 2006 trend factor shall be the U.S. Consumer Price Index (CPI) for all Urban Consumers, as published by the U.S. Department of Labor, Bureau of Labor Statistics, minus 0.25%.

For reimbursement of outpatient hospital services provided on and after April 1, 2007, the Commissioner of Health shall apply a trend factor projection equal to 75% of the otherwise applicable trend factor for calendar year 2007.

For reimbursement of outpatient hospital services provided on and after April 1, 2008, the Commissioner of Health shall apply a trend factor projection equal to 65% of the otherwise applicable trend factor for calendar year 2008, as calculated in accordance with the general trend factor methodology contained in the Trend Factor section in this Attachment.
For rates of payment effective for outpatient hospital services provided on and after January 1, 2009 through March 31, 2009, the otherwise applicable final trend factor attributable to the 2008 calendar year period shall be adjusted such that any increase to the average trend factor for the period April 1, 2008 through December 31, 2008 shall be reduced, on an annualized basis, by 1.3%. However, no retroactive adjustment to such trend factor will be made for the period April 1, 2008 through December 31, 2008. Effective on and after April 1, 2009, the otherwise applicable final trend factor attributable to the 2008 calendar year period shall be zero.

For rates of payment effective for outpatient hospital services provided on and after January 1, 2009 through March 31, 2009, a trend factor equal to the otherwise applicable trend factor attributable to the period January 1, 2009 through December 31, 2009, less 1% shall be applied. Effective on and after April 1, 2009, the otherwise applicable final trend factor attributable to the 2009 calendar year period shall be zero.

For rates of payment effective for outpatient hospital services provided on and after January 1, 2010 through March 31, 2010, the otherwise applicable final trend factor attributable to the 2010 calendar year period shall be zero.

For rates of payment effective for outpatient hospital services provided on and after April 1, 2010, the otherwise applicable trend factor attributable to the 2010 calendar year period shall be zero.

For rates of payment effective for outpatient hospital services provided on and after April 1, 2011, the otherwise applicable trend factors attributable to the 2011 through 2014 calendar year periods shall be no greater than zero. For such rates effective for the period January 1, 2015 through March 31, 2015 and for the period April 23, 2015 through December 31, 2015 otherwise applicable trend factors attributable to the 2015 calendar year period shall be no greater than zero. For rates of payment effective for outpatient hospital services provided on and after January 1, 2016 through March 31, 2017 and for the period April 1, 2017 through December 31, 2017, the otherwise applicable final trend factor attributable to the 2016 and 2017 calendar year periods shall be zero. For rates of payment effective for outpatient hospital services provided on and after January 1, 2018 through March 31, 2019, the otherwise applicable final trend factor attributable to the 2018 and 2019 calendar year periods shall be zero.

Services for Pregnant Women

Visit based rates of payment have been calculated for three discrete clinic services provided to pregnant women, for each service a discrete price has been established. The prices have been regionally adjusted to reflect regional differences in labor and facility overhead costs and an economic trend factor has been applied to make the prices prospective.

For outpatient services provided by general hospitals, beginning on and after April 1, 2006, the Commissioner of Health shall apply a trend factor projection of 2.25% attributable to the period January 1, 2006 through December 31, 2006. Upon reconciliation of this trend factor, in accordance with the previously approved state methodology, the final 2006 trend factor shall be the U.S. Consumer Price Index (CPI) for all Urban Consumers, as published by the U.S. Department of Labor, Bureau of Labor Statistics, minus 0.25%.

Effective for services provided on and after January 1, 2007 and April 1 of each state fiscal year thereafter, the Commissioner of Health shall adjust prenatal care assistance program rates to effect a cost of living adjustment (COLA). This COLA will be calculated in accordance with the general Trend Factor section of this Attachment.

For reimbursement of outpatient services provided by general hospitals, provided on and after April 1, 2007, the Commissioner of Health shall apply a trend factor projection equal to 75% of the otherwise applicable trend factor for calendar year 2007, as calculated in accordance with the general Trend Factor section of this Attachment.

For reimbursement of outpatient services provided by general hospitals, provided on and after April 1, 2008, the Commissioner of Health shall apply a trend factor projection equal to 65% of the otherwise applicable trend factor for calendar year 2008, as calculated in accordance with the general Trend Factor section of this Attachment.

For rates of payment effective for outpatient hospital services provided on and after January 1, 2009 through March 31, 2009, the otherwise applicable final trend factor attributable to the 2008 calendar year period shall be adjusted such that any increase to the average trend factor for the period April 1, 2008 through December 31, 2008 shall be reduced, on an annualized basis, by 1.3%. However, no retroactive adjustment to such trend factor will be made for the period April 1, 2008 through December 31, 2008. Effective on and after April 1, 2009, the otherwise applicable final trend factor attributable to the 2008 calendar year period shall be zero.

Comprehensive Primary Care Services

Voluntary Non-Profit and Publicly Sponsored Diagnostic and Treatment Centers Certified Under Article 28 of the Public Health Law

An allowance will be established annually and added to Medicaid rates of payment for certified agencies, which can demonstrate a financial shortfall as a result of providing comprehensive primary care services to a disproportionate share of uninsured low-income patients. Losses will be calculated by applying the current Medicaid payment rate to base year units of service to uninsured low-income patients, offset by related-out-of-pocket patient receipts, subsidy grants and State aid deficit financing to publicly-sponsored facilities. An annual agency loss coverage will be established by applying calculated losses to a nominal loss coverage ratio scale within the limits of pool allocations to public and non-public agencies. Notwithstanding any inconsistent provisions of this paragraph, adjustments to rates of payment for diagnostic and treatment centers determined in accordance with this paragraph shall apply only for services provided on or before December 31, 1996.

The methodology described in the following paragraphs pertains to diagnostic and treatment centers, which received an allowance for financing losses resulting from the provision of comprehensive primary care services to a disproportionate share of uninsured low-income patients during the period from July 1, 1990 through December 31, 1996. This allowance is described in the previous paragraph. For the period July 1, 2003 through December 31, 2003, qualified diagnostic and treatment centers shall receive an uncompensated care rate adjustment of not less than one-half the amount that would have been received for any losses associated with the delivery of bad debt and charity care for calendar year 1995.

For the period January 1, 2004 through December 31, 2004, each such diagnostic and treatment center shall receive an uncompensated care rate adjustment of not less than twice the amount calculated pursuant to the above paragraph. For the period January 1, 2005 through June 30, 2005, each such diagnostic and treatment center shall receive an uncompensated care rate adjustment of not less than the amount calculated pursuant to the above paragraph.

Any residual amount allocated for distribution to a classification of diagnostic and treatment centers in accordance with the above shall be reallocated by the Commissioner for distributions to the other classifications based on remaining need.

Effective Date  July 1, 2003
Transitional Supplemental Payments

For the periods February 1, 2002 through March 31, 2002, October 1, 2002 through December 31, 2002, October 1, 2003 through December 31, 2003, April 1, 2005 through June 30, 2005, October 1, 2006 through December 31, 2006, and October 1, 2007 through December 31, 2007, the Commissioner of Health shall make supplemental medical assistance payments to qualified voluntary not-for-profit health care providers that are: freestanding diagnostic and treatment centers (D&TCs) that qualify for distributions under the state’s comprehensive diagnostic and treatment centers indigent care program or indicate on the cost reports submitted to the state that they receive funding under section three hundred thirty-three of the Federal Public Health Services Act for health care for the homeless, freestanding diagnostic and treatment centers that operate approved programs under the state Prenatal Care Assistance Program, or licensed freestanding family planning clinics. These supplemental payments reflect additional costs associated with the transition to Managed Care and are for services rendered to Medicaid beneficiaries for the effective period. Payments made, as adjustments to fee for service rates, shall not be subject to subsequent adjustment or reconciliation. These providers will be eligible to receive a supplemental payment if the following criteria are met. The provider’s number of Medicaid visits in the base year (2000) equals or exceeds 25 percent of its total number of visits and its number of visits for Medicaid Managed Care enrollees equals or exceeds three percent of its total number of Medicaid visits during the base year. Providers meeting these criteria shall receive a supplemental payment equal to a proportional share of the total funds available not to exceed fourteen million dollars for the period February 1, 2002 through March 31, 2002, nine million eight hundred twenty-four thousand dollars for the period October 1, 2002 through December 31, 2002, nine million eight hundred twenty-four thousand dollars for the period October 1, 2003 through December 31, 2003, nine million eight hundred twenty-four thousand dollars for the period April 1, 2005 through June 30, 2005, twenty nine million four hundred seventy-two thousand dollars ($29,472,000) for the period October 1, 2006 through December 31, 2006, and nine million eight hundred twenty-four thousand dollars ($9,824,000) for the period October 1, 2007 through December 31, 2007. This share shall be based upon the ratio of a provider’s visits from medical assistance recipients enrolled in Managed Care during the 2000 base year to the total number of visits to all such qualified providers by medical assistance recipients enrolled in managed care during the base year. These amounts shall be divided by the medical assistance utilization data reported in each provider’s annual cost report for the period two years prior to the rate period. The resulting amount will represent the per visit add-on to each eligible provider’s fee for service medical assistance rates of payment.

Approval Date  February 10, 2011
Effective Date  October 1, 2008
Electronic Health Record Systems Supplemental Payments

For the period October 1, 2008 through December 31, 2008, seven million three hundred eighty eight thousand dollars ($7,388,000) and for the period October 1, 2009 through December 31, 2009, seven million three hundred eighty eight thousand dollars ($7,388,000) shall be available to eligible covered providers as medical assistance payments for services provided to Medicaid beneficiaries to reflect additional costs associated with the development, training, maintenance, and support of electronic health record systems that meet such standards no later than January 1, 2008, as established by the Commissioner of Health. The State will conduct a survey and perform independent verification. Electronic health records standards are: the exchanging of health information with other computer systems according to national standards; be certified by the Certification Commission for Health Information Technology; be capable of and used for supporting electronic prescribing; and be capable of and used for providing relevant information to the clinicians to assist with decision making. Providers will be eligible to receive a supplemental payment for the period October 1, 2008 through December 31, 2008, and October 1, 2009 through December 31, 2009, if this criterion is met. In addition to meeting the electronic record standards criterion, a provider’s number of Medicaid visits for patient care services during the base year must equal or exceed twenty-five percent of its total number of visits for patient care services in the base year or its number of Medicaid visits combined with its number of uninsured visits for patient care services in the base year equals or exceeds thirty percent of its total number of visits for patient care services during the base year. Each qualified provider shall receive a supplemental payment equal to such provider’s proportional share of the total funds allocated, based upon the ratio of its visits from Medicaid recipients during the base year to the total number of Medicaid visits to all such qualified providers during the base year. The base year will be two years prior to the rate year, and the Commissioner of Health shall utilize data to determine Medicaid and uninsured visits reported by covered providers on certified 2006 AHCF-1 cost reports submitted to the Department of Health for such base year.
Supplemental Payments – Dental Clinic – February 1, 2002 through March 31, 2002

Notwithstanding the provisions of the preceding section, for the period February 1, 2002 through March 31, 2002, facilities licensed under article twenty-eight of the public health law that are sponsored by a university or a dental school which has been granted an operating certificate and which provides dental services as its principal mission, shall receive up to five hundred thousand dollars, in the aggregate, for use as supplemental payments pursuant to the preceding section. These funds shall be allocated for distribution to such facilities pursuant to the statutorily defined methodology contained in §364-j-2 of the Social Services Law. Payments may be added to rates of payment or made as aggregate payments to eligible facilities for services rendered to Medicaid beneficiaries for the effective period. Payments made, as adjustments to fee for service rates, shall not be subject to subsequent adjustment or reconciliation.

Notwithstanding the provisions of the first paragraph of this section titled Transitional Supplemental Payments, for the periods October 1, 2002 through December 31, 2002, October 1, 2003 through December 31, 2003, April 1, 2005 through June 30, 2005, October 1, 2006 through December 31, 2006, and October 1, 2007 through December 31, 2007, facilities licensed under article twenty-eight of the Public Health Law that are sponsored by a university or a dental school which has been granted an operating certificate and which provides dental services as its principal mission, shall receive up to two hundred twenty-five thousand dollars in the aggregate for the period October 1, 2002 through December 31, 2002, for the period October 1, 2003 through December 31, 2003, up to two hundred twenty-four thousand dollars in the aggregate, for the period April 1, 2005 through June 30, 2005, up to two hundred twenty-four thousand dollars in the aggregate, for the period October 1, 2006 through December 31, 2006, up to six hundred seventy-two thousand dollars ($672,000) in the aggregate, and for the period October 1, 2007 through December 31, 2007, up to two hundred twenty-four thousand dollars ($224,000) in the aggregate; and for the period October 1, 2008 through December 31, 2008, up to two hundred twenty-four thousand dollars ($224,000) in the aggregate; and for the period October 1, 2009 through December 31, 2009, up to two hundred twenty-four thousand dollars ($224,000) in the aggregate; for use as supplemental payments pursuant to the first paragraph of this section titled Transitional Supplemental Payments. Forty percent of these funds shall be allocated for equal distribution based upon the facilities losses reported from self-pay and free visits multiplied by the facility specific Medicaid payment rate for the applicable year. This amount shall be offset by any payments received from such patients during the applicable period. Sixty percent, plus any funds allocated but not distributed under provisions of the previous sentence, shall be allocated according to the following scale.

The allocated amounts will be added to rates of payment[s] for eligible facilities for services rendered to Medicaid beneficiaries for the effective periods. These amounts shall be divided by the medical assistance utilization data reported in each provider’s annual cost report for the period two years prior to the rate period. The resulting amount will represent the per visit add-on to each eligible provider’s fee for service medical assistance rates of payment. Payments made, as adjustments to fee for service rates, shall not be subject to subsequent adjustment or reconciliation.

February 10, 2011

TN #08-40

Supersedes TN New

Approval Date February 10, 2011

Effective Date October 1, 2008
Federally Qualified Health Centers (FQHCs) and Rural Health Clinics

Prospective Payment System Reimbursement as of January 1, 2001 for and Rural Health Clinics including FQHCs located on Native American reservations and operated by Native American tribes or Tribal Organizations pursuant to applicable Federal Law and for which State licensure is not required.

For services provided on and after January 1, 2001 and prior to October 1, 2001, all-inclusive rates shall be calculated by the Department of Health, based on the lower of the facilities’ allowable operating cost per visit or the peer group ceiling plus allowable capital cost per visit. The base for this calculation shall be the average of cost data submitted by facilities for both the 1999 and 2000 base years.

For each twelve month period following September 30, 2001, the operating cost component of such rates of payment shall reflect the operating cost component in effect on September 30th of the prior period as increased by the percentage increase in the Medicare Economic Index and as adjusted pursuant to applicable regulations to take into account any increase or decrease in the scope of services furnished by the facility. Effective May 1, 2015 and each October 1 thereafter, rates of payment for the group psychotherapy and individual off-site services will be increased by the percentage increase in the Medicare Economic Index.

Supplementary increases in Medicaid rates of payment for these providers which is paid for the purpose of recruitment and retention of non-supervisory workers or workers with direct patient care responsibility, in accordance with the provisions of the Workforce Recruitment and Retention section of this Attachment, are in addition to the standard Medicaid operating cost component calculation. As such, they are not subject to trend adjustments. These supplementary increases shall be in effect through June 30, 2005.

Rates of payments to facilities which first qualify as federally qualified health centers on or after October 1, 2000 shall be computed as above provided, however, that the operating cost component of such rates shall reflect an average of the operating cost components of rates of payments issued to other FQHC facilities during the same rate period and in the same geographic region, and with similar case load, and further provided that the capital cost component of such rates shall reflect the most recently available capital cost data for such facility as reported to the Department of Health. Effective May 1, 2011, the geographic regions will consist of the Downstate Region, which includes the five counties comprising New York City and the counties of Nassau, Suffolk, Westchester, Rockland, Orange, Putnam, and Dutchess and the Upstate Region, which includes all counties in the State other than those counties included in the Downstate Region. For each twelve-month period following the rate period in which such facilities commence operation, the operating cost components of rates of payment for such facilities shall be computed as described above.

For services provided on and after April 1, 2016 the cost of long acting reversible contraceptives (LARC) will be separated from the PPS reimbursement. Reimbursement for LARC will be based on actual acquisition cost. The facility must submit a separate claim to be reimbursed for the actual acquisition cost of the LARC device.

TN #16-0028 Approval Date: July 25, 2016
Supersedes TN #15-0039 Effective Date: April 01, 2016
For services provided on or after January 1, 2001, until such time as the new methodology is implemented, facilities shall be paid via the methodology in place as of December 31, 2000. The difference between the two methodologies shall be calculated and the sum shall be paid, on a per visit basis, in the fiscal year immediately following implementation of this new methodology.

For services provided on or after January 1, 2001 by FQHC's participating in managed care, supplemental payments will be made to these FQHC's that will be equal to 100% of the difference between the facilities reasonable cost per visit rate and the amount per visit reimbursed by the managed care plan.

The reimbursement methodology that the Department of Health will use for FQHCs located out-of-state will be the currently approved FQHC rate of the provider's home state.

TN #15-0039
Supersedes TN #11-0059
Approval Date May 20, 2016
Effective Date May 1, 2015
Diagnostic and treatment centers eligible for rates of payment as a Federally Qualified or Rural Health Center, which were also certified by the Department of Health as a preferred primary care provider as of December 31, 2000, and receiving rates of payment through the Products of Ambulatory Care reimbursement system as of such date, may elect to continue to be reimbursed via this alternative method of reimbursement. In no event shall rates of payment to these facilities be less than those computed as described on page 2(c)(iv) of this plan.

Effective on and after January 1, 2006, individual and group psychotherapy services provided to Medicaid patients by a licensed psychiatrist, psychologist, clinical social worker or master social worker at Federally Qualified and Rural Health Centers (FQHC/RHC) shall be reimbursed by the Department of Health. As of January 1, 2006, Federally Qualified and Rural Health Centers shall also be reimbursed for the provision of off-site primary care services provided to existing FQHC/RHC patients in need of professional services available at the FQHC/RHC, but, due to the individual’s medical condition, are unable to receive the services on the premises of the center. An existing patient is defined as a registered patient with the FQHC/RHC prior to being admitted to the hospital or nursing home or requiring other offsite services. These services, provided by a physician, physician assistant, nurse practitioner, or nurse mid-wife, may be rendered at the off-site location only for the duration of the limiting illness. Rates of payment for group psychotherapy and off-site services shall be calculated by the Department of Health using elements of the Resource Based Relative Value Scale promulgated by the federal Centers for Medicare and Medicaid Services using the following methodology. For each relevant CPT procedure code, the work, practice expense, and geographic cost index (GPCI). The downstate average GPCI is based on the average of Manhattan, New York City & Long Island, and Queens indices. The upstate average GPCI consists of Poughkeepsie and Rest of State Indices. These are then summed and multiplied by the conversion factor to arrive at a regional price for each service. Rates of payment for group psychotherapy services shall not include a component for case management services. Rates of payment for individual psychotherapy services shall be made at the general FQHC rate calculated in accordance with the approved methodology contained on Page 2(c)(iv) of this Attachment.

Effective on and after April 1, 2008, rates of payment may be established based on alternative rate-setting methodologies for Federally Qualified and Rural Health Centers provided such methodologies, contained on plain pages 1(f) through 1(p) for hospital providers, and on pages 2(h) through 2(t) for freestanding clinic providers, are authorized by State law, agreed to by both the New York State Commissioner of Health and the applicable facility, and do not result in aggregate payments lower than the payments calculated under the existing approved methodology for such facility.

May 26, 2009  Approval Date
December 1, 2008  Effective Date
Effective on and after January 1, 2015, the Department of Health shall reimburse FQHC/RHCs for Collaborative Care Services provided to Medicaid patients diagnosed with depression pursuant to the methodology for Collaborate Care Services for Freestanding Clinics outlined in Attachment 4.19-B. Effective on and after January 1, 2018, the Department of Health shall reimburse FQHC/RHCs for Collaborative Care Services provided to Medicaid patients with other mental illness diagnoses at the rates of payment then in effect for Collaborate Care Services provided to Medicaid patients diagnosed with depression. Rates of payment for Collaborative Care Services will be increased annually on October 1 by the percentage increase in the Medicare Economic Index.
For providers choosing to be reimbursed under the Ambulatory Patient Group (APG) methodology, the Department will reconcile amounts actually paid in a calendar year through APG; to that which would have been paid through the PPS methodology. Adjustments will be made based upon this comparison to ensure that providers are not paid less than they would have under PPS. Reconciliation by DOH will include any FQHC providers which elect APGs or any alternate payment methodology to PPS and includes all Medicaid eligible services regardless of which State Agency is the licensing authority for the service.
Minimum Wage - Article 28 FQHCs

Effective January 1, 2017, and every January 1, thereafter until the minimum wage reaches the statutorily described per hour wage as shown below, a minimum wage add-on will be developed and used to adjust Article 28 FQHC rate as an alternative payment method (APM) rate.

The minimum wage add-on and the APM rate will be posted to Health Commerce System (HCS: https://commerce.health.state.ny.us/public/hcs_login.html). An Article 28 FQHC’s PPS threshold rate will be adjusted by a minimum wage add-on based on the following:

a. Minimum wage costs will mean the additional costs incurred beginning January 1, 2017, and thereafter, as a result of New York state statutory increases to minimum wage.

i. Minimum wage cost development based on survey data collected.

1. Survey data will be collected for Article 28 FQHC specific wage data.
2. Article 28 FQHCs will report by specified wage bands, the total count of FTEs and total hours paid to employees earning less than the statutory minimum wage applicable for each MW Region.
3. Article 28 FQHCs will report an average fringe benefit percentage for the employees directly affected by the minimum wage increase.
4. The minimum wage costs are calculated by multiplying the total hours paid by the difference between the statutory minimum wage and the midpoint of each wage band where the Article 28 FQHC has reported total hours paid. To this result, the Article 28 FQHC’s average fringe benefit percentage is applied and added to the costs.

ii. Minimum wage cost development based on the AHCF cost report data.

1. The average hourly wages of employees in occupational titles where the reported average hourly wage is below the regional statutory minimum wage are identified.
2. The total payroll hours of the titles identified are then multiplied by the regional statutory minimum wage resulting in a projected payroll. The actual payroll as reported in the AHCF cost report is then subtracted from the projected payroll resulting in the expected wage costs increase.

TN #17-0013 Approval Date December 26, 2017
Supersedes TN New Effective Date January 1, 2017
3. The facility's fringe benefit costs directly affected by the wage increase are identified, and the average fringe benefit percentage is calculated.

4. The fringe benefit percentage is applied to the increased wage costs and added resulting in the minimum wage costs.

b. The 2017 minimum wage costs will be developed based on collected survey data received and attested to by Article 28 FQHCs. If an Article 28 FQHC did not submit a survey, its minimum wage costs will be calculated based on 2014 Ambulatory Health Care Facility (AHCF) Cost Report wage data. If an Article 28 FQHC fails to submit both the survey and the 2014 AHCF cost report, its minimum wage add-on will not be calculated.

c. In the subsequent years until the minimum wage is completely implemented statewide, the Department will survey Article 28 FQHCs utilizing the methodology employed in year one. If an Article 28 FQHC fails to submit the minimum wage survey, the calculation for minimum wage costs will default to the use of the personnel wage data reported on the statewide latest available AHCF cost report. If an Article 28 FQHC fails to submit both the survey and the latest AHCF cost report, its minimum wage add-on will not be calculated. Once the costs are included in the development of FQHC PPS rate, the minimum wage add-on will be excluded from the rate.

d. A minimum wage add-on will be developed by multiplying minimum wage costs pursuant to “a.” above by a percentage of Medicaid visits to total visits, divided by total Medicaid visits for such services.

e. Minimum Wage Reconciliation - After the end of each calendar year, the Department of Health will survey Article 28 FQHCs to obtain the following information for the purpose of reconciling annual minimum wage reimbursement. The state will release the reconciliation survey by the end of March and the Article 28 FQHCs will have two weeks to complete the survey or request an extension if an FQHC determines it is unable to complete the survey within that time. Approval of extensions, and the time of the extension, is at the discretion of the state. If the reconciliation survey is not submitted within the two weeks or within the extension time frame, should one be granted, the Article 28 FQHC’s minimum wage add-on for the calendar year covered by the survey will be recouped.

i. Total annual minimum wage funding paid to the Article 28 FQHC (as determined from the minimum wage add-on to claims paid for services rendered in the prior calendar year) for the Medicaid share of the minimum wage law increase requirement. (This information will be supplied by the Department of Health.) Medicaid’s share is the percentage of minimum wage costs that are attributable to Medicaid services based on the proportion of Medicaid services to an Article 28 FQHC’s total services.
ii. Medicaid's share of the total amount the Article 28 FQHC was obligated to pay to bring salaries up to the minimum wage for the calendar year. (This information will be completed by the Article 28 FQHC.)

iii. Minimum wage funds to be recouped or additional funds to be received by the Article 28 FQHC. (This information will be completed by the provider.) This will be the difference between the amount paid to the Article 28 FQHC for the Medicaid share of the minimum wage law increase requirement and the corresponding amount the Article 28 FQHCs determined it was actually obligated to pay.

iv. The State agency will review Article 28 FQHCs' submissions for accuracy and reasonableness, following which it will process associated payments and recoupments via retroactive per unit rate adjustments as quickly as practical thereafter.

The agency’s Chief Executive Officer or Chief Financial Officer must sign an Attestation verifying the data that is supplied in the survey.

f. Since the costs will be at a current year dollar value, the minimum wage add-on will not be adjusted by the Medicare Economic Index (MEI).

g. As this is an APM rate, providers will be required to agree to the implementation of this rate. However, this rate will not need to be subject to the comparison of the PPS FQHC rate, since this APM rate will be an increase to the PPS FQHC rate.

h. For the purpose of comparing the Ambulatory Patient Group (APG) payment method rate that is being used as an APM for an FQHC provider, the APM PPS FQHC rate will be used in the rate comparison. This is due to the APG rate used in the comparison also having been increased by the MW add-on.
[Hospital Outpatient Payment Adjustment

Effective for the period January 1, 2002 through March 31, 2002, and state fiscal years beginning April 1, 2002, for services provided on or after January 1, 2002, the Department of Health will increase the operating cost component of rates of payment for hospital outpatient and emergency room services for public general hospitals other than those operated by the State of New York or the State University of New York, which experienced free patient visits in excess of 20 percent of their total self-pay and free patient visits based on data reported on Exhibit 33 of their 1999 Institutional Cost Report and which experienced uninsured outpatient losses in excess of 75% of their total inpatient and outpatient uninsured losses based on data reported on Exhibit 47 of their 1999 Institutional Cost Report, and are located in a city with a population of over one million. The amount to be paid will be thirty seven million dollars for the period beginning January 1, 2002 and ending March 31, 2002 and one hundred fifty-one million dollars annually for state fiscal years beginning April 1, 2002 and ending March 31, 2005.

For state fiscal year beginning April 1, 2005 and ending March 31, 2006, the amount to be paid will be $222,781,000. For state fiscal year beginning April 1, 2006 and ending March 31, 2007, the amount to be paid will be $229,953,000. For state fiscal year beginning April 1, 2007 and ending March 31, 2008, the amount to be paid will be $211,865,219. For state fiscal year beginning April 1, 2008 and ending March 31, 2009, the amount to be paid will be $183,365,199. For state fiscal year beginning April 1, 2009 and ending March 31, 2010, the amount to be paid will be $179,191,153. For state fiscal year beginning April 1, 2010 and ending March 31, 2011, the amount to be paid will be $153,834,433.

For state fiscal year beginning April 1, 2011 and ending March 31, 2012, the amount to be paid will be $55,223,767. For state fiscal year beginning April 1, 2012 through March 31, 2013, the amount to be paid will be $45,880,761. For state fiscal year beginning April 1, 2013 through March 31, 2014, the amount to be paid will be $101,247,036. For state fiscal year beginning April 1, 2014 through March 31, 2015, the amount to be paid will be $105,802,261. Medical assistance payments will be made for outpatient services for patients eligible for federal financial participation under Title XIX of the Federal Social Security Act based on each such hospital's proportionate share of the sum of all Medicaid outpatient visits for all facilities eligible for an adjustment for the base year two years prior to the rate year. Such proportionate share payment may be added to rates of payment or made as aggregate payments to eligible public general hospitals.]

Attachment 4.19-B
Hospital Outpatient Supplemental Payment Adjustment - Public General Hospitals

The State will provide a supplemental payment for hospital outpatient and emergency room services provided by eligible public general hospitals. To be eligible, the hospital must (1) be a public general hospital, (2) not be operated by the State of New York or the State University of New York, and (3) be located in a city with a population over one million.

For state fiscal year beginning April 1, 2011 and ending March 31, 2012, the amount of the supplemental payment will be $98,610,666. For state fiscal year beginning April 1, 2012 and ending March 31, 2013, the amount of the supplemental payment will be $107,953,672. For state fiscal year beginning April 1, 2013 and ending March 31, 2014, the amount of the supplemental payment will be $22,101,480. For state fiscal year beginning April 1, 2014 and ending March 31, 2015, the amount of the supplemental payment will be $26,898,232. For state fiscal year beginning April 1, 2015 and ending March 31, 2016, the amount of the supplemental payment will be $161,521,405. For state fiscal year beginning April 1, 2016 and ending March 31, 2017, the amount of the supplemental payment will be $112,980,827. For state fiscal year beginning April 1, 2017 and ending March 31, 2018, the amount of the supplemental payment will be $110,552,828. Medical assistance payments will be made for outpatient services for patients eligible for federal financial participation under Title XIX of the Federal Social Security Act based on each such hospital’s proportionate share of the sum of all Medicaid outpatient visits for all facilities eligible for an adjustment for the base year two years prior to the rate year. Such supplemental payments under this section will be made in a single lump-sum payment.
UPL Hospital Outpatient Settlement Supplemental Payment Adjustment - Public General Hospitals

After receiving CMS approval of its UPL demonstration, the State will provide an additional supplemental payment for hospital outpatient and emergency room services provided by eligible public general hospitals. To be eligible, the hospital must have qualified for the additional supplemental payment authorized on page (2)(c)(v.1)

For state fiscal year beginning April 1, 2011 and ending March 31, 2012, the amount of the supplemental payment will be $14,884,309. For state fiscal year beginning April 1, 2012 and ending March 31, 2013, the amount of the supplemental payment will be $4,337,791. Medical assistance payments will be made for outpatient services for patients eligible for federal financial participation under Title XIX of the Federal Social Security Act based on each such hospital’s proportionate share of the sum of all Medicaid outpatient visits for all facilities eligible for an adjustment for the base year two years prior to the rate year. Such supplemental payments under this section will be made in a single lump-sum payment.
Hospital Outpatient Supplemental Payments - Non-government Owned or Operated General Hospitals

Effective for the period April 1, 2017 through March 31, 2018, supplemental payments are authorized for certain general hospitals for outpatient services furnished in the 2017 calendar year. Payments under this provision shall not exceed $23,636,291.

To receive payment under this provision, a general hospital, as defined in Attachment 4.19-A of the state plan, must meet all of the following:

(i) must be non-government owned or operated;
(ii) must operate an emergency room; and
(iii) must have received an Indigent Care Pool payment for the 2017 rate year;

and/or must have a facility specific projected disproportionate share hospital payment ceiling for the 2017 rate year that is greater than zero.

The amount paid to each eligible hospital shall be determined based on an allocation methodology utilizing data reported in eligible hospitals' most recent Institutional Cost Report submitted to the New York State Department of Health as of October 1, 2016:

(a) Thirty percent of the payments under this provision shall be allocated to eligible general hospitals classified as a safety net hospital, based on each hospital's proportionate share of all safety net hospitals' Medicaid discharges for inpatient hospital services, including both Medicaid fee-for-service and managed care discharges for acute and exempt services.

For this purpose, a safety net hospital is defined as an eligible general hospital having either: a Medicaid share of total inpatient hospital discharges of at least 35%, including both fee-for-service and managed care discharges for acute and exempt services; or a Medicaid share of total discharges of at least 30%, including both fee-for-service and managed care discharges for acute and exempt services, and also providing obstetrical services.

(b) Seventy percent of the payments under this provision shall be allocated to eligible general hospitals based on each hospital's proportionate share of all eligible hospitals' Medicaid discharges for inpatient hospital services, including both Medicaid fee-for-service and managed care discharges for acute and exempt services.

Eligible Hospitals shall receive payment under (a) and/or (b), as eligible, with each hospital's payment made in a lump sum distribution that is proportionately allocable across the hospital's share of the $350,013,436 in outpatient services reimbursed all eligible hospitals in the 2017 calendar year.

TN #17-0061 Approval Date August 28, 2019
Supersedes TN #17-0040 Effective Date August 1, 2017
Hospital Outpatient Payment Adjustment

Effective for the period January 1, 2002 through March 31, 2002, and state fiscal years beginning April 1, 2002 and ending March 31, 2005, for services provided on or after January 1, 2002, the Department of Health will increase the operating cost component of rates of payment for hospital outpatient and emergency room services for government general hospitals other than those operated by the State of New York or the State University of New York, which experienced free patient visits in excess of 20 percent of their total self-pay and free patient visits based on data reported on Exhibit 33 of their 1999 Institutional Cost Report and which experienced uninsured outpatient losses in excess of 75% of their total inpatient and outpatient uninsured losses based on data reported on Exhibit 47 of their 1999 Institutional Cost Report, and are located in a city with a population of over one million. The amount to be paid will be up to thirty four million dollars for the period beginning January 1, 2002 and ending March 31, 2002 and [up to] one hundred thirty six million dollars annually for state fiscal years beginning April 1, 2002 and ending March 31, 2005. Medical assistance payments will be made for outpatient services for patients eligible for federal financial participation under Title XIX of the Federal Social Security Act based on each such hospital’s proportionate share of the sum of all outpatient visits for all facilities eligible for an adjustment for the base year two years prior to the rate year. Such proportionate share payment may be added to rates of payment or made as aggregate payments to eligible government general hospitals.

Effective for the period January 1, 2002 through March 31, 2002, and state fiscal years beginning April 1, 2002 and ending March 31, 2005, for services provided on or after January 1, 2002, the Department of Health will increase the operating cost component of rates of payment for hospital outpatient and emergency room services for government general hospitals operated by a county of the state of New York, which shall not include a city with a population over one million, and including those government hospitals located in the counties of Westchester and Nassau. The amount to be paid will be up to an aggregate of fifteen million dollars for the period January 1, 2002 through March 31, 2002, and up to an aggregate of sixty million dollars annually for state fiscal years beginning April 1, 2002 and ending March 31, 2005. Medical assistance payments for outpatient services will be made for patients eligible for federal financial participation under Title XIX of the Federal Social Security Act. The allocation of aggregate payments among qualifying hospitals shall be based on each such hospital’s proportionate share of the sum of all estimated differences in outpatient medical assistance payments and one hundred fifty percent of a reasonable estimate of the amount that would have been paid for such services under Medicare payment principles for the respective periods. Such proportionate share payment may be added to rates of payment or made as aggregate payments to eligible government general hospitals.

2(c)(vii)

Workforce Recruitment And Retention

Effective for dates of service beginning on April 1, 2002 and ending on March 31, 2008, medical assistance rates of payment shall be adjusted for comprehensive freestanding diagnostic and treatment centers that qualify for distributions under the state’s comprehensive diagnostic and treatment centers indigent care program or indicate on the cost reports submitted to the state that they receive funding under section three hundred thirty-three of the Federal Public Health Services Act for health care for the homeless, freestanding clinics that provide services to clients with developmental disabilities as their principal mission, licensed facilities authorized to provide dental services and sponsored by a university or dental school, licensed freestanding family planning clinics, and freestanding diagnostic and treatment centers operating an approved program under the prenatal care assistance program to include costs associated with the recruitment and retention of non-supervisory workers or any worker with direct patient care responsibility. For the period April 1, 2002 through December 31, 2002, the aggregate amount of thirteen million dollars will be available for this purpose. The aggregate amount of thirteen million dollars will also be available each year for the periods January 1, 2003 through December 31, 2006. For the period January 1, 2007 through June 30, 2007 the aggregate amount of six million five hundred thousand dollars will be available for this purpose. For the period July 1, 2007 through March 31, 2008, nine million seven hundred fifty thousand dollars will be available. For the period April 1, 2008 through March 31, 2009, thirteen million dollars will be available. For the period April 1, 2009 through March 31, 2010, thirteen million dollars will be available. For the period April 1, 2010 through March 31, 2011, thirteen million dollars will be available. Payments will be made as adjustments to the rates of payment allocated proportionately based upon each diagnostic and treatment center’s total annual gross salary and fringe benefit costs as reported in their 1999 cost report submitted to the Department of Health prior to November 21, 2001. These amounts shall be included as a reimbursable cost add-on to medical assistance fee-for-service rates of payment established pursuant to this section, based on Medicaid utilization data in each facility’s annual cost report submitted two years prior to the rate year or projected Medicaid utilization data for those facilities that have not submitted an annual cost report for the period two years prior to the rate year. Such amounts shall not be reconciled to reflect changes in medical assistance utilization between the year two years prior to the rate year and the rate year. For the periods on and after July 1, 2007, payments will be made as adjustments to the rates of payment and the available funding allocated proportionately based upon each diagnostic and treatment center’s total reported Medicaid visits as reported in their 2004 cost report submitted to the Department of Health prior to January 31, 2007, to the total of such Medicaid visits for all diagnostic and treatment centers.

The Commissioner of Health shall increase medical assistance rates of payment [for eligible diagnostic and treatment centers] by three percent for services provided on and after December first, two thousand two for purposes of improving recruitment and retention of non-supervisory
workers or any worker with direct patient care responsibility for []. Eligible diagnostic and
treatment center shall mean [a] voluntary, not-for-profit diagnostic and treatment centers that
received medical assistance rates of payment reflecting assignment to (1) limited primary care
or (2) drug free peer groups and that provides primary health care services to a patient
population primarily comprised of substance abuse patients and that [is] are ineligible for an
adjustment to medical assistance rates of payment under the first paragraph of this section of
the plan.

Diagnostic and treatment centers which have their rates adjusted for this purpose shall
use such funds solely for the purposes of recruitment and retention of non-supervisory workers
or any worker with direct patient care responsibility and are prohibited from using such funds
for any other purpose. The commissioner is authorized to audit each such diagnostic and
treatment center to ensure compliance with this purpose and shall recoup any funds
determined to have been used for purposes other than recruitment and retention of non-
supervisory workers or any worker with direct patient care responsibility.

The Commissioner shall increase medical assistance rates of payment by three percent
for services provided on and after December first, two thousand two by freestanding
methadone maintenance service and program providers; subject to provisions of the following
paragraph. Freestanding methadone maintenance services and program providers which are
eligible for rate adjustments pursuant to this paragraph and which are also eligible for rate
adjustments pursuant to the first paragraph of this section of the plan shall, on or before July
first, two thousand two, submit, amendments to their 1999 AHCF-1 cost report segregating
wages and fringe benefit costs associated with methadone maintenance services, for the
purpose of excluding such wages and fringe benefits from awards determined on and after
January 1, 2003, pursuant to the first paragraph of this section of the plan titled Workforce
Recruitment And Retention.

Freestanding methadone maintenance service and program providers which have their
rates adjusted in accordance with the above shall use such funds solely for the purpose of
recruitment and retention of non-supervisory workers or any worker with direct patient care
responsibility and are prohibited from using such funds for any other purpose. The
Commissioner is authorized to audit each freestanding methadone maintenance services and
program provider to ensure compliance with this purpose and shall recoup any funds
determined to have been used for purposes other than recruitment and retention of non-
supervisory workers or any worker with direct patient care responsibility.

**TYPE OF SERVICE**

Products of Ambulatory Care (PACS) for Hospital-Based Clinics and Freestanding Diagnostic and Treatment Centers [(August 1, 1990 through July 31, 1991)]

**METHOD OF REIMBURSEMENT**

The [products] Products of Ambulatory Care (PACS) Reimbursement Program uses a prospective reimbursement method associated with resource use patterns to insure that ambulatory services are economically and efficiently provided, and to provide incentives to foster continuity of care and treatment for patients. All participating providers, both hospital based clinics and freestanding diagnostic and treatment centers, are placed under a uniform, prospective, modified priced based system. The methodology is based upon the assignment of an ambulatory care visit into one of 24 mutually exclusive PAC groups. Under the reimbursement method, facility specific payment rates are established for each of the 24 PAC groups. Each rate in the payment model is comprise of two components – a case mix related price component and a facility component. The price component includes values for labor, ancillaries and medical supplies for which values are based upon current market prices. The facility specific cost components include pharmacy, facility, teaching and capital costs, and are based on a provider's reported historical costs subject to ceiling limitations where applicable. Pharmacy and routine capital costs are fully reimbursed, although they are subject to desk audit adjustments.

The PAC payment method is an alternative to the prospective average cost per visit reimbursement method used for non-participating hospitals and diagnostic and treatment centers. There are unique

features present in the PACS reimbursement program designed to encourage provider participation and foster quality of care. The most notable of these is the submission of patient encounter data by providers to the New York State Department of Health, financial responsibility by providers for selected laboratory and other ancillary procedures and Medicaid Revenue assurances. Financial incentives are employed (within limitations) under this system to assure that these and other features are complied with.

Hospital-based clinics and freestanding diagnostic and treatment centers seeking PACs reimbursement are required to enter into a Memorandum of Participation with the New York State Department of Health.

TN #91-63 Approval Date October 31, 1991
Supersedes TN #90-38 Effective Date August 1, 1991
Medically Supervised, Ambulatory Substance Abuse Treatment Services (Facilities certified under Article 23 of Mental Hygiene Law)

Prospective, provider-specific, all inclusive rates calculated by the State Division of Substance Abuse Services (DSAS):

1) For providers which have at least twelve months of previous history of operation as a medically supervised, ambulatory substance abuse treatment program, the rate is based on historical costs per visit held to Ceiling limitations mutually agreed upon by DSAS and DSS and trended forward to the current rate period to adjust for inflation or deflation; or,

2) Providers which have less than twelve months history of operation as a medically supervised ambulatory substance abuse treatment program, a temporary prospective rate is calculated first taking the weighted average of all the rates calculated in (1) above, and then taking a percentage of that amount to arrive at the temporary prospective rates for all providers with less than twelve months history. A final rate will be calculated, based on actual costs from the first twelve months of operation under the temporary prospective rate, according to (1) above.

All rates are in effect for a two year period. Rates are subject to the approval of SDSS and Division of Budget. Rates are promulgated by SDSS.
New York
2(g)

Comprehensive Diagnostic and Treatment Center Indigent Care Program

For periods on and after July 1, 2003, the Commissioner of Health shall adjust medical assistance rates of payment to assist in meeting losses resulting from uncompensated care.

Eligible diagnostic and treatment centers shall mean voluntary non-profit and publicly sponsored diagnostic and treatment centers providing a comprehensive range of primary health care services which can demonstrate losses from disproportionate share of uncompensated care during a base period two years prior to the grant period.

Uncompensated care need means losses from reported self-pay and free visits multiplied by the facility’s medical assistance payment rate for the applicable distribution year, offset by payments received from such patients during the reporting period.

A diagnostic and treatment center qualifying for a distribution or a rate adjustment shall provide assurances satisfactory to the Commissioner that it shall undertake reasonable efforts to maintain financial support from community and public funding sources and reasonable efforts to collect payments for services from third-party insurance payors, governmental payors and self-paying patients.

To be eligible for an allocation of funds or a rate adjustment, a diagnostic and treatment center must provide a comprehensive range of primary health care services and must demonstrate that a minimum of five percent of total clinic visits reported during the applicable base year period were to uninsured individuals. The Commissioner may retrospectively reduce the allocations of funds or the rate adjustments to a diagnostic and treatment center if it is determined that provider management actions or decisions have caused a significant reduction for the applicable period in the delivery of comprehensive primary health care services to uncompensated care residents of the community.

New York
2(g)(i)

For periods on and after July 1, 2003, funds shall be made available for adjustments to rates of payments for the following categories of eligible comprehensive voluntary diagnostic and treatment centers (D&TCs) for the following periods in the following aggregate amounts:

**Voluntary Non-Profit D&TCs**

A. For the period July 1, 2003 through December 31, 2003, up to seven million five hundred thousand dollars;

B. For the period January 1, 2004 through December 31, 2004, up to fifteen million dollars;

C. For the period January 1, 2005 through June 30, 2005, up to seven million five hundred thousand dollars.

**Public D&TCs, other than those operated by the New York City Health and Hospitals Corp.**

A. For the period July 1, 2003 through December 31, 2003, up to nine million dollars;

B. For the period January 1, 2004 through December 31, 2004, up to eighteen million dollars;

C. For the period January 1, 2005 through June 30, 2005, up to nine million dollars.

**Public D&TCs Operated by the New York City Health and Hospitals Corporation**

A. For the period July 1, 2003 through December 31, 2003, up to six million dollars;

B. For the period January 1, 2004 through December 31, 2004, up to twelve million dollars;

C. For the period January 1, 2005 through June 30, 2005, up to six million dollars.

---

TN #03-32 Approval Date June 18, 2004
Supersedes TN NEW Effective Date July 1, 2003
Methodology

A nominal payment amount for the financing of losses associated with the delivery of uncompensated care will be established for each eligible diagnostic and treatment center in each of the following categories: voluntary non-profit Diagnostic and Treatment Centers (D&TCs), public D&TCs other than those operated by the New York City Health And Hospitals Corporation, and public D&TCs operated by the New York City Health And Hospitals Corporation. The nominal payment amount shall be calculated as the sum of the dollars attributable to the application of an incrementally increasing nominal coverage percentage of base year period losses associated with the delivery of uncompensated care for percentage increases in the relationship between base year period eligible uninsured care clinic visits and base year period total clinic visits according to the following scale:

<table>
<thead>
<tr>
<th>Percent of eligible bad debt and charity care clinic visits to total visits</th>
<th>Percent of nominal financial loss coverage</th>
</tr>
</thead>
<tbody>
<tr>
<td>up to 15%</td>
<td>50%</td>
</tr>
<tr>
<td>15-30%</td>
<td>75%</td>
</tr>
<tr>
<td>over 30%</td>
<td>100%</td>
</tr>
</tbody>
</table>

The uncompensated care rate adjustments for each eligible diagnostic and treatment center shall be based on the dollar value of the result of the ratio of total funds allocated for distributions for diagnostic and treatment centers within the applicable category to the total statewide nominal payment amounts for all eligible diagnostic and treatment centers within the applicable category applied to the nominal payment amount for each such diagnostic and treatment center.

Adjustments to rates of payment made pursuant to this section may be added to rates of payment or made as aggregate payments to eligible diagnostic and treatment centers and shall not be subject to subsequent adjustment or reconciliation.
New York
2(g)(iii)

Non-Hospital Based Freestanding or Local Health Department Operated
General Medical Clinics

Non-hospital based freestanding or local health department operated general clinics sponsored by municipalities that received state aid for the 1989-90 state fiscal year in support of non-hospital based free-standing or local health department operated general medical clinics shall receive an uncompensated care rate adjustment for the period July 1, 2003 through December 31, 2003, of not less than one-half the amount received in the 1989-90 state fiscal year for general medical clinics.

For the period January 1, 2004 through December 31, 2004, each such eligible general clinic shall receive and uncompensated care rate adjustment of not less than twice the amount calculated pursuant to the previous paragraph.

For the period January 1, 2005 through June 30, 2005, each such eligible general clinic shall receive an uncompensated care rate adjustment of not less than the amount calculated pursuant to the first paragraph.

Adjustments to rates of payment made pursuant to this section may be added to rates of payment or made as aggregate payments to eligible general clinics and shall not be subject to subsequent adjustment or reconciliation.
New York
2(g)(iv)

Diagnostic And Treatment Centers With Less Than Two Years Operating Experience

For periods on and after July 1, 2003, funds shall be made available for adjustments to rates of payment for eligible diagnostic and treatment centers with less than two years of operating experience, and diagnostic and treatment centers which have received certificate of need approval on applications which indicate a significant increase in uninsured visits, for the following periods and in the following aggregate amounts:

- For the period July 1, 2003 through December 31, 2003, up to one million five hundred thousand dollars;
- For the period January 1, 2004 through December 31, 2004, up to three million dollars;
- For the period January 1, 2005 through June 30, 2005, up to one million five hundred thousand dollars.

To be eligible for a rate adjustment, a diagnostic and treatment center shall be a voluntary non-profit or publicly sponsored diagnostic and treatment center providing a comprehensive range of primary health care services and be eligible to receive a Medicaid budgeted rate prior to April first of the applicable rate adjustment period after which time, the Department shall issue rate adjustments pursuant to the information provided in this plan for such periods. Rate adjustments made pursuant to this section shall be allocated based upon each eligible facility’s proportional share of costs for services rendered to uninsured patients which have otherwise not been used for establishing distributions to the total of all qualifying facilities. For the purposes of this section, costs shall be measured by multiplying each facility’s Medicaid budgeted rate by the estimated number of visits reported for services anticipated to be rendered to uninsured patients meeting the aforementioned criteria, less any anticipated patient service revenues received from such uninsured patients, during the applicable rate adjustment period.

Adjustments to rates of payment made pursuant to this section may be added to rates of payment or made as aggregate payments to eligible diagnostic and treatment centers and shall not be subject to subsequent adjustment or reconciliation.
**APG Reimbursement Methodology - Freestanding Clinics**

For the purposes of sections pertaining to the Ambulatory Patient Group, and excepted as otherwise noted, the term freestanding clinics shall mean freestanding Diagnostic and Treatment Centers (D&TCs) and shall include freestanding ambulatory surgery centers.

For dates of service beginning September 1, 2009 through December 31, [2018] 2019, for freestanding Diagnostic and Treatment Center (D&TC) and ambulatory surgery center services, the operating component of rates shall be reimbursed using a methodology that is prospective and associated with resource utilization to ensure that ambulatory services are economically and efficiently provided. The methodology is based upon the Ambulatory Patient Group (APG) classification and reimbursement system. This methodology incorporates payments for the separate covered Medicaid benefits in accordance with the payment methods for these services. Reimbursement for the capital component of these rates shall be made as an add-on to the operating component as described in the APG Rate Computation section.

The Ambulatory Patient Group patient classification system is designed to explain the amount and type of resources used in an ambulatory visit by grouping patients with similar clinical characteristics and similar resource use into a specific APG. Each procedure code associated with a patient visit is assigned to an APG using the grouping logic developed by 3M Health Information Systems (3M). When evaluation and management codes are coded, the APG grouping logic also uses the diagnosis code to make the APG assignment. Ultimately, the procedures and diagnoses coded for a patient visit will result in a list of APGs that correspond on a one-for-one basis with each procedure coded for the visit.
APG Reimbursement Methodology - Freestanding Clinics

1Mentally retarded/developmentally disabled/traumatic brain injured.

2For Clinic and School-Based Health Center (SBHC), while they share the same base payment rates, please note that their rate codes differ.

3Statewide Base Price is not a service but used for APGs which do not have a payment differentiation for upstate and downstate providers.

Freestanding Clinic and Ambulatory Surgery Center Medicaid rates can be found at the Department of Health’s website at:

**Ambulatory Patient Group System - Freestanding Clinics**

The following is a list of definitions relating to the Ambulatory Patient Group reimbursement system. Links to detailed APG reimbursement methodology lists are located in the APG Reimbursement Methodology - Freestanding Clinics section.

**Allowed APG Weight** shall mean the relative resource utilization for a given APG after adjustment for bundling, packaging, and discounting.

**Ambulatory Patient Group (APG)** shall mean a group of outpatient procedures, encounters or ancillary services, which reflect similar patient characteristics and resource utilization and which incorporate the use of [ICD-9-CM] ICD-10-CM diagnosis and HCPCS procedure codes, as defined below. APGs are defined under 3M’s grouping logic outlined in the APG Definitions Manual version 3.1 dated March 6, 2008 and as subsequently amended by 3M. A link to the APG Definitions Manual versions and effective dates is available in the APG Reimbursement Methodology - Freestanding Clinics section.

**APG Relative Weight** shall mean a numeric value that reflects the relative expected average resource utilization (cost) for each APG as compared to the expected average resource utilization for all other APGs.
Associated Ancillaries shall mean laboratory and radiology tests and procedures ordered in conjunction with an APG visit. The ancillary policy for freestanding clinics has been delayed from September 1, 2009, to July 1, 2011. A link to the list of associated ancillaries for all periods is available in the APG Reimbursement Methodology – Freestanding Clinics section.

APG Software shall mean the New York State-specific version of the APG computer software developed and published by 3M Health Information Systems (3M) to process HCPCS/CPT-4 and ICD-9-CM ICD-10-CM code information in order to assign patient visits, at the procedure code level, to the appropriate APGs and apply appropriate bundling, packaging, and discounting logic to calculate the final APG weight and allowed reimbursement for a patient visit. Each time the software is updated, 3M will automatically send updated software to all license holders. Providers and other interested parties that do not purchase the grouper software can perform the computations by accessing the APG definitions manual, which is available on the 3M web site. The appropriate link can also be found on the NYS DOH website.

Base Rate shall mean the dollar value that shall be multiplied by the allowed APG weight for a given APG, or by the final APG weight for each APG on a claim to determine the total allowable Medicaid operating payment for a visit.

Carve-outs shall mean certain procedures which are not paid using the APG reimbursement methodology. Procedures that are not payable in APGs may be reimbursed through the NYS Medicaid ordered ambulatory fee schedule or the dental fee schedule for orthodontia only. If the procedure is not reimbursable thru the APG methodology or on the fee schedules as stated, they are not reimbursable in Medicaid. The NYS Medicaid fee schedules are provided on the eMedNY website under provider manuals.

Case Mix Index is the actual or estimated average final APG weight for a defined group of APG visits.

Coding Improvement Factor is a numeric value used to adjust for more complete and accurate coding for visits upon implementation of the APG reimbursement system. A link to the coding improvement factors for all periods is available in the APG Reimbursement Methodology – Freestanding Clinics section.

Consolidation/Bundling shall mean the process for determining if a single payment amount is appropriate in those circumstances when a patient receives multiple APG procedures during a single patient visit. In some cases, a procedure will be considered part of a more complicated procedure. In this case the payment for the less complicated procedure will be included in the payment for the more complicated procedure and the claim line for the less complicated procedure will show zero payment for that procedure. Consolidation logic is defined in the 3M Health Information Systems’ APG Definitions Manual, a link to which is provided in the APG Reimbursement Methodology – Freestanding Clinics section.
Current Procedural Terminology-fourth edition (CPT-4) is the systematic listing and coding of procedures and services provided by physicians or other related health care providers. It is a subset of the Healthcare Common Procedure Coding System (HCPCS). The CPT-4 is maintained by the American Medical Association and the HCPCS is maintained by the Centers for Medicare and Medicaid Services. Both coding systems are updated annually.

Discounting shall mean the reduction in APG payment that results when related procedures or ancillary services are performed during a single patient visit. Discounting will be at the rate of 50% until January 1, 2010, with the exception of those discounts listed in the link to the Non-50% Discounting APG List provided in the APG Reimbursement Methodology – Freestanding Clinic Section.

"Episode" shall mean a unit of service consisting of all services coded on a claim. All services on the claim are considered to be part of the same APG visit and are not segmented into separate visits based on coded dates of service as would be the case with "visit" billing. Under episode billing, an episode shall consist of all medical visits and/or significant procedures that are provided by a freestanding clinic or an ambulatory surgery center to a patient on a single date of service plus any ordered ancillaries, ordered on the date of the visit or date of the significant procedure(s), resulting from the medical visits and/or significant procedures, some of which may have been done on a different date of service from that of the medical visits and/or significant procedures. Multiple episodes coded on the same claim would not pay correctly; therefore, multiple episodes should not be coded on the same claim. The calculation of the APG payment by the APG software may be either visit based or episode based depending on the rate code used to access the APG software logic.
Final APG Weight shall mean the allowed APG weight for a given visit as calculated by the APG software using the logic in the APG definitions manual, including all adjustments applicable for bundling, packaging, and discounting.

“HCPCS Codes” are from the Healthcare Common Procedure Coding System, a numeric coding system maintained by the Centers for Medicare and Medicaid Services (CMS) and used to identify services and procedures for purposes of billing public or private health insurance programs. CPT (Common Procedure Terminology) codes are a subset of the HCPCS coding system.

International Classification of Diseases, [9th] 10th Revision-Clinical Modification ([ICD-9-CM] ICD-10-CM) is a comprehensive coding system maintained by the federal Centers for Medicare and Medicaid Services in the U.S. Department of Health and Human Services. It is maintained for the purpose of providing a standardized, universal coding system to identify and describe patient diagnosis, symptoms, complaints, condition and/or causes of injury or illness. It is updated annually.

Modifier shall mean a HCPCS Level II code used in APGs, based on its meaning in the HCPCS lexicon, to modify the payment for a specific procedure code or APG.

Never Pay APGs shall mean an APG where all the procedure codes that map to the APG are carved out of APGs and will not be paid using the APGs reimbursement methodology. Procedures that are not payable in APGs may be reimbursed through the NYS Medicaid ordered ambulatory fee schedule or the dental fee schedule for orthodontia only. The Never Pay APG file details if there is an alternative payment available. If an alternative payment is available, providers should review the NYS Medicaid fee schedules as stated to determine the payment. The NYS Medicaid fee schedules are provided on the eMedNY website under provider manuals.

Never pay procedures shall mean procedure codes that are carved out of APGs and will not be paid using the APGs reimbursement methodology. Procedures that are not payable in APGs may be reimbursed through the NYS Medicaid ordered ambulatory fee schedule or the dental fee schedule for orthodontia only. The Never Pay Procedures file details if there is an alternative payment available. If an alternative payment is available, providers should review the NYS Medicaid fee schedules as stated to determine the payment. The NYS Medicaid fee schedules are provided on the eMedNY website under provider manuals.

No-blend APG shall mean an APG that has its entire payment calculated under the APG reimbursement methodology without regard to the historical average operating payment per visit for the provider. A link to a list of no-blend APGs for all periods is available in the APG Reimbursement Methodology - Freestanding Clinics section.
New York
2(j)(1)

Packaging shall mean those circumstances in which payment for routine ancillary services or drugs shall be deemed as included in the applicable APG payment for a related significant procedure or medical visit. Medical visits also package with significant procedures, unless specifically excepted in regulation. There is no packaging logic that resides outside the software. A link to the list of uniform packaging APGs for all periods is available in the APG Reimbursement Methodology – Freestanding Clinics section.

“Peer Group” shall mean a group of providers or services that share a common APG base rate. Peer groups may be established based on a geographic region, service type, or categories of patients. There are ten [DTC] freestanding clinic peer groups for initial APG implementation: General Clinic/School-Based Health Centers upstate; General Clinic/School-Based Health Centers downstate; Academic Dental upstate; Academic Dental downstate; Ambulatory Surgery Centers upstate; Ambulatory Surgery Centers downstate; Renal upstate; Renal downstate; Mental Retardation, Developmental Disability, Traumatic Brain Injured upstate(MR/DD/TBI); and Mental Retardation, Developmental Disability, Traumatic Brain Injured downstate.

“Procedure-based Weight” shall mean a numeric value that reflects the relative expected average resource utilization (cost) for a given HCPCS/CPT code as compared to the expected average resource utilization for other HCPCS/CPT codes or APGs. If a procedure code has not been assigned a procedure-based weight, the APG relative weight for the APG to which that procedure code groups will be used as the basis for reimbursement for that procedure code (subject to the consolidation, discounting and packaging logic).

“Region” shall mean the counties constituting a peer group that has been defined, at least in part, on a regional basis. The downstate region shall consist of the five counties comprising New York City, as well as the counties of Nassau, Suffolk, Westchester, Rockland, Orange, Putnam, and Dutchess. The upstate region shall consist of all other counties in New York State.

“APG Visit” shall mean a unit of service consisting of all the APG services and associated ancillary services performed for a patient that are coded on the same claim and share a common [on a single] date of service [and related ancillary services].
["Episode" shall mean a unit of service consisting of all services coded on a claim. All services on the claim are considered to be part of the same APG visit and are not segmented into separate visits based on coded dates of service as would be the case with "visit" billing. Under episode billing, an episode shall consist of all medical visits and/or significant procedures that are provided by a freestanding clinic or an ambulatory surgery center to a patient on a single date of service plus any ordered ancillaries, ordered on the date of the visit or date of the significant procedure(s), resulting from the medical visits and/or significant procedures, some of which may have been done on a different date of service from that of the medical visits and/or significant procedures. Multiple episodes coded on the same claim would not pay correctly; therefore, multiple episodes should not be coded on the same claim. The calculation of the APG payment by the APG software may be either visit based or episode based depending on the rate code used to access the APG software logic.]
Reimbursement Methodology - Freestanding Clinics

I. The criteria for using a procedure-based weight or the relative weight in the methodology is as follows: If a procedure-based weight is available for a particular procedure code, then the procedure-based weight is used. If a procedure-based weight is not available for a particular procedure code, then the relative weight (i.e., “APG weight”) is used.

II. The initial calculation of the APG relative weights were developed using line level charges from 2005 New York Medicaid hospital claims converted to cost using the ratio of cost to charges methodology. The line level costs were brought up to the APG level to determine the average cost of each APG.

a. The APG relative weights will be updated no less frequently than every [six] seven years based on hospital claims data. These APG and weights are set as of September 1, 2009, and are effective for specified services on and after that date. A link to the list of APGs and their relative weights is available in the APG Reimbursement Methodology – Freestanding Clinics section.

b. The APG relative weights shall be re-weighted prospectively. The initial reweighting will be based on Medicaid claims data for hospitals from the December 1, 2008 through September 30, 2009 period. Subsequent reweightings will be based on Medicaid hospital claims data from the most recent twelve-month period and will be based on complete and accurate line level procedure and charge data and ratio of cost to charge data.

c. The Department shall correct material errors of any given APG relative weight. Such corrections shall make use of benchmarking data consisting of payment information from other payers (including Medicare) reimbursing comparable services. Corrections to material errors in individual APG relative weights shall be made on a prospective basis.

III. The case mix index is an expression of the average paid APG weight for a given peer group after consolidation, packaging, and discounting. Case mix indices shall be calculated by running applicable freestanding D&TC and ambulatory surgery center claims data through the latest version of the APG software to determine the average final APG weight of the visits. Outlier claims or claim lines may be excluded from this calculation to assure overall accuracy of the final case mix index. Recalculations of case mix indices for periods prior to January 1, 2010, will be based on freestanding D&TC and ambulatory surgery center Medicaid data for 2007. Such revisions for the period commencing January 1, 2010, will be based on such data from the January 1, 2009 through November 15, 2009 period. Subsequent recalculation will be based on freestanding D&TC and ambulatory surgery center Medicaid claims data from the most recent twelve month period.

TN #18-0055 Approval Date 10/19/2018
Supersedes TN #17-0054 Effective Date 07/01/2018
IV. The APG base rates shall be updated at least annually. Updates for periods prior to January 1, 2010, will be based on claims data from 2007. The update commencing January 1, 2010, will be based on claims data from the January 1, 2009 through November 15, 2009 period, and subsequent updates will be based on Medicaid claims data from the most recent twelve-month period, and will be based on complete and accurate billing data. APG base rates shall be rebased each time the APG relative weights are reweighted.

a. If it is determined by the Department that an APG base rate is materially incorrect, the Department shall correct that base rate prospectively so as to align aggregate reimbursement with total available funding. APG payments shall also reflect an investment of $13.54 million for dates of service from September 1, 2009 through March 31, 2010, and $12.5 million for each annual period thereafter. The case mix index shall be calculated using 2005 claims data.

V. [For the period September 1, 2009 to November 30, 2009, the] APG base rates shall initially be calculated using the total operating reimbursement for services and associated ancillaries and the associated number of visits for services moving to APG reimbursement for the period January 1, 2007 to December 31, 2007. APG payments shall also reflect an investment of $13.54 million for dates of service from September 1, 2009 through November 30, 2009, and $12.5 million for each annual period thereafter. A link to the allocation of all APG investments across peer groups for all periods is available in the APG Reimbursement Methodology – Freestanding Clinic section. The case mix index shall initially be calculated using 2005 claims data.

a. [For all rate periods subsequent to November 30, 2009, estimated] The calculation of total operating reimbursement for services and associated ancillaries and the estimated number of visits shall be calculated based on historical claims data. Calculations for periods prior to January 1, 2010, shall be based on Medicaid claims data for 2007. Calculations for the period commencing January 1, 2010, shall be based on Medicaid claims data for the period January 1, 2009 through November 15, 2009. Subsequent modifications will be based on Medicaid freestanding clinic and ambulatory surgery center claims data from the most recent twelve-month period[,] and will be based on complete and accurate data.

b. The estimated case mix index shall be calculated using the appropriate version of the 3M APG software based on claims data. This initial estimate will be adjusted prior to January 1, 2010, based on Medicaid freestanding [D&TC] clinic and ambulatory surgery center claims data from 2007 [the September 1, 2009 through November 30, 2009 period]. For January 1, 2010, the case mix index will be recalculated using January 1, 2009, to November 15, 2009, claims data. Any subsequent modifications will be based on Medicaid freestanding [D&TC] clinic and ambulatory surgery center claims data from the most recent twelve-month period[,] and will be based on complete and accurate line level procedure and charge data and ratio of cost to charge data.
VI. Rates for new freestanding D&TC clinics during the transition period

a. Freestanding D&TC clinics which commence operation after December 31, 2007, and prior to January 1, 2012, and for which rates computed pursuant to the Public Health Law are not available shall have the capital cost component of their rates based on a budget as submitted by the facility and as approved by the Department and shall have the operating component of their rates computed in accordance with the following:

b. For the period September 1, 2009 through [December 31] November 30, 2009, 75% of such rates shall reflect the historical 2007 regional average peer group payment per visit as calculated by the Department, and 25% of such rates shall reflect APG rates as described [beginning on Page 2(k) of this plan amendment] in the Reimbursement Methodology - Freestanding Clinics section;

c. For the period December 1, 2009, [January 1, 2010] through December 31, 2010, 50% of such rates shall reflect the historical 2007 regional average peer group payment per visit as calculated by the Department, and 50% of such rates shall reflect APG rates as described [beginning on Page 2(k) of this plan amendment] in the Reimbursement Methodology - Freestanding Clinics section;

d. For the period January 1, 2011 through December 31, 2011, 25% of such rates shall reflect the historical 2007 regional average peer group payment per visit as calculated by the Department, and 75% of such rates shall reflect APG rates as described [on Page 2(k) of this plan amendment] in the Reimbursement Methodology - Freestanding Clinics section;

e. For periods on and after January 1, 2012, 100% of such rates shall reflect APG rates as described [on Page 2(k) of this plan amendment] in the Reimbursement Methodology - Freestanding Clinics section;

f. For the purposes of this subdivision, the historical 2007 regional average peer group payment per visit shall mean the result of dividing the total facility-specific Medicaid reimbursement paid for freestanding D&TC clinic claims for each peer group, as defined [on Page 2(j) of this plan amendment] in the list of definitions under the Ambulatory Patient Group Reimbursement System - Freestanding Clinic section, paid in the 2007 calendar year in the applicable upstate or downstate region for all rate codes reflected in the APG rate-setting methodology, divided by the total visits on claims paid under such rate codes.
VII. Rates for new freestanding ambulatory surgery centers during the transition period

a. Freestanding ambulatory surgery centers which commence operation after December 31, 2007, and prior to January 1, 2012, and for which rates computed pursuant to Public Health Law §2807(2) are not available, shall have the capital cost component of their rates computed in accordance with the methodology described in [item IV on page 2(o) of this plan amendment] the APG Rate Computation – Freestanding Clinics section and shall have the operating cost component of their rates computed in accordance with the following:

b. For the period September 1, 2009 through [December 31] November 30, 2009, 75% of such rates shall reflect the historical 2007 regional average payment per visit as calculated by the Department, and 25% of such rates shall reflect APG rates as described [beginning on Page 2(k) of this plan amendment] in the Reimbursement Methodology – Freestanding Clinics section;

c. For the period December 1, 2009, [January 1, 2010] through December 31, 2010, 50% of such rates shall reflect the historical 2007 regional average payment per visit as calculated by the Department, and 50% of such rates shall reflect APG rates as described [beginning on Page 2(k) of this plan amendment] in the Reimbursement Methodology – Freestanding Clinics section;

d. For the period January 1, 2011 through December 31, 2011, 25% of such rates shall reflect the historical 2007 regional average payment per visit as calculated by the Department, and 75% of such rates shall reflect APG rates as described [on Page 2(k) of this plan amendment] in the Reimbursement Methodology – Freestanding Clinics section;

e. For periods on and after January 1, 2012, 100% of such rates shall reflect APG rates as described [on Page 2(k) of this plan amendment] in the Reimbursement Methodology – Freestanding Clinics section; and

f. For the purposes of this subdivision, the historical 2007 regional average peer group payment per visit shall mean the result of dividing the total facility specific Medicaid reimbursement paid for freestanding ambulatory surgery centers services claims paid in the 2007 calendar year in the applicable upstate or downstate region for all rate codes reflected in the APG rate-setting methodology, divided by the total visits on claims paid under such rate codes.
APG Rate Computation – Freestanding Clinics

The following is a description of the methodology to be utilized in calculating rates of payment for freestanding clinics and ambulatory surgery center services under the Ambulatory Patient Group classification and reimbursement system.

I. Claims containing ICD-10 diagnostic and CPT-4/HCPCS procedure codes are submitted to the Department on appropriate forms or in the accepted electronic format.

II. Claims are reviewed electronically to assign each valid procedure code to the appropriate APG using the APG software logic. Invalid codes will be assigned to an error APG and not given further consideration in the payment process.

III. Each valid APG on the claim is assigned a relative weight. At this time the software logic also determines an allowed weight based upon whether each APG on the claim is to be paid in full, packaged, consolidated, or discounted.

IV. The allowed weights for each valid APG on the claim are then summed to arrive at the final weight for this claim. This final weight is multiplied by an operating base rate that is specific to the peer group to which the claim has been assigned resulting in the APG operating cost reimbursement amount for this claim. For freestanding clinic services, capital will continue to be paid as an add-on using the existing, previously approved methodology. Beginning January 1, 2016, and every January 1 thereafter, the capital add-on for Article 28 freestanding clinic services shall be the result of dividing the total allowable capital costs associated with Article 28 services by the Article 28 total number of visits or procedures. The allowable capital costs and visits or procedures will be based on the 2-year prior certified Ambulatory Health Care Facility (AHCF) annual cost report submitted to the Department of Health. If a clinic fails to file a base year AHCF cost report with the required documents, the clinic will receive no capital add-on for Article 28 freestanding clinic services for the rate period. The capital cost component for ambulatory surgery services shall be the result of dividing the total amount of capital cost reimbursement paid to such facilities pursuant to the current Products of Ambulatory Surgery (PAS) system for the 2007 calendar year for the Upstate Region and for the Downstate Region and then dividing each such regional total amount by the total number of claims paid through the PAS system within each such region for the 2007 calendar year.

V. A separate base rate calculation shall be calculated for each peer group established by the Department. All Medicaid reimbursement paid to facilities for services moving to the APG reimbursement system (e.g., freestanding clinic and ambulatory surgery center services) during the 2007 calendar year and associated ancillary payments will be added to an investment of $9.375 million for dates of service from September 1, 2009 through November 30, 2009, and $50 million for each annualized period thereafter to form the numerator. A link to the base rates can be found in the APG Reimbursement Methodology – Freestanding Clinics section. The peer group specific case mix index multiplied by the coding improvement factor and the 2007 base year visits will form the denominator resulting in a base rate for that peer group.
The following is an example of a sample APG base rate calculation:

a. 2007 Peer Group Reimbursement $51,000,000
b. Additional Investment $25,000,000
c. Case Mix Index 8.1610
d. Coding Improvement Factor 1.05
e. 2007 Base Year Visits 50,000

\[
\frac{(51,000,000 + 25,000,000)}{(8.1610 \times 1.05 \times 50,000)} = 177.38 \text{ (Base Rate)}
\]

VI. During the transition period, reimbursement for freestanding clinic and ambulatory surgery center services shall consist of a blend of each facility’s average 2007 Medicaid rate and the APG calculation for that visit. The average 2007 Medicaid rate for purposes of blending is computed by dividing the amount paid in calendar year 2007 for all rate codes reflected in the APG rate setting methodology, by the total visits paid through those codes for the same time period. In the initial phase (ending [December 31] November 30, 2009) 25% of the operating payment for each visit will be based upon the APG reimbursement methodology and 75% will be based upon the provider specific average operating payment for calendar year 2007. [During 2010] For the period December 1, 2009, through December 31, 2010, the blend will be 50/50. During 2011, the blend will be 75/25. Payments will be based upon 100% of the APG operating component beginning on January 1, 2012. [Per the enabling statute, as new services the Education APGs and the Extended Hours APGs are not subject to the blend requirement.]

Effective for dates of service on and after September 1, 2009, smoking cessation counseling services provided to pregnant women on any day of her pregnancy, during a medical visit provided by a freestanding clinic shall be reimbursed entirely on the APG methodology.] A link to the list of APGs that are not subject to the blend is available in the APG Reimbursement Methodology – Freestanding Clinics section.
Effective for dates of service on and after September 1, 2009, payments to freestanding clinics for the following services shall be based on fees or rates established by the Department of Health: (1) wheelchair evaluations, (2) eyeglass dispensing, and (3) individual psychotherapy services provided by licensed social workers to persons under the age of 21, and to persons requiring such services as a result of or related to pregnancy or giving birth, and (4) individual psychotherapy services provided by licensed social workers at freestanding clinics that provided, billed for, and received payment for these services between January 1, 2007 through December 31, 2007. Except as otherwise noted in the plan, state-developed fee schedule rates are the same for both governmental and private providers. A link to the APG alternative rates for all periods is available in the APG Reimbursement Methodology – Freestanding Clinics section.

VII. Rates for services provided in freestanding clinic and ambulatory surgery center facilities located outside of New York State shall be as follows:

- APG rates in effect for similar services for providers located in the downstate region of New York State shall apply to services provided by out-of-state providers located in the New Jersey counties of Sussex, Passaic, Bergen, Hudson, Essex, Union, Middlesex and Monmouth; in the Pennsylvania county of Pike; and in the Connecticut counties of Fairfield and Litchfield; and rates in effect for similar services for providers located in the upstate region of New York State shall apply to all other out-of-state providers.

- In the event the Department determines that an out-of-state provider is providing services which are not available within New York State, the Department may negotiate payment rates and conditions with such a provider up to, but not in excess of, the provider’s usual and customary charges. Prior approval by the Department shall be required with regard to services provided by such providers.

- For the purpose of APG reimbursement to out-of-state providers, the downstate region of New York State shall consist of the New York counties of Bronx, New York, Kings, Queens, Richmond, Nassau, Suffolk, Westchester, Rockland, Orange, Putnam and Dutchess, and the upstate region of New York State shall consist of all other New York counties.

System updating

The following elements of the APG reimbursement system shall be updated no less frequently than annually:

- the listing of reimbursable APGs and the relative weight assigned to each APG;
- the base rates;
- the applicable [ICD-9-CM] ICD-10-CM codes utilized in the APG software system;
- the applicable CPT-4/HCPCS codes utilized in the APG software system; and
- the APG software system.
Minimum Wage - Article 28 Freestanding Clinics

Effective January 1, 2017, and every January 1 thereafter until the minimum wage reaches the state statutorily described per hour wage as shown below, a minimum wage add-on will be developed and applied to the Ambulatory Patient Group (APG) rate for freestanding clinics and ambulatory surgery centers under Article 28.

The minimum wage add-on and the adjusted APG rate will be posted to Health Commerce System (HCS: https://commerce.health.state.ny.us/public/hcs_login.html). The minimum wage add-on will be developed and implemented as follows:

a. Minimum wage costs will mean the additional costs incurred beginning January 1, 2017, and thereafter, as a result of New York state statutory increases to minimum wage.

i. Minimum wage cost development based on survey data collected.

1. Survey data will be collected for facility specific wage data.
2. Facilities will report by specified wage bands, the total count of FTEs and total hours paid to employees earning less than the statutory minimum wage applicable for each MW Region.
3. Facilities will report an average fringe benefit percentage for the employees directly affected by the minimum wage increase.
4. The minimum wage costs are calculated by multiplying the total hours paid by the difference between the statutory minimum wage and the midpoint of each wage band where the facility has reported total hours paid. To this result, the facility’s average fringe benefit percentage is applied and added to the costs.

ii. Minimum wage cost development based on the AHCF cost report data.

1. The average hourly wages of employees in occupational titles where the reported average hourly wage is below the regional statutory minimum wage are identified.
2. The total payroll hours of the titles identified are then multiplied by the regional statutory minimum wage resulting in a projected payroll. The actual payroll as reported in the AHCF cost report is then subtracted from the projected payroll resulting in the expected wage costs increase.
3. The facility’s fringe benefit costs directly affected by the wage increase are identified, and the average fringe benefit percentage is calculated.
4. The fringe benefit percentage is applied to the increased wage costs and added resulting in the minimum wage costs.
b. The 2017 minimum wage costs will be developed based on collected survey data received and attested to by clinics and ambulatory surgery centers. If a clinic or ambulatory surgery center did not submit a survey, its minimum wage costs will be calculated based on 2014 Ambulatory Health Care Facility (AHCF) Cost Report wage data. If a clinic or ambulatory surgery center fails to submit both the survey and the 2014 AHCF cost report, its minimum wage add-on will not be calculated.

c. In the subsequent years until the minimum wage is completely implemented statewide, the Department will survey clinics and ambulatory surgery centers utilizing the methodology employed in year one. If a clinic or ambulatory surgery center fails to submit the minimum wage survey, the calculation for minimum wage costs will default to the use of the personnel wage data reported on the statewide latest available AHCF cost report. If a clinic or ambulatory surgery center fails to submit both the survey and the latest AHCF cost report, its minimum wage add-on will not be calculated. Once the costs are included in the development of the upstate/downstate APG base rate, the minimum wage add-on will be excluded from the rate.

d. A minimum wage add-on will be developed by multiplying minimum wage costs pursuant to “a.” above by a percentage of Medicaid visits to total visits, divided by total Medicaid visits for such services.

e. Minimum Wage Reconciliation - After the end of each calendar year, the Department of Health will survey providers to obtain the following information for the purpose of reconciling annual minimum wage reimbursement. The state will release the reconciliation survey by the end of March and providers will have two weeks to complete the survey or request an extension if a provider determines it is unable to complete the survey within that time. Approval of extensions, and the time of the extension, is at the discretion of the state. If the reconciliation survey is not submitted within the two weeks or within the extension time frame, should one be granted, the provider’s minimum wage add-on for the calendar year covered by the survey will be recouped.

   i. Total annual minimum wage funding paid to the provider (as determined from the minimum wage add-on to claims paid for services rendered in the prior calendar year) for the Medicaid share of the minimum wage law increase requirement. (This information will be supplied by the Department of Health.) Medicaid's share is the percentage of minimum wage costs that are attributable to Medicaid services based on the proportion of Medicaid services to a provider’s total services.

   ii. Medicaid's share of the total amount the provider was obligated to pay to bring salaries up to the minimum wage for the calendar year. (This information will be completed by the provider.)

   iii. Minimum wage funds to be recouped or additional funds to be received by the provider. (This information will be completed by the provider.) This will be the...
difference between the amount paid to the provider for the Medicaid share of the minimum wage law increase requirement and the corresponding amount the provider determined it was actually obligated to pay.

iv. The State agency will review providers’ submissions for accuracy and reasonableness, following which it will process associated payments and recoupments via retroactive per unit rate adjustments as quickly as practical thereafter.

The agency’s Chief Executive Officer or Chief Financial Officer must sign an Attestation verifying the data that is supplied in the survey.
[The following shall be excluded from the APG reimbursement system:

- Drugs and other pharmaceutical products and implantable family planning devices for which separate and distinct outpatient billing and payment were authorized by the Department as of December 31, 2007, and as set forth by the Department in written billing instructions issued to providers.

- HIV counseling and testing visits, HIV counseling (no testing), post-test HIV counseling visits (positive results), day health care service (HIV).

- TB/directly observed therapy - downstate levels 1 and 2, TB/directly observed therapy.

- Upstate levels 1 and 2, AIDS clinic therapeutic visits in general hospital outpatient clinics.

- Child rehabilitation services provided under rate code 2887 in general hospital outpatient clinics.

- Medicaid obstetrical and maternity services (MOMS) provided under rate code 1604.

- Visits solely for the purpose of receiving ordered ambulatory services.

- Visits solely for the purpose of receiving pharmacy services.

- Visits solely for the purpose of receiving education or training services, except with regard to services authorized pursuant to clause (A) of subparagraph (ii) of paragraph (f) of subdivision 2-a of §2807 of the Public Health Law.

- Visits solely for the purpose of receiving services from licensed social workers, except with regard to psychotherapy services provided by Federally Qualified Health Centers or Rural Health Centers choosing to participate in the APG system, or as authorized pursuant to clauses (C) and (D) of subparagraph (ii) of paragraph (f) of subdivision 2-a of §2807 of the Public Health Law.

- Visits solely for the purpose of receiving group services, except with regard to clinical group psychotherapy services provided by Federally Qualified Health Centers or Rural Health Centers choosing to participate in the APG system and provided, however, that reimbursement for such group services shall be determined in accordance with state regulation.

- Offsite services, defined as medical services provided by a facility's outpatient staff at locations other than those operated by and under the facility's licensure under Article 28 of the Public Health Law, or visits related to the provision of offsite services provided by Federally Qualified Health Centers or Rural Health Centers.]

TN   #10-06       Approval Date    November 7, 2013
Supersedes TN  #09-01     Effective Date    April 1, 2010
Effective for freestanding clinic and ambulatory surgery centers, on or after July 1, 2013, the administration of a Long-Acting Reversible Contraceptive (LARC) will be carved out of the APG reimbursement methodology when it is provided on the same Date of Service (DOS) as an abortion. The facility will be reimbursed with state funds only for the abortion procedure through APGs which is a prospective payment system that pays based on a facility's base rate and the service intensity weight of the procedure(s) rendered. The facility will submit a separate claim that will pay $208 which will cover the cost of the LARC insertion ($158) and the associated Evaluation and Management services ($50). The facility will submit a third claim to be reimbursed for the cost of the LARC device at the provider's actual acquisition cost. The cost of the physician’s professional services is carved out of the ambulatory surgery center payments; the physician is permitted to submit separate claim for those professional services rendered in an ambulatory surgery center. Physician payments will be made per the fee schedule posted online at https://www.emedny.org/ProviderManuals/Physician/index.aspx.
Ambulatory Patient Group Reimbursement Methodology - Freestanding Office of Alcoholism and Substance Abuse (OASAS) Certified Chemical Dependence and Opioid Treatment Clinics certified pursuant to Mental Hygiene Law Article 32 and not operated by a Hospital

Ambulatory Patient Group (APG) reimbursement for freestanding chemical dependence clinics (including those certified as outpatient clinics and outpatient rehabilitation clinics) and freestanding opioid treatment clinics (OASAS clinics) certified by the New York State Office of Alcoholism and Substance Abuse Services (OASAS) and not operated by a hospital will begin on July 1, 2011. The initial base rates for freestanding OASAS clinics will be calculated using paid 2008 Medicaid claims data for OASAS freestanding clinics. The initial update will be based on claims data from 2010 Medicaid claims for OASAS freestanding clinics. Beginning 2012, the base rates will be updated at least every two years, will be based on Medicaid claims data from the most recent 12 month period and will be based on complete and accurate billing data. Freestanding OASAS clinics will not receive a capital add-on. Freestanding OASAS clinics do not include OASAS clinics operated by a hospital.

There are 6 OASAS freestanding clinic peer groups for initial APG implementation. The peer groups are divided into two regions, downstate and upstate. The downstate region includes the following counties: New York, Kings, Queens, Richmond, Bronx, Nassau, Suffolk, Westchester, Rockland, Putnam, Dutchess and Orange. The upstate region includes all other counties in the rest of the State. The peer groups are as follows: Upstate freestanding chemical dependence clinics; Downstate freestanding chemical dependence clinics; Upstate freestanding chemical dependence outpatient rehab clinics; Downstate freestanding chemical dependence outpatient rehab clinics; Upstate freestanding opioid treatment clinics; Downstate freestanding opioid treatment clinics. This information is also available on the OASAS website at:

http://www.oasas.ny.gov/admin/hcf/FFS/RegionAPGBaseRate.cfm

I. Reimbursement Methodology

The list of definitions in the APG System: Freestanding Clinics section will apply to the methodology for OASAS freestanding clinics.

The calculation of the case mix index will be used in the periodic determination of the APG base rates to assure that prospective aggregate disbursements remain within available resources. Every provider reports Medicaid claims by actual services delivered by procedure. The initial case mix index will be based on 2008 Medicaid claims data for OASAS freestanding clinics. The total volume of service type multiplied by the service weight and added to the other aggregated volume per service weight will determine initial case mix. Thereafter, case mix will continue to be determined by actual volume of reported services to yield the actual case mix ratio.

In an APG payment environment, payments are determined by multiplying a dollar base rate (varies by peer group) by the weight for each procedure. The weight is a numeric value that reflects the relative expected resource utilization for each procedure as compared to the expected resource utilization for all other procedures. Procedure weights are the same for all freestanding clinic providers regardless of peer group.
II. Transition

Freestanding clinics are those clinics certified by OASAS pursuant to New York State Mental Hygiene Law Article 32 and not operated by a hospital. OASAS will promulgate the APG base rates for all freestanding OASAS clinics. The base rates for all OASAS clinic peer groups can be found in the section entitled Base Rates for Office of Alcoholism and Substance Abuse Outpatient Treatment Programs.

All freestanding OASAS clinics will transition to full payment under the APG methodology over a multi-year period. Freestanding OASAS clinics will transition beginning July 1, 2011 and ending January 1, 2014 as described in the following paragraphs:

There will be a transition to APG reimbursement as identified in the transition schedule below. Provider reimbursement during the identified transition period will be a blended payment consisting of a percentage of the individual provider’s rate in effect on June 30, 2011 and a percentage of APG payment. The APG payment will be the product of the base rate multiplied by the relative weights of the delivered procedure and/or services. A link to the APG base rates in effect during the transition and after completion of the transition by provider can be found at:

https://www.oasas.ny.gov/admin/hcf/FFS/index.cfm

Payments to Freestanding OASAS clinics will be made pursuant to the following transition schedule:

a. Beginning on July 1, 2011 and ending on June 30, 2012, payment will reflect a blend of 75% of the existing provider rate in effect on June 30, 2011 and 25% of the APG payment;

b. Beginning on July 1, 2012 and ending on June 30, 2013, payment will reflect a blend of 50% of the existing provider rate in effect on June 30, 2011 and 50% of the APG payment;

c. Beginning on July 1, 2013 and ending on December 31, 2013, payment will reflect a blend of 25% of the existing provider rate in effect on June 30, 2011 and 75% of the APG payment; and

d. Beginning on January 1, 2014, all subsequent payments will reflect full APG reimbursement.
III. **Rates for new freestanding OASAS certified clinics during the transition period.**

Clinics that begin operation on or after July 1, 2011 ("new clinics") will be reimbursed in accordance with the transition phase-in schedule identified in the transition section. An appropriate threshold fee will be established for such new clinics and be blended with the APG rate according to the same phase-in percentages as clinics that existed prior to July 1, 2011. New clinics do not have historical volume on which their legacy rate can be determined. A legacy rate for new clinics will use an average legacy rate, which will be determined using all of the legacy fees for providers in the new clinic’s peer group. The new clinic’s reimbursement rate during the transition period will follow the transition schedule.

IV. **Off-site visits provided by OASAS licensed clinics to homeless individuals.**

Medicaid will only claim expenditures for off-site clinic services when the services meet the exception in 42 CFR 440.90(b) that permits Medicaid payment for services furnished outside of the clinic by clinic personnel under the direction of a physician to an eligible individual who does not reside in a permanent dwelling or does not have a fixed home or mailing address. Medicaid claims will not be submitted by OASAS licensed clinics for off-site services provided to individuals who do not meet the exception in 42 CFR 440.90(b).

TN #10-0018 Approval Date November 1, 2017
Supersedes TN NEW Effective Date July 1, 2010
APG Reimbursement Methodology – Freestanding (Non-Article 28 Hospital) OMH Licensed Mental Health Clinics

Ambulatory Patient Group (APG) reimbursement for all freestanding mental health clinics licensed by the New York State Office of Mental Health (OMH) will begin October 1, 2010. The initial base rates for mental health clinics will be calculated by the OMH using historical Article 31 claims data as reported in the data warehouse, from the base period of July 1, 2008 to June 30, 2009. This base period will be used as the basis for calculations for all rates going forward from October 1, 2010.

There are four mental health clinic peer groups for initial APG implementation: Upstate freestanding clinics; Downstate freestanding clinics; freestanding mental health clinics operated by a county’s designated local governmental unit, and State-operated mental health clinics.

Assignment to a peer group is based on the corporate information related to the licensure of the owner’s primary location. Clinics that are owned by hospitals will receive the hospital base rate. Clinics owned by a free-standing (non-Article 28 hospital) entity will receive the freestanding clinic base rate.

APG is an alternative reimbursement methodology to the Prospective Payment System (PPS) methodology and is subject to the minimum payment annual reconciliation for Federally Qualified Health Centers as described in the Federally Qualified Health Centers (FQHCs) and Rural Health Clinics section of this Attachment.

I. Definitions: The list of definitions in the APG System freestanding clinic section of this attachment will also apply to the methodology for OMH clinics except as follows:

- **After hours** is considered to be services outside the time period 8:00 am – 6:00 pm for weekdays or any time during weekends. Weekends are considered to be Saturday and Sunday.

- **Provider blend rate** is the combination of the provider’s average per-visit Medicaid reimbursement for clinic services for the period July 1, 2008 through June 30, 2009, plus the provider’s supplemental payments for Comprehensive Outpatient Program Services (COPS) and the Community Service Program (CSP) in effect as of June 30, 2009.

- **Supplemental payment** means payment that is in addition to the operating rate, which operating rate during the transition period will be composed of both an APG component and a pre-APG (legacy) component. The supplemental payments included in the pre-APG (legacy) component consist of Comprehensive Outpatient Services (COPS) payments and Community Support Program (CSP) payments.
II. Reimbursement Methodology

Under the APG payment methodology, payments are determined by multiplying a dollar base rate, varying by peer group, by the weight for each procedure. The weight is a numeric value that reflects the relative expected resource utilization for each procedure as compared to the expected resource utilization for all other procedures. Procedure weights are the same for all freestanding clinic providers regardless of peer group. They are also the same for the same procedure regardless of the licensure of the clinic delivering the reimbursable procedure.

The statewide case mix of .8675 will be used in the determination of the APG base rates. The statewide case mix was calculated by determining the specific service mix that would exist within the OMH clinic, applying the pre-existing APG and procedure-specific weights and calculating the weighted average based on service volume based on each procedure code.

III. Transition

OMH will promulgate the APG base rates and blend rates in accordance with the methodology describe herein for all freestanding OMH-licensed mental health clinics.

Facilities will transition to the APG methodology according to the terms of the Transition Schedule detailed in the APG Reimbursement Methodology – OMH Licensed Mental Health Clinics section of this Attachment.

IV. Transition Schedule

Excluding new sites as described in paragraph V of this section, all freestanding OMH-licensed mental health clinics will transition to full payment under the APG methodology over a multi-year period beginning October 1, 2010 as follows:

The first year of the transition to full payment under the APG methodology, October 1, 2010 to September 30, 2011, the payments for visits to OMH-licensed, freestanding mental health clinics will be comprised of 25% of the APG rate plus 75% of the individual provider’s blend rate.

In the second year, October 1, 2011, to September 30, 2012, the payments to OMH-licensed, freestanding mental health clinics will be comprised of 50% of the APG rate and 50% of the blend rate.

In the third year, October 1, 2012, to September 30, 2013, the payments to OMH-licensed, freestanding mental health clinics will be comprised of 75% of the APG rate and 25% of the blend rate.

Supersedes TN _NEW_________  Effective Date _July 1, 2010____________

Approval Date _November 1, 2017______________
In the fourth year, beginning October 1, 2013, the entire payment to OMH-licensed, freestanding mental health clinics will be comprised of the APG rate.

V. Rates for new OMH-licensed mental health clinics during the transition period.

1. The APG transition period for OMH-licensed mental health clinics is October 1, 2010, through September 30, 2013.

2. For any clinic for which an initial operating certificate was issued during the transition period, the base rate will be the same as the base rate for other members of the peer group to which such clinic is assigned by OMH. The provider blend rate for any such clinic will be the lowest blend rate paid to any other member of the peer group, excluding all clinics with licenses with a duration of six months or less. The relocation of a clinic operated by the same agency provider, the assumption of the operation or control of an existing clinic by a different agency provider, or an increase in capacity of an existing clinic, will not be treated as a new clinic for these purposes.

3. The base rate for the new site(s) for providers assuming operation of clinic site(s) previously operated by another provider will be based on the peer group previously assigned to that clinic site; blend rate adjustment, if any, will be based on whether the provider assuming operation of the clinic site is currently operating one or more clinic sites in the same peer group. If the provider is currently operating one or more such clinics, the blend will be the visit-volume weighted average of the calculated blend rates of the agency provider’s current clinic sites and the newly assumed location. If the provider that is acquiring a site does not currently operate any sites, the base rate of the new site is determined by the peer group to which it is assigned and the blend rate for the new site will be the same as it was when operated by the previous provider.

4. Freestanding (non-Article 28 hospital) mental health clinic provider Medicaid blend rates can be found on the Office of Mental Health website at:

https://www.omh.ny.gov/omhweb/medicaid_reimbursement/

Click on “Blend Rates –Provider-Specific” then click on “Non-hospital Fee-for Service Clinic Blend Rates”

VI. Rates for new OMH-licensed mental health clinics after the transition period.

For any clinic for which an initial operating certificate was issued after the transition period, the base rate will be the same as the base rate for other members of the peer group to which such clinic is assigned by OMH.
VII. Off-Site Visits Provided By OMH Licensed Clinics to Homeless Individuals.

Medicaid will only claim expenditures for off-site clinic services when the services meet the exception in 42 CFR 440.90(b) that permits Medicaid payment for services furnished outside of the clinic by clinic personnel under the direction of a physician to an eligible individual who does not reside in a permanent dwelling or does not have a fixed home or mailing address. Off-site services provided by OMH licensed clinics to other than homeless individuals will be reimbursed with State-only funding and federal financial participation will not be claimed.

VIII. Quality Improvement (QI) Program

An enhanced APG peer group base rate is available for providers participating in the OMH quality improvement program. To become eligible for this enhancement, providers must complete a Memorandum of Agreement agreeing to the terms and conditions under which the enhanced APG peer group base rate will be paid, develop and submit a quality improvement plan that is subsequently approved by the OMH, identify the process or outcome indicators that will be monitored, and submit the QI findings and results to the OMH.

Providers that discontinue their involvement in the QI program will revert to the APG peer group base rate for their region that does not include the enhancement.

TN #10-0018 Approval Date November 1, 2017
Supersedes TN NEW Effective Date July 1, 2010

I. Implementation date: For service dates beginning July 1, 2011, for clinics certified or operated by New York State OPWDD (i.e., Article 16 clinics), services will be reimbursed using the Ambulatory Patient Group (APG) methodology. Website links to the various components of the APG methodology can be found at:

(1) Medicaid will only claim expenditures for off-site clinic services when the services meet the exception in 42 CFR 440.90 (b) that permits Medicaid payment for services furnished outside of the clinic by clinic personnel under the direction of a physician to an eligible individual who does not reside in a permanent dwelling or does not have a fixed home or mailing address. Off-site services provided by OPWDD licensed clinics to other than homeless individuals will be reimbursed with State-only funding and federal financial participation will not be claimed.

II. Definitions: The list of definitions in the Ambulatory Patient Group System: Freestanding Clinics section will apply to the methodology for OPWDD freestanding clinics except as follows:

(1) Average legacy Rate. The average legacy rate represents the provider-specific historical operating component reimbursement under the previous OPWDD clinic rate methodology. Each Provider's specific average legacy rate can be found at the link below.

(2) OPWDD Peer Groups are defined as:

(i) Peer Group A. Except for clinics described in Peer Group C, Peer Group A will be comprised of clinics that have the certified main clinic site located in the counties of New York, Bronx, Kings, Queens, Richmond, Nassau and Suffolk.

(ii) Peer Group B. Except for clinics described in Peer Group C, Peer Group B will be comprised of clinics that have the certified main clinic site located in a county other than those identified in Peer Group A.

(iii) Peer Group C. Peer Group C will be comprised of clinic facilities operated by an educational institution providing graduate medical education which places residents and fellows at no fewer than two major hospital systems and which clinic’s physicians have admitting and/or courtesy privileges at same hospital systems. Additionally, the educational institution operating the clinic facility must hold the following federal designations as of July 1, 2011:

(a) University Center for Excellence in Developmental Disabilities (UCEDD) by the United States Department of Health and Human Services’ Administration on Developmental Disabilities (ADD); and
III. Reimbursement Methodology—Operating and APG Rate Computation

**Operating:** For dates of service beginning July 1, 2011, the operating component of rates shall be reimbursed using a methodology that is prospective and associated with resource utilization to ensure that ambulatory services are economically and efficiently provided. The methodology is based upon the APG classification and reimbursement system. Reimbursement for the capital component of these rates shall be made as an add-on to the operating component as described in the APG Rate Computation section.

There will be a three and one half year transition period to the new APG reimbursement methodology. During this transition period, the operating component payment will be calculated as a blend of the new APG methodology calculation and the clinic-specific legacy rates established based on the former reimbursement methodology. The transition blend formula is described in subpart 3 of this Section. Beginning January 1, 2014 and thereafter, 100% of the operating component payment will be based on the APG methodology. Per the enabling statute, new services are not subject to the blend requirement. A comprehensive list of “No Blend” APGs are posted on the APG website:

http://www.health.ny.gov/health_care/medicaid/rates/apg

Click on “Reimbursement Components” then click on “No Blend APGs”

The APG patient classification system is designed to explain the amount and type of resources used in an ambulatory visit by grouping patients with similar clinical characteristics and similar resource use into a specific APG. Each procedure code associated with a patient visit is assigned to an APG using the grouping logic developed by 3M Health Information Systems (3M). When evaluation and management codes are coded, the APG grouping logic also uses the diagnosis code to make the APG assignment. Ultimately, the procedures and diagnoses coded for a patient visit will result in a list of APGs that correspond on a one-for-one basis with each procedure coded for the visit.

**APG Rate Computation:** The following is a description of the methodology to be utilized in calculating rates of payment under the APG classification and reimbursement system.

Claims containing diagnostic and procedure codes are submitted to the Department on appropriate forms or in the accepted electronic format. Procedures will be coded using the CPT-4
code set. Diagnoses will be coded using the ICD-9-CM code set until September 30, 2015 and then the ICD-10 code set thereafter.

Claims are reviewed electronically to assign each valid procedure code to the appropriate APG using the APG software logic. Invalid codes will be assigned to an error APG and not given further consideration in the payment process.

Each valid APG on the claim is assigned a relative weight. At this time the software logic also determines an allowed weight based upon whether each APG on the claim is to be paid in full, packaged, consolidated, or discounted.

The allowed weights for each valid APG on the claim are then summed to arrive at the final weight for this claim. This final weight is multiplied by an operating base rate that is specific to the peer group to which the claim has been assigned resulting in the APG operating cost reimbursement amount for this claim.

A separate base rate calculation shall be calculated for each peer group established jointly by OPWDD and the Department of Health. All Medicaid reimbursement paid to Article 16 clinic facilities in the peer group during the period April 1, 2009 to March 31, 2010 will form the numerator. The peer group specific case mix index multiplied by the coding improvement factor and the peer group base year (4/1/09-3/31/10) visits will form the denominator. Dividing the numerator by the denominator yields the peer group base rate.

The following is an example of a sample APG base rate calculation:

a. 2007 Peer Group Reimbursement $51,000,000
d. Case Mix Index 8.1610
c. Coding Improvement Factor 1.05
d. 2007 Base Year Visits 50,000

\[
\frac{51,000,000}{(8.1610 \times 1.05 \times 50,000)} = 119.03 \text{ (Base Rate)}
\]
The APG Rate Computation as described above for DOH-licensed Article 28 free-standing clinics will also apply to OPWDD-licensed Article 16 clinics, except for the following:

1. **Case mix.** The initial case mix index is based on paid OPWDD Article 16 Medicaid claims data from April 1, 2009 through March 31, 2010. The APG peer group base rates are based on the following case mix values: Peer Group A = .59, Peer Group B = .52, and Peer Group C = .86.

2. **Healthcare Common Procedure Coding System (HCPCS) modifier codes impact the calculation of allowed APG payment for OPWDD clinic services in the same manner as DOH-certified freestanding clinics, with the following exception:**
   
   (i) Article 16 clinics permit Rehabilitation Counselors to deliver certain vocation-related procedures that might otherwise be limited to licensed Occupational and Physical Therapists. The specific procedure codes that rehabilitation counselors deliver are limited to:
   
   - 97003-97004 – Evaluations and Re-evaluations until December 31, 2016;
   - 97165-97168 – Evaluation and Re-evaluation beginning January 1, 2017;
   - 97530 – Therapeutic Activities;
   - 97532 – Development of Cognitive Skills;
   - 97535 – Self-care/home management training;
   - 97537 – Community/work reintegration training; or
   - 97150 – Therapeutic Procedures, group

   (ii) Providers are instructed to include procedure modifier codes HO and HN modifiers on rehabilitation counseling services only. The HO and HN modifiers are not added to procedures delivered by Occupational Therapists (OTs), Occupational Therapist Assistants, (OTAs), Physical Therapists (PTs), and Physical Therapist Assistants (PTAs). When these specific services are delivered by a Rehabilitation Counselor, these modifiers will discount the payment to 75% of the rate. The discount is intended to reflect the lower staff costs associated with this title.

   (iii) OPWDD clinics are prohibited from attaching modifier codes AF, AG, SA, and U4 to their claims. The additional cost factors represented by these modifiers are considered “already included” within OPWDD base rates. The link for APG modifier codes can be found at the following webpage:

Transition:

(i) During the transition, the average legacy rate established for each clinic will be reimbursed as per the schedule located on the following webpage:

(ii) OPWDD transition schedule for the operating component of the rate:

(a) July 1, 2011 through June 30, 2012 - Blend of 75% average legacy rate and 25% APG;
(b) July 1, 2012 through June 30, 2013 - Blend of 50% average legacy rate and 50% APG;
(c) July 1, 2013 through December 31, 2013 - Blend of 25% average legacy rate and 75% APG; and
(d) Beginning on January 1, 2014, all subsequent payments will consist of 100% APG

APG payments for Article 16 clinics certified or operated by OPWDD will not reflect any additional investments beyond the APG payment.

Article 16 (OPWDD) Clinics follow the same reimbursement policy guidance as Article 28 (DOH) Clinics, with the following exceptions:

(i) Nutrition therapy services, whether delivered alone or with other services during the same visit, shall be reimbursed through the APG methodology.

(ii) Wheelchair evaluation services shall be reimbursed through the APG payment methodology.

(iii) Unlike Article 28 clinics, reimbursement of psychotherapy and developmental testing services delivered by licensed Social Workers within their scope of practice under state law shall not be limited to recipients who are dually eligible for Medicare. In an Article 16 clinic, a licensed social worker may deliver reimbursable services to Medicaid-only enrollees. All such psychotherapy and developmental testing services shall be reimbursed using the APG methodology.

(iv) Self-management education and training services, when delivered at certified clinic locations, will be reimbursed through the APG methodology. Such services may also be reimbursed when delivered at certified clinic locations to family members and other unpaid collateral caregivers for the purpose of enhancing, augmenting, and/or reinforcing ongoing treatment and clinical services to the patients. Self-management, education and training services are under APG 428 (Patient Education – Individual) and APG 429 (Patient Education – Group). These APGs presently include services described by CPT codes 98960-98962 and G0108-G0109.
(v) Article 16 (OPWDD) clinics may offer a wider variety of services delivered in group settings than Article 28 (DOH) clinics. The following Article 16 clinic services can be delivered in group setting and reimbursed through the APG payment methodology:

(a) Group Physical and Occupational Therapy (APG 274)
(b) Group Speech Therapy (APG 275)
(c) Group Psychotherapy (APG 310)
(d) Group Self-Management Education Services (APG 429)
(e) Nutrition therapy services (APG 118). In the case of nutrition therapy services, when claimed using HCPCS codes that specifically permit group services.

(vi) When explicitly ordered and referred by a physician, Article 16 clinics may use registered nurses (in addition to physicians, physician assistants, and nurse practitioners) to deliver preventive counseling services (procedure codes 99401-99404 and 99411-99412) within the scope of their competence. Such preventive counseling services need not be provided on the same day as a physician medical service.

(vii) Article 16 clinic facilities are not certified to provide laboratory and radiological services. As such the Article 28 ancillary services policy, which includes the costs of laboratory and radiology services within medical visit APG reimbursement, will not apply to Article 16 clinic facilities. In very limited instances such services are ordered by an Article 16 physician, the patient will be referred to an external provider and the ancillary service will be separately billed to Medicaid.

IV. Capital Costs:

If a visit includes a service which maps to an APG that allows a capital add-on, there will be a capital add-on to the operating component of the APG payment for the visit.

(1) For each visit, the capital cost component will be a fixed amount equal to the capital cost component of the clinic’s regular visit fee in effect on June 30, 2011 and can be found at the following webpage:

(2) A capital add-on is allowable for most APG claims and is payable on a per-visit basis. If the visit entails a specific APG or APG Procedure as a standalone, meaning that it is the only visit listed on the claim, then capital will not be reimbursed for this visit. The links for the “No Capital Add-on APG List” and the “No Capital Add-on Procedure List” can be found at the following webpage:

http://www.health.ny.gov/health_care/medicaid/rates/methodology/no_capital_add-on
http://www.health.ny.gov/health_care/medicaid/rates/methodology/no_capital_add-on_procedures

V. New Clinics:

Clinics that began or will begin operation on or after July 1, 2011 will be reimbursed in accordance with the OPWDD transition schedule, except that the average legacy rate across all OPWDD clinics, in the amount of $107.82, will be used in place of a clinic-specific rate when calculating the reimbursement during the transition period. These new clinics will be assigned a peer group, based on their geographical location, and receive a rate which is calculated the same as other clinics using a percentage of the state wide average legacy rate and the peer group APG. The aforementioned methodology includes the capital add-on rate of $6.16 for new clinics that was in effect on June 30, 2011.

The APG capital rate that is adjusted for the minimum wage add-on will be posted to the Mental Hygiene Services Rates webpage.

https://www.health.ny.gov/health_care/medicaid/rates/mental_hygiene/apg/capital_add_on.htm

The minimum wage add-on will be developed and implemented as follows:

a. Minimum wage costs will mean the additional costs incurred beginning January 1, 2018, and thereafter, as a result of New York state statutory increases to minimum wage.

   i. Minimum wage cost development based on survey data collected:

   1. Survey data will be collected for facility specific wage data.
   2. Facilities will report, by specified wage bands, the total count of FTEs and total hours paid to employees earning less than the statutory minimum wage applicable for each MW Region.
   3. Facilities will report an average fringe benefit percentage for the employees directly affected by the minimum wage increase.
   4. The minimum wage costs are calculated by multiplying the total hours paid by the difference between the statutory minimum wage and the midpoint of each wage band where the facility has reported total hours paid. To this result, the facility’s average fringe benefit percentage is applied and added to the costs.

   1. The average hourly wages of employees in occupational titles where the reported average hourly wage is below the regional statutory minimum wage are identified.
   2. The total payroll hours of the titles identified are then multiplied by the regional statutory minimum wage resulting in a projected payroll. The actual payroll as reported in the CFR cost report is then subtracted from the projected payroll resulting in the expected wage costs increase.

TN#18-0007  Approval Date 07/30/2018
Supersedes TN New  Effective Date 01/01/2018
3. The facility’s fringe benefit costs directly affected by the wage increase are identified, and the average fringe benefit percentage is calculated.
4. The fringe benefit percentage is applied to the increased wage costs and added resulting in the minimum wage costs.
5. Overtime will be applied based on prior years historical experience.

b. The 2018 minimum wage costs will be developed based on collected survey data received and attested to by clinics. If a clinic did not submit a survey, its minimum wage costs will be calculated based on 2016 CFR cost report wage data. If a clinic fails to submit both the survey and the 2016 CFR cost report, its minimum wage add-on will not be calculated.

c. In the subsequent years until the minimum wage is completely implemented statewide, the Department will survey clinics utilizing the methodology employed in year one. If a clinic fails to submit the minimum wage survey, the calculation for minimum wage costs will default to the use of the personnel wage data reported on the statewide latest available CFR. If a clinic fails to submit both the survey and the latest CFR, its minimum wage add-on will not be calculated. Once the minimum wage costs are included in the development of the upstate/downstate APG base rate, the minimum wage add-on will be excluded from the rate.

d. A minimum wage add-on will be developed by dividing minimum wage costs, pursuant to subdivision (a) above, by the total clinic visits as reported in the provider’s 2016 CFR cost report to determine an average add-on cost per visit. The add-on will be paid over Medicaid clinic visits.

e. Minimum Wage Reconciliation - After the end of each calendar year, the Department of Health will survey providers to obtain the following information for the purpose of reconciling the annual minimum wage add-on reimbursement provided for in subdivision (d) above. The state will release the reconciliation survey by the end of March and providers will have two weeks to complete the survey or request an extension if a provider determines it is unable to complete the survey within that time. Approval of extensions, and the time of the extension, is at the discretion of the state. If the reconciliation survey is not submitted within the two weeks or within the extension time frame, should one be granted, the provider’s minimum wage add-on for the calendar year covered by the survey will be recouped.

i. Total annual minimum wage funding paid to the provider (as determined from the minimum wage add-on to claims paid for services rendered in the prior calendar year) for the Medicaid share of the minimum wage law increase requirement. The Medicaid share of the annual minimum wage funding will be supplied in the reconciliation survey by the Department of Health. Medicaid’s share is defined as the percentage of minimum wage costs that are attributable to Medicaid services based on the proportion of Medicaid services to a provider’s total services.
ii. Medicaid’s share of the total amount the provider was obligated to pay to bring salaries up to the minimum wage for the calendar year. (This information will be completed by the provider.)

iii. Minimum wage funds to be recouped or additional funds to be received by the provider. (This information will be completed by the provider.) This will equal the difference between the amount paid to the provider for the Medicaid share of the minimum wage law increase requirement and the actual amount the provider was obligated to pay.

iv. The Department will review providers’ submissions for accuracy and reasonableness, following which it will process associated payments and recoupments via retroactive per unit rate adjustments as quickly as practical thereafter.

v. The provider’s Chief Executive Officer or Chief Financial Officer must sign an Attestation verifying the data that is supplied in the survey.
Upper Payment Limit

The State, in order to comply with the Upper Payment Limit (UPL) regulations at 42 CFR 447.321, will mandate the following for all clinics licensed by the NY State Department of Health, Office of Mental Health, [Office of Mental Retardation and] Office for People with Developmental Disabilities, and the Office of Alcoholism and Substance Abuse Services.

• All clinic providers will prepare and file cost reports. For clinics with costs of $100,000 or more, the cost reports must be independently audited for cost and visits data. Those clinics that do not submit an independently audited cost report with costs below $100,000 will be given no UPL margin in the UPL calculations. If a clinic fails to submit an Ambulatory Health Care Facility (AHCF) or Consolidated Fiscal Report (CFR) cost report, or the cost report is incomplete, the payments will be included in the Medicaid side of the UPL calculation without any proxy for costs;

• The State will issue notices to all clinic providers no later than December 31, 2009, that providers must maintain beneficiary “threshold visit” data for all payers, in a format that will be independently audited and reported on the provider’s annual cost report and/or as a supplemental report for all cost reporting periods beginning on or after January 1, 2010;

• All clinic claims will be subjected to appropriate eMedNY payment edits, which will deny a claim for incorrect and/or inaccurate billing and coding information, starting no later than December 31, 2009;

• The aggregate UPL for each category of clinic (private, state owned or operated, non-state government owned or operated) will be calculated using an average cost per visit or such other method that may be authorized by federal statute or regulation;

• All costs must be costs that would be allowable using Medicare cost reporting and allocation principles;

• The State will remove all costs and payments associated with services that do not meet the definition of a clinic as described in 42 CFR 440.90, for example, transportation, in-home services, etc.;

• The State will provide a progress report to Centers for Medicare and Medicaid Services (CMS) by June 30, 2011 on eMedNY editing, claims coding, and the cost reporting process;

• The State will submit an addendum to the July 12, 2012 progress report by September 30, 2013 to include the status of providers who submitted 2010 and 2011 audited cost reports, and such audited reports will be provided to CMS based on CMS’ sample; and

• The State will submit a full UPL for calendar year 2018 using [2011] 2017 cost data by [December] March 31, [2013]2018. However, if the state makes the following corrective
New York
2(u.1)

actions to address data deficiencies sooner than this time frame it may submit a UPL for CMS review and approval for the period in which the deficiencies were corrected:

a) Add a page to the Consolidated Fiscal Report (CFR) with utilization statistics by payer similar to Exhibit 1 G&S Information D of the AHCF cost report in order to help ensure total visits are reported for all payers;

b) Update the CFR instructions to define an Opioid Treatment Program (OTP, formerly referred to as Methadone Maintenance Treatment Program (MMTP)) threshold visit to ensure concurrence with Medicaid visits per Medicaid Management Information System (MMIS);

c) The State will review, and if applicable, update the instructions for all other services to ensure threshold visits per cost report are consistent with Medicaid per the MMIS;

d) The State will review the reporting of costs and threshold visits in the cost report for ordered ambulatory services and billing units in MMIS to ensure that ancillary services can be separately identified for ordered ambulatory facilities. If the distinction cannot be made, they are to be considered services for patients in the clinic and, as such, the UPL should include all ancillary costs and applicable MMIS payments with no corresponding visit count; and

e) The costs for ancillary services that are provided by the same clinic that provided the medical visit (as opposed to ordered ambulatory ancillary services in paragraph d) will be included in the costs on the clinic’s cost report. Only one “threshold visit” will be reported that corresponds to the costs provided for the entire visit (medical visit plus ancillary services).
Upper Payment Limit (UPL) Payments for Diagnostic and Treatment Centers (DTCs)

1. **New York City Health and Hospitals Corporation (HHC) operated DTCs**

   Effective for the period [August 1, 2010] April 1, 2011 through March 31, 2012 [2011], the Department of Health will increase medical assistance rates of payment for diagnostic and treatment center (DTC) services provided by public DTCs operated by the New York City Health and Hospitals Corporation (HHC), at the annual election of the social services district in which an eligible DTC is physically located. The amount to be paid will be $12.6 million on an annualized basis.

   Medical assistance payments will be made for patients eligible for federal financial participation under Title XIX of the federal Social Security Act based on each diagnostic and treatment center's proportionate share of the sum of all clinic visits for all facilities eligible for an adjustment for the base year two years prior to the rate year. Such proportionate share payments may be added to rates of payment or made as aggregate payments to each eligible HHC diagnostic and treatment center.

2. **County Operated DTCs and mental hygiene clinics**

   Effective for the period [August 1, 2010] April 1, 2011 through March 31, 2012 [2011], the Department of Health will increase the medical assistance rates of payment for county operated DTCs and mental hygiene clinics, excluding those facilities operated by the New York City HHC. Local social services districts may, on an annual basis, decline such increased payments within thirty days following receipt of notification. The amount to be paid will be $5.4 million on an annualized basis.

   Medical assistance payments will be made for patients eligible for federal financial participation under Title XIX of the federal Social Security Act based on each diagnostic and treatment center's proportionate share of the sum of all clinic visits for all facilities eligible for an adjustment for the base year two years prior to the rate year. Such proportionate share payments may be added to rates of payment or made as aggregate payments to each eligible county operated diagnostic and treatment center and mental hygiene clinic.
New York
2(w)

Behavioral Health Utilization Controls – Freestanding Clinics

Effective April 1, 2011, each of the New York State mental hygiene agencies - the Office of Mental Health (OMH), the Office of Alcoholism and Substance Abuse Services (OASAS), and the Office for People with Developmental Disabilities (OPWDD) - will establish utilization thresholds for their freestanding clinics. These thresholds will target unusually high utilization with payment reductions and will be established by the licensing state agency as follows:

For Article 16 clinics licensed by OPWDD, Medicaid payments shall be subject to the following reductions:

Service categories and corresponding peer-based monthly utilization thresholds are established as follows: nutrition/dietetics, 2.08; speech language pathology, 4.33; occupational therapy, 4.08; physical therapy, 5.25; rehabilitation counseling, 3.25; individual psychotherapy, 3.08; and group psychotherapy, 3.17.

Using Medicaid paid claim history, OPWDD will annually compare each Article 16 clinic's monthly utilization rates for the applicable utilization look-back period (as defined later in this section) to the established threshold values for each service category. If the service category threshold was exceeded, OPWDD will calculate the number of visits paid in excess of the threshold value. For the purposes of this section, each unique paid Article 16 Medicaid claim for service rendered during the applicable utilization look-back period shall constitute a "visit." The service category monthly utilization rate and excess paid visits shall be calculated for each clinic as follows:

**Service Category Visits** shall be the number of paid Medicaid visits within the service category rendered by the clinic during the look-back period. Visits associated with Medicaid recipients who received fewer than four paid visits in a service category during the look-back period will be excluded from this calculation.

**Service Category Recipient Months** shall be the count of unique individuals for whom a claim was paid for services rendered during each specific calendar month of the look-back period. For example, a Medicaid recipient who received paid physical therapy services during each month of a twelve month look-back period contributes 12 recipient months to the clinic's total recipient months. A Medicaid recipient who received paid physical therapy services in only three calendar months within the same twelve month look-back period contributes three recipient months to the clinic's total recipient months. Medicaid recipients who received fewer than four paid visits in a service category during the look-back period shall be excluded and will contribute zero recipient months to the clinic's total recipient months.
**Service Category Monthly Utilization Rate** shall be equal to the service category visits divided by the service category recipient months.

**Service Category Excess Visits.** If the clinic's service category monthly utilization rate was below the established threshold, the service category excess visits shall be zero. Otherwise, the service category excess visits shall be equal to the difference between service category monthly utilization rate and the service category threshold, multiplied by the service category recipient months. That is, excess visits = (monthly utilization rate – threshold) * recipient months.

Each clinic's excess visits will be summed across all service categories and calculated as a percentage of total paid Article 16 Medicaid visits (claims) for the look-back period. For this purpose, the divisor, "total paid Article 16 Medicaid visits," shall be a count of all unique claims paid under Article 16 rate codes during the look-back period; it may include visits for services for which threshold values have not been established (e.g., psychological and developmental testing visits). The reimbursement rates of clinics with excess visits shall be reduced by a uniform percentage as follows:

<table>
<thead>
<tr>
<th>Total Excess Visits As % Of Total Paid Visits</th>
<th>Percent Rate Reduction</th>
</tr>
</thead>
<tbody>
<tr>
<td>15.1% or more</td>
<td>5.00%</td>
</tr>
<tr>
<td>10.1% to 15.0%</td>
<td>4.25%</td>
</tr>
<tr>
<td>5.1% to 10.0%</td>
<td>3.50%</td>
</tr>
<tr>
<td>1.0% to 5.0%</td>
<td>2.75%</td>
</tr>
<tr>
<td>Less than 1.0%</td>
<td>0.00%</td>
</tr>
</tbody>
</table>

For the period April 1, 2011, to June 30, 2011, the percentage rate reductions shall be applied to the rates established for each of the twelve visit types authorized by OPWDD regulations during that period. For the period beginning July 1, 2011, onward, the percentage rate reductions shall be applied to the clinic's Article 16 APG base rate, Article 16 APG average legacy fee, and the Article 16 APG capital add-on.

Utilization look-back periods associated with each rate reduction period shall be as follows:

<table>
<thead>
<tr>
<th>Rate Reduction Period (State Fiscal Year)</th>
<th>Utilization Look-back Period</th>
</tr>
</thead>
<tbody>
<tr>
<td>4/1/2012 to 3/31/2013</td>
<td>7/1/2011 to 12/31/2011</td>
</tr>
<tr>
<td>4/1/2013 to 3/31/2014</td>
<td>10/1/2011 to 9/30/2012</td>
</tr>
</tbody>
</table>
Beginning state fiscal year 2014-2015, and each subsequent state fiscal year thereafter, the utilization look-back period shall be the period used in the preceding state fiscal year advanced by twelve months.

For the period April 1, 2011, through March 31, 2012, OPWDD may waive the reimbursement rate reductions described here, provided, however, that the waiver will be subject to retroactive revocation upon a determination by OPWDD, in consultation with the Department of Health, that the clinic has not complied with the terms of such waiver. Such terms are:

(i) In order to receive a waiver, a clinic must submit to OPWDD a request for a waiver and a utilization reduction plan. OPWDD's decision on the waiver will be based on whether the clinic's utilization reduction plan shows a reduction in the clinic's planned state fiscal year 2011-2012 Medicaid visits by an amount equal to the paid visits in excess of the utilization thresholds and whether the clinic is operating in conformance with all applicable statutes, rules and regulations. For purposes of this section, a clinic's planned state fiscal year 2011-2012 visits cannot exceed its paid Medicaid visits in calendar year 2010.

(ii) OPWDD will compare the actual paid and planned visits between April 1, 2011 and March 31, 2012 for each clinic granted a waiver. If a clinic fails to achieve the reduction in utilization in accordance with its utilization reduction plan, OPWDD will revoke the waiver and reduce the clinic's reimbursement rates for state fiscal year 2011-12 as computed in accordance with the provisions of this section, provided, however, that such reduction computation will incorporate and reflect any utilization reduction that the clinic did achieve while operating under the waiver.
For freestanding Article 31 clinics licensed by OMH and Article 31 clinics in or operated by Diagnostic and Treatment Centers licensed under Article 28 of the Public Health Law, Medicaid payments shall be subject to the following reductions:

1. For persons 21 years of age or older at the start of the state fiscal year, payment for the 31st through 50th visits in a state fiscal year at one or more clinics operated by the same agency will be subject to a 25% reduction in the otherwise applicable payment amount.

2. For persons 21 years of age or older at the start of the state fiscal year, payment for visits in excess of 50 in a state fiscal year at one or more clinics operated by the same agency will be subject to a 50% reduction in the otherwise applicable payment amount.

3. For persons less than 21 years of age at the start of the state fiscal year, payment for visits in excess of 50 in that state fiscal year at one or more clinics operated by the same agency will be subject to a 50% reduction in the otherwise applicable payment amount.

4. Off-site visits (rate codes 1519 and 1525), medical visits (rate codes 1588 and 1591) and crisis visits (rate codes 1576 and 1582), when billed under their applicable rate codes, will be disregarded in computing the number of visits pursuant to the preceding paragraphs. For off-site visits provided by OMH-licensed clinics to homeless individuals, Medicaid will only claim expenditures for off-site clinic services when the services meet the exception in 42 CFR 440.90(b) that permits Medicaid payment for services furnished outside of the clinic by clinic personnel under the direction of a physician to an eligible individual who does not reside in a permanent dwelling or does not have a fixed home or mailing address. Off-site services provided by OMH-licensed clinics to other than homeless individuals may be reimbursed with State-only funding and will not be claimed for federal financial participation.
For freestanding Article 32 clinics licensed by OASAS, Medicaid payments will be subject to the following per person reductions:

1. Payment for the 76th through 95th visits in a state fiscal year at one or more clinics operated by the same agency will be subject to a 25% reduction in the otherwise applicable payment amount.

2. Payment for visits in excess of 95 in a state fiscal year at one or more clinics operated by the same agency will be subject to a 50% reduction in the otherwise applicable payment amount.
Integrated Licensing Program - Freestanding Clinics Licensed by the Office of Mental Health (OMH)

Effective January 1, 2013 through December 31, 2017, the new Integrated Licensing Program (ILP) reimbursement methodology is established for authorized providers providing integrated physical health, behavioral and/or substance abuse services at freestanding clinic sites licensed pursuant to Article 31 of the Public Health Law. The following providers’ hospital outpatient departments are authorized to participate in the ILP:

- Citizen Advocates, Inc (NPI 1780619064, Loc Code 003, 004, 005, 015, 016)
- The Institute for Community Living (NPI 1558494930, Loc Code 004)

For the time period in which the ILP is in effect, authorized providers have access to a new clinic base rate that is equal to 105% of the facility’s usual base rate; with the new base rate reimbursed only at authorized sites where integrated physical, behavioral and/or substance services were available. Payment amounts are determined via the usual Ambulatory Patient Group reimbursement methodology, utilizing the applicable base rate and the procedure(s) and diagnose(s) codes submitted on each claim.

The goal of the Integrated Licensing Program was to facilitate and promote the availability of physical, behavioral and/or substance abuse services at authorized hospital-based clinic sites, in order to: economize the number of visits for patients with co-morbidities; provide more comprehensive, integrated care; improve health outcomes and decrease rates of utilization of emergency room and inpatient services. Individuals with serious mental illness and/or addictions at these sites had the opportunity to receive an integrated array of care at the same location to address a range of physical, mental, and/or behavioral healthcare needs.
Lactation Consultation Services

Effective September 1, 2012, reimbursement will be provided to free-standing clinics and hospital outpatient departments for breastfeeding health education and counseling services based upon the Ambulatory Patient Group (APG) reimbursement methodology. Date of implementation will occur on the first day of the month following 30 days after Federal approval of this provision of the State Plan. Procedure codes (S9445 and S9446) have been added to the fee schedules and the APG payment methodology.
**Collaborative Care Services**

**Reimbursement for Freestanding Clinics and Hospital Outpatient Departments**

Effective January 1, 2015, reimbursement will be provided to freestanding clinics and hospital outpatient departments licensed under Article 28 of the Public Health Law for Collaborative Care Services for patients diagnosed with depression in the form of a monthly case rate, specified below. Effective January 1, 2018, reimbursement will be provided to such providers for Collaborative Care Services for patients with other mental illness diagnoses at the same rates. Reimbursement shall be the same for both governmental and non-governmental providers.

<table>
<thead>
<tr>

</tr>
<tr>
<td>5248</td>
<td>Collaborative Care Retainage Monthly - Year 1</td>
<td>$37.50</td>
</tr>
<tr>
<td>5249</td>
<td>Collaborative Care Retainage Monthly - Year 2</td>
<td>$25.00</td>
</tr>
</tbody>
</table>

*Twenty-five percent of the full monthly case rate will be withheld by the State and reimbursed to the provider in the form of a monthly retainage payment based on criteria specified below. The monthly withholding during year one is $37.50, resulting in a net monthly case payment of $112.50. The monthly withholding during year two is $25.00, resulting in a net monthly case payment of $75.00.*

Providers shall be eligible to receive the monthly Collaborative Care Retainage withheld by the State after the patient has been enrolled in the Collaborative Care program for a minimum of three months and if one of the following criteria is met:

1. **Demonstrable clinical improvement as defined by a decrease in the patient’s baseline score on the PHQ-9, GAD-7, or other applicable evidenced-based assessment tool as further described in OMH guidelines available at https://www.omh.ny.gov/omhweb/medicaid_reimbursement.**

2. In cases where there is no demonstrable clinical improvement as described in criterion 1, there must be documentation in the medical record of one of the following:
   a. Psychiatric review of the case by the designated consulting psychiatrist with either the care manager or primary care provider and a recommendation to change the treatment plan; or
   b. A change in treatment plan.

After completion of a patient’s third month of enrollment, providers who have met one of the criteria above may be reimbursed a lump sum for the first three months of Collaborative Care Retainage withheld and the monthly retainage withheld in each additional month of treatment, up to the completion of 12 months of treatment.

If a provider receives approval to provide Collaborative Care Services for an additional 12 months, the provider shall not be eligible to receive the Collaborative Care Retainage withheld until after the completion of three months and subject to the same eligibility requirements as in the first 12 months.
Effective January 1, 2013 through December 31, 2017, the new Integrated Licensing Program (ILP) reimbursement methodology is established for authorized providers providing integrated physical health, behavioral and/or substance abuse services at freestanding clinic sites licensed pursuant to Article 32 of the Public Health Law. The following providers’ freestanding clinic sites are authorized to participate in the ILP:

- Mental Health Service of Erie County (NPI 1265607022, Loc Code 021)

For the time period in which the ILP is in effect, authorized providers have access to a new clinic base rate that is equal to 105% of the facility's usual base rate; with the new base rate reimbursed at authorized sites where integrated physical, behavioral and/or substance services were available. Payment amounts are determined via the usual Ambulatory Patient Group reimbursement methodology, utilizing the applicable base rate and the procedure(s) and diagnose(s) codes submitted on each claim.

The goal of the Integrated Licensing Program was to facilitate and promote the availability of physical, behavioral and/or substance abuse services at authorized clinic sites, in order to: economize the number of visits for patients with co-morbidities; provide more comprehensive, integrated care; improve health outcomes and decrease rates of utilization of emergency room and inpatient services. Individuals with serious mental illness and/or addictions at these sites had the opportunity to receive an integrated array of care at the same location to address a range of physical, mental, and/or behavioral healthcare needs.
Temporary Rate Adjustments for Mergers, Acquisitions, Consolidations, Restructurings, and Closures - FQHC’s

A temporary rate adjustment will be provided to eligible freestanding clinic providers that are subject to or impacted by the closure, merger, and acquisition, consolidation, or restructuring of a health care provider. The rate adjustment is intended to:

- Protect or enhance access to care;
- Protect or enhance quality of care; or
- Improve the cost effectiveness.

Eligible providers, the annual amount of the temporary rate adjustment, and the duration of the adjustment shall be listed in the table which follows. The total annual adjustment amount will be paid quarterly with the amount of each quarterly payment being equal to one fourth of the total annual amount established for each provider. The quarterly payment made under this section will be an add-on to services payments made under this Attachment to such facilities during the quarter.

To remain eligible, providers must submit benchmarks and goals acceptable to the Commissioner and must submit periodic reports, as requested by the Commissioner, concerning the achievement of such benchmarks and goals. Failure to achieve satisfactory progress in accomplishing such benchmarks and goals will result in termination of the provider’s temporary rate adjustment prior to the end of the specified timeframe. Once a provider’s temporary rate adjustment ends, the provider will be reimbursed in accordance with the otherwise applicable rate-setting methodology as set forth in this Attachment.

Temporary rate adjustments have been approved for the following providers in the amounts and for the effective periods listed:

Federally Qualified Health Centers (FQHCs) Safety Net Payment

1. For the period July 28, 2016, through March 31, 2017, $127,600,000 of additional payments, and for annual state fiscal years thereafter, $92,650,000 of additional payments will be made to eligible Medicaid safety net Federally Qualified Health Centers (FQHCs) to sustain access to services. The amount of $92,650,000 is subject to modification by the transfers described in paragraphs (2) and (3) of this section.

a. "Eligible Medicaid safety net Federally Qualified Health Centers", for purposes of this section, will mean voluntary non-profit and publicly sponsored diagnostic and treatment centers licensed under Article 28 or Article 31, and must meet the following criteria: deliver comprehensive range of health care services; provide at least 5% of their annual visits to uninsured individuals; have a process in place to collect payment from third party payers; and received Federally Qualified Health Center or Rural Health Center status from the Health Resources & Services Administration (HRSA).

b. The base year data used for the period commencing on July 28, 2016 through March 31, 2017 will be the 2014 certified cost report and will be advanced one year thereafter for each subsequent period. In order to be included in the distribution calculation, a provider must timely submit a certified cost report for the base year used in the distribution calculation.

c. New providers which do not have a full year cost or visit experience in the base year used for the distribution may qualify to be included in the distribution as follows:

i. The provider meets the criteria in paragraph (1)(a).

ii. The provider must be eligible to receive a Medicaid rate in New York State.

iii. The provider must submit a request to the Department of Health to participate in the distribution. This request must include annualized patient visits, by payer source, which are certified by the Chief Executive Officer, or a similar executive position.

iv. The effective date to be included in the distribution will be the first state fiscal year distribution calculation after the provider qualifies to be included based on the requirements in paragraphs (1)(c)(i) through (1)(c)(iii) (herein after referred to as paragraph (1)(c)) or the first state fiscal year distribution calculation after the date a request is made to the Department of Health to be included in the distribution, whichever is later.

v. The distribution method applied to a new provider that qualifies to be included in the distribution based on paragraph (1)(c) of this section will be in accordance with the distribution method for other providers in this section. However, the annual distribution for a provider that qualifies based on paragraph (1)(c) of this section will not exceed $100,000.

vi. The distribution for a provider that qualifies based on paragraph (1)(c) of this section will be included in the total safety net distribution amount as described in paragraph (1) of this section.
**Federally Qualified Health Centers (FQHCs) Safety Net Payment**

e. Safety net payments will be calculated by multiplying each facility's rate add-on, based on the tiers in paragraph (1)(d), by the number of Medicaid fee-for-service and Medicaid managed care visits reported in the base year certified cost report.

f. The safety net rate adjustment for each eligible FOHC that is determined based on the tier system will be scaled based on the ratio of the total funds allocated for distribution, using the tier system, to the total statewide safety net payment that is available for all eligible FOHCs.

g. The payments for this alternative payment method, which are made pursuant to this section, will be made quarterly as aggregate payments to eligible FOHCs and will not be subject to subsequent adjustment or reconciliation.

2. In the event that a provider that is included in the Diagnostic and Treatment Centers (D&TCs) Safety Net Payment State Only program receives FOHC designation during a state fiscal year, the newly designated FOHC will be removed from the D&TCs Safety Net Payment State Only program and included in this section as follows:

a. The effective date of the transfer will be the later of the following:

i. The first state fiscal year distribution calculation after the FOHC designated approval date; or

ii. The first state fiscal year distribution calculation after the date the Department of Health is notified of the FOHC designation.

b. The funds that were allocated to the new FOHC provider in the D&TCs Safety Net Payment State Only program will be transferred to this FOHCs Safety Net Payment section based on the prior state fiscal year calculation distribution.

---

**TN #16-0046 _____ Approval Date _December 14, 2016__________**

**Supersedes TN #NEW _____________ Effective Date _July 28, 2016____________**
Federally Qualified Health Centers (FQHCs) Safety Net Payment

i. The transfer of funds will occur at the same time the newly designated FQHC provider is included in this FQHCs Safety Net Payment section distribution.

ii. Due to the transfer of the newly designated FQHC’s funds to this FQHCs Safety Net Payment section, the total value of the additional payment, as described in paragraph (1) of this section for the additional annual payment, will increase.

C. In no event will the sum of the total safety net distribution amount of the FQHCs Safety Net Payment in this section and the D&TCs Safety Net Payment State Only program exceed $151,500,000 for the period July 28, 2016, through March 31, 2017, and $110,000,000 for the annual state fiscal periods thereafter.

i. At the time each state fiscal year distribution is developed, the Department of Health will report to the Centers for Medicare and Medicaid Services the providers that have received or lost FOHC designation and the funds transferring between the FQHCs Safety Net Payment in this section and the D&TCs Safety Net Payment State Only program.

3. In the event that a provider that is included in this FQHCs Safety Net Payment section loses its FQHC designation, the FQHCs Safety Net Payment distribution to the provider, that was calculated for the state fiscal year in which the date falls of when the provider lost its FQHC designation, will be reduced as follows:

a. The distribution pertaining to the Medicaid managed care visits and the distribution pertaining to the Federal Financial Participation portion of the Medicaid fee-for-service visits applied to the tier add-on payment will no longer be paid to the provider as of the date the FOHC loses its designation. The remaining portion of the distribution pertaining to the Medicaid fee-for-service visits after the Federal Financial Participation will be paid as a State Only payment.

b. The amount of the reduction of the distribution to the provider will be calculated based on the number of days remaining in the distribution period from the date the FQHC loses its designation.

c. The funds from paragraphs 3(a) and 3(b) will be preserved until the fourth quarterly aggregate payment as the provider may regain their FQHC designation during the same state fiscal year and would then be entitled to their distribution from the date they regained the FQHC designation.

d. In the event the provider does not regain their FQHC status, any remaining funds pertaining to the Medicaid managed care visits from paragraphs (3)(a) and 3(b) of this section will be redistributed to the other eligible FQHC providers based on the proportion of their distribution to the total distribution and included in the fourth quarterly aggregate payment. The remaining funds pertaining to the Federal Financial Participation portion of the Medicaid fee-for-service visits will not be redistributed.
Federally Qualified Health Centers (FQHCs) Safety Net Payment

e. The provider will be removed from the distribution calculated in the FQHC Safety Net Payment section and included in section for the D&TCs Safety Net Payment State Only program in the first state fiscal year distribution calculation subsequent to the date they lost their FQHC designation.

f. The funds allocated to the provider in this FQHC Safety Net Payment section will be transferred to the D&TC Safety Net Payment State Only program based on the portion of the distribution pertaining to the Medicaid fee-for-service visits applied to the tier add-on payment. The transfer of funds will be at the same time the provider is included in the D&TC Safety Net Payment State Only program distribution, as stated in paragraph (3)(e) of this section, decreasing the total value of the additional payment as described on paragraph (1) of this section.
Attachment 4.19-B

New York

TYPE OF SERVICE - METHOD OF REIMBURSEMENT
Ambulatory Services in Facilities Certified Under Article 16 of the State Mental Hygiene Law:

OPW[MR]DD Clinic Treatment Program
(Programs certified by OPW[MR]DD pursuant to 14 NYCRR Part 679)

For freestanding outpatient providers, OPW[MR]DD will establish statewide cost related flat fees. Fees will be assigned based on provider specific actual base year costs of budgets which correspond to the fiscal cycle of the provider. All fees are subject to approval by the Division of the Budget.

The above provision sunsets effective June 30, 2011. Effective July 1, 2011, these facilities will be reimbursed under the APG methodology, see: APG Reimbursement Methodology section.

OPW[MR]DD Clinic Day Treatment Program
(Programs certified by OPW[MR]DD pursuant to 14 NYCRR Part 690)

The below reimbursement methodology as outlined in Fee Setting 1-11 below, sunsets effective December 31, 2016.

Site specific, variable, per diem fees, which are cost related and developed as follows:

Fee Setting
(1) For the purpose of setting the Day Treatment fee, units of service shall include the total number of half day units of service (more than three hours but less than five hours), the number of full day units of service (five hours or more) and less than half day units of service (such as in the amount of one and a half hour (1 1/2)). Units of service are billable in the above amounts. Billable services include the initial contact visit, enrollment for completing a preliminary screening, and services for individuals formally admitted to the Day Treatment program.

(i) Units of service for the fee setting calculation shall utilize projected or actual units of service as follows:

(a) For non-State operated Day Treatment programs in Regions II or III, including those programs in Region I designated or elected to a Region II or III reporting year-end and fiscal cycle, the April 1, 1991 through December 31, 1991 fee setting calculation shall utilize actual units of service from the January 1, 1988 through December 31, 1988 cost report. For non-State operated Day Treatment programs in Region I, including those programs in Region II and III designated or elected to a Region I reporting year-end and fiscal cycle, the July 1, 1991
attachment 4.19-b

new york
3a

to june 30, 1992. fee setting calculation shall utilize actual units of service from the july 1, 1988 through june 30, 1989 cost report. for state operated day treatment programs, the april 1, 1991 through march 31, 1992 fee setting calculation may utilize actual units of service from the april 1, 1989 through march 31, 1990 cost report.

(b) for the january 1, 1992 through december 31, 1992, april 1, 1992 through march 31, 1993 and july 1, 1992 through june 30, 1993 fee setting calculations, and thereafter actual units of service shall be from the most recent cost report submitted two years prior to the period for which the fee is being set. for programs for which omrdd has not received such cost report at the time of the fee-setting calculation, omrdd shall utilize the units of service paid for through the medicaid management information system (mmis) during the required cost report period.

(c) projected units of service shall mean the estimated monthly attendance multiplied by the expected number of days the program will be open for each month. this computation shall be made for each month, and summed for the number of months in the fee period and annualized. projected units of service will be used in the absence of actually units of service from cost reports identified above. projected units of service will be required upon issuance of an operating certificate for a new site or an amended operating certificate reflecting a change in capacity. projected units of service shall be utilized for fee-setting purposes until a full-year cost report, subsequent to the cost report period in which the issuance of an operating certificate for a new site occurred, is used for fee-setting purposes. projected units of service shall also be utilized for fee-setting purposes until a full-year cost report, subsequent to the cost report period in which the change in capacity occurred, is utilized for fee-setting purposes. if the estimated units of service have not been received by omrdd by the date required, omrdd shall utilize the units of service paid for through the mmis, beginning with the program’s initial certification or the first full month since the change in certified capacity occurred. if the available mmis units of service are for less than a twelve month period, they shall be annualized for fee-setting purposes.

(2) the fee for day treatment programs shall be a fixed amount plus operating, capital and transportation component add-ons. the fixed amount and operating component add-ons shall reflect base period costs and shall be subject to trend factors as approved by the commissioner. all dollar amounts cited herein shall reflect costs for the base period of january 1, 1988 through december 31, 1988.
Attachment 4.19-B

New York
3a1

(i) The operating component add-ons shall be case mix, case mix intensity, salary, staff training and utilities. In addition, non-state operated Day Treatment programs that have submitted cost reports that contain full year costs for the periods January 1, 1988 through December 31, 1988, and July 1, 1988 through June 30, 1989, and state operated Day Treatment programs which have submitted cost reports that contain full year costs for the period April 1, 1989 through March 31, 1990 shall be eligible to qualify for either a cap adjustment component add-on or an allocation adjustment component add-on. In addition, non-state operated Day Treatment programs in Region II and II that participated in the Salary Enhancement plan pursuant to previously approved State Plan Amendment 88-48 shall also receive a salary enhancement cost adjustment component add-on. Operating component add-ons shall reflect base year costs and shall be subject to a trend factor.

(ii) The capital component shall include property, equipment, and start-up costs. The capital component will not be subject to trend factor.

(iii) Non-state operated Day Treatment programs in Regions II and III including those non-state operated Day Treatment programs in Region I designated or elected to a Region II or III reporting year end and fiscal cycle shall also receive an annualization cost component add-on for the period April 1, 1991 through December 31, 1991.

(iv) The fixed amount shall be $36.67. Effective July 1, 1996, the product of the administration component of the fixed fee times the units of service shall be reduced by an efficiency adjustment as described in this Attachment at subsection (9).

(v) Effective July 1, 1996, there shall be a separate transportation component add-on to the program’s fee as described in this Attachment at subsection (10).

(vi) The operating component add-ons shall be computed. Such component add-ons shall be added to the fixed amount.

(a) Case Mix Component - The Developmental Disabilities Profile (DDP) shall be completed for each person attending the Day Treatment program. The individual’s adaptive, maladaptive, and health/medical DDP scores shall be assigned as appropriate to its corresponding DDP percentile level grouping. The case mix component add-on will be calculated utilizing the

TN     #97-09                      Approval Date     May 6, 1997
Supersedes TN  #96-39               Effective Date    January 1, 1997
highest DDP score for each individual. Corrected or updated DDP scores shall be implemented in accordance with paragraph (5) of Attachment 4.19-B Page 3h of this State Plan. The total number of persons assigned to each percentile level grouping shall be multiplied by the dollar amount associated with that percentile level grouping. Total dollars for each percentile level shall be summed together and divided by the number of persons for whom there are DDP scores.

**(b)** Case Mix Intensity Component Add-On: The highest single DDP percentile ranking for each individual program participant in any one of the three DDP scoring categories, adaptive, maladaptive and health/medical, shall be summed and divided by the total number of program participants with DDP scores, yielding an average percentile level grouping for each program. The Day Treatment program shall receive the per person dollar amount associated with the identified average percentile level grouping.

**(c)** Staff Training Component - The add-on shall be $.32.

**(d)** The Utilities Component shall be the amount of utilities as reported in the appropriate cost report identified in paragraph (1), divided by the units of service.

1. The utilities amount shall reflect the costs on an annual basis trended by an amount to be determined by the commissioner.

2. A day treatment program shall receive the statewide median for utilities if the most recent cost report identified by paragraph (1) is not available, or does not cover the full period of the cost report.

3. Utilities may be updated to reflect actual costs and/or cost increases due to expansion of the physical plant.

**(e)** Salary Component - The salary component of the fee shall be computed as follows:

1. An agency specific salary per FTE shall be computed for each agency. The agency specific salary per FTE shall be calculated as follows: For non-State operated Day Treatment programs that filed full year cost reports for either the January 1, 1988 through December 31, 1988 or July 1, 1988 through June 30, 1989, the total

---

TN #91-29

Supersedes TN #89-33

Approval Date December 8, 1992

Effective Date April 1, 1991
through December 31, 1986, whichever cost report period is applicable, or did not have a full 12 months of operation during the applicable period shall receive the regional average for utilities. For state operated programs the utilities adjustment shall be 1.0987. Reported utilities shall be from the cost report for the period April 1, 1985 through March 31, 1986. Day Treatment programs that did not submit a full cost report for the period April 1, 1985 through March 31, 1986 or did not have a full 12 months of operation during that period shall receive the regional average for utilities.

(f) **Start-Up Component** - This add-on shall be the amount of those cost incurred from the period the provider receives approval pursuant to the certification of need process, for a facility to become a Day Treatment program, to the date the first client is admitted. OMRDD, may at the discretion of the commissioner, reimburse a facility for all allowable start-up costs incurred in the preparation of the facility during that six month period prior to the date of the first client admission.

(1) A facility may apply to the commissioner for an extension of the six month reimbursable start-up period, provided the facility can demonstrate why such an extension is necessary. However, under no circumstances shall a facility be allowed reimbursement of start-up costs for any period of time exceeding 18 months prior to the date of the first client admission.

__TN #89-33________________ Approval Date __March 5, 1991________
Supersedes TN __NEW______________ Effective Date __July 1, 1989__________
agency Day Treatment non contracted personal service costs for each Day Treatment program shall be divided by the total reported agency Day Treatment FTEs for each program and then multiplied by .9533 in order to reflect a median Day Treatment salary for each agency. The non contracted personal service costs reported on the January 1, 1988 through December 31, 1988 cost report shall be inclusive of 9 months of salary enhancement for programs that participated in the salary enhancement program of previously approved State Plan Amendment 88-48. For State operated Day Treatment programs that filed full year cost reports for the period April 1, 1989 through March 31, 1990, the statewide Day Treatment non contracted personal service costs for all state operated Day Treatment programs shall be divided by the total reported Day Treatment FTEs for all state operated Day Treatment programs and then multiplied by .9533 in order to reflect a median Day Treatment salary. The agency salary for all State operated and non-State operated programs that did not file full year cost reports, will be adjusted to reflect the agency salary or other existing Day Treatment programs operated by the provider. If the provider does not operate other Day Treatment programs, the Day Treatment agency salary shall be equal to the agency salary of ICF/DDs and/or Community Residences operated by the providers. Day Treatment agency salaries derived from other Day Treatment programs or ICF/DD and/or Community Residence programs operated by the provider shall be adjusted by .9533 to reflect a median Day Treatment agency salary. If the provider does not operate any other Day Treatment, ICF/DD or Community Residence programs, the agency salary per FTE shall be equal to the Day Treatment Statewide median salary of $16,799. Day Treatment programs that have not filed full year cost reports for the periods identified above, will be considered to be in a Deficit (I) in accordance with item (3) below.

(2) The agency salary per FTE shall be compared to the Day Treatment Statewide median salary of $16,799.

(3) Surplus/Deficit (I) - A surplus/deficit analysis shall be computed for each Day Treatment program that filed 12 month cost reports for January 1, 1988 through December 31, 1988, July 1, 1988 through June 30,
New York
3d

1989, and April 1, 1989 through March 31, 1990. For non-State operated Day Treatment programs in Regions II and III and those programs in Region I elected to or designated to a Region II and III year end and fiscal cycle, the January 1, 1990 Day Treatment fixed amount and operating cost components in effect as of October 1, 1990, shall be detrended and compared to the operating costs from the January 1, 1988 through December 31, 1988 cost report. For non-State operated Day Treatment programs in Region I and those programs in Regions II and III elected to or designated to a Region I year end and fiscal cycle, the July 1, 1990 Day Treatment fixed amount and operating cost components in effect as of October 1, 1990, shall be detrended and compared to the operating costs from the July 1, 1988 through June 30, 1989 cost report. For State operated Day Treatment programs, the April 1, 1990 Day Treatment fixed amount and operating cost components, shall be detrended and compared to the operating costs from the April 1, 1989 through March 31, 1990 cost report. The surplus or deficit derived from this analysis shall be titled Surplus/Deficit (I). The Surplus/Deficit I shall not be computed for budget-based sites.

(4) Salary component add-ons in accordance with the schedule identified below shall be added to fixed amount for each Day Treatment site.

(i) If the agency salary per FTE pursuant to item (2)(v)(e)(1) above is greater than the 50th percentile of the statewide Day Treatment industry and the Day Treatment program is experiencing a Surplus (I) in accordance with item (2)(v)(e)(3) above, the salary component shall be $6.10.

(ii) If the agency salary per FTE pursuant to item (2)(v)(e)(1) above is greater than the 50th percentile of the Day Treatment industry and the Day Treatment program is experiencing a Deficit (I) in accordance with item (2)(v)(e)(3) above, the salary component shall be $6.10 plus the amount of costs equal to the agency salary per FTE divided by the Statewide salary of $16,799 multiplied by $29.09, minus $29.09. 21.2 percent fringe is added to this amount.
(iii) If the adjusted agency salary per FTE pursuant to item (2)(v)(e)(1) above is greater than the 40th percentile or equal to the Day Treatment Statewide salary of $16,799, the salary component add on shall be $6.10.

(iv) If the adjusted agency salary per FTE pursuant to item (2)(v)(e)(1) above is equal to or greater than the 30th percentile or less than the 40th percentile of the Day Treatment industry, the salary component add on shall be $3.89.

(v) If the adjusted agency salary per FTE pursuant to item (2)(v)(e)(1) above is equal to or greater than the 20th percentile or less than the 30th percentile of the Day Treatment industry, the salary component add on shall be $2.37.

(vi) If the adjusted agency salary per FTE pursuant to item (2)(v)(e)(1) above is equal to or greater than the 10th percentile or less than the 20th percentile of the Day Treatment industry, the salary component add on shall be $1.50.

(vii) If the adjusted agency salary per FTE pursuant to item (2)(v)(e)(1) above is less than the 10th percentile of the Day Treatment industry, the salary component add on shall be $0.

(f) Salary Enhancement Cost Adjustment Component Add-On - The fixed amount for non-State operated Day Treatment programs that participated in the salary enhancement plan pursuant to previously approved State Plan Amendment 88-48 during the period April 1, 1988 through December 31, 1988 and submitted a 12 month cost report for the same period, shall receive a salary enhancement cost adjustment component add-on. Budget based Day Treatment programs in Regions II and III whose agency salary per FTE pursuant to item (2)(v)(e)(1) above, is equal to the agency salary of other existing Day Treatment programs operated by the same provider shall also receive the salary enhancement cost adjustment component add-on. The salary enhancement cost adjustment component may be revised to reflect additional FTEs for programs that have experienced a capacity change resulting in the issuance of a new operating certificate.
The salary enhancement cost adjustment component shall be calculated as follows:

(i) For Day Treatment programs in Region II, the total number of direct care and support FTEs shall be multiplied by 25 percent of $1,900 and increased by a fringe benefit factor of .212 percent and divided by the units of service pursuant to paragraph (1).

(ii) For Day Treatment programs in Region III, the total number of direct care and support FTEs shall be multiplied by 25 percent of $1,690 and increased by a fringe benefit factor of .212 percent and divided by the units of service pursuant to paragraph (1).

(g) Cap adjustment component add-on and allocation adjustment component add on.

(1) In order to determine eligibility for either the Cap Adjustment Component add-on or the Allocation component add-on, a surplus/deficit analysis shall be computed for each Day Treatment program using operating fees determined in accordance with subparagraphs (2)(iv) and (v)(a) - (f) and the actual units of service from the appropriate 1988 cost report for non state operated programs and the April 1, 1989 through March 31, 1990 cost report units of service for state operated programs. As appropriate, operating fee revenues shall be compared to appropriate adjusted program specific operating costs from either the January 1, 1988 through December 31, 1988 or July 1, 1988 through June 30, 1989 or the April 1, 1989 through March 31, 1990 cost reports. The surplus or deficit derived from this analysis shall be titled Surplus/Deficit (II).

(2) Day Treatment programs determined to be in a Deficit (II) pursuant to subclause (1) above that received salary components in accordance with items subclause (2)(v)(e)(4)(i) shall receive a cap adjustment component equal to the Deficit (II) divided by the units of service.

(3) Day Treatment programs determined to be in a Deficit (II) pursuant to clause (1), that received salary components in accordance with items (2)(v)(e)(4)(iii) through (vii) shall receive an allocation component equal to $3.07.

September 3, 1993

Approval Date

January 1, 1992

Effective Date
The capital component add-on shall be the amount of allowable capital costs and start-up costs divided by the units of service figure. Such allowable capital costs and start-up costs must be in accordance with subdivision (j) General Rules for Capital Costs and Costs of Related Party Transactions, in the ICF/DD portion of this Plan, and subdivision (k) Glossary, also in the ICF/DD portion of this Plan. [may include the cost of principal and interest payments on loan from the NYS Facilities Development Corporation (hereinafter referred to as FDC) pursuant to subdivision 13-d of section 5 of the Facilities Development Corporation Act, net of the portion of such payments attributable to operating costs; provided that the reimbursement of FDC loan payments is an allowance in lieu of reimbursement of interest and depreciation associated with the mortgaged property and/or in lieu of reimbursable start-up costs and in lieu of reimbursement for other underlying allowable costs for which the FDC loan was received. A provider which receives an FDC loan pursuant to subdivision 13-d of section 5 of the Facilities Development Corporation Act, does not have the option of having included in the calculation of its rate otherwise allowable interest, depreciation, start-up costs, or the loan’s underlying costs instead of the allowance representing principal and interest. Capital costs and start-up costs shall be from the best available and documented data that reflects the cost expected to be incurred during the fee period. [For property acquired or leased on or after January 1, 1986 prior approval by Office of Mental Retardation and Developmental Disabilities and the Division of the Budget shall be required in order for such property costs to be reimbursed in the fee.] At the onset of each fee period, the OMRDD shall review the capital component add-on for substantial material changes. If said changes are allowable, the capital component shall be revised.

For the January 1, 1991 to December 31, 1991, April 1, 1991 to March 31, 1992 and the July 1, 1991 to June 31, 1992 fee periods, the final fee shall be equal to the capital component calculated in accordance with (h) above plus the greater of (i) or (ii) below. For the January 1, 1992 to December 31, 1992, April 1, 1992 to March 31, 1993 and the July 1, 1992 to June 31, 1993 fee periods, and thereafter, the final fee shall be equal to the property and equipment component calculated in accordance with clause (h) of this state plan plus subparagraph (ii) of this paragraph:

(i) For non-State operated programs in Region I and those non-State operated programs designated or elected to a region I year end and fiscal reporting cycle, 99.5 percent of the fixed fee and operating components contained in the June 30, 1991 fee trended to the July 1, 1991 to June 30, 1992 fee period. For non-State operated programs in Regions II and III and those non-State operated programs designated or elected to a Region II and III year end and fiscal reporting cycle, 99.5 percent of the fixed fee and operating components contained in the December 31, 1990 fee trended to the January 1, 1991 to December 31, 1991 fee period. For State operated programs, 99.5 percent of the fixed fee and operating components contained in the March 31, 1991 fee trended to the April 1, 1991 through March 31, 1992 fee.
(ii) The fixed fee and operating components determined in accordance with subsection (2) of this State Plan trended to the appropriate fee period.

(4) The final adjusted fee shall be equal to the final fee determined in subsection (3) above except as provided below as follows:

(i) Non-state operated Day Treatment programs in Regions II and III including those programs in Region I designated or elected to a Region II and III year-end reporting and fiscal cycle shall receive the annualization component add-on for the period April 1, 1991 to December 31, 1991. The annualization component add-on shall be equal to the difference between the fee in effect on March 31, 1991 and the April 1, 1991 final fee calculated pursuant to subsection (3) for the period January 1, 1991 to March 31, 1991 divided by the units of service pursuant to subsection (1). The annualization component add-on shall be added to the final fee determined in accordance with subsection (3) above, and the resulting fee shall be considered the final adjusted fee.

(ii) The final adjust fee for non-state operated Day Treatment programs in Region I and those facilities designated or elected to a Region I year-end fiscal cycle and state operated Day Treatment programs shall be equal to the final fee determined in accordance with subsection (3) above.

(iii) For eligible facilities, the final fee shall be adjusted to include an amount in accordance with subsections (10) and (11).

(5) The commissioner may make corrections to the fees based upon the following:

(i) Errors which occurred in the computation of the fee.

(ii) Final audit findings.

(iii) The Day Treatment provider may request corrections to the fee within 90 days of receipt of the fee. Such corrections are limited to errors in the cost report and corrections to the DDP. If corrections to the DDP would result in an increase to the final adjusted fee, the commissioner may independently review the corrected DDPs. During the period when the commissioner is reviewing the provider-submitted revised DDP data, the DDP in the fee at the time of review shall remain in effect. Should the commissioner’s review verify the provider-submitted revised DDP data, said revised DDP data shall be utilized for fee-setting purposes retroactive to the first day of the fee period. The case mix component add-on and the case mix intensity component add-on may be recalculated only if there is a 10 percent or greater change in participants resulting from either a change in certified capacity or a turnover in program participants, or a correction to the DDP score approved by the commissioner. Day Treatment providers must report to OMRDD Rate Setting all participant changes greater than 10 percent.
(iv) Corrections to the transportation component add-on pursuant to subsection (10) of Attachment 4.19-B of this State Plan.

(v) Adjustment to actual units of service.

(a) OMRDD may, upon request from a Day Treatment provider, adjust the units of service used for the program's calculation for the prior fee period to actual units of service delivered during such fee period. However, such adjustment will be limited to situations where the Day Treatment provider demonstrated the Day Treatment program was in a deficit situation for the prior fee period and had for reasons beyond its control not been able to deliver the units of service used to calculate the fee for the prior fee period.

(b) The Day Treatment provider must request adjustments to the program's actual units of service within [90] 150 days of the close of the [fee] fiscal reporting period for which the said adjustment is sought.

(6) All fees and any corrections to fees shall not be considered final unless approved by the director of the Division of Budget.

(7) To encourage the closure of developmental centers, the commissioner will consider proposals to allow the variable costs associated with the closed center or center to become part of the operating expenses of new or existing state operated Day Treatment programs. The commissioner will allow a reasonable incentive plan for the reimbursement of the increased costs referred to above in state operated Day Treatment programs if it is coupled with the closure of a developmental center. An incentive plan would provide for the reimbursement in total of closure related increased costs in the state operated Day Treatment programs without adjustments or offsets.

(i) The following reimbursement schedule will be used for proposals approved by the commissioner:

(a) 100% reimbursement of the increased cost for at least one full fee period but less than two full fee periods.

(b) 75% reimbursement of the increased cost for the second full fee period following the period defined in subsection (7)(i)(a) above.

(c) 50% reimbursement of the increased cost for the third full fee period.

(d) 25% of the increased cost for the fourth full fee period.
(ii) Costs to be eligible for this incentive plan will include but not be limited to direct care, support and clinical personal service and fringe benefit amounts for employees whose most recent prior employment was at a closed or scheduled to close developmental center.

(a) In order to have the cost of a former developmental center employee included in the incentive plan, the state operated [facility] Day Treatment program applying for a fee adjustment pursuant to subsection (7) must hire such employee within twelve months of the official closing date of the developmental center.

(b) Salaries and fringe benefit amounts paid to eligible employees by the new program may not exceed the average salary and fringe amounts paid to comparable employees currently on that [facility's] payroll.

(c) Any claim made under this provision is subject to audit as noted in section (5)(ii).

(iii) Incentive plan applications shall be made in writing to the commissioner.

(a) The application shall identify the employees, their job titles, salary levels, date hired, and the B/DDSO of previous employment.

(b) OMRDD may request such additional information as it deems necessary.

(8) To accelerate the closure and to encourage a reduction in the size of developmental centers, the commissioner will consider proposals to allow the variable costs associated with a developmental center to become part of the operating expenses of new and existing state operated Day Treatment programs. The variable costs associated with the developmental center will be allowed for the transition which is the period beginning on the date an official announcement to close a [facility or facilities] center or centers and ending on the date of actual closure. Also variable costs associated with the conversion of beds which is a substantial material change in the [facility] center census will be allowed. The commissioner will allow a reasonable incentive for the reimbursement of the increased costs referred to above in the state operated [community facilities] Day Treatment programs during the transition and/or conversion period.

(i) The commissioner will allow the following reimbursement for approved proposals:

---

TN #96-39

Approval Date December 19, 1996

Supersedes TN #94-48

Effective Date July 1, 1996
New York
3h3

(a) 75% reimbursement of the increased costs incurred during the transition closure period. On the effective date of closure, reimbursement of increased costs will be considered under subsection (7).

(b) 75% reimbursement of the increased costs incurred during the conversion period. The conversion period will be for at least one full fee period but less than two full fee periods. If during the conversion period, an official announcement of closure occurs, the reimbursement of increased costs may be considered under subsection (7)(i)(a).

(ii) Costs to be eligible for this incentive plan will include but not be limited to direct care, support and clinical personal service and fringe benefit amounts for employees whose most recent prior employment was at a closed or scheduled to close developmental center.

(a) In order to have the cost of a former developmental center employee included in the incentive plan, the [community facility] Day Treatment program applying for a fee adjustment pursuant to subsection (7)(iv) must hire such employee during the transition and conversion periods.

(b) Salaries and fringe benefit amounts paid to eligible employees by the [facility] Day Treatment program cannot exceed the average salary and fringe benefit amount paid to comparable employees currently on that [facility’s] program’s payroll.

(c) Any claim made under this provision is subject to audit as noted in section (5)(ii).

(iii) Incentive plan applications from the provider shall be made in writing to the commissioner.
New York
3h4

(9) Effective July 1, 1996, there shall be an efficiency adjustment as described herein and applied as a reduction to the fixed component of the fee.

(i) The efficiency adjustment shall be a percentage reduction based on the $10.12 associated with administration in the fixed component of the fee. Except as provided for in (ii) of subsection (9) of this section, all cost and revenue information, used to determine the efficiency adjustment percentages, shall be based on reported cost and revenue information for the calendar 1992 or 1992-93 cost reporting year. Each provider shall be assigned a percentage value from the table at subclause (3) of this clause, based on total program cost, a program surplus/deficit group designation and an administration percentage group designation.

(a) Determination of program surplus/deficit group. A determination shall be made as to whether each provider has a program surplus or deficit, for the combined total of all community residence and Day Treatment programs and all residential habilitation and day habilitation services. Surplus/deficit shall equal gross revenue (less any prior period adjustments) minus allowable costs.

(1) For those providers with a reported deficit, this deficit shall be considered the final deficit amount for the purpose of this calculation.

(2) For those providers with a reported program surplus, a certain portion of that surplus shall be exempted to establish an adjusted surplus. The adjusted surplus shall be the reported surplus minus the exempt amount. Exempt amounts shall be determined as follows. For providers whose total program costs are:

(i) less than $1 million, the exempt amount shall be $10,000.

(ii) between $1 million and less than $3 million, the exempt amount shall be $22,500.

(iii) between $3 million and $7 million, the exempt amount shall be $35,000.

(iv) over $7 million, the exempt amount shall be $40,000.
The reported deficit or the adjusted surplus shall be given one of the following designations used to determine the efficiency adjustment percentage in the table at the end of this section:

(i) **S2** if the adjusted surplus is equal to or greater than $200,000.

(ii) **S1** if the adjusted surplus is from $20,000 to $199,999.

(iii) **BE** if the reported deficit is not greater than ($19,999) or the adjusted surplus is not greater than $19,999 (BE-break even).

(iv) **D1** if the reported deficit is from ($20,000) to ($199,999).

(v) **D2** if the reported deficit is equal to or greater than ($200,000).

(b) Determination of a calculated administration percentage group. A determination shall be made of a provider’s calculated administration cost, where administration percentage shall equal administration divided by the result of total operating cost minus the sum of capital costs and administration. There shall be five group designations that express the calculated administration percentage as a departure from the average percentage for all provider agencies. Those percentages centered around the average are designated with the abbreviation AVG. There are also two group designations for percentages over the average, abbreviated OA2 and OA1 and two designations for under the average, abbreviated UA2 and UA1. These abbreviations appear in the table of percentages at the end of this section as well as in the following regional tables. Each provider’s assignment to one of the five group designations shall be based on the provider’s calculated administration percentage, total program cost and elected or assigned region (refer to subdivision (a) of this section). Each provider’s administration percentage group designation shall be determined using the following tables.

(c) Determination of the efficiency adjustment percentage. Each provider shall be assigned an efficiency adjustment percentage value from the following table, based on the surplus/deficit group designation and the administration percentage group designation. The amount associated with the administration component of the fixed fee shall be determined by multiplying the administration component of the fixed fee times the units of service. The resulting total amount shall then be reduced by an efficiency adjustment percentage.

(1) If a provider agency opens a new Day Treatment program subsequent to the 1992 or 1992-93 cost reporting period, the cell value designated for the new Day Treatment program, shall be the same cell value as that which is designated for all of the provider’s other Day Treatment programs, and for which 1992 or 1992-93 cost data available.

(2) New agencies operating Day Treatment programs subsequent to the 1992 or 1992-93 cost reporting period shall be assigned the center cell value, i.e., AVG-BE, in the table found in this subclause.

(ii) A provider may request that OMRDD use a more recent cost reporting period, as an alternative to the 1992 or 1992-93 reporting period, to determine the efficiency adjustment percentage as described herein. Approval to use an alternative reporting period shall be granted if, upon a fiscal review by the commissioner, it is determined that the cost report for the alternative reporting period more accurately reflects the provider’s current financial status. For the purpose of determining the efficiency adjustment percentage only, providers may submit corrections to their 1992 or 1992-93 cost report. Such corrections shall be certified by a certified public accountant. Providers may request the use of an alternative reporting period or may submit corrections to their 1992 or 1992-93 cost report only once. Such requests or corrections shall be made in writing and received by OMRDD by December 31, 1996. Providers shall also have until December 31, 1996 to notify OMRDD of errors made in calculating the efficiency adjustment.
Effective July 1, 1996, there shall be a separate transportation component add-on to the program’s fee. This component add-on for each Day Treatment program shall be determined using the following methodology.

Using a payment/rate data sample from calendar years 1995 and 1996, the weighted transportation average shall be calculated by dividing the aggregate transportation payments by the aggregate transportation units of service on a program specific basis. One round trip shall equal one unit of service.

The weighted transportation average for each Day Treatment program shall be ranked among all Day Treatment programs statewide.

If a program’s weighted transportation average is $11.16 or less, the weighted transportation average shall be held 100 percent harmless.

If a program’s weighted transportation average exceeds $11.16, forty percent of the weighted transportation average shall be held harmless.

After deducting the forty percent to be held harmless, the net weighted transportation average for each program (i.e., the remaining 60 percent of the weighted transportation average) shall be re-ranked. Based on the new percentile rankings, a percentage offset shall be deducted from the net weighted transportation average. A program’s percentage offset shall be determined by locating its net weighted transportation average (i.e., the remaining 60 percent of the weighted transportation average) in the following table.

<table>
<thead>
<tr>
<th>PERCENTILE RANK</th>

attachment 4.19-b

Dec 19, 1996

TN #96-39

Supersedes TN

Approval Date December 19, 1996

Effective Date July 1, 1996
The amount remaining after the application of the percentage offset (the sixty percent of the weighted transportation average reduced by the offset percentage in the table above) shall be added to the hold harmless amount to determine a program’s modified weighted transportation average.

(1) If the modified weighted transportation average falls below $11.16, the modified weighted transportation average shall be adjusted to $11.16.

(2) If the modified weighted transportation average exceeds $30.00, the modified weighted transportation average shall be adjusted to $30.00.

The modified weighted transportation average shall be multiplied by the total to and from Day Treatment transportation units and divided by the total Day Treatment units of service to create a Day Treatment transportation component add-on. This shall be a separate component added to the Day Treatment fee.

(ii) If an agency currently providing Day Treatment does not have to and from transportation payment/rate data available for a particular program for the period used to calculate the modified weighted transportation averages, or if a provider agency opens a new Day Treatment program, the modified weighted transportation average shall be equal to the lesser of:

(a) the new program’s budgeted amount for transportation based on the transportation requirements of the person(s) to be transported to and from the new Day Treatment program, or

(b) the average of the modified weighted transportation averages for all other Day Treatment programs operated by the provider agency.

(iii) If a provider agency does not currently operate a Day Treatment program and opens a new Day Treatment program, or if a provider agency does not have to and from transportation payment/rate data for any of its Day Treatment programs for the period used to calculate the modified weighted transportation averages, the modified weighted transportation average shall be equal to the lesser of:

(a) the new program’s budgeted amount for transportation based on the transportation requirements of the person(s) to be transported to and from the Day Treatment program, or

(b) the average of the modified weighted transportation averages for all day habilitation programs operated by the provider agency in accordance with the State’s Home and Community Based Services Waiver for persons with mental retardation and developmental disabilities.
If the provider agency does not operate any Day Treatment program or day habilitation program, the modified weighted transportation average shall be equal to the lesser of the new Day Treatment program’s budgeted amount for transportation based on the transportation requirements of the person(s) to be transported to and from the Day Treatment program or 75 percent of the regional modified weighted transportation average associated with transporting individuals to and from Day Treatment programs. The table below shows the regional modified weighted transportation averages:

<table>
<thead>
<tr>
<th>REGION</th>
<th>AVERAGE</th>
<th>75 PERCENT OF AVERAGE</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>$21.37</td>
<td>$16.03</td>
</tr>
<tr>
<td>2</td>
<td>$21.17</td>
<td>$15.88</td>
</tr>
<tr>
<td>3</td>
<td>$15.97</td>
<td>$11.98</td>
</tr>
</tbody>
</table>

Providers that operated only day habilitation programs, under the Home and Community Based Services Waiver, prior to July 1, 1996, and opened a Day Treatment program for the first time between July 1, 1996 and September 26, 1996 and received a 75 percent of the regional modified weighted transportation average for day treatment transportation as the transportation add-on component to the Day Treatment fee, shall receive a one time fee adjustment based on the methodological change that became effective September 26, 1996 as described paragraph (10)(iii) above. The one time fee adjustment shall be either:

(a) a one time fee increase if the provider’s fee effective July 1, 1996 was lower than the new fee effective September 26, 1996, because the lesser of the need-based budgeted transportation amount or the average of the provider agency’s day habilitation modified weighted transportation averages is greater than 75 percent of the regional modified weighted average for transportation to and from day treatment, or

(b) a one time fee decrease if the provider’s fee effective July 1, 1996 was higher than the new fee effective September 26, 1996, because the lesser of the need-based budgeted transportation amount or the average of the provider agency’s day habilitation modified weighted transportation averages is less than 75 percent of the regional modified weighted average for transportation to and from day treatment.
(11) (i) Effective January 1, 1999 for non-state operated facilities, a cost of living add-on may be included in the final adjusted fee. This add-on will be an increase to the fee due to a 2.5 percent increase in salaries and salary related fringe benefits. Inclusion of the add-on is subject to a resolution of the facility’s governing body that funding received will be used solely to effect a 2.5 percent increase beginning with the lowest paid employees. To be deemed reimbursable, both the resolution and an implementation plan must be submitted by the facility and approved by the Commissioner.

(ii) Effective January 1, 1999, for state operated facilities, a cost of living add-on will be included in the final adjusted fee. This add-on will be the full annual amount of 2.5 percent of the salaries and salary related fringe benefits included in the final fee.

(iii) Facilities certified as day treatment facilities on or after May 20, 1999 shall be deemed to have met the requirements for an approved cost of living add-on described in paragraphs (i) and (ii) of this paragraph, and a corresponding factor shall be included in the final adjusted fee.

(iv) Effective July 1, 2000 non-state operated facilities may be eligible for a salary enhancement add-on to be included in their final net fee. This add-on will recognize the costs of a $750 annual salary increase per full time equivalent, plus salary related fringe benefits, for direct care and support workers. Inclusion of the add-on is subject to a resolution of the facility’s governing body that funding received will be used solely to effect this increase. To be deemed reimbursable, both the resolution and an implementation plan must be submitted by the facility and approved by the commissioner.
(v) Effective July 1, 2000, for state operated facilities, a salary enhancement add-on will be included in the final adjusted fee. This add-on will be the full annual amount of $750 per full time equivalent, plus salary related fringe benefits, for the direct care and support full time equivalent included in the final fee.

(vi) Facilities initially certified as day treatment facilities on or after April 1, 2001 shall be deemed to have met the requirements for an approved salary enhancement add-on described in subparagraphs (iv) and (v) of this paragraph, and a corresponding factor shall be included in the final adjusted fee.

(vii) Effective January 1, 2003, non-state operated facilities may be eligible for a cost of living adjustment (COLA) add-on of three percent to be included in their final adjusted fee. This add-on is a three percent increase to the personal service portion of allowed reimbursement, for expenditures related to recruitment and retention of staff for the period of April 1, 2002 through March 31, 2003. On or after January 1, 2003, eligible facilities will receive an amount that they would have received if the COLA add-on were added to the final adjusted fee on December 1, 2002. The provider is required to submit to OMRDD a Letter of Attestation, signed by the Executive Director and President or equivalent of the governing body, which details how the COLA is expended.

(viii) Effective January 1, 2003, for state operated facilities, a cost of living adjustment (COLA) add-on of three percent is included in the final adjusted fee. This add-on is a three percent increase to the personal service portion of allowed reimbursement, for expenditures related to recruitment and retention of staff for the period of April 1, 2002 through March 31, 2003. On or after January 1, 2003 facilities will receive an amount that they would have received if the COLA add-on were added to the final adjusted fee on December 1, 2002.

(ix) Facilities certified on or after April 1, 2003 shall be deemed to have met the requirements for an approved COLA add-on described in subparagraphs (vii) and (viii) of this paragraph, and a corresponding factor shall be included in the final adjusted fee.

(x) The day treatment facility shall be responsible for the cost of services which:

(a) are necessary to meet the needs of consumers while attending the program, and

(b) which prior to August 1, 2004 could have been met by home health aide or personal care services separately billed to Medicaid.
**OPWDD Freestanding Clinic – Day Treatment**

Effective January 1, 2017, reimbursement fees for Ambulatory Services in Facilities Certified Under Article 16 of the Mental Health Law Clinic Day Treatment program providers are as follows:

**TN #10-0018**  
Supersedes TN **NEW**  
Approval Date **November 1, 2017**  
Effective Date **July 1, 2010**
Effective July 1, 2018 the following fees will be in effect for the Targeted Case Management Service. The Basic HCBS Plan Support-initial fee is a one-time payment made in the first month of service for the individual. One unit of Basic HCBS Plan Support-on-going may be billed per quarter (up to four units per year). A provider may not bill both an initial and an on-going fee in the same quarter. In order to be reimbursed for a billable unit, the CCO/HH provider must, at a minimum, provide at least one of the monitoring, or follow-up activities, or conduct a face to face visit.

<table>
<thead>
<tr>

</tr>
<tr>
<td>5214</td>
<td>Transition-Willowbrook</td>
<td>04</td>
<td>$1,442.92</td>
</tr>
</tbody>
</table>

Effective April 1, 2013 through December 31, 2014, for state-provided services, the method of reimbursement will be a monthly fee established by OPWDD in conjunction with the New York State Department of Health and approved by the New York State Division of the Budget. The fee schedule to be paid to State Operated providers as follows:

<table>
<thead>
<tr>
<th>Rate Code</th>
<th>Rate Code Definition</th>
<th>Locator Code</th>
<th>Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>5210</td>
<td>Medicaid Service Coordination State - Regular</td>

<td>$438.23</td>
</tr>
<tr>
<td>5210</td>
<td>Medicaid Service Coordination - Transition</td>
<td>04</td>
<td>$1,314.69</td>
</tr>
</tbody>
</table>

2. To reconcile Medicaid Service Coordination the following method will be followed:
   1. Medicaid Service Coordination -
      (a) Total Operating Costs from CFR1 Line 64;
      (b) Less/ Plus Adjustments from CFR1 Line 66;
      (c) The result of (a) and (b) results in the Total Operating Adjusted;
      (d) The sum of (c) and CFR1 Property and Equipment, Lines 48 and 63, is divided by the Units of Service as reported on CFR1 Line 13.]
Type of Service
Office of Alcoholism and Substance Abuse Services (OASAS) Outpatient Services

Chemical Dependence Medically Supervised Treatment and Chemical Dependence Medically Supervised Freestanding Clinic and Hospital Outpatient Withdrawal Services

For dates of service beginning on July 1, 2002, facilities certified solely under article 32 of the Mental Hygiene Law will be reimbursed based upon per visit fees developed by the Department of Health and approved by the Division of the Budget. Fees will be prospective, all-inclusive, and will be based upon reported historical cost and visit data supplied by providers. Operating and capital cost data is submitted annually on the facility Consolidated Fiscal Report (CFR). Fees are regionally adjusted to reflect geographic cost variation and are based upon 1998 base year cost data trended to this initial level. The above reimbursement methodology sunsets effective May 31, 2017

Effective June 1, 2017, OASAS providers receive a daily fee which recognizes regional costs differences reflected in a fee table. All fees and rates are subject to the approval of the Division of the Budget. The fees can be found on the OASAS website at:

https://www.oasas.ny.gov/admin/hcf/FFS/MedSuprOtptWthdrl.cfm#top

OMH [Outpatient Programs] Licensed Freestanding Clinic and Outpatient Hospital Services Under 14 NYCRR Parts [579 and 585: (to be phased out)] 587, 588 and 599

Clinic, Day and Continuing Treatment Programs

For freestanding outpatient providers OMH will establish regional fee schedules which recognizes regional cost differences. For hospital-based providers, OMH will establish cost-related rates subject to ceiling limitations. All fees and rates are subject to the approval of the Division of the Budget.

The above reimbursement methodology identified in this paragraph sunsets effective May 31, 2017.

In addition to these fees, a provider which has been recommended by the local governmental unit and designated by the New York State Office of Mental Health can receive a supplemental rate for clinic and/or day treatment programs to cover the cost of additional rehabilitative services provided by its community support program(s). Such rates shall be calculated by dividing the cost of community support program services determined to be eligible for Medicaid reimbursement by the number of services provided to recipients who are eligible for Medicaid.

The supplemental reimbursement rate identified in this paragraph sunsets effective October 31, 2013.
OMH [Outpatient Programs] Licensed Freestanding Clinic and Outpatient Hospital Services [Under 14 NYCRR Parts 587 and 588 (to replace existing programs licensed under 14 NYCRR Parts 585 and 579)]

Method of Reimbursement

For Freestanding outpatient providers OMH will establish regional fee schedules which recognize regional cost differences. For hospital based providers, OMH will establish cost related rates subject to ceiling limitations. All fees and rates are subject to the approval of the Division of the Budget.

Clinic Treatment for Adults, Clinic Treatment for Children, Clinic and Continuing Day Treatment Programs

Continuing Day Treatment fees will be tiered so that a client's reimbursement will vary depending on their service utilization during a month. The fee will decrease when a client reaches specified, uniform monthly utilization levels. Freestanding outpatient providers will have three fees representing three utilization levels. Hospital based providers will have two.

In addition to these fees, a provider of Freestanding Clinic or Outpatient Hospital Services which has been recommended by the local governmental unit and designated by the New York State Office of Mental Health can receive a supplemental rate for clinic and/or continuing day treatment programs to cover the cost of additional rehabilitative services provided by its community support program(s). Such rates shall be calculated by dividing the cost of community support program services determined to be eligible for Medicaid reimbursement by the number of services provided to recipients who are eligible for Medicaid.

OMH will also set project specific fees for approved projects which examine innovative program and administrative configurations, subject to the approval of the Division of the Budget.

The reimbursement methodology identified in this paragraph sunsets effective May 31, 2017.

Continuing Day Treatment Services: Reimbursement Methodology for Freestanding Clinics

Effective June 1, 2017

Definitions

- **Group Collateral** - A unit of service in which services are provided to collaterals of more than one individual at the same time. Group Collateral Visit shall not include more than 12 individuals and collaterals. Reimbursement for group collateral visits of 30 minutes or more is provided for each individual for whom at least one collateral is present.

- **Regions** -

  - **Downstate**: Bronx, Kings, Nassau, New York, Putnam, Queens, Richmond, Rockland, Suffolk and Westchester Counties
  - **Western**: Allegheny, Cattaraugus, Chautauqua, Chemung, Erie, Genesee, Livingston, Monroe, Niagara, Ontario, Orleans, Schuyler, Seneca, Steuben, Tompkins, Wayne, Wyoming and Yates Counties
  - **Upstate**: Albany, Broome, Cayuga, Chenango, Clinton, Columbia, Cortland, Delaware, Dutchess, Essex, Franklin, Fulton, Greene, Hamilton, Herkimer, Jefferson, Lewis, Madison, Montgomery, Oneida, Onondaga, Orange, Oswego, Otsego, Rensselaer, St. Lawrence, Saratoga, Schenectady, Schoharie, Sullivan, Ulster, Tioga, Warren and Washington Counties

Providers with program sites located in different regions receive reimbursement based on the region where the services are provided.

TN # 10-0018 Approval Date November 1, 2017

Supersedes TN #98-0028 Effective Date July 1, 2010
New York
3(j.1)

- **Units of Service** -
  - Half Day - minimum two hours
  - Full Day - minimum four hours
  - Collateral Visit - minimum of 30 minutes
  - Preadmission and Group Collateral Visits - minimum of one hour
  - Crisis Visit - any duration

Cumulative hours are calculated on a monthly basis. A Half Day visit counts as two hours and a Full Day counts as four hours towards an individual’s monthly cumulative hours. Time spent during a crisis, collateral, group collateral, or preadmission visit is excluded from the calculation of monthly cumulative hours. Time spent during a crisis, collateral, group collateral, or preadmission visit is also excluded from the minimum service hours necessary for Half Day and Full Day visits.

When the hours of any single visit include more than one rate because the individual surpassed the monthly utilization amount within a single visit, reimbursement is at the rate applicable to the first hour of such visit.

Effective June 1, 2017, reimbursement rates for non-State-operated Continuing Day Treatment Services Providers licensed solely pursuant to Article 31 of the Mental Hygiene Law are as follows:

**Regional Continuing Day Treatment Rates for Freestanding Clinic (Non-State Operated)**

Continuing Day Treatment Services:
Reimbursement Methodology for Outpatient Hospital Services
Effective June 1, 2017

Definitions:

- **Group Collateral** - A unit of service in which services are provided to collaterals of more than one individual at the same time. Group Collateral Visit shall not include more than 12 individuals and collaterals. Reimbursement for group collateral visits of 30 minutes or more is provided for each individual for whom at least one collateral is present.

- **Units of Service** -
  - Half Day - Minimum two hours
  - Full Day - Minimum four hours
  - Collateral Visit - minimum of 30 minutes
  - Preadmission and Group Collateral Visits - minimum of one hour
  - Crisis Visit - any duration

Cumulative hours are calculated on a monthly basis. A Half Day visit counts as two hours and a Full Day counts as four hours towards an individual’s monthly cumulative hours. Time spent during a crisis, collateral, group collateral, or preadmission visit is excluded from the calculation of monthly cumulative hours. Time spent during a crisis, collateral, group collateral, or preadmission visit is also excluded from the minimum service hours necessary for Half Day and Full Day visits.

When the hours of any single visit include more than one rate because the individual surpassed the monthly utilization amount within a single visit, reimbursement is at the rate applicable to the first hour of such visit.

Effective June 1, 2017, reimbursement for Continuing Day Treatment Services providers licensed pursuant to Article 31 of the Mental Hygiene Law and Article 28 of the Public Health Law, are as follows:

TN #10-0018 Approval Date November 1, 2017
Supersedes TN NEW Effective Date July 1, 2010
Reimbursement will include a per-visit payment for the cost of capital, which will be determined by dividing the provider’s total allowable capital costs as reported on the Institutional Cost Report (ICR) for its licensed outpatient Mental Health Clinic, Continuing Day Treatment and Day Treatment Services for children, by the sum of the total annual number of visits for all of such services. The per-visit capital payment will be updated annually and will be developed using the costs and visits based on an ICR that is 2-years prior to the rate year. The allowable capital, as reported on the ICR, will also be adjusted prior to the rate add-on development to exclude costs related to statutory exclusions as follows: (1) forty-four percent of the costs of major moveable equipment and (2) staff housing.
New York
3J-A

**Type of Service**

Clinic Treatment for Adults, Clinic
Treatment for Children, Clinic and Continuing
Day Treatment Programs

**Method of Reimbursement**

Effective April 1, 2000, OMH will increase the fees paid to certain not-for-profit freestanding clinic and outpatient hospital [and] non-residential programs which are not eligible for reimbursement as comprehensive outpatient programs under the regulations of the Office of Mental Health; and will also increase fees for programs which are designated as comprehensive outpatient programs but absent such fee increase would not be reimbursed at a rate equivalent to the non-comprehensive programs. In return for these fee increases, the non-comprehensive programs will be required to perform additional case management functions, must agree to provide emergency response services for cases deemed “critical”, participate in conjunction with other mental health providers in the local planning process set forth in State laws and regulations and provide other additional services as required by OMH. In no instance will these programs be required to perform services greater than those performed by programs designated as comprehensive outpatient programs. The method of reimbursement identified on the page sunsets October 31, 2013.
Partial Hospitalization - Freestanding Clinic and Outpatient Hospital Services

OMH will establish regional fee schedules which recognize regional cost differences. All fees are subject to approval by the Division of the Budget. There will be limits on the number of service hours reimbursed per individual for each service episode and for a calendar year. This reimbursement methodology sunsets effective May 31, 2017.

Comprehensive Outpatient Programs - 14 NYCRR Part 592
OMH will develop provider specific rate supplements to fees for outpatient mental health programs licensed exclusively by OMH and rates promulgated by OMH for outpatient mental health programs operated by general hospitals and licensed by OMH based upon expenditures approved by OMH to outpatient programs licensed pursuant to 14 NYCRR Parts 585 and 587 which are designated by county mental health departments or OMH.

Effective June 1, 2017, reimbursement rates for non-State-operated freestanding clinic and outpatient hospital Partial Hospitalization Services providers are as follows:

Definitions:

- **Group Collateral** - A unit of service in which services are provided to collaterals of more than one individual at the same time. Group Collateral Visit shall not include more than 12 individuals and collaterals. Reimbursement for group collateral visits is provided for each individual for whom at least one collateral is present.

- **Regions - Long Island**: Nassau and Suffolk counties.
  - **New York City**: Bronx, Kings, New York, Queens, and Richmond counties.
  - **Central New York**: Broome, Cayuga, Chenango, Clinton, Cortland, Delaware, Essex, Fulton, Franklin, Hamilton, Herkimer, Jefferson, Madison, Montgomery, Lewis, Oneida, Onondaga, Oswego, Otsego and St. Lawrence counties.

Providers with program sites located in different regions receive reimbursement based on the region where the services are provided.

- **Units of Service - Partial Hospitalization**:
  Service hours shall be determined by rounding to the nearest full hour once the minimum billable period has been reached. No rounding is permitted for crisis or preadmission service hours.

Reimbursement will include a per-visit payment for the cost of capital, which will be determined by dividing the provider’s total allowable capital costs, as reported on the Institutional Cost Report (ICR) for its licensed outpatient Mental Health Clinic, Continuing Day Treatment and Day Treatment Services for children, by the sum of the total annual number of visits for all of such services. The per-visit capital payment will be updated annually and will be developed using the costs and visits based on an ICR that is 2-years prior to the rate year. The allowable capital, as reported on the ICR, will also be adjusted prior to the rate add-on development to exclude costs related to statutory exclusions as follows: (1) forty-four percent of the costs of major moveable equipment and (2) staff housing.
New York
3L

TYPE OF SERVICE

Intensive Psychiatric Rehabilitation Treatment

OMH will develop a flat fee to be approved by the Division of Budget. There will be limits on the number of monthly and calendar year service hours that may be reimbursed per individual. Off-site service reimbursement will all be limited to a percentage of each program's total service hours.

Rehabilitative Services for Residents of Community-based Residential Programs Licensed by the Office of Mental Health

Program Type 1:
   1) Community Residences

Program Categories
   a) congregate-type
   b) apartment-based

Program Type 2:
   1) Family Based Treatment

Program Type 3
   1) Teaching Family Homes

OMH will develop monthly and half-monthly rates for OMH licensed community-based residences of sixteen (16) or fewer beds to provide physician-prescribed rehabilitation services for seriously mentally ill individuals in residences. OMH will develop rates for services provided to eligible residents of congregate-type community residences for both children and adults, apartment-based community residences for adults, family-based treatment programs for children and teaching family homes for children. Rehabilitation services will not include didactic education, vocational services, and room and board.

Providers of rehabilitation services shall be assigned an individual provider monthly rate based upon their cumulative approved costs for all sites divided by the maximum capacity for their sites divided by 12 months, divided by the specific utilization factor established by the Office of Mental Health for beds in adult congregate programs (85%), adult apartment programs (83%) or for children’s residential services programs (82%). Rates for a half month service shall be 50% of the monthly rate. The rate calculated under this methodology will be reduced by $4 for a full month and $2 for a half month rate to account for payment for the four Individual Rehabilitation Services at a cost of $1.00 per service required for a full month and two Individual Rehabilitation Services at a cost of $1.00 per service required for a half month.

The rate methodology for rehabilitation services provided in residential programs operated by the Office of Mental Health shall be the same as for other licensed providers except that there shall be one statewide rate which shall be the lower of the calculated rate or the highest rate approved for other providers.

TN #96-21 Approval Date September 23, 1996
Supersedes TN #94-27 Effective Date May 1, 1996
Type of Service

Personalized Recovery Oriented Services: (PROS)
Community Rehabilitation and Support

Providers will be reimbursed through a regionally based, tiered monthly case payment, based on the number of hours of service provided to the individual and his/her collaterals. PROS programs that offer Clinical Treatment as part of the service package will be reimbursed at a higher rate than programs which do not. Programs which do not provide clinical treatment will be expected to provide clinical linkages. PROS clients will be given free choice as to whether they wish to receive clinical treatment through the PROS. PROS providers will need to abide by certain program and billing restrictions if they currently operate a clinic and/or choose to offer optional clinical treatment services within the PROS.

Intensive Rehabilitation

If the client receives Intensive Rehabilitation from a comprehensive PROS, a regionally based monthly case payment will be paid in addition to the Community Rehabilitation and Support case payment. If the client attends a limited license PROS, an Intensive Rehabilitation case payment will be paid.

Ongoing Rehabilitation and Support

If the client receives Ongoing Rehabilitation and Support from a comprehensive PROS, a regionally based monthly case payment will be paid in addition to the Community Rehabilitation and Support case payment. If the client attends a limited license PROS, the Ongoing Rehabilitation and Support case payment will be paid. A program which bills for Intensive Rehabilitation cannot also bill for Ongoing Rehabilitation and Support.

TN #03-45 Approval Date June 3, 2004
Supersedes TN NEW Effective Date May 1, 2004
Assertive Community Treatment (ACT)

Services will be provided primarily in the community by a licensed multi-disciplinary team under the supervision of a psychiatrist which meets with the recipient or the recipient's significant others a minimum of six times per month for full ACT payment, or two times per month for ACT step-down payment. For full ACT payment, at least three of the six contacts must be with the Medicaid recipient. For ACT step-down services, both of the two required contacts must be with the client.

Monthly fees as approved by Division of the Budget will be set by dividing total gross approved costs by twelve months and the number of clients and will include a vacancy factor of 10% OMH will consult with DOH regarding any changes to the fees.
Laboratory Services

Fee Schedule developed by Department of Health and approved by Division of the Budget. In compliance with Section 2303 of the Deficit Reduction Act of 1984, on the aggregate, Medicaid fees for clinical diagnostic laboratory tests are not to exceed those amounts recognized by Medicare. Except as otherwise noted in the Plan, state-developed fee schedule rates are the same for both governmental and private providers. The agency's fee schedule rates for services listed in this paragraph were set as of June 1, 2010 and are effective for services provided on or after that date. All rates are published on the Department of Health website at the following link:

https://www.emedny.org/ProviderManuals/Laboratory/PDFS/Laboratory_Fee_Schedule.xls

[Home Health Services/Certified Home Health Agencies]

Prospective, cost based hourly and per visit rates for five services shall be calculated by the Department of Health and approved by Division of the Budget. Rates are based on the lower of cost or ceiling, trended or, if lower, the charge. Providers are grouped geographically into upstate/downstate and by sponsorship, public/voluntary. Ceilings are calculated using the group cost experience. For purposes of establishing rates of payment by governmental agencies for certified home health agencies for the period April 1, 1995 through December 31, 1995, and for rate periods beginning on or after January 1, 1996 through March 31, 1999, and on July 1, 1999 through March 31, 2000, and on and after April 1, 2000 through March 31, 2003, and on and after April 1, 2003 through March 31, 2009, the reimbursable base year administrative and general costs of a provider of services, excluding a provider of services reimbursed on an initial budget basis, and a new provider, excluding changes in ownership or changes in name, who begins operations in the year prior to the year which is used as base year in determining rates of payment, shall not exceed the statewide average of total reimbursable base year administrative and general costs of such providers of services. In the 1996, 1997, 1998, 1999, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, and 2009 rate periods respectively the amount of such reduction in certified home health agency rates of payments made during the twelve month period running from April 1, of the year prior to the respective rate period through March 31, of such respective rate period shall be adjusted in the respective rate period on a pro-rate basis, if it is determined upon post-audit review by June 15, of the respective rate period and reconciliation, that the savings for the state share, excluding the federal and local government shares, of medical assistance payments is in excess of one million five hundred thousand dollars or is less than one million five hundred thousand dollars for payments made on or before March 31, of the applicable twelve month period to reflect the amount by which such savings are in excess of or lower than one million five hundred thousand dollars. The amount of such reduction in certified home health agency rates of payment made during the period July 1, 1999 through March 31, 2000, shall be adjusted in the 2000 rate period on a pro-rate basis, if it is determined upon post-audit review by June 15, 2000 and reconciliation, that the savings for the state share, excluding the federal and local government shares, of medical assistance payments is in excess of one million one hundred twenty-five thousand dollars or is less than one million one hundred twenty-five thousand dollars for payments made on or before March 31, 2000, to reflect the amount by which such savings are in excess of or lower than one million one hundred twenty-five thousand dollars.]

| TN #08-32 | Approval Date | September 9, 2011 |
| Supersedes TN #07-06 | Effective Date | April 1, 2008 |
Home Health Services/ Certified Home Health Agencies

Prospective, cost based hourly and per visit rates for five services shall be calculated by the Department of Health and approved by Division of the Budget. Rates are based on the lower of cost or ceiling, trended or, if lower, the charge provided, however, for services on and after April 1, 2008, the Commissioner of Health shall apply a trend factor projection equal to 65% of the otherwise applicable trend factor for calendar year 2008, as calculated in accordance with the general Trend Factor section of this Attachment.

For rates of payment effective for services provided on and after January 1, 2009 through March 31, 2009, the otherwise applicable final trend factor attributable to the 2008 calendar year period shall be adjusted such that any increase to the average trend factor for the period April 1, 2008 through December 31, 2008 shall be reduced, on an annualized basis, by 1.3%. However, no retroactive adjustment to such trend factor will be made for the period April 1, 2008 through December 31, 2008. Effective on and after April 1, 2009, the otherwise applicable final trend factor attributable to the 2008 calendar year period shall be zero.

For rates of payment effective for services provided on and after January 1, 2009 through March 31, 2009, a trend factor equal to the otherwise applicable trend factor attributable to the period January 1, 2009 through December 31, 2009, less 1% shall be applied. Effective on and after April 1, 2009 the otherwise applicable final trend factor attributable to the 2009 calendar year period shall be zero.

For rates of payment effective for services provided on and after January 1, 2010 through March 31, 2010, the otherwise applicable final trend factor attributable to the 2010 calendar year period shall be zero.

For rates of payment effective for services provided on and after April 1, 2010, the otherwise applicable trend factor attributable to the 2010 calendar year period shall be zero.

For rates of payment effective for services provided on and after April 1, 2011, the otherwise applicable trend factors attributable to the 2011 through 2014 calendar year periods shall be no greater than zero. For such rates effective for the period January 1, 2015 through March 31, 2015 and for the period April 23, 2015 through December 31, 2015 otherwise applicable trend factors attributable to the 2015 calendar year period shall be no greater than zero. For rates of payment effective for services provided on and after January 1, 2016 through March 31, 2017 and for the period April 1, 2017 through December 31, 2017, the otherwise applicable final trend factor attributable to the 2016 and 2017 calendar year periods shall be zero. For rates of payment effective for services provided on and after January 1, 2018 through March 31, 2019, the otherwise applicable final trend factor attributable to the 2018 and 2019 calendar year periods shall be zero.

TN #17-0034 Approval Date September 25, 2017
Supersedes TN #15-0044 Effective Date April 1, 2017
Providers are grouped geographically into upstate/downstate and by sponsorship, public/voluntary. Ceilings are calculated using the group cost experience. For purposes of establishing rates of payment by governmental agencies for certified home health agencies for the period April 1, 1995 through December 31, 1995, and for rate periods beginning on or after January 1, 1996 through March 31, 1999, and on July 1, 1999 through March 31, 2000, and on and after April 1, 2000 through March 31, 2003, and on and after April 1, 2003 through March 31, 2009, and on and after April 1, 2009 through March 31, 2011, and on and after April 1, 2011 through March 31, 2013, and on and after April 1, 2013 through March 31, 2015, and on and after April 1, 2015 through March 31, 2017, and on and after April 1, 2017 through March 31, 2019, the reimbursable base year administrative and general costs of a provider of services, excluding a provider of services reimbursed on an initial budget basis, and a new provider, excluding changes in ownership or changes in name, who begins operations in the year prior to the year which is used as base year in determining rates of payment, will not exceed the statewide average of total reimbursable base year administrative and general costs of such providers of services. In the 1996, 1997, 1998, 1999, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, and 2009, rate periods respectively the amount of such reduction in certified home health agency rates of payments made during the twelve month period running from April 1, of the year prior to the respective rate period through March 31, of such respective rate period will be adjusted in the respective rate period on a pro-rate basis, if it is determined upon post-audit review by June 15, of the respective rate period and reconciliation, that the savings for the state share, excluding the federal and local government shares, of medical assistance payments is in excess of one million five hundred thousand dollars or is less than one million five hundred thousand dollars for payments made on or before March 31, of the applicable twelve month period to reflect the amount by which such savings are in excess of or lower than one million five hundred thousand dollars. The amount of such reduction in certified home health agency rates of payment made during the period July 1, 1999 through March 31, 2000, will be adjusted in the 2000 rate period on a pro-rate basis, if it is determined upon post-audit review by June 15, 2000 and reconciliation, that the savings for the state share, excluding the federal and local government shares, of medical assistance payments is in excess of one million one hundred twenty-five thousand dollars or is less than one million one hundred twenty-five thousand dollars for payments made on or before March 31, 2000, to reflect the amount by which such savings are in excess of or lower than one million one hundred twenty-five thousand dollars.
Certified home health care agency ceilings.

(a) Effective for services provided on and after April 1, 2011 through March 31, 2012, Medicaid payments for certified home health care agencies (agencies), except for such services provided to children under eighteen years of age, shall reflect ceiling limitations determined in accordance with this section. Ceilings for each agency shall be based on a blend of:

(1) the agency’s 2009 average per patient Medicaid claims, weighted at 51 percent, and

(2) the 2009 statewide average per patient Medicaid claims for all agencies, as adjusted by the regional wage index factor and by each agency’s patient case mix index, and weighted at 49 percent.

(b) Effective for rate periods on and after April 1, 2011, the Department shall determine, based on 2009 claims data, each agency’s projected average per patient Medicaid claim for the period April 1, 2011 through March 31, 2012, as compared to the applicable ceiling, computed pursuant to this section. To the extent that each agency’s projected average claim exceeds such ceiling, the Department shall reduce such agency’s payments for periods on and after April 1, 2011 by the amount that exceeds such ceiling.

(c) The regional wage index factor (WIF) will be computed in accordance with the following and applied to the portion of the statewide average per-patient Medicaid claim attributable to labor costs:

(1) Average wages will be determined for agency service occupations for each of the 10 labor market regions as defined by the New York State Department of Labor.

(2) The average wages in each region will be assigned relative weights in proportion to the Medicaid utilization for each of the agency service categories as reported in the most recently available agency cost report submissions.
(3) Based on the average wages as determined pursuant to this subdivision, as
weighted pursuant to this subdivision, an index will be determined for each region,
based on a comparison of the weighted average regional wages to the statewide
average wages.

(4) The Department will adjust the regional WIFs proportionately, if necessary, to
assure that the application of the WIFs is revenue-neutral on a statewide basis.

(d) Agency specific case mix indexes (CMIs) will be calculated for each agency and applied
to the statewide average CMI. Computation of such CMIs will utilize the episodic
payment system grouper and will reflect:

(1) 2009 adjusted agency Medicaid claims as grouped into 60 day episodes of patient
care;

(2) data for each agency patient as derived from the federal Outcome Assessment
Information Set (OASIS) and as reflecting the assignment of such patients to
OASIS resource groups;

(3) the assignment of a relative weight to each OASIS resource group;

(4) the assignment of each agency's CMI index based on the sum of the weights for
all of its grouped episodes of care divided by the number of episodes.

(e) Ceiling limitations determined pursuant to this section will be subject to retroactive
adjustment and reconciliation. In determining payment adjustments based on such
reconciliation, adjusted agency ceilings will be established. Such adjusted ceilings will be
based on a blend of:

(1) an agency's 2009 average per patient Medicaid claims adjusted by the percentage
of increase or decrease in such agency's patient case mix from the 2009 calendar
year to the annual period April 1, 2011 through March 31, 2012, weighted at 51
percent, and;

(2) the 2009 statewide average per-patient Medicaid claims adjusted by a regional
WIF and the agency's patient case mix index for the annual period April 1, 2011
through March 31, 2012, weighted at 49 percent. Such adjusted agency ceiling will
be compared to actual Medicaid paid claims for the period April 1, 2011 through
March 31, 2012. In those instances when an agency's actual per-patient Medicaid
claims are determined to exceed the agency's adjusted ceiling, the amount of such
excess will be due from each

---

TN #11-50 Approval Date August 25, 2011
Supersedes TN NEW Effective Date April 1, 2011
such agency to the state and will be recouped through reductions in the Medicaid payments due to the agency. In those instances where an interim payment adjustment was applied to an agency, and such agency’s actual per-patient Medicaid claims are determined to be less than the agency’s adjusted ceiling, the amount by which such Medicaid claims are less than the agency’s adjusted ceiling will be remitted to each such agency by the Department in a lump sum amount.

(f) Interim payment adjustments pursuant to this section will be based on Medicaid paid claims for services provided by agencies in the base year 2009. Amounts due from reconciling payment adjustments will be based on Medicaid paid claims for services provided by agencies in the base year 2009 and Medicaid paid claims for services provided by agencies in the reconciliation period April 1, 2011 through March 31, 2012.

(g) The payment adjustments will not result in an aggregate annual decrease in Medicaid payments to providers in excess of $200 million. If upon reconciliation it is determined that application of the calculated ceilings would result in an aggregate annual decrease of more than $200 million, all providers' ceilings would be adjusted proportionately to reduce the decrease to $200 million. Such reconciliation will not be subject to subsequent adjustment.

(h) The Commissioner may require agencies to collect and submit any data required to implement the provisions of this subdivision.

(i) Effective May 2, 2012 through March 31, 2019, Medicaid payments for services provided by certified home health agencies, except for such services provided to children under 18 years of age and [effective May 2, 2012] except for services provided to a special needs population of medically complex and fragile children, adolescents and young disabled adults by a CHHA operating under a pilot program approved by the Department, will be based on payment amounts calculated for 60-day episodes of care. The Commissioner will establish a base price for 60-day episodes of care, and this price will be adjusted for the case mix index, which applies to each patient, and for regional wage differences. Effective May 2, 2012 through March 31, 2019, such case mix adjustments will include an adjustment factor for CHHAs providing care to Medicaid-eligible patients, more than 50%, but no fewer than two hundred, of whom are eligible for OPWDD services.

The initial statewide episodic base price to be effective May 2, 2012, will be calculated based on paid Medicaid claims, as determined by the Department, for services provided by all certified home health agencies during the base year period of January 1, 2009 through December 31, 2009. The base price will be calculated by grouping all paid claims in the base period into 60-day episodes of care. All such 2009 episodes, which include episodes beginning in November or December of 2008 or ending in January or
February of 2010, will be included in the base price calculation. Low utilization episodes of care, as defined below, shall be excluded from the base price calculation. For high utilization episodes of care, costs in excess of outlier thresholds shall be excluded from the base price calculation. The remaining costs will be divided by the number of episodes to determine the unadjusted base price. The resulting base price shall be subject to further adjustment as is required to comply with the aggregate savings mandated by paragraph (b) of subdivision 13 of section 3614 of the Public Health Law (PHL). The applicable base year for determining the episodic base price will be updated not less frequently than every three years.

The case mix index applicable to each episodic claim, excluding low utilization claims, shall be based on patient information contained in the federal Outcome Assessment Information Set (OASIS). The patient shall be assigned to a resource group based on data which includes, but is not limited to, clinical and functional information, age group, and the reason for the assessment. A case mix index shall be calculated for each resource group based on the relative cost of paid claims during the base period.

To determine the case mix adjustment factor for agencies providing care to Medicaid-eligible patients of whom more than 50%, and no fewer than 200, are eligible for OPWDD services, total Medicaid claims reimbursement received by each qualified agency during the statutory base year for the Episodic Payment System (calendar year 2009 and subsequently determined base years) will be compared to the projected total reimbursement that would result from applying the episodic methodology to the same services billed in the base year. If the projected episodic reimbursement is less than the actual base year reimbursement, the percentage difference will be applied to the case mix index for all of the agency's episodic claims in order to equalize the traditional fee-for-service and estimated episodic reimbursement totals. All of the provider's episodic rates (which consist of case mix index multiplied by the statewide base price) will be increased by this percentage.

A regional wage index will be calculated for each of the ten labor market regions in New York as defined by the New York State Department of Labor. Average wages will be determined for the health care service occupations applicable to certified home health agencies. The average wages in each region shall be assigned relative weights in proportion to the Medicaid utilization for each of the agency service categories reported in the most recently available agency Medicaid cost report submissions. Weighted average wages for each region will be compared to the statewide average wages to determine an index for each region. The wage index will be applied to the portion of each payment which is attributable to labor costs. If necessary, the Department will adjust the regional index values proportionately to assure that the application of the index values is revenue-neutral on a statewide basis.

Payments for low utilization cases shall be based on the statewide weighted average of fee-for-service rates for services provided by certified home health agencies, as adjusted by the applicable regional wage index factor. Low utilization cases will be defined as 60-day episodes of care with a total cost of $500 or less, based on statewide weighted average fee-for-service rates paid on a per-visit, per-hour, or other appropriate basis, calculated prior to the application of the regional wage index factor.
New York
4(7)

Payments for 60-day episodes of care shall be adjusted for high-utilization cases in which total costs, based on statewide weighted average fee-for-service rates paid on a per-visit, per-hour, or other appropriate basis, exceed outlier cost thresholds determined by the Department for each case mix group. In such cases the provider will receive the adjusted episodic base payment, plus 50% of the total costs which exceed the outlier threshold. Both the base payment and the excess outlier payment will be adjusted by the regional wage index factor. The percentage of excess costs to be reimbursed shall be subject to such further adjustment as deemed necessary to comply with the aggregate savings mandated by PHL section 3614(13)(b).

The outlier threshold for each resource group shall be equal to a specified percentile of all episodic claims totals for the resource group during the base period, excluding low utilization episodes. Such percentiles shall range from the seventieth percentile for groups with the lowest case mix index to the ninetieth percentile for groups with the highest case mix index.

Services provided to maternity patients, defined as patients who are currently or were recently pregnant and are receiving treatment as a direct result of such pregnancy, may be reimbursed pursuant to this section without the submission of the patient information contained in the federal Outcome Assessment Information Set (OASIS), provided that providers billing for such services must bill in accordance with such special billing instructions as may be established by the Commissioner, and such patients shall receive a case mix designation based on the lowest acuity resource group.

Payments for episodes of care shall be proportionately reduced to reflect episodes of care totaling less than 60 days provided, however, that CHHAs will receive reimbursement for a full episode of care if the episode totaled less than 60 days and the patient was discharged to the home, to a hospital, or to a hospice, or if the episode ended due to the death of the patient. Payments will be proportionately reduced if the patient transferred to a different CHHA before the end of the 60-day episode.
For services provided on and after May 1, 2012, through March 31, 2019, please see the website below for detailed information, which includes information related to the following components of payments for 60-day episodes of care including (as posted on March 14, 2012):

- Definition of 60-day episode of care
- Base price
- Resource groups
- Case mix indices
- Outlier thresholds
- Regional wage index factors
- Weighted average rates used to calculate total costs

For periods on and after March 1, 2014, the Commissioner of Health will increase Medicaid rates of payment for services provided by certified home health agencies (CHHA) to address cost increases stemming from the wage increases required by implementation of the provisions of section 3614-c of the Public Health Law.

The payment increase for CHHA episodic rates will equal the difference between the minimum per hour rate and the weighted average home health aide rate reflected in the 2009 episodic expenditure base and subsequently determined episodic base periods. This amount will be further adjusted for accurate application to the episodic bundled payment to insure the adjustment is applied to the estimated home health aide portion of the episodic payment and not to the estimated professional nursing and therapy services portions of the payment. An adjustment is also made to reflect the minimum home health aide rate in the low utilization and outlier components of the rate calculation.

For CHHA non-episodic rates (the payment for qualified individuals under 18 years of age), an add-on will be provided which represents the difference between the home health hourly rate in the current rate and the minimum home health aide hourly rate.
Temporary Rate Adjustments for Mergers, Acquisitions, Consolidations, Restructurings, and Closures - Certified Home Health Agencies (CHHAs)

A temporary rate adjustment will be provided to eligible CHHA providers that are subject to or impacted by the closure, merger, and acquisition, consolidation or restructuring of a health care provider. The rate adjustment is intended to:

- Protect or enhance access to care;
- Protect or enhance quality of care; or
- Improve the cost effectiveness.

Eligible CHHA providers, the annual amount of the temporary rate adjustment, and the duration of the adjustment shall be listed in the table which follows. The total annual adjustment amount will be paid quarterly with the amount of each quarterly payment being equal to one fourth of the total annual amount established for each provider. The quarterly payment made under this section will be an add-on to services payments made under this Attachment to such facilities during the quarter.

To remain eligible, providers must submit benchmarks and goals acceptable to the Commissioner and must submit periodic reports, as requested by the Commissioner, concerning the achievement of such benchmarks and goals. Failure to achieve satisfactory progress in accomplishing such benchmarks and goals will result in termination of the provider's temporary rate adjustment prior to the end of the specified timeframe. Once a provider’s temporary rate adjustment ends, the provider will be reimbursed in accordance with the otherwise applicable rate-setting methodology as set forth in this Attachment.

Temporary rate adjustments have been approved for the following providers in the amounts and for the effective periods listed.

Supersedes TN  #13-0071  Effective Date  January 1, 2014
Temporary Rate Adjustments for Mergers, Acquisitions, Consolidations, Restructurings, and Closures – Licensed Home Care Services Agencies (LHCSA)

A temporary rate adjustment will be provided to eligible LHCSA providers that are subject to or impacted by the closure, merger, and acquisition, consolidation or restructuring of a health care provider. The rate adjustment is intended to:

- Protect or enhance access to care;
- Protect or enhance quality of care; or
- Improve the cost effectiveness.

Eligible LHCSA providers, the annual amount of the temporary rate adjustment, and the duration of the adjustment shall be listed in the table which follows. The total annual adjustment amount will be paid quarterly with the amount of each quarterly payment being [equal to one fourth of] equally divided for the total annual amount established for each provider. The quarterly payment made under this section will be an add-on to services payments made under this Attachment to such facilities during the quarter.

To remain eligible, providers must submit benchmarks and goals acceptable to the Commissioner and must submit periodic reports, as requested by the Commissioner, concerning the achievement of such benchmarks and goals. Failure to achieve satisfactory progress in accomplishing such benchmarks and goals will result in termination of the provider's temporary rate adjustment prior to the end of the specified timeframe. Once a provider's temporary rate adjustment ends, the provider will be reimbursed in accordance with the otherwise applicable rate-setting methodology as set forth in this Attachment.

Temporary rate adjustments have been approved for the following providers in the amounts and for the effective periods listed.

**TN #18-0047 Approval Date: August 10, 2018**

**Supersedes TN #17-0051 Effective Date: May 10, 2018**
For the rate periods on and after January 1, 2005 through December 31, 2006, and April 1, 2007 through March 31, 2009, there shall be no such reconciliation of the amount of savings in excess of or lower than one million five hundred thousand dollars.

In addition, separate payment rates for nursing services provided to patients diagnosed with Acquired Immune Deficiency Syndrome (AIDS) shall be established based upon regional services prices. Such prices shall be computed based upon average nursing costs per visit calculated by aggregating base year allowable costs and statistics reported by certified home health agencies within each of four state regions, and increased by a case mix adjustment factor which represents the relative ratio of additional resources needed to provide home care nursing services to AIDS patients when compared to the average case mix of home care patients. Such AIDS regional nursing prices will be trended annually.

Effective for services provided on and after April 1, 2011, separate payment rates will no longer be established for nursing services provided to patients diagnosed with AIDS; the rate for nursing services provided to patients diagnosed with AIDS will be the prospective certified home health agency rate for nursing services established for the effective period.

The Commissioner shall adjust medical assistance rates of payment for services provided by AIDS home care programs for purposes of improving recruitment and retention of non-supervisory home care services workers or any worker with direct patient care responsibility in the following amounts for services provided on and after December first, two thousand two.

Rates of payment by governmental agencies for AIDS home care programs (including services provided through contracts with licensed home care services agencies) shall be increased by three percent.

Providers which have their rates adjusted for this purpose shall use such funds solely for the recruitment and retention of non-supervisory home care services workers or any worker with direct patient care responsibility. Providers are prohibited from using such funds for any other purpose.

The Commissioner is authorized to audit each provider to ensure compliance with this purpose and shall recoup any funds determined to have been used for purposes other than recruitment and retention of non-supervisory home care services workers or any worker with direct patient care responsibility.

In the case of services provided by providers through contracts with licensed home care services agencies, rate increases received by providers shall be reflected in either the fees paid or benefits or other supports provided to non-supervisory home care services workers or any worker with direct patient care responsibility of such contracted licensed home care services agencies and such fees, benefits or other supports shall be proportionate to the contracted
volume of services attributable to each contracted agency. Such agencies shall submit to
providers with which they contract written certifications attesting that such funds will be used
solely for the purposes of recruitment and retention of non-supervisory home care services
workers or any worker with direct patient care responsibility and shall maintain in their files
expenditure plans specifying how such funds will be used for such purposes. The Commissioner is
authorized to audit such agencies to ensure compliance with such certifications and expenditure
plans and shall recoup any funds determined to have been used for purposes other than those set
forth in this section.

The Commissioner of Health will additionally adjust rates of payment for AIDS home care
service providers, for the purpose of improving recruitment and retention of home health aides or
non-supervisory personnel with direct patient care responsibility.

These additional adjustments to rates of payments shall be calculated by allocating the
available funding proportionally based on each AIDS home care service provider’s, home health
aide or other direct care services total annual hours of service provided to Medicaid patients, as
reported in each such agency’s most recently available cost report as submitted to the
Department. The total aggregate available funding for AIDS home care service providers is as
follows:

- For the period June 1, 2006 through December 31, 2006 - $540,000.
- For the period January 1, 2007 through June 30, 2007 - $540,000.
- For the period July 1, 2007 through March 31, 2008 - $1,080,000.
- For the period April 1, 2008 through March 31, 2009 - $1,080,000.
- For the period April 1, 2009 through March 31, 2010 - $1,080,000.
- For the period April 1, 2010 through March 31, 2011 - $1,080,000.
- For the period April 1, 2011 through March 31, 2012 - $1,080,000.
- For the period April 1, 2012 through March 31, 2013 - $1,080,000.
- For the period April 1, 2013 through March 31, 2014 - $1,080,000.
- For the period April 1, 2014 through March 31, 2015 - $1,080,000.
- For the period April 1, 2015 through March 31, 2016 - $1,080,000.
- For the period April 1, 2016 through March 31, 2017 - $1,080,000.
- For the period April 1, 2017 through March 31, 2018 - $1,080,000.
- For the period April 1, 2018 through March 31, 2019 - $1,080,000.
- For the period April 1, 2019 through March 31, 2020 - $1,080,000.

Payments made pursuant to this section shall not be subject to subsequent adjustment or
reconciliation.

For providers established after November 1, 2005, the Department utilizes Medicaid data
from the initial cost report submitted to the Department, which would allow the inclusion of those
providers in the distribution.

TN #17-0042 Approval Date September 26, 2017
Supersedes TN #14-0025 Effective Date April 1, 2017
New York
4(a)(i)(A)

Funds received through this program are to be used solely for the purposes of recruitment and retention of non-supervisory home care services workers or other personnel with direct patient care responsibility. Each agency receiving funds shall submit, at a time and in a manner determined by the Commissioner, a written certification attesting that such funds will be used solely for the purpose of recruitment and retention of non-supervisory home health aides or any personnel with direct patient care responsibility. The Commissioner is authorized to audit each such agency or program to ensure compliance with this written certification and may recoup any funds determined to have been used for purposes other than recruitment and retention of non-supervisory home health aides or other personnel with direct patient care responsibility. All government and non-government owned or operated providers are eligible for this adjustment pursuant to the same uniformly applied methodology.

[Accessibility, Quality, and, Efficiency of Home Care Services]

The Commissioner of Health shall adjust rates of payment for services provided by AIDS home care service providers for the purpose of enhancing the provision, accessibility, quality, and/or efficiency of home care services. These rate adjustments shall be for the purposes of assisting such providers, located in social services districts that do not include a city with a population of over one million persons, in meeting the cost of:

(i) Increased use of technology in the delivery of services, including clinical and administrative management information systems;
(ii) Specialty training of direct service personnel in dementia care, pediatric care, and/or the care of other conditions or populations with complex needs;
(iii) Increased auto and travel expenses associated with rising fuel prices, including the increased cost of providing services in remote areas;
(iv) Providing enhanced access to care for high need populations.

The Commissioner shall increase the rates of payment for all eligible providers in an aggregate amount of $16,000,000 annually for the periods June 1, 2006 through March 31, 2007, July 1, 2007 through March 31, 2008, and June 1, 2008 through March 31, 2009.

Rates will be adjusted in the form of a uniform percentage add-on as calculated by the Department, based upon the proportion of total allocated dollars, to the total Medicaid expenditures for covered home care services provided in local social services districts that do not include a city with a population over one million. All government and non-government owned or operated providers are eligible for this adjustment pursuant to the same uniformly applied methodology.

Criminal Background Checks for AIDS Home Care Program Providers

Effective April 1, 2005, AIDS home care program providers must obtain a criminal history record check from the United States Attorney General for any prospective unlicensed direct care employee. This includes obtaining, as part of an application for employment, all information from a prospective employee necessary for initiating the criminal history record]

TN #11-15 Approval Date September 7, 2011
Supersedes TN #08-33 Effective Date April 1, 2011
Accessibility, Quality, and Efficiency of Home Care Services

The Commissioner of Health shall adjust rates of payment for services provided by AIDS home care service providers for the purpose of enhancing the provision, accessibility, quality, and/or efficiency of home care services. These rate adjustments shall be for the purposes of assisting such providers, located in social services districts that do not include a city with a population of over one million persons, in meeting the cost of:

(i) Increased use of technology in the delivery of services, including clinical and administrative management information systems;

(ii) Specialty training of direct service personnel in dementia care, pediatric care, and/or the care of other conditions or populations with complex needs;

(iii) Increased auto and travel expenses associated with rising fuel prices, including the increased cost of providing services in remote areas;

(iv) Providing enhanced access to care for high need populations.

The Commissioner shall increase the rates of payment for all eligible providers in an aggregate of $16,000,000 annually for the period June 1, 2006 through March 31, 2007, July 1, 2007 through March 31, 2008, and June 1, 2008 through March 31, 2009.

Rates will be adjusted in the form of a uniform percentage add-on as calculated by the Department, based upon the proportion of total allocated dollars, to the total Medicaid expenditures for covered home care services provided in local social services districts that do not include a city with a population over one million. All government and non-government owned or operated providers are eligible for this adjustment pursuant to the same uniformly applied methodology.

Criminal Background Checks for AIDS Home Care Program Providers

Effective April 1, 2005, AIDS home care program providers must obtain a criminal history record check from the United States Attorney General for any prospective unlicensed direct care employee. This includes obtaining, as part of an application for employment, all information from a prospective employee necessary for initiating the criminal history record check.
check, including, but not limited to, a fingerprint card of the prospective employee. The federal fee and the costs associated with obtaining the fingerprint card shall be separately identified on any report of costs submitted to the Department of Health and shall be deemed an allowable cost for Medicaid rates of payment. Reimbursement for the period April 1, 2005 through March 31, 2006 and for the period April 1, 2006 through [March 31, 2007] August 31, 2006, shall be made retrospectively based upon cost reports submitted for the 2005 and 2006 rate years, respectively. For new providers or existing providers for which cost report data is unavailable, payment will be based on budgeted costs and subsequently prospectively adjusted to reflect actual costs. Reimbursement for all types of providers shall total no more than $5,000,000 for the April 1, 2005 through March 31, 2006 period and no more than [$13,4000,000] $5,600,000 for the April 1, 2006 through [March 31, 2007] August 31, 2006 period. Reimbursement for the Medicaid share of these costs shall be in the form of an add-on to the current rates of payment and will be determined by the percent of Medicaid utilization to total utilization for each provider. If the total cost for these criminal background checks for all types of providers exceeds the amounts set forth for the specified period, provider specific reimbursement will be reduced proportionally based on each eligible provider’s reported costs for criminal background checks to the total costs of criminal background checks of all eligible providers.

Effective September 1, 2006. AIDS home care program providers shall request criminal history background checks from the Department of Health for unlicensed prospective employees who will provide direct care or supervision to patients, residents, or clients of such providers. The criminal history information consists of both a state and a national criminal history check.

AIDS home care program providers may claim as reimbursable costs under the medical assistance program, costs reflecting the fee established pursuant to law by the NYS Division of Criminal Justice Services for processing a state criminal history information check, the fee imposed by the Federal Bureau of Investigation for a national criminal history check, and the administrative costs associated with obtaining the fingerprints and completing the fingerprint cards. These costs shall be separately identified on any report of costs submitted to the Department of Health.

Reimbursement for the Medicaid share of these costs shall be in the form of an add-on to the current Medicaid rate of payment based on the costs reported for the period two years prior to the rate period. The proportionate costs for criminal background checks will be allocated to Medicaid based on the percent of Medicaid utilization of services provided to the total services provided for all payers, services being defined as units of service (i.e. hours or visits). The costs allocated to Medicaid will be divided by the Medicaid units of service for the period two years prior to the rate year to constitute the rate add-on.
Reimbursement for Personal Emergency Response Services (PERS) will be provided under the auspices of SDSS through contractual arrangements between the LDSS and the provider. Locally negotiated rates must include the costs for renting or leasing PERS equipment, the installation, maintenance, and the removal of PERS equipment from the clients home. A second rate must also be negotiated by the local district for a monthly monitoring service charge. These two rates must not exceed the local prevailing rate or the SDSS established cap.

For the period April 1, 1995 through March 31, 1996, the Department of Social Services in consultation with the Department of Health shall establish a state share medical assistance cost savings target for each certified home health agency, which is to be achieved as a result of the agency’s development and implementation of personal emergency response services and shared aide efficiency initiatives. The aggregate of such state share targets shall not exceed fifteen million five hundred thousand dollars.

Services Provided To Medically Fragile Children

For purposes of this section, a medically fragile child shall mean a child, up to twenty-one years of age, who is at risk of hospitalization or institutionalization for reasons that include but are not limited to the following: children who are technologically-dependent for life or health-sustaining functions; require complex medication regimen or medical interventions to maintain or improve their health status; or are in need of ongoing assessment or intervention to prevent serious deterioration of their health status or medical complications that place their life, health or development at risk. These children are capable of being cared for at home if provided with appropriate home care services including but not limited to continuous nursing services.

For the period beginning January 1, 2007 and thereafter [through December 31, 2010], rates of payment for continuous nursing services for medically fragile children provided by a certified home health agency, or by registered nurses or licensed practical nurses who are independent providers, shall be established to ensure the availability of such services, and shall be established at a rate that is thirty percent higher than the provider’s current rate for private duty nursing services. A certified home health agency that receives such rates for continuous nursing services for medically fragile children shall use such enhanced rates to increase payments to registered nurses and licensed practical nurses who provide these services. All government and non-government owned or operated providers are eligible for this adjustment pursuant to the same uniformly applied methodology.
Home Telehealth Services

Beginning October 1, 2007, the Commissioner of Health is authorized to establish fees to reimburse the cost of home telehealth services provided by a certified home health agency, including those that provide AIDS home care services.

The Commissioner shall reimburse for telehealth services if such services are provided only in connection with federal Food and Drug Administration approved and interoperable devices, which are incorporated as part of a patient's plan of care.

The purpose of providing telehealth services shall be to assist in the effective monitoring and management of patients whose medical, functional, and/or environmental needs can be appropriately and cost-effectively met at home through the application of telehealth intervention.

Reimbursement for home telehealth services is to be provided for Medicaid patients with conditions or clinical circumstances associated with the need for frequent monitoring, and/or the need for frequent physician, skilled nursing or acute care services, and where the provision of telehealth services can appropriately reduce the need for on-site or in-office visits or acute long term care facility admissions. Conditions or clinical circumstances shall include, but not be limited to, congestive heart failure, diabetes, chronic pulmonary obstructive disease, wound care, polypharmacy, mental or behavioral problems limiting self-management, and technology-dependent care such as continuous oxygen, ventilator care, total parenteral nutrition or enteral feeding.

Rates established by the Commissioner of Health and approved by the Director of the Budget shall reflect telehealth services costs on a daily basis to account for daily variation in the intensity and complexity of patients' telehealth service needs. Such rates shall further reflect the cost of the daily operation and provision of such services including the following functions performed by a participating certified home health agency:
New York
4(a)(i)(5)

(i) monitoring of patient vital signs;
(ii) patient education;
(iii) medication management;
(iv) equipment maintenance; and
(v) review of patient trends and/or other changes in patient condition necessitating professional intervention.

Daily rates for home telehealth services provided to Medicaid patients shall not exceed $9.65 per day per patient for clients with a class 2 device capable of interoperability and $11.08 per client per day for clients with a device connected to a home care point of care system. A one time installation fee of $50 shall also be payable for devices installed in client homes on and after October 1, 2007.

All providers will be required to disallow any cost (nursing or equipment) related to the provision of the telehealth service from the base year cost utilized to determine rates for other cost based CHHA services such as nursing and home health aide.

Effective for services on or after October 1, 2007, the following uniform fees will be paid by governmental and non-governmental providers:

- Installation $50 per installation
- Daily Monitoring - Type 1 $8.88 per day
- Daily Monitoring - Type 2 $10.19 per day

TN: #07-45
Supersedes TN: NEW
Approval Date: December 14, 2010
Effective Date: October 1, 2007
New York
4(a)(i)(6)

Telehealth Services - Store and Forward

The Commissioner of Health is authorized to establish fees, approved by the Director of the Budget, to reimburse the cost of consultations [in the specialty areas of ophthalmology and dermatology] provided via telehealth store and forward technology.

Telehealth store and forward technology involves the asynchronous, secure electronic transmission of a patient's health information in the form of patient-specific digital images and/or pre-recorded videos from a [qualified physician, nurse practitioner, midwife, or physician assistant,] provider at an originating site to a consulting [physician] provider at a distant site without the patient present. Reimbursement for telehealth store and forward services is to be provided for Medicaid patients with conditions or clinical circumstances where the provision of telehealth services can appropriately reduce the need for on-site or in-office visits.

[The Commissioner shall reimburse for telehealth store and forward technology if such services are provided with federal Food and Drug Administration approved interoperable devices, which are incorporated as part of a patient’s plan of care.]

Reimbursement will be made to the consulting [physician] provider. Telehealth store and forward technology is reimbursed at [50] 75% of the applicable [physician] fee for the evaluation and management code that applies. [The physician] Provider fee schedules can be found at

https://www.emedny.org/ProviderManuals/index.aspx

[https://www.emedny.org/ProviderManuals/Physician/]

TN ____18-0043______ Approval Date 07/18/2018
Supersedes TN ____#16-0015______ Effective Date 04/01/2018
Telehealth Services - Remote Patient Monitoring

Rates established by the Commissioner of Health and approved by the Director of the Budget [shall] will reflect telehealth remote patient monitoring costs on a [daily] monthly basis when medically necessary remote patient monitoring has taken place. A [daily] monthly fee will be paid to the ordering telehealth provider for each [day] month the telehealth remote patient monitoring equipment is used to monitor/manage the patient's care. [This amount will not exceed a designated monthly rate.]

Effective for services on or after [June 1, 2016] April 1, 2018, rates for remote patient monitoring [shall] will be the amount billed by the provider not to exceed $48.00 per [day] month. The [maximum rate] minimum time that may be billed for remote patient monitoring is 30 minutes per month per patient [shall not exceed $32.00]. Services less than 30 minutes are not eligible for reimbursement.
New York
4(a)(ii)

The Department of Health shall calculate an adjustment to the approved rate of payment for the period July 1, 1995 to December 31, 1995, for each such agency by an amount sufficient to achieve its agency-specific savings target, as established by the Department of Social Services, prior to March 31, 1996. Such adjustment shall not be considered a rate change or rate adjustment, but shall serve as an offset of payments to the agency against its liability to the state for savings to be achieved under its agency-specific target, as established by the Department of Social Services.

On or before January 1, 1996, the Department of Social Services shall notify agencies of the progress made toward reaching the specific targets, including information on the number of new clients being served, the types of services provided, and the amount of any state funds which have been offset from their rates and applied to the agency target. Any agency that believes that the offset of its payments was incorrect may request the Commissioner of the Department of Social Services to review its payments by filing a written request for review with such Commissioner within ten days of receipt of such notice. If, after reviewing the determination, the Commissioner of the Department of Social Services finds that the payments were incorrect, such Commissioner shall determine the amount of the payments to be restored, if any, and authorize the payment of any account incorrectly offset, as soon as possible, but in no event later than June 30, 1996.

As soon as practicable after March 31, 1996, the Commissioner of Social Services shall review the total payments made to each such agency; the amount of the offset from payments otherwise due the agency; and the total savings actually achieved by the agency as a result of the agency's development and implementation of personal emergency response systems and share aide efficiencies initiatives. If the Commissioner of Social Services determines that payments to any agency were offset in an amount greater than was necessary to meet its agency-specific savings target given the agency's actual savings achieved, the Commissioner of Social Services shall authorize payment of such amount to such agency, as soon as possible, but in no event later than June 30, 1996. Any agency dissatisfied with the determination of the Commissioner of Social Services may request the Commissioner of Social Services to review its payments, offsets and savings achieved by filing a written request for review with such Commissioner within ten days of receipt of such notice. If, after reviewing the determination, such Commissioner finds that the determination was incorrect, such Commissioner shall determine the amount of the payments to be restored, if any, and authorize the payment of any amount incorrectly offset, as soon as possible, but in no event later than September 30, 1996.
Effective for the period August 1, 1996 through November 30, 2009, certified home health agencies (CHHAs) will be required to increase their Medicare revenues relative to their Medicaid revenues measured from a base period (calendar year 1995) to a target period (the 1996 target period is August 1, 1996 through March 31, 1997, the 1997 target period is January 1, 1997 through November 30, 1997, the 1998 target period will mean January 1, 1998 through November 30, 1998, the 1999 target period will mean January 1, 1999 through November 30, 1999, the 2000 target period will mean January 1, 2000 through November 30, 2000, the 2001 target period will mean January 1, 2001 through November 30, 2001, the 2002 target period will mean January 1, 2002 through November 30, 2002, the 2003 target period will mean January 1, 2003 through November 30, 2003, the 2004 target period will mean January 1, 2004 through November 30, 2004, the 2005 target period will mean January 1, 2005 through November 30, 2005, the 2006 target period will mean January 1, 2006 through November 30, 2006, the 2007 target period will mean January 1, 2007 through November 30, 2007, the 2008 target period will mean January 1, 2008 through November 30, 2008, the 2009 target period will mean January 1, 2009 through November 30, 2009, and the 2010 target period will mean January 1, 2010 through November 30, 2010, and the 2011 target period will mean January 1, 2011 through November 30, 2011, and the 2012 target period will mean January 1, 2012 through November 30, 2012 and the 2013 target period will mean January 1, 2013 through November 30, 2013, and the 2014 target period will mean January 1, 2014 through November 30, 2014, and the 2015 target period will mean January 1, 2015 through November 30, 2015, and the 2016 target period will mean January 1, 2016 through November 30, 2016, and the 2017 target period will mean January 1, 2017 through November 30, 2017, and the 2018 target period will mean January 1, 2018 through November 30, 2018, and the 2019 target period will mean January 1, 2019 through November 30, 2019 or receive a reduction in their Medicaid payments. For this purpose, regions will consist of a downstate region comprised of Kings, New York, Richmond, Queens, Bronx, Nassau and Suffolk counties and an upstate region comprised of all other New York State counties. A certified home health agency will be located in the same county utilized by the Commissioner of Health for the establishment of rates pursuant to Article 36 of the Public Health Law. Regional group will mean all those CHHAs located within a region. Medicaid revenue percentage will mean CHHA revenues attributable to services provided to persons eligible for payments pursuant to Title 11 of Article 5 of the Social Services law divided by such revenues plus CHHA revenues attributable to services provided to beneficiaries of Title XVIII of the Federal Social Security Act (Medicare).
New York
4(a)(iii)(A)

Prior to February 1, 1997, for each regional group, 1996 Medicaid revenue percentage for the period commencing August 1, 1996, to the last date for which such data is available and reasonably accurate will be calculated. Prior to February 1, 1998, prior to February 1, 1999, prior to February 1, 2000, prior to February 1, 2001, prior to February 1, 2002, prior to February 1, 2003, prior to February 1, 2004, prior to February 1, 2005, prior to February 1, 2006, prior to February 1, 2007, prior to February 1, 2008, prior to February 1, 2009, prior to February 1, 2010, prior to February 1, 2011, prior to February 1, 2012, prior to February 1, 2013, prior to February 1, 2014, prior to February 1, 2015, prior to February 1, 2016, [and] prior to February 1, 2017, prior to February 1, 2018, and prior to February 1, 2019, for each regional group, the Commissioner of Health will calculate the prior years Medicaid revenue percentages for the period beginning January 1 through November 30 of such prior year. By September 15, 1996, for each regional group, the base period Medicaid revenue percentage will be calculated.

For each regional group, the 1996 target Medicaid revenue percentage will be calculated by subtracting the 1996 Medicaid revenue reduction percentages from the base period Medicaid revenue percentages. The 1996 Medicaid revenue reduction percentage, taking into account regional and program differences in utilization of Medicaid and Medicare services, for the following regional groups will be equal to:

one and one-tenth percentage points for CHHAs located within the downstate region;

and,

six-tenths of one percentage point for CHHAs located within the upstate region.

one and one-tenth percentage points for CHHAs located within the downstate region; and,

six-tenths of one percentage point for CHHAs located within the upstate region.

For each regional group, the 1999 target Medicaid revenue percentage will be calculated by subtracting the 1999 Medicaid revenue reduction percentage from the base period Medicaid revenue percentage. The 1999 Medicaid revenue reduction percentages, taking into account regional and program differences in utilization of Medicaid and Medicare services, for the following regional groups will be equal to:

eight hundred twenty-five thousandths (.825) of one percentage point for CHHAs located within the downstate region;

forty-five hundredths (.45) of one percentage point for CHHAs located within the upstate region;

For each regional group, if the 1996 Medicaid revenue percentage is not equal to or less than the 1996 target Medicaid revenue percentage, a 1996 reduction factor will be calculated by comparing the 1996 Medicaid revenue percentage to the 1996 target Medicaid revenue percentage to determine the amount of the shortfall and dividing such shortfall by the 1996 Medicaid revenue reduction percentage. These amounts, expressed as a percentage, will not exceed one hundred percent. If the 1996 Medicaid revenue percentage is equal to or less than 1996 target Medicaid revenue percentage, the 1996 reduction factor will be zero. For each regional group, the 1996 reduction factor will be multiplied by the following amounts to determine each regional group's applicable 1996 state share reduction amount.

two million three hundred ninety thousand dollars ($2,390,000) for CHHAs located within the downstate region;

seven hundred fifty thousand dollars ($750,000) for CHHAs located within the upstate region.

TN #17-0034 Approval Date September 25, 2017
Supersedes TN #15-0028 Effective Date April 1, 2017
For each regional group reduction, if the 1996 reduction factor will be zero, there will be no 1996 state share reduction amount.

For 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, [and] 2017, 2018, and 2019, for each regional group, if the Medicaid revenue percentage for the respective year is not equal to or less than the target Medicaid revenue percentage for such respective year, the Commissioner of Health will compare such respective year's Medicaid revenue percentage to such respective year's target Medicaid revenue percentage to determine the amount of the shortfall which, when divided by the respective year's Medicaid revenue reduction percentage, will be called the reduction factor for such respective year. These amounts, expressed as a percentage, will not exceed one hundred percent. If the Medicaid revenue percentage for a particular year is equal to or less than the target Medicaid revenue percentage for that year, the reduction factor for that year will be zero.

two million three hundred ninety thousand dollars ($2,390,000) for CHHAs located within the downstate region;

seven hundred fifty thousand dollars ($750,000) for CHHAs located within the upstate region;

For each regional group reduction, if the reduction factor for a particular year is zero, there will be no state share reduction amount for such year.

For each regional group, the 1999 reduction factor will be multiplied by the following amounts to determine each regional group's applicable 1999 state share reduction amount:

one million seven hundred ninety-two thousand five hundred dollars ($1,792,500) for CHHAs located within the downstate region;

five hundred sixty-two thousand five hundred dollars ($562,500) for CHHAs located within the upstate region;

For each regional group reduction, if the 1999 reduction factor is zero, there will be no 1999 state share reduction amount.

For each regional group, the 1996 state share reduction amount will be allocated among CHHAs on the basis of the extent of each CHHA's failure to achieve the 1996 target Medicaid revenue percentage, calculated on a provider specific basis utilizing revenues for this purpose, expressed as a proportion of the total of each CHHA's failure to achieve the 1996 target Medicaid revenue percentage within the applicable regional group. This proportion will be multiplied by the applicable 1996 state share reduction amount. This amount will be called the 1996 provider specific state share reduction amount.

The 1996 provider specific state share reduction amount will be due to the state from each CHHA and may be recouped by the State by March 31, 1997, in a lump sum amount or amounts from payments due to the CHHA pursuant to Title 11 of Article 5 of the Social Services Law.

For 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, [and] 2017, 2018, and 2019, for each regional group, the state share reduction amount for the respective year will be allocated among CHHAs on the basis of the extent of each CHHA's failure to achieve the target Medicaid revenue percentage for the applicable year, calculated on a provider specific basis utilizing revenues for this purpose, expressed as a proportion of the total of each CHHA's failure to achieve the target Medicaid revenue percentage for the applicable year within the applicable regional group. This proportion will be multiplied by the applicable year's state share reduction amount for the applicable regional group. This amount will be called the provider specific state share reduction amount for the applicable year.
New York
4(a)(v)

CHHAs will submit such data and information at such times as the Commissioner of Health may require. The Commissioner of Health may use data available from third party payors.

On or about June 1, 1997, for each regional group, the Commissioner of Health will calculate for the period of August 1, 1996 through March 31, 1997, a Medicaid revenue percentage, a reduction factor, a state share reduction amount, and a provider specific state share reduction amount in accordance with the methodology provided herein for calculating such amounts for the 1996 target period. The provider specific state share reduction amount calculated will be compared to the 1996 provider specific state share reduction amount. Any amount in excess of the 1996 provider specific state share reduction amount will be due to the state from each CHHA and may be recouped. If the amount is less than the 1996 provider specific state share reduction amount, the difference will be refunded to the CHHA by the state no later than July 15, 1997. CHHAs will submit data for the period August 1, 1996 through March 31, 1997, to the Commissioner of Health by April 15, 1997.

If a CHHA fails to submit data and information as required, such CHHA will be presumed to have no decrease in Medicaid revenue percentage between the base period and the applicable target period for purposes of the calculations described herein and the Commissioner of Health will reduce the current rate paid to such CHHA by state governmental agencies pursuant to Article 36 of the Public Health Law by one percent for the period beginning on the first day of the calendar month following the applicable due date as established by the Commissioner of Health and continuing until the last day of the calendar month in which the required data and information are submitted.

Notwithstanding any inconsistent provision set forth herein, the annual percentage reductions as set forth above, will be prorated by the Commissioner of Health for the period April 1, 2007 through March 31, 2009.

attachment 4.19-b
Certified Home Health Care Agency - Insurance Costs

The Commissioner of Health is authorized to provide for increased payments to certified home health agencies to support increased employee fringe benefit costs associated with the agencies’ provision of enhanced health care coverage for their employees.

The cost of such health care related increased employee fringe benefits is a reimbursable cost for eligible certified home health agencies. Eligible home care agencies [as determined by the Commissioner of Health] are those agencies whose workers are employed in cities within the state which have populations in excess of one million persons [and] or counties within the state which have populations in excess of [one million persons] nine hundred thousand persons if the county is located within the metropolitan commuter transportation district and meet the following conditions: (a) at least fifty percent of the [persons receiving services from] actual total hours of service for the period July 1, 2007 through March 31, 2008 provided by such employers are provided to recipients of medical assistance; and (b) the employer contributes to a group health insurance plan or employer based group health plan on behalf of such employees; and (c) no benefits are provided under the group health insurance plan or employer based group health plan in excess of the benefits provided to the majority of hospital workers in the community in which the home health care workers are employed.

[Total] Medicaid payments to eligible home care agencies are based on total funds available for this program, allocated proportionately by Medicaid hours of service provided by each eligible provider, [the documented approved costs of the eligible agency for group health insurance premiums paid for their employed home care attendants and allocable to the Medicaid hours of service provided by such employees.] Payments may, in the aggregate, and on an annual basis, be no more than $58,000,000 provided however, that for the period October 2 through December 31, 2003, the amount will increase by $105,000,000; and for annual periods [on and after] January 1, 2004 through June 30, 2007, the amount of funding shall be no more than $163,000,000 in the aggregate. For the period July 1, 2007 through March 31, 2008, the amount of funding shall be $122,300,000 in the aggregate for all eligible certified home health agencies and personal care providers. Rates of payment shall be adjusted for eligible providers and allocated proportionally [to reflect the Medicaid share of the approved costs] based on the [proportional] relationship of the provider’s Medicaid annual hours of service [care rendered to Medicaid beneficiaries] to the total Medicaid annual hours of service [care] rendered [to] by all of the providers [patients]
New York
4(a)(vi)(A)

based upon each provider’s actual Medicaid hours of service for which payment has been made by the State’s Medicaid Management Information System for the period July 1, 2007 through March 31, 2008.

Eligible providers shall use such funds solely for the purpose of supporting health insurance coverage for their employees and are prohibited from using such funds for any other purpose. The Commissioner is authorized to audit such providers for the purpose of ensuring compliance and shall recoup any funds determined to have been used for purposes other than those authorized.

[The Commissioner may modify the amounts made available for any specific annual period so long as the total amount made available for the period is not exceeded.] The effective period is January 1, 2000 through [June 30, 2007] March 31, 2008.
The Commissioner of Health is authorized to require group health insurance plans and employer based group health plans to report to the Department, insofar as such reporting does not violate any provisions the Federal Employee Retirement Income Security Act (ERISA), at such times and in such manner as the Commissioner shall decide, any information needed [to operate such a demonstration project], including but not limited to, the number of people in such plans who become ineligible each month for the continuation coverage described herein. In addition, every certified health maintenance organization and every insurer licensed by the Superintendent of Insurance shall submit reports in such form and at such times as may be required [to implement this demonstration].

**Recruitment And Retention**

The Commissioner shall adjust medical assistance rates of payment for services provided by certified home health agencies for purposes of improving recruitment and retention of non-supervisory home care services workers or any worker with direct patient care responsibility in the following amounts for services provided on and after December 1, 2002.

Rates of payment by governmental agencies for certified home health agency services (including services provided through contracts with licensed home care services agencies) shall be increased by three percent.

Providers, which have their rates adjusted for this purpose shall use such funds solely for the recruitment and retention of non-supervisory home care services workers or any worker with direct patient care responsibility. Providers are prohibited from using such funds for any other purpose.

The Commissioner is authorized to audit each provider to ensure compliance with this purpose and shall recoup any funds determined to have been used for purposes other than recruitment and retention of non-supervisory home care services workers or any worker with direct patient care responsibility.

In the case of services provided by providers through contracts with licensed home care services agencies, rate increases received by providers shall be reflected in either the fees paid or benefits or other supports provided to non-supervisory home care services workers or any worker with direct patient care responsibility of such contracted licensed home care services agencies and such fees, benefits or other supports shall be proportionate to the contracted volume of services attributable to each contracted agency. Such agencies shall submit to providers with which they contract written certifications attesting that such funds will be used solely for the purposes of recruitment and retention of non-supervisory home care services workers or any worker with direct patient care responsibility and shall maintain in their files expenditure plans specifying how such funds will be used for such purposes. The Commissioner is authorized to audit such agencies to ensure compliance with such certifications and expenditure plans and shall recoup any funds determined to have been used for purposes other than those set forth in this section.
Criminal Background Checks for Certified Home Health Agencies

Effective April 1, 2005, certified home health agencies must obtain a criminal history record check from the United States Attorney General for any prospective unlicensed direct care employee. This includes obtaining, as part of an application for employment, all information from a prospective employee necessary for initiating the criminal history record check, including, but not limited to, a fingerprint card of the prospective employee. The federal fee and the costs associated with obtaining the fingerprint card shall be separately identified on any report of costs submitted to the Department of Health and shall be deemed an allowable cost for Medicaid rates of payment. Reimbursement for the period April 1, 2005 through March 31, 2006 and for the period April 1, 2006 through [March 31, 2007] August 31, 2006, shall be made retrospectively based upon cost reports submitted for the 2005 and 2006 rate years, respectively. For new providers or existing providers for which cost report data is unavailable, payment will be based on budgeted costs and subsequently adjusted to reflect actual costs. Reimbursement for all types of providers shall total no more than $5,000,000 for the April 1, 2005 through March 31, 2006 period and no more than [$13,400,000] $5,600,000 for the April 1, 2006 through [March 31, 2007] August 31, 2006 period. Reimbursement for the Medicaid share of these costs shall be in the form of an add-on to the current rates of payment and will be determined by the percent of Medicaid utilization to total utilization for each provider. If the total cost for these criminal background checks for all types of providers exceeds the amounts set forth for the specified period, provider specific reimbursement will be reduced proportionally based on each eligible provider’s reported costs for criminal background checks to the total costs of criminal background checks of all eligible providers.

Effective September 1, 2006, certified home health agencies shall request criminal history background checks from the Department of Health for unlicensed prospective employees who will provide direct care or supervision to patients, residents, or clients of such providers. The criminal history information consists of both a state and a national criminal history check.

Certified home health care agencies may claim as reimbursable costs under the medical assistance program, costs reflecting the fee established pursuant of law by the NYS Division of Criminal Justice Services for processing a state criminal history information check, the fee imposed by the Federal Bureau of Investigation for a national criminal history check, and the administrative costs associated with obtaining the fingerprints and completing the fingerprint cards. These costs shall be separately identified on any report of costs submitted to the Department of Health.

Reimbursement for the Medicaid share of these costs shall be in the form of an add-on to the current Medicaid rate of payment based on the costs reported for the period two years prior to the rate period. The proportionate costs for criminal background checks will be allocated to Medicaid based on the percent of Medicaid utilization of services provided to the total services provided for all payers, services being defined as units of service (i.e. hours or visits). The costs allocated to Medicaid will be divided by the Medicaid units of service for the period two years prior to the rate year to constitute the rate add-on.

Effective Date    September 1, 2006
New York
4(a)(viii)(1)

**Recruitment and Retention of Direct Patient Care Personnel**

The Commissioner of Health will additionally adjust rates of payment for certified home health agencies, for purposes of improving recruitment and retention of home health aides or [other] non-supervisory personnel with direct patient care responsibility.

These additional adjustments to rates of payments shall be calculated by allocating the available funding proportionally based on each certified home health agency's, home health aide or other direct care services total annual hours of service provided to Medicaid patients, as reported in each such agency's most recently available cost report as submitted to the Department. For home health services paid under the episodic payment system, allocation of the recruitment and retention payment is included in episodic payment prices paid under that system. The total aggregate available funding for all eligible certified home health agency providers is as follows:

- For the period June 1, 2006 through December 31, 2006 - $20,100,000.
- For the period January 1, 2007 through June 30, 2007 - $20,100,000.
- For the period July 1, 2007 through March 31, 2008 - $40,200,000.
- For the period April 1, 2008 through March 31, 2009 - $40,200,000.
- For the period April 1, 2009 through March 31, 2010 - $40,200,000.
- For the period April 1, 2010 through March 31, 2011 - $40,200,000.
- For the period April 1, 2011 through March 31, 2012 - $40,200,000.
- For the period April 1, 2012 through March 31, 2013 - $40,200,000.
- For the period April 1, 2013 through March 31, 2014 - $40,200,000.
- For the period June 5, 2014 through March 31, 2015 - $26,736,000.
- For the period April 1, 2015 through March 31, 2016 - $26,736,000.
- For the period April 1, 2016 through March 31, 2017 - $26,736,000.
- For the period April 1, 2017 through March 31, 2018 - $26,736,000.
- For the period April 1, 2018 through March 31, 2019 - $26,736,000.
- For the period April 1, 2019 through March 31, 2020 - $26,736,000.

Payments made pursuant to this section will not be subject to subsequent adjustment or reconciliation.

For providers established after November 1, 2005, the Department utilizes Medicaid data from the initial cost report submitted to the Department, which would allow the inclusion of those providers in the distribution.
New York
4(a)(ix)

Payments made pursuant to this section shall not be subject to subsequent adjustment or reconciliation.

Funds received through this program are to be used solely for the purposes of recruitment and retention of non-supervisory home care services workers or other personnel with direct patient care responsibility. Each agency receiving funds shall submit, at a time and in a manner determined by the Commissioner, a written certification attesting that such funds will be used solely for the purpose of recruitment and retention of non-supervisory home health aides or any personnel with direct patient care responsibility. The Commissioner is authorized to audit each such agency or program to ensure compliance with this written certification and may recoup any funds determined to have been used for purposes other than recruitment and retention of non-supervisory home health aides or other personnel with direct patient care responsibility. All government and non-government owned or operated providers are eligible for this adjustment pursuant to the same uniformly applied methodology.

Accessibility, Quality, and, Efficiency of Home Care Services

The Commissioner of Health shall adjust rates of payment for services provided by certified home health agencies for the purpose of enhancing the provision, accessibility, quality, and/or efficiency of home care services. These rate adjustments shall be for the purposes of assisting such providers, located in social services districts that do not include a city with a population of over one million persons, in meeting the cost of:

(i) Increased used of technology in the delivery of services, including clinical and administrative management information systems;

(ii) Specialty training of direct service personnel in dementia care, pediatric care, and/or the care of other conditions or populations with complex needs;

(iii) Increased auto and travel expenses associated with rising fuel prices, including the increased cost of providing services in remote areas;
(iv) Providing enhanced access to care for high need populations.

The Commissioner shall increase the rates of payment for all eligible providers in an aggregate amount of $16,000,000 annually for the periods June 1, 2006 through March 31, 2007, [and] July 1, 2007 through March 31, 2008, and June 1, 2008 through March 31, 2009.

Rates will be adjusted in the form of a uniform percentage add-on as calculated by the Department, based upon the proportion of total allocated dollars, to the total Medicaid expenditures for covered home care services provided in local social services districts that do not include a city with a population over one million. All government and non-government owned or operated providers are eligible for this adjustment pursuant to the same uniformly applied methodology.
New York
4(b)

Home Health Services
Community and Residential Based
Certified Home Health Agencies
Under Article 36 of the Public Health Law

An allowance will be established annually and added to Medicaid rates of payment for certified agencies which can demonstrate a financial shortfall as a result of providing services to a disproportionate share of uninsured low-income patients. Losses will be calculated by applying the current Medicaid payment rate to base year units of service to uninsured low-income patients, offset by related out-of-pocket patient receipts, subsidy grants and State aid deficit financing to publically-sponsored facilities. An annual agency loss coverage will be established by applying calculated losses to a nominal loss coverage ratio scale within the limits of pool allocations to public and non-public agencies.

[For purposes of establishing rates of payment by governmental agencies for certified home health agencies for rate the periods beginning on or]
[after January first, nineteen hundred ninety-five, the reimbursable base year administrative and general costs of a provider of services, excluding a provider of services reimbursed on an initial budget basis, and a new provider, excluding changes in ownership or changes in name, who begins operations in the year prior to the year which is used as a base year in determining rates of payment, shall not exceed thirty percent of total reimbursable base year operational costs of such provider of services.]
[Type of Service] Assisted Living Programs

[Method of Reimbursement]

In accordance with Public Health law section 3614(6) and 10 NYCRR Subpart 86-7, the Commissioner of Health and subject to approval for the State Director of the Budget, establishes per diem payment rates that are payment-in-full for the [Title XIX] personal care services that the Assisted Living Program (ALP) provides directly or through contracts with a Long Term Home Health Care Program, a certified home health agency (CHHA) or other qualified provider[s]; nursing services, home health aide services, physical therapy, occupational therapy, speech therapy and medical supplies and equipment not requiring prior approval, personal emergency response services, and adult day health care provided in a program approved by the Commissioner of Health. In addition to the provision of any of these needed home care services, the ALP is responsible for the overall case management of individuals participating in the program. Case management functions that are the responsibility of the ALP can be found on the eMedNY website at:

www.emedny.org/ProviderManuals/AssistedLiving/PDFs/ALP_Policy_Section.pdf

Payment rates are established for 1992 for each of sixteen patient classification groups in each of sixteen regions, and the 1992 payment rates were increased by a roll factor for each subsequent year through 2011. The payment rates are related to fifty percent of the amounts which otherwise would have been expended to provide the appropriate level of care in a residential health care facility (RHCF) in the applicable regions and consist of a direct component and other than direct component. For 1992, the direct and other than direct components for each patient classification group in each of sixteen regions are summed and multiplied by fifty percent. For subsequent calendar years through 2011, the 1992 payment rates are increased by the applicable roll factor, pursuant to Department regulations for the Assisted Living Program under the Adjustments to Rate of Payment section and for Residential Health Care Facilities under the Adjustments to Basic Rate section. Payment rates cannot exceed prevailing charges in the locality. ALP per diem rates can be found on the Department of Health website at:

http://www.health.ny.gov/facilities/long_term_care/reimbursement/alp/

Reimbursement for ALP preadmission assessments:

The reimbursement rate for preadmission assessments conducted directly by the ALP will be equal to the statewide weighted average rate for CHHA nursing visits in effect on January 1 of the year of the preadmission assessment.

The average CHHA nursing visit reimbursement rates (effective for ALP preadmission assessments) can be found on the Department of Health website at:

https://www.health.ny.gov/facilities/long_term_care/reimbursement/episodic/eps_weighted_average_rates.htm

TN#: ________ #12-0022 ________ Approval Date: _3/27/18_
Supersedes TN#: ________ #97-0010 ________ Effective Date: __4/26/12__
Assisted Living Programs

Beginning January 1, 2017, and every January 1 thereafter until the minimum wage reaches the state statutorily described per hour wage as shown below, the Department will recognize cost increases experienced by ALP providers in accordance with established ALP rate setting methodology. This minimum wage methodology will include an examination of the regional nursing home impact and apply a fifty percent factor. The minimum wage rates as approved are as follows:

<table>

Except as otherwise noted in the plan, state-developed fee schedule rates are the same for both governmental and private providers of Assisted Living Programs. The agency's fee schedule rate was set as of January 1, 2017, and is effective for services provided on or after that date. Rates of payments to Assisted Living Programs are available at:
https://www.health.ny.gov/facilities/long_term_care/reimbursement/alp/2017-01-01_alp_min_wage_rates.htm
Minimum Wage Reconciliation - After the end of each calendar year, the Department of Health will survey providers to obtain the following information for the purpose of reconciling annual minimum wage reimbursement. The state will release the reconciliation survey by the end of March and providers will have two weeks to complete the survey or request an extension if a provider determines it is unable to complete the survey within that time. Approval of extensions, and the time of the extension, is at the discretion of the state. If the reconciliation survey is not submitted within the two weeks or within the extension time frame, should one be granted, the provider's minimum wage add-on for the calendar year covered by the survey will be recouped.

i. Total annual minimum wage funding paid to the provider (as determined from the minimum wage add-on to claims paid for services rendered in the prior calendar year) for the Medicaid share of the minimum wage law increase requirement. (This information will be supplied by the Department of Health.) Medicaid's share is the percentage of minimum wage costs that are attributable to Medicaid services based on the proportion of Medicaid services to a provider's total services.

ii. Medicaid's share of the total amount the provider was obligated to pay to bring salaries up to the minimum wage for the calendar year. (This information will be completed by the provider.)

iii. Minimum wage funds to be recouped or additional funds to be received by the provider. (This information will be completed by the provider.) This will be the difference between the amount paid to the provider for the Medicaid share of the minimum wage law increase requirement and the corresponding amount the provider determined it was actually obligated to pay.

iv. The State agency will review providers' submissions for accuracy and reasonableness, following which it will process associated payments and recoupments via retroactive per unit rate adjustments as quickly as practical thereafter.

The agency's Chief Executive Officer or Chief Financial Officer must sign an Attestation verifying the data that is supplied in the survey.

ALP per diem rates can be found on the Department of Health website at:

http://www.health.ny.gov/facilities/long_term_care/reimbursement/alp/
Per diem rate add-on for Assisted Living Programs:

Effective April 1, 2013, certain Assisted Living Programs (ALPs) may qualify for an add-on to the per diem rate. ALPs will qualify if the facility:

1. Houses exclusively ALPs beds,
2. Is operated by a not-for-profit corporation,
3. Commenced operation after 1998, and
4. Is in a county with a population of no less than 280,000 persons.

Qualified ALPs receive the following add-on to each RUGS-II category for their respective regional rate:

<table>
<thead>
<tr>

</table>

Going forward, the add-on amount will be computed using the same methodology as in prior years. The ALP rates and rate add-on for qualified ALPS are available at:

https://www.health.ny.gov/facilities/long_term_care/reimbursement/alp/
Outpatient Drug Reimbursement

1. Reimbursement for Prescribed Drugs (including specialty drugs) dispensed by a retail pharmacy; an institutional or long term care pharmacy; an Indian Health Service, tribal or urban Indian pharmacy; or any other pharmacy enrolled in the NYS Medicaid FFS Program is as follows:
   
a. Reimbursement for Brand Name Drugs is the lower of:
      
      i. National Average Drug Acquisition Cost (NADAC) or, in the event of no NADAC pricing available, Wholesale Acquisition Cost (WAC) less 3.3%; plus, the professional dispensing fee in Section 2; or
      ii. the billing pharmacy’s usual and customary price charged to the general public.
   
b. Reimbursement for Generic Drugs is the lower of:
      
      i. NADAC or, in the event of no NADAC pricing available, WAC less 17.5%; plus, a professional dispensing fee; or
      ii. the Federal Upper Limit (FUL) plus the professional dispensing fee in Section 2; or
      iii. the State Maximum Acquisition Cost (SMAC) plus the professional dispensing fee in Section 2; or
      iv. the billing pharmacy’s usual and customary price charged to the general public.
   
c. Reimbursement for Nonprescription Drugs is the lower of:
      
      i. NADAC or, in the event of no NADAC pricing available, WAC; plus, if a covered outpatient drug, the professional dispensing fee in Section 2;
      ii. the FUL plus, if a covered outpatient drug, the professional dispensing fee in Section 2; or
      iii. the SMAC plus, if a covered outpatient drug, the professional dispensing fee in Section 2; or
      iv. the billing pharmacy’s usual and customary price charged to the general public.
   
2. The professional dispensing fee for covered outpatient drugs, including 340B-purchased drugs, when dispensed by a retail pharmacy; an institutional or long term care pharmacy; an Indian Health Service, tribal or urban Indian pharmacy; or any other pharmacy enrolled in the NYS Medicaid FFS Program, is $10.08.

3. Payment for drugs dispensed by pharmacies that are acquired at a nominal price as referenced in 42 CFR § 447.502 is at actual acquisition cost plus the professional dispensing fee in Section 2.

4. Payment for drugs dispensed by pharmacies that are acquired via the Federal Supply Schedule is at actual acquisition cost plus the professional dispensing fee in Section 2.
New York
4(d)(1)
c. Reimbursement for Nonprescription Drugs is the lower of:
   i. NADAC or, in the event of no NADAC pricing available, WAC; plus, if a covered
      outpatient drug, the professional dispensing fee in Section 2;
   ii. the FUL plus, if a covered outpatient drug, the professional dispensing fee in
        Section 2; or
   iii. the SMAC plus, if a covered outpatient drug, the professional dispensing fee in
        Section 2; or
   iv. the billing pharmacy’s usual and customary price charged to the general public.

2. The professional dispensing fee for covered outpatient drugs, including 340B-purchased
   drugs, when dispensed by a retail pharmacy; an institutional or long term care pharmacy;
   an Indian Health Service, tribal or urban Indian pharmacy; or any other pharmacy enrolled
   in the NYS Medicaid FFS Program, is $10.00.

3. Payment for drugs dispensed by pharmacies that are acquired at a nominal price as
   referenced in 42 CFR § 447.502 is at actual acquisition cost plus the professional dispensing
   fee in Section 2.

4. Payment for drugs dispensed by pharmacies that are acquired via the Federal Supply
   Schedule is at actual acquisition cost plus the professional dispensing fee in Section 2.

5. Payment for drugs dispensed by the pharmacy of a 340B covered entity as described in
   section 1927(a)(5)(B) of the Act, or a contract pharmacy under contract with a 340B
   covered entity as described in section 1927(a)(5)(B) of the Act, shall be as follows:
   a. 340B purchased drugs – actual acquisition cost not to exceed the 340B ceiling
      price, plus the professional dispensing fee in Section 2;
   b. Non-340B purchased drugs – in accordance with lower of logic in section 1
      plus the professional dispensing fee in Section 2.

6. Payment for clotting factor dispensed by a pharmacy enrolled in the NYS Medicaid FFS
   Program is at the lower of: SMAC, as described below, not to exceed WAC, plus the
   professional dispensing fee in Section 2; or the billing pharmacy's usual and customary
   price charged to the general public.

SMAC is established for clotting factor products using multiple clotting factor pricing
resources including but not limited to wholesalers, drug file vendors such as First Data Bank,
pharmaceutical manufacturers, and the Hemophilia Services Consortium, Inc. pricing. The
Hemophilia Services Consortium, Inc. subcontracts with the New York Blood Center (both
not-for-profit corporations) to negotiate with manufacturers and distributors to obtain the
best volume discount for the Consortium’s safety net hospital.

The SMAC file is stored in a database where valid statistical calculations are used to
evaluate and compare the various pricing benchmarks to develop the SMAC price. The
SMAC file is updated monthly and applied to all clotting factor products.

Payment for 340B-purchased clotting factor dispensed by a Hemophilia Treatment Center,
whether the pharmacy is owned by the covered entity or has a contract pharmacy
arrangement, shall be in accordance with Section 5.a.

TN_____ #17-0005 ___________ Approval Date __December 7, 2017
Supersedes TN _____ #NEW_____ Effective Date __April 01, 2017
7. Practitioner-administered drugs billed under the medical benefit are reimbursed as follows:
   a. When administered during an office visit, payment is made at actual acquisition cost by invoice, not to exceed Medicare Part B price. No professional dispensing fee is paid.

   b. When administered by a practitioner in an ordered ambulatory setting, payment is at actual acquisition cost, not to exceed Medicare Part B price. Drugs purchased by covered entities at the prices authorized under Section 340B of the Public Health Services Act must be billed at their actual acquisition cost. No professional dispensing fee is paid.

   c. When administered in an outpatient setting to a patient of a disproportionate share hospital, clinic, or emergency department, payment may be made through either the Ambulatory Patient Group (APG) classification and reimbursement system, as referenced in page 1(b)(ii) of this Attachment, or, if carved out of the APG system, in accordance with Section 7.b.

Reimbursement for drugs in the APG reimbursement are paid as follows:
1. Practitioner-administered drugs assigned to an APG and paid through the APG drug band are reimbursed based on the weighted average, using Medicaid paid claims data. Payment for drugs purchased by covered entities at the prices authorized under Section 340B of the Public Health Services Act and paid through the APG drug band are paid at 75% of the drug’s APG band payment amount.

2. Practitioner-administered drugs assigned to an APG and paid through the APG Fee Schedule are paid in accordance with Section 7.b.

   No professional dispensing fee is paid.

   d. Federally Qualified Health Centers (FQHC) and Indian Health Services/Tribal/Urban Indian Clinic Facilities have the option of receiving their payment through the Federal Prospective (PPS) rate, or through the APG reimbursement methodology as an “alternative rate setting methodology”. In the event the facility chooses to be reimbursed through the Federal PPS Rate, the rate is considered inclusive of any practitioner administered drugs. In the event the facility has opted for the APG reimbursement methodology, payment for drugs administered by a practitioner during a visit to the facility will be in accordance with Section 7.c. If a facility’s Medicaid reimbursement under APGs is lower than what their payment would have been under the Federal PPS rate, the facility is entitled to receive a supplemental payment reflecting the difference between what they were paid under APGs and what they would have been paid using the PPS rate. No professional dispensing fee is paid.

8. Reimbursement for Investigational Drugs is not a covered service. The Department may consider Medicaid coverage on a case by case basis for life-threatening medical illnesses when no other treatment options are available. If/when approved by a Medical Director, reimbursement is at actual acquisition cost. When dispensed by a pharmacy enrolled in the NYS Medicaid FFS Program, reimbursement includes the professional dispensing fee in Section 2.
Compound Drugs: Reimbursement is determined by the State Department of Health at the cost of ingredients plus the current dispensing fee.

Exception: Physician Override: Reimbursement for those brand name drugs for which there are generic equivalent drugs for which reimbursement is not to exceed the aggregate of the specified upper limit for the particular drug established by the Centers for Medicare and Medicaid Services, plus a dispensing fee, will be paid at the lower of the estimated acquisition cost, plus a dispensing fee, or at the provider’s usual and customary price charged to the general public when the prescriber has obtained a prior authorization when required for the brand-name drug, indicated that the brand name drug is required by placing “daw” (dispense as written) in the box located on prescription form and by writing “brand necessary” or “brand medically necessary” in his/her own handwriting on the face of the prescription.

Where it has been determined that reimbursement plus a dispensing fee does not exceed the aggregate for all drugs under the Federal Upper Limit (FUL) program, the writing by the prescriber of “brand necessary” or “brand medically necessary” will not be required. Prior authorization will not be required for these select drugs.

Indian Health Clinics and tribal clinics which have licensed pharmacies, may submit fee-for-service claims for pharmacy services provided to Native Americans and will be reimbursed at the net acquisition cost for those drugs purchased through the Federal Supply Schedule or at an amount determined by the reimbursement methodology indicated above for all other purchased drugs.
An e-prescription financial incentive will be paid to retail pharmacies for the purpose of encouraging the electronic transmission of prescriptions and orders for select over-the-counter medications and supplies prescribed and dispensed in accordance with State and federal requirements. Reimbursement is determined by the State Department of Health at the cost of ingredients plus a dispensing fee plus 20 cents per electronic prescription/fiscal order dispensed.

Effective April 1, 2014, the e-prescription financial incentive for retail pharmacies will cease and reimbursement at 20 cents per electronic prescription/fiscal order will end.
Type of Service: Pharmacy Medication Therapy

Method of Reimbursement:

Fee schedule developed by the Department of Health and approved by the Division of Budget. Except as otherwise noted in the plan, state developed fee schedules are the same for both governmental and private providers of medication therapy management services. The fee schedule and any annual/periodic adjustments to the fee schedule are published in the official New York State pharmacy provider manual available and is also available at http://nyhealth.gov/health_care/medicaid/program/mtm/index.htm. The agency’s fee schedule was set as of December 29, 2008 and is effective for services provided on or after January 6, 2010.

Effective April 2, 2012 the Medicaid Medication Therapy Management (MTM) Pilot Program will cease and fee-for-service reimbursement for MTM services will end.
Pharmacists as Immunizers

The [F]ee schedule is developed by the Department of Health and approved by the Division of Budget. State developed fee schedules are the same as the fee schedule established for Physicians. Pharmacies participating in the New York State Medicaid program are reimbursed a vaccine administration fee established at the same rate paid to physicians. The reimbursement to the pharmacy is on behalf of the employed pharmacist, who as the licensed practitioner is the vaccine administrator. Except as otherwise noted in the plan, state developed fee schedules are the same for both governmental and private providers. The fee schedule and any annual/periodic adjustments to the fee schedule are published in the official New York State pharmacy provider manual, which can be found at:

http://nyhealth.gov/health_care/medicaid/program/pharmacists_as_immunizers/fact_sheet_10-14-10.htm

The agency’s fee schedule is effective for services provided on or after October 15, 2009.

Diabetes Self-Management Training

The fee schedule is developed by the Department of Health and approved by the Division of Budget. State-developed fee schedules are the same as the fee schedule established for physicians. The fee schedule and any annual/periodic adjustments to the fee schedule are published in the official New York State physician provider manual, which can be found at:

https://www.emedny.org/ProviderManuals/Physician/PDFS/Physician_Manual_Fee_Schedule_Sect2.xls

The agency's fee schedule is effective for services provided on or after July 1, 2011.

Pharmacies participating in the New York State Medicaid program are reimbursed for Diabetes Self-Management Training (DSMT) at the same rate paid to physicians. The reimbursement to the pharmacy, which is accredited by a CMS approved national accreditation organization (NAO) such as the American Diabetes Association (ADA), American Association of Diabetes Educators (AADE) or Indian Health Services (IHS) is on behalf of the employed pharmacist who, as the licensed practitioner, is the DSMT Educator.
Nonprescription Drugs

Reimbursement is the lowest of:

(1) the usual and customary price charged to the general public;

(2) the price established by the Commissioner of Health as shown on the NYS List of Medicaid Reimbursable Drugs for that generic category and strength in the package size nearest to that ordered; and,

(3) Acquisition cost plus dispensing fee.

Private Duty Nursing

Fees determined by local districts and reviewed by the Department of Social Services.

The Commissioner of Health shall adjust rates of payment for services provided by private duty nursing providers for the purpose of enhancing the provision, accessibility, quality, and/or efficiency of home care services. These rate adjustments shall be for the purposes of assisting such providers, located in social services districts that do not include a city with a population of over one million persons, in meeting the cost of:

(i) Increased use of technology in the delivery of services, including clinical and administrative management information systems;

(ii) Specialty training of direct service personnel in dementia care, pediatric care, and/or the care of other conditions or populations with complex needs;

(iii) Increased auto and travel expenses associated with rising fuel prices, including the increased cost of providing services in remote areas;

(iv) Providing enhanced access to care for high need populations.
New York
5(a)

The Commissioner shall increase the rates of payment for all eligible providers in an amount up to an aggregate of $16,000,000 annually for the periods June 1, 2006 through March 31, 2007, April 1, 2007 through March 31, 2008, and April 1, 2008 through March 31, 2009.

Rates will be adjusted in the form of a uniform percentage add-on as calculated by the Department, based upon the proportion of total allocated dollars, to the total Medicaid expenditures for covered home care services provided in local social services districts that do not include a city with a population over one million. All government and non-government owned or operated providers are eligible for this adjustment pursuant to the same uniformly applied methodology.

Services Provided to Medically Fragile Children

For purposes of this section, a medically fragile child shall mean a child, up to twenty-one years of age, who is at risk of hospitalization or institutionalization for reasons that include but are not limited to the following: children who are technologically-dependent for life or health-sustaining functions; require complex medication regimen or medical interventions to maintain or improve their health status; or are in need of ongoing assessment or intervention to prevent serious deterioration of their health status or medical complications that place their life, health or development at risk. These children are capable of being cared for at home if provided with appropriate home care services including but not limited to continuous nursing services.

For the period January 1, 2007 through December 31, [2008] 2010, rates of payment for continuous nursing services for medically fragile children shall be established to ensure the availability of such services or programs, and shall be established at a rate that is thirty percent higher than the provider’s current rate for private duty nursing services. Providers that receive such rates for continuous nursing services for medically fragile children must use these enhanced rates to increase payments to registered nurses or licensed practical nurses who provide these services to medically fragile children. All government and non-government owned or operated providers are eligible for this adjustment pursuant to the same uniformly applied methodology.

Nursing Services (Limited)

The Commissioner of Health, subject to the approval of the Director of the Budget, establishes reimbursement rates for certain nursing services provided to eligible residents by a certified operator of an adult home or enriched housing program that has been issued a limited license by the Department. A limited license may be issued to the certified operator of an adult home or enriched housing program and allows such operator to directly provide certain
personal care and nursing services to residents of the adult home or enriched housing program
governed by the terms of the limited license. The nursing services for which reimbursement
shall be provided are: the administration of subcutaneous and/or Intramuscular injections and
application of sterile dressings by a registered professional nurse, including associated nursing
tasks, provided however, that the services provided are not services that must otherwise be
provided to residents of adult home or enriched housing programs. Regional quarter hour rates
are established utilizing average fees established for private duty nursing services for the
respective regions.

 Physical Therapy

    Fee schedule developed by Department of Health and approved by Division of the
Budget.

 Occupational Therapy

    Fee schedule developed by Department of Health and approved by Division of the
Budget.
Independent Practitioner Services for Individuals with Developmental Disabilities (IPSIDD)

(A) Payments are made in accordance with a fee schedule developed by the Department of Health and approved by the Division of the Budget. The State-developed fee schedule rates are the same for both governmental and private providers of IPSIDD services which are included under independent practitioner services.

(1) The IPSIDD fee schedule was set as of April 1, 2016 and is effective for services provided on and after that date. The fee schedules are published on the Department of Health website and can be found at the following links:

(i) IPSIDD fee schedule effective April 1, 2016 through December 31, 2016:  
https://www.health.ny.gov/health_care/medicaid/rates/mental_hygiene/ipsidd_04-01-16

(ii) IPSIDD fee schedule effective January 1, 2017 through December 31, 2017:  
https://www.health.ny.gov/health_care/medicaid/rates/mental_hygiene/2017_01_01_ipsidd.htm

(iii) IPSIDD fee schedule effective January 1, 2018 and forward:  

(2) IPSIDD is available for the following services:
   (i) Occupational Therapy;
   (ii) Physical Therapy;
   (iii) Speech and Language Pathology;
   (iv) Psychotherapy.
**Eyeglasses and Other Visual Services**

Fee schedule developed by Department of Health and approved by Division of the Budget.

**Hearing Aid Supplies and Services**

Fee schedule developed by Department of Health and approved by Division of the Budget.

**Prosthetic and Orthotic Appliances**

Payments are limited to the lower of the usual and customary charge to the general public or fee schedule developed by Department of Health and approved by the Division of the Budget.

**Comprehensive Psychiatric Emergency Programs**

Flat fee developed by OMH and approved by the Division of the Budget.
Medical Supplies/ Orthopedic Footwear

Effective dates of service on and after May 1, 2011, payment for orthopedic footwear shall be the lower of: the maximum reimbursable amount as shown in the fee schedule for durable medical equipment, medical/surgical supplied, orthotics and prosthetic appliances and orthopedic footwear (the maximum reimbursable amount will be determined for each item of footwear based on an average cost of products representative of that item); or the usual and customary price charged to the general public for the same or similar products. Except as otherwise noted in the plan, state-developed fee schedule rates are the same for both governmental and private providers of orthopedic footwear. The agency’s fee schedule rate was set as of May 1, 2011, and is effective for services provided on or after that date. All rates are published on:

http://www.emedny.org/ProviderManuals/DME/index.html

<td>Purchase: reimbursement is the lower of the cost to the provider plus 50% or the usual and customary price charged to the general public.</td>
</tr>
<tr>
<td>Transportation</td>
<td>[Fees determined by local social services districts and approved by the Division of the Budget and shall not exceed the current local prevailing charge or locally negotiated fee, whichever is lower, with the following exception: For those clients for whom the State retains fiscal and administrative responsibility, fees are determined by the DOH Office of Financial Management using the local social services district fee for a comparable service as the upper limit of payment.] In a fee-for-service arrangement, fees will be established by the local social services districts and subsequently approved by the Office of Health Insurance Programs. Fees will be reviewed to ensure they do not exceed the current usual and customary amount charged to the general public. However, there will be extenuating and unique circumstances where a higher fee is necessary to assure safe and appropriate transportation to necessary medical services. In those circumstances, a fee will be negotiated.</td>
</tr>
</tbody>
</table>
Emergency Medical Services Provider Supplemental Payment

The Department will supplement Medicaid fee-for-service reimbursements made to emergency medical services providers.

For the period July 1, 2006 to March 31, 2007, the aggregate amount of $3.0 million and for the period April 1, 2007 to March 31, 2008, the aggregate amount of $6 million will be available. For the period March 26, 2009 through March 31, 2009, the aggregate amount of $4,512,000 will be available. For the period May 30, 2014 through March 31, 2015, the aggregate amount of $6 million will be available. Annually, beginning with the period of April 23, 2015 through March 31, 2016, the aggregate amount of $6 million will be available.

This payment will be based upon a ratio of individual provider payments to total Medicaid provider payments in each quarter of the state fiscal year.

The following methodology applies in each state fiscal year:

- The aggregate amount will be divided by four as a payment will be made in each quarter of the state fiscal year, and further divided as follows:
  - Twenty five percent of the total aggregate amount will be paid to providers within the City of New York.
  - The Department will determine the ratio of an emergency medical services Medicaid provider’s Medicaid reimbursements to the total Medicaid payments made to emergency medical services providers during that quarter of the state fiscal year to providers within the City of New York, and will express that ratio as a percentage.
  - The Department will then multiply the percentage by one-quarter the supplemental amount available to be disbursed for emergency medical services providers based in the City of New York. The result of such calculation shall represent the “emergency medical service supplemental payment”.
  - In each quarter of the state fiscal year, these steps shall be repeated.

- Seventy-five percent of the total aggregate amount will be paid to Medicaid providers outside the City of New York.
  - The Department will determine the ratio of an emergency medical services Medicaid provider’s Medicaid reimbursements to the total Medicaid payments made to emergency medical services providers during that quarter of the state fiscal year to providers outside the City of New York, and will express that ratio as a percentage.
  - The Department will then multiply the percentage by one quarter the supplemental amount available to be disbursed to providers based outside the City of New York. The result of such calculation shall represent the “emergency medical service supplemental payment”.
  - In each quarter of the state fiscal year, these steps shall be repeated.
Out-of-State Services

Fee-based providers:

Those providers who meet their state’s licensure/certification requirements are reimbursed charges up to the appropriate New York State fee, for services rendered.

HMO’s and Prepaid Health Plans

Monthly capitation rates established through negotiation with the Department of Health and approved by the Division of the Budget are in compliance with 42 CFR Part 434, Part 442.302 and Part 447.361 including all federal requirements for the reimbursement methodology.

[Personal Care Services]

For personal care services provided pursuant to a contract between a social services district and a voluntary, proprietary or public personal care services provider, payment is made at the lower of the provider’s charge to the general public for personal care services or a rate the Department establishes for the provider, subject to the approval of the Director of the Budget, in accordance with a cost-based methodology. Under the cost-based methodology, the Department determines a provider’s rate based upon the provider’s reported allowable costs, as adjusted by annual trend factors provided, however, for services on and after April 1, 2008, the Commissioner of Health shall apply a trend factor projection equal to 65% of the otherwise applicable trend factor for calendar year 2008, as calculated in accordance with the general Trend Factor section of this Attachment.

For rates of payment effective for personal care services provided on and after January 1, 2009, the otherwise applicable final trend factor attributable to the 2008 calendar year period shall be adjusted such that any increase to the average trend factor for the period April 1, 2008 through December 31, 2008 shall be reduced, on an annualized basis, by 1.3%. However, no retroactive adjustment to such trend factor will be made for the period April 1, 2008 through December 31, 2008.

For rates of payment effective for personal care services provided on and after January 1, 2009, a trend factor equal to the otherwise applicable trend factor attributable to the period January 1, 2009 through December 31, 2009, less 1% shall be applied.

The provider’s rate includes payment for the provider’s reported allowable trended costs only in an amount that does not exceed the ceilings for allowable costs that the Department has established for all providers in the applicable geographic group to which the provider belongs. The rate includes an adjustment for profit, for proprietary providers, or surplus, for voluntary providers.]
Personal Care Services

For personal care services provided pursuant to a contract between a social services district and a voluntary, proprietary or public personal care services provider, payment is made at the lower of the provider’s charge to the general public for personal care services or a rate the Department establishes for the provider, subject to the approval of the Director of the Budget, in accordance with a cost-based methodology. Under the cost-based methodology, the Department determines a provider’s rate based upon the provider’s reported allowable costs, as adjusted by annual trend factors provided, however, for services on and after April 1, 2008, the Commissioner of Health shall apply a trend factor projection equal to 65% of the otherwise applicable trend factor for calendar year 2008, as calculated in accordance with the general trend factor methodology contained on page 1(c)(i) in this Attachment.

For rates of payment effective for personal care services provided on and after January 1, 2009 through March 31, 2009, the otherwise applicable final trend factor attributable to the 2008 calendar year period shall be adjusted such that any increase to the average trend factor for the period April 1, 2008 through December 31, 2008 shall be reduced, on an annualized basis, by 1.3%. However, no retroactive adjustment to such trend factor will be made for the period April 1, 2008 through December 31, 2008. Effective on and after April 1, 2009, the otherwise applicable final trend factor attributable to the 2008 calendar year period shall be zero.

For rates of payment effective for personal care services provided on and after January 1, 2009 through March 31, 2009, a trend factor equal to the otherwise applicable trend factor attributable to the period January 1, 2009 through December 31, 2009, less 1% shall be applied. Effective on and after April 1, 2009 the otherwise applicable trend factor attributable to the 2009 calendar year period shall be zero.

For rates of payment effective for services provided on and after January 1, 2010 through March 31, 2010, the otherwise applicable final trend factor attributable to the 2010 calendar year period shall be zero.

For rates of payment effective for personal care services provided on and after April 1, 2010, the otherwise applicable trend factor attributable to the 2010 calendar year period shall be zero.

For rates of payment effective for personal care services provided on and after January 1, 2011, the otherwise applicable trend factors attributable to the 2011 through 2014 calendar year periods shall be no greater than zero. For such rates effective for the period January 1, 2015 through March 31, 2015 and for the period April 23, 2015 through December 31, 2015 otherwise applicable trend factors attributable to the 2015 calendar year period shall be no greater than zero. For rates of payment effective for services provided on and after January 1, 2016 through March 31, 2017 and for the period April 1, 2017 through December 31, 2017, the otherwise applicable final trend factor attributable to the 2016 and 2017 calendar year periods shall be zero. For rates of payment effective for services provided on and after January 1, 2018 through March 31, 2019, the otherwise applicable final trend factor attributable to the 2018 and 2019 calendar year periods shall be zero.

TN #17-0034          Approval Date September 25, 2017
Supersedes TN  #15-0044          Effective Date April 1, 2017
The provider's rate includes payment for the provider's reported allowable trended costs only in an amount that does not exceed the ceilings for allowable costs that the Department has established for all providers in the applicable geographic group to which the provider belongs. The rate includes an adjustment for profit, for proprietary providers, or surplus, for voluntary providers.
New York
6(a)(2)

Such rates of payment [shall] will be further adjusted to reflect costs associated with the recruitment and retention of non-supervisory workers. For programs providing services in local social service districts which include a city with a population of over one million persons, such rate adjustments will be calculated by allocating the total dollars available for the applicable rate period to each individual provider proportionally based on total claimed hours of services for personal care services provided in the district to recipients of medical assistance. The allocated dollars will be included as a reimbursable cost add-on to the Medicaid rates of payment based on the Medicaid utilization data as adjudicated through the Medicaid Management Information System (MMIS), or any successor entity, utilizing the most recently available total claimed hours of Medicaid services data, as agreed to by New York State and the district.

For payment periods January 1, 2017, and thereafter, the Commissioner of Health will increase the rates of payment for services provided by all Personal Care providers in accordance with the wage chart shown below to address cost increases resulting from increases to the minimum wage in New York State. Final rates for providers can be found on the Department of Health website:

For New York City Personal Care:

For non New York City Personal Care:

https://www.health.ny.gov/facilities/long_term_care/reimbursement/pcr/

Minimum wage costs will mean the additional costs incurred beginning January 1, 2017, and thereafter, as a result of New York state statutory increases to minimum wage. Minimum wage cost development will be based on survey data collected.

1. Survey data will be collected for facility specific wage data.

TN #17-0026 Approval Date February 1, 2018
Supersedes TN #09-0069 Effective Date January 1, 2017
2. Facilities will report by specified wage bands, the total count of FTEs and total hours paid to employees earning less than the statutory minimum wage applicable for each minimum wage region.

3. Facilities will report an average fringe benefit percentage for the employees directly affected by the minimum wage increase.

4. The minimum wage costs are calculated by multiplying the total hours paid by the difference between the statutory minimum wage and the midpoint of each wage band where the facility has reported total hours paid. To this result, the facility’s average fringe benefit percentage is applied and added to the costs.

5. The 2017 minimum wage costs will be developed based on collected survey data received and attested to by Personal Care Agencies. The cost report will not be used because it does not contain wage data at the level of detail needed to calculate a minimum wage adjustment. Therefore, if the providers do not respond to the survey they will not receive a minimum wage add-on.

6. In subsequent years until the minimum wage is completely implemented statewide, the Department will survey Personal Care Agencies (PCA). If a PCA fails to submit the survey its minimum wage add-on will not be calculated. Once the costs are included in the base year cost report, the minimum wage add-on will be excluded from the rate.

7. A minimum wage add-on will be developed by multiplying minimum wage costs pursuant to “4.” above by a percentage of Medicaid hours to total hours, divide by total Medicaid hours for each rate.

Minimum Wage Reconciliation - After the end of each calendar year, the Department of Health will survey providers to obtain the following information for the purpose of reconciling annual minimum wage reimbursement. The state will release the survey by the end of March and providers will have two weeks to complete the survey or request an extension if a provider determines it is unable to complete the survey within that time. Approval of extensions, and the time of the extension, is at the discretion of the state. If the reconciliation survey is not submitted within the two weeks or within the extension time frame, should one be granted, the provider’s minimum wage add-on for the calendar year covered by the survey will be recouped.
1. Total annual minimum wage funding paid to the provider (as determined from the minimum wage add-on to claims paid for services rendered in the prior calendar year) for the Medicaid share of the minimum wage law increase requirement. (This information will be supplied by the Department of Health.) Medicaid’s share is the percentage of minimum wage costs that are attributable to Medicaid services based on the proportion of Medicaid services to a provider’s total services.

2. Medicaid’s share of the total amount the provider was obligated to pay to bring salaries up to the minimum wage for the calendar year. (This information will be completed by the provider.)

3. Minimum wage funds to be recouped or additional funds to be received by the provider. (This information will be completed by the provider.) This will be the difference between the amount paid to the provider for the Medicaid share of the minimum wage law increase requirement and the corresponding amount the provider determined it was actually obligated to pay.

4. The State agency will review providers’ submissions for accuracy and reasonableness, following which it will process associated payments and recoupments via retroactive per unit rate adjustments as quickly as practical thereafter.

The agency’s Chief Executive Officer or Chief Financial Officer must sign an Attestation verifying the data that is supplied in the survey.
Effective April 1, 2018 Medicaid qualified personal care providers in Federally Designated Frontier and Remote (FAR) areas of New York State will be eligible for a rate adjustment to address losses between the amount the provider pays for Level II, Nursing Assessment and Nursing Supervision and the Medicaid reimbursement for these services.

The FAR areas are determined by the US Department of Agriculture Economic Research Service and are based on zip codes and use population and urban-rural data from the 2010 U.S. Census.

**Eligibility**

Eligibility is based on the provider experiencing a combined loss in the Medicaid Personal Care Level II, Nursing Supervision and Nursing Assessment services as identified using the most recent complete calendar year cost reports for providers in the FAR regions.

**Methodology**

- The State identified $3M to support this rural initiative for both Personal Care services through the State Plan and the NHTD and TBI Waiver services.
- Distribution of the $3M between the Personal Care services and the NHTD and TBI Waiver services will be based on a demonstration of overall losses between the service areas.
- For Personal Care services, a difference will be calculated between actual cost and current rates paid for the sum of Level II, Nursing Assessment and Nursing Supervisor using the Cost Report data:
  - Each provider's loss is divided by the sum of all eligible losses to establish a percentage of loss for each provider.
  - This percentage of loss is used to allocate up to $3M to qualifying FAR Personal Care providers.
  - The allocation of funds is divided by the sum of Level II hours, Nursing Supervision visits, and Nursing Assessment visits, by providers in the FAR region using the most recent completed calendar year cost report to establish a rate add-on for the provider. This add-on is added to the current rates of Level II, Nursing Assessment and Nursing Supervision.
For programs providing services in local social services districts which do not include a city with a population of over one million persons, adjustments to Medicaid rates of payment will be calculated by allocating the total dollars available for the applicable rate period to each individual provider proportionally based on each personal care service provider’s total annual hours of personal care service provided to recipients of medical assistance to the total annual hours for all providers in this category. The allocated dollars will be included as a reimbursable cost add-on to the Medicaid rates of payment based on the Medicaid utilization data reported in each provider’s annual cost report for the period two years prior to the rate year.

Adjustments to Medicaid rates of payment will, in aggregate, not exceed the following amounts for the following periods.

For programs providing services in local social service districts which include a city with a population of more than one million persons:

- For the period April 1, 2002 through December 31, 2002, one hundred ten million dollars.
- For the period January 1, 2003 through December 31, 2003, one hundred eighty five million dollars.
- For the period January 1, 2004 through December 31, 2004, two hundred sixty million dollars.
- For the period January 1, 2005 through December 31, 2006, three hundred forty million dollars annually.
- For the period January 1, 2007 through December 31, 2007, three hundred forty million dollars.
- For the period January 1, 2008 through December 31, 2008, three hundred forty million dollars.
- For the period January 1, 2009 through December 31, 2009, three hundred forty million dollars.
- For the period January 1, 2010 through December 31, 2010, three hundred forty million dollars.
- For the period January 1, 2011 through March 31, 2011, eighty-five million dollars.
- For the period April 1, 2011 through March 31, 2012, three hundred forty million dollars.
- For the period April 1, 2012 through March 31, 2013, three hundred forty million dollars.
- For the period April 1, 2013 through March 31, 2014, three hundred forty million dollars.
For programs providing services in local social service districts which do not include a city with a population of over one million persons:

For the period April 1, 2002 through December 31, 2002, seven million dollars.
For the period January 1, 2003 through December 31, 2003, fourteen million dollars.
For the period January 1, 2004 through December 31, 2004, twenty-one million dollars.
For the period January 1, 2005 through December 31, 2006, twenty-seven million dollars annually; for the period August 17, 2006 through December 31, 2006, an additional aggregate amount of four million dollars.
For the period January 1, 2007 through June 30, 2007, thirteen million five hundred thousand dollars.
For the period July 1, 2007 through March 31, 2008, twenty-six million two hundred fifty thousand dollars.
For the period April 1, 2008 through March 31, 2009, twenty-eight million five hundred thousand dollars.
For the period April 1, 2009 through March 31, 2010, twenty-eight million five hundred thousand dollars.
For the period April 1, 2010 through March 31, 2011, twenty-eight million five hundred thousand dollars.
For the period April 1, 2011 through March 31, 2012, twenty-eight million five hundred thousand dollars.
For the period April 1, 2012 through March 31, 2013, twenty-eight million five hundred thousand dollars.
For the period April 1, 2013 through March 31, 2014, twenty-eight million five hundred thousand dollars.

Revisions to rates made for such recruitment and retention costs shall not be subject to subsequent adjustment or reconciliation.

The final rate is payment-in-full for all personal care services provided during the applicable rate year, subject to any revisions made in accordance with rate revision or audit procedures.

For personal care services provided directly by social services district staff, payment is made according to a salary schedule established by the social services district. Except as otherwise noted in the plan, state-developed fee schedule rates are the same for both governmental and private providers. The agency's fee schedule rate was set as of January 1, 2009 and is effective for services provided on or after that date. All rates are published on the New York State Department of Health website at:

www.health.ny.gov/facilities/long_term_care/reimbursement/#-cr1

The Office of Mental Health (OMH) established the rate of payment to family care providers approved to provide personal care services to family care residents. The agency's fee schedule rate was set as of April 1, 2008 and is published at www.omh.ny.gov.
Personal Care Services (limited)

The Commissioner of Health, subject to the approval of the Director of the Budget, establishes reimbursement rates for certain personal care services provided to eligible residents by a certified operator of an adult home or enriched housing program that has been issued a limited license by the Department. A limited license may be issued to the certified operator of an adult home or enriched housing program and allows such operator to directly provide certain personal care and nursing services to residents of the adult home or enriched housing program governed by the terms of the limited license. The personal care services for which reimbursement shall be provided are Level II personal care services, including related nursing supervision, as authorized by the Commissioner, provided however, that the services provided are not personal care services that must otherwise be provided to residents of adult homes or enriched housing programs and, provided further, that reimbursement for Level II personal care services shall not include reimbursement for Level I nutritional and environmental support functions. Regional quarter hour rates are established utilizing weighted average Level II personal care rates for the respective regions for direct care and training, capital, and criminal checks, plus no more than fifteen percent of such rates for administrative expenses.
Personal Care Agency - Insurance Costs

The Commissioner of Health is authorized to provide for increased payments to personal care agencies to support increased employee fringe benefit costs associated with the agencies’ provision of enhanced health care coverage for their employees.

The cost of such health care related increased employee fringe benefits is a reimbursable cost for eligible certified personal care agencies. Eligible personal care agencies [as determined by the Commissioner of Health,] are those agencies whose workers are employed in cities within the state which have populations in excess of one million persons [and] or counties within the state which have populations in excess of [one million persons] nine hundred thousand persons if the county is located within the metropolitan commuter transportation district and meet the following conditions: (a) at least fifty percent of the [persons receiving services from] actual total hours of service for the period July 1, 2007 through March 31, 2008 provided by such employers are provided to recipients of medical assistance; and (b) the employer contributes to a group health insurance plan or employer based group health plan on behalf of such employees; and (c) no benefits are provided under the group health insurance plan or employer based group health plan in excess of the benefits provided to the majority of hospital workers in the community in which the personal care workers are employed.

[Total] Medicaid payments to eligible personal care agencies are based on total funds available for this program, allocated proportionately by Medicaid hours of service provided by each eligible provider, [the documented approved costs of the eligible agency for group health insurance premiums paid for their employed personal care attendants and allocable to the Medicaid hours of service provided by such employees.] Payments may, in the aggregate, and on an annual basis, be no more than $58,000,000 provided however, that for the period October 2 through December 31, 2003, the amount will increase by $105,000,000; and for annual periods [on and after] January 1, 2004 through June 30, 2007, the amount of funding shall be no more than $163,000,000 in the aggregate. For the period July 1, 2007 through March 31, 2008, the amount of funding shall be $122,300,000 in the aggregate for all eligible certified home health agencies and personal care providers. Rates of payment shall be adjusted for eligible providers and allocated proportionally [to reflect the Medicaid share of the approved costs] based on the [proportional] relationship of the provider’s Medicaid annual hours of service [care rendered to Medicaid beneficiaries] to the total Medicaid annual hours of service [care] rendered [to] by all of the providers [patients], based upon each provider’s actual Medicaid hours of service for which payment has been made by the State’s Medicaid Management Information System for the period July 1, 2007 through March 31, 2008.
New York
6(a)(iii)

Eligible providers shall use such funds solely for the purpose of supporting health insurance coverage for their employees and are prohibited from using such funds for any other purpose. The Commissioner is authorized to audit such providers for the purpose of ensuring compliance and shall recoup any funds determined to have been used for purposes other than those authorized.

[The Commissioner may modify the amounts made available for any specific annual period so long as the total amount made available for the period is not exceeded.] The effective period is January 1, 2000 through June 30, 2007 [March 31, 2008].

The Commissioner of Health is authorized to require group health insurance plans and employer based group health plans to report to the Department, insofar as such reporting does not violate any provisions the Federal Employee Retirement Income Security Act (ERISA), at such times and in such manner as the Commissioner shall decide, any information, including but not limited to, the number of people in such plans who become ineligible each month for the continuation coverage described herein. In addition every certified health maintenance organization and every insurer licensed by the Superintendent of Insurance shall submit reports in such form and at such times as may be required.

Criminal Background Checks for Personal Care Service Agencies

Effective April 1, 2005, personal care service agencies must obtain a criminal history record check from the United States Attorney General for any prospective unlicensed direct care employee. This includes obtaining, as part of an application for employment, all information from a prospective employee necessary for initiating the criminal history record check, including, but not limited to, a fingerprint card of the prospective employee. The federal fee and the costs associated with obtaining the fingerprint card shall be separately identified on any report of costs submitted to the Department of Health and shall be deemed an allowable cost for Medicaid rates of payment. Reimbursement for the period April 1, 2005 through March 31, 2006 and for the period April 1, 2006 through August 31, 2006, shall be made retrospectively based upon cost reports submitted for the 2005 and 2006 rate years, respectively. For new providers or existing providers for which cost report data is unavailable, payment will be based on budgeted costs and subsequently adjusted to reflect actual costs. Reimbursement for all types of providers shall total no more than $5,000,000 for the April 1, 2005 through March 31, 2006 period and no more than $5,600,000 for the April 1, 2006 through August 31, 2006 period. Reimbursement for the Medicaid share of these costs shall be in the form of an add-on to the current rates of payment and will be determined by the percent of Medicaid utilization to total utilization for each provider. If the total cost for these criminal background checks for all types of providers exceeds the amount set forth for the specified period, provider specific reimbursement will be reduced proportionally based on each eligible provider's reported costs for criminal background checks to the total costs of criminal background checks of all eligible providers.
Accessibility, Quality, and Efficiency of Home Care Services

The Commissioner of Health shall adjust rates of payment for services provided by personal care service providers for the purpose of enhancing the provision, accessibility, quality, and/or efficiency of home care services. These rate adjustments shall be for the purposes of assisting such providers, located in social services districts that do not include a city with a population of over one million persons, in meeting the cost of:
(i) Increased use of technology in the delivery of services, including clinical and administrative management information systems;

(ii) Specialty training of direct service personnel in dementia care, pediatric care, and/or the care of other conditions or populations with complex needs;

(iii) Increased auto and travel expenses associated with rising fuel prices, including the increased cost of providing services in remote areas;

(iv) Providing enhanced access to care for high need populations.

The Commissioner shall increase the rates of payment for eligible providers in an aggregate amount of $16,000,000 annually for the periods June 1, 2006 through March 31, 2007, July 1, 2007 through March 31, 2008, and June 1, 2008 through March 31, 2009.

Rates will be adjusted in the form of a uniform percentage add-on as calculated by the Department, based upon the proportion of total allocated dollars, to the total Medicaid expenditures for covered home care services provided in local social services districts that do not include a city with a population over one million. All government and non-government owned or operated providers are eligible for this adjustment pursuant to the same uniformly applied methodology.
Community First Choice Option

Methods and Standards for Establishing Payment Rates

Prior to implementing the CFC program, the State had already been offering CFC like services under various approved state plan and waiver programs authorities. Under CFC, these services have now been consolidated into a single program. For the first year of the CFC program, the State will continue to pay the same fees or use the same methodologies in effect on June 30, 2015 under the former state program to purchase CFC services.

1. Assistance with ADLs, IADLs and health-related tasks through hands-on assistance, supervision, and/or cueing. The State will use the current fee or methodology identified in the following programs for the providers listed in Attachment 3.1-K Supplement (Personal Care Aides, Personal Attendants, Personal Assistants, Home Health Aides, and Direct Service Professionals that meet the licensure and certification requirements under NYCCR Title 18 and the guidance of the Department of Health and/or the Office for People with Developmental Disabilities and the Office of Mental Health are qualified providers of personal care services and supports under CFCO).

**Hospice Services - Adjustment for Minimum Wage Increases**

Effective April 1, 2018, and every January 1, thereafter until the minimum wage reaches the statutorily described per hour wage as shown below, the rates of payment for services provided by Non-Residence Hospice providers include rate add-on to reimbursement in accordance with the wage chart shown below to address increases in labor costs.

The minimum wage adjustment will be developed and implemented as follows:

1. Minimum wage costs will mean the additional costs incurred beginning April 1, 2018 and thereafter, as a result of New York State statutory increases to minimum wages.

2. The 2018 provider specific minimum wage add-on will be developed based on collected survey data received and attested to by hospice providers. If a hospice provider fails to submit the attested survey data, a provider will not receive a minimum wage add-on.

   i. Minimum wage cost development based on survey data collected.
      a. Survey data will be collected for provider specific wage data.
      b. Facilities will report by wage bands, the total count of FTEs and total hours paid to all employees (contracted and non-contracted staff) earning less than the statutory minimum wage applicable for each region.
      c. Facilities will report an average fringe benefit percentage for the employees directly affected by the minimum wage increase.
      d. The minimum wage costs are calculated by multiplying the total hours paid by the difference between the statutory minimum wage and the midpoint of each wage band where the provider has reported total hours paid. To this result, the provider’s average fringe benefit percentage is applied and added to the costs.

3. The provider specific cost amount will be adjusted by a factor calculated by dividing the provider’s average dollar per hour under minimum wage by the regional average. The resulting amount will be divided by patient days to arrive at a rate per diem add on, which will be applied to only Medicaid days for purposes of Medicaid reimbursement.

4. In subsequent years until the minimum wage is completely implemented statewide, the Department will survey facilities utilizing the same methodology.

**TN #18-0023**

**Approval Date** 09/07/2018

**Supersedes TN ___ New**

**Effective Date** 04/01/2018
5. **Minimum Wage Reconciliation** - After the end of each calendar year, the Department of Health will survey providers to obtain the following information for the purpose of reconciling annual minimum wage reimbursement. The state will release the reconciliation survey by the end of March and providers will have two weeks to complete the survey or request an extension if a provider determines it is unable to complete the survey within that time. Approval of extensions, and the time of the extension, is at the discretion of the state. If the reconciliation survey is not submitted within the two weeks or within the extension time frame, should one be granted, the provider’s minimum wage add-on for the calendar year covered by the survey will be recouped.

   i. Total annual minimum wage funding paid to the provider (as determined from the minimum wage add-on to claims paid for services rendered in the prior calendar year) for the Medicaid share of the minimum wage law increase requirement. (This information will be supplied by the Department of Health.) Medicaid’s share is the percentage of minimum wage costs that are attributable to Medicaid services based on the proportion of Medicaid services to a provider’s total services.

   ii. Medicaid’s share of the total amount the provider was obligated to pay to bring salaries up to the minimum wage for the calendar year. (This information will be completed by the provider.)

   iii. Minimum wage funds to be recouped or additional funds to be received by the provider. (This information will be completed by the provider.) This will be the difference between the amount paid to the provider for the Medicaid share of the minimum wage law increase requirement and the corresponding amount the provider determined it was actually obligated to pay.

   iv. The State agency will review providers’ submissions for accuracy and reasonableness, following which it will process associated payments and recoupments via retroactive per unit rate adjustments as quickly as practical thereafter.

   v. The agency’s Chief Executive Officer or Chief Financial Officer must sign an Attestation verifying the data that is supplied in the survey.
Hospice Non-Residence:

The Hospice Non-Residence Provider rate is the Federal minimum rates issued by CMS.

Hospice Residence:

On March 31, 2018, a 10% increase in the Hospice residence reimbursement rate of each Wage Equalization Factor (WEF) region will be calculated. The per diem value of this 10% increase will be incorporated into all subsequent fiscal periods, effective April 1, 2018, and every January 1 thereafter.

Effective April 1, 2018, and every January 1 thereafter, Hospice residence reimbursement rates will be equal to 94% of the weighted average Medicaid rate of the nursing facilities located in the WEF region in which the hospice residence is located, plus the per diem value of the 10% increase calculated in the above paragraph.

Hospice rates can be found on the Department of Health website at:

http://www.health.ny.gov/facilities/long_term_care/reimbursement/hospice/

Approval Date January 8, 2001
Effective Date January 1, 2000
New York
7(a)

Section 86-2.9, Adult Day Health Care in Residential Health Care Facilities, is hereby amended to read as follows:

Section 86-2.9 Adult Day Health Care in Residential Health Care Facilities: (a) Except as specifically identified in subdivision (g), rates for residential health care facility services for adult day health care registrants shall be computed on the basis of the allowable costs, as reported by the residential health care facility, and the total number of visits by adult day health care registrants, as defined in Part 425 of this Title, for which services were delivered pursuant to Article 6 of Subchapter A of Chapter V of this Title subject to the maximum daily rate provided for in this section.

(b) For adult day health care programs without adequate cost experience, rates will be computed based upon annual budgeted allowable costs, as submitted by the residential health care facility and the total estimated annual number of visits by adult day health care registrants, as defined in Part 425 of this Title, for which services were delivered pursuant to Article 6 of Subchapter A of this Title subject to the maximum daily rate provided for in this section.
(c) Allowable costs shall include, but not be limited to the following:

(1) applicable salary and non-salary operating costs;
(2) costs of transportation; and,
(3) appropriate portion of capital costs, allocated according to instructions accompanying the RHCF-4 report.

(d) the maximum daily rate, excluding the allowable costs of transportation, for services provided to a registrant in a 24 hour period as described in Part 425 of this title shall be 75 percent of the sponsoring facility’s former skilled nursing facility rate in effect on January 1, 1990, with the operating component trended forward to the rate year by the sponsoring facility’s trend factor.

(e) notwithstanding subdivision (d) of this section or any other regulations to the contrary, for the period July 1, 1992 to March 31, 1993 and annual periods beginning April 1, 1993 through March 31, 1999, July 1, 1999 through March 31, 2003, April 1, 2003 through March 31, 2005, and from April 1, 2005 through March 31, [2007] 2009, the maximum daily rate, excluding the allowable costs of transportation, for services provided to a registrant in a 24 hour period as described in Part 425 of this Title shall be 65 percent of the sponsoring facility’s former skilled nursing facility rate in effect January 1, 1990, with the operating component trended forward to the rate year by the sponsoring facility’s trend factor.

For adult day health care facilities, beginning on and after April 1, 2006, the Commissioner of Health shall apply a trend factor projection of 2.25% attributable to the period January 1, 2006 through December 31, 2006. Upon reconciliation of this trend factor, in accordance with the previously approved state methodology, the final 2006 trend factor shall be the U.S. Consumer Price Index (CPI) for all Urban Consumers, as published by the U.S. Department of Labor, minus 0.25%.

For reimbursement of adult day health care services provided on and after April 1, 2008, the Commissioner of Health shall apply a trend factor projection equal to 75% of the otherwise applicable trend factor for calendar year 2008.

For reimbursement of adult day health care services provided on and after April 1, 2008, the Commissioner of Health shall apply a trend factor projection equal to 65% of the otherwise applicable trend factor for calendar year 2008, as calculated in accordance with the general Trend Factor section of this Attachment.
For rates of payment effective for adult day health care services provided on and after January 1, 2009 through March 31, 2009, the otherwise applicable final trend factor attributable to the 2008 calendar year period shall be adjusted such that any increase to the average trend factor for the period April 1, 2008 through December 31, 2008 shall be reduced, on an annualized basis, by 1.3%. However, no retroactive adjustment to such trend factor will be made for the period April 1, 2008 through December 31, 2008. Effective on and after April 1, 2009, the otherwise applicable final trend factor attributable to the 2008 calendar year period shall be zero.

For rates of payment effective for adult day health care services provided on and after January 1, 2009 through March 31, 2009, a trend factor equal to the otherwise applicable trend factor attributable to the period January 1, 2009 through December 31, 2009, less 1% shall be applied. Effective on and after April 1, 2009 the otherwise applicable trend factor attributable to the 2009 calendar year period shall be zero.

For rates of payment effective for services provided on and after January 1, 2010 through March 31, 2010, the otherwise applicable final trend factor attributable to the 2010 calendar year period shall be zero.

For rates of payment effective for adult day health care services provided on and after April 1, 2010, the otherwise applicable trend factor attributable to the 2010 calendar year period shall be zero.

For rates of payment effective for adult day health care services provided on and after April 1, 2011, the otherwise applicable trend factors attributable to the 2011 through 2014 calendar year periods shall be no greater than zero. For such rates effective for the period January 1, 2015 through March 31, 2015 and for the period April 23, 2015 through December 31, 2015 otherwise applicable trend factors attributable to the 2015 calendar year period shall be no greater than zero. For rates of payment effective for adult day health care services provided on and after January 1, 2016 through March 31, 2017 and for the period April 1, 2017 through December 31, 2017, the otherwise applicable trend factor attributable to the 2016 and 2017 calendar year periods shall be zero. For rates of payment effective for adult day health care services provided on and after January 1, 2018 through March 31, 2019, the otherwise applicable trend factor attributable to the 2018 and 2019 calendar year periods shall be zero.
(f) For facilities without a skilled nursing facility rate, computed in accordance with section 86-2.10 or section 86-2.15 of this Subpart, in effect on January 1, 1990, a weighted average rate for each region listed in Appendix 13A of this Title shall be used as the proxy for the facility's January 1, 1990 skilled nursing facility rate in determining the maximum daily rate for such facilities as set forth in subdivisions (d) and (e) of this section. The weighted average rate for each region shall be equal to the statewide weight average 1990 skilled nursing facility rate with the statewide average direct component and indirect component of the rate adjusted respectively by the regional direct and indirect input price adjustment factors described in section 86-2.10. The statewide weighted average rate shall be computed by multiplying each residential health care facility's 1990 skilled nursing facility rate times its 1990 skilled nursing facility patient days, summing the result statewide, and dividing by the statewide total 1990 skilled nursing facility patient days. The 1990 rate used in computing the statewide weighted average rate shall be the latest 1990 rate in effect on July 1, 1992 for the former skilled nursing level of care which is contained in the rate which has been certified by the commissioner pursuant to section 2807(3) of the Public Health Law.

(g) Effective April 1, 1994 and thereafter reimbursement for Adult Day Health Care services provided to registrants with acquired immunodeficiency syndrome (AIDS) and other human immunodeficiency virus (HIV) related illnesses and other high-need populations shall be established as follows. Payment shall be a per visit price with not more than one visit per day per registrant. The rate of payment shall consist of a single price per visit for the operating component, transportation, and the capital cost component and shall be based upon a rate of $160 per visit per 24 hour period. To be eligible for reimbursement a residential health care facility must be certified by the Department to provide adult day health care services for AIDS/HIV registrants and, effective September 1, 2017, to other high-need registrants. The price shall be full reimbursement for the following: (i) physician services, nursing services, and other related professional expenses directly incurred by the licensed residential health care facility; (ii) administrative, personnel, business office, data processing, recordkeeping, housekeeping, food services, transportation, plant operation and maintenance and other related facility overhead expenses; (iii) all other services required for adult day health care in residential health care facilities appropriate to the level of general medical care required by the patient; (iv) all medical supplies, immunizations, and drugs directly related to the provision of services except for those drugs used to treat AIDS.
patients for which fee-for-service reimbursement is available as determined by the Department of Health.

Medical assistance rates of payment for adult day health care services provided on and after December 1, 2002 to patients with AIDS/HIV and other high-need populations by a residential health care facility shall be increased by three percent.

This increase to rates of payment will be for purposes of improving recruitment and retention of non-supervisory workers or any worker with direct patient care responsibility. Programs are prohibited from using the funds for any other purpose. The Commissioner of Health is authorized to audit each program to ensure compliance with the purpose for which this funding is provided and shall recoup any funds determined to have been used for purposes other than recruitment and retention.

To generate a threshold day care bill, the provider must ensure that clients receive a core service [and be in attendance for a minimum of three hours, and over the course of the week, receive a minimum of three hours of health care services.] in accordance with clients’ comprehensive care plans. Health care services are defined as both the core services and health related services that are therapeutic in nature and directly or indirectly related to the core services, which must be identified on the client’s comprehensive care plan. Each visit must include a core service. A bill cannot be generated unless one or more services are provided in accordance with a client’s comprehensive care plan [if these two requirements are not met].

**Core services include:**

- Medical visits
- Nursing visits
- Individual and group Mental Health services
- Individual and group Nutrition counseling services
- Individual and group Substance Abuse counseling services
- Medication group counseling
- Activities of Daily Living
- Physical and Occupational Therapy services
- Case management services
- Prevention/Risk reduction counseling
- Any routine assessment performed by an appropriately credentialed staff person

TN #17-0006 Approval Date December 11, 2017
Supersedes TN #11-11 Effective Date September 1, 2017
Health related (non-core) services include:

- Group exercise sessions
- Acupuncture
- Breakfast and/or lunch
- Therapeutic massage
- Yoga
- Pastoral care
- Therapeutic recreation and structured socialization services
- Tai-chi

For adult day health care services provided to patients diagnosed with HIV/AIDS and other high-risk populations on and after January 1, 2007, medical assistance rates of payment to residential health care facilities shall be increased up to an annual amount of $2.8 million in the aggregate. Such amount shall be allocated proportionally among eligible providers based on the medical assistance visits reported by each provider in the most recently available cost report, as submitted to the Department of Health. Such allocated amounts will be included as an adjustment to each provider’s daily rate of payment for such services.

For adult day health care services rendered on and after January 1, 2007, through December 31, 2009, and for adult day health care services provided to patients diagnosed with HIV/AIDS and other high-risk populations on and after April 1, 2009, medical assistance rates of payments shall reflect trend factor adjustments computed in accordance with the previously approved trend factor methodology contained in this Attachment.

Effective April 1, 2011 through June 30, 2011, rates of payment for adult day health care services provided to patients with AIDS or other HIV related illnesses shall be increased by an additional aggregate amount of $946,350 to be allocated proportionally among such providers based on the Medicaid visits as reported in the most recently available cost report submitted to the State by January 1, 2011.

(h) For the period April 1, 2007 and thereafter, rates of payment for adult day health care services provided by residential health care facilities, shall be computed in accordance with the following:

(i) the operating component of the rate for an adult day health care program that has achieved an occupancy percentage of 90% or greater for a calendar year, prior to April 1, 2007, shall be calculated utilizing allowable costs reported in the 2004, 2005, or 2006 calendar year residential health care facility cost report filed by the sponsoring residential health care facility, whichever is the earliest of such calendar year cost reports in which the program has achieved an occupancy percentage of 90% or greater, except that programs receiving rates of payment based on allowable costs for a period prior to April 1, 2007 shall continue to receive rates of payment based on that period;

(ii) for programs that achieved an occupancy percentage of 90% or greater prior to calendar year 2004 but did not maintain occupancy of 90% or greater in calendar years 2004, 2005, or 2006, the operating component of the rate of payment will be calculated utilizing allowable costs reported in the 2004 calendar year cost report divided by visits imputed at 90% occupancy.
(iii) programs that have not achieved an occupancy of 90% or greater for a calendar year prior to April 1, 2007, will have the operating component of the rate of payment calculated utilizing allowable costs reported in the first calendar year after 2006 in which the program achieves an occupancy of 90% or greater effective January first of such calendar year except for calendar year 2007, effective no earlier than April first of such year, provided, however, that effective January 1, 2009 programs that have not achieved an occupancy of 90% or greater for a calendar year prior to January 1, 2009, the operating component of the rate of payment will be calculated utilizing allowable costs reported in the 2009 cost report filed by the sponsoring residential health care facility divided by actual visits or imputed at 90% occupancy, whichever is greater. This will also apply to programs which achieve an occupancy percentage of 90% or greater prior to calendar year 2004, but in such year had an approved capacity that was not the same as in calendar year 2004.

(iv) for residential health care facilities approved to commence operation of an adult day health care program on or after April 1, 2007, rates of payment for these programs will be computed based upon annual budgeted allowable costs, as submitted by the residential health care facility, and total estimated annual visits by adult day health registrants of not less than 90% of licensed occupancy. Each program shall also be required to submit an individual budget. Multiple programs operated by the same residential health care facility shall each have separate rates of payment;

(v) Rates developed based upon budgets shall remain in effect for no longer than two calendar years from the earlier of:

(A) the date the program commences operations; or
(B) the date the sponsoring residential health care facility submits a full calendar year residential health care facility cost report in which the program has achieved 90% or greater occupancy. If a sponsoring residential health care facility submits such a cost report within two years of the date the program commences operation, rates shall then be computed utilizing that cost report.
New York
7(b)(iii)

(vi) If a program fails to achieve 90% or greater occupancy within two calendar years of the date of its commencing operations, rates will be calculated utilizing allowable costs reported in such second calendar year residential health care facility’s cost report for the applicable sponsoring residential health care facility divided by visits imputed at 90% occupancy.

(vii) Effective January 1, 2008, rates of payment will exclude reimbursement for the costs of transportation:

(viii) All rates of payment established for adult day health programs operated by residential health care facilities [shall] will be subject to the maximum daily rate otherwise provided by law, provided, however, that such maximum daily rate of payment for adult day health programs operated by residential health care facilities that underwent a change of ownership subsequent to 1990 will be determined by utilizing the inpatient rate of payment of the prior operator as in effect on January 1, 1990, and further provided that in the event a residential health care facility operates an off-site adult day health program outside the regional input price adjustment region in which such facility is located, the computation of the maximum daily rate of payment for that program will utilize the weighted average of the inpatient rates of payments for residential health care facilities in the region in which the program is located, as in effect on January 1, 1990, in place of the sponsoring residential health care facility’s inpatient rate of payment.

[86-2.10] Computation of basic rate.

[j] Rates for residential health care facility services for [nonoccupants] non-occupants for 1986 and subsequent rate years [shall] will be calculated in accordance with [section] §86-2.9 of this Subpart, with any operating component of the rate trended from the 1983 base year, to the rate year by the applicable roll factor promulgated by the [d]Department.

**Across the Board Increase**

(1) For dates of service on and after November 1, 2018, the operating component of the rates of reimbursement for Adult Day Health programs operated by residential facilities, as calculated pursuant to this Attachment, will be adjusted to reflect an across the board increase of one and one-half percent (1.5%).

a. Sections subjected to the one and one-half percent (1.5%) increase are as follows:

   i. Adult Day Health Care program

b. The capital component of the rates are not subject to the one and one-half percent (1.5%) increase.

<td>[In accordance with the State Mental Hygiene Law, the Office of Mental Health establishes Medicaid rates of reimbursement for outpatient programs issued operating certificates by the Office. The Intensive Day Treatment program is an outpatient program. Medicaid rates established by the Office of Mental Health must be certified by the Commissioner and approved by Division of the Budget. The methods and standards set forth below do not apply to any other type of outpatient programs licensed by the Office of Mental Health:]</td>
</tr>
</tbody>
</table>

TN  #10-0018  Approval Date  November 1, 2017
Supersedes TN  #87-0031  Effective Date  July 1, 2010
(1) Operating Costs

Medicaid rates for Intensive Day Treatment programs are established prospectively and are all inclusive, taking into account all allowable costs and all allowable visits.

Because Intensive Day Treatment programs have not yet accumulated sufficient cost information to establish cost related rates, operating costs for all Intensive Day Treatment programs are determined on the basis of cost projections contained in budget documents prepared by Intensive Day Treatment programs selected for operation and submitted for review and approval by the Office of Mental Health.

Allowable operating costs include the costs of services approved by the Commissioner. In determining allowability of costs, the Office of Mental Health reviews the categories of costs, described below, with consideration given to the special needs of the patient population to be served by the Intensive Day Treatment program. The categories of costs to be reviewed shall include, but not be limited to, the following:

(i) Clinical care. This category of cost includes salaries and fringe benefits for clinical and direct care staff of the program.

(ii) Other than clinical care. This category of cost includes costs associated with administration, maintenance and support expenses.

Allowable operating costs in the category of clinical care are limited to costs approved by the Commissioner in connection with his review of the Intensive Day Treatment programs staffing plan. Allowable operating costs in the category other than clinical care are limited to budgeted costs. The other than clinical costs reported will be reviewed to determine their relative impact within a given program, as well as in comparison to the universe of selected Intensive Day Treatment programs.

Appeals from rate determinations are heard by the Commissioner. The Commissioner may hear requests for rate revisions which are based on errors in the calculation of the rate or in the data submitted by the facility or based on significant changes in operating costs resulting from changes in services, programs or capital projects approved by the Commissioner in connection with the Office of Mental Health’s certificate of need procedures. Revised rates must be certified by the Commissioner and approved by the Director of the Budget.

(2) Capital Costs

To allowable operating costs are added allowable capital costs. Allowable capital costs are determined by the application of principles developed for determining reasonable cost payments under the Medicare program. Allowable capital costs include an allowance for depreciation and interest. A return on equity, as determined by the New York State Department of Health, is allowed for proprietary hospitals. To be allowable, capital expenditure subject to the Office of Mental Health’s certificate of need procedures must be reviewed and approved by the Office of Mental Health.]

TN #10-0018 Approval Date November 1, 2017
Supersedes TN #87-0031 Effective Date July 1, 2010
Hospice Services: Routine Home Care, Continuous Home Care, Inpatient Respite Care, And General Inpatient Care

Medicaid payment for hospice care will be in amounts no lower than the Medicare rates for: general inpatient, inpatient respite, routine home care and continuous home care using the same methodology as used under Part A of Title XVIII. Annual adjustments shall be made to these rates commencing October 1, 1990, using inflation factors developed by the State.

The Commissioner of Health will increase medical assistance rates of payment by three percent for hospice services provided on and after December first, two thousand two, for purposes of improving recruitment and retention of non-supervisory workers or workers with direct patient care responsibility.

Rates of payment will be additionally adjusted for the purpose of further enhancing the provider’s ability to recruit and retain non-supervisory workers or workers with direct patient care responsibility. These additional adjustments to rates of payment will be allocated proportionally based on each hospice provider’s non-supervisory workers’ or direct patient care workers’ total annual hours of service provided to Medicaid patients as reported in each such provider’s most recently available cost report as submitted to the Department. The total aggregate available funding for all eligible hospice providers is as follows:

- For the period June 1, 2006 through December 31, 2006 - $730,000.
- For the period January 1, 2007 through June 30, 2007 - $730,000.
- For the period July 1, 2007 through March 31, 2008 - $1,460,000.
- For the period April 1, 2008 through March 31, 2009 - $1,460,000.
- For the period April 1, 2009 through March 31, 2010 - $1,460,000.
- For the period April 1, 2010 through March 31, 2011 - $1,460,000.
- For the period April 1, 2011 through March 31, 2012 - $1,460,000.
- For the period April 1, 2012 through March 31, 2013 - $1,460,000.
- For the period April 1, 2013 through March 31, 2014 - $1,460,000.
- For the period June 5, 2014 through March 31, 2015 - $1,460,000.
- For the period April 1, 2015 through March 31, 2016 - $1,460,000.
- For the period April 1, 2016 through March 31, 2017 - $1,460,000.
- For the period April 1, 2017 through March 31, 2018 - $1,460,000.
- For the period April 1, 2018 through March 31, 2019 - $1,460,000.
- For the period April 1, 2019 through March 31, 2020 - $1,460,000.
- For the period April 1, 2019 through March 31, 2020 - $1,460,000.

For providers established after November 1, 2005, the Department utilizes Medicaid data from the initial cost report submitted to the Department, which would allow the inclusion of those providers in the distribution.

Hospice services providers that have their rates adjusted for this purpose shall use such funds solely for the purposes of recruitment and retention of non-supervisory workers or workers with direct patient care responsibility and are prohibited from using such funds for any other purposes. Each hospice provider receiving funds shall submit, at a time and in a manner determined by the Commissioner, a written certification attesting that such funds will be used solely for the purpose of recruitment and retention of non-supervisory workers or workers with
direct patient care responsibility. The Commissioner is authorized to audit each provider to ensure compliance with this purpose and shall recoup all funds determined to have been used for purposes other than recruitment and retention of non-supervisory workers or workers with direct patient care responsibility. Payments made pursuant to this section shall not be subject to subsequent adjustment or reconciliation. All government and non-government owned or operated providers are eligible for this adjustment pursuant to the same uniformly applied methodology.

**Type of Service**

For persons residing in nursing facilities who have elected hospice care, the Medicaid State agency will pay the hospice an amount sufficient to cover room and board as defined in Section 1905 (o) of the Social Security Act.

**Special Needs Patients**

Enhanced Medicaid rates for services to special need hospice patients are established for routine home care, continuous home care and general inpatient care using the following methodology: Use the percentages for each service component as promulgated by the CMS in the routine home care, continuous home care and general inpatient care rates, to determine service component dollar values; use documented cost data which supports specific service component enhancement to calculate amount to be added to rate as an enhancement; apportion each rate into its respective labor and non-labor component using the Medicare prescribed labor to non-labor ratios; adjust labor component of each enhanced rate to account for regional differences in wages using Medicare hospice wage indices; add adjusted labor component to the non-labor component to arrive at the regional enhanced rates.

**Rehabilitative Services**

The New York State Office of Alcoholism and Substance Abuse Services establishes rates of reimbursement for the provision of rehabilitative services to persons in freestanding chemical dependence residential facilities. Allowable base year costs are determined by the application of principles developed for determining reasonable cost payments under the Medicare program. To be allowable, costs must be reasonable and relate to patient care. Allowable costs may not include costs for services, which have not been approved by the Commissioner. Total allowable costs are classified as either treatment related costs or room and board related costs. Utilizing only allowable treatment related costs; a provider-specific Medicaid treatment rate shall be established. The treatment rate shall consist of an operating and a capital component.

---

**TN #16-0004**

**Approval Date March 25, 2019**

**Supersedes TN #11-0015**

**Effective Date July 1, 2016**
Rehabilitative Services - Addiction Services

Addiction Residential Services

The New York State Office of Alcoholism and Substance Abuse Services establishes rates of reimbursement for the provision of rehabilitative services to persons in non-hospital freestanding residential addiction facilities under part 818. Allowable base year treatment costs are determined by application of principles developed for determining reasonable cost payments for direct and indirect costs consistent with 2 CFR 200 and 45 CFR 75. Utilizing only allowable treatment related costs, a provider-specific Medicaid treatment rate shall be established. Room and board related costs are not Medicaid reimbursable. All rates are published on the State website at:

https://www.oasas.ny.gov/mancare/documents/IPRArt32.xlsx

Reimbursement for all other non-hospital freestanding residential addiction facilities under Part 820 are paid based upon a Medicaid fee schedule established by the State of New York. The State developed fee schedule is the same for both governmental and private individual providers. The agency's fee schedule rate was set as of July 1, 2016 and is effective for services provided on or after that date. All rates are published on the State website at:

https://www.oasas.ny.gov/mancare/ResidentialAddictionServicesPart820.cfm

The fee development methodology will build residential fees considering each component of provider costs as outlined below. These reimbursement methodologies will produce rates sufficient to enlist enough providers so that services under the plan are available to beneficiaries at least to the extent that these services are available to the general population, as required by 42 CFR 447.204. These rates comply with the requirements of Section 1902(a)(3) of the Social Security Act and 42 CFR 447.200, regarding payments and consistent with economy, efficiency, and quality of care. Provider enrollment and retention will be reviewed periodically to ensure that access to care and adequacy of payments are maintained. The Medicaid fee schedule will be equal to or less than the maximum allowable under the same Medicare rate, where there is a comparable Medicare rate. Room and board costs are not included in the Medicaid fee schedule.

A unit of service is defined according to the Healthcare Common Procedure Coding System approved code set per the national correct coding initiative unless otherwise specified.
Rehabilitative Services (42 CFR 440.130(d): OASAS outpatient community-based addiction services

OASAS will establish regional fee schedules which recognize regional cost differences for outpatient community-based addiction rehabilitative services. All fees are subject to approval by the Division of the Budget. Outpatient community-based addiction providers are certified by OASAS pursuant to New York State Mental Hygiene Law Article 32 and not operated by a hospital.

Definitions
Except for the definitions below, the list of definitions in the APG System: Freestanding Clinics section will apply to the methodology for OASAS outpatient community-based addiction rehabilitative services.

- **Peer groups and Regions** - There are 6 OASAS Community-based addiction rehabilitative services peer groups. The peer groups are divided into two regions, downstate and upstate. The downstate region includes the following counties: New York, Kings, Queens, Richmond, Bronx, Nassau, Suffolk, Westchester, Rockland, Putnam, Duchess and Orange. The upstate region includes all other counties in the rest of the State. The peer groups are as follows: Upstate outpatient addiction agencies; Downstate outpatient addiction agencies; Upstate outpatient rehabilitation agencies; Downstate outpatient rehabilitation agencies; Upstate opioid treatment agencies; Downstate opioid treatment agencies. This information is also on the OASAS website at:

  [http://www.oasas.ny.gov/admin/hcf/FFS/RegionAPGBaseRate.cfm](http://www.oasas.ny.gov/admin/hcf/FFS/RegionAPGBaseRate.cfm)

  Providers with sites located in different regions receive reimbursement based on the region where the services are provided.

  New providers of OASAS outpatient community-based addiction rehabilitative services will be paid the same as other providers in their peer group.

Units of Service - A unit for outpatient community-based addiction rehabilitative services providers is equal to a service provided to an individual on a single day. An individual may have multiple services in a single day. Providers will not be reimbursed for two of the same services a day (e.g. two individual sessions, two group sessions) or more than two different services provided in a single visit date except for medication administration, medication management, complex care management, collateral visit, and peer support services. Multiple services (where permitted) in each visit will be discounted by 10%. The single unit must include: the discrete visit dates and the multiple CPT or HCPCS codes for services that are delivered on the individual days within the period. Qualified OTPs will receive a 10% add-on for delivery of enhanced services. Qualified outpatient community-based addiction rehabilitative services providers will receive a 50% add-on for services delivered by a certified peer.

TN  #16-0004  Approval Date  March 25, 2019
Supersedes TN  NEW  Effective Date  July 1, 2016
Reimbursement Methodology

Beginning in July 2016, the fee development methodology will be based on the case mix index for similar New York services. The calculation of the case mix index will be used in the periodic determination of the base rates to assure that prospective aggregate disbursements remain within available resources. The initial base rates were based on 2008 Medicaid claims data for OASAS providers. The initial update was based on claims data from 2010 for OASAS providers. Beginning in July 2016, the base rates will be updated at least every two years based on Medicaid claims from the most recent 12-month period, which is complete and accurate billing data. Community-based addiction rehabilitative services will not receive a capital add-on. The total volume of service type multiplied by the service weight and added to the other aggregated volume per service weight will determine initial case mix. Thereafter, case mix will continue to be determined by actual volume of reported services to yield the actual case mix ratio. A link to the base rates in effect can be found at:

https://www.oasas.ny.gov/mancare/SUDOP_OTP.cfm

Payment will be determined by multiplying a dollar base rates (varies by peer group) by the weight for each procedure. The weight is a numeric value that reflects the relative expected resource utilization for each procedure as compared to the expected resource utilization for all other procedures. Procedure weights are the same for all outpatient community-based addiction rehabilitative services regardless of peer group. The same weights will be applied to Addiction Rehabilitation Services and OASAS clinics operation under Mental Hygiene Law Article 32 and not operated by a hospital.

Peer Group Base Rates for outpatient community-based addiction rehabilitative services provided by OASAS licensed outpatient community-based addiction rehabilitation agencies and opioid treatment agencies.

Supersedes TN #92-0054  Effective Date July 1, 2010
Rehabilitative Services

[Reimbursement for approved early intervention providers is associated with resource use patterns to ensure that evaluations and early intervention services are economically and efficiently provided. The method is based on a classification of early intervention services.

Under the reimbursement methodology, individual or combined prices are established prospectively for each service category. For each service category, a price is established to cover labor, administrative overhead; general operating and capital costs. The prices are adjusted to reflect regional differences in costs. The regional classification system used to reflect differences in costs is described in the Wage Equalization Factor section of this Attachment. All prices are subject to the approval of the New York State Division of the Budget.

Existing rates of reimbursement, for approved early intervention services provided on and after December 1, 2002, shall be increased by three percent. The Commissioner of Health is authorized to require any early intervention provider, with the exception of self-employed early intervention providers, to submit a written certification attesting that such funds were or will be used solely for the purpose of recruitment and retention of early intervention service providers during the 2002-03 state fiscal year.

Effective May 1, 2011, and applicable to services on and after May 1, early intervention program rates for approved services rendered will be reduced by 5%. Prices resulting from this reduction are published on the agency's website at:

http://www.health.state.ny.us/community/infants_children/early_intervention/index.htm

The rates for Early Intervention services are the same for both governmental and private providers.

[Early Intervention service providers who were authorized to provide early intervention services pursuant to section 236 of the Family Court Act during 1993, shall be reimbursed actual allowable capital costs obligated prior to July 1, 1993. Such reimbursement will continue through June 30, 1996.]

TYPE OF SERVICE

Case Management Services
Target Group B:

Persons enrolled in Medical Assistance who:

(1) Have a documented diagnosis of mental retardation or a developmental disability as defined in New York Mental Hygiene Law § 1.03, and

(2) Are in need of ongoing comprehensive service coordination rather than incidental service coordination, and

(3) Have chosen to receive the services, and

(4) Do not reside in intermediate care facilities for the developmentally disabled; State operated developmental centers; small residential unit (SRU); nursing facilities, or hospitals or any other medical assistance institutional settings that provide service coordination, and

(5) Are not concurrently enrolled in any other comprehensive service coordination service funded under Medical Assistance.

METHOD OF REIMBURSEMENT

The method of reimbursement shall be a monthly fee established by OMRDD in conjunction with the New York State Department of Health and approved by the New York State Division of the Budget.

The method of reimbursement described in the paragraph above will sunset effective March 31, 2013.]
TYPE OF SERVICE

Case Management Services
Target Group D:

Medicaid eligible individuals who are served by the New York State Office of Mental Health’s Incentive Case Management Region and who

(i) are seriously and persistently mentally ill and

(ii) require intensive, personal and proactive intervention to help them obtain service, which will permit or enhance functioning in the community and

(iii) either have symptomatology which is difficult to treat in the existing mental health care system or are unwilling or unable to adapt to the existing mental health care system.

METHOD OF REIMBURSEMENT

For payment to Intensive Case Management providers in New York State a prospective cost based monthly rate shall be established for each provider. Providers may bill for the monthly rate only if the Medicaid eligible adult ICM client has been seen by the case manager a minimum if four times during the month. For Medicaid eligible seriously emotionally disturbed children in the ICM program, providers may bill for the monthly rate only if the case manager achieves a minimum of three face-to-face contacts with the client and the fourth face-to-face contact may be with either the client or a collateral, as defined in 14 NYCRR Part 587, 4(a) (3).

Rates of payment shall be effective for the annual period ending June 30, for providers in New York City and for the annual period ending December 31, for the remainder of the State. Rates of payment for programs operated by state psychiatric centers shall be effective for the annual period ending March 31.

1. Monthly payments to individual ICM providers is at regional fees approved by the Department of Social Services.

2. The National Institute of Mental Health has approved a grant to the NYS Office of Mental Health to evaluate the effects, if any, of the method of reimbursement on the activities of case managers and the implications, if any, on client interactions and outcomes. The experimental reimbursement methodology provides fee-for-service reimbursement for individual and group face-to-face contacts between Intensive Case Manager and enrolled client as an alternative to the monthly payments paid to other ICM providers. This reimbursement methodology will be in place for the Visiting Nurse Service only for the period January 1, 1992 through December 31, 1992.
TYPE OF SERVICE

Case Management Services
Target Group D1:

Medicaid eligible individuals who are served by the New York State Office of Mental Health’s Intensive Case Management Program and who:

(i) are seriously and persistently mentally ill and
(ii) require intensive, personal and proactive intervention to help them obtain service, which will permit or enhance functioning in the community and
(iii) either have symptomatology which is difficult to treat in the existing mental health care system or are unwilling or unable to adapt to the existing mental health care system.

METHOD OF REIMBURSEMENT

For payments to Flexible Intensive Case Management providers in New York State a monthly fee shall be established for each provider and approved by the Division of the Budget. Providers may bill for the monthly rate only if the Medicaid eligible adult ICM client has been seen by the case manager a minimum of two times during the month. Clients who appear to be ready for disenrollment from the program can be deemed to be in transitional status, and the program can bill during that period if the client receives a minimum of one visit, but in no instance may a client remain in transitional status for more than two months.

The program as a whole must provide in the aggregate four visits times the number of Medicaid recipients per month per case manager. For seriously and emotionally disturbed children’s programs/providers, up to 25% of the total required aggregate visits may be made to collaterals as defined in 14NYCRR Part 587.
TYPE OF SERVICE

Case Management Services
Target Group D2:

Medicaid eligible individuals who:

(i) are seriously and persistently mentally ill, and

(ii) require intensive, personal and proactive intervention to help them obtain service, which will permit or enhance functioning in the community, and

(iii) either have symptomatology which is difficult to treat in the existing mental health care system; or are unwilling or unable to adapt to the existing mental health care system; or need support to maintain their treatment connections and/or residential settings.

METHOD OF REIMBURSEMENT

Each Flexible and Blended Case Management program will receive a regional rate approved by the Division of the Budget determined by its staffing combination (i.e., the number of Intensive Case Managers and Supportive Case Managers on a particular team). No bill can be generated for a particular client unless that client has received at least two face-to-face contacts during the month. [However, in order to bill] The program as a whole is required to [must] provide in the aggregate four visits times the number of Medicaid recipients per month per Intensive Case Management staff and two times the number of Medicaid recipients per month per Supportive Case Manager. For seriously emotionally disturbed children's programs or providers, up to 25% of the total required aggregate Intensive Case Management visits may be made to collaterals as defined in 14 NYCRR Part 587. For those programs which do not achieve the required number of contacts, billings associated with the difference between the required number of contacts and achieved number of contacts shall be withheld pursuant to a schedule furnished to the provider by the Office of Mental Health. Clients who appear [to be] ready for disenrollment from the program can be placed into transitional status. The program can bill for the individual in transitional status during that [period] month if the client receives a minimum of one visit, but in no instance may a client remain in transitional status for more than two months.
**TYPE OF SERVICE**
Case Management Services  
Target Group: F

The targeted group consists of the categorically needy or medically needy who meet one of more of the following criteria.

Certain individuals residing in areas of New York State designated as underserved and economically distressed through the State's Neighborhood Based Alliance (NBA) Initiative. Under Chapter 657 of the Laws of 1990, the NBA is targeting state money, resources and services to designated areas in order to alleviate the pervasive and detrimental effects of poverty, lack of access to services and lack of services. Case management targeted individuals are those residents of the NBA areas who are experiencing chronic or significant individual or family dysfunction's which might be ameliorated through effective case management referral and monitoring of service provision. Such dysfunction's are assessed as chronic or significant by the case manager in accordance with an assessment tool approved by the Office of Children and Families. The assessment will determine chronic or significant dysfunction on the following categories or characteristics:

(i) school dropout  
(ii) low academic achievement  
(iii) Poor school attendance  
(iv) Foster care placement  
(v) Physical and/or mental abuse or neglect  
(vi) Alcohol and/or substance abuse  
(vii) Unemployment/underemployment  
(viii) Inadequate housing or homelessness  
(ix) family court system involvement  
(x) criminal justice system involvement  
(xi) poor health care  
(xii) family violence or sexual abuse

**METHOD OF REIMBURSEMENT**

Provider-specific rates are replaced with a regional rate structure.

The rate structure is based upon the identification of direct service components and incorporates a percentage allowance for indirect costs, based upon historical data.

The following are the direct service components of the rate:

Personal Services: Case Manager salary.

Fringe benefit: Rates were established at the average fringe rate for New York City, Greater Metropolitan and Upstate New York.

Other cost percentage will constitute a percentage of allowable costs other than case manager salary and fringe benefits such as equipment, rentals, utilities, etc.

The Rate Calculation Formula:

\[
\text{Direct costs} / \% \text{ Direct cost (%)} = \frac{\text{Billable Hours}}{4} = \text{Quarter Hour Rate.}
\]

Billable hours are defined as the total of all case managers time attributable to direct client service in the various components of case management e.g.
METHOD OF REIMBURSEMENT

Intake/screening, assessment, reassessment, monitoring, follow-up of crisis intervention.

Regionally calculated percentages have been determined for New York City, Greater Metropolitan New York and Upstate New York.

Trend Factor:

The rate will be adjusted by application of a trend factor approved by the Division of the Budget.
Effective December 1, 2011, the State is terminating the optional reimbursement of Medicaid case management services provided through the Neighborhood Based Alliance (NBA) — Target Group F on pages 10-4 and 10-5.
TYPE OF SERVICE:

Case Management Services
Target Group G:

Medicaid eligible clients who are served by the New York State Department of Health's Early Intervention Program and who:

1. are infants and toddlers from birth through two years who have a developmental delay or a diagnosed physical or mental condition that has a high probability of resulting in developmental delay;

2. have been referred to the municipal early intervention agency; and

3. are in need of ongoing and comprehensive rather than incidental case management services.

METHOD OF REIMBURSEMENT

Reimbursement for necessary case management services provided to the client and to the family in support of the primary client under the New York State Early Intervention Program shall be at hourly rates established by the New York State Department of Health and approved by the Director of the Budget. Providers will be allowed to bill in quarter hour units.

Rates for case management will be set prospectively and will cover labor, administrative overhead, general operating and capital costs. The rates are also adjusted to reflect regional differences in costs. The regional classification system used to reflect differences in costs is described in 86-2.10(c) (5) of Attachment 4.19-A of the State Plan.

Attachment 4.19-B

New York
10-6

Supersedes TN  #96-47  Effective Date  March 1, 2000

TN  #00-07  Approval Date  January 10, 2001
Target Group G - Early Intervention

Existing rates of reimbursement, for approved early intervention services provided on and after December 1, 2002, shall be increased by three percent. The Commissioner of Health is authorized to require any early intervention provider, with the exception of self-employed early intervention providers, to submit a written certification attesting that such funds were or will be used solely for the purpose of recruitment and retention of early intervention service providers during the 2002-03 state fiscal year.
New York

TYPE OF SERVICE
Case Management Services
Target Groups: A & E

A. Categorically or medically needy Persons under age 21, pregnant Parenting or at risk of pregnancy

E. Categorically or medically needy women of child-bearing age who are pregnant, and infants under one year of age.

METHOD OF REIMBURSEMENT

Provider- specific rates are replaced with a regional rate structure.

The rate structure is based upon the identification of direct service components and incorporates a percentage allowance for indirect costs, based upon historical data.

The following are the direct service components of the rate:

Personal Services: Case manager salary.

Fringe Benefit: Rates were established at the average fringe rate for New York City, Greater Metropolitan and Upstate New York.

Other cost percentage will constitute a percentage of allowable costs other than case manager salary and fringe benefits such as equipment, rentals, utilities, etc.

The Rate Calculation Formula:

Direct costs /% Direct cost (%) / Billable hours / 4 = Quarter Hour Rate.
METHOD OF REIMBURSEMENT

Billable hours are defined as the total of all case managers time attributable to direct client service in the various components of case management e.g. intake/screening, assessment, reassessment, monitoring, follow-up of crisis intervention.

Regionally calculated percentages have been determined for New York City, Greater Metropolitan New York and Upstate New York.

Trend Factor:

The rate will be adjusted by application of a trend factor approved by the Division of the Budget.
Effective December 1, 2011, the State is terminating the optional reimbursement of Medicaid case management services provided through TASA — Target Group A and CONNECT — Target Group E on pages 11 and 11-1.
Type of Service
Case Management Services
Target Group: C

Method of Reimbursement

The proposed methodology includes the following characteristics:

- Provider-specific rates are replaced with a regional rate structure
- Economics of scale associated with larger programs are accounted for;
- Direct service components are established with a fixed percentage allowance for indirect costs.
- An annual trend factor approved by the State Division of the Budget is applied in subsequent years;
- Billable hours continues to be used as the basis for billing. The procedure used to calculate billable hours is modified to recognize non-billable responsibilities and to encourage improved service quality.

Regional Rate

Reimbursement amounts will be established for New York City Metropolitan area and for the rest of the state based on the expected costs in those areas of each direct services component. The New York City metropolitan region will consist of the following counties: Nassau, Suffolk, Rockland, Westchester and the five boroughs of New York City.

Program Size Differential

The rate structure will reflect the economy of scale produced by larger programs. Reimbursement for larger programs will decrease

C. Categorically or medically needy women of child-bearing age, clients of Community Services Programs or Community Based Programs, children and adolescents through 20 years of age who are HIV+ and categorically or medically needy women with children who are negative or unknown serostatus, but who are at risk of HIV infection as a result of their personal activities or the activities of a sexual partner.
based upon the following criteria:

Rate A: For provider with 0 to 6 billable FTE staff.

Rate B: For providers with more than 6 to 12 billable staff.

Rate C: For providers with more than 12 FTE billable staff.

**Direct Service Components**

The rate structure is based upon the identification of direct services components and incorporate a percentage allowance for indirect costs.

The following are the direct service components of the rate.

Personal Services: Case manager salary, case management technician salary, community follow-up worker salary and the program director salary at 50% FTE.

Fringe Benefits: Rates were established at the average fringe rate for the metropolitan and rest of state regions.

Other Direct Costs: Quality Assurance Consultant Service, training cost for CM staff, travel cost for direct staff, conference registration costs for AIDS Institute conference, crisis intervention service costs, escort costs - security.

**Indirect Cost Percentage**

Direct Service will constitute 72% of the total allowable costs with the remaining 28% available for Indirect costs such as equipment, rentals, utilities, etc.
**The rate Calculation Formula:**

Direct costs/\% Direct cost (72%) / Billable Hours/4 = Quarter Hour Rate

(Billable hours are defined as the total of all case managers time attributable to direct client service in the various components of case management e.g. intake/screening, assessment, reassessment, monitoring, follow-up of crisis intervention.)

**Trend Factor:**

The rate will be adjusted annually by application of a trend factor drawn from the U.S. Department of Labor Statistics Economic Cost Index for civilian workers by industry division, services line; 12 months ending June 1993, and that future year rates be based on this trend factor.

TYPE OF SERVICE

Case Management Services
Target Group H:

The target group consists of medical assistance eligibles who are served by the Office of Mental Health’s Supportive Case Management Program and who:

(i) are seriously mentally ill; and

(ii) require personal and proactive intervention to help them obtain and maintain services, which will permit or enhance functioning in the community; and,

(iii) either have symptomology which is difficult to treat in the existing mental health care system or need support to maintain their treatment connections and/or residential settings.

These individuals include:

(1) heavy service users who are known to staff in emergency rooms, acute inpatient units, and psychiatric centers as well as providers of other acute and crisis services, who may have multiple disabilities including drug abuse, alcohol abuse or developmental disabilities; or

(2) persons with recent hospitalizations in either state psychiatric centers or acute care general hospitals; or,

METHOD OF REIMBURSEMENT

Provider Reimbursement for Target Group H

For payment to Supportive Case Management providers in New York State, monthly fees shall be established for each region for SCM Medicaid programs which are not OMH operated and Statewide fees for SCM Medicaid programs operated by OMH. Providers may bill for the monthly fee only if the medicaid eligible recipient has been seen by the case manager a minimum of two times during the month. Clients ready for disenrollment may be placed into “transitional” status for a period not to exceed two months, and during that period the program/provider can bill for a maximum face to face contact of one visit per month. The minimum amount of time required for a client encounter to be credited for the purpose of Medicaid reimbursement is 15 minutes.

The fees for SCM providers will be recommended by OMH, and approved by the State Division of the Budget (DOB). OMH will consult with DOH and DOB regarding any changes to the regulations.

1. The regional fees for SCM Medicaid providers which are not OMH operated shall be based upon OMH approved expenditures per SCM in each OMH region and the maximum caseload per SCM approved by OMH for the individual provider. These regional fees shall be developed as follows:
New York 11-E

(3) mentally ill who are homeless and live on the streets or in shelters; or,

(4) seriously emotionally disturbed children and adolescents whose disability disrupts their ability to function in educational, social, vocational and interpersonal spheres and who may, without intervention, be institutionalized, incarcerated or hospitalized; or,

(5) people in need of ongoing mental health support in order to maintain or enhance community tenure.

The aim is to benefit these recipients by reducing hospitalization and reliance on emergency psychiatric services, as well as increasing employment, encouraging better medication management and generally improving the individual's quality of life within the community.

**METHOD OF REIMBURSEMENT**, con.

a) Each SCM provider shall be approved for maximum monthly caseloads per SCM employed by the provider of either 20 or 30 enrolled clients.

b) The regional monthly fee for SCM providers approved for 20 clients shall be the OMH approved expected expenditures per SCM in the region divided by the product of 20 X 12 months X 90%.

c) The regional monthly fee for SMC providers approved for 30 clients shall be the OMH approved expected expenditures per SCM in the region divided by the product of 30 X 12 months X 90%.

2. The State monthly fees for SCMs employed directly by OMH in either free standing or shared staff arrangements with caseloads of 20 clients or 30 clients shall be the lesser of fees established using the methodology described in 1, above, or fees prescribed by DOB.
**TYPE OF SERVICE:**

Case Management Services  
Target Group I:  

Reimbursement for services provided to Target Group I, as described in Supplement 1 to Attachment 3.1A, pages I-1 through I-18...

**METHOD OF REIMBURSEMENT**

Reimbursement for case management services provided to children under the New York SSHSP and PSHSP shall be at fees established by the Department of Health and approved by the Director of the Budget.
The New York State (NYS) School Supportive Health Services Program (SSHSP) Targeted Case Management (TCM) for Target Group I, which became effective on October 3, 1996, is terminated on July 1, 2010.
Case Management Target Group M Method of Reimbursement:

Rate Methodology for Targeted Case Management Services for First-time Mothers/Newborns

Visit-based rates have been calculated for Targeted Case Management services for the First-Time Mothers/Newborn Program. The rates will allow for costs of nurses, supervisors, fringe benefits and overhead related to providing targeted case management services only. Rates are based on a two and one-half year program cycle. The maximum length of a visit is sixty-six minutes and is billed in fifteen-minute increments with a maximum of two-hundred and sixty increments.

Allowable nursing and nursing supervisor salaries are determined based on a time study and an analysis of registered nurses’ salaries in the counties in the state that will be providing targeted case management services. The allowable number of supervisors for reimbursement purposes is based on a time study and is to not exceed one supervisor per seven nurses. The allowable number of nurses for reimbursement purposes is based on a time study and is not to exceed one nurse per 24 clients. Fringe benefits are capped at thirty percent (30%) of salaries of agency nurses and supervisors, and agency overhead is capped at twenty-five (25%) of agency nurse and supervisor salaries and fringe benefits.

The total percentage of fringe costs is calculated by dividing the fringe benefit amount by the total amount of agency nurse and supervisor salaries and is capped at 30% of the salaries of agency nurses and supervisors. The total percentage of agency overhead costs is calculated by adding the totals of all other agency administrative and overhead costs (agency costs exclusive of nurse salaries, supervisor salaries and fringe benefits), and then dividing this amount by the total of agency nurses and supervisors salaries and allowable fringe benefit expenditures and is capped at 25% of the allowable salaries and fringe benefits of agency nurses and supervisors.

Hourly rates are calculated by dividing total allowable agency expenditures by the total number of nurse-hours in one year. This amount is divided by four (4) to determine the 15-minute incremental unit-of-service in which the visit will be billed.

The agency’s rates were set as of May 1, 2009 and are effective for services on or after that date. All rates are published in the various program manuals and are also available upon request from the State agencies involved. Expect as otherwise noted in the plan, state developed fee schedules rates are the same for both governmental and private providers.
Harm Reduction Services:

Method of Reimbursement: The proposed methodology includes the following characteristics:

- A regionally based payment structure of rates billable in quarter-hour and half-hour units of service;
  - To be eligible for payment, a service that is billed in quarter-hour units must be at least 8 minutes in duration; each unit of service provided beyond the initial 15 minutes must be at least 8 minutes in duration. Similarly, services eligible for billing in half-hour units must be at least 15 minutes in duration; each unit of service provided beyond the initial 30 minutes must be at least 15 minutes in duration;
- Direct service cost components are established with a fixed percentage allowance for indirect costs;
- An annual trend factor based on the Medicare Economic Index and approved by the State Division of Budget is applied 12 months following the effective date of the rates and on an annual basis thereafter; and
- The proportion of staff time that is devoted to billable activities is 55%). The procedure used to calculate billable activities recognizes non-billable responsibilities and other activities that encourage improved service quality, such as chart documentation, staff training, phone calls to medical and other providers on behalf of clients.

No funds shall be used to carry out the purchase or distribution of sterile needles or syringes for the hypodermic injection of any illegal drug.

Regional Rates: Regional rates will be established for New York City and the rest of the state and are based on the expected direct service costs in each region. Such rates are posted to the Department of Health’s website at:

Direct Service Cost Components: The rate structure is based on the identification of direct service components and incorporates an allowance for other non-personal services direct costs.

The following are the direct service components of the rate:

**Personal Services:** Salaries for direct service staff such as harm reduction counselors; peers; case managers and service coordinators; and program directors/supervisors, as appropriate for a specific region.

**Fringe Benefits:** Rates were established at the average fringe rates for the New York City region and the rest of the state.

**Other Non-Personal Services Direct Costs:** Space, utilities, phone, equipment, maintenance, supplies, and travel cost for direct service staff, as appropriate.

**Indirect Cost Component:** Indirect costs are included in the rate at 10% of total direct service component costs.

TN _____ #13-0019 Approval Date __August 10, 2017_____  
Supersedes TN _______ NEW____ Effective Date ____April 01, 2014______
The Rate Calculation Formula:
(Direct costs + Indirect costs) / Adjustment to account for non-billable activities

(Non-billable activities encompass those components of harm reduction attributable to direct client service, such as, crisis intervention, opioid overdose prevention training, and other activities necessary to or in support of providing harm reduction services.)

Effective Date: Rates for harm reduction services will be effective on or after April 1, 2014.

Health Maintenance Organization (HMO) Obstetrical and Pediatric Services:

Section 6306.3 requires that data on HMO obstetrical and pediatric services be given.

Health Maintenance Organizations with Section 1903 (m) Medicaid contracts must offer medical benefit packages that include pediatric and obstetrical services, which at a minimum, must be equal in scope and accessibility as that available to the HMO’s are prospectively negotiated, monthly capitation rates which represent payment in full for all the services provided by the HMO’s to their Medicaid membership.

The capitation rates are developed by a nationally known expert actuarial firm, and are capped at a percentage of historical Medicaid fee for service costs, which are trended and adjusted to reflect current Medicaid cost experience, including the costs of obstetrical and pediatric services. In many cases the HMO’s themselves have chosen to pay their health care practitioners the same rates of payment or use the same payment methodology for service members. Thus the availability of pediatric and obstetrical services to Medicaid recipients enrolled in HMO’s is equal to that available to the HMO’s general membership.

Clinic Services for Federally Qualified Native American Health Centers not subject to licensure under Article 28 of the State Public Health Law

Reimbursement for federally qualified health centers located on Native American reservations and operated by Native American tribes or tribal organizations pursuant to applicable Federal Law and for which State licensure is not required will be established consistent with the methodology applicable to freestanding diagnostic and treatment centers, including federally qualified health centers which are licensed under Article 28 of the State Public Health Law. The reimbursable base year administrative and general costs of a provider, excluding a provider reimbursed on an initial budget basis, shall not exceed the statewide average of total reimbursable base year administrative and general costs of diagnostic and treatment centers. For the purposes of this provision, reimbursable base year administrative and general costs shall mean those base year administrative and general costs remaining after application of all other efficiency standards, including, but not limited to, peer group cost ceilings or guidelines. The limitation on reimbursement for provider administrative and general expenses shall be expressed as a percentage reduction of the operating cost component of the rate promulgated for each diagnostic and treatment center with base year administrative and general costs exceeding the average. Prospective all inclusive rates of payment will be calculated by the Department of Health, based on the lower of allowable average operating costs per visit or the group ceiling trended to the current year as permitted by law, except that rates of payment for the period ending September 30, 1995 shall continue in effect through September 30, 2000. The facilities will be compared with other facilities offering similar types of services. The rates will include a capital component which is not subject to ceiling limitations. Rates are subject to approval of the Division of the Budget. The facilities will be required to forward to the Department of Health on an annual basis any necessary financial and statistical information.

The provisions of this section pertaining to reimbursable base year administrative and general costs of a provider of services shall be deemed to be in full force and effect through March 31, 1999, and from July 1, 1999 through March 31, 2000, and on and after April 1, 2000 through March 31, 2003.

The facility specific impact of eliminating the statewide cap on administrative and general costs, for the period April 1, 1999 through June 30, 1999 shall be included in rates of payment for facilities affected by such elimination for the period October 1, 1999 through December 31, 1999.
Methods and Standards for Establishing Payment rates for Indian Health Service and Tribal 638 Outpatient Facilities

☐ Indian Health Service outpatient facilities are paid the outpatient per visit rate published in the Federal Register.

☐ Tribal 638 outpatient facilities are paid using the outpatient per visit rate published in the Federal Register.

☐ Indian Health Service outpatient facilities are paid using the same methodologies and standards as non-HIS facilities of the same type.

☐ Tribal 638 outpatient facilities are paid using the same methodologies and standards as non-Tribal facilities of the same type.

☐ Indian Health Service outpatient facilities are paid using the methodology described below:

☒ Tribal 638 outpatient facilities are paid using the methodology decreed below:

Tribal 638 outpatient facilities, operating as diagnostic and treatment centers and designated by the Department as eligible facilities, are paid using the outpatient per visit rate published in the Federal Register, as an all inclusive rate for medical services as otherwise provided by diagnostic and treatment centers licensed under Article 28 of the Public Health Law.

TN #99-39
Supersedes TN NEW
Approval Date December 9, 1999
Effective Date July 1, 1999
Reimbursable Assessment on Ambulatory Care Services

[Assessments]

Effective January 1, 1997, rates of payment for outpatient services provided by general hospitals including referred ambulatory services and emergency services, and diagnostic and treatment centers providing a comprehensive range of primary health care services or ambulatory surgical services shall be increased by 5.98 percent to reimburse an assessment on net Medicaid patient service revenues. For services provided on and after July 1, 2003, the percentage shall be increased from 5.98% to 6.47%.

Effective October 1, 2000, reimbursement of the [5.98%] assessment on Medicaid net patient service revenue received for referred ambulatory clinical laboratory services of hospitals and diagnostic and treatment centers will be discontinued.

Effective January 1, 2006, an assessment on net patient services revenue for the ambulatory care services identified above that are rendered to Medicaid beneficiaries shall be considered an allowable cost and reimbursed through an adjustment to Medicaid services rates of payment.

Hyperbaric Oxygen Therapy (HBOT)

The Department of Health will continue to conduct a pilot reimbursement program for a period of three **additional** years to study and determine the efficacy of funding certain outpatient HBOT services provided by select hospitals in New York State.

(a) Hospitals will be selected based upon their experience in providing outpatient HBOT services and pending appeals to establish specialty outpatient HBOT rates of reimbursement, which were submitted to the Department no later than January 25, 2000. In order to participate in the program, such hospitals will be required to submit quarterly reports to the Department that include specific measurable outcomes in order to determine the effectiveness of the program.

(b) Outpatient HBOT services covered by Medicaid in this pilot program include only those listed in Section 35-10A of the Medicare Coverage Issues Manual published by the [Health Care Financing Administration] Centers for Medicare And Medicaid Services.

(c) The payment rate for outpatient HBOT services provided in accordance with Section 35-10A of the Medicare Coverage Issues Manual shall be the current Medicare APC rate paid through the hospital outpatient prospective payment system.
Type of Service

Program of All-Inclusive Care for the Elderly (PACE)

Method of Reimbursement

The Department uses the following process in establishing rates:
The Department will determine a fee-for-service equivalent per member per month cost for State Plan approved services provided to an equivalent non-enrolled population group. This information; and/or any information received from the PACE provider, such as the provider’s anticipated enrollment, projected utilization of services and costs, cost experience, and indirect/overhead costs; and/or any other relevant information, will be used by the Department to determine a per member per month capitation rate for the provider that is less than the fee-for-service equivalent per member per month cost determined by the Department.
Upper Payment Limit and Rate Methodology

The methodology used by New York State to determine a Medicaid capitation PMPM rate for a PACE provider follows a two-step process. First, the Department determines a fee for service equivalent per-member-per-month cost for State Plan approved services provided to an equivalent non-enrolled population group. This is called the Upper Payment Limit (UPL). Then, this cost level, and/or any information received from the PACE provider, such as they provider's anticipated enrollment, projected utilization of services and costs, and/or any other relevant information, are used by the Department of Health to determine a per-member-per-month capitation rate. This rate does not exceed the fee for service equivalent per-member-per-month cost (i.e., the UPL in step one) developed by the Department.

In the following two sections, these two steps in the rate determination process are described in more detail.

Step 1: Development of the Upper Payment Limit (UPL)

The purpose of the Upper Payment Limit is for the State to ensure that the Medicaid monthly capitation payment amount for a PACE provider is less that the amount that would otherwise have been paid under the State plan if the participants were not enrolled under the PACE program.

The base period data file used by the Department for the purpose of developing the UPL's was an individual specific file on recipients, 55 years of age or older, of long term care services in New York State's fee for service program. These long term care services included community based services as well as nursing home care. Only the costs of State Plan approved services from this data file were used for the development of the UPL's. The data file contained expenditures by category of service and eligibility category. Since the file was of recipients of long term care services under the State's Medicaid program, individuals qualifying under the QMB Only, QDWI, SLMB, QI1, and QI2 programs were by definition excluded from this data base. Furthermore, recipients enrolled in capitated Medicaid managed care programs, including PACE participants, and their services were excluded.
In order to prepare the base period fee for service data file for further analysis, a number of adjustments were made. Claims completion factors were developed based on an examination of the data to determine the claims payment lag by service category. These completion factors were then applied to adjust the base period file expenditures. The pharmacy expenditures in the file were adjusted to net out the impact of rebates for pharmaceutical drugs. For transportation expenditures, an adjustment was made for payments not processed through the MMIS. In order to develop the UPL’s for premium groups pertaining to Medicaid Only Eligible individuals, adjustments were also made to the hospital impatient expenditures in the base period files to exclude graduate medical education (GME) payments, since PACE providers do not make a GME payment to their contracted hospitals.

Once the base period expenditure data were assembled and adjusted as described above, the data base was separated into the Medicare Medicaid Dual Eligible individuals and Medicaid Only Eligible individuals to proceed with UPL development. As a first step, analyses were undertaken to assess the need to smooth the data to improve the variability of rates and improve average predictability. For example, since it was intended that provider capitation rates and hence the UPL’s were to be on a county specific level, an analysis was performed to determine whether significant cost variations existed across counties within a given region. A finding of such variation would suggest a smoothing adjustment. However, the analysis of the dual eligible population did not find that variations in costs within regions were significant and hence no smoothing adjustment was applied to the expenditure data for this purpose. No stop less provisions are included in the PACE capitation rates and hence no such feature was reflected in the UPL development.

The analyses of the data base on the fee for service expenditures of individuals eligible for Medicaid Only found that the numbers of long term care recipients by county were extremely small for several counties. Hence, in lieu of UPL’s developed on a county specific basis for the Medicaid Only Eligible population, region specific UPL’s were developed. The regions used were New York City, Downstate Suburban, Upstate Urban, and Upstate non-Urban counties.
The data were also examined to determine the appropriate rate category groupings. In lieu of age-based or gender-based rate groupings, the State chose to differentiate Upper Payment Limits by a “High” and a “Low” risk group based on an analysis of cost variation among fee for service enrollees. The “High” group was defined as representing individuals with a DMS-1 score of 180; the “Low” group represented individuals with a score of 60 to 179. The DMS-1 is the state designated tool for determining nursing facility level of care. The UPL for each county, and the UPL for each region for the Medicaid Only Eligible population were separated into a “High” and “Low” category using the thresholds.

Using the base year fee for service expenditures as described above, updates of the UPL’s for a given rate year were achieved through inflation factors based on State fee for service increases in rates for various categories of expenditures pertaining to the long term care population. This update also included a review for program changes in fee for service long term care for inclusion into the UPL’s.

The methodology, as described above, produced Upper Payment Limits for the PACE eligible population, i.e., individuals who are Medicare Medicaid dual eligible and are 55 years of age or older and certified for nursing home care, on a county specific basis in rate period dollars. Separate UPL’s were determined for the “High” and “Low” groups. Regional UPL’s, separated into the “High” and “Low” categories were also produced for the PACE eligible population who have only Medicaid coverage and are 55 years of age or older.

Step 2: Provider Rate Proposal Submission and Rate Determination

This step constitutes the second step in the process of rate determination, with the UPL development (as described above) being the first. Each PACE provider submits a rate proposal to the State. The State provides the format, guidelines, and instructions for the rate proposal document. In the rate proposal, the provider is instructed to indicate anticipated enrollment, identify the types of services that will be provided to its enrollees, projected levels of utilization of services and the assumptions underlying these projections, and projected prices the provider will have to pay for these services. The rate proposal by a provider shows the monthly capitation rate being requested separately for the “High” and “Low” groups.
The rate proposal submitted by the provider is reviewed by the State. This review evaluates the reasonableness of utilization projects, appropriateness of unit prices of services, provider arrangements, expected administrative expenditures, historical cost experience and other factors. The result of this review is a capitation rate separately for the “High” and “Low” groups; determined by the State, after discussions with the plan. This capitation rate excludes the enrollee share amount based on the enrollee's applicable spenddown liability and Net Available Monthly Income (NAMI). The State ensures that the capitation rate approved for the provider does not exceed the appropriate upper payment limit (UPL) as developed in step one described above. The rate determined by the Department is subject to the approval of the State Division of the Budget.
New York

Type of Service

Early and Periodic screening, diagnostic and treatment services

Early and Periodic screening, diagnostic and treatment services for individuals under 21 years of age, and treatment of conditions found.

Reimbursement Methodologies for Early and Periodic Screening, Diagnostic and Treatment Services provided as the School Supportive Health Services (SSHS) and Pre-School Supportive Health Services (PSSHS) Programs

School Supportive Health Services (SSHS) and Pre-School Supportive Health Services (PSSHS) are delivered by or through a school district[, a Section 4201 school], a county in the State or the City of New York and include the following Medicaid services as described in Appendix 1 to Attachment 3.1-A and B of the Medicaid State Plan under item 4.b, EPSDT.

1. Physical Therapy Services
2. Occupational Therapy Services
3. Speech Therapy Services
4. Psychological Counseling
5. Skilled Nursing Services
6. Psychological Evaluations
7. Medical Evaluations
8. Medical Specialist Evaluations
9. Audiological Evaluations
10. Special Transportation

Effective for dates of service on or after September 1, 2009, payments to a school district[, a Section 4201 school], a county in the State or the City of New York for School Supportive Health Services and Pre-School Supportive Health Services shall be based on fees established by the Department of Health.

TN #17-0057 Approval Date November 28, 2017
Supersedes TN #09-0061 Effective Date July 1, 2017
New York
17(f)

Fees will be established for each service or procedure and, except for Special Transportation, such fees shall be set at 100(75)% of the 2017 (2010) Medicare fee schedule for the Mid Hudson Region.

Fees shall be published on the Department of Health's website, on the State Education Department's website, on the eMedNY website and shall be issued in policy and billing guidance distributed to school districts[, Section 4201 schools], and counties in the state and the City of New York.

1. **Physical Therapy Services**

   Fees for physical therapy services and procedures shall be set at 100 (75)% percent of the 2017 (2010) Medicare fee schedule for the Mid Hudson Region.

   Fees shall be published on the Department of Health’s website, on the State Education Department's website, on the eMedNY website and shall be issued in policy and billing guidance for school districts[, Section 4201 schools], counties in the State and the City of New York.

2. **Occupational Therapy**

   Fees for occupational therapy services and procedures shall be set at 100 (75)% of the 2017(2010) Medicare fee schedule for the Mid Hudson Region.

   Fees shall be published on the Department of Health’s website, on the State Education Department’s website, on the eMedNY website and shall be issued in policy and billing guidance distributed to school districts[, Section 4201 schools], counties in the State and the City of New York.

---

**TN #17-0057**  **Approval Date November 28, 2017**

**Supersedes TN #09-0061**  **Effective Date July 1, 2017**
3. **Speech Therapy Services**

Fees for speech therapy services and procedures shall be set at 100 [75]% of the 2017 [2010] Medicare fee schedule for the Mid Hudson region.

Such fees shall be published on the Department of Health’s website, on the State Education Department’s website, on the eMedNY website and shall be issued in policy and billing guidance distributed to school districts[, Section 4201 schools], counties in the State and the City of New York.

4. **Psychological Counseling**

Fees for psychological counseling services shall be set at 100 [75]% of the 2017 [2010] Medicare fee schedule for the Mid Hudson Region.

Such fees shall be published on the Department of Health’s website, on the State Education Department’s website, on the eMedNY website and shall be issued in policy and billing guidance distributed to school districts[, Section 4201 schools], counties in the State and the City of New York.

5. **Skilled Nursing Services**

Fees for skilled nursing services shall be set at 100 [75]% of the 2017 [2010] Medicare fee schedule for the Mid Hudson Region.

Such fees shall be published on the Department of Health’s website, on the State Education Department’s website, on the eMedNY website and shall be issued in policy and billing guidance distributed to school districts[, Section 4201 schools], counties in the State and the City of New York.

---

**Attachment 4.19-B**

**New York**

17(g)

---

TN #17-0057 Approval Date November 28, 2017

Supersedes TN #09-0061 Effective Date July 1, 2017
6. **Psychological Evaluations**

   Fees for psychological evaluations shall be set at $100 \ [75\]%$ of the 2017 [2010] Medicare fee schedule for the Mid Hudson Region.

   Such fees shall be published on the Department of Health's website, on the State Education Department's website, on the eMedNY website and shall be issued in policy and billing guidance distributed to school districts[, Section 4201 schools], counties in the State and the City of New York.

7. **Medical Evaluations**

   Fees for medical evaluations shall be set at $100 \ [75\]%$ of the 2017 [2010] Medicare fee schedule for the Mid Hudson Region.

   Such fees shall be published on the Department of Health's website, on the State Education Department's website, on the eMedNY website and shall be issued in policy and billing guidance distributed to school districts[, Section 4201 schools], counties in the State and the City of New York.

8. **Medical Specialist Evaluations**

   Fees for medical specialist evaluations shall be set at $100 \ [75\]%$ of the 2017 [2010] Medicare fee schedule for the Mid Hudson Region.

   Such fees shall be published on the Department of Health's website, on the State Education Department's website, on the eMedNY website and shall be issued in policy and billing guidance distributed to school districts[, Section 4201 schools], counties in the State and the City of New York.
9. **Audiological Evaluations**

Fees for audiological evaluations shall be set at 100 [75]% of the 2017 [2010] Medicare fee schedule for the Mid Hudson Region.

Such fees shall be published on the Department of Health’s website, on the State Education Department’s website, on the eMedNY website and shall be issued in policy and billing guidance distributed to school districts[, Section 4201 schools], counties in the State and the City of New York.

10. **Special Transportation**

One way rates of payment for special transportation services have been set based on a statistically valid cost study that was conducted in 1999 to establish round trip transportation rates. Such rates have been trended forward based on changes in the Consumer Price Index from 7/99 through 8/09 and converted to one way rates.

Such rates shall be published on the Department of Health’s website, on the State Education Department’s website, on the eMedNY website and shall be issued in policy and billing guidance distributed to school districts[, Section 4201 schools], counties in the State and the City of New York.
School Supportive Health Services Program (SSHSP)

A. Reimbursement Methodology for SSHSP

School-based services, known as School Supportive Health Services (SSHS), are delivered by the school districts and include the Medicaid services as described in Attachments 3.1-A and 3.1-B of the Medicaid State Plan under item 4.b, Early and Periodic Screening, Diagnostic and Treatment Services (EPSDT). School districts will be paid only for direct Medicaid-covered services provided pursuant to an Individualized Education Program (IEP). School Supportive Health Services include:

1. Physical Therapy Services
2. Occupational Therapy Services
3. Speech Therapy Services
4. Psychological Counseling
5. Skilled Nursing Services
6. Psychological Evaluations
7. Medical Evaluations
8. Medical Specialist Evaluations
9. Audiological Evaluations
10. Special Transportation

B. Direct Medical Payment Methodology

Effective for dates of service on or after October 1, 2011, providers with the exception of those located in a city with a population of over one million will be paid on a cost basis. Providers will be reimbursed interim rates for SSHS direct medical services per unit of service at the statewide interim rate as specified in the EPSDT section of this Attachment. On an annual basis a district-specific cost reconciliation and cost settlement for all over- and under-payments will be processed.

The units of service are defined by each Health Insurance Portability and Accountability Act (HIPAA) compliant Current Procedural Terminology (CPT) or Healthcare Common Procedure Coding System (HCPCS) code. Direct medical services may be encounter-based or in 15-minute unit increments. The interim rate is the rate for a specific service for a period that is provisional in nature, pending the completion of cost reconciliation and cost settlement for that period. SSHSP providers must maintain organized and confidential documentation regarding the services provided, including written orders; session notes; and students’ Individualized Education Programs. Such documentation must be maintained for a period of six years from the date the services were furnished or billed, whichever is later.
C. **Data Capture for the Cost of Providing Health-Related Services**

Data capture for the cost of providing health-related services will be accomplished utilizing the following data sources:

1. Total direct and indirect costs, less any federal non-Medicaid payments or other revenue offsets for these costs, will be captured utilizing the following data sources:
   
a. SSHS cost reports received from school districts, in the State of New York, inclusive of the Allowable cost categories defined in paragraphs D.1 and D.2 of this section;
   
b. Random Moment Time Study (RMTS) Activity Code 4.b (Direct Medical Services) and Activity Code10 (General Administration):
      i. Direct medical RMTS percentage; and
   
c. School District specific Individualized Education Program (IEP) Medicaid Eligibility Ratios

A glossary of the key terms used in the cost reporting process described in the SSHSP section can be found as Appendix 2 of the New York State Department of Health Guide to Cost Reporting for the School Supportive Health Service Claiming Program.

D. **Data Sources and Cost Finding Steps**

The following provides a description of the data sources and steps to complete the cost finding and reconciliation:

1. **Allowable Costs:** Direct costs for direct medical services include unallocated payroll costs and other unallocated costs that can be directly charged to direct medical services. Direct payroll costs include total compensation (i.e., salaries and benefits and contract compensation) of direct services personnel listed in the description of covered Medicaid services delivered by school districts under Attachments 3.1-A and 3.1-B of the State Plan, excluding transportation personnel costs which are to be reported under Special Transportation Services Payment Methodology section as described in paragraph E of this section. These direct costs will be calculated on a Medicaid provider-specific level and will be reduced by any federal payments for these costs, resulting in adjusted direct costs.

Other direct costs include costs directly related to the approved direct services personnel for the delivery of medical services, such as medically-related purchased services, supplies and materials. These direct costs are accumulated on the annual SSHS Cost Report and are reduced by any federal payments for these costs, resulting in adjusted direct costs. The cost report contains the scope of cost and methods of cost allocation that have been approved by the Centers for Medicare & Medicaid Services (CMS).

The source of this financial data will be audited district level payroll and general ledger data maintained at the district level.
a. **Direct Medical Services**
   Non-federal cost pool for allowable providers consists of:
   i. Salaries;
   ii. Benefits (employer paid);
   iii. Medically-related purchased services; and
   iv. Medically-related supplies and materials.

b. **Contracted Service Costs**
   Contracted service costs represent the costs incurred by the Local Education Agency (LEA) for IEP direct medical services rendered by a contracted service provider. Total contracted service costs are inclusive of only those costs for the provision of IEP direct medical services.

   Total contracted service costs are reduced for any federal fund or other reduction, including revenue offsets, and further reduced by the application of the LEA IEP Ratio in order to determine the Medicaid IEP direct medical service contract costs. Contracted service costs are not eligible for the application of the unrestricted indirect cost rate.

c. **Tuition Costs**
   Tuition costs represent the costs incurred by the LEA for a student placed in an out-of-district (private school, §4201 school) or preschool agency setting. Tuition costs will be reflective of only those costs related to the provision of IEP direct medical services and are not eligible for the application of the unrestricted indirect cost rate. The health related portion of the tuition costs will be determined through the application of a health related tuition percentage to the annual tuition costs reported by the school district. The health related tuition percentage will be specific to each out-of-district provider and will be calculated annually based on annual financial reports, the CFR, submitted to the New York State Education Department (SED). The CFRs used in calculating the health related tuition percentage will be those from the most current, complete year available. For example, for the cost reports covering October 1, 2011 – June 30, 2012, the CFRs from the 2009-2010 school year were used in calculating the health related tuition percentages. The methodology used to calculate health related tuition percentages is currently available on the Department of Health website at:

   https://www.health.ny.gov/health_care/medicaid/program/psshsp/

   and the State Education Department website at:

   The methodology is also found in the approved Cost Reporting Guide and on the Dashboard of the web-based cost reporting tool.

   **NOTE:** Effective with the cost reporting period beginning on July 1, 2013 a health related portion of tuition payments related to the provision of IEP direct medical services for students in §4201 schools may be included in the cost report for the school district of residence. Effective July 1, 2013 §4201 schools are not eligible to bill for Medicaid services.
For cost reporting periods prior to July 1, 2013 school districts will not be allowed to include any costs associated with tuition payments made to §4201 schools as these entities were eligible to bill for Medicaid services during these periods.

**NOTE:** When an LEA incurs costs for a student receiving services through a BOCES, the costs for the IEP direct medical services must be discretely identified and included as contracted service costs (as defined in D.1.b). LEAs will not be permitted to report BOCES costs as tuition costs.

d. **Intergovernmental Agreement Costs**

Intergovernmental agreement costs represent costs for services provided through a contractual or tuition based arrangement in which the LEA purchasing the services and the LEA providing services are both public school districts or counties. Relationships between public schools and private schools, 4201 schools, BOCES, private vendors, or other non-public entities would be reported as described in paragraphs b (Contracted Service Costs) or c (Tuition Costs) of this section.

i. **Intergovernmental Agreement Contracted Service Costs**

Contracted service costs represent the costs incurred by the LEA for IEP direct medical services rendered by a public school or county through a contractual agreement. Total contracted service costs are inclusive of only those costs for the provision of IEP direct medical services.

Total contracted service costs are reduced for any federal fund or other reduction, including revenue offsets, and further reduced by the application of the LEA IEP Ratio in order to determine the Medicaid IEP direct medical service contract costs.

A revenue offset must be reported by the public school or county providing the IEP direct medical service equal to the expense reported by the school district purchasing the service. The total for all intergovernmental agreement contract costs is expected to equal $0 in the aggregate, statewide.

The revenue offset will be calculated based on the calculation of the Medicaid Allowable Costs for the LEA incurring the expense. Therefore, the revenue offset will be calculated using the IEP Ratio of the LEA reporting the expense. This will ensure that the net Medicaid Allowable Cost for the transaction will be $0.

ii. **Intergovernmental Agreement Tuition Costs**

Tuition costs represent the costs incurred by the LEA for a student placed in another public school or county for all services (educational and IEP direct medical services). Tuition costs will be reflective of only those costs related to
the provision of IEP direct medical services. The health related portion of the tuition costs will be determined through the application of a health related tuition percentage to the annual tuition costs reported by the school district. The health related tuition percentage will be specific to each public school or county and will be calculated annually based on annual financial reports, the ST-3, submitted to the New York State Education Department. The ST-3s used in calculating the health related tuition percentage will be those from the most current, complete year available. For example, for the cost reports covering October 1, 2011 – June 30, 2012, the ST-3s from the 2009-2010 school year were used in calculating the health related tuition percentages. The methodology used to calculate health related tuition percentages is currently available on the Department of Health website at:

https://www.health.ny.gov/health_care/medicaid/program/psshsp/

and the State Education Department website at:

The methodology is also found in the approved Cost Reporting Guide and on the Dashboard of the web-based cost reporting tool.

A revenue offset must be reported by the public school or county providing the services under the tuition arrangement (receiving the tuition payment) equal to the expense reported by the school district paying the tuition. The total for all intergovernmental agreement tuition costs is expected to equal $0 in the aggregate, statewide.

2. **Indirect Costs**: Indirect costs are determined by applying the school district specific unrestricted indirect costs rate to the Direct Medical Service Costs, defined in paragraph D.1.a., following the application of the Direct Medical Service Time Study Percentage, defined in paragraph D.3. The unrestricted indirect cost rate will not be applied to Contracted Service Costs (D.1.b), Tuition Costs (D.1.c), Intergovernmental Agreement Costs (D.1.d) and Contracted Transportation Service Costs (E.2.e). New York public schools use predetermined fixed rates for indirect costs. The New York SED, in cooperation with the United States Department of Education (ED), developed an indirect cost plan to be used by public school districts. Pursuant to the authorization in 34 CFR §75.561(b), the New York SED, which is the cognizant agency for school districts, approves unrestricted indirect cost rates in cooperation with the ED. The indirect cost rates are reviewed and updated annually. Providers are permitted only to certify Medicaid-allowable costs and are not permitted to certify any indirect costs that are outside their unrestricted indirect cost rate.

**Indirect Cost Rate**

a. Apply the New York Public Schools Cognizant Agency Unrestricted Indirect Cost rate applicable for the dates of service in the rate year.

b. The New York UICR is the unrestricted indirect cost rate calculated by the New York State Education Department.
3. **Time Study:** A time study that incorporates CMS-approved methodology is used to determine the percentage of time that medical service personnel spend on direct medical services, general and administrative time and all other activities to account for 100 percent of time to assure that there is no duplicate claiming. The time study methodology will utilize two cost pools: one cost pool for direct therapy staff (includes staff providing Occupational Therapy, Physical Therapy, and Speech Therapy services) and one cost pool for all other direct service staff (includes staff providing Audiological Evaluations, Medical Evaluations, Medical Specialist Evaluations, Psychological Counseling, Psychological Evaluations, and Skilled Nursing services). A minimum number of completed moments will be sampled each quarter in accordance with the Time Study Implementation Plan to ensure time study results will have a confidence level of at least 95 percent with a precision of plus or minus two percent overall. The Direct Medical Service time study percentage for the Direct Medical Service - Therapy cost pool will be applied only to those costs associated with direct medical service therapy. The Direct Medical Service time study percentage for the Direct Medical Service - All other cost pool will be applied only to those costs associated with direct medical service all other.

The RMTS direct medical service percentages will be calculated using the average from the three quarterly time studies which will occur during the quarters of October to December, January to March, and April to June. For example, for cost reporting period July 1, 2012 through June 30, 2013, the RMTS quarters would be October 2012 to December 2012, January 2013 to March 2013 and April 2013 to June 2013.

**Direct Medical Service Therapy RMTS Percentage**

- **a. Fee-For-Service RMTS Percentage**
  - **i. Direct Medical Service Therapy Cost Pool:** Apply the Direct Medical Service percentage from the Random Moment Time Study (Activity Code 4.b.). The direct medical service costs and time study results must be aligned to assure appropriate cost allocation.

- **b. General Administrative Percentage Allocation**
  - **i. Direct Medical Service Therapy Cost Pool:** Apply the General Administrative time applicable to the Direct Medical Services percentage from the Random Moment Time Study (Activity Code 10). The direct medical services costs and time study results must be aligned to assure appropriate cost allocation.

**Direct Medical Service All Other RMTS Percentage**

- **a. Fee-For-Service RMTS Percentage**
  - **i. Direct Medical Service All Other Cost Pool:** Apply the Direct Medical Service percentage from the Random Moment Time Study (Activity Code 4.b.). The direct medical service costs and time study results must be aligned to assure appropriate cost allocation.
b. General Administrative Percentage Allocation
   i. Direct Medical Service All Other Cost Pool: Apply the General Administrative
time applicable to the Direct Medical Services percentage from the Random
Moment Time Study (Activity Code 10). The direct medical services costs 
and time study results must be aligned to assure appropriate cost allocation.

The formula below details the Direct Medical Percentage (Activity Code 4.b) with the 
applicable portion of General Administration (Activity Code 10) reallocated to it. The same 
calculation is completed for the Direct Medical Service Therapy and Direct Medical Service All 
Other cost pools.

\[
D+\left(\frac{D}{A-R-U} \ast R\right)
\]

Direct Medical Service Percentage = 

4. **IEP Medicaid Eligibility Ratio:** A district-specific IEP Ratio will be established for 
each participating school-district. When applied, this IEP Ratio will discount the Direct 
Medical cost pool by the percentage of IEP Medicaid students. The IEP ratio will be 
based on child count reporting of students that had a direct medical service in an IEP 
during the school year [required for Individuals with Disabilities Education Act (IDEA) on 
the first Wednesday in October of the Fiscal Year] for which the report is completed. *For 
example*, for the cost reporting period covering July 1, 2012 through June 30, 2013, the 
IEP Ratio will be based on the [student] count of students with an IEP at any time 
during the from July 1, 2012 through June 30, 2013 school year [October 3, 2012]. [The 
names and birthdates of students with an IEP with a direct medical service will be 
identified from the Student Count Report as of the first Wednesday in October and 
matched against the Medicaid eligibility file to determine the percentage of those that 
are eligible for Medicaid.] The numerator will be the number of Medicaid eligible IEP 
students in the LEA for whom at least one claim was processed through the MMIS for 
the year for which the report is completed [with a direct medical service, as outlined in 
their IEP]. The denominator will be the total number of students in the LEA with an IEP 
with a direct medical service as outlined in their IEP at any time during the school year 
reporting period. Direct medical services are those services billable under the SSHS 
program.

The IEP Medicaid Eligibility Ratio will be calculated on an annual basis using student 
counts, as described above, [of the first Wednesday of October] and MMIS data for the 
fiscal year for which the cost report is completed.

5. **Total Medicaid Reimbursable Cost:** The results of the previous steps will be a total Medicaid reimbursable cost for each school district for Direct Medical Services.

## E. Special Transportation Services Payment Methodology

Effective for dates of service on or after October 1, 2011, providers will be paid on a cost basis. Providers will be reimbursed interim rates for SSHS Special Transportation services as specified in the *Special Transportation* paragraph of the EPSDT section of this Attachment. Federal matching funds will be available for interim rates paid by the State. On an annual basis a cost reconciliation and cost settlement will be processed for all over- and under-payments.

The State requires providers billing the Medicaid program to keep a log of one-way trips. The State conducts audits of SSHSP providers through the Office of the Medicaid Inspector General, including special transportation services. Audit protocols developed include review of documentation of Medicaid services other than transportation delivered to the student on the day s/he received special transportation services.

Special transportation is allowed to or from a Medicaid covered direct IEP service which may be provided at school or other location as specified in the IEP. Transportation may be claimed as a Medicaid service when the following conditions are met:

- Special transportation is specifically listed in the IEP as a required service;
- The child required special transportation in a vehicle that has been modified as documented in the IEP;
- A Medicaid IEP medical service (other than transportation) is provided on the day that special transportation is billed; and
- The service billed represents a one-way trip.

### 1. Allowable Costs:

Transportation costs included on the cost report worksheet will only include those personnel and non-personnel costs associated with special education reduced by any federal payments for these costs, resulting in adjusted costs for transportation. The cost identified on the cost report includes the following:

- **Personnel Costs** - Personnel costs include the salary and benefit costs for transportation providers employed by the school district. The definitions for allowable salary and benefit costs for transportation services are the same as for direct medical service providers (defined under Paragraph D of this section). The personnel costs may be reported for the following staff:
  1. Bus Drivers;
  2. Attendants;
  3. Mechanics; and
  4. Substitute Drivers.
New York
17(n)

b. **Transportation Other Costs** - Transportation other costs include the non-personnel costs incurred in providing the transportation service. These costs include:
   i. Lease/Rental costs;
   ii. Insurance costs;
   iii. Maintenance and Repair costs;
   iv. Fuel and Oil cost;
   v. Contracted – Transportation Services and Transportation Equipment cost; and
   vi. Other transportation non-personnel costs.

c. **Transportation Equipment Depreciation Costs** - Transportation equipment depreciation costs are allowable for transportation equipment purchased for more than $5,000.

   The source of these costs will be audited payroll and general ledger data for each district.

   School districts may report all transportation expenditures incurred during the period covered by the annual cost report. School districts will be required to complete the Specialized Transportation Ratio in order to apportion their transportation expenditures between specialized transportation and non-specialized transportation.

2. **Special Transportation Allocation Methodology**: All transportation costs reported on the annual cost report will be apportioned through two transportation ratios; the Specialized Transportation Ratio and the Medicaid One-Way Trip Ratio.

   a. **Specialized Transportation Ratio** - The Specialized Transportation Ratio is used to discount the transportation costs by the percentage of Medicaid eligible IEP students receiving specialized transportation services. This ratio ensures that only the portion of transportation expenditures related to the specialized transportation services for Medicaid eligible students are included in the calculation of Medicaid allowable transportation costs.

   The Specialized Transportation Ratio will be calculated based on the number of Medicaid eligible students receiving specialized transportation services in the school district. The numerator for the ratio will be the total number of Medicaid eligible IEP students receiving specialized transportation services. The denominator for this ratio will be the total number of all students receiving transportation services. The data for this ratio will be based on the same point in time as is used for the calculation of the IEP ratio, defined in D.4.
b. Medicaid One-Way Trip Ratio - A district-specific Medicaid One-Way Trip Ratio will be established for each participating school district. When applied, this Medicaid One-Way Trip ratio will discount the transportation costs following the application of the Specialized Transportation Ratio by the percentage of Medicaid IEP one-way trips. This ratio ensures that only Medicaid allowable specialized transportation costs are included in the cost settlement calculation.

The Medicaid One-Way Trip Ratio will be calculated based on the number of one-way trips provided to students requiring specialized transportation services per their IEP and receiving another Medicaid covered service on that same day. The numerator of the ratio will be based on the Medicaid paid one-way trips as identified in the State’s Medicaid Management Information System (MMIS) data. The denominator will be based on the school district transportation logs for the number of one-way trips provided to Medicaid eligible students with specialized transportation in the IEP. The denominator should be inclusive of all one way trips provided to students with specialized transportation in their IEP, regardless of whether the trip qualified as Medicaid specialized transportation or not. The data for this ratio will be based on the total number of trips for the entire period covered by the cost report, i.e. all one way trips provided between July 1 and June 30.

F. Certification of Funds Process

Each provider certifies on an annual basis, through its cost report, their total actual, incurred allowable costs/expenditures, including the federal share and non-federal share. Certification is conducted on an annual basis.

G. Annual Cost Report Process

Each provider will complete an annual cost report for all school health services delivered during the previous fiscal year covering the July 1st through June 30th period. The cost report is due on or before December 31st of the same year of the reporting period. The primary purposes of the cost report are to:

1. Document the provider’s total CMS-approved, Medicaid allowable scope of costs for delivering school health services, including direct costs and indirect costs, based on CMS-approved cost allocation methodology procedures; and

2. Reconcile its interim payments to its total CMS-approved, Medicaid allowable scope of costs based on CMS-approved cost allocation methodology procedures.

The annual SSHS Cost Report includes a certification of funds statement to be completed, certifying the provider’s actual, incurred costs/expenditures. All filed annual SSHS Cost Reports are subject to a desk review by the DOH or its designee.
H. Cost Reconciliation Process

Once all interim claims (CPT/HCPCS claims) are paid, the State will calculate the final reconciliation and settlement. There will be separate settlements for every Medicaid provider. The cost reconciliation process will be completed after the reporting period covered by the annual SSHSP Cost Report. The total CMS-approved, Medicaid allowable scope of costs based on CMS-approved cost allocation methodology procedures is compared to the provider’s Medicaid interim payments for school health services delivered during the reporting period as documented in the MMIS and CMS-64 form, resulting in cost reconciliation.

For the purposes of cost reconciliation, the State may not modify the CMS-approved scope of costs, the CMS-approved cost allocation methodology procedures, or its CMS-approved time study for cost-reporting purposes. CMS approval will be sought prior to any modification to the scope of cost, cost allocation methodology procedures, or time study for cost-reporting purposes.

I. Cost Settlement Process

For services delivered for a period covering July 1st through June 30th, the annual SSHSP Cost Report is due on or before December 31st of the same year. The final reconciliation will occur prior to the 24th month following the end of the fiscal period to ensure all claims are paid through MMIS for the dates of service in the reporting period.

As part of the final cost reconciliation and cost settlement DOH will conduct an analysis of the Medicaid payments to ensure compliance with the requirements for efficiency and economy as outlined in the Social Security Act section 1902(a)(30)(A) and LEAs found to be out of compliance may be subjected to a corrective action plan.

If final reconciled settlement payments exceed the actual, certified costs of the provider for SSHSP services to Medicaid clients, an amount equal to the overpayment will be returned. Overpayments will be recouped within one year from the date that the overpayment was discovered.

If actual, certified costs of a provider for SSHSP services exceed the interim claiming, the DOH and the providers will share in the retention of the incremental payment. The final settlement will be an accounting adjustment that is made off-line for each provider. The State will report the final settlement that is paid to each provider on the CMS-64 form for the quarter corresponding to the date of payment.

J. Sunset Date

Effective for dates of service on or after October 1, 2011 through June 30, 2020; the State will be able to process cost reconciliations and cost settlements on all cost reports completed for the fiscal years covering dates of service through June 30, 2020.
Preschool Supportive Health Services Program (PSSHSP)

A. **Reimbursement Methodology for PSSHSP**

Preschool-based services, known as Preschool Supportive Health Services (PSSHS), are delivered by the counties and include the Medicaid services as described in Attachments 3.1-A and 3.1-B of the Medicaid State Plan under item 4.b, Early and Periodic Screening, Diagnostic and Treatment Services (EPSDT). Counties will be paid only for direct Medicaid-covered services provided pursuant to an Individualized Education Program (IEP). Preschool Supportive Health Services include:

1. Physical Therapy Services
2. Occupational Therapy Services
3. Speech Therapy Services
4. Psychological Counseling
5. Skilled Nursing Services
6. Psychological Evaluations
7. Medical Evaluations
8. Medical Specialist Evaluations
9. Audiological Evaluations
10. Special Transportation

B. **Direct Medical Payment Methodology**

Effective for dates of service on or after October 1, 2011, providers with the exception of those located in a city with a population of over one million will be paid on a cost basis. Providers will be reimbursed interim rates for PSSHS direct medical services per unit of service at the statewide interim rate as specified the EPSDT section of this Attachment. On an annual basis a county-specific cost reconciliation and cost settlement for all over and under payments will be processed.

The units of service are defined by each Health Insurance Portability and Accountability Act (HIPAA) compliant Current Procedural Terminology (CPT) or Healthcare Common Procedure Coding System (HCPCS) code. Direct medical services may be encounter-based or in 15-minute unit increments. The interim rate is the rate for a specific service for a period that is provisional in nature, pending the completion of cost reconciliation and cost settlement for that period. PSSHSP providers must maintain organized and confidential documentation regarding the services provided, including written orders; session notes; and students’ Individualized Education Programs. Such documentation must be maintained for a period of six years from the date the services were furnished or billed, whichever is later.
C. **Data Capture for the Cost of Providing Health-Related Services**

Data capture for the cost of providing health-related services will be accomplished utilizing the following data sources:

1. **Total direct and indirect costs, less any federal non-Medicaid payments or other revenue offsets for these costs, will be captured utilizing the following data sources:**
   
   a. PSSHSP cost reports received from counties, in the State of New York inclusive of the Allowable cost categories defined in paragraphs D.1 and D.2 of this section;
   
   b. Time Study (TS) Activity Code 4.b (Direct Medical Services) and Activity Code10 (General Administration):
      
      i. Direct medical TS percentage; and
   
   c. School District specific Individualized Education Program (IEP) Medicaid Eligibility Ratios.

A glossary of the key terms used in the cost reporting process described in the PSSHSP section can be found as Appendix 2 of the NY DOH Guide to Cost Reporting for the Pre-School Supportive Health Service Claiming Program.

D. **Data Sources and Cost Finding Steps**

The following provides a description of the data sources and steps to complete the cost finding and reconciliation:

1. **Allowable Costs:** Direct costs for direct medical services include unallocated payroll costs and other unallocated costs that can be directly charged to direct medical services. Direct payroll costs include total compensation (i.e., salaries and benefits and contract compensation) of direct services personnel listed in the description of covered Medicaid services delivered by counties under the current Attachments 3.1-A and 3.1-B of the State Plan, excluding transportation personnel costs which are to be reported under Special Transportation Services Payment Methodology section as described in paragraph E of this section. These direct costs will be calculated on a Medicaid provider-specific level and will be reduced by any federal payments for these costs, resulting in adjusted direct costs.

   Other direct costs include costs directly related to the approved direct services personnel for the delivery of medical services, such as medically-related purchased services, supplies and materials. These direct costs are accumulated on the annual PSSHSP Cost Report and are reduced by any federal payments for these costs, resulting in adjusted direct costs. The cost report contains the scope of cost and methods of cost allocation that have been approved by the Centers for Medicare & Medicaid Services (CMS).

   The source of this financial data will be audited county level payroll and general ledger data maintained at the county level.
New York
17(r)

a. Direct Medical Services
Non-federal cost pool for allowable providers consists of:
  i. Salaries;
  ii. Benefits (employer paid);
  iii. Medically-related purchased services; and
  iv. Medically-related supplies and materials.

b. Contracted Service Costs
Contracted service costs represent the costs incurred by the Local Education Agency (LEA) for IEP direct medical services rendered by a contracted service provider. Total contracted service costs are inclusive of only those costs for the provision of IEP direct medical services.

Total contracted service costs are reduced for any federal fund or other reduction, including revenue offsets, and further reduced by the application of the LEA IEP Ratio in order to determine the Medicaid IEP direct medical service contract costs. Contracted service costs are not eligible for the application of the unrestricted indirect cost rate.

c. Tuition Costs
Tuition costs represent the costs incurred by the LEA for a student placed in an out-of-district (private school, §4201 school) or preschool agency setting. Tuition costs will be reflective of only those costs related to the provision of IEP direct medical services and are not eligible for the application of the unrestricted indirect cost rate. The health related portion of the tuition costs will be determined through the application of a health related tuition percentage to the annual tuition costs reported by the school district. The health related tuition percentage will be specific to each out-of-district provider and will be calculated annually based on annual financial reports, the CFR, submitted to the New York State Education Department (SED). The CFRs used in calculating the health related tuition percentage will be those from the most current, complete year available. For example, for the cost reports covering October 1, 2011 – June 30, 2012, the CFRs from the 2009-2010 school year were used in calculating the health related tuition percentages. The methodology used to calculate health related tuition percentages is available on the Department of Health website at:

https://www.health.ny.gov/health_care/medicaid/program/psshsp/

and the State Education Department website at:

The methodology is also found in the approved Cost Reporting Guide and on the Dashboard of the web-based cost reporting tool.

NOTE: Effective with the cost reporting period beginning on July 1, 2013 a portion of tuition payments related to the provision of IEP direct medical services for students in §4201 schools may be included in the cost report for the county or school district of residence. Effective July 1, 2013 §4201 schools are not eligible to bill for Medicaid services.
For cost reporting periods prior to July 1, 2013 counties or school districts will not be allowed to include any costs associated with tuition payments made to §4201 schools as these entities were eligible to bill for Medicaid services during these periods.

**NOTE:** When a LEA incurs costs for a student receiving services through a BOCES, the costs for the IEP direct medical services must be discretely identified and included as contracted service costs (as defined in D.1.b). LEAs will not be permitted to report BOCES costs as tuition costs.

d. **Intergovernmental Agreement Costs**

Intergovernmental agreement costs represent costs for services provided through a contractual or tuition based arrangement in which the LEA purchasing the services and the LEA providing services are both public school districts or counties. Relationships between counties and private schools, 4201 schools, BOCES, private vendors, or other non-public entities would be reported as described in section b (Contracted Service Costs) or c (Tuition Costs).

i. **Intergovernmental Agreement Contracted Service Costs**

Contracted service costs represent the costs incurred by the LEA for IEP direct medical services rendered by a public school or county through a contractual agreement. Total contracted service costs are inclusive of only those costs for the provision of IEP direct medical services.

Total contracted service costs are reduced for any federal fund or other reduction, including revenue offsets, and further reduced by the application of the LEA IEP Ratio in order to determine the Medicaid IEP direct medical service contract costs.

A revenue offset must be reported by the public school or county providing the IEP direct medical service equal to the expense reported by the school district purchasing the service. The total for all intergovernmental agreement contract costs is expected to equal $0 in the aggregate, statewide.

The revenue offset will be calculated based on the calculation of the Medicaid Allowable Costs for the LEA incurring the expense. Therefore, the revenue offset will be calculated using the IEP Ratio of the LEA reporting the expense. This will ensure that the net Medicaid Allowable Cost for the transaction will be $0.

ii. **Intergovernmental Agreement Tuition Costs**

Tuition costs represent the costs incurred by the LEA for a student placed in another public school or county for all services (educational and IEP direct medical services). Tuition costs will be reflective of only those costs related to the provision of IEP direct medical services. The health related portion of the service...
tuition costs will be determined through the application of a health related tuition percentage to the annual tuition costs reported by the school district. The health related tuition percentage will be specific to each public school or county and will be calculated annually based on annual financial reports, the ST-3, submitted to the New York State Education Department. The ST-3s used in calculating the health related tuition percentage will be those from the most current, complete year available. For example, for the cost reports covering October 1, 2011 – June 30, 2012, the ST-3s from the 2009-2010 school year were used in calculating the health related tuition percentages. The methodology used to calculate health related tuition percentages is available on the Department of Health website at:

https://www.health.ny.gov/health_care/medicaid/program/psshsp/

and the State Education Department website at:

The methodology is also found in the approved Cost Reporting Guide and on the Dashboard of the web-based cost reporting tool.

A revenue offset must be reported by the public school or county providing the services under the tuition arrangement (receiving the tuition payment) equal to the expense reported by the school district paying the tuition. The total for all intergovernmental agreement tuition costs is expected to equal $0 in the aggregate, statewide.

The revenue offset will be calculated based on the calculation of the Medicaid Allowable Costs for the LEA incurring the expense. Therefore, the revenue offset will be calculated using the IEP Ratio of the LEA reporting the expense. This will ensure that the net Medicaid Allowable Cost for the transaction will be $0.

2. **Indirect Costs:** Indirect costs for counties are determined by applying a 10 percent indirect cost rate to the Direct Medical Service Costs, defined in paragraph D.1.a., following the application of the Direct Medical Service Time Study Percentage, defined in paragraph D.3. The unrestricted indirect cost rate will not be applied to Contracted Service Costs (D.1.b), Tuition Costs (D.1.c), Intergovernmental Agreement Costs (D.1.d) and Contracted Transportation Service Costs (E.2.e). The New York SED is not responsible for developing an indirect cost plan for counties and does not approve indirect cost rates for the counties. Per OMB-A-87 Attachment A, Section G, a standard indirect cost allowance of 10 percent shall be applied to adjusted direct costs for counties. This rate will be used on an annual basis and updated to reflect any changes to OMB-A-87. Providers are permitted only to certify Medicaid-allowable costs and are not permitted to certify any indirect costs that are outside their unrestricted indirect cost rate.

**Indirect Cost Rate**

a. Apply a standard ten percent for indirect cost allowance to adjusted direct costs for New York State counties.
3. **Time Study:** A time study that incorporates CMS-approved methodology is used to determine the percentage of time that medical service personnel spend on direct medical services, general and administrative time and all other activities to account for 100 percent of time to assure that there is no duplicate claiming. The time study methodology for counties will include all clinicians that are employees of a county and will utilize a time log approach that accounts for 100 percent of time for each county employed clinician. This methodology will generate a Direct Medical Service time study percentage that will be applied to the appropriate direct costs to determine the Direct Medical Service costs.

The direct medical service percentages will be calculated using the average from the three quarterly time studies which will occur during the quarters of October to December, January to March, and April to June. For example, for cost reporting period July 1, 2012 through June 30, 2013, the RMTS quarters would be October 2012 to December 2012, January 2013 to March 2013 and April 2013 to June 2013.

**Direct Medical Service TS Percentage**

a. Fee-For-Service TS Percentage
   i. Direct Medical Service Cost Pool: Apply the Direct Medical Service percentage from the Time Study (Activity Code 4.b.). The direct medical service costs and time study results must be aligned to assure appropriate cost allocation.

b. General Administrative Percentage Allocation
   i. Direct Medical Service All Other Cost Pool: Apply the General Administrative time applicable to the Direct Medical Services percentage from the Random Moment Time Study (Activity Code 10). The direct medical services costs and time study results must be aligned to assure appropriate cost allocation.

The formula below details the Direct Medical Percentage (Activity Code 4.b) with the applicable portion of General Administration (Activity Code 10) reallocated to it. The same calculation is completed for the Direct Medical Service Therapy and Direct Medical Service All Other cost pools.

\[
\text{Direct Medical Service Percentage} = \frac{D + \left( \frac{D}{A-R-U+R} \right)}{A} \quad \#
\]

4. **IEP Medicaid Eligibility Ratio:** A county-specific IEP Ratio will be established for each participating county. When applied, this IEP Ratio will discount the Direct Medical cost pool by the percentage of IEP Medicaid students. The IEP ratio will be based on child count reporting of students with a direct medical service in an IEP during the school year [required for Individuals with Disabilities Education Act (IDEA) on the first Wednesday in October of the Fiscal Year] for which the report is completed. For example, for the cost reporting period covering July 1, 2012 through June 30,
2013, the IEP Ratio will be based on the student [count] of students with an IEP at any time during the July 1, 2013 through June 30, 2013 school year [from October 3, 2012].

The names and birthdates of students with an IEP with a direct medical service will be identified from the Student Count Report as of the first Wednesday in October and matched against the Medicaid eligibility file to determine the percentage of those that are eligible for Medicaid. The numerator will be the number of Medicaid eligible IEP students in the LEA for whom at least one claim was processed through the MMIS for the year for which the report is completed. The denominator will be the total number of students in the LEA with an IEP with a direct medical service as outlined in their IEP at any time during the school year reporting period. Direct medical services are those services billable under the PSSHS program.

The IEP Medicaid Eligibility Ratio will be calculated on an annual basis using student counts, as described above, and MMIS data [as of the first Wednesday of October] for the fiscal year for which the cost report is completed.

5. **Total Medicaid Reimbursable Cost:** The results of the previous steps will be a total Medicaid reimbursable cost for each county for Direct Medical Services.

E. **Special Transportation Services Payment Methodology**

Effective for dates of service on or after October 1, 2011, providers will be paid on a cost basis. Providers will be reimbursed interim rates for PSSHS Special Transportation services as specified the Special Transportation paragraph of the EPSDT section of this Attachment. Federal matching funds will be available for interim rates paid by the State. On an annual basis a cost reconciliation and cost settlement will be processed for all over and under payments.

The State requires providers billing the Medicaid program to keep a log of one-way trips. The State conducts audits of PSSHSP providers through the Office of the Medicaid Inspector General, including special transportation services. Audit protocols developed include review of documentation of Medicaid services other than transportation delivered to the student on the day he or she received special transportation services.

Special transportation is allowed to or from a Medicaid covered direct IEP service which may be provided at school or other location as specified in the IEP. Transportation may be claimed as a Medicaid service when the following conditions are met:

- Special transportation is specifically listed in the IEP as a required service;
- The child required special transportation in a vehicle that has been modified as documented in the IEP;
- A Medicaid IEP medical service (other than transportation) is provided on the day that special transportation is billed; and
- The service billed represents a one-way trip.
1. **Allowable Costs:** Transportation costs included on the cost report worksheet will only include those personnel and non-personnel costs associated with special education reduced by any federal payments for these costs, resulting in adjusted costs for transportation. The cost identified on the cost report includes the following:

   a. **Personnel Costs** - Personnel costs include the salary and benefit costs for transportation providers employed by the county. The definitions for allowable salary and benefit costs for transportation services are the same as for direct medical service providers (defined under paragraph D of this section). The personnel costs may be reported for the following staff:
      i. Bus Drivers;
      ii. Attendants;
      iii. Mechanics; and
      iv. Substitute Drivers.

   b. **Transportation Other Costs** - Transportation other costs include the non-personnel costs incurred in providing the transportation service. These costs include:
      i. Lease/Rental costs;
      ii. Insurance costs;
      iii. Maintenance and Repair costs;
      iv. Fuel and Oil cost;
      v. Contracted - Transportation Services and Transportation Equipment cost; and
      vi. Other transportation non-personnel costs.

   c. **Transportation Equipment Depreciation Costs** - Transportation equipment depreciation costs are allowable for transportation equipment purchased for more than $5,000.

      The source of these costs will be audited payroll and general ledger data for each county.

      Counties may report all transportation expenditures incurred during the period covered by the annual cost report. Counties will be required to complete the Specialized Transportation Ratio in order to apportion their transportation expenditures between specialized transportation and non-specialized transportation.

2. **Special Transportation Allocation Methodology:** All transportation costs reported on the annual cost report will be apportioned through two transportation ratios; the Specialized Transportation Ratio and the Medicaid One-Way Trip Ratio.

   a. **Specialized Transportation Ratio** - The Specialized Transportation Ratio is used to discount the transportation costs by the percentage of Medicaid eligible IEP students receiving specialized transportation services. This ratio ensures that only the portion of transportation expenditures related to the specialized transportation services for Medicaid eligible students are included in the calculation of Medicaid allowable transportation costs.
The Specialized Transportation Ratio will be calculated based on the number of Medicaid eligible students receiving specialized transportation services in the county. The numerator for the ratio will be the total number of Medicaid eligible IEP students receiving specialized transportation services. The denominator for this ratio will be the total number of all students receiving transportation services. The data for this ratio will be based on the same point in time as is used for the calculation of the IEP ratio, defined in D.4.

b. Medicaid One-Way Trip Ratio- A county-specific Medicaid One-Way Trip Ratio will be established for each participating county. When applied, this Medicaid One-Way Trip Ratio will discount the transportation costs following the application of the Specialized Transportation Ratio by the percentage of Medicaid IEP one-way trips. This ratio ensures that only Medicaid allowable specialized transportation costs are included in the cost settlement calculation.

The Medicaid One-Way Trip Ratio will be calculated based on the number of one-way trips provided to students requiring specialized transportation services per their IEP and receiving another Medicaid covered service on that same day. The numerator of the ratio will be based on the Medicaid paid one way trips as identified in the State’s Medicaid Management Information System (MMIS) data. The denominator will be based on the county transportation logs for the number of one-way trips provided to Medicaid eligible special education students with specialized transportation in the IEP. The denominator should be inclusive of all one way trips provided to students with specialized transportation in their IEP, regardless of whether the trip qualified as Medicaid specialized transportation or not. The data for this ratio will be based on the total number of trips for the entire period covered by the cost report, i.e. all one way trips provided between July 1 and June 30.

F. Certification of Funds Process

Each provider certifies on an annual basis through its cost report its total actual, incurred allowable costs/expenditures, including the federal share and non-federal share. Certification is conducted on an annual basis.

G. Annual Cost Report Process

Each provider will complete an annual cost report for all school health services delivered during the previous fiscal year covering the July 1st through June 30th. The cost report is due on or before December 31st of the same year of the reporting period. The primary purposes of the cost report are to:

1. Document the provider’s total CMS-approved, Medicaid allowable scope of costs for delivering school health services, including direct costs and indirect costs, based on CMS-approved cost allocation methodology procedures; and

2. Reconcile its interim payments to its total CMS-approved, Medicaid allowable scope of costs based on CMS-approved cost allocation methodology procedures.
The annual PSSHSP Cost Report includes a certification of funds statement to be completed, certifying the provider’s actual, incurred costs/expenditures. All filed annual PSSHSP Cost Reports are subject to a desk review by the DOH or its designee.

H. Cost Reconciliation Process

Once all interim claims (CPT/HCPCS claims) are paid, the state will calculate the final reconciliation and settlement. There will be separate settlements for every Medicaid provider. The cost reconciliation process will be completed after the reporting period covered by the annual PSSHSP Cost Report. The total CMS-approved, Medicaid allowable scope of costs based on CMS-approved cost allocation methodology procedures is compared to the provider’s Medicaid interim payments for school health services delivered during the reporting period as documented in the MMIS and CMS-64 form, resulting in cost reconciliation.

For the purposes of cost reconciliation, the State may not modify the CMS-approved scope of costs, the CMS-approved cost allocation methodology procedures, or its CMS-approved time study for cost-reporting purposes. CMS approval will be sought prior to any modification to the scope of cost, cost allocation methodology procedures, or time study for cost-reporting purposes.

I. Cost Settlement Process

For services delivered for a period covering July 1st through June 30th, the annual PSSHSP Cost Report is due on or before December 31st of the same year. The final reconciliation will occur prior to the 24th month following the end of the fiscal period to ensure all claims are paid through MMIS for the dates of service in the reporting period.

As part of the final cost reconciliation and cost settlement DOH will conduct an analysis of the Medicaid payments to ensure compliance with the requirements for efficiency and economy as outlined in the Social Security Act section 1902(a)(30)(A) and LEAs found to be out of compliance may be subjected to a corrective action plan.

If interim claiming payments exceed the actual, certified costs of the provider for PSSHSP services to Medicaid clients, an amount equal to the overpayment will be returned. Overpayments will be recouped within one year from the date that the overpayment was discovered.

If actual, certified costs of a provider for PSSHSP services exceed the interim claiming, the Department of Health (DOH) and the providers will share in the retention of the incremental payment. The final settlement will be an accounting adjustment that is made off-line for each provider. The State will report the final settlement that is paid to each provider in the CMS-64 form for the quarter corresponding to the date of payment.

J. Sunset Date

Effective for dates of service on or after October 1, 2011 through June 30, 2020 [2017]; the State will be able to process cost reconciliations and cost settlements on all cost reports completed for the fiscal years covering dates of service through June 30, 2020 [2017].

TN #17-0028 Approval Date November 30, 2017
Supersedes TN #16-0020 Effective Date July 1, 2017
Preschool Supportive Health Services Program (PSSHSP) – New York City

A. Reimbursement Methodology for Preschool Supportive Health Services

Preschool-based services, known as Preschool Supportive Health Services (PSSHS), are delivered by New York City and include the Medicaid services as described in Attachments 3.1-A and 3.1-B of the Medicaid State Plan under item 4.b., Early and Periodic Screening, Diagnostic and Treatment Services (EPSDT). Counties will be paid only for direct Medicaid-covered services provided pursuant to an Individualized Education Program (IEP). Preschool Supportive Health Services include:

1. Physical Therapy Services
2. Occupational Therapy Services
3. Speech Therapy Services
4. Psychological Counseling
5. Skilled Nursing Services
6. Psychological Evaluations
7. Medical Evaluations
8. Medical Specialist Evaluations
9. Audiological Evaluations
10. Special Transportation

a. Physical, occupational, and speech therapy services which have now undergone satisfactory pre-payment review to verify their accuracy will be included in certified public expenditure claims methodology described in paragraphs (B) – (I).

B. Direct Medical Payment Methodology

Effective dates of service on or after July 1, 2018, New York City (provider located in a city with a population of over one million) will be paid on a cost basis for services identified in section Aa. Providers will be reimbursed interim rates for PSSHS direct medical services per unit of service at the statewide interim rate as specified in the EPSDT section of this Attachment. On an annual basis, a district-specific cost reconciliation and cost settlement for all over and under payments will be processed.

The units of service are defined by each Health Insurance Portability and Accountability Act (HIPAA) compliant current procedural terminology (CPT) or Healthcare Common Procedure Coding System (HCPCS) code. Direct medical services may be encounter-based or in 15-minute unit increments. The interim rate is the rate for a specific service for a period that is provisional in nature, pending the completion of cost reconciliation and cost settlement for that period. PSSHSP providers must maintain organized and confidential documentation regarding the services provided, including written orders; session notes; and students’ Individualized Education Programs. Such documentation must be maintained for a period of six years from the date the services were furnished or billed, whichever is later.
C. **Data Capture for the Cost of Providing Health-Related Services**

Data capture for the cost of providing health-related services will be accomplished utilizing the following data sources:

1. **Total direct and indirect costs, less any federal non-Medicaid payments or other revenue offsets for these costs,** will be captured utilizing the following data sources:
   a. PSSHS cost reports received from New York City, in the State of New York, inclusive of the Allowable cost categories defined in Section D.1 and D.2;
   b. Time Study (TS) Activity Code 4.b (Direct Medical Services) and Activity Code 10 (General Administration):
      i. Direct medical TS percentage; and
   c. School District specific Individualized Education Program (IEP) Medicaid Eligibility Ratios.

A glossary of the key terms used in the cost reporting process described in this SPA can be found as Appendix 2 of the NYS DOH Guide to Cost Reporting for the Pre-School Supportive Health Service Claiming Program.

D. **Data Sources and Cost Finding Steps**

The following provides a description of the data sources and steps to complete the cost finding and reconciliation:

1. **Allowable Costs:** Direct costs for direct medical services listed in paragraph Aa include unallocated payroll costs and other unallocated costs that can be directly charged to direct medical services. Direct payroll costs include total compensation (i.e., salaries and benefits and contract compensation) of direct services personnel to provide the Medicaid services listed in paragraph Aa. These direct costs will be calculated on a Medicaid provider-specific level and will be reduced by any federal payments for these costs, resulting in adjusted direct costs.

Other direct costs include costs directly related to the approved direct services personnel for the delivery of Medicaid services listed in paragraph Aa, such as medically-related purchased services, supplies and materials. These direct costs are accumulated on the annual PSSHS Cost Report and are reduced by any federal payments for these costs, resulting in adjusted direct costs. The cost report contains the scope of cost and methods of cost allocation that have been approved by the Centers for Medicare & Medicaid Services (CMS).

The source of this financial data will be audited county level payroll and general ledger data maintained at the district level.
New York
18(b)

a. **Direct Medical Services**
   Non-federal cost pool for allowable providers consists of:
   
   ii. Salaries;
   iii. Benefits;
   iv. Medically-related purchased services; and
   v. Medically-related supplies and materials.

b. **Contracted Service Costs**
   Contracted service costs represent the costs incurred by the Local Education Agency (LEA) for IEP direct medical services rendered by a contracted service provider. Total contracted service costs are inclusive of only those costs for the provision of IEP direct services listed in paragraph Aa.

   Total contracted service costs are reduced for any federal fund or other reduction, including revenue offsets, and further reduced by the application of the LEA IEP Ratio in order to determine the Medicaid IEP direct medical service contract costs. Contracted service costs are not eligible for the application of the unrestricted indirect cost rate.

c. **Tuition Costs**
   Tuition costs represent the costs incurred by the LEA for a student placed in an out-of-district or preschool agency setting. Tuition costs will be reflective of only those costs related to the provision of IEP direct services listed in paragraph Aa. Tuition costs are not eligible for the application of the unrestricted indirect cost rate. The health related portion of the tuition costs will be determined through the application of a health related tuition percentage to the annual tuition costs reported by the school district. The health related tuition percentage will be specific to each out-of-district provider and will be calculated annually based on annual financial reports, the CFR, submitted to the New York State Education Department (SED). The CFRs used in calculating the health related tuition percentage will be those from the most current, complete year available. For example, for the cost reports covering September 1, 2013 – June 30, 2014, the CFRs from the 2011-2012 school year were used in calculating the health related tuition percentages. The methodology used to calculate health related tuition percentages is available on the Department of Health (https://www.health.ny.gov/health_care/medicaid/program/psshsp/) and the State Education Department (https://www.health.ny.gov/health_care/medicaid/program/psshsp/) websites. The methodology is also found in the approved Cost Reporting Guide and on the Dashboard of the web-based cost reporting tool.

   **NOTE:** Effective with the cost reporting period beginning after July 1, 2018 a portion of tuition payments related to the provision of IEP direct medical services for students in §4201 schools may be included in the cost report for the county or school district of residence.

---

**Attachment 4.19-B**

**TN #11-0039C**

Supersedes TN New

**Approval Date** March 25, 2019

**Effective Date** July 1, 2018
NOTE: When an LEA incurs costs for a student receiving services through a BOCES, the costs for the IEP direct medical services must be discretely identified and included as contracted service costs (as defined in D.1.b). LEAs will not be permitted to report BOCES costs as tuition costs.

d. Intergovernmental Agreement Costs
Intergovernmental agreement costs represent costs for physical therapy, occupational therapy, and speech therapy services provided through a contractual or tuition based arrangement in which the LEA purchasing the services and the LEA providing services are both public school districts or counties. Relationships between counties and private schools, 4201 schools, BOCES, private vendors, or other non-public entities would be reported as described in section b (Contracted Service Costs) or c (Tuition Costs).

i. Intergovernmental Agreement Contracted Service Costs
Contracted service costs represent the costs incurred by the LEA for IEP direct medical services listed in paragraph Aa rendered by a public school or county through a contractual agreement. Total contracted service costs are inclusive of only those costs for the provision of IEP direct medical services.

Total contracted service costs are reduced for any federal fund or other reduction, including revenue offsets, and further reduced by the application of the LEA IEP Ratio in order to determine the Medicaid IEP direct medical service contract costs.

A revenue offset must be reported by the public school or county providing the IEP direct services listed in paragraph Aa equal to the expense reported by the school district purchasing the service. The total for all intergovernmental agreement contract costs is expected to equal $0 in the aggregate, statewide.

The revenue offset will be calculated based on the calculation of the Medicaid Allowable Costs for the LEA incurring the expense. Therefore, the revenue offset will be calculated using the IEP Ratio of the LEA reporting the expense. This will ensure that the net Medicaid Allowable Cost for the transaction will be $0.

ii. Intergovernmental Agreement Tuition Costs
Tuition costs represent the costs incurred by the LEA for a student placed in another public school or county for all services (educational and IEP direct medical services). Tuition costs will be reflective of only those costs related to the provision of IEP direct medical services. The health related portion of the tuition costs will be determined through the application of a health related tuition percentage to the annual tuition costs reported by the school district. The health related tuition percentage will be specific to each public school or county and will be calculated annually based on annual financial reports, the ST-3, submitted to the New York State Education Department. The ST-3s used in calculating the health related tuition percentage will be those from the most...
current, complete year available. For example, for the cost reports covering September 1, 2013 – June 30, 2014, the ST-3s from the 2011-2012 school year were used in calculating the health related tuition percentages. The methodology used to calculate health related tuition percentages is currently available on the Department of Health (https://www.health.ny.gov/health_care/medicaid/program/psshsp/) and the State Education Department (http://www.oms.nysed.gov/medicaid/CPEs/home.html) websites.

The methodology is also found in the approved Cost Reporting Guide and on the Dashboard of the web-based cost reporting tool.

A revenue offset must be reported by the public school or county providing the services under the tuition arrangement (receiving the tuition payment) equal to the expense reported by the county paying the tuition. The total for all intergovernmental agreement tuition costs is expected to equal $0 in the aggregate, statewide.

The revenue offset will be calculated based on the calculation of the Medicaid Allowable Costs for the LEA incurring the expense. Therefore, the revenue offset will be calculated using the IEP Ratio of the LEA reporting the expense. This will ensure that the new Medicaid Allowable Cost for the transaction will be $0.

2. **Indirect Costs:** Indirect costs for counties are determined by applying a 10% indirect cost rate to the Direct Medical Service Costs, defined in section D.1.a., following the application of the Direct Medical Service Time Study Percentage, defined in D.3. The unrestricted indirect cost rate will not be applied to Contracted Service Costs (D.1.b), Tuition Costs (D.1.c), and Intergovernmental Agreement Costs (D.1.d). The New York State Education Department (SED) is not responsible for developing an indirect cost plan for counties and does not approve indirect cost rates for the counties. Per OMB A-87 Attachment A, Section G, a standard indirect cost allowance of ten percent shall be applied to adjusted direct costs for counties. This rate will be used on an annual basis and updated to reflect any changes to OMB A-87. Providers are permitted only to certify Medicaid-allowable costs and are not permitted to certify any indirect costs that are outside their unrestricted indirect cost rate.

**Indirect Cost Rate**

a. Apply a standard ten percent for indirect cost allowance to adjusted direct costs for New York State counties.
3. **Time Study:** A time study that incorporates CMS-approved methodology is used to determine the percentage of time that medical service personnel providing services listed in paragraph Aa general and administrative time and all other activities to account for 100 percent of time to assure that there is no duplicate claiming. The time study methodology for counties will include all clinicians providing physical therapy services, occupational therapy services, and speech therapy services that are employees of a county and will utilize a time log approach that accounts for 100% of time for each county employed clinician. This methodology will generate a Direct Medical Service time study percentage that will be applied to the appropriate direct costs to determine the Direct Medical Service costs.

The Direct Medical Service percentages will be calculated using the average from the three quarterly time studies which will occur during the quarters of October to December, January to March, and April to June.

**Direct Medical Service TS Percentage**

a. **Fee-For-Service TS Percentage**
   i. Direct Medical Service Cost Pool: Apply the Direct Medical Service percentage from the Time Study (Activity Code 4.b.). The direct medical service costs and time study results must be aligned to assure appropriate cost allocation.

b. **General Administrative Percentage Allocation**
   i. Direct Medical Service Cost Pool: Apply the General Administrative time applicable to the Direct Medical Services percentage from the Time Study (Activity Code 10). The direct medical services costs and time study results must be aligned to assure appropriate cost allocation.

The formula below details the Direct Medical Percentage (code 4.b) with the applicable portion of General Administration (Activity Code 10) reallocated to it. The same calculation is completed for the Direct Medical Service Therapy and Direct Medical Service All Other cost pools.

\[ \text{Direct Medical Service Percentage} = \left( \frac{D}{A-U-R}\right) \]

A = All Codes  
D = IEP Direct Medical Services (Activity Code 4.b)  
R = Redistributed Activities (Activity Code 10)  
U = Unallowable (Activity Code 11)

---

**TN** #11-0039C  
**Supersedes TN** New  
**Approval Date** March 25, 2019  
**Effective Date** July 1, 2018
4. **IEP Medicaid Eligibility Ratio:** A county-specific IEP Ratio will be established for New York City. When applied, this IEP Ratio will discount the Direct Medical cost pool by the percentage of IEP Medicaid students. The IEP ratio will be based on child count reporting of students with a direct medical service listed in paragraph Aa in an IEP during the school year for which the report is completed.

*For example,* for the cost reporting period covering July 1, 2014 through June 30, 2015, the IEP Ratio will be based on the count of students with an IEP at any time during the July 1, 2014 through June 30, 2015 school year.

The numerator will be the number of Medicaid eligible IEP students in the LEA for whom at least one claim involving a service listed in paragraph Aa was processed through the MMIS for the year for which the report is completed. The denominator will be the total number of students in the LEA with an IEP with a direct medical service listed in paragraph A as outlined in their IEP at any time during the school year reporting period. Direct medical services are only those services that are both billable under the SSHS Program and approved for inclusion in the State’s certified public expenditure claim for PSSHS (i.e., Medicaid service listed in paragraph Aa).

The IEP Medicaid Eligibility Ratio will be calculated on an annual basis using student counts, as described above, and MMIS data.

5. **Total Medicaid Reimbursable Cost:** The results of the previous steps will be a total Medicaid reimbursable cost for New York City for Direct Medical Services.

E. **Certification of Funds Process**

Each provider certifies on an annual basis through its cost report its total actual, incurred allowable costs/expenditures, including the federal share and non-federal share for Medicaid services listed in paragraph Aa. Certification is conducted on an annual basis.
F. Annual Cost Report Process

Each provider will complete an annual cost report for all school health services delivered during the previous fiscal year covering July 1st through June 30th. The cost report is due on or before December 31st of the same year of the reporting period. The primary purposes of the cost report are:

1. Document the provider’s total CMS-approved, Medicaid allowable scope of costs for delivering school health services, including direct costs and indirect costs, based on CMS-approved cost allocation methodology procedures; and
2. Reconcile its interim payments to its total CMS-approved, Medicaid allowable scope of costs based on CMS-approved cost allocation methodology procedures.

The annual PSSHSP Cost Report includes a certification of funds statement to be completed, certifying the provider’s actual, incurred costs/expenditures. All filed annual PSSHSP Cost Reports are subject to a desk review by the DOH and/or its designee.

G. Cost Reconciliation Process

Once all interim claims (CPT/HCPCS claims) are paid, the State will calculate the final reconciliation and settlement. There will be separate settlements for every Medicaid provider. The cost reconciliation process will be completed after the reporting period covered by the annual PSSHSP Cost Report. The total CMS-approved, Medicaid allowable scope of costs based on CMS-approved cost allocation methodology procedures is compared to the provider’s Medicaid interim payments and tentative settlements for school health services delivered during the reporting period as documented in the MMIS and CMS-64, resulting in cost reconciliation.

For the purposes of cost reconciliation, the State may not modify the CMS-approved scope of costs, the CMS-approved cost allocation methodology procedures, or its CMS-approved time study for cost-reporting purposes. CMS approval will be sought prior to any modification to the scope of cost, cost allocation methodology procedures, or time study for cost-reporting purposes.

H. Cost Settlement Process

For services delivered for a period covering July 1st through June 30th, the annual PSSHSP Cost Report is due on or before December 31st of the same year. The final reconciliation will occur prior to the 24th month following the end of the fiscal period to ensure all claims are paid through MMIS for the dates of service in the reporting period.

As part of the final cost reconciliation and cost settlement DOH will conduct an analysis of the Medicaid payments to ensure compliance with the requirements for efficiency and economy as
outlined in the Social Security Act section 1902(a)(30)(A) and LEAs found to be out of compliance may be subjected to a corrective action plan.

If interim claiming and tentative settlement payments exceed the actual, certified costs of the provider for PSSHSP services to Medicaid clients, an amount equal to the overpayment will be returned. Overpayments will be recouped within one year from the date that the overpayment was discovered.

If actual, certified costs of a provider for PSSHSP services exceed the interim claiming and tentative settlement, the DOH and the providers will share in the retention of the incremental payment. The final settlement will be an accounting adjustment that is made off-line for each provider. The State will report the final settlement that is paid to each provider in the CMS-64 quarter corresponding to the date of payment.

I. Sunset Date
Effective for dates of service on or after September 1, 2018 through June 30, 2020; the State will be able to process cost reconciliations and cost settlements on all cost reports completed for the fiscal years covering dates of service through June 30, 2020.
School Supportive Health Services Program (SSHSP) - New York City

A. Reimbursement Methodology for School Supportive Health Services

School-based services, known as School Supportive Health Services (SSHS), are delivered by the City of New York school district (New York City Department of Education) and include the Medicaid services as described in Attachments 3.1-A and 3.1-B of the Medicaid State Plan under item 4.b., Early and Periodic Screening, Diagnostic and Treatment Services (EPSDT). School districts will be paid only for direct Medicaid-covered services provided pursuant to an Individualized Education Program (IEP). School Supportive Health Services include:

1. Physical Therapy Services
2. Occupational Therapy Services
3. Speech Therapy Services
4. Psychological Counseling
5. Skilled Nursing Services
6. Psychological Evaluations
7. Medical Evaluations
8. Medical Specialist Evaluations
9. Audiological Evaluations
10. Special Transportation

a. Physical, occupational, and speech therapy services which have now undergone satisfactory pre-payment review to verify their accuracy will be included in certified public expenditure claims methodology described in paragraphs (B) - (I).

B. Direct Medical Payment Methodology

Effective for dates of service on or after July 1, 2018, the New York City school district (provider located in a city with a population of over one million) will be paid on a cost basis for services identified in section Aa. The provider will be reimbursed interim rates for SSHS direct medical services per unit of service at the statewide interim rate as specified in the EPSDT section of this Attachment. On an annual basis a district-specific cost reconciliation and cost settlement for all over and under payments will be processed.

The units of service are defined by each Health Insurance Portability and Accountability Act (HIPAA) compliant current procedural terminology (CPT) or Healthcare Common Procedure Coding System (HCPCS) code. Direct medical services may be encounter-based or in 15-minute unit increments. The interim rate is the rate for a specific service for a period that is provisional in nature, pending the completion of cost reconciliation and cost settlement for that period. SSHSP providers must maintain organized and confidential documentation regarding the services provided, including written orders;
session notes; and students’ Individualized Education Programs. Such documentation must be maintained for a period of six years from the date the services were furnished or billed, whichever is later.

C. **Data Capture for the Cost of Providing Health-Related Services**

Data capture for the cost of providing health-related services will be accomplished utilizing the following data sources:

1. **Total direct and indirect costs, less any federal non-Medicaid payments or other revenue offsets for these costs, will be captured utilizing the following data sources:**
   a. SSHS cost reports received from the City of New York school district, in the State of New York, inclusive of the Allowable cost categories defined in Section D.1 and D.2;
   b. Random Moment Time Study (RMTS) Activity Code 4.b (Direct Medical Services) and Activity Code10 (General Administration):
      i. Direct medical RMTS percentage; and
   c. School District specific Individualized Education Program (IEP) Medicaid Eligibility Ratios.

A glossary of the key terms used in the cost reporting process described in this SPA can be found as Appendix 2 of the NYS Department of Health (DOH) Guide to Cost Reporting for the School Supportive Health Service Claiming Program.

D. **Data Sources and Cost Finding Steps**

The following provides a description of the data sources and steps to complete the cost finding and reconciliation:

1. **Allowable Costs:** Direct costs for direct medical services listed in section Aa include unallocated payroll costs and other unallocated costs that can be directly charged to direct medical services. Direct payroll costs include total compensation (i.e., salaries and benefits and contract compensation) of direct services personnel to provide the Medicaid services listed in section Aa. These direct costs will be calculated on a Medicaid provider-specific level and will be reduced by any federal payments for these costs, resulting in adjusted direct costs.

   Other direct costs include costs directly related to the approved direct services personnel for the delivery of Medicaid services listed in section Aa, such as medically-related purchased services, supplies and materials. These direct costs are accumulated on the annual SSHS Cost Report and are reduced by any federal payments for these costs, resulting in adjusted direct costs. The cost report contains the scope of cost and methods of cost allocation that have been approved by the Centers for Medicare & Medicaid Services (CMS).

   The source of this financial data will be audited district level payroll and general ledger data maintained at the district level.
New York
18(k)

a. Direct Medical Services
Non-federal cost pool for allowable providers consists of:
   i. Salaries;
   ii. Benefits;
   iii. Medically-related purchased services; and
   iv. Medically-related supplies and materials.

b. Contracted Service Costs
Contracted service costs represent the costs incurred by the Local Education
Agency (LEA) for IEP direct medical services rendered by a contracted service
provider. Total contracted service costs are inclusive of only those costs for the
provision of IEP direct services listed in section Aa.

Total contracted service costs are reduced for any federal fund or other
reduction, including revenue offsets, and further reduced by the application of
the LEA IEP Ratio in order to determine the Medicaid IEP direct medical service
contract costs. Contracted service costs are not eligible for the application of the
unrestricted indirect cost rate.

c. Tuition Costs
Tuition costs represent the costs incurred by the LEA for a student placed in an
out-of-district (private school, §4201 school) or preschool agency setting.
Tuition costs will be reflective of only those costs related to the provision of IEP
direct services listed in section Aa. Tuition costs are not eligible for the
application of the unrestricted indirect cost rate. The health related portion of the
tuition costs will be determined through the application of a health related tuition
percentage to the annual tuition costs reported by the school district. The health
related tuition percentage will be specific to each out of district provider and will
be calculated annually based on annual financial reports, the CFR, submitted to
the New York State Education Department (SED). The CFRs used in calculating
the health related tuition percentage will be those from the most current,
complete year available. For example, for the cost reports covering September 1,
2013 – June 30, 2014, the CFRs from the 2011-2012 school year were used in
calculating the health related tuition percentages. The methodology used to
calculate health related tuition percentages is currently available on the
Department of Health
(https://www.health.ny.gov/health_care/medicaid/program/psshsp/) and the
State Education Department
(http://www.oms.nysed.gov/medicaid/CPEs/home.html) websites. The
methodology is also found in the approved Cost Reporting Guide and on the
Dashboard of the web-based cost reporting tool.

NOTE: Effective with the cost reporting period beginning on July 1, 2018, a
health related portion of tuition payments related to the provision of IEP direct
medical services for students in §4201 schools may be included in the cost report for the
school district of residence.

NOTE: When an LEA incurs costs for a student receiving services through a BOCES, the
costs for the IEP direct medical services must be discretely identified and included as
contracted service costs (as defined in D.1.b). LEAs will not be permitted to report
BOCES costs as tuition costs.

d. Intergovernmental Agreement Costs
Intergovernmental agreement costs represent costs for services listed in section Aa
provided through a contractual or tuition based arrangement in which the LEA
purchasing the services and the LEA providing services are both public school districts or
counties. Relationships between public schools and private schools, 4201 schools,
BOCES, private vendors, or other non-public entities would be reported as described in
section b (Contracted Service Costs) or c (Tuition Costs).

i. Intergovernmental Agreement Contracted Service Costs
Contracted service costs represent the costs incurred by the LEA for IEP direct
medical services listed in section Aa rendered by a public school or county
through a contractual agreement. Total contracted service costs are inclusive of
only those costs for the provision of IEP direct medical services.

Total contracted service costs are reduced for any federal fund or other
reduction, including revenue offsets, and further reduced by the application of
the LEA IEP Ratio in order to determine the Medicaid IEP direct medical service
contract costs.

A revenue offset must be reported by the public school or county providing the
IEP direct services listed in section Aa equal to the expense reported by the
school district purchasing the service. The total for all intergovernmental
agreement contract costs is expected to equal $0 in the aggregate, statewide.

The revenue offset will be calculated based on the calculation of the Medicaid
Allowable Costs for the LEA incurring the expense. Therefore, the revenue offset
will be calculated using the IEP Ratio of the LEA reporting the expense. This will
ensure that the net Medicaid Allowable Cost for the transaction will be $0.

ii. Intergovernmental Agreement Tuition Costs
Tuition costs represent the costs incurred by the LEA for a student placed in
another public school or county for all services (educational and IEP direct
medical services). Tuition costs will be reflective of only those costs related to
the provision of IEP direct medical services. The health related portion of the
tuition costs will be determined through the application of a health related tuition
percentage to the annual tuition costs reported by the school district. The health
related tuition percentage will be specific to each public school or county and will
be calculated annually based on annual financial reports, the ST-3, submitted to the New York State Education Department. The ST-3s used in calculating the health related tuition percentage will be those from the most current, complete year available. For example, for the cost reports covering September 2013 - June 30, 2014, the ST-3s from the 2011-2012 school year were used in calculating the health related tuition percentages. The methodology used to calculate health related tuition percentages is currently available on the Department of Health (https://www.health.ny.gov/health_care/medicaid/program/psshsp/) and the State Education Department (http://www.oms.nysed.gov/medicaid/CPEs/home.html) websites.

The methodology is also found in the approved Cost Reporting Guide and on the Dashboard of the web-based cost reporting tool.

A revenue offset must be reported by the public school or county providing the services under the tuition arrangement (receiving the tuition payment) equal to the expense reported by the school district paying the tuition. The total for all intergovernmental agreement tuition costs is expected to equal $0 in the aggregate, statewide.

The revenue offset will be calculated based on the calculation of the Medicaid Allowable Costs for the LEA incurring the expense. Therefore, the revenue offset will be calculated using the IEP Ratio of the LEA reporting the expense. This will ensure that the new Medicaid Allowable Cost for the transaction will be $0.

2. **Indirect Costs:** Indirect costs are determined by applying the school district specific unrestricted indirect costs rate to the Direct Medical Service Costs for services defined in section D.1.a., following the application of the Direct Medical Service Time Study Percentage, defined in D.3. The unrestricted indirect cost rate will not be applied to Contracted Service Costs (D.1.b), Tuition Costs (D.1.c), Intergovernmental Agreement Costs (D.1.d) and Contracted Transportation Service Costs (E.2.e). New York public schools use predetermined fixed rates for indirect costs. The New York State Education Department (SED), in cooperation with the United States Department of Education (ED), developed an indirect cost plan to be used by public school districts. Pursuant to the authorization in 34 CFR §75.561(b), the New York State Education Department, which is the cognizant agency for school districts, approves unrestricted indirect cost rates in cooperation with the ED. The indirect cost rates are reviewed and updated annually. Providers are permitted only to certify Medicaid-allowable costs and are not permitted to certify any indirect costs that are outside their unrestricted indirect cost rate.

**Indirect Cost Rate**

a. Apply the New York Public Schools Cognizant Agency Unrestricted Indirect Cost rate applicable for the dates of service in the rate year.

<td>New</td>
<td>July 1, 2018</td>
</tr>
</tbody>
</table>
b. The New York UICR is the unrestricted indirect cost rate calculated by the New York State Education Department.

3. **Time Study:** A time study that incorporates CMS-approved methodology is used to determine the percentage of time that medical service personnel spend on direct medical services listed in section Aa, general and administrative time and all other activities to account for 100 percent of time to assure that there is no duplicate claiming. The time study methodology will utilize one cost pool for direct therapy staff (includes staff providing Occupational Therapy, Physical Therapy, and Speech Therapy services).

A minimum number of completed moments will be sampled each quarter in accordance with the Time Study Implementation Plan to ensure time study results will have a confidence level of at least 95 percent with a precision of plus or minus two percent overall. The Direct Medical Service time study percentage for the Direct Medical Service - Therapy cost pool will be applied only to those costs associated with direct medical service therapy.

The RMTS direct medical service percentages will be calculated using the average from the three quarterly time studies which will occur during the quarters of October to December, January to March, and April to June. For example, for cost reporting period July 1, 2014 through June 30, 2015, the RMTS quarters would be October 2014 to December 2014, January 2015 to March 2015 and April 2015 to June 2015.

**Direct Medical Service RMTS Percentage**

a. **Fee-For-Service RMTS Percentage**
   i. **Direct Medical Service Cost Pool:** Apply the Direct Medical Service percentage from the Random Moment Time Study (Activity Code 4.b.). The direct medical service costs and time study results must be aligned to assure appropriate cost allocation.

b. **General Administrative Percentage Allocation**
   i. **Direct Medical Service Cost Pool:** Apply the General Administrative time applicable to the Direct Medical Services percentage from the Random Moment Time Study (Activity Code 10). The direct medical services costs and time study results must be aligned to assure appropriate cost allocation.

The formula below details the Direct Medical Percentage (code 4.b) with the applicable portion of General Administration (Activity Code 10) reallocated to it. The same calculation is completed for the Direct Medical Service Therapy and Direct Medical Service All Other cost pools.
A = All Codes
D = IEP Direct Medical Services (Activity Code 4.b)
R = Redistributed Activities (Activity Code 10)
U = Unallowable (Activity Code 11)

Direct Medical Service Percentage = \[ \frac{D + (\frac{D}{A-R-U} \times R)}{A} \]

4. **IEP Medicaid Eligibility Ratio:** A district-specific IEP Ratio will be established for the City of New York school district participating in the SSHSP. When applied, this IEP Ratio will discount the Direct Medical cost pool by the percentage of IEP Medicaid students. The IEP ratio will be based on child count reporting of students that had a direct medical service in an IEP during the school year.

    For example, for the cost reporting period covering July 1, 2014 through June 30, 2015, the IEP Ratio will be based on the count of students with an IEP at any time during the July 1, 2014 through June 30, 2015 school year.

    The numerator will be the number of Medicaid eligible IEP students in the LEA for whom at least one claim was processed through the MMIS for the year for which the report is completed. The denominator will be the total number of students in the LEA with an IEP with a direct medical services as outlined in their IEP. Direct medical services are those services billable under the SSHS Program.

    The IEP Medicaid Eligibility Ratio will be calculated on an annual basis using student counts, as described above, and MMIS data for the fiscal year for which the cost report is completed.

5. **Total Medicaid Reimbursable Cost:** The results of the previous steps will be a total Medicaid reimbursable cost for the City of New York school district for Direct Medical Services.

E. **Certification of Funds Process**

    Each provider certifies on an annual basis through its cost report its total actual, incurred allowable costs/expenditures, including the federal share and non-federal share. Certification is conducted on an annual basis.

F. **Annual Cost Report Process**

<table>
<thead>
<tr>
<th>TN</th>
<th>#11-0039D</th>
<th>Approval Date</th>
<th>July 22, 2019</th>

</table>
Each provider will complete an annual cost report for all school health services delivered during the previous fiscal year covering July 1st through June 30th. The cost report is due on or before December 31st of the same year of the reporting period. The primary purposes of the cost report are to:

1. Document the provider's total CMS-approved, Medicaid allowable scope of costs for delivering services listed in section Aa including direct costs and indirect costs, based on CMS-approved cost allocation methodology procedures; and
2. Reconcile its interim payments to its total CMS-approved, Medicaid allowable scope of costs based on CMS-approved cost allocation methodology procedures.

The annual SSHS Cost Report includes a certification of funds statement to be completed, certifying the provider's actual, incurred costs/expenditures for the delivery of services listed in section Aa. All filed annual SSHS Cost Reports are subject to a desk review by the DOH and/or its designee.

H. Cost Reconciliation Process

Once all interim claims (CPT/HCPCS claims) are paid, the State will calculate the final reconciliation and settlement. There will be separate settlements for every Medicaid provider. The cost reconciliation process will be completed after the reporting period covered by the annual SSHSP Cost Report. The total CMS-approved, Medicaid allowable scope of costs based on CMS-approved cost allocation methodology procedures is compared to the provider's Medicaid interim payments and tentative settlements for school health services delivered during the reporting period as documented in the MMIS and CMS-64, resulting in cost reconciliation.

For the purposes of cost reconciliation, the State may not modify the CMS-approved scope of costs, the CMS-approved cost allocation methodology procedures, or its CMS-approved time study for cost-reporting purposes. CMS approval will be sought prior to any modification to the scope of cost, cost allocation methodology procedures, or time study for cost-reporting purposes.

I. Cost Settlement Process

For services delivered for a period covering July 1st through June 30th, the annual SSHSP Cost Report is due on or before December 31st of the same year. The final reconciliation will occur prior to 24th month following the end of the fiscal period to ensure all claims are paid through MMIS for the dates of service in the reporting period.

As part of the final cost reconciliation and cost settlement DOH will conduct an analysis of the Medicaid payments to ensure compliance with the requirements for efficiency and economy as outlined in the Social Security Act section 1902(a)(30)(A) and LEAs found to be out of compliance may be subjected to a corrective action plan.
If interim claiming and tentative settlement payments exceed the actual, certified costs of the provider for SSHSP services to Medicaid clients, an amount equal to the overpayment will be returned. Overpayments will be recouped within one year from the date that the overpayment was discovered.

If actual, certified costs of a provider for SSHSP services exceed the interim claiming and tentative settlement, the DOH and the providers will share in the retention of the incremental payment. The final settlement will be an accounting adjustment that is made off-line for each provider. The State will report the final settlement that is paid to each provider in the CMS-64 quarter corresponding to the date of payment.

J. Sunset Date

Effective for dates of service on or after July 1, 2018 through June 30, 2020; the State will be able to process cost reconciliations and cost settlements on all cost reports completed for the fiscal years covering dates of service through June 30, 2020.
National Diabetes Prevention Program (NDPP)

Reimbursement Methodology:
Effective July 1, 2019, the Medicaid rate for NDPP services will be set at 80 percent of the corresponding 2019 Medicare NDPP rate for the same or similar service.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

METHODS AND STANDARDS FOR ESTABLISHING PAYMENT RATES - OTHER TYPES OF CARE

Payment of Medicare Part A and Part B Deductible/Coinsurance

Except for a nominal recipient copayment (as specified in Attachment 4.18 of the State plan), if applicable, the Medicaid agency uses the following general method for payment:

1. Payments are limited to State plan rates and payment methodologies for the groups and payments listed below and designated with the letters “SP”.

   For specific Medicare services which are not otherwise covered by this State plan, the Medicaid agency uses Medicare payment rates unless a special rate or method is set out on Page 3 in item A of this attachment (see 3 below).

2. Payments are up to the full amount of the Medicare rate for the groups and payments listed below, and designated with the letters “MR”

3. Payments are up to the amount of a special rate, or according to a special method, described on Page 3 in item A of this attachment, for those groups and payments listed below and designated with the letters “NR”

4. Any exceptions to the general methods used for a particular group or payment are specified on Page 3 in item B of this attachment (see 3 above).

**TN #03-38 Approval Date**

**December 24, 2003**

**Supersedes TN #93-28 Effective Date**

**July 1, 2003**
Explanation of Medicare Part B Coinsurance Payment for Medicaid Recipients

This Medicare coinsurance policy applies to:
- Qualified Medicare Beneficiaries (QMBs)
- Qualified Medicare Beneficiaries Plus (QMBs+)
- Any other persons who have both full Medicaid and Medicare

For all recipients noted above New York State Medicaid will pay as follows:

1. If the Medicare payment amount is greater than the amount that Medicaid would have paid for that service, then Medicaid will pay $0.
2. If the Medicare payment is less than the amount that Medicaid would have paid for that service, then Medicaid will pay the lower of the difference between the Medicaid rate and the Medicare payment, or the Medicare coinsurance amount.
3. If a procedure is designated “inactive” on the procedure code file, i.e., procedures that are not covered by Medicaid and have been assigned a $0 amount, Medicaid will not reimburse any portion of the Medicare Part B coinsurance amount for these procedures.
4. If the service is an outpatient service certified under Articles 16, 31, or 32 of the Mental Hygiene Law, an Independent Practitioner Service for Individuals with Developmental Disabilities (IPSIDD), or is an ambulance or psychologist service, Medicaid will pay the full Medicare coinsurance liability.
5. If the service is an Independent Practitioner Service for Individuals with Developmental Disabilities (IPSIDD), Medicaid will pay up to the regular Medicaid fee, even if that fee is higher than the Medicare approved amount.
6. If the service is an outpatient service certified under Article 28 of the Public Health Law, Medicaid will pay as follows:
   a. If the Medicare payment is greater than the amount that Medicaid would have paid for that service, then Medicaid will pay $0.
   b. If the Medicare payment is less than the amount that Medicaid would have paid for that service, then Medicaid will pay the lower of the difference between the Medicaid rate and the Medicare payment, or the Medicare coinsurance amount.
   c. If the Medicare payment is equal to the amount that Medicaid would have paid for that service, Medicaid will pay $0.
7. If the service is a Products of Ambulatory Care Clinic, a clinic primarily serving the developmentally disabled, [or] a Mental Health comprehensive outpatient program services (COPS) program, provided by a free standing clinic service certified under Article 28 of the Public Health Law to Traumatic Brain Injury waiver member, or provided by clinic or hospital outpatient department certified under Article 28 of the Public Health Law to an individual with a developmental disability, Medicaid will pay up to the regular Medicaid fee, even if that fee is higher than the Medicare approved amount.

[1] Effective 10/1/2010, COPS program means Freestanding Clinic and Outpatient Hospital Services licensed pursuant to the Mental Hygiene Law reimbursed pursuant to the APG reimbursement methodology and Partial Hospitalization, Continuing Day Treatment, Day Treatment for Children and Intensive Psychiatric Rehabilitation and Treatment Services.
[7.] 8. Any Medicaid payments made to physicians and durable medical equipment providers for Medicare Part B services during the period April 1, 2005 through June 30, 2005, which are made subject to the 20% of the coinsurance payment provisions cited on Supplement 1 to Attachment 4.19-B page 3, will be the basis of a supplemental payment not to exceed $5,000,000 pursuant to the following methodology:

For each physician and durable medical equipment provider that received such payments during the period April 1, 2005 through June 30, 2005, the Department of Health will determine the ratio of each physician's and durable medical equipment provider's payments to the total of such payments made during the period, expressed as a percentage.

For each physician, the Department of Health will multiply this percentage by $4,700,000 and for each durable medical equipment provider the Department of Health will multiply this percentage by $300,000, respectively. The result of such calculation will represent the “2005 coinsurance enhancement”.

[8.] 9. Any Medicaid payments made to psychiatrists for Medicare Part B services during the period April 1, 2006 through March 31, 2007, which are made subject to 20 percent of the coinsurance payment provisions cited on Supplement 1 to Attachment 4.19-B page 3, will be the basis of a supplemental payment not to exceed $2,000,000 pursuant to the following methodology:

For each psychiatrist who received such Medicaid payments during the period April 1, 2006 through March 31, 2007, the Department of Health will determine the ratio of each psychiatrist's Medicaid payments to the total of such Medicaid payments made during the period, expressed as a percentage.

For each psychiatrist, the Department of Health will multiply this percentage by $2,000,000. The result of such calculation will represent the “2006-2007 coinsurance enhancement”.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

METHODS AND STANDARDS FOR ESTABLISHING PAYMENT RATES – OTHER TYPES OF CARE

Explanation of Payment of Medicare Part C Coinsurance/ Copayment for Medicaid Members

The Medicare Part C coinsurance/copayment policy applies to any persons who have both Medicaid and Medicare coverage (dually eligible) and are enrolled in a Medicare Part C health plan (Medicare Advantage or Medicare managed care plan).

If the service is an outpatient service provided to a dually eligible Medicaid member that is enrolled in a Medicare Part C health plan, Medicaid will reimburse eighty-five percent (85%) of the Medicare Part C coinsurance or copayment.

The only exceptions to this policy are:

- If the service is covered under a Medicare Part C health plan and is provided by an ambulance provider or a psychologist, Medicaid will reimburse one hundred percent (100%) of the Medicare Part C coinsurance and/or copayment.

Approval Date: Aug 12, 2016
Supersedes TN_ NEW
Effective Date: April 01, 2016
PAYMENT FOR RESERVED BEDS IN MEDICAL INSTITUTIONS

LIMITATIONS

A. RESERVED BEDS DURING LEAVES OF ABSENCE (Defined to mean overnight absences including visits with relatives/friends, or leaves to participate in medically acceptable therapeutic or rehabilitative plans of care).

When patient's/resident's plan of care provides for leaves of absence:

General Hospital Patients
Eligibility restricted to patients receiving care in certified psychiatric or rehabilitation units, without consideration of any vacancy rate. A psychiatric patient must be institutionalized for 15 days during a current spell of illness; a rehabilitation patient must be institutionalized for 30 days. Leaves must be for therapeutic reasons only and carry a general limitation of no more than 18 days in any 12 month period, and 2 days per any single absence. Broader special limits are possible when physicians can justify them, subject to prior approval.

Nursing Facility (NF) Patients
A reserved bed day is a day for which a governmental agency pays a residential health care facility to reserve a bed for a person eligible for medical assistance while he or she is temporarily hospitalized or on leave of absence from the facility. All such reserve bed days during leaves of absences shall be pursuant to the residents’ plan of care.

All recipients eligible after 30 days in the facility, subject to a facility vacancy rate, on the first day of the patient's/resident's absence of no more than 5%. [General limitations of no more than 18 days in any 12 month period with broader special limits possible when physicians can justify them, subject to prior approval.]

Effective July [19, 2010] 1, 2012, for reserved bed days provided on behalf of persons 21 years of age or older:

(i) payments for reserved bed days related to hospitalization will be made at [95%] 50% of the Medicaid rate, and payments for reserved bed days related to non-hospitalization leaves of absence will be made at 95% of the Medicaid rate otherwise payable to the facility for services provided on behalf of such person;

(ii) payment to a facility for reserved bed days provided on behalf of such person for temporary hospitalizations and therapeutic leave that is consistent with a plan of care ordered by the patient’s treating health care professional for visits to a health care professional that is expected to improve the patients’ physical condition or quality of life may not exceed 14 days in any 12-month period; and

(iii) payment to a facility for reserved bed days provided on behalf of such person for non-hospitalization leaves of absence for patients on leave for purposes other than hospitalization or eligible therapeutic leave may not exceed 10 days in any 12-month period.

(iv) Broader special limits are possible when physicians can justify them, subject to prior approval.

Reserved bed days provided on behalf of persons younger than 21 years of age will be made at 100% of the Medicaid rate.

In computing reserved bed days, the day of discharge from the residential health care facility shall be counted, but not day of readmission.

TN #12-24
Supersedes TN #10-22-A
Approval Date December 19, 2012
Effective Date July 1, 2012
Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID) - General

Absences from all ICF/IIDs, other than for hospitalization, must be provided for in an individual’s plan of care.

State Government Owned and Operated ICF/IID Facilities

All recipients eligible after 30 days in the facility. There is no limitation on the number of days a resident may be absent.

(i) payments for reserved bed days for ICF/IIDs are paid at the same rate as occupied days.

All Other [Intermediate Care Facilities for the Mentally Retarded and Specialty Hospitals for the Developmentally Disabled (ICF/MR)] ICF/IID [- Non-state Government Owned & Operated Facilities]

All recipients eligible after 30 days in the facility [subject to a facility vacancy rate, on the first day of the resident’s absence, of no more than 5%]. ICF/MR with a bed capacity in excess of 30 beds is exempt from this vacancy rate requirement]. There is no limitation on the number of days a patient/resident may be absent.

(i) payments for reserved bed days for ICF/IIDs are paid at the same rate as occupied days.

Psychiatric or Rehabilitation Facility Patients (Other than RTFs)

As provided for recipients receiving similar treatment in general hospitals, as described [above] in the General Hospital Patients section of this Attachment.

TN #10-22-B Approval Date May 31, 2013
Supersedes TN #10-22-A Effective Date April 1, 2013
Residential Treatment Facilities for Children and Youth (RTFs)

All recipients eligible who have been institutionalized for 15 days during a current spell of illness, subject to a vacancy rate, on the first day of a resident's absence of no more than 5% for 2 vacant beds, whichever is greater, in the distinct part of the RTF to which the recipient is to return. Leaves of absence carry a general limitation of no more than 75 days in any 12 month period, and 4 days per any single absence. Limitations may be waived when justified by recipient’s physician, subject to prior approval by a designee of the Commissioner of the Office of Mental Health.

B. RESERVED BEDS DURING PERIODS OF HOSPITALIZATION

All recipients eligible after 30 days in:

1) an NF;
2) an ICF/MR;
3) a specialty hospital;
4) a rehabilitation facility or rehabilitation units of general hospitals;
5) a hospice

All recipients eligible who have been institutionalized for at least 15 consecutive days in:

1) a psychiatric facility or psychiatric units of general hospitals;
2) an RTF

The 15 day requirement may be waived if prior approval by a designee of the Commissioner of the Office of Mental Health.

For other than Residential Treatment Facilities:

Without prior approval, not to exceed 15 days during period of hospitalization for acute conditions, for any single hospital stay, when patient returns immediately following a period during which their bed was reserved to his/her originating facility in 15 days or less.
New York

With prior approval, not to exceed 20 days during period of hospitalization for acute conditions, for any single hospital stay, when patient does not return to his/her originating facility immediately following a period during which their bed was reserved or does not return in 15 days or less.

For Residential Treatment Facilities:

Without prior approval, not to exceed 15 days during period of hospitalization for acute conditions, for any single hospital stay, when patient returns immediately following a period during which their bed was reserved to his/her originating facility in 15 days or less.

With prior approval, not to exceed 20 days during period of hospitalization for acute medical (non-psychiatric) conditions for any single hospital stay, when patient does not return to his/her originating facility immediately following a period during which their bed was reserved, or does not return in 15 days or less.

With prior approval not to exceed 30 days during period of hospitalization for acute psychiatric conditions, for any single hospital stay, when patient does not return to his/her originating facility immediately following a period during which their bed was reserved, or does not return in 15 days or less.

All of the above provisions subject to a facility vacancy rate of no more than 5% on the first day of patient's/resident's absence. For RTFs, the above is subject to a vacancy rate, on the first day of a resident's absence of no more than 5% or 2 vacant beds, whichever is greater, in the distinct part of the RTF to which the recipient is to return.

Special broader limits, subject to approval of the State Commissioner of Social Services, may be established for residents of institutions for the mentally retarded/developmentally disabled on an individual case basis, and for residents of RTFs on an individual basis.

Across-the-Board Reductions to Payments - Effective 9/16/10 - 3/31/11

(1) For dates of service on and after September 16, 2010, through and including March 31, 2011, payments for services as specified in paragraph (2) of this Attachment [shall] will be reduced by 1.1%, provided payment is made no later than March 31, 2011.

(2) Payments in this Attachment subject to the reduction in paragraph (1) include the following:

Part I - Residential Health Care Facilities

a) Voluntary Health Care Facility Right Sizing Program. Page 16

b) Services provided by Residential Health Care Facilities, excluding proportionate share payments to non-state operated public facilities (found on page 47(x)(2)(b)). Pages 17-87

Part III - Methods and Standards for Establishing Payment Rates (Out of State Services) - Nursing Facilities

c) Services provided by nursing facilities out of state. Page 1

(1) For dates of service on and after April 1, 2011 and ending on March 31, 2013, payments for services as specified in paragraph (2) of this Attachment will be reduced by 2%.

(2) Payments in this Attachment subject to the reduction in paragraph (1) are the following:

Part III - Methods and Standards for Establishing Payment Rates (Out of State Services) - Nursing Facilities

d) Services provided by nursing facilities out of state. Page 1

Across the Board Increase

(1) For dates of service on and after November 1, 2018, the operating component of the rates of reimbursement for Article 28 nursing homes, will be adjusted to reflect an across the board increase of one and one-half percent (1.5%).

   a. Sections subjected to the one and one-half percent (1.5%) increase are as follows:

      i. Nursing Home Reimbursement

      ii. Specialty care facilities

   b. The capital component of the rates are not subject to the one and one-half percent (1.5%) increase.
Supplemental Payments

(1) Effective July 1, 2015 and State Fiscal Years thereafter, supplemental payments will be distributed to all nursing home facilities through lump sum or monthly payments and calculated as follows:

a) An individual facility revenue will be calculated by taking each facility’s promulgated rate in effect for the given period multiplied by actual Medicaid days for the corresponding period as reported in the facility’s cost report or an estimate of Medicaid days based on most recent available data. If a facility fails to submit a timely filed cost report, the most recent cost report will be utilized.

b) The resulting individual facility revenue will be divided by total Medicaid revenues of all facilities. The result will be multiplied by the appropriate total dollar amount to be distributed per the chart below to determine each facility’s portion of the supplemental payment.

2) After the end of each State Fiscal Year, a reconciliation of any estimated Medicaid days to actual Medicaid days will be conducted. Any resulting payment adjustments will be made within the 2-year claiming rule.

New York State provides public access to governmental records, including data and the methodology used in establishing payment rates for nursing facilities under Medicaid. The State Freedom of Information Law (Public Officers Law, Article 6) is the principal statute providing public access to information and records. Regulations related to the process of obtaining access to the Department of Health’s records are contained in Sub-part 50-1 of Title 10NYCRR. These records include, but are not limited to, facility cost reports, case mix indices and the methodologies by which reimbursement rates are set for hospitals, nursing homes and other health care providers.

Anyone wishing to inspect or obtain public records must apply to the Department’s Records Access Officer in writing. The officer is responsible for insuring appropriate agency response to requests for public access to records, and will coordinate the Department’s response as per the process contained in the New York State Department of Health Administrative Policy and Procedure Manual, 100.0 – RELEASE OF INFO TO OUTSIDE GROUP/FREEDOM OF INFO/RECORD ACCESS.

Section 86-2.1 Definitions.

As used in this Subpart, the following definitions shall apply:

[(1)] (a) Residential health care facility, medical facility or facility shall mean all facilities or organizations covered by the term nursing home [or health-related facility] as defined in article 28 of the Public Health Law, including hospital-based residential health care facilities, and NURSING FACILITIES as defined in Section 1919 of the federal Social Security Act, provided that such facility possesses a valid operating certificate issued by the State Commissioner of Health and, where required, has been established by the Public Health Council.

[(2)] (b) Patient classification groups shall mean patient categories contained in the classification system, Resources Utilization Groups – II (RUG-II), which identifies the relative resource consumption required by different types of long term care patients as specified in Appendix [6] 13-A, infra.

[(3)] (c) Case mix shall mean the patient population of a facility as classified and aggregated into patient classification groups.
86-2.2 Financial and statistical data required.

(a) Each residential health care facility shall complete and file, with the New York State Department of Health and/or its agent, annual financial and statistical report forms supplied by the department and/or its agent. Residential health care facilities certified for title XVIII of the Federal Social Security Act (Medicare) shall use the same fiscal year for title XIX of the Federal Social Security Act (Medicaid) as is used for title XVIII. All residential health care facilities must report their operations from January 1, 1977, forward on a calendar-year basis.

(1) Hospital based residential health care facilities whose affiliation changes to freestanding pursuant to subdivision (a) of section 86-2.34 of this Subpart shall complete and file the freestanding annual cost report (RHCF-4) supplied by the department and/or its agent for the first full calendar-year following actual complete closure of the acute care beds of its affiliated hospital.

(b) Federal regulations require the submission of cost reports to the State agency no later than three months after the close of the cost reporting year. State agencies requiring certified reports may grant an extension of 30 days. Since the reports from all residential health care facilities are required to be certified, an extension of 30 days is automatically provided in this subdivision so that all required financial and statistical reports shall be submitted to the department no later than 120 days following the close of the fiscal period. Further extensions of time for filing reports may be granted upon application received prior to the due date of the report and only in those circumstances where the residential health care facility established, by documentary evidence, that the report cannot be filed by the due date for reasons beyond the control of the facility.

Attachment 4.19-D
Part I
New York
3a

(c) In the event a residential health care facility fails to file the required financial and statistical reports on or before the due dates, or as

the same may be extended pursuant to subdivision (b) of this section, the State Commissioner of Health shall reduce the current rate by two percent for a period beginning on the first day of the calendar month following the original due date of the required reports and continuing until the last day of the calendar month in which said required reports are filed.

(d) In the event that any information or data which a residential health care facility has submitted to the State Department of Health, on required reports, budgets or appeals for rate revisions intended for use in establishing rates, is inaccurate or incorrect, whether by reason or subsequent events or otherwise, such facility shall forthwith submit to the department a correction of such information or data which meets the same certification requirements as the document being corrected.

(e) Except as identified in section 86-2.10(k)(6) and 86-2.15(e), a cost report shall be filed in accordance with this section by each new facility for the first [six-month] twelve-month period during which the facility has had an overall average utilization of at least 90 percent of bed capacity. This report shall be filed and properly certified within 60 days following the end of the [six-month] twelve-month period covered by the report. Failure to comply with this subdivision shall result in application of subdivision (c) of this section.

(f) If the financial and statistical reports required by this Subpart are determined by the department to be incomplete, inaccurate or incorrect, the residential health care facility will have 30 days from the date of receipt of notification to provide the corrected or additional data. Failure to file the
corrected or additional data that was previously required within that period will result in a reduction of the current rate in accordance with subdivision (c) of this section. Lack of the respective certifications by both the operator and accountant, as required pursuant to section 86-2.5 and 86-2.6 of this Subpart, shall render a financial and statistical report incomplete, and the facility shall not be entitled to the 30-day period to submit the certifications.

(g) Specific additional data related to the rate setting process may be requested by the State Commissioner of Health. These data, which include and are limited to those for use in a wage geographic differential survey, a peer grouping data survey, a medical supplies survey and a malpractice insurance survey, must be provided by the residential health care facility within 30 days from the date of receipt of notification to supply such information. The commissioner must supply to each facility prior to the start of each rate period, a preliminary listing of the data that will be required. Failure to submit the additional data shall result in a reduction of the current rate in accordance with subdivision (c) of this section, unless the residential health care facility can prove by documentary evidence that the data being requested is not available.
[(h) each residential health care facility shall file with the New York State Department of Health a complete copy of the Department of the Treasury, Internal Revenue Service Form 990, for that facility. The Form 990 shall be submitted to the department no later than 30 days following the annual filing with the Internal Revenue Service. Failure to submit the Form 990 shall result in application of the provisions set forth in subdivision (c) of this section.]

**RESERVED**
86-2.3 Uniform system of accounting and reporting.

(a) Residential health care facilities shall maintain their records in accordance with:

(1) section 414.13 of Article 3 Subchapter A of Chapter V of this Title; and

(2) for the 1980 calendar year in substantial compliance, and thereafter in full compliance, with Article 9 of Subchapter A of Chapter V of this Title. Substantial compliance shall be defined as the result that would be expected from a good-faith effort taken by an informed, responsible person.

(b) For purposes of rate setting, the report required for the fiscal year beginning on or after January 1, 1980 by residential health care facilities shall be made in accordance with the policies and instructions set forth in Article 9 of Subchapter A of Chapter V of this Title for financial presentation purposes.

(c) Rate schedules shall not be certified by the Commissioner of Health unless residential health care facilities are in full compliance with the reporting requirements of this Subpart, section 414.13 and Article 9 of Subchapter A of Chapter V of this Title. For the purpose of certifying rates, compliance with reporting requirements of Article 9 of Subchapter A of Chapter V of this Title will include, but not be limited to, the timely filing of properly certified reports which are complete and accurate in all material respects.
(d) Failure of residential health care facility to file the reports required pursuant to this section will subject the residential health care facility to a rate reduction as set forth in section 86-2.2 of this Subpart. However, there may be instances where a facility is not in compliance with Article 9 of Subchapter A of Chapter V of this Title, resulting in reports which are inaccurate, incomplete or incorrect, and the area of noncompliance cannot, for the reporting period, be corrected. In such instances a rate reduction shall, with respect to the report for such reporting period, begin on the first day of the calendar month following the original due date of the required report and continue until the last day of the calendar year in which the report was required to be filed.
86-2.4 Generally accepted accounting principles.

The completion of the financial and statistical report form shall be in accordance with generally accepted accounting principles as applied to the residential health care facility unless the reporting instructions authorized specific variation in such principles.

New York
8

Attachment 4.19-D
Part I

TN #86-4
Supersedes TN #82-30

Approval Date July 29, 1987
Effective Date January 1, 1986
86-2.5 Accountant’s certification.

(a) The financial and statistical reports shall be certified by an independent licensed public accountant or an independent certified public accountant. The minimum standard for the term “independent” shall be the standard used by the State Board of Public Accountancy.

(b) Effective with report periods beginning on or after January 1, 1977, the requirements of subdivision (a) of this section shall apply to residential health care facilities operated by units of government of the State of New York heretofore exempt from the requirements of this section except that those medical facilities for which an annual reimbursement audit by a State agency is required by law shall be required to comply herewith effective with report periods beginning on or after January 1, 1978.
86-2.6 Certification by operator or officer.

(a) The financial and statistical reports shall be certified by the operator of a proprietary medical facility, an officer of a voluntary medical facility or the public official responsible for the operation of a public medical facility.

(b) The form of the certification required in subdivision (a) of this section shall be as prescribed in the annual fiscal and statistical reports forms provided by the State Commissioner of Health.
86-2.7 Audits

(a) All fiscal and statistical records and reports shall be subject to audit. All underlying books, records and documentation which formed the basis for the fiscal and statistical reports, filed by the residential health care facility with the department, shall be kept and maintained by the facility for a period of time not less than six years from the date of filing, or the date upon which the fiscal and statistical records were to be filed, whichever is the later date. In this respect, any rate of payment certified by the State Commissioner of Health based on the initial submission of base year data and reports will be construed to represent a provisional rate until such audit is performed and completed, at which time such after or adjusted rate will be construed to represent the audited rate.

(b) Subsequent to the filing of required fiscal and statistical reports, field audits shall be conducted by the records of residential health care facilities, in a time, manner and place to be determined by the State Department of Health.

(c) The required fiscal and statistical reports shall be subject to audit for a period of six years from the date of their filing with the department or from the date when due, whichever is later. This limitation shall not apply to situations in which fraud may be involved or where the provider or an agent thereof prevents or obstructs the commissioner from performing an audit pursuant to this section.

(d) Upon completion of the audit the residential health care facility shall be afforded a closing conference. The residential health care facility
may appear in person or by anyone authorized in writing to act on behalf of the residential health care facility. The residential health care facility shall be afforded an opportunity at such conference to produce additional documentation in support of any modifications requested in the audit.

(e) The residential health care facility shall be provided with the audit report and the rate computation sheet per audit. The audit report shall be final unless within 30 days of receipt of the audit report, the residential health care facility initiates a bureau review by notifying the Division of Health Care Financing by registered or certified mail, detailing the specific items of the audit report with which the provider disagrees and such other material as the provider wishes to submit in its behalf and forwarding all material documentation in support of the residential health care facility’s position.

(f) The residential health care facility shall be notified in writing of the determination of the controverted items of the final audit report, including a statement of the reasons for such adjustments and the appropriate citation to applicable law, regulation and policy. The audit finding as adjusted in accordance with the determination of the bureau review shall be final, except that the residential health care facility may, within 30 days of receipt of the determination of the bureau review, initiate a hearing to refute those items of the audit report adverse to the interests of the residential health care facility presenting a factual issue by serving on the commissioner, by certified or register mail, a notice containing a statement
of the legal authority and jurisdiction under which the hearing should be held, a
reference to the particular sections of the statutes and rules involved and a statement of
the controverted items of the audit report and bureau determination, together with
copies of any documentation relied on by the residential health care facility in support of
its position.

(1) Upon receipt of such notice the commissioner shall:

(i) designate a hearing officer to hear and recommend;

(ii) establish a time and place for such hearing;

(iii) notify the residential health care facility of the time and place of such hearing
at least 15 days prior thereto; and

(iv) include in a notice of hearing those issues of the audit report which are
controverted in the notice served on the commissioner by the residential
health care facility.

(2) The issues and documentation presented by the residential health care facility at
such hearing shall be limited to the factual issues and documentation presented at
the bureau review.

(3) The audit report shall be presumptive evidence of its content. The burden of proof
at any such hearing shall be upon the residential health care facility to prove by
substantial evidence that the items therein contained are incorrect. At such
hearing, the residential health care facility shall have the obligation to initially
present such evidence in support of its position. Failure to do so shall result in
termination of the hearing.
(4) The hearing shall be conducted in conformity with section 12-a of the Public Health Law and State Administrative Procedure Act.

(5) At the conclusion of the hearing the residential health care facility may submit memoranda on any legal issues which it deems relevant to the proceeding. Such memoranda shall be come part of the official record of the hearing.

(g) Rate revisions resulting from the procedure set forth in this section shall be made retroactive to the period or periods during which the rates based on the periods audited were established. Any resulting overpayment or underpayment shall be satisfied by either retroactive adjustment of the provisional rate paid based on the period audited, or prospective adjustment of the current certified rate at the discretion of the State Commissioner of Health.

(h) All overpayments resulting from rate revisions shall be subject to such penalties as the Commissioner of Health may impose for incorrect completion of the report or the failure to file required revisions of the report in the amount of up to 25 percent of the overpayment for negligent incorrect completion or negligent failure to file revisions and up to 100 percent of the overpayment for willful incorrect completion or willful failure to file revisions. The penalties assessed under this section are separate from and shall not be construed to be in mitigation of damages which may be recovered pursuant to section 145-b of the Social Services Law.
**86-2.8 Patient days.**

(a) A patient day is the unit of measure denoting lodging provided and services rendered to one patient between the census-taking hour on two successive days.

(b) In computing patient days, the day of admission shall be counted but not the day of discharge. When a patient is admitted and discharged on the same day, this period shall be counted as one patient day.

(c) For reimbursement purposes residential health care facility days shall be determined by using the higher of the minimum utilization factor of 90 percent of certified beds or the actual patient days of care as furnished by the facility.

(d) Reserved bed patient days shall be computed separately from patient days. A reserved bed patient day is the unit of measure denoting an overnight stay away from the residential health care facility for which the patient, or patient’s third-party payor, provides per diem reimbursement when the patient’s absence is due to hospitalization or therapeutic leave.

(e) In computing reserved bed patient days, the day of discharge from the residential health care facility shall be counted, but not day of readmission.
The voluntary health care facility right-sizing program is intended to address excess capacity in residential health care facilities. Under this program, a residential health care facility may apply to temporarily decertify, or permanently convert, a portion of its existing certified beds to another level of care. The Commissioner of Health may approve temporary decertification and permanent bed conversions, which total no more than [2,500] 5,000 residential health care beds on a statewide basis.

A residential health care facility may temporarily decertify beds for up to five years. Temporarily decertified beds will remain on the facility’s license during and after the five-year period.

The following adjustments to the calculation of Medicaid rates of payment for residential health care centers will be made for facilities that have temporarily decertified beds under this program:

- Capital cost reimbursement will be adjusted to reflect the new bed capacity;
- The facility’s peer group assignment for indirect cost reimbursement will be based upon total certified beds less the number of temporarily decertified beds; and
- The facility’s vacancy rate, for the purpose of determining eligibility for reserved bed day payments, will be calculated on the basis of the facility’s total certified beds less the number of temporarily decertified beds. Payments for reserved bed days for facilities that have temporarily decertified beds will be in an amount that is fifty percent of the otherwise applicable payment amount for such beds.

December 17, 2010
TN #10-29 Approval Date December 17, 2010
Supersedes TN #05-60 Effective Date August 1, 2010
86-2.10 Computation of basic rate.

(a) Definitions.

For the purposes of this section the following definitions shall apply:

(1) Direct price shall mean the monetary amount established for the direct component of the rate, based on the direct costs of all facilities after application of the regional direct input price adjustment factor, divided by patient days and the average statewide case mix index.

(2) Indirect price shall mean the monetary amount established for the indirect component of the rate, based on the indirect costs for each facility in a peer group, after application of a regional indirect price adjustment factor, divided by total peer group patient days.

(3) Peer group shall mean a set of facilities distinguished by like characteristics which are grouped for purposes of comparing costs and establishing payment rates using such criteria as affiliation (i.e., hospital-based or freestanding) case mix index (i.e., high intensity, case mix index greater than .83, or low intensity, case mix index less than or equal to .83), and size (i.e., less than 300 beds or 300 or more beds).

(4) Cost center shall mean categories into which related costs are grouped in accordance with and defined in Part 455 of this Title.

(5) Case mix index shall mean the numeric weighting of each patient classification group in terms of relative resource utilization as specified in Appendix 13-A, infra.

(6) Rate shall mean the aggregate governmental payment to facilities per patient day as defined in section 86-2.8 of this Subpart, for the care
of medicaid patients which shall include a Direct, Indirect Non-Comparable and Capital component.

(7) Operating portion of the rate shall mean the portion of the rate consisting of the Direct, Indirect and Non-Comparable components after application of the roll factor promulgated by the department.

(8) Role Factor shall mean the cumulative result of multiplying one year’s trend (inflation) factor times one or more other years trend factor(s) which is used to inflate costs from a base period to a rate period.

(9) Capital Costs shall mean costs reported in the Depreciation, Leases and Rentals, Interest on Capital Debt and/or Major Movable Equipment Depreciation Cost Centers, as well as costs reported in any other cost center under the major natural classification of Depreciation, Leases and Rentals on the facilities annual cost report (RHCF-4).

(10) Base shall mean, as applicable to cost or price, a minimum cost or price.

(11) Ceiling shall mean, as applicable to cost or price, a maximum cost or price.

(12) Corridor shall mean the difference between a base and a ceiling.

(13) Hospital based shall mean as follows:

(i) For facilities receiving initial operating certificates prior to January 1, 1983, hospital based shall mean those facilities that are considered by the federal Health Care Financing...
New York
19

Administration (HCFA) to be hospital based or hospital rated (as pertaining to cost allocation) and which derive and report costs on the basis of a Medicare cost allocation methodology from an affiliated hospital.

ii. For facilities receiving operating certificates after January 1, 1983 the Commissioner shall review and determine whether or not such facilities are hospital based utilizing the following criteria:

a. the nature of any construction approval received pursuant to Section 2802 of the Public Health Law;

b. the nature of any establishment approval received pursuant to Section 2801-a of the Public Health Law;

c. the architectural configuration for the residential health care facility unit as related to the hospital physical plant;

d. the method and amount of cost allocation;

e. whether a determination that such a facility is hospital based would result in the efficient and economic operation of such facility.

(b) (1) The rate for 1986 and subsequent rate years shall

i. be computed on the basis of allowable fiscal and statistical data submitted by the facility for the fiscal year ending December 31, 1983, as contained in parts I, II, III and IV of the facility’s annual cost report (RHCF-4) and for hospital based facilities, the annual cost report (RHCF-2) and the institutional cost report of its related hospital. Beginning with the annual cost report filed for 2005 and for each year thereafter; in the event the operating costs reported by a facility are less than 90 percent of the operating costs reported in the cost report utilized to compute the facility’s rates, trended to 2005 and each year thereafter, the facility’s rates shall be recalculated utilizing the more recent reported operating cost data.
(ii) Consist of the following four separate and distinct components, as defined in this section.

(a) Direct
(b) Indirect
(c) Non-comparable
(d) Capital

(2) The operating portion of the rate for 1986 and subsequent rate years shall consist of the sum of the Direct, Indirect and Non-Comparable Components of the rate determined in accordance with this section trended to the rate year by the applicable roll factor promulgated by the department.

(3) Allocation and adjustments of Reported Costs.

(i) The computation of the rate for 1986 and for subsequent rate years shall incorporate the use of the single stepdown method of cost allocation as defined in section 451.249 of Article 9 of Subchapter A of Chapter V of this Title.

(ii) Individual discrete ceilings shall be applied to renumeration for the facility's administrator, assistant administrator and operator as specified in Appendix 6a infra.

(iii) Reported Costs of 1983 shall be adjusted through the apportionment of retroactive adjustments due to operating appeals which were as a result of significant increases in staff specifically mandated by the Commissioner. Such adjustments shall be limited to

TN #86-4 Approval Date July 29, 1987
Supersedes TN #84-26 Effective Date January 1, 1986
those related to staff hired subsequent to December 31, 1982 and those appeal requests received by the department prior to July 1, 1985.

(iv) In the determination of rates, reported costs shall be subject to the limitations and adjustments contained in sections 86-2.12, 86-2.17, 86-2.18, 86-2.25, and 86.2.26 of this Subpart.

(v) Salaries paid to related parties shall be subject to an initial maximum not to exceed $17,000. This limitation may be waived by the department pursuant to the provisions of section 86-2.14(a)(7) or this Subpart.

(c) Direct component of the rate.

(1) Allowable costs for the direct component of the rate shall include costs reported in the following functional cost centers on the facility's annual cost report (RHCF-4) or extracted from a hospital-based facility's annual cost report (RHCF-2) and the institutional cost report of its related hospital, after first deducting for capital costs and allowable items not subject to trending.

(i) nursing administration;

(ii) activities;

(iii) social services;

(iv) transportation;

(v) physical therapy;

(vi) occupational therapy;

[(vii) laundry and linen]
New York
22

(vii) speech and hearing therapy – (speech therapy portion only);

(viii) [pharmacy;

(ix)] central service supply; and

[(x)][ix] residential health care facility.

(2) For purposes of calculating the direct component of the rate, the department shall utilize the allowable direct costs reported by all facilities with the exception of specialty facilities as defined in subdivision (1) of this section.

(3) [Except as provided for in subparagraph (4) (viii) of this subdivision. the] The statewide mean, base and ceiling direct price for patients in each patient classification group shall be determined as follows:

(i) Allowable costs for the direct cost centers for each facility after first deducting capital costs and items not subject to trending, shall be multiplied by the appropriate Regional Direct Input Price Adjustment Factor (“RDIPAF”), as determined pursuant to paragraph (5) of this subdivision. The RDIPAF neutralizes the difference in wage and fringe benefit costs between and among the regions caused by differences in the wage scaled of each level of employee.

(ii) The statewide distribution of patients in each patient classification group shall be determined for 1986 payments utilizing
the patient data obtained in the patient assessment period, March 1, 1985 through September 30, 1985, conducted pursuant to Section 86-2.30 of this Subpart.

(iii) A statewide mean direct case mix neutral cost, a statewide base direct case mix neutral cost and a statewide ceiling direct case mix neutral cost shall be determined as follows:

(a) Allowable direct costs for each facility, after first deducting capital costs and items not subject to trending and adjusted by applying the RDIPAF shall be summed to determine total statewide direct costs.

(b) The aggregate statewide case mix index shall be determined by multiplying number of patients on a statewide basis in act patient classification group by the case mix index for each patient classification group and the results summed.

(c) A statewide mean direct cost per day shall be determined by dividing total statewide direct costs by the aggregate number of statewide 1983 patient days.

(d) A statewide mean direct case mix neutral cost per day shall be determined by dividing the statewide mean direct cost per day by the ratio of the aggregate statewide case mix index to the number of patient review instruments received pursuant to section 86-2.00 of this Subpart.
New York  
24

(e) The statewide mean direct case mix neutral cost per day shall be the basis to establish a corridor between the statewide base direct case mix neutral cost per day and the statewide ceiling direct case mix neutral cost per day.

(f) The corridor shall be established by use of a base factor and a ceiling factor expressed as a percentage of the statewide mean direct case mix neutral cost per day.

(g) A statewide base direct case mix neutral cost per day shall be determined by multiplying the base factor times the statewide mean direct case mix neutral cost per day.

(h) A statewide ceiling direct case mix neutral cost per day shall be determined by multiplying the ceiling factor times the statewide mean direct case mix neutral cost per day.

(i) A statewide mean direct price per day for each patient classification group shall be determined by multiplying the statewide mean direct case mix neutral cost per day by the case mix index for each patient classification group, provided however that the index for reduced physical functioning A shall be .4414.

(j) A statewide base direct price per day for each patient classification group shall be determined by multiplying the statewide base direct case mix neutral cost per day by the case mix index for each patient classification group, provided however that the index for reduced physical functioning A shall be .4414.
New York
25

(k) A statewide ceiling direct price per day for each patient classification group shall be determined by multiplying the statewide ceiling direct case mix neutral cost per day by the case mix index for each patient classification group, provided however that the index for reduced physical functioning A shall be .4414.
(1) The corridor referred to in clause (e) of this subparagraph shall be calculated as follows:

(1) The base factor referred to in clause (f) of this subparagraph shall be approximately 90 percent effective January 1, 1996 and thereafter. The base factor referred to in clause (f) of this subparagraph shall be approximately 90 percent for the period January 1, 1987 through December 31, 1987, such factor shall be approximately 90 percent. For the period January 1, 1988 through December 31, 1992, such factor shall be increased to approximately 95 percent. For the period January 1, 1993 through December 31, 1995 such factor shall be approximately 90 percent.

(2) The ceiling factor referred to in clause (f) of this subparagraph shall be approximately 115 percent for the period January 1, 1986 through December 31, 1986. For the period January 1, 1987 through December 31, 1987 such factor shall be reduced to approximately 110 percent. For the period January 1, 1988 through December 31, 1988, and thereafter such factor shall be reduced to approximately 105 percent.
(iii) For the period January 1, 1986 through December 31, 1986, the base factor and ceiling factor contained in this clause shall initially be determined to result in a 20 percent corridor. The ceiling factor shall then be increased by 5 percent. For the period January 1, 1987 through December 31, 1987, the application of the base factor and ceiling factor contained in this clause shall result in a 20 percent corridor. For the period January 1, 1988 through December 31, 1988, and thereafter, the base factor and ceiling factor contained in this clause shall result in a 10 percent corridor.

(4) **The facility specific direct adjusted payment price per day shall be determined as follows:**

(i) The facility specific mean direct price per day shall be determined by multiplying the statewide mean direct price per day for each patient classification group times the number of patients properly assessed and reported by the facility in each patient classification group pursuant to section 86-2.30 of this Subpart and dividing the sum of the results by the total number of patients properly assessed and reported by the facility pursuant to section 86-2.30 of this Subpart.

(ii) The facility specific base direct price per day shall be
determined by multiplying the statewide base direct price per day for each patient classification group times the number of patients properly assessed and reported by the facility in each patient classification group pursuant to section 86-2.30 of this Subpart and dividing the sum of the results by the total number of patients properly assessed and reported by the facility pursuant to section 86-2.30 of this Subpart.

(iii) The facility specific ceiling direct price per day shall be determined by multiplying the statewide ceiling direct price per day for each patient classification group times the number of patients properly assessed and reported by the facility in each patient classification group pursuant to section 86-2.30 of this Subpart and dividing the sum of the results by the total number of patients properly assessed and reported by the facility pursuant to section 86-2.30 of this Subpart.

(iv) The facility specific cost based direct price per day shall be determined by dividing a facility’s adjusted allowable reported direct costs after first deducting capital costs and items not subject to trending and, after application of the RDIPAF, by the facility’s 1983 total patient days.
Except as contained in subparagraph (vi) of this paragraph, the facility specific direct adjusted payment price per day shall be determined by comparison of the facility specific cost based price per day with the facility specific base direct price per day and the facility specific ceiling direct price per day pursuant to the following table:

<table>
<thead>
<tr>
<th>Facility Specific Cost based Direct Price Per Day</th>
<th>Facility Specific Direct Adjusted Payment Price Per Day</th>
</tr>
</thead>
<tbody>
<tr>
<td>Below Facility Specific Base Direct Price Per Day</td>
<td>Facility Specific Base Direct Price Per Day</td>

<td>Facility Specific Ceiling Direct Price Per Day</td>
</tr>
</tbody>
</table>

TN #86-4 Approval Date July 29, 1987
Supersedes TN #84-26 Effective Date January 1, 1986
(vi) The facility specific direct adjusted payment price per day shall be considered to be the facility specific cost based direct price per day when such price is below the facility specific base direct price per day subject to the provisions of paragraph 6 of this subdivision for the following operators of residential health care facilities:

(a) An operator who has had an operating certificate revoked pursuant to Section 2806(5) of the Public Health Law and is operating a residential health care facility pursuant to an Order of the Commissioner of this department;

(b) An operator of a facility in which the federal Health Care Financing Administration (HCFA) has imposed a ban on payment for all Medicare and Medicaid admissions after a specified date pursuant to Section 1866(f) of the federal Social Security Act until the lifting of the ban in writing by HCFA.

(vii) The direct component of a facility's rate shall be the facility specific direct adjusted payment price per day determined in subparagraph (v) or (vi) of this paragraph as applicable after applying the RDIPAF.
New York
31

(5) **The RDI PAF shall be based on the following factors:**

(i) Residential health care facilities shall be grouped, by county, into 16 regions within the State as outlined in Appendix 13-A, infra.

(ii) The facility's staffing, based on case mix predicted staffing for registered professional nurses, licensed practical nurses, and aides, orderlies and assistants for each facility. The case mix predicted staffing shall be adjusted annually on January 1st of each rate year based on the most recent PRI’s submitted by each facility prior to January 1st for the fourth quarter of the preceding calendar year, in accordance with sections 86-2.11(b) and 86-2.30 of this Subpart. Until such PRIs are available, the case mix predicted staffing shall be based on the most current PRIs available prior to calculation of the initial rate effective January 1st of each rate year. The case mix predicted staffing shall subsequently be revised based on more recent PRI submissions until such a time as the PRIs for the fourth quarter of the preceding calendar year are available.

(iii) The proportion of salaries and fringe benefit costs for the direct care cost centers indicated in subdivision (c) of this section to the total costs of such direct care cost centers.

TN #91-25

Supersedes TN #90-10

Approval Date July 11, 1994

Effective Date April 1, 1991
(6) **Case mix adjustment.**

A facility shall receive an increase or decrease in the direct component of its rate if the facility has increased or decreased its case mix from one assessment period to the next and, in accordance with subparagraph (v) of paragraph (4) of this subdivision, would not have received any change in the direct component of its rate from that determined as of January 1, 1986 to the current calculation date. The increases or decreases in the direct component of the rate shall be determined as follows:

(i) The facility specific mean price per day effective January 1, 1986 as determined in accordance with section 86-2.10(4)(i) shall be compared to the facility specific mean price per day determined as a result of the submissions required in accordance with section 86-2.11(b) of this subpart. Any increase or decrease determined as a result of such comparison, shall be expressed as a percentage, positive or negative, of the facility specific mean price per day effective January 1, 1986.

(ii) This percentage shall be applied to the Facility Specific Cost Based Direct Price Per Day determined as of January 1, 1986 and an adjustment factor shall be determined.

(iii) This adjustment factor shall be added to or subtracted from the facility specific cost based direct price per day determined as of January 1, 1986, to arrive at an adjusted facility specific cost based direct price per day which shall become for a facility
their facility specific adjusted payment price per day for applicable rate period for which payment rates are adjusted pursuant to section 86-2.11 of this Subpart.

(d) **Indirect component of the rate.**

(1) Allowable costs for the indirect component of the rate shall include costs reported in the following functional cost centers on the facility’s annual cost report (RHCF-4) or extracted from a hospital based facility’s annual cost report (RHCF-2) and the institutional cost report of its related hospital, after first deducting for capital costs and allowable items not subject to trending:

(i) fiscal services;

(ii) administrative services;

(iii) plant operations and maintenance (with the exception of utilities and real estate and occupancy taxes);

(iv) grounds;

(v) security;

(vi) laundry and linen;

[(vi)](vii) housekeeping;

[(vii)](viii) patient food services;

[(viii)](ix) cafeteria;

New York
33(a)

For the purposes of establishing the indirect component of the rate of payment for services provided on or after April 1, 1995 through March 31, 1999 and for services provided on or after July 1, 1999 through [March] December 31, 2006, the reimbursable base year costs as reported in the fiscal services and administrative services functional cost centers as specified in subparagraphs (i) and (ii) of this paragraph of a provider of services, excluding a provider of services reimbursed on an initial budget basis, shall not, except as otherwise provided in this paragraph, exceed the statewide average of total reimbursable base year administrative and fiscal service costs. For the purposes of this paragraph, reimbursable base year administrative and fiscal service costs shall mean those base year administrative and fiscal services costs remaining after application of all other efficiency standards, including but not limited to, peer group ceilings or guidelines. Effective for rates of payment commencing July 1, 2000, a separate statewide average of total reimbursable base year administrative and fiscal services costs shall be determined for each of those facilities wherein eighty percent or more of its patients are classified with a patient acuity equal to or less than .83 which is used as the basis for a facility's case mix adjustment. For the period July 1, 2000 through March 31, 2001, the total reimbursable base year administrative and fiscal services costs of such facilities shall not exceed such separate statewide average plus one and one-half percentage points. For annual periods thereafter through [March] December 31, 2006, the total reimbursable base year administrative and fiscal services costs of such facilities shall not exceed such separate statewide average. In no event shall the calculation of this separate statewide average result in a change in the statewide average determined pursuant to this paragraph. The limitation on reimbursement for provider administration and general expenses provided by this paragraph shall be expressed as a percentage reduction of the operating cost component to the rate promulgated for each residential health care facility.

Attachment 4.19-D
Part I

October 10, 2006

Supersedes TN #05-32

Effective Date April 1, 2006

Approval Date October 10, 2006
New York
34

(2) For the purposes of establishing the allowable indirect component of the rate, facilities shall be combined into peer groups as follows:

(i) **Size:**
   
   (a) less than 300 beds;
   
   (b) 300 or more beds

(ii) **Affiliation:**
   
   (a) free-standing
   
   (b) hospital-based

(iii) **Case mix index:**
   
   (a) high intensity, case mix index greater than .83;
   
   (b) low intensity, case mix index less than or equal to .83.

(3) If any peer group contains fewer than five facilities, those facilities shall be included in a peer group of a similar type.

(4) For each of the peer groups, the indirect component of the rate shall be determined as follows:

(i) A mean indirect price per day shall be computed as follows:

   (a) Reported allowable costs for the indirect costs centers for each facility in the peer group, after first deducting capital costs and allowable items not subject to trending shall be adjusted by applying the Regional Indirect Input Price Adjustment Factor (“RIIPAF”), as determined pursuant to paragraph (6) of this subdivision.
(b) The results of the calculation in clause (a) of this subparagraph shall be aggregated and divided by total 1983 patient days of all facilities in the peer group.

(ii) The mean indirect price per day shall be the basis to establish a corridor between the base indirect price per day and the ceiling indirect price per day. The corridor shall be established by use of a base factor and a ceiling factor expressed as a percentage of the mean indirect price per day.

(a) The base factor shall be approximately 90 percent effective January 1, 1996 and thereafter. The base factor shall be approximately 90 percent for the period January 1, 1986 through December 31, 1986. For the period January 1, 1987 through December 31, 1987, such factor shall be increased to approximately 95 percent. For the period January 1, 1988 through December 31, 1992, such factor shall be increased to approximately 97.5 percent. For the period January 1, 1993 through December 31, 1995 such factor shall be approximately 92.5 percent.

(b) The ceiling factor shall be approximately 110 percent for the period January 1, 1986 through December 31, 1986. For the period January 1, 1987 through December 31, 1987, and thereafter, such factor shall be reduced to approximately 105 percent.

(iii) For the period January 1, 1986 through December 31, 1986, the base factor and ceiling factor contained in subparagraph (ii) of this paragraph, shall result in a 20 percent corridor. For the
New York
36

period January 1, 1987 through December 31, 1987, the base factor and ceiling factor contained in subparagraph (ii) of this paragraph shall result in a 10 percent corridor. For the period January 1, 1988 through December 31, 1988, and thereafter, the base factor and ceiling factor contained in subparagraph (ii) of this paragraph shall initially be determined to result in a five percent corridor. The ceiling factor shall then be increased by 2.5 percent.

(iv) The base indirect price per day shall be determined by multiplying the base factor times the mean indirect price per day.

(v) The ceiling indirect price per day shall be determined by multiplying the ceiling factor times the mean indirect price per day.

(vi) The facility specific indirect adjusted payment price per day shall be determined by comparison of a facility's adjusted reported indirect costs after deducting capital costs and items not subject to trending and after application of the RIIPAF, divided by the facility's total 1983 patient days, with the base indirect price per day and the ceiling indirect price per day. Except as outlined in subparagraph (vii) of this paragraph, the facility specific indirect adjusted payment price per day shall be established as presented by the following table:

Facility Adjusted Costs Adjusted Payment Divided by Patient Days Price Per Day

Below Base Indirect Price Per Day

Base Indirect Price Per Day

Between Base Indirect Price Per Day Report Adjusted and Ceiling Indirect Price Per Day Costs Per Day

Above Ceiling Indirect Price Per Day Ceiling Indirect Price Per Day

(vii) The facility specific indirect adjusted payment price per day shall be considered to be the facility specific cost based indirect price per day when such price is below the facility specific base indirect price per day for the following operation of residential health care facilities:

(a) An operator who has had an operating certificate revoked pursuant to Section 2806(5) of the Public Health Law and is operating a residential health care facility pursuant to an Order of the Commissioner of this department;

(b) An operator of a facility in which the federal Health Care Financing Administration (HCFA) has imposed a ban on payment for all Medicare and Medicaid admissions after a
specified date pursuant to section 1866(f) of the federal Social Security Act until the lifting of the ban in writing by HCFA.

(5) For each rate year, a facility’s indirect costs shall be compared to the peer groups identified in paragraph (2) of this subdivision as follows:

(i) A facility’s peer group established pursuant to paragraphs (2)(i) and (ii) of this subdivision shall be based on that facility’s affiliation status prior to the effective rate period, contingent upon the provisions of section 86-2.34 of this Subpart, and total certified bed capacity listed on the operating certificate.

(ii) Those facilities having 80% or more of all patients falling into patient classification groups with weights greater than .83 shall be compared to the peer group established pursuant to clause (a) of subparagraph (iii) of paragraph (2) of this subdivision.

(iii) Those facilities having 80% or more of all patients falling into patient classification groups with weights equal to or less than .83 shall be compared to the peer group established pursuant to clause (c) of subparagraph (iii) of paragraph (2) of this subdivision.

(iv) Those facilities who do not meet either of the above conditions identified in subparagraphs (ii) and (iii) of this paragraph, shall be compared to a blended peer group mean price per day. Such price shall be determined by blending the number of a facility’s patients which have patient classification group weights above .83 at the high intensity peer group mean price and the number of a facility’s patients at or below .83 at the low intensity peer group mean price as defined pursuant to paragraph (4) of this subdivision.

(v) The peer group mean price effective January 1st of each rate year shall be based on the PRIs submitted by each facility for the fourth quarter...
New York
38(a)

of the preceding calendar year in accordance with 86-2.11(b) and 86-2.30 of this Subpart. Until such PRIs are available, the peer group mean price shall be based on the most current PRIs available prior to calculation of the initial rate effective January 1st of each rate year. The peer group mean price shall subsequently be revised based on more recent PRI submissions until such time as the PRIs for the fourth quarter of the preceding calendar year are available.

[(5)] (6) The indirect component of a facility’s rate shall be the facility specific indirect adjusted payment price per day determined in accordance with subparagraphs (vi) and (vii), as applicable of paragraph (4) of this subdivision after application of the RIIPAF.

[(6)] (7) The RIIPAF shall be based on the following factors:

[(a)] (i) residential health care facilities shall be grouped by county, into 16 regions within the State as outlined in Appendix 13(b) infra.

[(b)] (ii) the facility’s staffing, based on case mix predicted staffing for registered professional nurses, licensed practical nurses, and aides, orderlies and assistants for each facility. The case mix predicted staffing shall be adjusted annually on January 1st of each rate year based on the [most recent] PRI’s submitted by each facility [prior to January 1st], for the fourth quarter of the preceding calendar year, in accordance with sections 86.2.11(b) and 86-2.30 of this Subpart. Until such PRIs are available, the case mix predicted staffing shall be based on the most current PRIs available prior to calculation of the initial rate effective January 1st of each rate year. The case mix predicted staffing shall subsequently be revised based on more recent PRI submissions until such time as the PRIs for the fourth quarter of the preceding calendar year are available; and
New York
38(b)

[(c)] (iii) the proportion of salaries and fringe benefits costs for the indirect care cost centers indicated in paragraph 1 of this subdivision to the total costs of such indirect care cost centers.

(e) Gain or Loss Limitation for the Direct and Indirect Component of the Rate:

Gain or losses resulting from using the Regional direct or indirect input price adjustment factors rather than individual facility specific direct or indirect input price adjustment factors shall be determined as follows:

(1) A facility's allowable direct costs divided by the facility's 1983 total patient days shall be compared to the facility's direct component and a direct gain or loss per day calculated.

(2) A facility's allowable indirect costs divided by the facility's 1983 total patient days shall be compared to the facility's indirect component and an indirect gain or loss per day calculated.

(3) The facility's direct gain or loss per day and indirect gain or loss per day shall be summed to arrive at a facility's net composite gain or loss per day.

(4) If a facility's net composite gain or loss per day is greater than $3.50, for the rate year 1986, a limitation shall be applied for rate years 1986 through 1988 as follows:

(i) For 1986 rates, if a facility has a net composite gain, then a facility's direct or indirect cost per day shall be determined by utilizing the Regional or the individual facility specific input price adjustment factor, which ever factor when applied would reduce the gain.

(ii) For 1986 rates, if a facility has a net composite loss, then a facility's direct or indirect costs per day shall be determined by utilizing the Regional or the individual facility specific input price adjustment factor, whichever factor, when applied, would reduce the loss.
(iii) If a facility’s direct or indirect cost per day is determined, pursuant to subparagraph (i) or (ii) of this paragraph, by utilizing the Regional input price adjustment factor, such factor shall be utilized in all subsequent rate years.

(iv) If a facility’s direct or indirect costs per day is determined, pursuant to subparagraph (i) or (ii) of this paragraph, by utilizing the individual facility specific input price adjustment factor, the following shall apply to subsequent rate years:

(a) For 1987 rates, a facility’s direct or indirect cost per day shall be determined by using a composite of 50% of the Regional and 50% of the facility specific input price adjustment factor.

(b) For 1988 rates, a facility’s direct or indirect costs per day shall be determined by using a composite of 75% of the Regional and 25% of the facility specific input price adjustment factor.

(c) For 1989 and subsequent rate years, a facility’s direct costs per day shall be determined by using the Regional input price adjustment factors.

(5) The limitations of this subdivision shall not be applicable to specialty facilities as defined in subdivision (i) of this section.
(f) **Non-comparable Component of the Rate:**

(1) The non-comparable component of the rate shall consist of costs which represent allowable costs reported by a facility which because of their nature are not subject to peer group comparisons.

(2) Allowable costs for the non-comparable component of the rate shall include the costs associated with supervision of facility volunteers and costs reported in the following functional cost centers as reported on the facility's annual cost report (RHCF-4) or extracted from a hospital based facility's annual cost report (RHCF-2) and the institutional cost report of its related hospital, after first deducting capital cost and allowable items not subject to trending:

i. Laboratory Services

ii. ECG

iii. EEG

iv. Radiology

v. Inhalation Therapy

vi. Podiatry

vii. Dental

viii. Psychiatric

ix. Speech and Hearing Therapy – (Hearing Therapy Only)

x. Medical Director Office

xi. Medical Staff Services
New York
42

xii. Utilization Review

xiii. Other Ancillary

xiv. Plant Operations and maintenance – (cost for facilities and real estate and occupancy taxes only).

(3) The allowable facility specific non-comparable component of the rate shall be reimbursed at a payment rate equal to adjusted reported non-comparable costs, after first deducting capital costs and allowable items not subject to trending, divided by the facility’s total 1983 patient days.

(g) Capital Component of the Rate.

The allowable facility specific capital component of the rate shall include allowable capital costs determined in accordance with section 86-2.19, 86-2.20, 86-2.21 and 86-2.22 of this Subpart and costs of other allowable items determined by the department to be non-trendable divided by the facility’s patient days in the base year determined applicable by the department.

(h) A facility’s payment rate for 1986 and subsequent rate years shall be equal to the sum of the operating portion of the rate as defined in paragraph (2) of subdivision (b) of this section and the capital component as defined in subdivision (g) of this section.

(i) Specialty Facilities.

Facilities which provide extensive nursing, medical, psychological and counseling support services to children with diverse and complex medical, emotional and social problems shall be considered...
specialty facilities and shall not be subject to the provisions of paragraphs (c)(3), (c)(4), (d)(4), (d)(5) and (d)(6) of this section. The direct component of such facilities' rates shall be calculated based on allowable 1983 direct costs as defined in paragraph (c)(1) of this section, divided by the facilities' total 1983 patient days. The indirect component of such facilities' rates shall be calculated based on allowable 1983 indirect costs as defined in paragraph (d)(1) of this section, divided by the facilities' total 1983 patient days.

(k) Receiverships and new operators.

(1) The appointment of a receiver or the establishment of a new operator to an ongoing facility shall require such receiver or operator to file a cost report for the first twelve-month period of operation in accordance with section 86-2.2(e) of this Subpart. This report shall be filed and properly certified within 60 days following the end of the twelve-month period covered by the report. Failure to comply with this subdivision shall result in application of the provisions of section 86-2.2(c) of this Subpart.

(2) The initial rate for facilities covered under this subdivision shall be the higher of (i) the rate in effect on the date of the appointment of a receiver or the date of transfer of ownership as applicable or (ii) the rate in effect on the date of appointment of a receiver or the date of transfer of ownership as applicable with the direct and indirect component of such rate calculated as follows:

(a) The direct component of the rate shall be equivalent to the facility-specific mean direct price per day after application of the RDIPAF as determined in section 86-2.10(c) of this Subpart. The PRIs used in the computation of the facility-specific mean direct price per day shall be the PRIs used to calculate the rate in effect on the date of appointment of a receiver or the date of transfer of ownership.

(b) The indirect component of the rate shall be equivalent to the mean indirect price per day, determined using the PRIs used to calculate the rate in effect on the date of appointment of a receiver or date of transfer of ownership, and adjusted by the RIIPAF as determined in section 86-2.10(d) of this Subpart.

(3) The facility shall perform an assessment of all patients, pursuant to Section 86-2.30 of this subpart, at the beginning of the fourth month of operation. The direct component of the rate shall be adjusted pursuant to this subpart effective the first day of the assessment period based on the facility's case mix.
(4) The twelve-month cost report referred to in paragraph (1) of this subdivision shall be used to adjust the direct, indirect, noncomparable and capital components of the rate effective on the first day of the twelve-month cost report period.

(5) (i) For purposes of this subdivision, and except as identified in paragraph (7) herein, the terms “new operator” and “receiver” shall not include any operator or receiver approved to operate a facility when:

(a) a stockholder, officer, director, sole proprietor or partner of such operator or receiver was also a stockholder, officer, director, sole proprietor or partner of the prior operator or receiver of such facility;

(b) the approved operator was the prior receiver of the facility;

(c) any prior corporate operator or receiver is a corporate member of the approved operator or receiver, is otherwise affiliated with the approved operator or receiver through direct or indirect sponsorship or control or when the approved operator or receiver and prior operator or receiver are subsidiaries of a common corporate parent; or

(d) a principal stockholder (owning 10 percent or more of the stock), officer, director, sole proprietor or partner of an approved proprietary operator or receiver is the spouse or child of a principal stockholder, officer, director, sole proprietor or partner of the prior operator or receiver of such facility, regardless of whether such relationship arises by reason of birth, marriage or adoption.

(ii) Rates of reimbursement for operators which are not considered new operators under this subdivision shall not be subject to adjustment under this subdivision.

(6) Notwithstanding the provisions of this subdivision, a receiver or new operator of a facility which has had an overall average utilization of at least 90 percent of bed capacity for a six-month period which began prior to April 1, 1993 but after the date on which the receiver was appointed or new operator became the operator shall submit a six-month cost report for that period. Such six-month cost report shall be utilized for the purpose[s] of this subdivision in lieu of the twelve-month cost report identified in paragraph (1) of this subdivision.

(7) (i) Notwithstanding the provisions of this subdivision, when a receiver of a proprietary nursing facility is appointed or a new operator of a previously established proprietary nursing facility is established and a stockholder, sole proprietor, partner or limited liability company member of such receiver or new operator is the child of a stockholder, sole proprietor, partner or member of the limited liability company of the prior operator or receiver of the facility, such receiver or new operator shall receive rates of reimbursement adjusted pursuant to paragraphs (1)-(4) and (6) of this subdivision. For
purposes of this paragraph, child shall mean a child or stepchild by birth, adoption, or marriage. Rates of reimbursement for any subsequent operator of such facility who is established within 10 years of the date of appointment or establishment of such child or stepchild shall not be subject to adjustment under this subdivision.

(ii) For purposes of this paragraph, the terms “new operator” and “receiver” shall not include any operator or receiver with a stockholder, sole proprietor, partner, or limited liability company member who was a stockholder, sole proprietor, partner, or limited liability company member who was a stockholder, sole proprietor, partner or limited liability company member of the prior operator or receiver of such facility.

(iii) For purposes of this paragraph, “new operator” shall also mean an established operator which has undergone a total change in owners, stockholders, partners or limited liability company members.

(iv) This paragraph shall apply to appointments of receivers and/or establishment of a new operator on or after the effective date of this paragraph.

(I) Adjustments to the opening component of the rate.

(1) Notwithstanding any other provision of this section, the department shall make available the sum of $10 million for rate year 1986 and $5 million for rate year 1987, based on total system costs and total patient days, herein referred to as the transfer amount, to facilities in those rate years, whose reimbursement for the indirect component of their rates is less than their 1983 allowable costs for the indirect component of the rate, herein referred to as indirect losses.

(2) To determine eligibility for such adjustments, facilities shall also have suffered an aggregate loss. For purposes of this subdivision, an aggregate loss shall exist when a facility’s composite 1983 allowable costs for the direct and indirect components.
(I) **Adjustments to the operating component of the rate.**

(1) Notwithstanding any other provision of this section, the department shall make available the sum of $10 million for rate year 1986 and $5 million for rate year 1987, based on total system costs and total patient days, herein referred to as the transfer amount, to facilities in those rate years, whose reimbursement for the indirect component of their rates is less than their 1983 allowable costs for the indirect component of the rate, herein referred to as indirect losses.

(2) To determine eligibility for such adjustments, facilities shall also have offered an aggregate loss. For purposes of this subdivision, an aggregate loss shall exist when a facility's composite reimbursement for the direct and indirect components of the rate is less than such a facility's composite 1983 allowable costs for the direct and indirect components.
(3) The transfer amount referred to in paragraph (1) of this subdivision shall be made available by reductions in the operating components of facilities rates whose composite reimbursement for the Direct and Indirect Components of their rates is more than their composite 1983 allowable costs for the Direct and Indirect Components, herein referred to as aggregate gains.

(4) The transfer amounts referred to in paragraph (1) of this subdivision shall be distributed, for the applicable rate years, to eligible facilities by a per diem adjustment in the operating component of their rates in accordance with the following procedure:

(i) The indirect losses of all eligible facilities shall be summed to arrive at total indirect losses.

(ii) The proportion of a facility's indirect loss to total indirect losses shall be expressed as a percentage, herein referred to as a sharing percentage.

(iii) The sharing percentage for an eligible facility shall be multiplied by the transfer amount to arrive at a facility's share of the transfer amount.

(iv) A facility's share of the transfer amount shall be divided by 1983 patient days to arrive at a per diem adjustment to the operating component of a facility's rate.

(5) The transfer amounts referred to in paragraph (1) of this subdivision shall be accumulated from facilities referred to in paragraph (3) of this subdivision by a per diem adjustment to the operating component of their rates in accordance with the following procedure:
(i) The aggregate gains of a facility shall be expressed as a percentage of their composite 1983 allowable costs for the Direct and Indirect Components. Such percentage shall be herein referred to as percentage gain.

(ii) The percentage gain for all facilities shall be ranked from highest to lowest.

(iii) A methodology shall be employed where, beginning with a set percentage, percentage gains in excess of such set percentage shall be noted, arrayed by facility and herein referred to as excess percentage gain.

(iv) The excess percentage gain shall be multiplied by each facility's allowable composite 1983 costs for the Direct and Indirect Components and such total for all facilities accumulated as a funded amount. The excess percentage gain shall also then be subtracted from a facility's percentage gain and the net percentage gain utilized as a facility's percentage gain for subsequent calculations.

(v) Such process shall continue, decreasing the set percentage used as a standard against which percentage gains of facilities is compared and the funded amounts accumulated until the transfer amounts referred to in paragraph (1) of this subdivision are realized.

(vi) If in this process, moving to the next set percentage used as a standard against which percentage gains of facilities is compared shall result in a total transfer amount in excess of the
transfer amounts referred to in paragraph (1) of this subdivision, the following procedure shall be utilized to determine the amounts necessary to be funded by each facility in the final step of this process to attain the transfer amounts referred to in paragraph (1) of this subdivision:

(a) A facility's percentage gain shall be compared to the next lower set percentage that would be utilized as a standard and an excess percentage gain determined.

(b) The excess percentage gain for a facility, at that time, shall be multiplied by the facility's allowable composite 1983 costs for the direct and indirect components and the result herein referred to as an interim funded amount.

(c) The interim funded amount for each facility, expressed as a percentage of the aggregate of the interim funded amount for all facilities shall be multiplied by the remaining amount to be funded for a given rate year to arrive at a facility's portion of the final amount to be funded.

(vii) The funded amounts for a facility arrived at as a result of this paragraph shall be summed, divided by total 1983 patient days and deducted as a per diem adjustment from a facility's operating per diem in the appropriate rate year.

(m) Computation of regional input price adjustment factors applied for purposes other than determining, pursuant to this section, the statewide direct and peer group indirect prices.
New York
47(a)

(1) The regional direct input price adjustment factor (RDIPAF) as contained in subparagraphs (c)(4)(iv) and (vii) of this section, the regional indirect input price adjustment factor (RIIPAF), as contained in subparagraph (d)(4)(vi) and paragraph (d)(5) of this section and the regional input price adjustment factor as contained in subparagraph (iv) of paragraph (4) of subdivision (e) of this section, hereinafter referred to as factors shall, be based on the regional average dollar per hour (RAP) calculated using the financial and statistical data required by §86-2.2 of this Subpart, reported solely for 1983 calendar year operations, adjusted as follows:

(i) RAP’s shall be adjusted for the variation in wage and fringe benefit costs for each region relative to such variation for all other regions through the use of a variable corridor.

(ii) The measurement of the region’s variation shall be accomplished by means of the statistical measure of variation, the coefficient of variation, in wage and fringe benefit costs.

(iii) The region with the smallest variation shall receive no corridor. The region with the highest variation shall receive a corridor no greater than a maximum percentage such that the average corridor for all regions in the State shall be approximately plus or minus 10 percent.

(iv) For rate years beginning on or after January 1, 1991, for those regions of the state described in Appendix 13-A, infra, whose Regional Average Dollar Per Hour (RAP), calculated using the financial and statistical data required by §86-2.2 of this Subpart reported solely for 1987 calendar year operations (1987 RAP) expressed as a percentage of the Statewide RAP for such year in greater than the percentage calculated using the same data reported for the 1983 calendar year operations, (1983 RAP), the factors shall be determined utilizing 1987 RAPs and adjusted pursuant to subparagraph (i), (ii) and (iii) of this paragraph.
(a) Notwithstanding this subparagraph if the utilization of 1987 RAPS to determine the factors would, for any facility within a region described in this subparagraph, result in less reimbursement than the continued utilization of the 1983 RAPS to determine the factors, the factors utilized for such facility shall continue to be based on 1983 calendar year data.

(v) For purposes of establishing rates of payment by governmental agencies for residential health care facilities for services provided on and after January 1, 1998, the regional direct and indirect input price adjustment factors to be applied to any such facility's rate calculation shall be based upon the utilization of either 1983, 1987 or 1993 calendar year financial and statistical data. The determination of which calendar year's data to utilize shall be based upon a methodology that ensures that the particular year chosen by each facility results in a factor that yields no less reimbursement to the facility than would result from the use of either of the other two years' data. Such methodology shall utilize the 1983 and 1987 regional direct and indirect input price adjustment factor corridor percentages in existence on January 1, 1997 as well as 1993 regional direct and indirect input price adjustment factor corridor percentage calculated in the same manner as the 1983 and 1987 direct and indirect input price adjustment factor corridor percentages in existence on January 1, 1997.

(vi) For purposes of establishing rates of payment for residential health care facilities for services provided on and after April 1, 2004, the regional direct and indirect input price adjustment factors to be applied to any such facility's rate calculation shall be based upon the utilization of either 1983, 1987, 1993 or 2001 calendar year financial and statistical data provided, however, the total amount of rate increases attributable to the utilization of 2001 calendar year data shall be no more than $47.5 million on a pro rata basis per calendar year. The determination of which calendar year's data to utilize shall be based upon a methodology that ensures that the particular year chosen by each facility results in a factor that yields no less reimbursement to the facility than would result from the use of the other three years' data. Such methodology shall utilize the 1983 and 1987 regional direct and indirect input price adjustment factor corridor percentages in existence on January 1, 1997, as well as the 1993 regional direct and indirect input price adjustment factor corridor percentage in existence on January 1, 2004, as well as a 2001 regional direct and indirect input price adjustment factor corridor percentage calculated in the same manner as the 1993 direct and indirect input price adjustment factor corridor percentage in existence of January 1, 2004.
(2) The corridor established in paragraph (1) of this subdivision shall be applied in each region as follows:

(i) The regional corridor percentage referred to in subparagraph (iii) of paragraph (1) of this subdivision, shall be applied, both negatively and positively to the RAP to arrive at an amount which when added to or subtracted from the RAP shall represent the maximum and minimum regional dollar per hour, for the region hereafter referred to as the maximum and minimum respectively.

(ii) The facility in each region with the highest facility wage and fringe benefit dollar per hour shall be assigned a facility RAP equivalent to the maximum.

(iii) The facility in each region with the lowest facility wage and fringe benefit dollar per hour shall be assigned a facility RAP equivalent to the minimum.

(iv) Facilities in a region with facility wage and fringe benefit dollars per hour between the highest and lowest facility wage and fringe benefit dollar per hour in such region shall be assigned a facility RAP on a sliding scale, based on the relatively of such facility's labor costs to the RAP and to the highest or lowest labor costs in the region, as applicable.
(n) **Long-term inpatient rehabilitation program for traumatic brain-injured residents (TBI).**

[Adjustments to the operating portion of the rates for facilities] Facilities which have been approved to operate discrete units for care of [patients] residents under the long-term inpatient rehabilitation program for [head-injured patients HI] TBI patients [established pursuant to section 416.11 of this Title] shall [be made] have separate and distinct payment rates for such units calculated pursuant to this section except as follows:

(1) In determining the facility-specific direct [adjustment] adjusted payment price per day pursuant to paragraph (c)(4) of this section for [patient] residents meeting the criteria for and residing in [the HI] a TBI unit, [separate and distinct statewide mean, base and ceiling prices shall be calculated and applied by multiplying the case mix proxy for such patients established by this subdivision times the statewide mean, base and ceiling direct case mix neutral cost per day, respectively.] the case mix index used to establish the statewide ceiling direct price per day for each patient classification group pursuant to subparagraph (iii) of paragraph (3) of subdivision (c) of this section for such residents shall be increased by an

**Supersedes TN #89-4** 
**Approval Date** July 24, 1996 
**Effective Date** April 1, 1993
increment of 1.49. In determining the case mix adjustment pursuant to paragraph (6) of subdivision (c) of this section, the case mix index used to calculate the facility specific mean price for each patient classification group shall be increased by an increment of 1.49.

(a) The increment established in paragraph (1) of this subdivision shall be audited and such increment shall be retrospectively or prospectively reduced on a proportional basis if the commissioner determines that the actual staffing reported in the facility’s cost report submitted pursuant to this Subpart is less than the staffing pattern required by the Department to operate a TBI unit. A current period audit of current expenses may result in a negative adjustment to the increment on a prospective basis. An audit of prior period expenses may result in a retrospective negative adjustment to the increment.

(2) In determining the indirect component of a facility’s rate pursuant to paragraphs (4), (5), and (6) of subdivision (d) of this section for residents meeting the criteria for and residing in a TBI unit, a facility’s indirect costs shall be compared to the peer group established pursuant to clause (a) of subparagraph (iii) of paragraph (2) of subdivision (d) of this section.

(3) The noncomparable component of such facilities’ rates shall be

determined pursuant to subdivision (f) of this section utilizing the cost report filed pursuant to section 86-2.2(e) of this [section] Subpart including approved actual costs in such cost report for personnel identified in required by section 415.36 of this title Appendix 1 of this State Plan that would be reported in the functional cost centers identified in subdivision (f) of this section.

(4) The provisions of this subdivision will expire on December 31, 1994.
New York
47d

(o) (1) [For rate year 1988,] A per diem amount of $4.00 (subject to adjustment pursuant to the provisions of paragraph (2) of this subdivision) increased to the rate year by the projection factors determined pursuant to section 86-2.12 of this Subpart, adjusted by the RDIPAF[,] determined pursuant to paragraph (5) of subdivision (c) of this section, shall be added to each facility's payment rate for each patient whose primary medical problem, as reported in section V.29 of the patient review form (PRI) as contained in subdivision (i) of section 86-2.30 of this Subpart, is dementia, as defined in paragraph (4) of this subdivision, and who is properly assessed and reported by the facility in one of the following patient categories as listed in Appendix 13-A of this Title:

- Clinically Complex A
- Behavioral A
- Reduced Physical Functioning A
- Reduced Physical Functioning B

(2) Based on the most current 1986 PRI’s filed with the Department, the number of eligible dementia patient days [in 1988,] for Medicaid patients admitted prior to December 31, 1987, is estimated to be 1,750,000. Aggregate changes in such number in excess of 5% shall be deemed to be attributable to factors other than changes in patient condition and shall result in the recalculation and proportionate, prospective reduction of the per diem amount referred to in paragraph (1) of this subdivision.

(3) Facilities to whom the additional amount is paid shall demonstrate and document positive outcomes from implementation or continuation of programs and/or operations and promulgation of policies designed to improve the care of eligible dementia patients. The additional amount shall be recouped from facilities in which positive outcomes are not demonstrated.
(4) The per diem amount referred to in paragraph (1) of this subdivision shall be paid for any patients with the following dementia diagnoses. The dementia diagnosis and related codes and descriptions are taken from the *International Classification of Diseases, 9th Revision, Clinical Modification*, volume 3 (ICD-9-CM).

(p) Acquired Immune Deficiency Syndrome (AIDS).

(1) For rate year 1988 and thereafter, payment rates shall be adjusted, pursuant to this subdivision to provide additional payments to facilities for patients residing in [designated AIDS beds and/or] a residential health care facility designated as an AIDS facility or having a discrete AIDS unit[s] approved by the commissioner pursuant to Part 710 of this Title, or a facility which has received approval by the commissioner pursuant to Part 710 of this Title to provide services to a patient whose [primary] medical [problem] condition is [Acquired Immune Deficiency Syndrome (AIDS) as defined in section 416.12, section 421.14 and section 422.1 of this Title.] HIV Infection Symptomatic. Such patients shall hereinafter be referred to as [an] AIDS patients.

(2) Separate and distinct payment rates shall be calculated pursuant to this paragraph for AIDS facilities or discrete AIDS units approved by the commissioner pursuant to Part 710 of this Title. [For residential health care facilities (RHCF), adjustments to payment rates shall be made as follows:]

(i) [In determining the] The facility specific direct adjusted price per day shall be determined pursuant to paragraphs (3) and (4) of subdivision (c) of this section and further adjusted as follows [for an AIDS patient, the statewide mean, base and ceiling prices shall be calculated and applied by multiplying the case mix proxy for such patients established by this paragraph times the statewide mean, base and ceiling direct case mix neutral cost per day respectively. The case mix proxy for an AIDS patient shall be determined as follows:

(a) An AIDS patient shall be assigned a case mix proxy based on the sum of the responses to section III – Activities of Daily Living (ADLs), questions 19, 21 and 22 of the patient review instrument (PRI) as contained in section 86-2.30(i) of this Subpart as follows:

TN #91-25 Approval Date July 11, 1994
Supersedes TN #90-10 Effective Date April 1, 1991
New York
47(i)

(a) In determining the direct component of a facility’s rate pursuant to paragraphs (3) and (4) of subdivision (c) of this section for providing care for an AIDS patient in a residential health care facility designated as an AIDS facility or having a discrete AIDS unit, the case mix index for the AIDS patient shall be increased by an increment which shall be determined on the basis of the difference between allowable actual direct staffing levels and cost expenditures for the care of AIDS patients in specific patient classification groups and those of non-AIDS patients which are classified in the same patient classification groups based on data submitted by the facility. The increment to be included in a facility’s rate shall be approved by the Commissioner, but in no event shall the increment exceed 1.0. The facility’s direct ceiling price shall be further increased by an occupancy factor of 1.089. Effective April 1, 2009, however, the operating component shall not reflect an occupancy factor increase.

(b) For purposes of this paragraph, the allowable costs for the central service supply functional cost center as listed in paragraph (1) of subdivision (c) of this section shall be considered a non-comparable cost.

ii. Except as identified in subparagraph (iii) of this paragraph, in determining the indirect component of a facility’s rate pursuant to paragraphs (4), (5), and (6) of subdivision (d) of this section for providing care for an AIDS patient in a residential health care facility designated as an AIDS facility or having a discrete AIDS unit, the peer group ceiling indirect price shall be increased by a factor of 1.20.

iii. In determining the indirect component of a facility’s rate pursuant to paragraphs (4) and (5) of subdivision (d) of this section for a facility with a total bed complement of less than 40 beds all of which are approved by the Commissioner pursuant to Part 710 of this Title solely for the care and management of AIDS patients, the peer group ceiling indirect price shall be increased by a factor of 2.00 for those facilities that are less than or equal to 16 beds and such factor shall be decreased by 0.033 for every additional bed thereafter.
New York
47(k)

-Deleted -
(3) [A cost report shall be filed in accordance with section 86-2.2 of this Subpart for
the first six month period during which a new facility which has been certified for
the purpose of providing services solely to AIDS patients has received an overall
average utilization of at least 80 percent of bed capacity. This report shall be
properly certified within 60 days.
following the end of the six month period covered by the report. Failure to comply with this subparagraph shall result in a reduction of the current rate in accordance with subdivision (c) of section 86-2.2 of this Subpart. For facilities which have received approval by the commissioner pursuant to Part 710 of this Title to provide services to a patient whose medical condition is HIV Infection Symptomatic, and the facility is not eligible for separate and distinct payment rates pursuant to paragraph (2) of this subdivision, the patient classification group case mix index for AIDS patients which is used to establish direct cost reimbursement shall be increased by an increment of 1.0.
(q) Long term ventilator dependent residents.

[Adjustments to the operating portion of rates for facilities] Facilities which have been approved to operate discrete units for the care of long-term ventilator dependent residents [as established pursuant to section 416.13 of this Title] shall [be made] have separate and distinct payment rates for such units calculated pursuant to this section except as follows:

(1) The facility specific direct adjusted price per day shall be determined as follows:

((1)) (a) In determining the facility specific direct adjusted payment price per day pursuant to paragraph (4) of subdivision (c) of this section for [patients] residents meeting the criteria [established in section 416.13 of this Title] and residing in a discrete unit for the care of long-term ventilator dependent [patients] residents, [separate and distinct statewide mean, base, and ceiling prices shall be calculated and applied by multiplying the case mix proxy for such patients established by this subdivision times the statewide mean, base, and ceiling direct case mix neutral cost per day respectively.] the case mix index used to establish the statewide ceiling direct price per day for each patient classification group pursuant to subparagraph (iii) of paragraph (3) of subdivision (c) of this section for such residents shall be increased by an increment of 1.15. In determining the case mix adjustment pursuant to paragraph (6) of subdivision (c) of this section, the case mix index used to calculate the facility specific mean price for each patient classification group shall be increased by an increment of 1.15.
(b) The increments established in subparagraph (a) of paragraph (1) of this subdivision shall be audited and such increment shall be retrospectively or prospectively reduced on a proportional basis if the commissioner determines that the actual staffing reported in the facility’s cost report submitted pursuant to this Subpart is less than the staffing pattern required by the Department to operate a ventilator-dependent unit. A current period audit of current expenses may result in a negative adjustment to the increment on a prospective basis. An audit of prior period expenses may result in a retrospective negative adjustment to this increment.

(c) The allowable costs for the central service supply functional cost center as listed in paragraph (1) of subdivision (c) of this section shall be considered a noncomparable cost reimbursed pursuant to subdivision (f) of this section.

(d) The allowable costs for prescription drugs, specifically required by generally accepted standards of professional practice for long-term ventilator dependent residents, that are administered at a frequency and volume exceeding those of prescription drugs included in the direct component of the rate pursuant to subdivision (c) of this section shall be considered a noncomparable cost pursuant to subdivision (f) of this section.

[(2) For purposes of this subdivision, the case mix proxy solely for patients residing in a discrete unit for the care of long term ventilator dependent patients shall be defined as a case mix index of 2.52.]

(2) In determining the indirect component of a facility's rate pursuant to paragraphs (4), (5), and (6) of subdivision (d) of this section for residents meeting the criteria.
and residing in a discrete unit for the care of long-term ventilator dependent residents, a facility’s indirect costs shall be compared to the per group established pursuant to clause (d)(2)(iii)(a) of this section.

(3) The noncomparable component of such facilities’ rates shall be determined pursuant to subdivision (f) of this section utilizing the cost report filed pursuant to section 86-2.2(e) of this [part] Subpart including approved actual costs in such cost report for personnel required by identified in section 415.38 of this title Appendix 2 of this State Plan that would be reported in the functional cost centers identified in subdivision (f) of this section.

(4) The provisions of this subdivision will expire on December 31, 1994.
Part I

New York
47(r)

(r) Nursing salary adjustment.

(1) The adjustment to the operating portion of the rate to reflect the costs of retaining and recruiting nursing services shall be made as follows:

(i) A percentage figure shall be determined as follows:

(a) An average annual statewide increase in registered nurses and licensed practical nurses salaries between the calendar year ending 1987 and calendar year ending 1988 shall be determined based on the available ratified nursing contracts for general hospital services and an average annual regional increase in registered nurses and licensed practical nurses salaries between the calendar year ending 1987 and calendar year 1988 shall be determined based upon available information for residential health care facilities.

(b) The average annual regional and statewide increase in salaries shall be multiplied by the total number of nursing staff in the region and the total number of nursing staff statewide respectively to arrive at the total regional and statewide adjustment to be made to facilities. The total regional adjustments shall be determined using the regions contained in Appendix 13-A herein.

(c) The adjusted base shall be determined by the multiplying the facility specific mean price per day determined pursuant to subparagraph (i) of paragraph (4) of subdivision (c) of this section by total patient days for each facility and the result shall be summed on a regional and statewide basis.

(d) The total adjustment to be made for all facilities determined pursuant to clause (b) of this subparagraph shall be divided by the adjusted base determined pursuant to clause (c) of this subparagraph on a regional and statewide basis to determine the regional percentage increase and the statewide percentage increase.
(e) The facility specific percentage shall be determined by summing 40 percent of the statewide percentage and 60 percent of the corresponding regional percentage determined pursuant to clause (d) of this subparagraph.

(ii) The adjustment to the rate for a facility shall be determined by applying the facility specific percentage figure calculated in subparagraph (i) of this paragraph to a facility's adjusted base and added to the operating portion of the rate.
Huntington’s disease
For periods on and after July 1, 2011, Medicaid rates of payments for inpatient services provided by existing residential health care facilities with more than 40 beds that operate discrete units for the treatment of residents with Huntington’s disease will be increased by a rate add-on amount. The aggregate amount of such rate add-ons for the period July 1, 2011 through December 31, 2011 will be $850,000 and for calendar year 2012 and each year thereafter will be $1,700,000. Payments will be calculated as follows:

(1) Amounts will be allocated to each eligible residential health care facility proportionally based on the number of beds in each facility’s discrete unit for treatment of Huntington’s disease relative to the total number of such beds in all such units based on the bed capacity reported in certified cost reports submitted to the Department of Health for the calendar year period two years prior to the applicable rate year.

(2) Rate add-ons will be computed utilizing reported Medicaid days from certified cost reports as submitted to the Department of Health for the calendar year period two years prior to the applicable rate year.

(3) Rate add-ons shall not be subject to subsequent adjustment or reconciliation.

(4) Payments under this section end on October 31, 2016.

Specialized programs for residents with neurodegenerative disease providing care to patients diagnosed with Huntington’s disease and Amyotrophic Lateral Sclerosis (ALS) Disease.

Effective November 1, 2016, new and existing facilities which have been approved to operate discrete specialty units specifically designated for the purpose of providing care to residents with Huntington’s disease and amyotrophic lateral sclerosis, will have rates calculated for Medicaid reimbursement separate and distinct from the general nursing home rate. Rates established in these new specialty units will be based on budgeted cost as submitted by the facility and approved by the department. Budgeted rates will be in effect until such time the specialty facility files a calendar year certified cost report reflecting such specialty unit’s first twelve months of operation at an occupancy level of 90% or more. The department will thereafter issue such facilities rates with non-capital components reflecting such cost report and such rates will be effective as of January 1 of the calendar year in which the facility reaches at least a 90% occupancy rate based on a filed cost report of that given year. The capital component will be a continuation of the budget updated for current indebtedness. Should a facility fail to reach 90% occupancy after five (5) years, the Department will review the continued need for a specialty unit in that facility.

The facility specific rate will be calculated as follows:

TN #16-0009 Approval Date January 30, 2017
Supersedes TN #11-0010 Effective Date November 1, 2016
New York
47(s)(ii)

a. The facility specific direct component of the rate will include allowable costs reported in
the following functional cost centers on the facility's annual cost report (RHCF-4) or
extracted from a hospital-based facility's annual cost report (RHCF-2) and the
institutional cost report of its related hospital, after first deducting for capital costs and
allowable items not subject to trending:

(i) nursing administration;
(ii) activities;
(iii) social services;
(iv) transportation;
(v) physical therapy;
(vi) occupational therapy;
(vii) laundry and linen;
(viii) speech and hearing therapy – (speech therapy portion only);
(ix) central service supply; and
(x) specialty unit.

Direct component costs are not subject to case mix adjustment.

b. The facility specific indirect component of the rate will include costs reported in the
following functional cost centers on the facility's annual cost report (RHCF-4) or
extracted from a hospital based facility's annual cost report (RHCF-2) and the
institutional cost report of its related hospital, after first deducting for capital costs and
allowable items not subject to trending:

(i) fiscal services;
(ii) administrative services;
(iii) plant operations and maintenance (with the exception of utilities
and real estate and occupancy taxes);
(iv) grounds;
(v) security;
(vi) laundry and linen;
(vii) housekeeping;
(viii) patient food services;
(ix) cafeteria;
(x) non-physician education;
(xi) medical education;
(xii) housing; and
(xiii) medical records

c. The facility specific noncomparable component of the rate will include allowable costs
associated with supervision of facility volunteers and costs reported in the following
functional cost centers as reported on the facility's annual cost report (RHCF-4) or
extracted from a hospital based facility's annual cost report (RHCF-2) and the
institutional cost report of its related hospital, after first deducting capital cost and
allowable items not subject to trending:

TN __16-0009____________ Approval Date__January 30, 2017_____

Nothing in this subparagraph will be understood as exempting specialty facilities which have not yet achieved 90% occupancy from the generally applicable requirement to file annual calendar year cost reports.

TN ___#16-0009____________ Approval Date___January 30, 2017_____
Supersedes TN ___NEW____________ Effective Date ___November 1, 2016____
The Commissioner of Health shall adjust medical assistance rates of payment for services provided on or after April 1, 2002, established pursuant to this section for non-public residential health care facilities for purposes of recruitment and retention of health care workers in the following aggregate amounts for the following periods:

For non-public residential health care facilities, $53.5 million on an annualized basis for the period April 1, 2002 through December 31, 2002; $83.3 million on an annualized basis for the period January 1, 2003 through December 31, 2003; $115.8 million on an annualized basis for the period January 1, 2004 through December 31, 2006; $57.9 million for the period January 1, 2007 through June 30, 2007; $57.9 million for the period July 1, 2007 through March 31, 2008; and $64.8 million for the period May 8, 2008 through March 31, 2009[, and $26.2 million for the period April 1, 2009 through March 31, 2010].

For periods through June 30, 2007, for non-public residential health care facilities, such increases shall be allocated proportionally based on each non-public residential health care facility's reported total gross salary and fringe benefit costs on exhibit H of the 1999 RHCF-4 cost report or exhibit 11 of the 1999 institutional cost report as submitted on or before November 1, 2001, where applicable, to the total of such reported costs for all non-public residential health care facilities.

For periods on and after July 1, 2007, for non-public residential health care facilities, 50% of such increases shall be allocated proportionally based on each such facility's salary and fringe benefit costs as reported on Exhibit H in the 1999 cost report submitted prior to November 1, 2001, to the total of such costs for all non-public facilities. The remaining 50% of such increases shall be allocated proportionally based on each non-public facility’s Medicaid revenue as reported in the applicable 2005 cost report submitted prior to November 1, 2006, to the total of such Medicaid revenue for all non-public facilities.

Non-public residential health care facilities in operation as of April 1, 2002, which have not submitted 1999 RHCF-4 cost reports or 1999 institutional cost reports, but which have submitted such reports for cost years subsequent to 1999, shall have such increases allocated based on total gross salary and fringe benefit costs on exhibit H of the earliest subsequently submitted RHCF-4 cost report or exhibit 11 of the earliest subsequently submitted institutional cost report, as trended downward to 1999 using authorized trend factors. These trend factors shall be developed in accordance with Page 51(a) of this Attachment and will be consistent with those used in the calculation of the facility’s reimbursement rates.
New York  
47(t)(1)

Non-public residential health care facilities in operation as of April 1, 2002, which have not submitted 1999 or subsequent RHCF-4 cost reports or institutional cost reports, shall have such increases allocated based on imputed total gross salary and fringe benefit costs reflecting the average of such 1999 actual reported costs in the region in which each facility is located. Facilities receiving allocations pursuant to this paragraph which subsequently submit RHCF-4 cost reports or institutional cost reports shall, for the purpose of setting medical assistance rates of payment, have such allocations adjusted to reflect costs which were incurred in connection with such allocations and which are contained in such cost reports.

These amounts shall be included as a reimbursable cost add-on to medical assistance fee-for-service rates of payment established pursuant to this section, based on Medicaid utilization data in each facility’s annual cost report submitted two years prior to the rate year or projected Medicaid utilization data for those facilities that have not submitted an annual cost report for the period two years prior to the rate year. Such amounts shall not be reconciled to reflect changes in medical assistance utilization between the year two years prior to the rate year and the rate year.
Criminal Background Checks

Effective April 1, 2005, residential health care facility providers must obtain a criminal history record check from the United States Attorney General for any prospective unlicensed direct care employee. This includes obtaining, as part of an application for employment, all information from a prospective employee necessary for initiating the criminal history record check, including, but not limited to, a fingerprint card of the prospective employee. The federal fee and the costs associated with obtaining the fingerprint card shall be separately identified on any report of costs submitted to the Department of Health and shall be deemed an allowable cost for Medicaid rates of payment. Reimbursement for the period April 1, 2005 through March 31, 2006 and for the period April 1, 2006 through August 31, 2006, shall be made retrospectively based upon cost reports submitted for the 2005 and 2006 rate years respectively. For new providers or existing providers for which cost report data are unavailable, payment will be based on budgeted costs and subsequently adjusted to reflect actual costs. Reimbursement for all types of providers shall total no more than $5,000,000 for the April 1, 2005 through March 31, 2006 period and no more than $13,400,000 for the April 1, 2006 through August 31, 2006 period. Reimbursement for the Medicaid share of these costs shall be in the form of an add-on to the current rates of payment and will be determined by the percent of Medicaid utilization to total utilization for each provider. If the total cost for these criminal background checks for all types of providers exceeds the amounts set forth for the specified period, provider specific reimbursement will be reduced proportionally.

Effective September 1, 2006, residential health care facilities shall request criminal history background checks from the Department of Health for unlicensed prospective employees who will provide direct care or supervision to patients, residents, or clients of such providers. The criminal history information will consist of both a state and a national criminal history check.

Residential health care facilities may claim as reimbursable costs under the medical assistance program, costs reflecting the fee established pursuant to law by the NYS Division of Criminal Justice Services for processing a state criminal history information check, the fee imposed by the Federal Bureau of Investigation for a national criminal history check, and certain other costs associated with obtaining the fingerprints. These costs shall be separately identified on any report of costs submitted to the Department of Health.

Reimbursement for the Medicaid share of these costs shall be in the form of an add-on to the current Medicaid rate of payment based on the costs reported for the period two years prior to the rate period and will be determined by the percent of Medicaid utilization to total utilization for each provider.

TN #07-36 Approval Date December 19, 2007
Supersedes TN #06-69 Effective Date July 1, 2007
New York
47(u)

(s) Adjustment of rates pursuant to methodology changes effective October 1, 1990 and April 1, 1991.

(1) Rate changes resulting from the amendments to sections 86-2.1(a), 86-2.9(c), 86-2.10(a)(3), (c)(1)-(5), (d)(1) & (2) and (p)(2) and (3) of this Title effective October 1, 1990, and amendments to sections 86-2.10(a)(3), (c)(1), (3) and (5), (d)(1), (2) and (4)-(7), (p)(1)-(3), and (b)(1) and (2) of this Title effective April 1, 1991 shall be reflected in 1990 and 1991 rates pursuant to the following schedule:

(i) For rates with effective dates commencing between October 1, 1990 to March 31, 1991 and June 30, 1992, the actual rate change shall not exceed 0 percent. The rate shall be computed using the rate methodology in effect on September 30, 1990, adjusted by the adjustment to the regional direct and indirect input price adjustment factors pursuant to subparagraph (iv) of paragraph (1) of subdivision (m) of this section.

(ii) For rates with effective dates commencing between April 1, 1991 to June 30, 1991, actual rate change shall not exceed 2 percent.

(iii) For rates with effective dates commencing between July 1, 1991 to September 30, 1991, actual rate changes shall not exceed 4 percent.

(iv) For rates with effective dates commencing on or after October 1, 1991 July 1, 1992, the full impact of the rate changes effective on October 1, 1990 cited in paragraph (1) of this subdivision shall be reflected in rates.

(iii) Those facilities with an initial budgeted rate or revised cost-based rate which reflects a change in base year and which is effective after April 1, 1991, shall receive the full impact of the methodology changes cited in paragraph (1) of this subdivision on the effective date of such rate.

(2) For facilities having multiple rates based on levels of care prior to October 1, 1990, such rates shall be combined for the establishment of rates effective October 1, 1990 to March 31, 1991 June 30, 1992 based on a weighted average of reported Medicaid days for each previous level of care for the latest available cost reporting period. Where the Department is authorized expressly by statute to adjust rates retrospectively, for both positive and negative rate adjustments, such combined rate shall be adjusted by a reconciliation of reported Medicaid days to actual billed Medicaid days for the effective period, provided that such adjustment results in a combined direct and indirect component rate change of more than 5%. Such combined rate shall reflect the amendments referenced in paragraph (1) of this subdivision pursuant to the schedule set forth therein.

(3) Notwithstanding the provisions of paragraph (1) of this subdivision, residential health care facilities which have been identified by the department as requiring registered nurse staffing increases to provide seven days a week, eight hours per day of day shift registered nurse coverage shall receive rate changes effective October 1, 1990 at a level sufficient to compensate

TN #91-25 Approval Date July 11, 1994
Supersedes TN #90-10 Effective Date April 1, 1991
facilities for additional expenses of expanding registered nurse coverage based upon a survey of costs to be incurred by affected facilities.

(4) Nothing within this subdivision shall preclude the Department from fully implementing rate adjustments on or after October 1, 1990, which are unrelated to methodology changes referenced in paragraph (1) of this subdivision.

(t) **Base Year Adjustment for Facilities Who have Bed Conversions.**

* A facility shall be eligible for an adjustment to its base year costs if its proportion of beds identified as skilled nursing facility beds and health related facility beds as of the first day of its base period differs from the proportion of beds identified as skilled nursing facility beds and health related facility beds as of September 30, 1990. The adjustment shall be separately determined for the direct, indirect, and non-comparable components of a facility's allowable base period costs, and each adjustment shall be added to a facility's allowable direct, indirect and non-comparable costs, respectively, prior to group comparisons. The amount of the adjustment shall be determined as follows:

(1) Base period direct, indirect, and non-comparable costs per bed adjusted for occupancy level shall be separately calculated for both skilled nursing and health related facility beds. The changes in skilled nursing and health related facility beds for the period defined in the above paragraph shall be multiplied by the applicable cost per bed and added together to arrive at each adjustment amount.

(2) An adjustment to allowable days shall also be made for a facility whose total number of beds has changed for the period described in this subdivision to reflect the skilled nursing facility and health related facility occupancy levels used in the calculation of rates effective September 30, 1990. Base period days shall be adjusted by the proportion of total new beds as of September 30, 1990 to total base year beds prior to the determination of the

* for rates effective July 1, 1992

Supersedes TN #90-10  Effective Date  April 1, 1991
facility-specific price per day for the facility's direct, indirect, and non-comparable cost components.

(u) Adjustment for Additional Federal Requirements.

A facility whose rate is based on allowable or budgeted costs for a period prior to April 1, 1991 shall be considered eligible to receive a per diem adjustment to its rate as follows:

(1) A per diem adjustment shall be incorporated into each facility's rate to take into account the additional reasonable costs incurred by facilities in complying with the requirements of subsection (b), (other than paragraph 3(F) thereof), (c), and (d) of section 1919 of the federal Social Security Act effective October 1, 1990 as added by the federal Omnibus Budget Reconciliation Act of 1987 (OBRA 1987). Additional reasonable costs resulting from such federal requirements shall include additional reasonable costs in the following areas: the completion of resident assessments, the development and review of comprehensive care plans for residents, staff training for the new resident assessment tool, quality assurance committee costs, nurse aide registry costs, psychotropic drug reviews, and surety bond requirements.

(i) The per diem adjustment shall be forty-five cents computed on a statewide basis and shall be regionally adjusted to reflect differences in registered nurse salary levels for calendar year 1987. Any costs over the per diem adjustment shall be deemed attributable to factors other than compliance with the federal requirements referenced in this subdivision.
(ii) For purposes of inclusion in facility rates for 1991, the annual incremental per
diem add-on shall be effective for the nine month period beginning April 1,
1991 and further adjusted so that the nine months of incremental cost are
reflected in a per diem adjustment for July 1, 1991 through December 31,
1991 rates.

(2) For rates years beginning on or after January 1, 1992, the annual incremental per
diem add-on calculated pursuant to subparagraph (i) of paragraph (1) shall be
trended forward by the applicable facility trend factor. ¹

¹ Trend factors are computed in accordance with Section 86-2.12 of this Plan.
Description of the Specific Methodology Used in Determining the Adjustment.

In order to determine the impact of the federal law on New York facilities, a cost estimate was made for each added code requirement. The total average additional cost was determined to be 45 cents per patient day.

Resident Assessments

Since New York State facilities were required prior to the new federal code to conduct accurate and comprehensive assessments, the additional cost pertains to completion of the MDS+\(^2\) document and RN coordination and certification of completeness. No discipline other than RN is required, although facilities may choose to assign portions of the MDS+ to various disciplines as appropriate. Physician responsibilities remain the same prior to the new code.

Comprehensive assessments include those performed on initial admission, annually, and upon significant change in resident status. It is estimated that there will be 1.48 comprehensive assessments per bed in 1991. This was based on an estimated significant change rate of 50% of the beds per year, and a 45% turnover rate per year. One twelfth of the annual assessments will be completed each month. Similarly, one twelfth of the assessments necessitated by the 45% turnover rate and the 50% significant change rate will also be completed each month. Half of the time, either of the latter two assessments will occur before the scheduled annual assessments of the resident in that bed, and the scheduled annual assessment will therefore not be necessary for that resident. The number of scheduled annual assessments not necessary under this methodology equals half of the new admit assessments and residents with a significant change, or \((.5)(.45) + (.5) = .48\). The total number of assessments per bed would be \(1.48 = 1.48\).

---

\(^2\) MDS+ (Minimum Date Set Plus for Nursing Home Residents Assessment and Care Screening)
New York
47(w)(3)

Based on a time study of the MDS\(^3\), it was estimated that each comprehensive assessment would require one hour and forty five minutes, or forty five minutes longer than current practice. An average RN hourly salary rate of $24.00 as reported by industry representatives was used to make this calculation. The total cost was estimated as follows:

\[
(\text{# assessments/bed}) \times (\text{# beds}) \times (\text{incremental time/assessment})
\]

\[
(1.48) \times (105,000) \times (.75) \times ($24) = $2,797,200 \text{ for comprehensive assessments}
\]

Quarterly resident assessment reviews are estimated to be 2.2 per bed per year, at 30 minutes per assessment, with the remaining assumptions the same as for comprehensive assessments.

\[
(2.2) \times (105,000) \times (.5) \times ($24) = $2,772,000 \text{ for quarterly assessments}
\]

\(^3\) MDS (Minimum Data Set)
Comprehensive Care Plan

The incremental cost of comprehensive care plans for all residents was estimated by determining the added time of each participating discipline and multiplying by the average salary rate for that discipline. Physician participation in the care planning process has been a standard of practice in this State, and no additional time should be necessary under the new code. Based on an analysis of 1990 Patient Review Instrument (PRI) data, physical therapy (provided by a licensed physical therapist) was received by 21% of residents, and 9% received occupational therapy. Based on the new code requirements, it is estimated that twice this number or 42% PT and 18% OT, will require additional care planning participation by these therapists. For those residents requiring PT/OT services an additional half hour of PT/OT time will now be required. At an industry estimated hourly rate of $31.50 for physical therapists and $30.00 for occupational therapists, the added cost would be $15.74 for PT and $15.00 for OT for care plans for patients receiving therapy. The nursing home industry estimated that RN, social worker, dietician, and activities worker care planning time for 100 of care plans would each increase by .5 hour. The hourly rates provided by the industry for RNs were $24.00, for social workers $15.40, for dieticians $21.00, for activities workers $10.00. Based on 1.48 care plans per bed (using the number of comprehensive assessments per year), the calculation as follows:

\[
(\text{# plans/bed})(\text{#beds for all residents})(\text{incremental time for each discipline} \times \text{hourly rate} \times \text{percent of care plans involving discipline}) = \text{statewide cost}
\]

\[
(1.48)(105,000)((.5 \times $24 \times 100\%) + (.5 \times $15.40 \times 100\%) + (.5 \times $21.00 \times 100\%) + (.5 \times $10.00 \times 100\%) + (.5 \times $31.50 \times 42\%) + (.5 \times $30.00 \times 18\%) = $6,917,631
\]
Quarterly Plan Reviews

Only an RN is involved in the incremental activities required by OBRA. The industry's estimate of 2.2 quarterly care plans per year at an incremental cost of $6.00 per review was used:

\[
\text{statewide cost} = \text{(# care plans/bed)} \times \text{(# beds)} \times \text{(incremental cost/plan)}
\]

\[
(2.2) \times (105,000) \times ($6.00) = $1,386,000
\]

Training on MDS+4 Assessment

An estimate of 70,020 was used, based on the industry's estimate which was found acceptable.

Cost of training for up to 80 beds $229,950
80 bed increments $140,070
$370,020

---

4 MDS+ (Minimum Data Set Plus For Nursing Home Residents Assessment and Care Screening)

TN #97-03 Approval Date June 30, 1997
Supersedes TN NEW Effective Date October 1, 1997
Quality Assurance

The meeting and preparation time for quarterly Quality Assurance meetings, including committee members of a physician, director of nursing, administrator or designee and three other staff was estimated by the industry. This was offset by the elimination of separate pharmacy reviews and infection control meetings, as well as the existing utilization review assessment and U/R committee meetings. Three added staff involved in meetings are assumed to be the physical therapist, social services director and a representative from medical records. The net added expense estimated by the industry was $600,264.

Recertification of Nurse Aides

The number of aides who must be recertified by 1/92 is 17,381. The cost of recertification is $25.00 per aide. The total recertification cost is $434,525.

Psychotropic Drug Reviews

The code requires that all residents receiving psychotropic medications be reviewed with the intent of minimizing the usage of such drugs. These reviews are assumed to involve the physician and take about .5 hours per resident. It is estimated that 20% of residents will need such review at physician cost of $150 per hour.

\[105,000 \times 20\% \times 0.5 \times 150 = 1,575,000\]

June 30, 1997

TN #97-03 Approval Date June 30, 1997
Supersedes TN NEW Effective Date October 1, 1997
New York
47(w)(7)

Surety Bonds

The industry has estimated that $189,000 of added cost will be incurred for this requirement and was found acceptable.

SUMMARY OF INCREMENTAL CODE COSTS TO BE REIMBURSED

Total incremental federal code cost to be recognized in facility 1991 rates is $17,041,640.

\(^{5}\) MDS+ (Minimum Data Set Plans for Nursing Home Residents Assessment and Care Screening)

Attachment 4.19-D
Part I

June 30, 1997
October 1, 1997
New York
47(w)(8)

Costs are to be reflected in facility rates beginning July 1, 1991, so that the nine months of incremental cost from April 1, 1991 to December 1991 will be reflected in the six month rate period July to December 1991. Total incremental costs were converted to a per diem add-on to be included in a facility’s rate by dividing total incremental costs by available beds, and adjusting to days by dividing by 365. The calculation is as follows:

\[
\frac{17,041,640}{105,000} / \frac{365}{365} = .45 \text{ add-on}
\]

This statewide add-on will be adjusted for each facility to reflect regional differences in RN salary levels for calendar year 1987. Such regional adjustments are currently used in the determination of the direct and indirect components of facility rates. For 1992 and forward, the incremental cost add-on will be increased by the appropriate trend factor.⁶

---

⁶ Trend factors are computed in accordance with Section 86-2.12 of this Plan.
New York
47(w)(9)

Description of Methodologies for the Physical, Mental, and Psychosocial Well Being Requirement

The State of New York reimbursement rates match payment with intensity of care, thus providing facilities with adequate reimbursement for patients requiring more intensive supportive, medical or rehabilitative care. The RUG II patient classification system classifies each patient into one of sixteen patient categories which are each different in terms of clinical characteristics and are statistically different in terms of costs of care.

The system uses a hierarchy of patient types and secondary subgroup format based on Activities of Daily Living (ADL) function levels. The five hierarchical groups, from the highest to lowest resource consumption, are as follows:

1. Special Care
2. Rehabilitation
3. Clinically Complex
4. Severe Behavioral Problems
5. Reduced Physical Functions
New York
47(w)(10)

Each of the above clinical groups is further divided by the ADL index score into subgroups. The ADL index is comprised of three ADL variables, eating, toileting, and transfer, which were determined to be the key predictors of resource consumption within each clinical group. For each of the sixteen patient classification categories, a relative resource “weight” representing the resource consumption of patients in that category relative to the average patient, is used to adjust the direct component of the payment rate.

The RUGS system thus allows a more precise and equitable means of directing available fiscal resources to nursing homes that care for residents with the heaviest care needs. By recognizing the resources required to provide more intensive rehabilitative and support services, the reimbursement methodology encourages nursing homes to establish restorative care programs. This can result in more active intervention for eligible patients, and earlier improvement and discharge.

October 1, 1992

For rates effective January 1, 1992 and thereafter, the per diem add-on described herein will be increased by a trend factor as defined in Section 86-2.12 of this Plan.
Description of the specific methodology for determining the adjustment Bloodborne Pathogens

**Hepatitis B Vaccination:**

Beginning January 1, 1993 and thereafter, provider rates contain a facility specific adjustment to reimburse the cost of the Hepatitis B vaccine administered to employees. Provider-specific adjustments are based upon each facility’s actual costs recognized up to a maximum cost for the vaccine. The facility specific adjustment will be determined using costs reported by the providers two years prior to the state of the rate year. The maximum cost for the vaccine that is recognized when setting the facility specific adjustment is $128.50 for a three vial series per employee.

**Gloves:**

For rates effective on April 1, 1994 for the 1994 calendar year and each calendar year thereafter, and $.18 per diem adjustment will be included in provider’s rates for the incremental cost of gloves.
New York
47(x)(1)

(v) Extended care of residents with traumatic brain injury.

(1) (i) Except as provided in subparagraph (ii) of this paragraph, effective April 1, 1993, a per diem amount of $25, adjusted by the RDIPAF determined pursuant to paragraph (5) of subdivision (c) of this section, and increased in rate years thereafter, by the projection factors determined pursuant to section 86-2.12 shall be added to a facility’s payment rate determined pursuant to this Subpart for each resident with traumatic brain injury identified as requiring extended care and receiving services pursuant to section of this Title.

(ii) Effective with rates revised based upon patient review instrument (PRI) assessment data for an assessment period set forth in Section 86-2.11(b) of this Subpart beginning on or after November 1, 1994, a TBI patient per diem amount shall be added to a facility’s average Medicaid payment rate determined pursuant to this Subpart only for Medicaid residents with traumatic brain injury identified as requiring extended care which shall mean a person who is at least three months post-injury and who has been diagnosed as having a cognitive and/or physical condition that has resulted from traumatically acquired, non-degenerative, structural brain damage, or anoxia, and who in addition has participated in an intensive inpatient rehabilitation program for persons with TBI in a hospital or nursing home and has been assessed by a neurologist or physiatrist who determined that the individual would no longer benefit from an intensive rehabilitation program. The TBI patient per diem amount shall be determined as follows: The total number of Medicaid traumatic brain injury (TBI) extended care residents shall be multiplied by $25 per patient day times by 365 days to determine the annual TBI amount. The annual TBI amount shall then be adjusted by the facility RPIDAF, determined pursuant to subdivision (c)(5) of this section, to establish the allowable TBI dollars. The allowable TBI dollars shall be divided by the facility total annual Medicaid days to determine the facility TBI patient per diem amount. The TBI patient per diem amount shall be increased annually by the projection factor determined pursuant to section 86-2.12 of this Subpart. For purposes of this subdivision, a Medicaid resident is defined as a resident whose primary payor description is coded as Medicaid on the PRI assessment data.

(2) Residents reimbursed pursuant to this subdivision shall not be reimbursed pursuant to subdivision (n) and (o) of this section.
New York
47(x)(2)

Rates of payment for non-state operated public residential health care facilities shall be increased in an aggregate amount of $100 million for payments for services provided during the period July 1, 1995 through March 31, 1996. To be eligible, the facility must be operating at the time the pool is distributed. Payment to each eligible facility shall be in proportion to the facility's 1994 Medicaid days relative to the sum of 1994 Medicaid days for all eligible facilities.

TN #95-24-A
Supersedes TN NEW
Approval Date March 27, 1997
Effective Date July 1, 1995
New York  
47(x)(2)(a)

For the period August 1, 1996 through March 31, 1997, proportionate share payments in the aggregate amount of $257 million shall be made under the medical assistance program to non-state operated public residential health care facilities, excluding public residential health care facilities operated by a town or city within a county. Payments shall be made as a lump sum payment to each eligible residential health care facility.

The amount allocated to each eligible public residential health care facility shall be calculated as the result of $257 million multiplied by the ratio of 1994 facility Medicaid patient days for all eligible public residential health care facilities. The payments are made contingent upon receipt of all approvals required by federal law or regulation.
For the period April 1, 1997 through March 31, 1999, proportionate share payments in an annual aggregate amount of $631.1 million will be made under the medical assistance program to non-state public operated residential health care facilities, excluding public residential health care facilities operated by a town or city within a county. For the period April 1, 1999 through March 31, 2000, proportionate share payments in an annual aggregate amount of $982 million will be made under the medical assistance program to non-state operated public residential health care facilities, excluding public residential health care facilities operated by a town or city within a county. For annual state fiscal year periods commencing April 1, 2000 and ending March 31, 2005, and April 1, 2005, through March 31, 2009, proportionate share payments in an annual aggregate amount of up to $991.5 million and $150.0 million, respectively, for state fiscal year April 1, 2009 through March 31, 2010, $167 million, and for state fiscal years commencing April 1, 2010 through March 31, 2011, $189 million in an annual aggregate amount, and for the period April 1, 2011 through March 31, 2012 an aggregate amount of $172.5 million and for state fiscal years commencing April 1, 2012 through March 31, 2013, an aggregate amount of $293,147,494, and for the period April 1, 2013 through March 31, 2014, $246,522,355, and for the period April 1, 2014 through March 31, 2015, $305,254,832, and for the period April 1, 2015 through March 31, 2016, $255,208,911, for the period April 1, 2016 through March 31, 2017, $198,758,133 in an annual aggregate amount, and for the period April 1, 2017 through March 31, 2018, the aggregate amount of $167,600,071, will be paid semi-annually in September and March, and for the period April 1, 2018 through March 31, 2019, the aggregate amount of $225,104,113, will be paid semi-annually in September and March, and for the period April 1, 2019 through March 31, 2020, the aggregate amount of $196,055,358 will be paid semi-annually in September and March, which will be made under the medical assistance program to non-state operated public residential health care facilities, including public residential health care facilities located in the counties of Erie, Nassau and Westchester, but excluding public residential health care facilities operated by a town or city within a county.

The amount allocated to each eligible public residential health care facility for the period April 1, 1997 through March 31, 1998 will be calculated as the result of $631.1 million multiplied by the ratio of their 1995 Medicaid days relative to the sum of 1995 Medicaid days for all eligible public residential health care facilities. The amount allocated to each eligible public residential health care facility for the period April 1, 1998 through March 31, 1999 will be calculated as the result of $631.1 million multiplied by the ratio of their 1996 Medicaid days relative to the sum of 1996 Medicaid days for all eligible public residential health care facilities. The amount allocated to each public residential health care facility for annual state fiscal year periods commencing April 1, 2000 and ending March 31, 2005, and for annual state fiscal years commencing April 1, 2009 through March 31, 2010; April 1, 2011 through March 31, 2012; April 1, 2012 through March 31, 2013; April 1, 2013 through March 31, 2014; and April 1, 2014 through March 31, 2015; April 1, 2015 through March 31, 2016; April 1, 2016 through March 31, 2017; April 1, 2017 through March 31, 2018; and April 1, 2018 through March 31, 2019; and April 1, 2019 through March 31, 2020 will be calculated as the result of the respective annual aggregate amount multiplied by the ratio of their Medicaid days relative to the sum of Medicaid days for all eligible public residential health care facilities for the calendar year period two years prior provided, however, that an additional amount of $26,531,995 for the April 1, 2013 through March 2014 period will be distributed to those public residential health care facilities in the list which follows.
The $26,531,995 will be distributed to the following facilities in the following amounts:

Payments shall be made as a lump sum payment to each eligible residential health care facility.
New York 47(x)(3)

prospectively reduced on a proportional basis if the commissioner determines that the actual staffing reported in the facilities cost report submitted pursuant to this Subpart is less than the staffing pattern required by identified in section 415.39 of this title Appendix 3 of this State Plan.

(2) In determining the indirect component of a facility’s rate pursuant to paragraphs (d) (4)-(6) of this section for residents meeting the criteria established in section 415.39 of this Title and residing in a discrete unit specifically designated for the purpose of providing specialized programs for residents requiring behavioral interventions, a facility’s indirect costs shall be compared to the peer group established pursuant to clause (d)(2)(iii)(a) of this section.

(3) The non-comparable component of such facilities’ rates shall be determined pursuant to subdivision (f) of this section utilizing the cost report filed pursuant to section 86-2.2(e) of this Subpart including approved actual cost in such cost report for personnel that would be reported in the functional cost centers identified in subdivision (f) of this section.

[(4) The provision of this subdivision will expire on December 31, 1994.]}
Residential health care facility rates of payment for services provided on or after July 1, 1995 through March 31, 1996 shall be reduced by the Commissioner to reflect the elimination of operational requirements previously mandated by law or regulation or the Commissioner or other governmental agency, by a factor determined as follows:

(i) an aggregate reduction shall be calculated for each residential health care facility as the result of (a) up to fifty-six million dollars on an annualized basis for 1995, trended to the rate year by the trend factor for projection of reimbursable costs to the rate year, multiplied by (b) the ratio of patient days for patients eligible for payments made by government agencies provided in a base year two years prior to the rate years by a residential health care facility, divided by the total of such patient days summed for all residential health care facilities; and

(ii) the result for each residential health care facility shall be divided by such patient days for patients eligible for payment made by governmental agencies provided in the residential health care facility, for a per diem reduction in rates of payment for such residential health care facility for patients eligible for payments made by governmental agencies.

(iii) Effective April 1, 1996 through March 31, 1999 and on or after July 1, 1999 through [March] December 31, 2006 residential health care facility rates of payment shall be reduced by an annual aggregate amount of fifty-six million dollars to encourage improved productivity and efficiency. Actual reduction in rates within such aggregate amounts will be allocated among facilities based upon each facility's ratio of Medicaid utilization to total statewide Medicaid utilization for all residential health care facilities.
New York
47(x)(5)

(w) Specialized programs for residents requiring behavioral interventions.

Facilities which have been approved to operate discrete units specifically designed for the purpose of providing specialized programs for residents requiring behavioral interventions as established pursuant to section 415.39 of this Title shall have separate and distinct payment rates calculated pursuant to this section except as follows:

(1) In determining the facility specific direct adjusted payment price per day pursuant to paragraph (c)(4) of this section for residents meeting the criteria established in section 415.39 of this Title and residing in a discrete unit specifically designated for the purpose of providing specialized programs for residents requiring behavioral interventions, the case mix index used to establish the statewide ceiling price per day for each patient classification group pursuant to subparagraph (c)(3)(iii) of this section for such residents shall be increased by an increment of 1.40. In determining the case mix adjustment pursuant to paragraph (c)(6) of this section, the case mix index used to calculate the facility specific mean price for each patient classification group shall be increased by an increment of 1.40.

(i) Specific interventions that the Department has approved which qualify for payment are a combination of medical and behavioral interventions such as counseling, recreation and exercise carried out in a therapeutic environment and provided on-site.

Nursing resident criteria to be used in determining eligibility for payment include assessment of whether the resident is a danger to self or others and displays violent or aggressive behaviors which are typically exhibited as physical or verbal aggression such as clear threats of violence. The behavior may be unpredictable, recurrent for no apparent reason, and typically exhibited as assaultive, combative, disruptive or socially inappropriate behavior such as sexual molestation or fire setting.

(ii) The increment established in paragraph (1) of this subdivision shall be audited and such increment shall be retrospectively or
New York
47(x)(6)

prospectively reduced on a proportional basis if the commissioner determines that the actual staffing reported in the facility's cost report submitted pursuant to this Subpart is less than the staffing pattern required below.

A current period audit of current period expenses will result in an incremental adjustment implemented on a prospective basis. An audit of prior period expenses will result in a retrospective adjustment in a lump sum payment. The staffing pattern required by the department is as follows:

(a) The unit shall be managed by a program coordinator;

(b) A physician shall be responsible for medical director and oversight of the program;

(c) A qualified specialist in psychiatry, a psychologist and a social worker shall be available on staff on a consulting basis;

(d) Other than the program coordinator, there shall be at least one registered professional nurse on each shift.

(2) In determining the indirect component of a facility's rate pursuant to paragraphs (d)(4) - (6) of this section for residents meeting the criteria established in section 415.39 of this Title and residing in a discrete unit specifically designated for the purpose of providing specialized programs for residents requiring behavioral interventions, a facility's indirect costs shall be compared to the peer group established pursuant to clause (d)(2)(iii)(a) of this section.

(3) The noncomparable component of such facilities' rates shall be determined pursuant to subdivision (f) of this section utilizing the cost report filed pursuant to section 86-2.2(e) of this Subpart including approved actual cost in such cost report for personnel required by section 415.39 of this Title that would be reported in the functional cost centers identified in subdivision (f) of this section.

(4) The provision of this subdivision will expire on December 31, 1994.
Medicare Utilization.

(1) (a) Prior to February 1, 1996 the commissioner of health shall calculate the result of the statewide total of residential health care facility days of care provided to Medicare beneficiaries, divided by the sum of such days of care plus days of care provided to residents eligible for payments pursuant to title 11 of article 5 of the social services law, expressed as a percentage, for the period commencing July 1, 1995 to the last date for which such data is available and reasonably accurate. This value shall be called the 1995 statewide target percentage.

(b) Prior to February 1, 1997, the commissioner of health shall calculate the result of the statewide total of residential health care facility days of care provided to beneficiaries of title XVIII of the federal social security act (Medicare), divided by the sum of such days of care plus days of care provided to residents eligible for payments pursuant to title 11 of article 5 of the social services law, expressed as a percentage, for the period commencing January 1, 1996 through November 30, 1996 based on such data for such period as is available and reasonably accurate. This value shall be called the 1996 statewide target percentage.

(c) Prior to February 1, 1998, the commissioner of health shall calculate the result of the statewide total of residential health care facility days of care provided to beneficiaries of title XVIII of the federal
New York
47(x)(8)

social security act (Medicare), divided by the sum of such days of care plus days of care provided to residents eligible for payments pursuant to title 11 of article 5 of the social services law minus the number of days provided to residents receiving hospice care, expressed as a percentage, for the period commencing January 1, 1997 through November 30, 1997 based on such data as is available and reasonably accurate. This value shall be called the 1997 statewide target percentage.

(d) Prior to February 1, 1999, the commissioner of health shall calculate the result of the statewide total of residential health care facility days of care provided to beneficiaries of Title XVIII of the federal social security act (Medicare), divided by the sum of such days of care plus days of care provided to residents eligible for payments pursuant to title 11 of article 5 of the social services law minus the number of days provided to residents receiving hospice care, expressed as a percentage, for the period commencing January 1, 1988 through November 30, 1998 based on such data as is available and reasonably accurate for such period. This value shall be called the 1998 target percentage.

(e) Prior to February 1, 2000 the commissioner of health shall calculate the result of the statewide total of residential health care
facility days of care provided to beneficiaries of Title XVIII of the Social Security Act (Medicare), divided by the sum of such days of care plus days of care provided to residents eligible for payments pursuant to Title 11 of Article 5 of the Social Services Law minus the number of days provided to residents receiving hospice care, expressed as a percentage, for the period commencing January 1, 1999 through November 30, 1999, based on such data for such period. This value [shall] will be called the 1999 statewide target percentage.

(2) Prior to February 1, 1996, the Commissioner of Health will calculate the results of the statewide total of health care facility
days of care provided to Medicare beneficiaries, divided by the sum of days of care plus days of care provided to residents eligible for payments pursuant to title 11 of article 5 of the social services law, expressed as a percentage, for the period April 1, 1994 through March 31, 1995. This value shall be called the statewide base percentage.

(3) (a) If the 1995 statewide target percentage is not at least one percentage point higher than the statewide base percentage, the commissioner of health shall determine the percentage by which the 1995 statewide target percentage is not at least one percentage point higher than the statewide base percentage. The percentage calculated pursuant to this paragraph shall be called the 1995 statewide reduction percentage. If the statewide target percentage is at least one percentage point higher than the statewide base percentage, the statewide reduction percentage shall be zero.

(b) If the 1996 statewide target percentage is not at least two percentage points higher than the statewide base percentage, the commissioner of health shall determine the percentage by which the 1996 statewide target percentage is not at least two percentage points higher than the statewide base percentage. The percentage calculated pursuant to this subdivision shall be called the 1996 statewide reduction percentage. If the
1996 statewide target percentage is at least two percentage points higher than the statewide base percentage, the 1996 statewide reduction percentage will be zero.

(d) If the 1999 statewide target percentage is not at least two and one-quarter percentage points higher than the statewide base percentage, the Commissioner of Health will determine the percentage by which the 1999 statewide target percentage is not at least two and one-quarter percentage points higher than the statewide base percentage. The percentage calculated pursuant to this paragraph will be called the 1999 statewide reduction percentage. If the 1999 statewide target percentage is at least two and one-quarter percentage points higher than the statewide base percentage, the 1999 statewide reduction percentage will be zero.
(4)  (a) The 1995 statewide reduction percentage will be multiplied by $34 million to
determine the 1995 statewide aggregate reduction amount. If the 1995 statewide
reduction percentage will be zero, there will be no reduction amount.

(b) The 1996 statewide reduction percentage will be multiplied by $68 million to
determine the 1996 statewide aggregate reduction amount. If the 1996 statewide
reduction percentage will be zero, there will be no reduction amount.

(c) The 1997 statewide reduction percentage will be multiplied by $102 million to
determine the 1997 statewide aggregate reduction amount. If the 1997 statewide
reduction percentage will be zero, there will be no 1997 reduction amount.

statewide reduction percentage will be multiplied by $102 million respectively to
thereafter, statewide reduction percentage will be zero respectively, there will be no
statewide reduction amount.
(e) The 1999 statewide reduction percentage will be multiplied by $76.5 million to determine the 1999 statewide aggregate reduction amount. If the 1999 statewide reduction percentage will be zero, there will be no 1999 reduction amount.

(5) (a) The 1995 statewide aggregate reduction amount will be allocated by the Commissioner of Health among residential health care facilities that are eligible to provide services to Medicare beneficiaries and residents eligible for payments pursuant to Title 11 of Article 5 of the Social Services Law on the basis of the extent of each facility's failure to achieve a one percentage point increase in the 1995 target percentage compared to the base percentage, calculated on a facility specific basis for this purpose, compared to the statewide total of the extent of each facility's failure to achieve a one percentage point increase in the 1995 target percentage compared to the base percentage. This amount will be called the 1995 facility specific reduction amount.

(6) The facility specific reduction amounts will be due to
New York
47(x)(15)

the state from each residential health care facility and may be recouped by the state in a lump sum amount from payments due to the residential health care facility pursuant to title 11 of article 5 of the social services law.

(7) Residential health care facilities shall submit such utilization data and information as the commissioner of health may require for purposes of this section. The commissioner of health may use utilization data available from third party payers.

(8) (a) On or about June 1, 1996, the commissioner of health shall calculate for the period July 1, 1995 through March 31, 1996 statewide target percentage, statewide aggregate reduction amount, and a facility specific reduction amount in accordance with the methodology provided in paragraphs 1(a), 3(a), 4(a) and 5(a) of this provision. The facility specific reduction amount calculated in accordance with this paragraph shall be compared to the 1995 facility specific reduction amount calculated in accordance with paragraph 5(a) of this provision. Any amount in excess of the amount determined in accordance with paragraph 5(a) of this provision shall be due to the state from each residential health care facility and may be recouped in the same manner as specified in paragraph 6 of this provision.

If
the amount is less than the amount determined in accordance with paragraph 5(a) of this provision, the difference shall be refunded to the residential health care facility by the state no later than July 15, 1996. Residential health care facilities shall submit utilization data for the period July 1, 1995 through March 31, 1996 to the commissioner of health by April 15, 1996.

(b) On or about June 1, 1997, the commissioner of health shall calculate for the period January 1, 1996 through November 30, 1996 a statewide target percentage, a statewide reduction percentage, a statewide aggregate reduction amount, and a facility specific reduction amount in accordance with the methodology provided in paragraph 1(b), 3(b), 4(b) and 5(b) of this provision. The facility specific reduction amount calculated in accordance with this paragraph shall be compared to the 1996 facility specific reduction amount calculated in accordance with paragraph 5(b) of this provision. Any amount in excess of the amount determined in accordance with paragraph 5(b) of this provision shall be due to the state from each residential health care facility and may be recouped in the same manner as specified in paragraph 6 of this provision. If the amount is less than the amount determined in accordance with paragraph 5(b) of this provision, the difference shall be refunded to the residential health care facility by the state no later than
New York
47(x)(17)

New York
47(y)

Description of the Specific Methodology Used in Determining the Adjustment

In order to determine the impact of the federal law on New York facilities, a cost estimate was made for each added code requirement. The total average additional cost was determined to be 45 cents per patient day.

Resident Assessments

Since New York State facilities were required prior to the new federal code to conduct accurate and compressive assessments, the additional cost pertains to completion of the MDS+ document and RN coordination and certification of completeness. No discipline other than RN is required, although facilities may choose to assign portions of the MDS+ to various disciplines as appropriate. Physician responsibilities remain the same as prior to the new code.

Comprehensive assessments include those performed on initial admission, annually, and upon significant change in resident status. It is estimated that there will be 1.48 comprehensive assessments per bed in 1991. This was based on an estimated significant change rate of 50% of the beds per year, and a 45% turnover rate per year. One twelfth of the annual assessments will be completed each month. Similarly, one twelfth of the assessments necessitated by the 45% turnover rate and the 50% significant change rate will also be completed each month. Half of the time, either of the latter two assessments will occur before the scheduled annual assessment of the resident in that bed, and the scheduled annual assessment will therefore not be necessary for that resident. The number of scheduled annual assessments not necessary under this methodology equals half of the new admit assessments and residents with a significant change, or (.5) ((.45) + (.5)) - .48. The total number of assessments per bed would be 1 + .48 = 1.48.

\[ \text{\textsuperscript{2}MDS+ (Minimum Data Set Plus for Nursing Home Residents Assessment and Care Screening}} \]
New York
47(z)

Based on a time study of the MDS\(^3\), it was estimated that each comprehensive assessment would require one hour and forty five minutes, or forty five minutes longer than current practice. An average RN hourly salary rate of $24.00 as reported by industry representatives was used to make this calculation. The total cost was estimated as follows:

\[(\text{# assessments/bed}) \times (\text{# beds}) \times (\text{incremental time/assessment}) = \]$2,797,200 for comprehensive assessments

Quarterly resident assessment reviews are estimated to be 2.2 per bed per year, at 30 minutes per assessment, with the remaining assumptions the same as for comprehensive assessments.

\[(2.2) \times (105,000) \times (.5) \times ($24) = \]$2,772,000 for quarterly assessments

\(^3\text{MDS (Minimum Data Set)}\)
Comprehensive Care Plan

The incremental cost of comprehensive care plans for all residents was estimated by determining the added time of each participating discipline and multiplying by the average salary rate for that discipline. Physician participation in the care planning process has been a standard of practice in this State, and no additional time should be necessary under the new code. Based on an analysis of 1990 Patient Review Instrument (PRI) data, physical therapy (provided by a licensed physical therapist) was received by 21% of residents, and 9% received Occupational Therapy. Based on the new code requirements, it is estimated that twice this number, or 42% PT and 18% OT, will require additional care planning participation by these therapists. For those residents requiring PT/OT services, an additional half hour of PT/OT time will now be required. At an industry estimated hourly rate of $31.50 for physical therapists and $30.00 for occupational therapists, the added cost would be $15.74 for PT and $15.00 for OT for care plans for patients receiving therapy. The nursing home industry estimated that RN, social worker, dietician, and activates worker care planning time for 100% of care plans would each increase by .5 hour. The hourly rates provided by the industry for RNs were $24.00, for social workers $15.40, for dieticians $21.00, for activates workers $10.00. Based on 1.48 care plans per bed (using the number of comprehensive assessments per year), the calculation is as follows:

\[
(\text{#plans/bed}) \times (\text{# beds for all residents}) \times (\text{incremental time for EACH discipline} \times \text{hourly rate} \times \text{percent of care plans involving discipline}) = \text{statewide cost}
\]

\[
(1.48) \times (105,000) \times (\frac{1}{2} \times $24 \times 100\%) + (\frac{1}{2} \times $15.40 \times 100\%) + (\frac{1}{2} \times $21.00 \times 100\%) + (\frac{1}{2} \times $10.00 \times 100\%) + (\frac{1}{2} \times $31.50 \times 42\%) + (\frac{1}{2} \times $30.00 \times 18\%) = $6,917,631
\]
Quarterly Plan Reviews

Only an RN is involved in the incremental activities required by OBRA. The industry's estimate of 2.2 quarterly care plans per year at an incremental cost of $6.00 per review was used:

\[(\text{# care plans/bed})(\text{#beds})(\text{incremental cost/plan}) - \text{statewide cost}\]

\[(2.2)(105,000)(\$6.00) = \$1,386,000\]

Training on MDS+ Assessment

An estimate of $370,020 was used, based on the industry’s estimate which was found acceptable:

Cost of training for up to 80 beds $229,950
80 bed increments $140,070
$370,020

---

4MDS+ (Minimum Data Set Plus for Nursing Home Residents Assessment and Care Screening)
Quality Assurance

The meeting and preparation time for quarterly Quality Assurance meetings, including committee members of a physician, director of nursing, administrator or designee and three other staff was estimated by the industry. This was offset by the elimination of separate pharmacy reviews and infection control meetings, as well as the existing utilization review assessment and U/R committee meetings. Three added staff involved in meetings are assumed to be the physical therapist, social services director, and a representative from medical records. The net added expense estimated by the industry was $600,264.

Recertification of Nurse Aides

The number of aides who must be recertified by 1/92 is 17,381. The cost of recertification is $25.00 per aide. The total recertification cost is $434,525.

Psychotropic Drug Reviews

The code requires that all residents receiving psychotropic medications be reviewed with the intent of minimizing the usage of such drugs. These reviews are assumed to involve the physician and take about .5 hours per resident. It is estimated that 20% of residents will need such review at a physician cost of $150 per hour.

105,000 X 20% X .5 X 150 = $1,575,000
Surety Bonds

The industry has estimated that $189,000 of added cost will be incurred for this requirement and was found acceptable.

SUMMARY OF INCREMENTAL CODE COSTS TO BE REIMBURSED

Total incremental federal code cost to be recognized in facility 1991 rates is $17,041,640.

Comprehensive Resident Assessment $2,797,200
Quarterly Resident Assessment $2,772,000
Comprehensive Care Plan $6,917,631
Quarterly Care Plan Review $1,386,000
Training of MDS+5 Assessment $370,020
Quality Assurance $600,264
Nurse Aide $434,525
Psychotropic Drug Review $1,575,000
Surety Bonds $189,000
Total Incremental Cost $17,041,640

----------

5MDS+ (Minimum Data Set Plus for Nursing Home Residents Assessment and Care Screening)
Costs are to be reflected in facility rates beginning July 1, 1991, so that the nine months of incremental cost from April 1, 1991 to December 1991 will be reflected in the six month rate period July to December 1991. Total incremental costs were converted to a per diem add-on to be included in a facility’s rate by dividing total incremental costs by available beds, and adjusting to days by dividing by 365. The calculation is as follows:

\[
\frac{17,041,640}{105,000} \div \frac{365}{.45} \text{ add-on}
\]

This statewide add-on will be adjusted for each facility to reflect regional differences in RN salary levels for calendar year 1987. Such regional adjustments are currently used in the determination of the direct and indirect components of facility rates. For 1992 and forward, the incremental cost add-on will be by the appropriate trend factor.⁶

---

⁶Trend factors are computed in accordance with Section 86-2.12.
New York
47(z6)

Description of Methodologies for the Physical, Mental, and Psychosocial Well Being Requirement

The State of New York reimbursement rates match payment with intensity of care, thus providing facilities with adequate reimbursement for patients requiring more intensive supportive, medical or rehabilitative care. The RUG II patient classification system classifies each patient into one of sixteen patient categories which are each different in terms of clinical characteristics and are statistically different in terms of costs of care.

The system uses a hierarchy of patient types and secondary subgroup format based on Activities of Daily Living (ADL) function levels. The five hierarchical groups, from the highest to lowest resource consumption, are as follows:

1. Special Care
2. Rehabilitation
3. Clinically Complex
4. Severe Behavioral Problems
5. Reduced Physical Functions
Each of the above clinical groups is further divided by the ADL index score into subgroups. The ADL index is comprised of three ADL variables, eating, toileting, and transfer, which were determined to be the key predictors of resource consumption within each clinical group. For each of the sixteen patient classification categories, a relative resource “weight” representing the resource consumption of patients in that category relative to the average patient, is used to adjust the direct component of the payment rate.

The RUGS system thus allows a more precise and equitable means of directing available fiscal resources to nursing homes that care for residents with the heaviest care needs. By recognizing the resources required to provide more intensive rehabilitative and support services, the reimbursement methodology encourages nursing homes to establish restorative care programs. This can result in more active intervention for eligible patients, and earlier improvement and discharge.

October 1, 1992

For rates effective January 1, 1992 and thereafter, the per diem add-on described herein will be increased by a trend factor as defined in Section 86-2.12.
Description of the specific methodology for determining the adjustment -
Bloodborne Pathogens

**Hepatitis B Vaccination:**

Beginning January 1, 1993 and thereafter, provider rates contain a facility-specific adjustment to reimburse the cost of the Hepatitis B vaccine administered to employees. Provider-specific adjustments are based upon each facility's actual costs recognized up to a maximum cost for the vaccine. The facility specific adjustment will be determined using costs reposted by the providers two years prior to the state of the rate year. The maximum cost for the vaccine that is recognized when setting the facility specific adjustment is $128.50 for a three vial series per employee.

**Gloves:**

For rates effective on April 1, 1994 for the 1994 calendar year and each calendar year thereafter, an $.18 per diem adjustment will be included in provider's rates for the incremental cost of gloves.

47(aa)

Rate Adjustment for Financially Disadvantaged RHCFs

(a) The Commissioner of Health shall adjust medical assistance rates of payment for services provided on and after October 1, 2004 through December 31, 2004 and annually thereafter for services provided on and after January 1, 2005 through April 30, 2011, and on and after May 1, 2012 to include a rate adjustment to assist qualifying Residential Health Care Facilities (RHCFs) pursuant to this section, provided that public RHCFs shall not be eligible for rate adjustments pursuant to this subdivision for rate periods on and after April 1, 2009.

Facilities that receive a rate adjustment for the period May 1, 2010 through April 30, 2011, will have their rates reduced for the rate period December 1, 2011 through December 31, 2011, by an amount equal to the payment generated by the May 1, 2010 through April 30, 2011, rate adjustment.

(b) Eligibility for such rate adjustments shall be determined on the basis of each RHCF’s operating margin over the most recent three-year period for which financial data are available from the RHCF-4 cost report or the institutional cost report. For purposes of the adjustments made for the period October 1, 2004 through December 31, 2004, financial information for the calendar years 2000 through 2002 shall be utilized. For each subsequent rate year, the financial data for the three-year period ending two years prior to the applicable rate year shall be utilized for this purpose.

(c) Each facility's operating margin for the three-year period shall be calculated by subtracting total operating expenses for the three-year period from total operating revenues for the three-year period, and dividing the result by the total operating revenues for the three-year period, with the result expressed as a percentage. For hospital-based RHCFs, for which an operating margin cannot be calculated on the basis of the submitted cost reports, the sponsoring hospital's overall three-year operating margin, as reported in the institutional cost report, shall be utilized for this purpose. All facilities with negative operating margins calculated in this way over the three-year period shall be arrayed into quartiles based on the magnitude of the operating margin. Any facility with a positive operating margin for the most recent three-year period, a negative operating margin that places the facility in the quartile of facilities with the smallest negative operating margins, a positive total margin in the most recent year of the three-year period or an average Medicaid utilization percentage of 50% or less during the most recent year of the three-year period shall be disqualified from receiving an adjustment pursuant to this section, provided that for rate periods on and after April 1, 2009, such disqualification:

i. shall not be applied solely on the basis of a facility's having a positive total margin in the most recent year of such three-year period;

Attachment 4.19-D
Part I
ii. shall be extended to those facilities in the quartile of facilities with the second smallest negative operating margins; and

iii. shall also be extended to those facilities with an average Medicaid utilization percentage of less than 70% during the most recent year of the three-year period.

(d) For each facility remaining after the exclusions made pursuant to paragraph (c) of this section, the Commissioner of Health shall calculate the average annual operating loss for the three-year period by subtracting total operating expenses for the three-year period from total operating revenues for the three-year period, and dividing the result by three provided, that for periods on and after April 1, 2009, the amount of such average annual operating loss shall be reduced by an amount equal to the amount received through per diem add-on amounts received in the 2007 and 2008 rate periods. For this purpose, for hospital-based RHCFs for which the average annual operating loss cannot be calculated on the basis of submitted cost reports, the sponsoring hospital's overall average annual operating loss for the three-year period shall be apportioned to the RHCF based on the proportion the RHCF's total revenues for the period bears to the total revenues reported by the sponsoring hospital, and such apportioned average annual operating loss shall then be reduced by an amount equal to the amount received through per diem add-on amounts received in the 2007 and 2008 rate periods.

(e) For periods prior to April 1, 2009, each such facility's qualifying operating loss shall be determined by multiplying the facility's average annual operating loss for the three-year period as calculated pursuant to paragraph (d) of this section by the applicable percentage shown in the tables below for the quartile in which the facility's negative operating margin for the three-year period is assigned.

i. For a facility located in a county with a total population of 200,000 or more as determined by the 2000 U.S. Census:

</tbody>
</table>
The amount of any facility's financially disadvantaged RHCF distribution calculated in accordance with this section shall be reduced by the facility's rate year benefit of the 2001 update to the regional input price adjustment factors provided that such reduction shall not be applied with regard to rate periods on and after April 1, 2009. After all other adjustments to a facility's financially disadvantaged RHCF distribution have been made in accordance with this section, the amount of each facility's distribution shall be limited to no more than $400,000 during the period October 1, 2004 through December 31, 2004, and on an annualized basis, for rate periods through March 31, 2009, and no more than one million dollars for the period April 1, 2009 through December 31, 2009, and for each annual rate period thereafter.

The adjustment made to each qualifying facility's Medicaid rate of payment determined pursuant to the section shall be calculated by dividing the facility's financially disadvantaged RHCF distribution calculated in accordance with this section by the facility's total Medicaid patient days reported in the cost report submitted two years prior to the rate year, provided however, that such rate adjustments for the period October 1, 2004 through December 31, 2004, shall be calculated based on 25% of each facility's reported total Medicaid patient days as reported in the applicable 2002 cost report. Such amounts will not be reconciled to reflect changes in medical assistance utilization between the year two years prior to the rate year and the rate year.

The total amount of funds to be allocated and distributed as medical assistance for financially disadvantaged RHCF rate adjustments to eligible facilities for a rate period in accordance with this section shall be $30 million on and after January 1, 2009 through March 31, 2013.
For periods on and after April 1, 2009, Residential Health Care Facilities (RHCFs), which are otherwise eligible for rate adjustments pursuant to this subdivision shall also, as a condition for receipt of such rate adjustments, submit to the Commissioner a written restructuring plan that is acceptable to the Commissioner and which is in accord with the following:

i. Such an acceptable plan shall be submitted to the Commissioner within sixty days of the facility’s receipt of rate adjustments pursuant to this subdivision for a rate period subsequent to March 31, 2008, provided that facilities which are allocated $400,000 or less on an annualized basis shall be required to submit such plans within 120 days, and further provided that these periods may be extended by the Commissioner by no more than thirty days, for good cause shown; and

ii. Such plan shall provide a detailed description of the steps the facility will take to improve operational efficiency and align its expenditures with its revenues, and shall include a projected schedule of quantifiable benchmarks to be achieved in the implementation of the plan; and

iii. Such plan shall require periodic reports to the Commissioner, in accordance with a schedule acceptable to the Commissioner, setting forth the progress the facility has made in implementing its plan; and

iv. Such plan may include the facility’s retention of a qualified chief restructuring officer to assist in the implementation of the plan, provided that this requirement may be waived by the Commissioner, for good cause shown, upon written application by the facility.

If a facility fails to submit an acceptable restructuring plan in accordance with the provisions of paragraph (i) of this subdivision, the facility shall, from that time forward, be precluded from receipt of all further rate adjustments made pursuant to this subdivision and shall be deemed ineligible from any future re-application for such adjustments. The Commissioner will annually review each facility's efforts in achieving substantial progress in implementing its plan or achieving the benchmarks set forth in such plan. Further, if the Commissioner determines that a facility has failed to make a good faith effort in achieving substantial progress in implementing its plan or in achieving the benchmarks set forth in such plan, then the Commissioner will, upon thirty days notice to that facility, disqualify the facility from further participation in the rate adjustments authorized by this subdivision and the Commissioner will require the facility to repay some or all of the previous rate adjustments. During such thirty-day notification period, a facility may submit to the Commissioner additional information which may be used by the Commissioner to reconsider his or her determination that the facility be disqualified from further participation and required to repay some or all of the rate adjustments. The amount required to be repaid from such a facility shall be commensurate with the degree to which a facility has not made progress in implementing its plan or achieving the benchmarks set forth in such plan. Rate adjustments applicable to distributions made for periods prior to 2009 shall not be subject to repayment.

TN #13-36 Approval Date September 12, 2013

Temporary Rate Adjustments for Mergers, Acquisitions, Consolidations, Restructurings, and Closures - Nursing Homes

A temporary rate adjustment will be provided to eligible residential health care providers that are subject to or impacted by the closure, merger, and acquisition, consolidation or restructuring of a health care provider. The rate adjustment is intended to:

- Protect or enhance access to care;
- Protect or enhance quality of care; or
- Improve the cost effectiveness.

Eligible residential health care providers, the amount of the temporary rate adjustment, and the duration of each rate adjustment period shall be listed in the table which follows. The total adjustment amount for each period shown below will be paid quarterly during each period in equal installments. The temporary payment made under this section will be an add-on to services payments made under this Attachment to such facilities during the quarter.

To remain eligible, providers must submit benchmarks and goals acceptable to the Commissioner and must submit periodic reports, as requested by the Commissioner, concerning the achievement of such benchmarks and goals. Failure to achieve satisfactory progress in accomplishing such benchmarks and goals will result in termination of the provider’s temporary rate adjustment prior to the end of the specified timeframe. Once a provider’s temporary rate adjustment ends, the provider will be reimbursed in accordance with the otherwise applicable rate-setting methodology as set forth in this Attachment.

Temporary rate adjustments have been approved for the following providers in the amounts and for the effective periods listed.

Temporary Rate Adjustments for Mergers, Acquisitions, Consolidations, Restructurings, and Closures – Financially Distressed Nursing Homes

A temporary rate adjustment will be provided to eligible residential health care providers that are financially distressed and that are subject to or impacted by the closure, merger, and acquisition, consolidation or restructuring of a health care provider. The funds will be used to help providers achieve financial stability and advance ongoing operational changes to improve community residential long term care services for New York State’s elderly population. The rate adjustment is intended to:

- Protect or enhance access to care;
- Protect or enhance quality of care; or
- Improve the cost effectiveness.

Eligible financially distressed residential health care providers, the amount of the temporary rate adjustment, and the duration of each rate adjustment period will be listed in the table which follows. The total adjustment amount for each period shown below will be paid quarterly during each period in equal installments. The temporary payment made under this section will be an add-on to services payments made under this Attachment to such facilities during the quarter.

To remain eligible, providers must submit benchmarks and goals acceptable to the Commissioner and must submit periodic reports, as requested by the Commissioner, concerning the achievement of such benchmarks and goals. Failure to achieve satisfactory progress in accomplishing such benchmarks and goals will result in termination of the provider’s temporary rate adjustment prior to the end of the specified timeframe. Once a provider’s temporary rate adjustment ends, the provider will be reimbursed in accordance with the otherwise applicable rate-setting methodology as set forth in this Attachment.

Temporary rate adjustments have been approved for the following providers in the amounts and for the effective periods listed.

TN #16-0025 Approval Date: _Aug 25, 2016_  
Supersedes TN #NEW Effective Date: _June 1, 2016_
86-2.11 - Adjustments to Direct Component Of The Rate:

(a) Payments for 1986 and subsequent rate years for the Direct Component of the rate as defined in subdivision (c) of section 2.10 of this Subpart shall be adjusted periodically as described in this section to reflect changes in the case mix of facilities.

(b) Facilities shall report to the department changes in patient case mix follows:

(1) Full Reassessments:

Facilities shall, on a schedule to be established by the department, assess all their patients semi-annually and submit patient review instruments pursuant to section 86-2.30 of this Subpart. The department shall consider, in developing such schedule, that for each of the six months in a semi-annual period, there would be submitted approximately 1/6 of the assessments for all patients in the state.

(2) Assessment of patients admitted since the last assessment period:

Three months from the date facilities are scheduled to perform full reassessments, facilities shall assess patients admitted and still residing in the facility since the last full assessment period. Patient review instruments for such patients shall be submitted pursuant to section 86-2.30 of this Subpart on a schedule to be established by the department. The department shall consider, in developing such schedule that for each six months in a semi-annual period, there would be submitted approximately 1/6 of the assessments of such new admissions.
(3) **Notification to department of patients discharged since last assessment period:**

Facilities shall notify the department of any patients assessed during the previous full reassessment period as described in paragraph one of this subdivision and since discharged concurrent with the submissions required by paragraph (2) of this subdivision for patients admitted since the last assessment period.

(c) **Payment Rates for the Direct Component of the rate as defined in subdivision (c) of section 86-2.10 of this Subpart shall be adjusted, on a facility specific basis for changes in patient case mix retroactive to the beginning date of the month in which the assessment of patients was scheduled by the department and performed by the facility.**

(d) **Adjusted payment rates shall be determined by recalculating a facility’s number of patients in each patient classification group as a result of the submissions in accordance with this section and such results shall be used in the calculation of the facility specific direct adjusted payment price per day pursuant to paragraph four of subdivision (c) of section 86-2.10 of this Subpart.**

(e) **Trending:**

Payment rates for the operating component of the rate as defined in paragraph (2) of subdivision (b) of section 86-2.10 of this Subpart may be adjusted for changes in the trend factors originally promulgated by the department in accordance with section 86-2.12 of this Subpart.
(a) The operating cost component of residential health care facilities (RHCF's) rates of payment effective for the January 1, 2007 through December 31, 2007 and January 1, 2008 through December 31, 2008 rate periods, respectively, shall consist of the sum of the Direct, Indirect and Non-Comparable components of the rate

(1) in effect as of October 1, 2006 and adjusted for inflation to the 2007 rate period;

(2) in effect as of December 31, 2006 and adjusted for inflation to the 2008 rate period;

(3) the rates shall be further adjusted as follows:

i. a per diem add-on reflecting the proportional amount of each facility’s projected Medicaid benefit to total Medicaid benefit for all facilities of the imputed rate methodology to be effective April 1, 2009, including use of the allowable operating costs as reported in each facility’s 2002 calendar year cost report, adjusted for inflation to the applicable rate period and reflecting the expiration of the productivity and efficiency limitation and the fiscal and administrative cap adjustments; and

ii. for those facilities which do not receive a benefit from the incorporation of 2002 allowable operating costs, rates for 2007 and 2008 shall be adjusted by a per diem add-on reflecting a proportional benefit of the expiration of the productivity and efficiency limitation and the fiscal and administrative cap adjustments.

(4) aggregate Medicaid payments for the rate adjustments as stated in (i) and (ii) of paragraph (3) of this section will not exceed $137.5 million for the 2007 rate period, and $167.5 million for the 2008 rate period, and such rate adjustments made prior to April 1, 2013 will not be subject to subsequent adjustment or reconciliation.

(b) Additionally, the rates effective January 1, 2007 and January 1, 2008 shall

(1) include any revisions to the 2006 rates occurring on and after January 1, 2007. Such revisions shall be incorporated into the 2007 and 2008 rate periods on an annual basis on or about November 30, 2007 and November 30, 2008, respectively. These rate adjustments shall be made on a retroactive and prospective basis;

(2) include the cost of local property taxes and payments made in lieu of local property taxes as reported in each facility’s cost report for the period two years prior to the rate period;

TN #13-37 Approval Date January 10, 2014
Supersedes TN #09-33 Effective Date April 1, 2013
New York
50(a)

(3) not be subject to case mix adjustments; however, a facility may request such adjustment for increased case mix equal to or greater than .05 if such facility submits supporting documentation based on a full house schedule or patient review instruments, and continues to do so in accordance with its existing submission schedule for rate periods through December 31, 2008.

(c) Voluntary not-for-profit facilities shall not be required to deposit reimbursement received for depreciation expense into a segregated depreciation account for periods on and after January 1, 2007.

(d) Effective [January] April 1, 2009, the operating component of rates of payment shall consist of the sum of the Direct, Indirect and Non-Comparable components based on allowable operating costs and statistical data as reported in each facility’s cost report for the 2002 calendar year, adjusted for inflation on an annual basis.

(1) For facilities which do not benefit from the use of 2002 cost report data, the operating component of the rates shall not be less than the operating component in effect for the 2008 rate period, adjusted for inflation on an annual basis.

(2) For facilities with an operating cost component which is based on allowable costs from a calendar year cost report subsequent to 2002, the rates shall remain on such costs.

(3) Effective for the period January 1, 2007 through December 31, 2011, appointment of a receiver, establishment of a new operator, or replacement or renovation of an existing facility that occurs on or after January 1, 2007, shall not result in a revised operating component of the rates unless an application for these changes is filed with the Department of Health by December 31, 2006, which is subsequently approved and which otherwise meets existing Department criteria for the establishment of a new base year for rate-setting purposes.

TN #09-33 Approval Date June 19, 2009
Supersedes TN #06-39 Effective Date January 1, 2009
New York
50(b)

((5)) (4) Cost reports submitted by facilities for the 2002 calendar year or any subsequent year used to determine the operating component of the 2009 rate shall be subject to audit through December 31, [2014] 2018. Facilities will therefore retain all fiscal and statistical records relevant to such costs reports. Any audit of the 2002 cost report, which is commenced on or before December 31, [2014] 2018, may be completed subsequent to that date and used for adjusting the Medicaid rates that are based on such costs.

(e) Additionally, the operating component of the rates effective April 1, 2009 shall

(1) be subject to a case mix adjustment through application of the relative Resource Utilization Groups System (RUGS-III) used by the federal government for Medicare, revised to reflect NYS wage and fringe benefits, and based on Medicaid only patient data. New York State wages are used to determine the weight of each RUG. The cost for each RUG is calculated using the relative resources for registered nurses, licensed practical nurses, aides, therapists, and therapy aides using the 1995 - 97 federal time study. The minutes from the study are multiplied by the NY average dollar per hour to determine the fiscal resources needed to care for that patient type for one day. This amount is multiplied by the number of patients in that RUG. RUG weights are assigned based on the distance from the statewide average. The RUGS-III weights shall be increased for the following resident categories:

(i) 30 minutes for impaired cognition A;
(ii) 40 minutes for impaired cognition B; and
(iii) 25 minutes for reduced physical functions B.

Medicaid only case mix adjustments shall be made in January and July of each calendar year, except that no case mix adjustment shall be made in January 2011 and July 2011. The adjustments and related patient classifications for each facility shall be subject to audit review in accordance with regulations promulgated by the Commissioner of Health, and effective January 1, 2009 shall

(2) incorporate the continuation, through 2009 and subsequent years, of the adjustment for extended care of persons with traumatic brain injury in accordance with the provisions of this Attachment;
(3) incorporate the continuation, through 2009 and subsequent years, of the adjustment for the cost of providing Hepatitis B vaccinations in accordance with the provisions of this Attachment;
(4) reflect a per diem add-on of $8, trended from 2006 to 2009 and thereafter, for each patient who:

TN #13-37 Approval Date January 10, 2014
Supersedes TN #11-03 Effective Date April 1, 2013
(i) qualifies under both RUG-III impaired cognition and behavioral problems categories; or

(ii) has been diagnosed with Alzheimer's disease or dementia and is classified in reduced physical functions A, B, or C, or in behavioral problems A or B categories, and also has an activities of daily living index of ten or less;

(5) reflect a per diem add on of $17, trended from 2006 to 2009 and thereafter, for each patient whose body mass index is greater than thirty-five (35);

(6) reflect the cost of local property taxes and payments in lieu of local property taxes, as reported in each facility's cost report for the period two years prior to the rate year.

(f) Direct component of the rate.

(1) allowable costs for the direct component of the rate shall include costs reported in the following functional cost centers on the facility's annual cost report (RHCF-4) or extracted from a hospital-based facility's annual cost report (RHCF-2) and the institutional cost report of its related hospital, after first deducting for capital costs and allowable items not subject to trending.

(i) nursing administration;

(ii) activities;

(iii) social services;

(iv) transportation;

(v) physical therapy (including associated overhead);

(vi) occupational therapy (including associated overhead);

(vii) speech therapy (including associated overhead);

(viii) central service supply; and

(ix) residential health care facility.

(2) For purposes of calculating the direct component of the rate, the Department shall use the methodology provided in this Attachment, except as provided in subparagraph (3) of paragraph (f) regarding the determination of the allowable cost ceiling:

TN #06-39 Approval Date June 12, 2008
Supersedes TN NEW Effective Date January 1, 2007
(3) For purposes of computing the cost ceilings for the direct component, facilities shall be organized into peer groups consisting of:

(i) free-standing facilities with certified bed capacities of less than 300 beds;
(ii) free-standing facilities with certified bed capacities of 300 beds or more; and
(iii) hospital-based facilities.

(4) In determining the direct cost component, for each peer group, a corridor shall be developed around the statewide mean direct price per day, provided, however, that the corridor around each mean direct price per day shall have a base no less than eighty-five percent and no greater than ninety percent of each mean direct price per day, and a ceiling no greater than one hundred fifteen percent and no less than one hundred ten percent of each mean direct price per day, and further provided, however, that the total financial impact of the application of the ceiling shall be substantially equal to the total financial impact of the application of the base.

(5) Public facilities, and non-public facilities with fewer than 80 certified beds, which have a facility specific direct adjusted price per day that is equal to the applicable ceiling shall have such price per day adjusted by an addition of 50% of the difference between the facility specific price per day and the ceiling price per day. The adjustment to the direct price per day shall be increased to the rate year by the applicable inflation factor, and adjusted by the regional direct input price factor.

(g) Indirect component of the rate.

(1) Allowable costs for the indirect component of the rate shall include costs reported in the following functional cost centers on the facility’s annual cost report (RHCF-4) or extracted from a hospital based on facility’s annual cost report (RHCF-2) and the institutional cost report of its related hospital, after first deducting for capital costs and allowable items not subject to trending.
New York
50(e)

(i) fiscal services;
(ii) administrative services;
(iii) plant operations and maintenance (with the exception of utilities and real estate and occupancy taxes);
(iv) grounds;
(v) security;
(vi) laundry and linen;
(vii) housekeeping;
(viii) patient food services;
(ix) cafeteria;
(x) non-physician education;
(xi) medical education;
(xii) housing; and
(xiii) medical records.

(2) For purposes of calculating the indirect component of the rate, the Department shall use the methodology provided in this Attachment, except as provided in subparagraph (3) of paragraph (g) regarding the determination of the allowable cost ceiling:

(3) For purposes of computing the cost ceilings for the indirect component, facilities shall be organized into peer groups consisting of:

(i) free-standing facilities with certified bed capacities of less than 300 beds;
(ii) free-standing facilities with certified bed capacities of 300 beds or more; and
(iii) hospital-based facilities.

(4) In determining the indirect cost component, for each peer group, a corridor shall be developed around the statewide mean indirect price per day, provided, however, that the corridor around each mean indirect price per day shall have a base no less than eighty-five percent and no greater than ninety percent of each mean indirect price per day, and a ceiling no greater than one hundred fifteen percent and no less than one hundred ten percent of each

TN #06-39 Approval Date June 12, 2008
Supersedes TN NEW Effective Date January 1, 2007
New York
50(f)

mean indirect price per day, and further provided, however, that the total financial impact of the application of the ceiling shall be substantially equal to the total financial impact of the application of the base.

(5) Public facilities, and non-public facilities with fewer than 80 certified beds, which have a facility specific indirect adjusted price per day that is equal to the applicable ceiling shall have such price per day adjusted by an addition of 50% of the difference between the facility specific price per day and the ceiling price per day. The adjustment to the indirect price per day shall be increased to the rate year by the applicable inflation factor, and adjusted by the regional indirect input price factor.

(h) Non-comparable component of the rate.

(1) The non-comparable component of the rate shall consist of costs, which represent allowable costs reported by a facility, which because of their nature are not subject to peer group comparisons.

(2) Allowable costs for the non-comparable component of the rate shall include the costs associated with supervision of facility volunteers and costs reported in the following functional cost centers as reported on the facility's annual cost report (RHCF-4) or extracted from a hospital based facility's annual cost report (RHCF-2) and the institutional cost report of its related hospital, after first deducting capital cost and allowable items not subject to trending:

(i) laboratory services
(ii) ECG

Attachment 4.19-D
Part I

TN #06-39 Approval Date June 12, 2008
Supersedes TN NEW Effective Date January 1, 2007
(i) **Capital component of the rate.**

The allowable facility specific capital component of the rate shall include allowable capital costs determined in accordance with §86-2.19, 86-2.20, 86-2.21 and 86-2.22 of this Subpart and costs of other allowable items determined by the Department to be non-trendable divided by the facility’s patient days in the base year determined applicable by the Department.

(j) (1) For rate periods on and after January 1, 2007, no less than 65% of the additional Medicaid reimbursement received by a facility from the proportional add-on related to the projected 2002 reported base year costs, must be used for recruitment and retention of non-supervisory or other direct resident care workers or for purposes authorized under the Quality Improvement Demonstration Program. However, facilities shall not be required to spend more than 75% of the additional Medicaid reimbursement for these purposes.

(2) The Commissioner of Health is authorized to perform audits of the facilities to ensure compliance with the requirement established in subparagraph (1) of this paragraph (j), and may recoup any amount determined to be used for other purposes. The Commissioner may waive the requirements for this mandatory use of this Medicaid reimbursement on request of a facility, if it is determined that the funds are not available for these purposes because they have been used to correct deficiencies at a facility that constitute a threat to resident safety.

(k) For the rate periods after 2009 which utilize reported costs from a base year subsequent to 2002, the following categories of facilities shall receive rates that are no less than the rates that were in effect for such facilities on December 31, 2006, trended to the applicable rate year:

(1) AIDS facilities or discrete AIDS units;

(2) discrete units for residents on long-term inpatient rehabilitation for traumatic brain injury;

(3) long-term ventilator discrete units;

(4) discrete units providing specialized programs for residents requiring behavioral interventions; and

(5) facilities or discrete units that provide extensive nursing, medical, psychological and counseling services solely for children.
Effective January 1, 2012, the non-capital component of the rate for specialty facilities shall be the rates in effect for such facilities on January 1, 2009, as adjusted for inflation and rate appeals in accordance with Attachment 4.19-D. Such rates of payment in effect January 1, 2009, for AIDS facilities or discrete AIDS units within facilities shall be reduced by the AIDS occupancy factor.

1) For new specialty facilities without a January 1, 2009, rate but with a rate prior to April 1, 2009, the operating portion of the January 1, 2012, rate will be the rate in effect on the date of opening.

2) For new specialty facilities without a January 1, 2009, rate that open between April 1, 2009, and July 7, 2011, the operating portion of January 1, 2012, rate will be the rate in effect July 7, 2011.

3) For new specialty facilities without a January 1, 2009, rate that open subsequent to July 7, 2011, the operating portion of the January 1, 2012, rate will be calculated as follows:
   i) The initial rate will be calculated using budgeted costs prepared by the facility and approved by the Department and will become effective on the date of opening.
   ii) The facility will file a cost report for the first twelve-month period that the specialty unit or specialty facility, as applicable, achieves 90% occupancy. The rate will become effective the first day of the twelve-month report. A facility that does not achieve 90% or greater occupancy for any year within five calendar years from the date of commencing operation shall be recalculated using the facility's most recently available reported allowable costs divided by patient days imputed at 90% occupancy. The recalculated rates of payment are required to be effective January first of the sixth calendar year following the date the facility commenced operations.

4) There will be no case mix adjustments to specialty rates.
For the rate period May 1, 2009 through March 31, 2010, adjustments to the rates of payment resulting from the rebase to 2002 reported base year costs, including initial adjustments for case mix, shall be held to an aggregate increase of $210 million. If the total adjustments are more or less than $210 million, proportional adjustments to the rates shall be made as necessary to result in an increase in aggregate expenditures of $210 million. Such proportional adjustments shall be based on each facility’s proportionate share of total spending from the April 1, 2009 rates that reflect the impact of rebasing and Medicaid only case mix. The rate adjustment required to adjust spending to the required $210 million amount will be reflected as the “scale back adjustment” in the rates effective May 1, 2009 through March 31, 2010. The operating component of such rates shall not be subject to the update adjustments for case mix as otherwise scheduled for January of 2010.

For the annual periods April 1, 2010 through March 31, 2012, if adjustments to the rates of payment prior to the adjustment for inflation results in an increase in total payments for such services on an annual basis, such rates shall be further adjusted proportionally as is necessary to reduce the aggregate increase to no greater than the proportionally adjusted aggregate for the period April 1, 2009 through March 31, 2010. Proportional adjustments made to rates within the aggregate expenditure limit shall not be subject to subsequent correction or reconciliation.

For the period May 1, 2011 through June 30, 2011, the non-capital components of rates will be subject to a uniform percentage reduction sufficient to reduce such rates by an aggregate amount of $27,100,000. Such reductions will not be included in the computation of the residential health care facility cap.
Supplemental payments

For the period May 1, 2011 through May 31, 2011, supplemental payments in the form of rate add-ons, in the amount of $221.3 million, will be made to eligible residential health care facilities which the Commissioner has determined have experienced a net reduction in their rate for the period April 1, 2009 through March 31, 2011 as a result of the 2002 rebasing methodology, Medicaid-only case mix methodology, and the application of proportional adjustments required to be made by the application of the residential health care facility cap. In determining the net reduction, the impact of case mix adjustments applicable to July 2010 and Medicaid rate adjustments for appeals and patient review instrument (PRI) case mix updates processed for payment after October 19, 2010 will be disregarded by the Commissioner. The following facilities are eligible for such supplemental payments:

a) Facilities which were eligible for Financially Disadvantaged distributions for the 2009 period; non-public facilities whose total operating losses equal or exceed five percent of total operating revenue and whose Medicaid utilization equals or exceeds seventy percent (based on either their 2009 cost report or their most recently available cost report); or facilities or distinct units of facilities providing services primarily to children under the age of twenty-one, will receive a supplemental payment that is equal to 100 percent of the net reduction determined above.

b) Facilities other than eligible facilities described in paragraph (a) above will receive supplemental payments equal to 50 percent of their net reduction.

c) Facilities described in paragraph (b) above, which after the application of the rate adjustments described in paragraph (b) remain subject to a net reduction in their inpatient Medicaid revenue that is in excess of two percent (as measured with regard to the non-capital components of facility inpatient rates in effect on March 31, 2009 computed prior to the application of trend factor adjustments attributable to the 2008 and 2009 calendar years) will have their payments further adjusted such that the net reduction does not exceed two percent.
New York
50(j)

d) Facilities as described in paragraph (c) above which have experienced a net reduction in
their inpatient rates of more than $6 million over the period April 1, 2009 through March
31, 2011 as a result of the application of proportional adjustments required to be made
by the application of the residential health care facility cap will have their payments
further adjusted so that their net reduction is reduced to zero.

Additional rate adjustments, in the form of rate add-ons, will be made to the eligible facilities
described above for the period May 1, 2011 through May 31, 2011 in an aggregate amount
equal to 25% of the payments described above (or 25% of $221.3 million which equals $55.3
million). The payments will be distributed to eligible facilities in the same proportion as the total
$221.3 million of distributions made to each eligible facility.

The supplemental payments described above will not be subject to subsequent adjustment or
reconciliation and will be disregarded for purposes of calculating the limitations on Medicaid
rates required by the application of the residential health care facility cap.
(c) Beginning April 1, 1991, the commissioner, in accordance with the methodology developed pursuant to subdivisions (d), (e) and (f) of this section, shall establish trend factors for residential health care facilities to project allowable cost increases for the effects of inflation during the effective period of the reimbursement rate. The allowable basic rate prior to the addition of capital costs and depreciation and interest related to movable equipment shall be trended, beginning on April 1, 1991, to the applicable rate year by the trend factors developed in accordance with subdivisions (d) through (f) of this section.

(d) The methodology for developing the trend factors shall be established by a panel of four independent consultants with expertise in health economics appointed by the commissioner.

(e) The methodology for developing the trend factors shall include the appropriate external price indicators and the data from major collective bargaining agreements as reported quarterly by the Federal Department of Labor, Bureau of Labor Statistics, for nonsupervisory employees.
(f) (1) On or about September first of each year, the consultants shall provide to the Commissioner and the State Hospital Review and Planning Council, the methodology to be used to determine the trend factors for the rate period, commencing on the next January first. The Commissioner shall monitor the actual price movements during these periods of the external price indicators used in the methodology, shall report the results of the monitoring to the consultants and shall implement the recommendations of the consultants for one prospective interim annual adjustment to the initial trend factors to reflect such price movements and to be effective on January first, one year after the initial trend factors were established.

(2) Notwithstanding the dates specified in paragraph (1), the consultants shall provide as soon as possible to the Commissioner and the State Hospital Review and Planning Council, the methodology to be used to determine the trend factor for the rate period April 1, 1991 to December 31, 1991. One prospective interim annual adjustment for this rate period shall be made on January 1, 1992 and one prospective final annual adjustment for this rate period shall be made January 1, 1993.

(3) for rate periods on and after April 1, 2000, the commissioner shall establish trend factors for rates of payment for state governmental agencies to project for the effects of inflation. The factors shall be applied to the appropriate portion of reimbursable costs.

(a) In developing trend factors for such rates of payment, the commissioner shall use the most recent Congressional Budget Office estimate of the rate year's U.S. Consumer Price Index for all urban consumers published in the Congressional Budget Office Economic and Budget Outlook after June first of the rate year prior to the year for which rates are being developed.

(b) After the final U.S. Consumer Price Index (CPI) for all urban consumers is published by the United States Department of Labor, Bureau of Labor Statistics, for a particular rate year, the commissioner shall reconcile such final CPI to the projection used in subparagraph (a) of this paragraph and any difference will be included in the prospective trend factor for the current year.

(c) At the time adjustments are made to the trend factors in accordance with this paragraph, adjustments shall be made to all inpatient rates of payment affected by the trend factor adjustment.
(g) For reimbursement of services provided to patients for the period April 1, 1995 through December 31, 1995, the trend factors established in accordance with subdivisions (d), (e) and (f) of this section will reflect no trend factor projections applicable to the period January 1, 1995 other than those reflected in 1994 rates of payment and provide further, that this subdivision will not apply to use of the trend factor for the January 1, 1995 through December 31, 1995 period, any interim adjustment to the trend factor for such period, or the final trend factor for such period for purposes of projection of allowable operating costs to subsequent rate periods. The Commissioner of Health will adjust such rates of payment to reflect the exclusion of trend factor projections pursuant to this subdivision. For reimbursement of services provided to patients effective April 1, 1996 through March 31, 1997, the rates will be established by the Commissioner of Health without trend factor adjustments, but will include the full or partial value of the retroactive impact of trend factor final adjustments for prior periods.* For reimbursement of services provided to patients on and after April 1, 1996 through March 31, 1999 and for payments made on and after July 1, 1999 through March 31, 2011, and on and after April 1, 2011 through March 31, 2013, and on and after April 1, 2013 through March 31, 2015, and on and after April 1, 2015 through March 31, 2017, and April 1, 2017 through March 31, 2019, and April 1, 2019 through March 31, 2020 and thereafter, the rates will reflect no trend factor projections or adjustments for the period April 1, 1996 through March 31, 1997.

(h) For reimbursement of nursing home services provided to patients beginning on and after April 1, 2006 through March 31, 2011, and on and after April 1, 2011 through March 31, 2013, and on and after April 1, 2013 through March 31, 2015, and on and after April 1, 2015 through March 31, 2017, and April 1, 2017 through March 31, 2019 and thereafter, the Commissioner of Health will apply a trend factor projection of 2.25% attributable to the period January 1, 2006 through December 31, 2006. Upon reconciliation of this trend factor in accordance with the previously approved state methodology, the final 2006 trend factor will be the U.S. Consumer Price Index (CPI) for all Urban Consumers, as published by the U.S. Department of Labor, Bureau of Labor Statistics, minus 0.25%.

(i) For reimbursement of nursing home services provided on and after April 1, 2007, the Commissioner of Health will apply a trend factor equal to 75% of the otherwise applicable trend factor for calendar year 2007 as calculated in accordance with paragraph (f) of this section.

*This means that since the rates for the April 1, 1996 through March 31, 1997 period are based on 1983 base year costs trended to this period, the rate impacts of any differences between, say, the final value of the 1995 trend factor and the preliminary 1995 trend factor value that may have been used when initially calculating the rate, would be incorporated into the rates for the April 1, 1996 through March 31, 1997 rate period.
(j) For reimbursement of nursing home services provided on and after April 1, 2008, except for the nursing facilities which provide extensive nursing, medical, psychological, and counseling support services to children, the Commissioner of Health shall apply a trend factor equal to 65% of the otherwise applicable trend factor for calendar year 2008 as calculated in accordance with paragraph (f) of this section.
New York
51(a)(2)

(k) For rates of payment effective for nursing home services provided on and after January 1, 2009 through March 31, 2009, the otherwise final trend factor attributable to the 2008 calendar year period [shall] will be adjusted such that any increase to the average trend factor for the period April 1, 2008 through December 31, 2008 [shall] will be reduced, on an annualized basis, by 1.3% and no retroactive adjustment to such 2008 trend factor [shall] will be made for the period April 1, 2008 through December 31, 2008. Effective on and after April 1, 2009, the otherwise applicable final trend factor attributable to the 2008 calendar year period [shall] will be zero.

(l) For rates of payment effective for nursing home services provided on and after January 1, 2009 through March 31, 2009, a trend factor equal to the otherwise applicable trend factor attributable to the period January 1, 2009 through December 31, 2009, as calculated in accordance with paragraph (f) of this section, less 1% [shall] will be applied. Effective on and after April 1, 2009, the otherwise applicable trend factor attributable to the 2009 calendar year period [shall] will be zero.

(m) For rates of payment effective for nursing home services provided for the period January 1, 2010 through March 31, 2010, the otherwise applicable trend factor attributable to the 2010 calendar year period [shall] will be zero.

(n) For rates of payment effective for inpatient services provided by residential health care facilities on or after April 1, 2010, except for residential health care facilities that provide extensive nursing, medical, psychological, and counseling support services to children, the otherwise applicable trend factors attributable to:

i. the 2010 through 2012 calendar year periods [shall] will be no greater than zero.

ii. the 2013 and 2014 calendar year periods [shall] will be no greater than zero.

iii. the 2015 calendar year period [shall] will be no greater than zero for rates effective for the period January 1, 2015 through March 31, 2015 and April 23, 2015 through December 31, 2015.

iv. the 2016 calendar year period [shall] will be no greater than zero.

v. the 2017 calendar year period [shall] will be no greater than zero for rates effective for the period January 1, 2017 through March 31, 2017 and April 1, 2017 through December 31, 2019.

vi. the 2019 - 2021 calendar year periods will be no greater than zero for rates effective for the period April 1, 2019 through March 31, 2021.

Effective July 1, 1994, payment rates for the 1994 rate setting cycle will be calculated using the proxy data described in this section that is available through the third quarter of 1993. Proxy data, which becomes available subsequent to the third quarter of 1993, will not be considered in setting or adjusting 1994 payment rates.
New York
51(b)

TREND AND ROLL FACTORS:

The authorization of an independent Panel of Health Economists to develop trend factors used in the residential health care facility reimbursement methodology is contained in statute. The following is a summary of the major components of the trend factors methodology as adopted by the Panel of Health Economists.

The actual proxies used in the calculation of the trend factors are listed in p.51(c) (d) (e) and (f). The proxies adopted by the Panel as listed in p.51 (c) (d) (e) and (f) may change back to the beginning of the year when data upon which a proxy is based becomes unavailable or by recommendation of the Panel of Health Economists who statutorily are authorized to determine the trend factor methodology.

Projection Methodologies

Labor - In order to quantify the labor price movement component of the trend factor, national proxies are used, adjusted by a Regional Adjustment Factor (RAF) to estimate New York State experience. These proxies are weighted to produce a composite labor price movement. In calculating the initial and revised trend factors for a given year, a projection methodology for the labor price movements is used since actual data for the year are not yet available. The projections are based on the compounding of quarterly increases in the proxies for the four latest available quarters of data. The final trend factor calculations are based on actual proxy data for the trend factor year compared to the preceding year.

All but one of the labor proxies measure increases in compensation and therefore reflect changes in both salaries and fringe benefits. The labor proxy which measures only changes in wages and salaries is adjusted by a Compensation Factor (the ratio of the percent change in the Employment Cost Index-Compensation to the Employment Cost Index-Wages and Salaries) for the appropriate series to incorporate fringe benefits changes.

Non-Labor - A number of different proxies are used to measure price movements in non-labor (related) expenses incurred by facilities. In calculating the initial and revised trend factors, an estimate of the non-labor price movement is made based upon the projection of the GDP [GNP] Implicit Price Deflator. The final trend factor calculations are made using the actual changes in the non-labor proxies.

86-2.13 Adjustments to provisional rates based on errors.

(a) Errors resulting from submission of fiscal and statistical information by a residential health care facility may be corrected if brought to the attention of the State Commissioner of Health within 120 days of receipt of the commissioner's initial rate computation sheet. Errors on the part of the State Department of Health resulting from the rate computation process may be corrected if brought to the attention of the commissioner within 120 days of receipt of the commissioner's initial rate computation sheet. Subsequent errors on the part of the State Department of Health resulting from the revision of a rate may be corrected if brought to the attention of the commissioner within 30 days of receipt of the commissioner's revised rate computation sheet. In no event, however, shall a facility have less than 120 days from receipt of the initial rate computation sheets to bring errors to the attention of the commissioner.

(b) Rate appeals pursuant to this section, if not commenced within 120 days of receipt of the commissioner's initial rate computation sheet, may be initiated at time of audit of the base year cost figures at or prior to the audit exist conference. Such rate appeals shall be recognized only to the extent that they are based upon errors in the cost and/or statistical data submitted by the residential health care facility, or by revisions initiated by a third-party fiscal intermediary, or in the case of a governmental facility, by the sponsor government of errors made by the Department of Health.
86-2.14 Revision in Certified Rates.

(a) The State Commissioner of Health may consider only those applications for revisions of certified rates which are based on:

(1) cost reports filed pursuant to subdivision (e) of section 86-2.2 of this Subpart. Such rate shall become effective on the first day of the twelve-month period referred to in section 86-2.2(e) of this Subpart;

(2) six-month cost reports filed pursuant to sections 86-2.10(k)(6) and/or 86-2.15(e). Such rate shall become effective on the first day of the six-month period referred to in sections 86-2.10(k)(6) and 86-2.15(e) of this Subpart;

[(2)](3) errors made by the Department in the rate calculation process and errors in data submitted by a medical facility which have been brought to the attention of the commissioner within the time limits prescribed in section 86-2.13 of this Subpart. This paragraph shall not apply to the patient assessment process as contained in section 86-2.30 of this Subpart;

July 24, 1996

Supersedes TN #86-4

Effective Date April 1, 1993
significant increases in overall operating costs of a residential health care facility resulting from the implementation of additional programs or services specifically mandated for the facility by the commissioner;

significant increases in the overall operating costs of a residential health care facility resulting from capital renovation, expansion, replacement or the inclusion of new programs or services approved for the facility by the commissioner;

request for waivers of any provisions of this Subpart for which waivers may be granted by the commissioner as prescribed in specific sections; [and]

alternative means of allocating costs in the cost-finding process which have been submitted with the annual cost report (RHCF-4c) and approved [in accordance with Section 456.2(b) and (c)]; and

requests for relief from the provisions of section 86-2.25 of this Subpart relating to compensation of other than the administrative type of services rendered by an operator or relative of an operator. Such requests must contain sufficient documentation to demonstrate
New York
53(b)

that the services rendered are necessary and are reasonably related to the efficient production of such services.

TN #93-04
Supersedes TN NEW
Approval Date July 24, 1996
Effective Date April 1, 1993
(b) An application by a residential health care facility for review of a certified rate is to be submitted on forms provided by the Department and shall set forth the basis for the appeal and the issues of fact. Documentation shall accompany the application, where appropriate, and the Department may request such additional documentation as determined necessary. An application based upon error shall be submitted within the time limit set forth in section 86-2.13 of this Subpart. Beginning with appeals for rate year 1983 and, on an annual basis thereafter for all subsequent rate year appeals, the Commissioner shall act upon all properly documented applications for a rate year based upon errors within one year of the end of the 120-day period referred to in section 86-2.13(a) of this Subpart. The Commissioner shall act upon all other properly documented applications for a rate year.
appeal submitted pursuant to paragraphs (1) and (3) - (7) of subdivision (a) of this Subpart within one year of the aforementioned 120-day period or the receipt of such applications, whichever date is later. In the event the Department requests additional documentation, the one year time limit shall be extended for a mutually agreed upon time period for receipt of the documentation established by the Commissioner in conjunction with the residential health care facility. The deadline will be set according to the nature and quantity of documentation necessary. The one-year time limit shall not apply to rate appeals submitted pursuant to section 86-2.13(b) of this Subpart.

(1) The affirmation or revision of the rate upon such staff review shall be final, unless within 30 days of its receipt a hearing is requested, by registered or certified mail, before a Rate Review Officer on forms supplied by the Department. The request shall contain a statement of factual issues to be resolved. The facility may submit memoranda on legal issues which it deems relevant to the appeal.

(2) Where the Rate Review Officer determines that there is no factual issue, the request for a hearing shall be denied and the facility notified of such determination. The Rate Review Officer, where he determines that there is factual issue, shall issue a notice of hearing establishing the date, time and place of the hearing and setting forth the factual issues as determined by such Officer. The hearing shall be held in conformity with the provisions of the Public Health Law section 12-a and the State Administrative Procedure Act.
(3) The recommendation of the Rate Review Officer shall be submitted to the commissioner of Health for final approval or disapproval and recertification of the rate where appropriate.

(4) The procedure set forth in this subdivision shall apply to all applications for rate reviews which are pending as of April 1, 1978. Rate appeals filed prior to April 1, 1978, will not be required to be resubmitted subsequent to April 1, 1978.

(c) Any modified rate certified under paragraph (3) and (4) of subdivision (a) of this section shall be effective on the first day of the month in which the respective change is operational.

(d) In reviewing appeals for revisions to certified rates the commissioner may refuse to accept or consider an appeal from a residential health care facility:

(1) providing an unacceptable level of care as determined after review by the State Hospital Review and Planning Council;

(2) operated by the same management when it is determined by the department that this management is providing an unacceptable level of care as determined after review by the State Hospital Review and Planning Council in one of its facilities;

(3) where it has been determined by the commissioner that the operation is being conducted by a person or persons not properly established in accordance with the Public Health Law;

(4) where a fine or penalty has been imposed on the facility and such fine or penalty has not been paid.
In such instances the provisions of subdivision (c) of this section shall not be effective until the date the appeal is accepted by the commissioner.

(e) Any residential health care facility determined after review by the State Hospital Review and Planning Council to be providing an unacceptable level of care shall have its current reimbursement rate reduced by 10 percent as of the first day of the month following 30 days after the date of the determination. This rate reduction shall remain in effect for a one-month period or until the first day of the month following 30 days after a determination that the level of care has been improved to an acceptable level, whichever is longer. Such reductions shall be in addition to any revision of rates based on audit exceptions.

(f) Reserved.
86-2.15 Rates for residential health care facilities without adequate cost experience.

(a) (1) This subdivision shall apply where the fiscal and statistical data of the facility are unavailable through no fault of the provider or its agents, and due to circumstances beyond its control, or when there is a new facility without adequate cost experience as set forth in subdivision (e) of section 86-2.2 of this Subpart.

(2) The appointment of a receiver or the establishment of a new operator for an ongoing facility shall not be considered a new facility for the purposes of this section. Reimbursement for such receiver or new operator shall be in accordance with sections 86-2.10 and 86-2.11 of this Subpart.

(b) The rates certified for such residential health care facilities as set forth in subdivision (a) of this section, shall be determined in accordance with the following:

(1) Except as identified in paragraph (5) (6) and (7) of this subdivision, for the first three months of operation, the direct component of the rate shall be equivalent to the statewide [base] mean direct case mix neutral cost per day after application of the RDIPAF as determined pursuant to section 86-2.10 of this Subpart. The facility shall perform an assessment of all patients, pursuant to section 86-2.30 of this Subpart, at the beginning of the fourth month of operation and at the beginning of each third
New York
58(a)

month thereafter until the end of the [six-month] twelve-month cost report period referred to in section 86-2.2(e) of this Subpart or if applicable, the six-month cost report identified in subdivision (e) of this section. The direct component of the rate shall be adjusted pursuant to section 86-2.10 of this Subpart, effective the first day of the month of each assessment period, based on the facility’s case mix.

(2) Except as identified in paragraph (5), (6) and (7) of this subdivision, for the first three months of operation, the indirect component of the rate shall be equivalent to a blended [base] mean price for the applicable affiliation group as identified in subdivision (d) of section 86-2.10 of this Subpart. The blended [base] mean price shall be established using a proportion of 60 residents in the high case mix index peer group and 40 residents in the low case mix index peer group both as identified in subdivision (d) of 86-2.10 of this Subpart, adjusted by the RIIPAF. Effective on the first day of the fourth month the indirect component shall be the [base] mean price determined using the facility’s PRI’s and adjusted by the RIIPAF.
(3) the non-comparable component of the rate shall be determined on the basis of generally applicable factors, including but not limited to the following:

(i) satisfactory cost projections;

(ii) allowable actual expenditures;

(iii) an anticipated average utilization of no less than 90 percent.

(4) Rates established pursuant to this subdivision shall also include an adjustment pursuant to subdivision (u) of section 86-2.10 of this Subpart.
(5) **Acquired Immune Deficiency Syndrome (AIDS).**

Except as identified in subparagraph (v) of this paragraph, a facility which is approved as a distinct AIDS facility or has a discrete AIDS unit pursuant to Part 710 of this Title, shall have rates established pursuant to this subdivision as follows:

(i) The direct component of the rate shall be determined in accordance with paragraph (1) of this subdivision provided, however, that the direct [base] mean [price] rate for the first three months of operation shall be determined pursuant to an approved facility’s projection of case mix. The direct component of the rate shall be enhanced by an increment which shall be determined on the basis of the difference between budgeted costs of care and staffing levels for AIDS patients in specific patient classification groups and the costs of care and staffing levels for non-AIDS patients which are classified in the same patient classification groups based on data submitted by a facility. The increment to be included in the facility’s rate pursuant to this subparagraph shall be approved by the commissioner, but in no event shall the increment be greater than 1.0. The direct component of the rate shall also be increased by an occupancy factor of 1.225.

(ii) The indirect component shall be determined in accordance with paragraph (2) of this subdivision provided however, that the indirect [base] mean price for the first three months of operation shall be determined pursuant to an approved facility’s projection of case mix. The indirect component of the rate shall be increased by the AIDS factor as determined pursuant to section 86-2.10(p) of this Subpart.

(iii) The allowable costs for the central service supply functional cost center as listed in paragraph (1) of section 86-2.10(c) shall be considered as a non-comparable cost.
(iv) Rates developed pursuant to this paragraph shall remain in effect until a facility submits twelve-month financial and statistical data pursuant to subdivision (e) of section 86-2.2 of this Subpart.

(v) Notwithstanding the provisions of subparagraph (i), (ii) and (iii) of this paragraph, any facility which prior to April 1, 1991 has a rate approved and certified by the commissioner pursuant to section 2807 of the Public Health Law, which includes AIDS specific adjustments pursuant to this Subpart, or has been approved as an AIDS specific facility by the Public Health Council, and/or has had a certificate of need application approved or conditionally approved pursuant to Part 710 of this Title for the operation of a discrete AIDS unit shall have its rate determined in accordance with the following:

(a) The direct component of the rate shall be based on the statewide ceiling direct case mix neutral cost per day after application of the RDIPAF as determined pursuant to section 86-2.10 of this Subpart and a case mix proxy for AIDS patients established by the subparagraph, and increased by an occupancy factor of 1.225. The case mix proxy for AIDS patients shall be determined as follows:

(1) A facility which was approved based on a written application for establishment and/or construction which indicated that a majority of its AIDS patients would fall into patient classification groups with a case mix index exceeding 0.83 prior to application of any AIDS factors or increments identified in this subdivision shall be assigned a case mix proxy as determined by the following:

(i) For its first three months of operation, the facility shall be assigned a case mix proxy of 2.32.
New York
59(c)
Withdrawn

TN #93-04  Approval Date July 24, 1996
Supersedes TN #91-25  Effective Date April 1, 1993
New York
59(d)

(ii) The indirect component of the rate for facilities identified in subclause (2) of this clause shall be equivalent to the ceiling indirect price per day of the low intensity peer group established pursuant to paragraph (2) of subdivision (d) of section 86-2.10 of this Subpart after application of the RIIPAF as determined pursuant to section 86-2.10 of this Subpart and increased by the indirect AIDS factor as determined pursuant to subdivision (p) of section 86-2.10 of this Subpart.

(4) For purposes of this subparagraph, the allowable costs for the central service supply functional cost center as listed in paragraph (1) of section 86-2.10(c) shall be considered a non-comparable cost.

(5) Rates developed pursuant to this subparagraph shall remain in effect until a facility submits financial and statistical data pursuant to section 86-2.2(e) of this Subpart[, but for a period not to exceed 18 months from the effective date of such rate, or April 1, 1991 whichever is later. If a rate pursuant to subdivision (e) of section 86-2.2 of this Subpart cannot be established within this 18 month period, a facility shall have the operational component of its rate determined pursuant to subparagraphs (i), (ii), and (iii) of this paragraph which will be effective on the first day of the month following the 18 month period referenced in this subclause].
The rates developed pursuant to this section shall remain in effect until a facility submits a twelve-month cost report in accordance with Section 86-2.2(e) of this Subpart for a twelve-month period during which the facility had an overall average utilization of at least 90 percent of bed capacity. This cost report shall be used to adjust the direct, indirect, noncomparable and capital components of the rate effective on the first day of the cost report. However, for a facility that did not or does not achieve 90 percent or greater overall average utilization for any year within 5 calendar years from the date of commencing operation, the rates will be recalculated utilizing the facility's most recently available reported allowable costs divided by patient days imputed at 90 percent. Such recalculated rates shall be effective January 1 of the 6th calendar year following the date the facility commenced operations, or April 1, 2006, whichever is later.

All rates of reimbursement certified pursuant to this section shall be subject to audit pursuant to Section 86-2.7 of this Subpart. After audit, the facility shall receive a rate based upon actual allowable costs incurred during the rate period and computed in accordance with Section 86-2.10 of this Subpart. Except as described in Section 86-2.19(d)(2) of this Subpart, an occupancy rate of not less than 90 percent shall be used when calculating the capital and noncomparable components in rate calculation.

Notwithstanding the provisions of this section, an operator of a facility which has had an overall average utilization of at least 90 percent of bed capacity for a six-month period which began prior to April 1, 1993, but after the date on which the operator began operations shall submit a six-month cost report for that period. Such six-month cost report shall be utilized for purposes of this section in lieu of the twelve-month cost report identified in subdivision (e) of Section 86-2.2 of this Subpart.
New York  
59(f)

(6) **Long-term inpatient rehabilitation program for traumatic brain-injured residents (TBI).**

A facility which is approved to operate discrete units for the care of residents under the long-term inpatient rehabilitation for TBI patients shall have separate and distinct payment rates established pursuant to this subdivision as follows:

(i) For the first three months of operation, the direct component shall be equivalent to the statewide mean direct case mix neutral cost per day established pursuant to subparagraph (iii) of paragraph (3) of subdivision (c) of section 86-2.10 increased by a factor of 3.28 and adjusted by the RDIPAF pursuant to section 86-2.10. The direct component shall be further increased by an occupancy factor of 1.225 for the first six months of operation. The facility shall perform an assessment of all residents, pursuant to section 86-2.30, at the beginning of the fourth month of operation and at the beginning of each third month for the period set forth in paragraph 1 of this subdivision. Effective on the first day of the month of each assessment period, the direct component of the rate shall be adjusted pursuant to subdivision (c) of section 86-2.10 based on the facility’s case mix. The case mix index which is used to establish the facility specific mean direct price per day for each patient classification group pursuant to
paragraph (4) of subdivision (c) of section 86-2.10 for TBI residents shall be increased by an increment of 1.49.

(ii) The indirect component of the rate shall be equivalent to the mean indirect price developed pursuant to section 86-2.10(d) of this Subpart for the applicable peer group established for high intensity case mix identified in paragraph (2) of subdivision (d) of section 86-2.10, adjusted by the RIPAF pursuant to 86-2.10(d). The indirect component shall be further adjusted by an occupancy factor of 1.225 for the first six months of operation.

(iii) The noncomparable component of the rate shall be determined as follows:

(a) For an existing facility that opens a discrete unit for the care of patients under the long-term inpatient rehabilitation program for TBI patients, the noncomparable component of the rate shall be equal to the noncomparable component of the existing residential health care facility’s rate computed pursuant to subdivision (f) of section 86-2.10 plus approved budgeted costs for personnel required by the Department to operate a TBI unit that would be reported in the functional cost centers identified in subdivision (f) of section 86-2.10.

(b) For a new facility without a residential health care facility rate computed pursuant to section 86-2.10, the noncomparable component of the rate shall be determined in accordance with paragraph (3) of this subdivision.
(iv) Rates established pursuant to this paragraph shall also include an adjustment pursuant to section 86-2.10(u) of this Subpart.

[(iv) The provisions of this paragraph will expire on December 31, 1994.]

(7) Long-term ventilator dependent residents.

A facility which is approved to operate discrete units for the care of long-term ventilator dependent patients as established pursuant to section 415.38 of this Title Appendix 2 of this State Plan shall have separate and distinct payment rates established pursuant to this subdivision as follows:

(i) For the first three months of operation, the direct component shall be equivalent to the statewide mean direct case mix neutral cost per day established pursuant to section 86-2.10(c)(3)(iii) of this Subpart increased by a factor of 2.89 and adjusted by the RDIPAF pursuant to section 86-2.10 of this Subpart. The direct component shall be further increased by an occupancy factor of 1.225 for the first six months of operation. The facility shall perform an assessment of all residents, pursuant to section 86-2.30 of this Subpart, at the beginning of the fourth month of operation and at the beginning of each third month for the period set forth in paragraph 1 of this subdivision. Effective on the first day of the month of each assessment period, the direct component of the rate shall be adjusted pursuant to this Subpart based on the facility's case
mix. The case mix index which is used to establish the facility specific mean direct price per day for each patient classification group pursuant to paragraph (4) of subdivision (c) of section 86-2.10 for long-term ventilator dependent residents shall be increased by an increment of 1.15.

(ii) The direct component of the rate shall be equivalent to the mean indirect price developed pursuant to section 86-2.10(d) for the applicable peer group established for high intensity case mix identified in paragraph (2) of subdivision (d) of section 86-2.10, adjusted by the RIPAF pursuant to section 86-2.10(d). The indirect component shall be further adjusted by an occupancy factor of 1.225 for the first six months of operation.

(iii) The noncomparable component of the rate shall be determined as follows:

(a) For an existing facility that is approved to operate discrete units for the care of long-term care ventilator residents, the noncomparable component of the rate shall be equal to the noncomparable component of the existing residential health care facility’s rate computed pursuant to subdivision (f) of section 86-2.10 plus approved budgeted costs as identified in clauses (c) and (d) of this subparagraph plus approved budgeted costs for personnel required by the Department to operate a ventilator-dependent unit that would be reported in the functional cost centers identified in subdivision (f) of section 86-2.10.
New York
59(j)

(b) For a new facility without a residential health care rate computed pursuant to section 86-2.10 of this Subpart, the noncomparable component of the rate shall be determined in accordance with paragraph (3) of this subdivision and include approved budgeted costs identified in clauses (c) and (d) of this subparagraph.

(c) The approved budgeted costs for the central service supply functional cost center as listed in section 86-2.10(c)(1) of this Subpart shall be considered a noncomparable cost reimbursed pursuant to section 86-2.10(f) of this Subpart.

(d) The approved budgeted costs for prescription drugs, specifically required by generally accepted standards of professional practice for long-term ventilator dependent residents, that are administered at a frequency and volume exceeding those of prescription drugs included in the direct component of the rate pursuant to subdivision (c) of this section shall be considered a noncomparable cost pursuant to [subdivision (f) of this] section 86-2.10(f) of this Subpart.

(iv) Rates established pursuant to this paragraph shall also include an adjustment pursuant to 86-2.10(u) of this Subpart.

[(v) The provisions of this paragraph will expire on December 31, 1994.]

TN #95-04 Approval Date June 4, 1999
Supersedes TN #93-04 Effective Date January 1, 1995
New York
59(k)

(8) Specialized programs for residents requiring behavioral interventions. A facility which is approved to operate discrete units specifically designated for the purpose of providing specialized programs for residents requiring behavioral interventions as established by the Department shall have separate and distinct payment rates established pursuant to this subdivision as follows:

(i) For the first three months of operation, the direct component shall be equivalent to the statewide mean direct case mix neutral cost per day established pursuant to subparagraph (iii) of paragraph (3) of subdivision (c) of section 86-2.10 of this Subpart increased by a factor of 2.65 and adjusted by the RDIPAF pursuant to section 86-2.10. The direct component shall be further increased by an occupancy factor of 1.225 for the first six months of operation. The facility shall perform an assessment of all residents, pursuant to section 86-2.30 of this Subpart, at the beginning of the fourth month of operation and at the beginning of each third month for the period set forth in paragraph 1 of this subdivision. Effective on the first day of the month of each assessment period, the direct component of the rate shall be adjusted pursuant to section (c) of this Subpart based on the facility’s case mix. The case mix index which is used to establish the facility’s specific mean direct price per day for each patient classification group pursuant to
paragraph (4) of subdivision (c) of section 86-2.10 for residents requiring behavioral interventions shall be increased by an increment of 1.40.

(ii) The indirect component of the rate shall be equivalent to the mean indirect price developed pursuant to section 86-2.10 for the applicable peer group established for high intensity case mix identified in paragraph (2) of subdivision (d) of section 86-2.10, adjusted by the RIIPAF pursuant to section 86-2.10(d). The indirect component shall be further adjusted by an occupancy factor of 1.225 for the first six months of operation.

(iii) The noncomparable component of the rate shall be determined as follows:

(a) For an existing facility that is approved to operate discrete units specifically designated for the purpose of providing specialized programs for residents requiring behavioral interventions, the noncomparable component of the rate shall be equal to the noncomparable component of the existing residential health care facility’s rate computed pursuant to subdivision (f) of section 96-2.10 plus required approved budgeted costs for personnel that would be reported in the functional cost centers identified in subdivision (f) of section 86-2.10 of this Subpart.

(b) For a new facility without a residential health care rate computed pursuant to section 86-2.10, the noncomparable component of the rate shall be determined in accordance with paragraph (3) of this subdivision.
(iv) Rates established pursuant to this paragraph shall also include an adjustment pursuant to section 86-2.10(u).

{(v) The provisions of this paragraph will expire on December 3, 1994.}
86-2.16 Less expensive alternatives.

Reimbursement for the cost of providing services may be the lesser of the actual costs incurred or those costs which could reasonably be anticipated if such services had been provided by the operation of joint central service or use of facilities or services which could have served effective alternatives or substitutes for the whole or any part of such service.
86-2.17 Allowable costs.

(a) To be considered as allowable in determining reimbursement rates, costs shall be properly chargeable to necessary patient care. Except as otherwise provided in this Subpart, or in accordance with specific determination by the commissioner, allowable costs shall be determined by the application of the principles of reimbursement developed for determining payments under title XVIII of the Federal Social Security Act (Medicare) program.

(b) Allowable cost shall include a monetary value assigned to services provided by religious orders and for services rendered by an owner and operator of a residential health care facility.

(c) Allowable costs may not include amounts in excess of reasonable or maximum title XVIII of the Federal Social Security Act (Medicare) costs or in excess of customary charges to the general public. For purposes of this determination, customary charges to the general public shall equal an average of the applicable charges weighted by patient days. This provision shall not apply to services furnished by public providers free of charge or at a nominal fee.

(d) Allowable costs shall not include expenses or portions of expenses reported by individual residential health care facilities which are determined by the commissioner not to be reasonably related to the efficient production of service because of either the nature or amount of the particular item.

(e) Any general ceilings applied by the commissioner, as to allowable costs in the computation of reimbursement rates, shall be published in a hospital memorandum or other appropriate manner.

TN #90-44 Approval Date July 11, 1994
Supersedes TN #86-4 Effective Date October 1, 1990
New York

62

(f) Allowable costs shall not include costs not properly related to patient care or treatment which principally afford diversion, entertainment or amusement to owners, operators or employees of residential health care facilities.

(g) Allowable costs shall not include any interest charged related to rate determination or penalty imposed by governmental agencies or courts, and the costs of policies obtained solely to insure against the imposition of such a penalty.

(h) Allowable costs shall not include the director or indirect costs of advertising, public relations or promotion except in those instances where the advertising is specifically related to the operation of the residential health care facility and not for the purpose of attracting patients.

(i) Allowable costs shall not include costs of contributions or other payments to political parties, candidates or organizations.

(j) Allowable costs shall include only that portion of the dues paid to any professional association which has been demonstrated, to the satisfaction of the commissioner, to be allocable to expenditures other than for public relations, advertising or political contributions. Any such costs shall also be subject to any cost ceilings that may be promulgated by the commissioner.

(k) Allowable costs shall not include any element of costs as determined by the commissioner to have been created by the sale of a residential health care facility.
(l) Allowable costs shall not include the interest paid to a lender related through control, ownership, affiliation or personal relationship to the borrower, except in instances where the prior approval of the Commissioner of Health has been obtained.

(m) Allowable costs shall be reduced by income earned for Medicare Part B eligible services to the extent that Medicaid has paid for these services.

(n) Allowable costs shall include any fee assessed by the Commissioner on a residential health care facility, for the purpose of providing revenue for the account established pursuant to Chapter 1021 of the Laws of 1981. The reimbursement rate for a facility shall reflect the cost of the annual fee prior to collection of the fee through the rate of reimbursement.

(o) For services provided on and after January 1, 2006, allowable costs shall not include an amount for prescription drugs for residents eligible for both Medicaid and for Part D of Title XVIII of the Social Security Act (Medicare) contingent upon implementation of such provision of the Federal Social Security Care Act in this State.

(p) For rate periods on or after October 1, 2010, residential health care facility Medicaid rates of payment will not include reimbursement for the cost of prescription drugs.
New York
64

86-2.18 Recoveries of expense.

(a) Operating costs shall be reduced by the costs of services and activities which are not properly chargeable to patient care. In the event that the State Commissioner of Health determines that it is not practical to establish the costs of such services and activities, the income derived therefrom may be substituted for costs of these services and activities. Examples of activities and services covered by this provision include:

(1) Drugs and supplies sold to other can employees for use outside the residential health care facility;

(2) telephone and telegraph services for which a charge is made;

(3) discount on purchases;

(4) living quarters rented to persons other than employees;

(5) meals provided to special nurses or patients’ guests;

(6) operation of parking facilities for community convenience;

(7) lease of office and other space of concessionaires providing services not related to residential health care facility service; and

(8) tuitions and other payments for educational service, room and board and other services not directly related to residential health care facility service.

(b) Operating costs shall be reduced by the actual revenue received from services and activities which are provided to employees at less than cost, as a form of fringe benefit. Examples of activities and services covered by this provision include:

(1) drugs and supplies sold or provided to employees;

(2) living quarters rented or provided to employees; and

(3) meals sold or provided to employees.
86-2.19 Depreciation for voluntary and public residential health care facilities.

(a) Reported depreciation based on approved historical cost of buildings, fixed equipment and capital improvements thereto is recognized as a proper element of cost for voluntary and public residential health care facilities. Useful lives shall be the higher of the reported useful life or those useful lives from the most recent edition of Estimated Useful Lives of Depreciable Hospital Assets, American Hospital Association.

(b) In the computation of rates effective for voluntary residential health care facilities, depreciation shall be included on a straight line method of plant and nonmovable equipment. Depreciation shall be funded unless the Commissioner of Health shall have determined, upon application by the residential health care facility, and after inviting written comments from interested parties, that the requested waiver of the requirements for funding is a matter of public interest and necessity. In instances where funding is required, such fund may be used only for capital expenditures with approval as required for the amortization of capital indebtedness. Funding for plant and fixed equipment shall mean that the transfer of monies to the funded accounts shall occur by the end of the fiscal period in which the depreciation is recorded. Board-designated funds and the accrual of liabilities to the funded depreciation accounts (due to/from accounts) shall not be recognized as funding of depreciation. Deposits to the funded depreciation accounts must remain in such accounts to be considered as valid funding transactions unless expanded for the purpose for which it was funded.

(c) In the computation of rates for public residential health care facilities, depreciation is to be included on a straight line method on plant and nonmovable equipment.

(d) Residential health care facilities financed by mortgage loans pursuant to the Nursing Home Companies Law or the Hospital Mortgage Loan Construction Law (defined as “facilities” for purposes of this subdivision only) shall conform to the requirements of this Subpart.

(1) In lieu
of depreciation and interest, on the loan-financed portion of the facilities the State Commissioner of Health shall allow debt service on the mortgage loan as set forth in the mortgage prepayment schedule computed by the Medical Care Facilities Finance Agency, together with such required fixed charges, sinking funds and reserves as may be determined by the Commissioner as necessary to assure repayment of the mortgage indebtedness. Such mortgage repayment schedule may allow for the accelerated repayment of the mortgage indebtedness. Such mortgage repayment schedule may allow for the accelerated repayment of the soft costs, including, but not limited to, mortgage and bone insurance costs, start-up operating costs, underwriter discounts, government agency fees and investment contract fees, included in the approved total project cost.

(2) Effective January 1, 1995 for facilities in an initial period of operation, facilities which have approved discrete units serving specialty populations as defined in paragraphs (5), (6), (7) and (8) of section 86-2.15(b) of this Subpart, which serve AIDS residents, long term ventilator dependent residents, residents requiring behavioral interventions in specialized programs or traumatic brain injured residents who receive long term inpatient rehabilitation, respectively, shall be reimbursed for certain capital expenditures requiring a cash outlay as follows:

(i) Debt service amortization and interest, property insurance and SONYMA annual fees shall be divided by an estimate of patient days in the calculation of the capital component of the specialty population unit rate that is promulgated for the initial period of operation.

(a) An estimate of patient days shall be determined by the department based on a reasonable projection of utilization during the initial period of operation. The reasonable projection of utilization shall be based on prior initial utilization of similarly situated facilities, and information that may have been submitted to the department by the facility as to the anticipated demand for the service.
New York
65(b)

(b) Initial period of operation is defined as the period commencing on the initial effective date on which the facility is certified by the department to begin operation of the discrete unit(s) identified in paragraph (2) of this subdivision, and ending on the last day of the twelfth month of continuous operation or the beginning date of the initial cost report filed in accordance with subdivision (e) of section 86-2.2 of this Subpart, whichever is shorter.

(ii) The capital component of the facility’s rate for the initial period of operation shall be subject to audit for utilization based on actual patient days in the initial period of operation. Such capital component of the rate shall be retrospectively or prospectively adjusted based on such audit.

(e) In the computation of rates for voluntary residential health care facilities which are rented for proprietary interests, the provisions of section 86-2.21 of this Subpart shall apply, except where the realty was previously owned by the voluntary residential health care facility or where the proprietary interest has representation on the board of directors of the voluntary residential health care facility.

(f) (1) In the event that a residential health care facility is sold or leased or is the subject of any other realty transaction, the capital cost component of such rate shall be considered to be continuing with the same force and effect as though such sale, lease or other realty transaction has not occurred.

(2) A lease with a related organization described in subdivisions (a) or (d) of section 86-2.26 of this subpart shall be deemed to be a non-arms length lease.

(3) Any capital expenditures associated with non-arms length leases shall be approved and certified to if required under the RHCF Certificate of Need process. In the computation of reimbursement for non-arms length leases, the capital cost shall be included in allowable costs only to the extent that it does not exceed the amount which the facility would
have included in allowable costs if it had legal title to the asset (the cost of ownership), such as straight-line depreciation, insurance, and interest. Accelerated depreciation on these assets may not be included in allowable costs under any circumstances.

[(4) If a facility enters into a sale and leaseback agreement with a nonrelated purchaser involving plant facilities or equipment, the incurred rental specified in the agreement is includable in allowable costs if the following conditions are met:

(i) the rental charges are reasonable based on consideration of rental charges of comparable equipment and market conditions in the area; the type, expected life, condition and value of the equipment rented and other provisions of the rental agreements;

(ii) adequate alternate equipment which would serve the purpose are not or were not available at a lower cost; and

(iii) the leasing was based on economic and technical considerations;

(iv) if all these conditions were not met, the rental charge cannot exceed the amount which the provider would have included in reimbursable costs had it retained legal title to the equipment, such as interest, taxes, depreciation, insurance, and maintenance costs.

(v) If a facility enters into a sale and leaseback agreement with a nonrelated purchaser involving land, the incurred rental cost for the land shall not be includable in allowable costs.]

(g) (1) The provisions of subdivision (a) of this section may be waived for certain qualifying facilities. In order to be considered a qualifying facility, all of the following conditions must be met:

(i) A sale or transfer between nonrelated parties must take place...
(ii) The purchaser must assume the seller’s remaining mortgage repayment schedule at the associated fixed rate of interest.
(iii) The difference between the unpaid principal balance of the seller's mortgage (first mortgage) and the Medicaid-allowable transfer price must be generated either from second mortgage proceeds or contributed equity capital or both.

(iv) The annual amount of allowable interest expense incurred as described in section 86-2.20 of this Subpart under terms of the first and second mortgage, plus the annual principal debt amortization, exclusive of that portion attributable to the acquisition of land must be less than that which would otherwise be reimbursed pursuant to subdivision (a) of this section and section 86-2.20 of this Subpart if no assumption of the existing first mortgage were made. (This comparison hereinafter referred to as the comparative analysis test.)

(v) For purposes of this subdivision, the loan financed portion of the Medicaid-allowable transfer price shall be held constant and the comparative analysis test shall be applied to each year of the effective term of the first and second mortgages. Equity capital will be considered as first applying to the acquisition of the land, then to the acquisition of the building. In instances where more than one facility is involved in the transaction, the facilities may be combined for purposes of the comparative analysis test.

(2) Qualifying facilities shall be reimbursed principal debt amortization, interest and return on equity in the following manner:
(i) **Principal debt amortization.**

In each year, during the effective term of the mortgage, the capital cost component of the rate shall include a payment factor sufficient to reimburse the principal debt amortization component of the allowable portion of the mortgage, with the exception of that portion of the indebtedness which is attributable to the acquisition of the land.

(ii) **Interest.**

The capital cost component shall include a payment factor sufficient to reimburse interest associated with the allowable portion of the mortgage at a rate which the commissioner finds to be reasonable and is in accordance with the provisions of section 86-2.20 of this Subpart.

(iii) **Return of equity.**

The equity portion of the Medicaid-allowable transfer price, except for that portion which is attributable to the acquisition of the land, shall be reimbursed in equal annual amounts beginning in the first year following the expiration of the term of the mortgages over the remaining useful facility life.
[86-2.20] Interest for all residential health care facilities.

(a) Necessary interest on both current and capital indebtedness is an allowable cost for all residential health care facilities.

(b) To be considered as an allowable cost, debt-generating interest shall be incurred to satisfy a financial needs, and interest expense shall be at a rate not in excess of what a prudent borrower would have had to pay in the money market at the time the loan was made. Also, the interest shall be paid to a lender not related through control, ownership, affiliation or personal relationship to the borrower, except in instances where the prior approval of the Commissioner of Health has been obtained. Financial need for capital indebtedness relating to a specific project shall exist when all available restricted funds designated for capital acquisition of that type have been considered for equity purposes.

(c) (1) Interest expense shall be reduced by investment income with the exception of income from funded depreciation, qualified pension funds, trustee malpractice insurance funds, or in instances where income from gifts or grants is restricted by donors. Interest on funds borrowed from a donor-restricted fund or funded depreciation is an allowable expense. Investment income shall be defined as the aggregate net amount realized from dividends, interest, rental income, interest earned on temporary investment of withholding taxes, as well as all gains and losses. If the aggregate net amount realized is a loss, the loss is not allowable.

(2) For rate years beginning prior to January 1, 1994, investment income reported for the fiscal year ending December 31, 1983, (or for a subsequent fiscal year if that subsequent year’s report is being used by the department to establish the basic rate pursuant to section 86-2.10 of this Subpart) shall reduce the interest expense allowed for reimbursement as follows:

(i) For all residential health care facilities, investment income shall first reduce the interest expense allowed each year for operational cost reimbursement; and

(ii) the amount of any remaining investment income, after application of subparagraph (i), shall reduce the interest expense reimbursed each year as capital cost for residential health care facilities; and
(d) Interest on current indebtedness shall be treated and reported as an operating, administrative expense. Effective April 1, 2006 and thereafter, rates of payment shall not include a payment factor for interest on current indebtedness if the cost report utilized to determine such payment factor also shows a withdrawal of equity, a transfer of assets, or a positive net income.

(e) Interest on capital indebtedness, as defined in paragraph 86-2.21(a)(1) of this Subpart, except as provided for in section 86-2.2(c) of this Subpart for rate years beginning January 1, 1986 and thereafter, is an allowable cost if the debt generating the interest is approved by the Commissioner, incurred for authorized purposes, and the principal of the debt does not exceed either the approval of the Commissioner or the cost of the

(iii) the amount of any remaining investment income after application of subparagraph (ii), shall not be considered in the computation of the rate.

(3) For rate years beginning on or after January 1, 1994, investment income reported for the same year year used to compute capital cost reimbursement for a facility's rate shall reduce the interest expense allowed for reimbursement, as provided in sub-paragraph (c)(2)(i)-(iii) of this section.

(d) (1) Interest on current indebtedness shall be treated and reported as an operating, administrative expense for rate years beginning prior to January 1, 1994. For rate years beginning on or after January 1, 1994, interest on current indebtedness, reported for the same cost report period used to compute capital cost reimbursement for a facility's rate, shall be reported as an administrative expense and reimbursed as a nontrendable expense. Effective April 1, 2006 and thereafter, rates of payment shall not include a payment factor for interest on current indebtedness if the cost report utilized to determine such payment factor also shows a withdrawal of equity, a transfer of assets, or a positive net income.

(2) (a) Approval by the Commissioner shall be required for reimbursement of interest expense on current indebtedness incurred on or after January 1, 1994 when such interest expense exceeds the threshold established for that calendar year. The threshold for each calendar year shall be equal to the prime lending rate as published in the first issue of the Wall Street Journal for the calendar year plus 200 basis points (200 points equals 2%) on a loan principal of $270,000 for facilities with 120 or less beds or $270,000 plus an additional $2,250 for each bed over 120 for facilities with more than 120 beds. Approval shall be granted in accordance with the standards set forth in subdivision (b) of this section. Prior approval shall not be required.

* For example, for a home with 100 beds (i.e., less than 120) the threshold would be prime rate +2% applied to $270,000. For a home having 150 beds, the threshold will be the prime rate + 2% applied to $270,000 + $2,250 (30 beds) or $337,500.

(b) New facilities without adequate cost experience whose rates are calculated pursuant to section 86-2.15 of this Subpart shall be exempt from the requirements in subparagraph (a) until January 1st of the first calendar year used as the basis for
computing capital cost reimbursement and for which a cost report is filed subsequent to the cost report described in section 86-2.2(e) of this Subpart. This exemption shall not apply to operating facilities that open new discrete units providing services reimbursed in accordance with the provisions of paragraphs (5), (6) and/or (7) of section 86-2.15(b) of this Subpart or other similar discrete units providing care to residents with special needs that receive a separate and distinct payment rate under section 86-2.15 of this Subpart.

(c) The interest expense threshold for facilities operated by receivers or new operators who are required to file a cost report for the first twelve-month period of operation pursuant to section 86-2.10(k) of this Subpart shall be established for that cost report period in accordance with subparagraph (a) of this paragraph, using the prime lending rate in effect on January 1st of the year in which the cost report period begins.

(e) Interest on capital indebtedness, as defined in paragraph 86-2.2(a)(1) of this Subpart, except as provided for in section 86-2.20(c) of this Subpart for rate years beginning January 1, 1986 and thereafter, is an allowable cost if the debt generating the interest is approved by the commissioner, incurred for authorized purposes, and the principal of the debt does not exceed either the approval of the commissioner or the cost of the authorized purposes. Interest related to refinancing indebtedness shall be considered an allowable cost only to the extent that it is payable with respect to an amount equal to the unpaid principal of the indebtedness [than] being refinanced. However, interest incurred on refinanced debt in excess of the previously unpaid balance of the refinanced indebtedness will be allowable on acceptable demonstration [of] to the Commissioner of Health that such refinancing will result in a debt service savings over the life of the indebtedness.

(f) Where a public finance authority has established a mortgage rate of interest such that sufficient case flows exist to retire the mortgage prior to the stated maturity, the amount of the mortgage to be forgiven, at the time of such forgiveness, shall be capitalized as a deferred asset and amortized over the remaining mortgage life, as a reduction to the facility's capital expense.

Approval Date October 10, 2006
Effective Date April 1, 2006
86.2.21 Capital Cost reimbursement for proprietary residential health care facilities.

(a) Definitions.

As used in this section, the following terms shall be defined as follows:

(1) **Capital indebtedness.**

The term *capital indebtedness* shall mean all debt obligations of a facility that are:

(i) evidenced by a mortgage note or bond and secured by a mortgage on the land, building or nonmovable equipment of a facility or evidenced by a note incurred in accordance with subparagraph (ii) of this paragraph;

(ii) incurred for the purpose of financing the acquisition, construction or renovation of land, building or nonmovable equipment (hereinafter called the “authorized purpose”); and

(iii) found by the commissioner to be reasonable, necessary and in the public interest with respect to the facility in accordance with standards set forth in section 86-2.21(e)(3)(ii) of this Subpart. Refinancing of capital indebtedness shall be recognized only to the extent of the then unpaid balance of the debt being refinanced.

(2) **Commissioner.**

The term *commissioner* shall mean the Commissioner of Health of the State of New York.
(3) **Department.**

The term *department* shall mean the Department of Health of the State of New York.

(4) **Equity.**

The term *equity* shall mean all cash or other assets, net of liabilities, invested by a facility or its operator in land, building and nonmovable equipment, and found by the commissioner to be reasonable, necessary and in the public interest with respect to the facility. *Equity* shall not include any change in the book value of a facility resulting from reevaluation of assets or from the amortization of capital indebtedness resulting from payments made pursuant to subdivision (e), paragraph (3) of this section.

(5) **Facility.**

The term *facility* shall mean a proprietary residential health care facility, as the term *residential health care facility* is defined in article 28 of the Public Health Law and in regulations of the department.

(6) **Initial allowed facility cost.**

The term *initial allowed facility cost* shall mean the portion of certified costs approved by the commissioner or, in the case of facilities granted operating certificates prior to April 15, 1973, the costs of the facility as verified by audit to the satisfaction of the commissioner or, in the case of facilities not able to comply with either of the foregoing standards, costs imputed.
pursuant to subdivision (g) of this section, in or prior to the first year of useful facility life attributable to the acquisition of land and the construction, acquisition or renovation of building and nonmovable equipment. The commissioner shall disregard any costs relating to prior transactions involving the facility which he finds were not bona fide or the terms of which are found to be other than fair and reasonable.

(7) **Useful facility life.**

The term *useful facility life* shall mean a period of 40 years measured from the calendar year in which a facility commences operations as determined by the commissioner.

(8) **Rate of return.**

The term *rate of return* shall mean the annual rate of return on equity invested, [as said rate is determined by the United States Department of Health, Education and Welfare as an element of reasonable cost for purposes of payments to or reimbursement of proprietary providers under title XVIII of the Federal Social Security Act.] and said rate for a rate year shall be equal to the yield on thirty year United States Treasury bonds in effect on the second Wednesday of September of the year prior to the rate year.

(9) **Capital improvement.**

The term *capital improvement* shall mean any addition to, replacement of, or improvement of a capital item of plant or nonmovable equipment approved by the commissioner as reasonable, necessary and in the public interest.
(10) **Capital improvement cost.**

The term *capital improvement cost* shall mean the actual expenditure or portion thereof attributable to a capital improvement approved by the commissioner as reasonable, necessary and in the public interest.

(11) **Hospital-based residential health care facility.**

The term *hospital-based residential health care facility* shall mean a facility holding a certificate of operation as a residential health care facility which is wholly owned by a hospital as that term is defined in Subpart 86-1 of this Title, and is physically located in a building or buildings, part of which building or buildings are also used for provision of acute care hospital services.

(12) **Effective term.**

The term *effective term* shall mean the number of years and months required, pursuant to the term of the note or mortgage, to fully amortize the principal of debt, predicated upon the regular principal payments required by the mortgage or note, but determined without regard to any provision for making the balance all due and payable at a given date or upon a stated event, and without regard to any provision for acceleration of the debt or any original or subsequent agreement for the suspension or moratorium of principal payments.

(b) Subject to subdivision (f) of this section, the reimbursement rate of every facility certified by the commissioner

---

**TN #86-4**

**Supersedes TN #82-30**

**Approval Date** July 29, 1987

**Effective Date** January 1, 1986
and approved by the State Director of the Budget pursuant to article 28 of the Public Health Law shall, in each year of useful facility life, include a capital cost component determined in accordance with the provisions of subdivision (c), (d) or (e) of this section applicable to the facility in such year.

(c) (1) The provisions of subdivision (e) of this section shall not apply for the term prescribed by paragraph (3) of this subdivision to any facility which, as of the effective date of this section, is located in and operated from leased space pursuant to a lease:

(i) which was entered into and approved for reimbursement prior to March 10, 1975; and

(ii) which the commissioner finds to be bona fide, valid and noncancelable; and

(iii) the payments, or a portion thereof, made pursuant to such lease are found by the commissioner to have been the proper basis for reimbursement of capital cost paid to such facility pursuant to article 28 of the Public Health Law prior to March 10, 1975.

(2) The capital cost component of a facility within the provisions of paragraph (1) of this subdivision shall, for the term prescribed by paragraph (3) of this subdivision, consist of
a payment factor sufficient to reimburse the facility for the total payments required under its lease to the extent approved by the commissioner pursuant to paragraph (1) of this subdivision, and subject to the historical limitations set by the commissioner.

(3) Capital cost reimbursement for leased facilities shall be made pursuant to this subdivision for the balance of the lease term (computed without regard to any future extension or option to renew authorized by the lease) remaining as of the effective date of this subdivision. Upon the expiration of such balance of the lease term provided in an approved lease (as said lease so provides as of August 1, 1977) or such earlier expiration date as may be agreed to by the parties to an approved lease, capital cost reimbursement shall be made pursuant to subdivision (e) of this section notwithstanding any extension or renewal of such lease or the execution of a new lease by or on behalf of the facility, provided, however, that the commissioner may, in his discretion, continue capital cost reimbursement for such leased facilities pursuant to this subdivision, at a rental amount approved by the commissioner prior to such extension or renewal, and not pursuant to subdivision (e), upon his finding that there is a public need
for such facility at the time and place and under the circumstances proposed and that the continued operation of such facility would be jeopardized by a limitation of reimbursement pursuant to subdivision (e).

(4) A lease with a related organization described in subdivisions (a) or (d) of section 86-2.26 of this subpart shall be deemed to be a non-arms length lease.

(5) Any capital expenditures associated with non-arms length leases shall be approved and certified to, if required, under the hospital certificate of need process. In the computation of reimbursement for non-arms length leases, the capital cost shall be included in allowable costs only to the extent that it does not exceed the amount which the facility would have included in allowable costs if it had legal title to the asset (the cost of ownership), such as straight-line depreciation, insurance, and interest. Accelerated depreciation on these assets may not be included in allowable costs under any circumstances.

(6) If a facility enters into a sale and leaseback agreement with a nonrelated purchaser involving plant facilities or equipment, the incurred rental specified in the agreement shall be included in allowable costs if the following conditions are met:

   (i) the rental charges are reasonable based on consideration of rental charges of comparable equipment and market conditions in the area;
New York
77(a)

(d) The provisions of subdivision (e) of this section shall not apply to hospital-based residential health care facilities. Such facilities will be reimbursed pursuant to capital cost [regulations] section in [Subpart 86-1] Attachment 4.19-D Part I [of this part].

(e) (1) Subject to the provisions of subdivisions (c), (d) and (f) of this section, the capital cost component for every facility shall consist of the payment factors provided in this subdivision that, in any year of useful facility life, are applicable to the facility.

(2) Interest.

The capital cost component shall, in each year of useful facility life, include a payment for factor sufficient to reimburse, at a rate which the commissioner finds to be reasonable under the circumstances prevailing at the time of the placing of the capital indebtedness, interest on capital indebtedness.

Effective April 23, 2015, for purposes of effectuating a shared saving program, facilities that elect to refinance existing approved debt service, on or after April 23, 2015, medical assistance payments for real property costs will include 50% of the savings attributable to the refinancing. Such refinancing must be approved by the Department. Savings will be calculated each year based upon expenses that correspond only to the refinance portion of the new encumbrance relative to what it would have been absent the refinancing.

(3) Amortization.

(i) Subject to the limitations of paragraph (5) of this subdivision, the capital cost component shall, in each year of useful facility
life, include a payment factor sufficient to reimburse the amortization component of capital indebtedness pursuant to the terms of the mortgage note or bond.
(ii) The capital indebtedness of a facility, to the extent that the original principal of such debt does not exceed the initial allowed facility cost of the facility shall be recognized as follows:

(a) For capital indebtedness with an effective term of 10 years of less, amortization expense will be recognized for the purpose of reimbursement only, if the schedule of debt amortization is within the limitation set forth in section 86-2.21(e)(5) of this Subpart for each of the years of debt amortization.

(b) For capital indebtedness with an effective term in excess of 10 years, amortization expense will be recognized for the purpose of reimbursement upon a determination by the commissioner that the following standards are met:

(1) the debt is incurred for authorized purposes;

(2) the interest rate is reasonable for the time and place in which the capital indebtedness is committed, and for the type of indebtedness associated with the interest rate;
New York

79

(3) the amortization schedule is reasonable (amortization must be required in each year of the mortgage in accordance with the established financial practices);

(4) the effective term is consistent with customary commercial practices in the geographic area of the facility; and

(5) the effective term is in accordance with efficient production of services.

c) For capital indebtedness other than first mortgages, the amortization expense will be recognized for the purpose of reimbursement upon a determination by the commissioner that the debt, complies with the standards set forth in section 86-2.21(e)(3)(ii)(b) of this Subpart, and the following additional standards:

(1) they must be incurred for the purpose of financing either an approved purchase or construction of a facility; and

(2) the effective term of financing for a capital improvement is reasonable when compared to the estimated useful life of the improvement.

(d) Capital indebtedness for any unauthorized purpose will not be recognized for any reimbursement purpose.
(4) **Return of equity.**

Subject to the limitations of paragraph (5) of this subdivision, the capital cost component shall include a payment factor sufficient to return equity. A facility shall be eligible for the return of equity commencing in the first year following the department’s determination, among other factors, that the facility has the ability to meet current capital indebtedness (including principal and interest) over the balance of useful facility life. This shall mean that within the confines of the regulations expressed in this Subpart, capital reimbursement will be sufficient to provide for the remaining amortization of capital indebtedness. The commissioner’s determination shall also take into account such factors as the age, size, location and condition of the facility, and the financial condition of the facility.

(5) **Limitation.**

(i) Annual reimbursement payments for capital cost under paragraphs (3) and (4) of this subdivision shall not at any time result in a cumulative average payment in excess of three and three one-hundredths percent of initial allowed facility cost. For years prior to 1981, actual amortization or depreciation paid by Medicaid will be used in the computation of the limitation. For years prior to Medicaid or in years when Medicaid payments did not include an expense equivalent of depreciation or amortization, a three and three one-hundredths percent payment will be imputed.
(ii) This limitation may be waived by the commissioner where a facility applies to the commissioner for approval to finance an existing mortgage because its recognized amortization expense exceeds the amount of allowable reimbursement for amortization of principal and interest expense (including credit from prior amortization reimbursement). In those instances where the commissioner determines that it would be more expensive to reimburse the debt service that would be incurred if the facility refinanced the remaining principal, than it would be to continue to reimburse the debt service on the existing mortgage, the commissioner may reimburse up to the actual debt service incurred by the facility under the existing mortgage, plus return on equity in accordance with the provisions of paragraph (6) of this subdivision.

(6) **Return on equity.**

The capital cost component for every facility shall include a payment factor sufficient to pay an annual rate of return on average equity, as such average annual equity shall be determined by the commissioner in each year of useful facility life.

(7) **Residual reimbursement.**

After the expiration of useful facility life, the commissioner may approve a payment
factor for any facility for which he determines that continued capital cost reimbursement is appropriate; provided, however, that such payment factor shall not exceed one half of the capital cost reimbursement received by such facility in the final year of useful facility life.

(8) **Capital improvement cost reimbursement.**

(i) The capital improvement cost shall be reimbursed by adjusting the initial allowed facility cost, capital indebtedness, equity determinations and limitations as stated in paragraph (5) of this subdivision, to include the capital improvement cost.

(ii) Adjustments in accordance with subparagraph (i) of this paragraph shall be made in the following manner:

(a) if the cost of an improvement is $100,000 or more, and certificate of need approval has been granted by the commissioner, then component useful life for the improvement will be permitted. Such component useful life will be equivalent to the estimated asset life in accordance with the *Medicare Provider Reimbursement Manual* or the remaining useful life of the facility, whichever is less. Where a capital improvement adjusts the expected useful life of the facility beyond the remaining portion of the original useful facility life, the limitation set
forth in section 86-2.21(e)(5) of this Subpart, will be increased to allow for the reimbursement of the amortization component of the debt obtained to finance the improvement.

(b) If the cost of an improvement is less than $100,000, then the cost will be reimbursed over the remaining portion of the expected useful life. In such instances the reimbursement will commence with either the reporting of such costs on an annual certified cost report or, upon submission of a cost report, certified by an independent public accountant, whichever is submitted first. In either event, the reporting of such costs must be accompanied by a sworn statement by the administrator or the chief fiscal officer of the facility to the effect that the improvements made are not part of a number of planned related projects which, in the aggregate, total $100,000 or more.

(c) If the cost of an improvement is less that $100,000 and:

(1) is undertaken as the result of an emergency situation;
(2) affects the health and safety of the patients; and

(3) the facility can demonstrate dire financial condition;

then the limitation set forth in [section 86-2.21(e)(6) of this Subpart] the Limitation subsection of the Capital Cost Reimbursement for Proprietary Residential Health Care Facilities section of this Attachment will be modified to allow for the reimbursement of the debt service associated with the financing of the approved capital improvement over the effective term of the obligation or five years, whichever is greater. Any contribution to the improvement by the facility and not financed by the debt obligation will be considered an equity contribution and an adjustment to the facility's total capital equity will be made.

(d) If a facility undertakes an authorized improvement without incurring additional debt, then the facility will receive a return on equity and, when a determination has been made in accordance with the [section 86-2.21(e)(4) of this Subpart] Return of Equity subsection of the Capital Cost Reimbursement for Proprietary Residential Health Care Facilities section of this Attachment, a return of equity, for the funds invested in the improvement.

(e) Effective April 1, 2009, any proprietary facility entitled to residual reimbursement, will have the capital cost component of its rate recalculated by the Department to take into account any capital improvements and/or renovations made to the facility's existing infrastructure for the purpose of converting beds to alternative long-term care uses or protecting the health and safety of patients, subject to the approval of the Commissioner and all applicable certificate of need requirements. Capital improvements and/or renovation costs that are not related to the provision of nursing facility services are not eligible to be reimbursed in the capital cost component of the nursing home rate.

(e) Effective April 1, 2011, through March 31, 2012, the capital cost component of the Medicaid rate shall reflect:

(1) The elimination of the payment factor for return on equity on real property, moveable equipment and operating assets, and

(2) A reduction in the payment factor for return of equity on real property which is calculated as follows:
New York
84(a)

a) If the balance of useful life is currently five years or less, such useful life will be increased by 100 percent.

b) If the balance of useful life is currently six years or more, such useful life will be increased by five years.

The provisions of this paragraph will not apply to facilities which are entitled to residual reimbursement.

Effective for periods June 1, 2012 through December 31, 2012, the capital cost component of the Medicaid rate will reflect:

(1) The elimination of the payment factor for return on equity on real property, moveable equipment and operating assets, and

(2) A reduction in the payment factor for return of equity on real property which is calculated as follows:

a) the balance of useful life on January 1, 2012, will be increased by four years.

The provisions of this paragraph will not apply to facilities which are entitled to residual reimbursement.

Effective for annual periods beginning January 1, 2013, the capital cost component of the Medicaid rate will reflect:

(1) The elimination of the payment factor for return on equity on real property, moveable equipment and operating assets, and

(2) A reduction in the payment factor for return of equity on real property which is calculated as follows:

a) the balance of useful life on January first of the prior year will be reduced by one year.

The provisions of this paragraph will not apply to facilities which are entitled to residual reimbursement.

(f) With respect to facilities granted operating certificates prior to March 10, 1975, the Commissioner will modify or
provide exceptions to subdivision (c) or (e) of this section in circumstances where he finds that application of the provisions of either subdivision would result in (i) excessive reimbursement to the facility, or (ii) severe economic hardship to the facility not caused by circumstances reasonably under the control of the facility. In determining severe economic hardship, the commissioner shall consider such factors as debt service required on capital indebtedness, prior withdrawal of assets from the facility, and the financial condition of the facility in general. In such cases where the commissioner makes a finding of severe economic hardship, the capital cost component of the rate shall not exceed the debt service on capital indebtedness.

(2) The commissioner may revise the capital cost component of the reimbursement rate applicable to any facility which he determines is based upon previous error, deceit or any other misrepresentation or misstatement by the facility.

(3) The capital cost component shall not be affected by any sale, lease or transfer occurring after March 10, 1975.

(g) In lieu of determining initial allowed facility cost pursuant to subdivision (a) of this section, the commissioner may estimate the original fair and reasonable cost of the facility with due regard for the fair and reasonable cost of facilities of comparable age, size, location and condition, and impute an initial allowed facility cost to:
every facility for which records on the historical cost or book value of land, building or nonmovable equipment are not available or not verifiable to the satisfaction of the commissioner;

(2) every leased facility which, as of the effective date of this section, is not eligible for reimbursement pursuant to subdivision (c) of this section;

(3) every facility which, after the effective date of this section, ceases to be eligible for reimbursement pursuant to subdivision (c) of this section and becomes eligible for reimbursement pursuant to subdivision (e) of this section; or

(4) every facility whose construction was completed prior to the calendar year in which this section becomes effective and whose initial facility year occurs in or after the calendar year in which this section becomes effective.

(h) In the event that a facility fails to submit information necessary for the implementation of this section, after notification pursuant to subdivision (f) of section 86-2.2 of this Subpart, the capital cost component of the rate shall consist of interest, if reported, and amortization not in excess of the lesser of the amortization payment required under capital indebtedness, or 2 1/2 percent of initial allowed facility cost.

(i) (1) The limitation provision of paragraph (e)(5) of this section may be waived for certain qualifying facilities. In order to be considered a qualifying transaction, all of the following conditions must be met:
(i) A sale or transfer between nonrelated parties must take place.

(ii) The purchaser must assume the seller's remaining mortgage repayment schedule at the associated fixed rate of interest.

(iii) The difference between the unpaid principal balance of the seller's mortgage (first mortgage) and the Medicaid-allowable transfer price must be generated either from second mortgage proceeds or contributed equity capital or both.

(iv) The annual amount of allowable interest expense incurred as described in this section, under the terms of the first and second mortgage, plus the annual principal debt amortization must be less than that which would otherwise be reimbursed pursuant to this section, if no assumption of the existing first mortgage were made. (This comparison is hereinafter referred to as the comparative analysis test.) For purposes of this subdivision, the loan-financed portion of the Medicaid-allowable transfer price shall be held constant and the comparative analysis test shall be applied to each year of the effective term of the first and second mortgages. In instances where more than one facility is involved in the transaction, the facilities may be combined for purposes of the comparative analysis test.
Qualifying facilities shall be reimbursed principal debt amortization, interest and return of equity in the following manner:

(i) **Principal debt amortization.**

In each year, during the effective term of the mortgage, the capital cost component of the rate shall include a payment factor sufficient to reimburse the principal debt amortization component of the allowable portion of the mortgage.

(ii) **Interest.**

The capital cost component shall include a payment factor sufficient to reimburse interest associated with the allowable portion of the mortgage as defined by paragraph (e) (2) of this section.

(iii) **Return of equity.**

The equity portion of the Medicaid-allowable transfer price shall be reimbursed in equal annual amounts beginning in the first year following the expiration of the term of the mortgages over the remaining useful facility life.
New York
88(a)

(i)  (1) The Commissioner shall timely develop and implement a standardized process for assessing the feasibility of capital mortgage refinancing, including a standard formula for determining the net cost benefit of refinancing, inclusive of all transaction and closing costs. On or before September 1, 2003, each residential health care facility established under Section 2808 of the Public Health Law and certified as a provider pursuant to Title XIX of the federal Social Security Act (Medicaid), except for those facilities established under the Nursing Home Companies Law or the Hospital Loan Construction Law, shall review its existing capital debt structure using the standard formula to evaluate whether or not a material cost benefit could be derived by refinancing its capital mortgage or mortgages, and shall forward the results of such review to the Commissioner. The Commissioner may request and such facility shall submit descriptions of existing mortgage arrangements and debt service reserve funds as needed to implement paragraph (2) of this subdivision. Facilities established under the Nursing Home Companies Law or the Hospital Loan Construction Law shall submit to the Dormitory Authority, the Housing Finance Agency and/or the State of New York Mortgage Agency such information as is required by such agency to evaluate potential refinancing of such capital mortgages.

(2) The Commissioner shall review each facility's submission and make a written determination as to whether or not the facility should refinance its capital mortgage or mortgages, and if so, for what amount, within sixty days of the date of the facility's submission based on the following parameters:

(a) the mortgage refinancing must result in a present value cost benefit that “materially exceeds”, as such term is defined by the Commissioner, the amount of all transaction and closing costs associated with the refinancing, including any pre-payment penalties associated with the current mortgage or mortgages. The Commissioner shall do such calculations in a manner consistent with comparable calculations in the State Finance Law;

(b) mortgages may be refinanced for a term greater than the remaining term of the existing debt within certain limits, if doing so would result in the present value cost benefit specified in subparagraph (a) of this paragraph;

(c) mortgages may be refinanced utilizing variable rate mortgage loans, if doing so would result in the present value cost benefit specified in subparagraph (a) of this paragraph. In such cases, for purposes of determining the reimbursable capital interest expense included in the capital cost component of rates of payment determined pursuant to this section, the average interest rate over the life of the refinanced mortgage shall not exceed the interest rate in effect on the previous mortgage debt immediately prior to the refinancing;
(d) not-for-profit and governmental residential health care facilities may utilize taxable mortgage loans to refinance their existing debts, if doing so would result in the present value cost benefit specified in subparagraph (a) of this paragraph:

(e) moneys contained in facility debt service reserve funds may be considered in the evaluation of amounts necessary to be refinanced, but only to the extent such moneys total more than the debt service reserves needed to establish the successor capital mortgage financing:

(f) in no event shall funded depreciation accounts, or building funds accumulated through donor-restricted contributions or unrestricted contributions, gifts, bequests or legacies, be considered in the evaluation of amounts necessary to be refinanced; and

(g) notwithstanding any inconsistent provision of law or regulation to the contrary, the principal amount, including all transaction and closing costs and any pre-payment penalties associated with the previous mortgage or mortgages, that is thereby deemed necessary to be refinanced by the Commissioner, as approved by the Public Authorities Control Board and the United States Department of Housing and Urban Development where appropriate, shall be considered the final, approved mortgage amount for capital cost reimbursement under the relevant provisions of this section.

(3) Notwithstanding any inconsistent provision of law or regulation to the contrary, the capital cost component of rates of payment for services provided for the period beginning October 1, 2003 through March 31, 2004 for residential health care facilities that have been identified by the commissioner as refinancing candidates pursuant to paragraph (2) of this subdivision shall reflect capital interest costs equivalent to the lower of the prevailing market borrowing rates available on or about July 1, 2003, for refinancing capital mortgages for their remaining term plus two hundred basis points, or the existing rate being paid by the facility on its capital mortgage or mortgages as of that date. The Commissioner shall determine, in consultation with mortgage financing experts, the prevailing market borrowing rates available
New York 88(c)

to not-for-profit and governmental residential health care facilities to refinance capital mortgages on a tax-exempt fixed rate basis, and to proprietary residential health care facilities to refinance capital mortgages on a taxable fixed rate basis, for this purpose. Exceptions to this policy shall be provided by the Commissioner to each such facility that demonstrates, prior to December 1, 2003, or thirty days after receipt of the Commissioner's written determination specified in paragraph (2) of this subdivision, whichever occurs later, that:

(a) it has initiated or completed the process of refinancing the mortgage or mortgages in question, in which case the capital cost component of rates of payment shall be timely revised to reflect capital interest costs associated with a refinanced mortgage that conforms to the standards in paragraph (2) of this subdivision. For this purpose, a facility that has applied for approval by the Commissioner, the State Hospital Review and Planning Council and/or Public Health Council to refinance its existing mortgage debt as part of a larger project involving facility replacement, expansion, renovation or change of ownership is considered to have initiated the process of refinancing; or

(b) it can not refinance its capital mortgage or mortgages to achieve the relevant present value cost benefit specified in subparagraphs (a) and (b) of paragraph (2) of this subdivision due to a “lock out” or similar provision in its current mortgage agreement that prevents re-financing; due to some other type of genuine refinancing obstacle, such as an inability of the facility to obtain credit approval from a lender or mortgage insurer, or due to an intervening change in credit market conditions or other relevant circumstances, in which case the capital cost component of rates of payment shall continue to reflect capital interest costs associated with the existing mortgage or mortgages, together with reasonable costs incurred in connections with the facility's attempt to refinance its existing mortgage debt.
(4) Each residential health care facility established under the New York State Nursing Home Companies Law and designated as an acquired immune deficiency syndrome (AIDS) facility or having a discrete AIDS unit approved by the Commissioner of Health shall refinance its capital mortgage on or before August 1, 2004 or 120 days immediately after the effective date of the authorizing legislation, whichever is later, and shall forward the results of such refinancing to the Commissioner of Health; provided however, no such residential health care facility shall be required to refinance its capital mortgage if the Department of Health, in consultation with the Dormitory Authority of the State of New York, determines that such refinancing could not be accomplished on an economic basis or is otherwise not feasible. Notwithstanding any inconsistent provision of law or regulation to the contrary, in the event that any such residential health care facility does not refinance its capital mortgage and the Department of Health has not made a determination that a refinancing was not economic or feasible, then the capital cost component of rates of payment determined pursuant to Article 28 of the New York State Public Health Law for such facilities beginning August 1, 2004 or 120 days immediately after the effective date of the authorizing legislation, whichever is later, shall reflect the capital interest cost equivalent to the lower of: (i) the prevailing market borrowing rates available for refinancing capital mortgages for their remaining term on or about August 1, 2004 or 120 days immediately after the effective date of the authorizing legislation, whichever is later; or (ii) the existing rate being paid by the facility on its capital mortgage or mortgages as of such date. The Commissioner of Health shall determine, in consultation with the Dormitory Authority of the State of New York, the prevailing market borrowing rates available to residential health care facilities to refinance capital mortgages.
(k) Effective July 1, 2012, the capital cost component of the rate for eligible residential health care facilities will be adjusted to reflect the costs of the annual debt service related to the financing of equipment and other capital improvements directly related to the financing of an automatic sprinkler system that will be in compliance with the federal regulations set forth in 42 CFR 483.70(a)(8). Facilities that submit a request to the Commissioner and meet at least three of the following criteria, using financial information obtained from the facility’s latest cost report and more recent financial information provided by the facility, shall be eligible for such capital rate adjustment:

(i) Operating losses;

(ii) Negative unrestricted fund balances;

(iii) Documentation demonstrating the inability of the facility to obtain credit, at current market rates, without the reimbursement treatment accorded pursuant to this section;

(iv) Negative working capital;

(v) Less than 30 days of cash expense on hand;

(vi) More than 30 days of revenue in accounts receivable;

(vii) Cash flow statements and budget projections demonstrating material deterioration in fiscal stability of facility.

Eligible facilities will also be required to:

1) File the required certificate of need information with the Department of Health and obtain any required certificate of need approvals.

2) Provide information documenting the costs of the sprinkler project and that such costs are necessary to achieve compliance with the federal regulations set forth in 42 CFR 483.70(a)(8).
3) Submit to the Commissioner, for review and approval, a schedule setting forth by month the estimated debt service payable over the life of the financing. Such schedule will be provided to the Commissioner at least 60 days prior to the due date of the first debt service payment (or such shorter timeframe as the Commissioner may authorize).

4) Deposit into a separate account maintained by the facility, Medicaid revenues attributable to the capital rate adjustments for such sprinklers and any other additional facility revenues needed to cover the scheduled debt service payments attributable to such sprinklers. All such deposits in such account may only be used solely for the purpose of satisfying such debt service payments.
86-2.22 Movable equipment.

(a) Necessary and reasonable expenses related to movable equipment (depreciation computed on a straight-line method or accelerated under a double declining balance [on] or sum-of-the-years-digits method, interest on indebtedness, lease, etc.) are considered allowable costs for residential health care facilities subject to such ceilings as may be established and promulgated by the Commissioner of Health.

(b) An arms length lease purchase agreement with a nonrelated lessor involving equipment entered into on or after October 23, 1992 which meets any one of the four following conditions, establishes the lease as a virtual purchase.

(1) The lease transfers title of the equipment to the lessee during the lease term.

(2) The lease contains a bargain purchase option.

(3) The lease term is at least 75 percent of the useful life of the equipment. This provision is not applicable if the lease begins in the last 25 percent of the useful life of the equipment.
(4) The present value of the minimum lease payments (payments to be made during the lease term including bargain purchase option, guaranteed residual value and penalties for failure to renew) equals at least 90 percent of the fair market value of the leased property. This provision is not applicable if the lease begins in the last 25 percent of the useful life of the equipment. Present value is computed using the lessee’s incremental borrowing rate, unless the interest rate implicit in the lease is known and is less than the lessee’s incremental borrowing rate, in which case the interest rate implicit in the lease is used.

(c) If a lease is established as a virtual purchase under subdivision (b) of this section, the rental charge is includable in capital-related costs as the lesser of the annual rent or the annual costs of ownership which shall be limited to depreciation and interest. When the cost of ownership becomes less than the annual rent, the rental charge shall be includable in capital-related costs. The aggregate rental or lease costs included in capital-related costs may not exceed the costs of ownership that would have been included in capital-related costs over the useful life of the asset had the provider received legal title to the asset.

(d) If a facility enters into a sale and leaseback agreement involving equipment on or after October 23, 1992, the amounts to be included in capital-related costs are the lesser of the annual rent or the annual costs of ownership. When the cost of ownership becomes less than the annual rent, the rental charge shall be includable in capital-related costs. The aggregate rental or lease costs included in capital-related costs may not exceed the cost of ownership which shall be limited to depreciation and interest that would have been included in capital-related costs over the useful life of the asset had the provider retained legal title to the asset.
86-2.23 Research.

(a) All research costs shall be excluded from allowable costs in computing reimbursement rate.

(b) Research includes those studies and projects which have as their purpose the enlargement of general knowledge and understanding, are experimental in nature and hold no prospect of immediate benefit to the hospital or its patients.

New York
90

Attachment 4.19-D
Part I

TN #86-4 Approval Date July 29, 1987
Supersedes TN #82-30 Effective Date January 1, 1986
86.2.24 Educational activities.

The costs of educational activities, less tuition and supporting grants, shall be included in the calculation of the basic rate, provided such activities are directly related to patient care services.
86-2.25 Compensation of operators and relatives of operators.

(a) Reasonable compensation for operators or relatives of operators for services actually performed and required to be performed shall be considered as an allowable cost. The amount to be allowed shall be equal to the amount normally required to be paid for the same service provided by a nonrelated employee, as determined by the State Commissioner of Health. Compensation shall not be included in the rate computation for any services which the operator or relative of the operator is not authorized to perform under New York State law or regulation.

(b) Any amount reported as compensation for services rendered by an operator or relative of an operator shall not be allowed in excess of the maximum allowance for full-time services in carrying out his primary function.

(c) For purposes of subdivision (a) of this section, in determining a reasonable level of compensation for operators or relatives of operators the commissioner may consider the quality of care provided to patients by the facility during the year in question.
86-2.26 COST OF RELATED ORGANIZATIONS.

(a) A RELATED ORGANIZATION shall be defined as any entity which the residential health care facility is in control of or is controlled by, either directly or indirectly, or an organization or institution whose actions or policies the facility has the power, directly or indirectly, to significantly influence or direct, or a special purpose organization, or where an association or material interest exists in an entity which supplies goods and/or services to the residential health care facility, or any entity which is controlled directly or indirectly by the immediate family of the operator. Immediate family shall include each parent, child, spouse, brother, sister, first cousin, aunt and uncle, whether such relationship arises by reason of birth, marriage or adoption.

(b) The costs of goods and/or services furnished to a residential health care facility by a related organization are includable in the computation of the basic rate at the lower of the cost in the related organization, or the market price of comparable goods and/or services available in the residential health care facility's region within the course of normal business operations.

(c) If the residential health care facility has incurred any costs in connection with a related organization, the final payment rate shall include the costs of such goods and/or services.

(d) A special purpose organization shall be defined as an organization which is established to conduct certain of the provider's patient-care-related or non-patient-care-related activities. The special purpose organization shall be considered to be related if:

   (1) the facility controls the special purpose organization through contracts or other legal documents that allow direct authority over the

TN #92-4 Approval Date December 30, 1994
Supersedes TN #86-4 Effective Date March 11, 1992
the facility is, for all practical purposes, the sole beneficiary of the special organization’s activities. The facility shall be considered the special purpose organization’s sole beneficiary if one or more of the three following circumstances exist:

(i) a special purpose organization has solicited funds in the name of and with the expressed or implied approval of the facility, and substantially all the funds solicited by the organization were intended by the contributor or were otherwise required to be transferred to the facility or used at its discretion or direction;

(ii) the facility has transferred some of its resources to a special purpose organization, substantially all of whose resources are held for the benefit of the facility; or

(iii) the facility has assigned certain of its functions (such as the operation of a dormitory) to a special purpose organization that is operating primarily for the benefit of the facility.

December 30, 1994

TN #92-4 Approval Date December 30, 1994
Supersedes TN NEW Effective Date March 11, 1992
86-2.27 Termination of service.

The Division of Health Care Financing in the Department of Health shall be notified immediately of the deletion of any previously offered service or of the withholding of services from patients paid for by government agencies. Such notifications shall include a statement indicating the date of the deletion or withholding of such service and the cost impact on the residential health care facility of such action. Any overpayments by reason of such deletion of previously offered service shall bear interest and be subject to penalties both in the manner provided in section 86-2.7 of this Subpart.
86-2.28 Return on investment.

(a) [In] For rate year 1993, in computing the allowable cost of a proprietary residential health care facility, there will be included, after subtracting for current and noncurrent time deposits and equivalents, investments and construction in progress, a reasonable return on average equity capital [excluding capital invested in land, plant, fixed equipment and capital improvements thereto.] invested for necessary and proper operation for patient care activities of residential health care facility and related organizations, as defined in section 86-2.26(a) of this Subpart. For purposes of this section, average equity capital shall mean the difference between total assets less total liabilities averaged over the applicable cost report period, including assets and liabilities attributable to land, plant, fixed equipment and capital improvements thereto. It shall also include the average equity capital of related organizations proportionate with the percentage of a related organization’s business with the residential health care facility, as calculated in the annual report forms filed in accordance with section 86-2.2 of this Subpart.

(b) The allowable average equity capital shall be further adjusted by subtracting the equity, as that term is defined in section 86-2.21(a)(4) of this Subpart, upon which a return is calculated pursuant to section 86-2.21(e)(6) of this Subpart. The return on investment for rate year January 1, 1993 shall be computed on the basis of allowable fiscal and statistical data submitted by the facility for the fiscal year ended December 31, 1991, or other applicable cost report period used to determine the capital component of the 1993 rate, in accordance with section 86-2.21 of this Subpart. The return on investment for subsequent
rate year shall be based upon the annual cost report used by the department to
determine the capital component of the rate in accordance with section 86-2.21 of this
Subpart. The percentage to be used in computing the return on investment shall be
[that percentage determined annually by the commissioner and shall be] equal to the
twenty-six week United States Treasury Bill rate in effect on the second Wednesday of
September of the year prior to the rate year.
86-2.29 Payments to receivers.

- Section deleted from State Plan.
86-2.30 Residential Health Care Facilities Patient Assessment for Certified Rates.

(a) For the purpose of determining reimbursement rates effective January 1, 1986, and thereafter, for governmental payments each residential health care facility shall, on an annual basis or more often as determined by the department, pursuant to this subpart, assess all patients to determine case mix intensity using the patient review criteria and standards promulgated and published by the department (Patient Review Instrument [PRI] and Instructions: Patient Review Instrument) and specified in appendix 7 infra.

(b) (1) The patient review form (PRI) shall be submitted according to a written schedule determined by the department. Such written schedule shall be established by the Commissioner of Health with notice to residential health care facilities. Extension of the time for filing may be granted upon application received prior to the due date of the Patient Review Forms and only in circumstances where the residential health care facilities establishes, by documentary evidence, that the patient review forms cannot be submitted by the due date for reasons beyond the control of the facility.
(2) Rate schedules shall not be certified by the Commissioner of Health unless residential health care facilities are in full compliance with the requirements of this section. Compliance with the assessment requirements of this section, shall include, but not be limited to, the timely filing of properly certified patient review forms (PRI) which are complete and accurate. Failure of a residential health care facility to file the patient review form (PRI) pursuant to the written scheduled established pursuant to this subdivision, shall subject the residential health care facility to a rate reduction set forth in section 86-2.2 of this Subpart.

(c) The operator of a residential health care facility shall ensure:

(1) that the patient review form (PRI) is completed for all patients of the facility pursuant to subdivision (a) of this section.

(2) that the patient review form (PRI) is completed by a registered professional nurse who is qualified by experience and demonstrated competency in long term care and who has successfully completed a training program in patient case mix assessment approved by the department to

---

TN #92-4

Effective Date March 11, 1992
train individuals in the completion of the patient review form (PRI) for the
purposes of establishing a facility’s case mix financial reimbursement; and

[(3) notwithstanding paragraph (2) of this subdivision, an operator of a free-standing
health-related facility may substitute no more than two licensed practical nurses
who are qualified by experience and demonstrated competence in long-term care
and who have successfully completed a training program in patient case mix
assessment for the purposes of establishing a facility’s case mix financial
reimbursement for meeting the required number of assessors pursuant to
subdivision (d) of this section. Such substitution may occur only in the instance
that a free-standing health-related facility does not employ a sufficient number of
staff registered nurses to meet the required number of assessors pursuant to
subdivision (d) of this section; and

(4) (3) that the patient review form (PRI) is certified by the operator and the nurse
assessor responsible for completion of the patient review form (PRI). (The form of
the certification required shall be as prescribed in the report form provided by the
department.)

(e) (1) The Department shall monitor and review each residential health care facility's performance and its patient assessment function as described in this section through the following activities which may include but shall not be limited to:

(i) Analysis of patient case mix profiles and statistical data:

(ii) Review of information provided by the residential health care facility; and
(iii) On-site inspections.

(2) The purpose of the department’s monitoring and review shall be to determine whether the residential health care facility is complying with the assessment requirements contained in this section.

(3) The patient review form (PRI) and any underlying books, records, and/or documentation which formed the basis for the completion of such form shall be subject to review by the department.

(4) The department shall acknowledge, in writing, receipt of the residential health care facilities patient review forms (PRI). In the event that any information or data that the facility has submitted is inaccurate or incorrect, the facility shall correct such information or data in the following manner:

(i) The facility shall submit to the department, within five days of receipt of the department’s written acknowledgement provided for in this paragraph, such corrections on a form which meets the same certification requirements as the document being corrected. Once receipt of corrected data is acknowledged in writing by the department, a residential health care facility may not correct or amend the patient review for (PRI) or submit any additional information for the assessment period.
(5) The department, in order to ensure accuracy of the patient review form (PRI), may also conduct timely on-site observations and/or interviews of patients/residents and review of their medical records. When an additional on-site review is performed by the department as a result of controverted items found during the initial on-site review, the facility shall be afforded an on-site conference prior to the conclusion of such additional on-site review. Upon completion of a department on-site review pursuant to this subdivision, the department, in order to ensure accuracy of the patient review form (PRI), shall correct, where necessary, a residential health care facility's assessment of its patient case mix intensity. The department's on-site determination shall be considered final for purposes of assessing the residential health care facility's case mix intensity for that assessment period and notwithstanding section 2.14 of this Subpart, the residential health care facility may not correct or amend the patient form (PRI) or submit any additional information after department reviewers have concluded the on-site review. The residential health care facility shall be notified in writing regarding the department determination of any controverted items.

TN #86-4 Approval Date July 29, 1987
Supersedes TN #85-6 Effective Date January 1, 1986
(f)  (1) If the department determines pursuant to this section, that a residential health care facility is not performing its case mix intensity assessment function in a timely and/or accurate manner, as required by subdivision (b) of this section, the department shall, in writing:

(i) Notify the residential health care facility; and

(ii) Require the residential health care facility to perform its patient case mix assessment function through written agreement with a person or entity approved by the department for the completion of the patient review form (PRI) for the purpose of establishing a residential health care facilities case mix reimbursement.

(iii) Any patient case mix assessment performed pursuant to subparagraph (ii) of the paragraph shall also be subject to department monitoring and review pursuant to this section.

(2) The department shall determine that a residential health care facility is not performing its case-mix intensity assessment function in an accurate manner where there exists inaccuracies in its case-mix assessment which results in a statistically significant modification of the residential health care facility’s reimbursement.
(3) The cost of written agreements required by paragraph (1) of this subdivision shall not be considered an allowable cost for determining reimbursement rates pursuant to this Subpart.

(4) **Certification.**

Operators of residential health care facilities completing the department’s patient review form (PRI) through written agreement with a department approved non-residential health care facility person or entity shall have such form certified by such person or entity in lieu of a facility registered professional nurse as required by paragraph (2) of subdivision (c) of this section.

(g) **Reconsiderations.**

(1) Any residential health care facility after one year from the date it has been notified in writing by the department that it must enter into a written agreement pursuant to paragraph (1) of subdivision (f) of this section, may request, in writing, that the department rescind its withdrawal of the residential health care facility's patient case mix assessment function.

(2) The department shall not rescind its withdrawal of a residential health care facility's patient case mix assessment function unless the residential health care
facility satisfies the department that the residential health care facility has the capability to comply with the requirements of the department’s patient case mix assessment process which shall include the capability to accurately complete the patient review form (PRI).

(3) The department shall give written notice of its decision and shall, if negative, give a statement of the reasons for its refusal to rescind its withdrawal of the residential health care facility’s patient case mix assessment function.

(4) Any residential health care facility after six months from the date it receives a written department decision pursuant to paragraph (3) of this subdivision, may again request in writing that the department rescind its withdrawal of the residential health care facility’s patient case mix assessment function.

[(h) The provisions of this section shall expire on April 30, 1989.]
Residential health care facilities [with 80 or more beds] shall submit the data contained in the PRI using an electronic medium including but not limited to magnetic computer tape, floppy disk or an electronic telecommunication system consistent with the technical specifications established by the department.

(i) The electronically produced data shall be accompanied by a certification statement executed by the operator or a person authorized to sign on the operator’s behalf in a format provided or approved by the department.

(ii) Facilities [required or those electing to submit PRI data in this format] shall have an additional ten days from the time specified pursuant to subdivision (b) of this section to file the required information.

(iii) Adjustments to certified rates made pursuant to section 86-2.11 of this Subpart shall be certified by the Commissioner of Health within 90 days from the date upon which a facility’s rate was last certified pursuant to this Subpart or within 90 days from the latest scheduled PRI submission date pursuant to section 86-2.11 of this Subpart, whichever is later. Such ninety day time frames shall not apply in any instance where a facility has been notified that its submitted PRI data is inaccurate or incorrect pursuant to paragraph (e)(4) of [subdivision (e) of section 86-2.30 of] this [Subpart] section until such data has been corrected to the satisfaction of the commissioner, or if an additional on-site review has been deemed necessary pursuant to paragraph (e)(5) of [subdivision (e) of section 86-2.30 of] this [Subpart] section.
2.31 Recalibration.

(a) For rate periods commencing on or after January 1, 1987, notwithstanding any other provisions of this Subpart, the Direct Component of facility rates, determined in accordance with sections 86-2.10 and 86-2.11 of this Subpart, shall be reduced by 3.035 percent to reflect a recalibration adjustment based on the change in the aggregate statewide case mix index attributable to factors other than changes in patient population or condition.

(b) The reduction in the Direct Component of facility rates as defined in subdivision (a) of this section shall be implemented on or about July 1, 1987 and shall be applied retroactive to January 1, 1987.
New York  
108(h)

(b) For rate years 1992 and thereafter, notwithstanding any other provision of this Subpart and subject to the provisions of paragraph (1) of this subdivision and subdivision (c) of this section, payment rates shall be adjusted in accordance with this subdivision to reflect a percentage recalibration adjustment based on the change in each facility's case mix which has been determined by the department to be due to factors other than changes in patient population or condition. Such payment rate adjustments shall be implemented utilizing the direct component of facility rates for such rate years determined in accordance with sections 86-2.10 and 86-2.11 of this Subpart.

(1) The percentage recalibration adjustment provided for in this subdivision shall not be less than 0% nor greater than one hundred fifty percent of the statewide weighted average percentage recalibration adjustment obtained by utilizing the facility-specific percentage recalibration adjustments as determined pursuant to this subdivision.

(2) The percentage recalibration adjustment shall be calculated as follows for each facility:

(i) A statewide distribution of patients in each patient classification group shall be determined by utilizing the patient data for the assessment of all patients obtained in the patient assessment period March 1, 1985 through September 30, 1985 (the 1985 period) conducted pursuant to section 86-2.30 of this Subpart.

(ii) The statewide distribution of patients in each patient classification group shall be further segregated by the following length of stay (LOS) groups:

(a) less than or equal to 90 days

(b) greater than 90 days but less than or equal to 1 year

(c) greater than 1 year but less than or equal to 2 years

(d) greater than 2 years but less than or equal to 3 years
New York
108(i)

(e) greater than 3 years but less than or equal to 4 years

(f) greater than 4 years but less than or equal to 5 years

(g) greater than 5 years

(iii) A statewide average initial case mix index for each LOS group for the 1985 period shall be calculated by multiplying the initial distribution of patients in each patient classification group within each LOS group times the case mix index for each patient classification group as contained in Appendix 13-A herein and dividing the sum of the results by the total number of patients in all patient classification groups within each LOS group.

(iv) For each facility, a 1985 distribution of patients in each patient classification group and a 1985 distribution of patients by the LOS groups specified in subparagraph (ii) of this paragraph shall be determined by utilizing the patient data for the assessment of all patients obtained in the 1985 period, conducted pursuant to section 86-2.30 of this Subpart. In the event a facility commenced operations after the patient assessment period, March 1, 1985 through September 30, 1985 (the 1985 period) but prior to January 1, 1988 or if the facility has the lesser of ten cases or twenty percent of its patients in the distributions as determined in this subparagraph for the 1985 period, or if the facility had undergone the appointment of a receiver or the establishment of a new operator
New York 108(j)

subsequent to the 1985 period but prior to January 1, 1988 and had filed a new cost report in accordance with the provisions of section 86-2.10(k) of this Subpart which was used in the calculation of the payment rate, the distribution of patients to be used for the purposes of this subparagraph shall be that distribution pertaining to the earliest full patient assessment period conducted pursuant to section 86-2.30 of this Subpart subsequent to the 1985 period or subsequent to the effective date of the appointment of a receiver or the change in operator (the "substituted 1985 period"), and such distribution shall be deemed the facility's "substituted 1985 distribution" of patients for the calculations in subparagraphs (vi) and (vii) of this paragraph. For purposes of this subparagraph, the only patients to be included in the distributions shall be patients that have been identified by the department as also having been included in the patient assessment period July 1, 1988 through December 31, 1988.

(v) For each facility, a 1988 distribution of patients in each patient classification group and a 1988 distribution of patients by the LOS groups specified in subparagraph (ii) of this paragraph shall be determined by utilizing the patient data obtained in the patient assessment period July 1, 1988 through December 31, 1988. For purposes of this subparagraph, the only patients to be included in the distributions shall be patients that were admitted to the facility in which they are presently residing before October 1, 1985 and have been identified by the department as also having been included in the patient assessments during the 1985 period. In the event a facility commenced operations after the
patient assessment period, March 1, 1985 through September 30, 1985 (the 1985 period) but prior to January 1, 1988 or if the facility had the lesser of ten cases or twenty percent of its patients in the distributions for the 1985 period as determined pursuant to subparagraph (iv) of this paragraph, or if the facility had undergone the appointment of a receiver or the establishment of a new operator subsequent to the 1985 period but prior to January 1, 1988 and had filed a new cost report in accordance with the provisions of section 86-2.10(k) of this Subpart which was used in the calculation of the payment rate, the facility’s substituted 1985 period, as defined in subparagraph (iv) of this paragraph, shall be used in lieu of the 1985 period for the purposes of this subparagraph, and the only patients to be included shall be patients that were admitted to the facility in which they are presently residing before the end date of the facility’s substituted 1985 period and have been identified by the department as also having been included in the patient assessments during the substituted 1985 period.

(vi) A percentage increase in case mix attributable to LOS shall, for each facility, be determined as follows:

(a) A 1985 aggregate case mix index shall be determined by multiplying the facility’s 1985 distribution of patients, or a substituted 1985 distribution of patients where applicable, within each LOS group, determined pursuant to subparagraph (iv) of this paragraph by the statewide average initial case mix index for each LOS group for the 1985 period, as determined pursuant to subparagraph (iii) of this paragraph, and dividing the sum of the results by the facility’s total number of patients in all LOS groups, as determined pursuant to subparagraph (iv) of this paragraph.
(b) A 1988 LOS adjusted case mix index shall be determined by multiplying the facility’s 1988 distribution of patient within each LOS group determined pursuant to subparagraph (v) of this paragraph by the statewide average initial case mix index for each LOS group for the 1985 period, as determined pursuant to subparagraph (iii) of this paragraph, and dividing the sum of the results by the facility’s total number of patients in all LOS groups, as determined pursuant to subparagraph (v) of this paragraph.

(c) The 1985 aggregate case mix index shall be subtracted from the 1988 LOS adjusted case mix index and the result divided by the 1985 aggregate case mix index to arrive at the percentage increase in case mix attributable to LOS.

(vii) An actual percentage increase in case mix shall, for each facility, be determined as follows:

(a) A 1985 actual case mix index shall be determined by multiplying the facility’s 1985 distribution of patients, or a substituted 1985 distribution of patients where applicable, in each patient classification group as determined pursuant to subparagraph (iv) of this paragraph, by the case mix index for each patient classification group as contained in Appendix 13-A herein and dividing the sum of the results by the facility’s total number of patients in all patient classification groups, as determined pursuant to subparagraph (iv) of this paragraph.
New York
108(m)

(b) A 1988 actual case mix index shall be determined by multiplying the facility's 1988 distribution of patients in each patient classification group, as determined pursuant to subparagraph (v) of this paragraph, by the case mix index for each patient classification group as contained in Appendix 13-A herein and dividing the sum of the results by the facility's total number of patients in all patient classification groups, as determined pursuant to subparagraph (v) of this paragraph.

(c) The 1985 actual case mix index shall be subtracted from the 1988 actual case mix index and the result divided by the 1985 actual case mix index to arrive at an actual percentage increase in case mix.

(viii) Except as provided in subparagraph (ix) of this paragraph, a percentage recalibration adjustment shall be determined by annualizing* the result obtained by subtracting the percentage increase in case mix attributable to LOS determined pursuant to subparagraph (vi) of this paragraph from the actual percentage increase in case mix determined pursuant to subparagraph (vii) of this paragraph.

(ix) If a facility undergoes the appointment of a receiver or the establishment of a new operator on or after January 1, 1992 and files a new cost report in accordance with the provisions of section 86-2.10(k) of this Subpart which is used in the calculation of a revised payment rate, or for new facilities who receive an initial operating certificate on or after January 1, 1992, the percentage recalibration adjustment provided for in this subdivision shall be 0% for such revised payment rate or for such new facilities.

* The three-year effect of improved coding was annualized by taking the cube root of the three year accumulation factor.
New York
108(n)

(3) The operating portion of each residential health care facility’s rate of payment, as defined pursuant to paragraph (7) of subdivision (a) of Section 86-2.10 of this Subpart, shall be reduced by a per diem recalibration adjustment which shall be determined as follows:

(i) The percentage recalibration adjustment identified in subparagraph (viii) of paragraph (2) of this subdivision shall be applied to the direct component of the rate determined in accordance with sections 86-2.10 and 86-2.11 of this Subpart, to arrive at each facility’s per diem recalibration adjustment in 1983 base year dollars.

(ii) Each facility’s per diem recalibration adjustment in 1983 base year dollars shall then be trended to the rate year by the applicable roll factor as defined in paragraph (8) of subdivision (a) of Section 86-2.10 of this Subpart.

(c) For a residential health care facility receiving a percentage recalibration adjustment greater than zero percent, as determined in subdivision (b) of this section, the percentage recalibration adjustment may be modified when conditions set forth in section 86-2.31(c)(1) are met. Additionally, a facility shall submit a modification request as an appeal application within the time limit set forth in section 86-2.13(a) of this Subpart.
New York
108(o)

(ii) A facility shall document that the percentage change in the facility's reported case mix index (CMI) from the annual rate period 1985 through 1988, such percentage reduced by the percentage recalibration adjustment as determined by subdivision (b) of this section, is at least ten percent.* The percentage change in the facility's reported CMI, for purposes of this subparagraph, shall utilize the CMI calculated from the facility's patient data obtained during the patient assessment period, March 1, 1985 through September 30, 1985, to the patient assessment period July 1, 1988 through December 31, 1988, conducted pursuant to section 86-2.30 of this Subpart, and shall be calculated by subtracting from the reported 1988 CMI, the reported 1985 CMI and the result divided by the reported 1985 CMI.

(iii) (a) Except as provided in clause (b) of this subparagraph, a facility shall document that the percentage change in direct care cost over trend from the annual rate period 1985 through 1988, as defined by those cost centers listed in subdivision (c) of section 86-2.10 of this Subpart, is at least ten percent. The percentage change in direct care cost over trend for purposes of this subparagraph shall be calculated by subtracting from the 1988 annual reported direct care cost, the 1985 annual reported direct care cost trended to 1988 by the applicable trend factors promulgated by the department for 1986, 1987 and 1988, and the result divided by the trended 1985 direct care cost. The annual reported direct care costs for 1985 and 1988, for purposes of this subparagraph, shall be those which the facility has submitted using the result of the single step-down method of cost allocation. **

* This means that the increase in reported case mix from 1985 to 1988, after subtracting out the recalibration adjustment for the facility, must be at least ten percent for the facility to qualify to possibly get a reduction in its recalibration adjustment.

** This refers to the allocation of the accumulated facility costs as reported via the RHCF cost reports into other cost centers that utilize their services. The purpose of the step-down process is to finally consolidate reimbursable costs into the four components of the RHCF reimbursement rate for rate setting purposes. For example, costs reported under patient-specific services such as transportation, nursing administration and therapies, among others, are finally allocated to the costs contained in the direct portion of the rate.
In the event a facility’s facility-specific cost based direct price per day exceeds the facility-specific ceiling direct price per day, as determined pursuant to section 86-2.10(c)(4) of this Subpart, for the annual rate period 1988, such excess percentage shall be used to determine a credit to be added to the facility’s percentage change in direct care cost over trend as determined in clause (a) of this subparagraph for the purposes of meeting the required percentage change in direct care cost over trend identified in clause (a) of this subparagraph. The amount of the credit shall be equal to such excess percentage if the facility documents that its percentage change in indirect care cost over trend from the annual rate period 1985 through 1988, as defined by those cost centers listed in subdivision(d) of section 86-2.10 of this Subpart, does not exceed its percentage change in direct care cost over trend for this period, as determined in clause (a) of this subparagraph, and if the facility cannot so document, the credit identified in this clause shall be reduced (but not be less than 0%) by the extent to which the percentage change in indirect care cost over trend exceeds the percentage change in direct care cost over trend. The percentage change in indirect care cost over trend for purposes of this subparagraph shall be calculated by subtracting from the 1988 annual reported indirect care cost, the 1985 annual reported indirect care cost trended to 1988 by the applicable trend factors promulgated by the department for 1986, 1987 and 1988, and the result divided by the trended 1985 indirect care cost. The annual reported indirect care costs for 1985 and 1988, for purposes of this subparagraph, shall be those which the facility has submitted using the result of the single step-down method of cost allocation.

 Documentation shall be included in an appeal filed by the facility to the department that supports the reasons for the direct care cost increase which shall be based on increases in staffing levels and/or range and/or types of patient services. Increased direct care cost resulting in the event a facility's facility-specific cost based direct price per day exceeds the facility-specific ceiling direct price per day, as determined pursuant to section 86-2.10(c)(4) of this Subpart, for the annual rate period 1988, such excess percentage shall be used to determine a credit to be added to the facility's percentage change in direct care cost over trend as determined in clause (a) of this subparagraph for the purposes of meeting the required percentage change in direct care cost over trend identified in clause (a) of this subparagraph. The amount of the credit shall be equal to such excess percentage if the facility documents that its percentage change in indirect care cost over trend from the annual rate period 1985 through 1988, as defined by those cost centers listed in subdivision(d) of section 86-2.10 of this Subpart, does not exceed its percentage change in direct care cost over trend for this period, as determined in clause (a) of this subparagraph, and if the facility cannot so document, the credit identified in this clause shall be reduced (but not be less than 0%) by the extent to which the percentage change in indirect care cost over trend exceeds the percentage change in direct care cost over trend. The percentage change in indirect care cost over trend for purposes of this subparagraph shall be calculated by subtracting from the 1988 annual reported indirect care cost, the 1985 annual reported indirect care cost trended to 1988 by the applicable trend factors promulgated by the department for 1986, 1987 and 1988, and the result divided by the trended 1985 indirect care cost. The annual reported indirect care costs for 1985 and 1988, for purposes of this subparagraph, shall be those which the facility has submitted using the result of the single step-down method of cost allocation.

(iv) Documentation shall be included in an appeal filed by the facility to the department that supports the reasons for the direct care cost increase which shall be based on increases in staffing levels and/or range and/or types of patient services. Increased direct care cost resulting
solely from an increase in the bed complement of a facility shall not constitute sufficient justification for granting a modification pursuant to this subdivision.

(2) For a facility meeting all conditions specified in paragraph (1) of this subdivision, the modified percentage recalibration adjustment shall be determined as follows.

(i) The modification to the percentage recalibration adjustment shall be determined by annualizing the result obtained by subtracting the percentage change in the facility’s reported CMI reduced by the percentage recalibration adjustment, as determined in subparagraph (ii) of paragraph (1) of this subdivision, from the percentage change in direct care cost over trend, as determined in subparagraph (iii) of paragraph (1) of this subdivision.

(ii) The modified percentage recalibration adjustment shall be equal to the result obtained by subtracting the modification to the percentage recalibration adjustment, as determined in subparagraph (i) of this paragraph, from the percentage recalibration adjustment identified in subparagraph (viii) of paragraph (2) of subdivision (b) of this section.

(iii) The modified percentage recalibration adjustment, as determined in subparagraph (ii) of this paragraph, shall not be less than 0%.
APPLICATION OF 1992 RECALIBRATION APPEAL CRITERIA
EXAMPLE

ASSUMPTIONS
1. Reported CMI Change, 1985-1988 24.44%
2. Recalibration % (Annualized) 7.40%
3. Real CMI Change, 1985-1988 17.04% (1-2)
5. Indirect Cost-Over-Trend, 1985-1988 10.50%
6. % Facility Above Direct Ceiling 20.9%

APPLICATION OF CRITERIA
• Real CMI Change (17.04%) meets 10% requirement
• Direct Cost-Over-Trend (8.71%) does not meet the 10% requirement.

However, since this facility is above ceiling on direct costs, a credit amount is determined, to be added to the direct cost growth of 8.71%.

CALCULATION OF CREDIT
• Excess of indirect Cost-Over-Trend compared to direct cost:
  10.50% - 8.71% = 1.79%
• Credit Amount:
  20.9% - 1.79% = 19.11%
• Direct Cost-Over-Trend:
  8.71% + 19.11% = 27.82%
  with credit

CALCULATION OF MODIFIED RECALIBRATION

Since the revised value of direct cost growth with the credit (27.82%) exceeds the 10% requirement, facility qualifies for a modification, subject to appropriate documentation showing that direct care cost increases were due to increases in staffing levels or range/types of services.

Modification Value = 27.82% - 17.04% = 10.78%
(Dir. cost) - (real CMI change)
This is then annualized, giving 3.47%

Modified Recalibration Adjustment = 7.40% - 3.47% = 3.93%
Nursing facilities (NF) shall receive prospective 1994 rate enhancements to their rates of payment, effective November 3, 1994 through December 31, 1994. An amount not to exceed $111 million shall be distributed to all eligible nursing facilities through 1994 prospective rate enhancements to their rates of payment. Eligible facilities shall be those facilities that sought timely relief for such rate enhancements. Such amount shall be allocated to each eligible NF based upon its reported change in patient case mix as determined by the total number of patients properly assessed and reported by the facility pursuant to 86-2.30, in excess of that reimbursed for the same base period, 1989-1991. The facility’s allocated share of the prospective payment enhancement shall be converted to a per diem adjustment by dividing this amount by its volume of Medicaid days for the period November 3, 1994 through December 31, 1994.
86-2.33 Dementia Pilot Demonstration Projects.

(a) Payment rates shall be adjusted by the addition of a per diem amount as determined by the commissioner pursuant to this section for residential health care facilities participating in pilot demonstration projects for the development of additional knowledge and experience in the area of dementia care and to improve the quality of care and treatment of patients with dementia.

(b) The adjustment to payment rates provided for in this section shall be made for qualifying residential health care facilities (RHCFs) applying for and receiving the approval of the commissioner for participation in such projects. Acceptable uses of such adjustment shall include but shall not be limited to:

(1) increasing the availability of programs and resources for dementia patients;

(2) training staff to manage behavior or promote effective care of dementia patients;

(3) arranging the environment in ways that produce positive outcomes for dementia patients; and/or

(4) maintaining and promoting autonomy and decision-making on the part of dementia patients.

(c) Individual facilities or groups of facilities may participate in pilot demonstration projects pursuant to this subdivision.
EXPLANATION OF DEMENTIA PILOT PROJECT RATE ADJUSTMENT

The per diem for dementia care pilot demonstration projects is calculated by dividing the total award for each facility by the duration (i.e., years) of the project to determine the annual expenditure. This annual expenditure is then divided by the annualized Medicaid patient days reported by the facility to arrive at the per diem add-on.
Effective January 1, 2000, enhancements to the Medicaid reimbursement rates of hospice-operated nursing homes will be provided to enable them to study and analyze several issues pertaining to operations of such a nursing home. This demonstration will provide additional knowledge and experience and will collect information concerning alternative methodologies for reimbursement, delivery of medical services or eligibility of medical assistance in such facilities.

The hospice-operated nursing home will conduct a demonstration to address several patient care related issues including:

1) insuring appropriate placement and use of resources for residents in hospice-operated nursing homes;

2) training staff to promote effective care of terminally ill residents; and

3) maintaining and promoting autonomy and decision making on the part of the residents in hospice-operated nursing facilities.

TN #00-04 Approval Date June 6, 2001
Supersedes TN NEW Effective Date January 1, 2000 & April 1, 2000
New York 110(a)(3)

Effective for dates of service beginning on April 1, 2002 and ending on December 31, 2004, Medicaid rates of payment to non-public nursing homes shall be adjusted pursuant to a competitive process to fund projects intended to improve the quality of care for nursing home residents. This competitive process will follow the Request for Proposal procurement process, as mandated by the NYS Office of the State Comptroller.

Such eligible projects may include:

(a) an increase in direct care staff, either facility wide or targeted at a particular area of care or shift;

(b) increased training and education of direct care staff, including allowing direct care staff to increase their level of licensure relevant to nursing home care;

(c) efforts to decrease staff turn-over; and

(d) other efforts related to the recruitment and retention of direct care staff that will effect the quality of care at such facility.

The evaluation of each submitted proposal will be based on the following criteria:

(1) proposal demonstrates that the project will improve the quality of care in a cost effective manner;

(2) proposal provides evidence that the project can be successfully implemented;

(3) proposal provides evidence that the quality of care will be improved by improving or increasing the training, education and retention of direct care staff;

(4) proposal provides a detailed budget with a cost effective approach;

(5) proposal demonstrates financial need; and

(6) proposal provides a written labor union concurrence from the relevant bargaining agent for the projects where a collective bargaining agreement exists covering occupations in which training is proposed.

A proposal may be rejected if the submitting facility has significant non-compliance in areas that affect resident health and safety.

Submitted proposals will be ranked based on the results of the review and evaluation process. Proposals achieving a predetermined minimum score will receive an initial award determined by multiplying the score, expressed as percentage, by the project amount requested. Available funds will be distributed as follows:

TN #02-23 Approval Date September 16, 2002
Supersedes TN NEW Effective Date April 1, 2002
New York  
110(a)(4)

(a) If the total amount initially awarded for all nursing homes equals the total funding available, each nursing home will receive its initial award.

(b) If the total amount initially awarded for all nursing homes exceeds the total funding available, each initial award will be reduced on a proportional basis such that the sum of all final awards does not exceed the total funds available.

(c) If the total amount initially awarded for all nursing homes is less than the total funding available, each nursing home will receive its initial award. Remaining funds will be distributed proportionally based on each nursing home's initial award to the total of all initial awards.

Nursing homes receiving awards shall submit an annual progress report that describes and evaluates the quality improvements achieved through this project. Significant changes from the approved project or budget may result in a revision to the nursing home's award. Funding may be discontinued if it is determined that the goal of the project is not being met. The Department of Health shall have the right to audit the nursing home's financial records to determine that the funds granted for this project have been used for the specific purposes defined in the approved proposal and shall recoup any funds determined to have been used for purposes other than specified in the approved proposal.

The Department of Health will not issue any new requests for proposals after December 31, 2004, and all awards for subsequent annual periods will be distributed on the same proportional basis as the most recent available distribution. Funds may be utilized for any of uses listed in this Section and the Department of Health shall have the right to audit to determine that the funds have been used accordingly, and recoup any funds determined to have been used otherwise.

Resultant adjustments to Medicaid rates of payment shall not, in aggregate, exceed 62.5 million dollars for the rate period beginning April 1, 2002 and ending December 31, 2002, and for each annual period thereafter beginning January 1, 2003 and ending December 31, 2004, and shall not exceed, in aggregate, 46.875 million dollars for the period July 1, 2005 through December 31, 2005, and 78.125 million dollars for the period January 1, 2006 through June 30, 2007. Award amounts shall be included as a reimbursable
New York
110(a)(4)(i)

cost add-on to medical assistance fee-for-service rates of payment established pursuant to this section, based on Medicaid utilization data in each facility's annual cost report submitted two years prior to the rate year or projected Medicaid utilization data for those facilities that have not submitted an annual cost report for the period two years prior to the rate year. These adjustments shall not be subject to subsequent adjustment or reconciliation to reflect changes in medical assistance utilization between the year two years prior to the rate year and the rate year.
Section 86-2.34 Affiliation changes.

(a) A hospital based residential health care facility as defined in section 86-2.10(a)(13) of this Subpart whose affiliated hospital closes its acute care beds shall notify the department within 30 days of actual complete closure of such beds. Such residential health care facility shall have its affiliation status changed to freestanding effective as of the date of actual complete closure.

(b) For purposes of establishing the allowable indirect component of the rate pursuant to subdivision (d) of section 86-2.10 of this Subpart, a hospital based residential health care facility whose affiliation changes to freestanding under circumstances described in subdivision (a) of this section may apply to the department at the same time notice of closure is given pursuant to subdivision (a) of this section for a three year phase in of its freestanding affiliation for reimbursement purposes effective the beginning of the next calendar year following actual complete closure of its acute care beds.

(1) For the rate effective January 1 of the calendar year following actual complete closure of the affiliated hospital’s acute care beds, the mean indirect price per day determined pursuant to section 86-2.10(d)(4)(i) of this Subpart shall be determined by summing the product of multiplying the mean indirect price per day of the appropriate hospital based peer group by .75 and the product of multiplying the mean indirect price per day of the appropriate freestanding peer group by .25.

(2) For the rate effective January 1 of the second calendar year following actual complete closure of the affiliated hospital’s acute care beds, the mean indirect price per day determined pursuant to section 86-2.10(d)(4)(i) of this Subpart shall be determined by summing the product of multiplying the mean indirect price per day of the appropriate hospital based peer group by .50 and the product of multiplying the mean indirect price per day of the appropriate freestanding peer group by .50.

(3) For the rate effective January 1 of the third calendar year following actual complete closure of the affiliated hospital’s acute care beds, the mean indirect price per day determined pursuant to section 86-2.10(d)(4)(i) of this Subpart shall be determined by summing the product of multiplying the mean indirect price per day of the appropriate hospital based peer group by .25 and the product of multiplying the mean indirect price per day of the appropriate freestanding peer group by .75.

(c) For purposes of establishing the factor determined pursuant to section 86-2.12(a) of this Subpart, a hospital based residential health care facility whose affiliation changes to freestanding under circumstances described in subdivision (a) of this section and has applied for a three year phase in of the freestanding indirect component pursuant to subdivision (b) of this section shall continue to be classified as hospital based for a period of three calendar years following the actual complete closure of the affiliated hospital’s acute care beds.

(d) A hospital based residential health care facility whose affiliation changed to freestanding under the circumstances described in subdivision (a) of this section that fails to notify the department within 30 days from the date of actual complete closure of the acute care beds shall not be eligible for the provisions of subdivision (b) and subdivision (c) of this section.
New York
110-c

Such facilities shall be designated freestanding, for rate calculation purposes, pursuant to this Subpart retroactive to the date of actual complete closure of the acute care beds of the affiliated hospital.

February 27, 1990

TN #88-47 Approval Date February 27, 1990
Supersedes TN ----- Effective Date October 1, 1988
86-2.36 Scheduled short term care.

(a) Residential health care facilities which provide scheduled short term care for residents shall be paid a per diem rate of reimbursement for such services which is the average per diem rate of reimbursement for the facility as established pursuant to this Subpart.

(b) The requirements of sections 86-2.11 and 86-2.30 relating to resident assessments (PRI) and the submission of case mix information to the Department shall not apply to scheduled short term care.

Clarifying Information:

1. Scheduled short term care is care provided to individuals who are determined to need nursing facility care but are being cared for by someone in the community, and who do not participate in a Home and Community Based Waiver program.

2. All federal nursing facility statutory and regulatory requirements, including those related to admission, discharge and transfer, continue to apply to scheduled short term care services.

3. Individuals may receive no more than 30 days of scheduled short term care for a given admission, and no more than a total of 42 days of scheduled short term care during a given year.

4. If an individual receives services in the nursing facility for a time period exceeding the maximum limits specified in (3), the admission will be considered as a normal nursing facility admission for state and federal regulatory purposes, and the reimbursement for such services will be according to the standard state nursing facility rate-setting methodology contained in this Part of the plan.

June 21, 1993

TN #91-44 Approval Date June 21, 1993
Supersedes TN NEW Effective Date October 1, 1991
Pay for Performance Incentive

(a) The commissioner shall make rate adjustments, effective May 1, 2008, and thereafter, to certain residential health care facilities who demonstrate to the satisfaction of the Commissioner that they can meet or exceed defined quality measures.

(b) Initial awards shall be based on a residential health care facility’s performance for pressure ulcer quality of care for chronic care residents.

(c) The Commissioner shall make two sets of awards as follows:

An award shall be made for the best performers for the evaluation period. Best performers are those facilities ranked in the top four percentile of all eligible residential health care facilities according to the four quarters average score for the period January 1, 2007 through December 31, 2007.

An award shall be made to residential health care facilities with the best improvement in pressure ulcer care between a base and evaluation period. Best improvers are those facilities ranked in the top four percentile of all eligible residential health care facilities according to the base and the evaluation periods four quarters average score. The base period score shall be based on the period July 1, 2006 through June 30, 2007; the evaluation score shall be based on the period July 1, 2007 through June 30, 2008. Facilities in the bottom quarter percentile of all eligible residential health care facilities for this evaluation period shall not be eligible for such an award if, even after their improvement in pressure ulcer care, they still remain in the bottom quarter percentile of all eligible residential health care facilities; and

Residential health care facilities that qualify are eligible to receive an award in both categories of awards.

(d) The evaluation period for the award for best performers shall be January 1, 2007 through December 31, 2007. The base period for the award for best improvement shall be July 1, 2006 through June 30, 2007, which shall be compared to the period July 1, 2007 through June 30, 2008.

(e) The following factors shall be considered by the Commissioner in making awards pursuant to this section:

The quality measure of pressure ulcer shall be risk adjusted using such patient health factors to include but not be limited to, coma, malnutrition, diseases and conditions related to pressure ulcer, low body mass index, and plegia (paraplegia or hemiplegia);
New York
110(d)(2)

Pressure ulcer rates shall be considered only for chronic care residential health care facility residents:

In order to be eligible to be considered for a rate enhancement, a residential health care facility must have averaged more than one prevented pressure ulcer per quarter of the evaluation period identified in paragraph (d) of this section as calculated by comparing the actual number of residents with a pressure ulcer to the expected number of residents with a pressure ulcer based on the facility's risk adjusted pressure ulcer rate developed pursuant to this subdivision; and

Any residential health care facility receiving a written deficiency for substandard quality of care, as defined in federal regulation 42 C.F.R. §488.301, during the evaluation periods contained in this section shall be excluded from receiving an award under this section.

(f) Rate adjustments made pursuant to this section for residential health care facilities receiving monetary awards shall be made proportionately based on each eligible facility's percent of Medicaid patient days to the total Medicaid patient days for all eligible facilities. Such days of care are as reported in the latest RHCF-4 cost reports for patients eligible for medical assistance.

Residential health care facilities chosen to receive rate enhancements pursuant to this section shall, prior to the rate enhancement, inform the Commissioner in writing as to their proposed use of the additional monies to further improve quality and care of patients in the residential health care facility.

(g) A total of $3,000,000 will be paid as rate adjustments.
Computation of a Price for the Operating Component of the Rate for Non-specialty Facilities and the Non-capital Component of the Rate for Specialty Facilities

a) Effective January 1, 2012, the operating component of rates of payment for non-specialty residential health care facilities (RHCFs) shall be a price and shall consist of the sum of the following components:

1) \( \left( \frac{50\%}{\text{statewide direct price for all non-specialty facilities}} + \frac{50\%}{\text{peer group direct price}} \right) \times \left( \text{direct WEF adjustment} \times \text{case mix adjustment} \right) + \left( \frac{50\%}{\text{statewide indirect price for all non-specialty facilities}} + \frac{50\%}{\text{peer group indirect price}} \right) \times \left( \text{indirect WEF adjustment} \right) \) + non comparable component + applicable rate add-ons

b) For purposes of calculating the direct and indirect price component of the rates, peer group shall mean:

1) all non-specialty facilities (NSF)

2) all non-specialty hospital-based facilities and non-specialty freestanding facilities with certified bed capacities of 300 beds or more (NSHB/NS300+)

3) non-specialty freestanding facilities with certified bed capacities of less than 300 beds (NS300-)

c) Specialty facilities shall mean:

1) AIDS facilities or discrete AIDS units within facilities;

2) discrete units for residents receiving care in a long-term inpatient rehabilitation program for traumatic brain injured persons;

3) discrete units providing specialized programs for residents requiring behavioral interventions;

4) discrete units for long-term ventilator dependent residents; and

5) facilities or discrete units within facilities that provide extensive nursing, medical, psychological and counseling support services solely to children.

6) discrete units for residents with Neurodegenerative diseases; Amyotrophic Lateral Sclerosis and Huntington as is defined in Attachment 4.19-D Part I Huntington’s disease.

Attachment 4.19-D

New York
110(d)(3)

TN #16-0009 Approval Date January 30, 2017

Supersedes TN #11-0023-A Effective Date November 1, 2016
d) The direct component of the price shall consist of a blended rate to be determined as follows:
1) For NSHB/NS300+ the direct component of the price shall consist of a blended rate equal to:

i) 50% of the statewide direct NSF price, which shall be the allowable operating costs and statistical data for the direct component of the price as reported by all non-specialty facilities in its cost reports for the 2007 calendar year, reduced by the allowable costs percent reduction, and divided by total 2007 patient days, and

ii) 50% of the direct NSHB/NS300+ price, which shall be the allowable operating costs and statistical data for the direct component of the price as reported by all non-specialty hospital-based facilities and all non-specialty freestanding facilities with certified bed capacities of 300 beds or more in its cost reports for the 2007 calendar year, reduced by the allowable costs percent reduction, and divided by total 2007 patient days.

2) For NS300- the direct component of the price shall consist of a blended rate equal to:

i) 50% of the statewide direct NSF price, which shall be the allowable operating costs and statistical data for the direct component of the price as reported by all non-specialty facilities in its cost reports for the 2007 calendar year, reduced by the allowable costs percent reduction, and divided by total 2007 patient days, and

ii) 50% of the direct NS300- price, which shall be the allowable operating costs and statistical data for the direct component of the price as reported by all non-specialty facilities with certified bed capacities of less than 300 beds in its cost reports for the 2007 calendar year, reduced by the allowable costs percent reduction, and divided by total 2007 patient days.

3) Pursuant to the methodology described above, the direct component of the price for each peer group shall be as follows:

e) Allowable costs for the direct price component shall be the costs reported in the following functional cost centers on the facility's 2007 cost report (RHCF-4), or extracted from a hospital-based facility's 2007 cost report (RHCF-2) and the institutional cost report of its related hospital, as extracted by the Commissioner on December 21, 2010, or from the most recent cost report available on that day, after first deducting costs attributable to specialty units and the hospital and capital costs.

1) For the purposes of calculating the Medicare Ineligible Price and the Medicare Part D Eligible Price the costs identified shall be reduced by the costs of prescription drugs as reported on the facility's 2007 cost report.

2) For the purposes of calculating the Medicare Part B Eligible Price and the Medicare Part B Eligible Price and Medicare Part D Eligible Price the costs identified shall be reduced by the costs of prescription drugs as reported on the facility's 2007 cost report and the revenue offsets associated with Medicare Part B Eligible Patients as reported by Medicare.

i) Nursing administration (013);
ii) Activities (014);
iii) Social services (021);
iv) Transportation (022); - non-medical transportation only effective April 1, 2016
v) Physical therapy (039) (including associated overhead);
v) Occupational therapy (040) (including associated overhead);
vii) Speech/hearing therapy (041) (including associated overhead);
viii) Central service supply (043);
ix) Residential health care facility (051); and
x) Pharmacy (042) (excluding the costs allocated to non comparables).
The direct component of the price shall be adjusted by a wage equalization factor (WEF). The WEF adjustment shall be calculated using cost and statistical data reported in each facility's 2009 certified cost report (RHCF-4), or extracted from a hospital-based facility's 2009 certified cost report (RHCF-2) and the institutional cost report of its related hospital as applicable) as extracted by the Commissioner on October 31, 2011, after first deducting costs attributable to specialty units and the hospital, for the 2009 calendar year. The WEF adjustment shall consist of 50% of a facility-specific direct WEF and 50% of a regional direct WEF.

1) The facility-specific direct WEF shall be calculated as follows:

\[ 1/((\text{Facility-Specific Wage Ratio} / \text{Wage Index}) + (\text{Facility-Specific Non-Wage Ratio})) \]

i) The Facility-Specific Wage Ratio shall be calculated by dividing facility-specific total salaries and fringes related to direct cost centers for nursing administration (013), activities program (014), social services (021), transportation (022), physical therapy (039), occupational therapy (040), speech/hearing therapy (041), pharmacy (042), central service supply (043), and residential health care facility (051) by total direct operating expenses from such cost centers.

ii) The Wage Index shall be calculated by dividing facility-specific labor costs per hour by labor costs per hour for RNs, LPNs, aides and orderlies, therapists and therapist aides for all facilities from cost centers physical therapy (039), occupational therapy (040), speech/hearing therapy (041) and residential health care facility (051).

iii) The Facility-Specific Non-Wage Ratio shall be calculated by subtracting from 1 the Facility-Specific Wage Ratio.

2) A regional direct WEF shall be calculated for each of the following 16 regions. The county geographic boundaries shall be the sole factor considered for determining in which WEF region a facility is located.
### New York 110(d)(10)

<table>
<thead>
<tr>

</tr>
<tr>
<td>Western Rural Region</td>
<td>Allegany, Genesee, and Wyoming</td>
</tr>
</tbody>
</table>

3) The regional direct WEF shall be calculated for each of the 16 regions as follows:

\[
\frac{1}{\left(\frac{\text{Regional Wage Ratio}}{\text{Regional Wage Index}} + \text{Regional Non-Wage Ratio}\right)}
\]
New York 110(d)(11)

j) The Regional Wage Ratio shall be calculated by dividing total salaries and fringes related to direct costs in the region from cost centers for nursing administration (013), activities program (014), social services (021), transportation (022), physical therapy (039), occupational therapy (040), speech/hearing therapy (041), pharmacy (042), central service supply (043), and residential health care facility (051) by total direct operating expenses in the region from such cost centers.

ii) The Regional Wage Index shall be calculated by dividing labor costs per hour in the region by labor costs per hour for RNs, LPNs, aides and orderlies, therapists and therapist aides for all facilities from cost centers physical therapy (039), occupational therapy (040), speech/hearing therapy (041) and residential health care facility (051).

iii) The Regional Non-Wage Ratio shall be calculated by subtracting from 1 the Regional Wage Ratio.

4) The regional direct WEF adjustment to the direct component of the price for facilities for which 2009 cost report data is unavailable or insufficient to calculate the WEF as described above will be equal to 100% of the applicable regional WEF.

g) The direct component of the price shall be subject to a case mix adjustment in accordance with the following:

1) The application of the relative Resource Utilization Groups System (RUGS-III) as published by the Centers for Medicare and Medicaid Services and revised to reflect New York State wage and fringe benefits and based on Medicaid-only patient data.
2) New York State wages shall be used to determine the weight of each RUG. The cost for each RUG shall be calculated using the relative resources for RNs, LPNs, aides, therapists, and therapy aides and the 1995-97 federal time study. The minutes from the federal time study are multiplied by the NY average dollar per hour to determine the fiscal resources need to care for that patient type. This amount shall be multiplied by the number of patients in that RUG. RUG weights shall be assigned based on the distance from the statewide average. The RUGS III weights shall be increased by the following amounts for the following categories of residents:

i) thirty minutes of certified nurse aide time for the impaired cognition A category.

ii) forty minutes of certified nurse aide time for the impaired cognition B category, and

iii) twenty-five minutes of certified nurse aide time for the reduced physical functions B category.

3) The case mix adjustment for the direct component of the price effective January 1, 2012, shall be calculated as follows:

i) For NSHB/NS300+ the case mix adjustment shall be calculated by dividing the Medicaid-only case mix derived from data for January 2011 for each such facility by the all-payer case mix for the base year 2007. The all-payer case mix for base year 2007 shall be a blend of:

(a) 50% of the case mix for all non-specialty facilities, and

(b) 50% of the case mix for all non-specialty hospital-based facilities and non-specialty freestanding facilities with certified bed capacities of 300 beds or more; or

ii) For NS300- the case mix adjustment shall be calculated by dividing the Medicaid-only case mix derived from data for January 2011 for each such facility by the all-payer case mix for the base year 2007. The all-payer case mix for base year 2007 shall be a blend of:

(a) 50% of the case mix for all non-specialty facilities, and

(b) 50% of the case mix for non-specialty freestanding facilities with certified bed capacities of less than 300 beds.

</tr>
</tbody>
</table>

* Count is defined as the number of patients in each Resource Utilization Group and Weight is calculated and defined as described above in paragraph g(1) and g(2).

4) Subsequent case mix adjustments to the direct component of the price for rate periods effective after January 1, 2012, shall be made in July and January of each calendar year and shall use Medicaid-only case mix data applicable to the previous case mix period (e.g., July 1, 2012, case mix adjustment will use January 2012 case mix data, and January 1, 2013, case mix adjustment will use July 2012 case mix data).
5) Case mix adjustments to the direct component of the price for facilities for which facility-specific case mix data is unavailable or insufficient shall be equal to the base year case mix of the peer group applicable to such facility.

6) The adjustments and related patient classifications for each facility shall be subject to audit review by the Office of Medicaid Inspector General.

h) The indirect component of the price shall consist of a blended rate to be determined as follows:

1) For NSHB/NS300+ the indirect component of the price shall consist of a blended rate equal to:

   i) 50% of the Statewide indirect NSF price which shall be the allowable operating costs and statistical data for the indirect component of the price as reported by all non-specialty facilities in its cost reports for the 2007 calendar year, reduced by the allowable costs percent reduction, and divided by total 2007 patient days; and

   ii) 50% of the indirect NSHB/NS300+ price which shall be the allowable operating costs and statistical data for the indirect component of the price as reported by all non-specialty hospital-based facilities and all non-specialty freestanding facilities with certified bed capacity of 300 beds or more in its cost reports for the 2007 calendar year, reduced by the allowable costs percent reduction, and divided by total 2007 patient days; or

2) For NS300- the indirect component of the price shall consist of a blended rate equal to:

   i) 50% of the Statewide indirect NSF price which shall be the allowable operating costs and statistical data for the indirect component of the price as reported by all non-specialty facilities in its cost reports for the 2007 calendar year, reduced by the allowable costs percent reduction, and divided by total 2007 patient days; and

   ii) 50% of the indirect NS300- prices which shall be the allowable operating costs and statistical data for the indirect component of the price as reported by all non-specialty facilities with certified bed capacity of less than 300 beds in its cost reports for the 2007 calendar year, reduced by the allowable costs percent reduction, and divided by total 2007 patient days.
3) Pursuant to the methodology described above, the indirect component of the price for each peer group shall be as follows:

### Indirect Component of the Price (NSHB/NS300+) Peer Group

</table>
4) The allowable costs percent reduction for the indirect component shall be the same as the allowable cost reduction used for the direct component and shown in paragraph C of the subdivision 4) of this section.

i) Allowable costs for the indirect component of the rate shall include costs reported in the following functional cost centers on the facility's 2007 certified cost report (RHCF-4), or extracted from a hospital-based facility's 2007 certified cost report (RHCF-2) and the institutional cost report of its related hospital, as extracted by the Commissioner on December 21, 2010, after first deducting costs attributable to specialty units, and the hospital; and capital costs:

1) Fiscal Services (004);
2) Administrative Services (005);
3) Plant Operations and Maintenance (006) with the exception of utilities and real estate occupancy taxes;
4) Grounds (007);
5) Security (008);
6) Laundry and Linen (009);
7) Housekeeping (010);
8) Patient Food Services (011);
9) Cafeteria (012);
10) Non-Physician Education (015);
11) Medical Education (016);
12) Housing (018); and
13) Medical Records (019).
The indirect component of the price shall be adjusted by a wage equalization factor (WEF). The WEF adjustment shall be calculated using cost and statistical data reported by each facility's 2009 certified cost report (RHCF-4), or extracted from a hospital-based facility's 2009 certified cost report (RHCF-2) and the institutional cost report of its related hospital as applicable) as extracted by the Commissioner on October 31, 2011 after first deducting costs attributable to specialty units and the hospital. The WEF adjustment shall consist of 50% of a facility-specific indirect WEF and 50% of a regional indirect WEF.

1) The facility-specific indirect WEF shall be calculated as follows:

\[ \frac{1}{(\text{Facility-Specific Wage Ratio} / \text{Wage Index}) + (\text{Facility-Specific Non-Wage Ratio})} \]

i) The Facility-Specific Wage Ratio shall be calculated by dividing facility-specific total salaries and fringes related to indirect cost centers for fiscal services (004), administrative services (005), plant operation and maintenance (006), grounds (007), security (008), laundry and linen (009), housekeeping (010), patient food service (011), cafeteria (012), non physician education (015), medical education (016), housing (018) and medical records (019), by total indirect operating expenses from such cost centers.

ii) The Wage Index shall be calculated by dividing facility-specific labor costs per hour by labor costs per hour for RNs, LPNs, aides and orderlies, therapists and therapist aides for all facilities from cost centers physical therapy (039), occupational therapy (040), speech/hearing therapy (041) and residential health care facility (051).

iii) The Facility-Specific Non-Wage Ratio shall be calculated by subtracting from 1 the Facility-Specific Wage Ratio.

2) A regional indirect WEF shall be calculated using the 16 regions as defined for the regional WEF in paragraph e) subsection 2 of this section. The county geographic boundaries shall be the sole factor considered in determining which WEF region a facility is located.
New York
110(d)(18)

3) The regional indirect WEF shall be calculated for each of the 16 regions as follows:

\[
\frac{1}{((\text{Regional Wage Ratio} / \text{Regional Wage Index}) + (\text{Regional Non-Wage Ratio}))}
\]

i) The Regional Indirect Wage Ratio shall be calculated by dividing total salaries and fringes related to indirect cost centers in the region for Fiscal Services (004), Administrative Services (005), Plant Operation and Maintenance (006), Grounds (007), Security (008), Laundry and Linen (009), Housekeeping (010), Patient Food Service (011), Cafeteria (012), Non Physician Education (015), medical education (016), housing (018) and Medical Records (019) for such indirect cost centers by total indirect operating expenses in the region from such cost centers.

ii) The Wage Index shall be calculated by dividing labor costs per hour in the Region by labor costs per hour for RNs, LPNs, aides and orderlies, therapists and therapist aides for all facilities from cost centers physical therapy (039), occupational therapy (040), speech/hearing therapy (041) and residential health care facility (051).

iii) The Regional Non-Wage Ratio shall be calculated by subtracting from 1 the Regional Wage Ratio.

4) The regional indirect WEF adjustment to the indirect component of the price for facilities for which 2009 cost report data is unavailable or insufficient to calculate the WEF as described above will be equal to 100% of the applicable regional WEF.

k) The non-comparable component of the price shall be calculated using allowable operating costs and statistical data as reported in each non-specialty facility's certified cost report for the 2007 calendar year, as extracted by the Commissioner on December 21, 2010, divided by total 2007 patient days.
Allowable costs for the non-comparable component of the price shall include costs reported in the following functional cost centers on the facility’s annual certified cost report (RHCF-4), or extracted from a hospital-based facility’s annual certified cost report (RHCF-2) and the institutional cost report of its related hospital, as extracted by the Commissioner on December 21, 2010, after first deducting costs attributable to specialty units, and the hospital; and capital costs:

1) Laboratory services (031);
2) ECG (032);
3) EEG (033);
4) Radiology (034);
5) Inhalation Therapy (035);
6) Podiatry (036);
7) Dental (037);
8) Psychiatric (038);
9) Speech and Hearing Therapy – (Hearing Therapy Only including associated overhead) (041);
10) Medical Directors Office (017);
11) Medical Staff Services (044);
12) Utilization review (020);
13) Other ancillary services (045, 046, 047);
14) Costs of utilities associated with plant operations and maintenance; and
15) Pharmacy costs pertaining to administrative overhead and costs of non-prescription drugs and supplies.
m) The non-comparable component of the price for facilities for which 2007 cost report data is unavailable or insufficient to calculate the non-comparable component as described above shall initially receive a non-comparable rate which is calculated using the most recently available certified cost report which is most proximate to 2007 and the total patient days which relate to such report and if no such report is available, the regional average non-comparable price shall be utilized until such time as a certified cost report is available.

n) Per Diem Adjustments for Dementia, Bariatric, or Traumatic Brain-Injured Patients. If applicable, and as updated pursuant to the case mix adjustments described above, the operating component of the price shall be adjusted to reflect:

1) A per diem add-on in the amount of $8 for each dementia patient, defined as one who A) qualifies under both the RUG-III impaired cognition and the behavioral problems categories, or (B) has been diagnosed with Alzheimer's disease or dementia, is classified in the reduced physical functions A, B, or C or in behavioral problems A or B categories, and has an activities of daily living index score of ten or less.

2) A per diem add-on in the amount of $17 for each bariatric patient, defined as one whose body mass index is greater than thirty-five.

3) A per diem add-on in the amount of $36 for each traumatic brain-injured patient, defined as one requiring extended care as a result of that injury.

o) [Reserved.] Effective for services provided on and after June 20, 2012, rates of payment for residential health care facilities which have received approval by the Commissioner of Health to provide services to more than 25 patients whose medical condition is HIV Infection Symptomatic, and the facility is not eligible for separate and distinct payment rates for AIDS facilities or discrete AIDS units, will receive a per diem adjustment. The adjustment is equal to the difference between (1) such facility's allowable operating cost, as described previously in this section, for 2010 extracted by the Commissioner on January 10, 2012 divided by 2010 total resident days, and (2) the daily weighted average non-capital component of the rate, calculated using 2010 Medicaid days, in effect on and after January 1, 2012, and as subsequently updated by case mix adjustments made in July and January of each calendar year as described previously in this section. Such per diem adjustment shall not result in a total operating rate that exceeds allowable total operating costs per day.
Effective May 10, 2018 and thereafter, the fee-for-service rate of reimbursement for inpatient services for a residential health care facility located in a county with a population of more than seventy-two thousand but less than seventy-five thousand persons, based on the 2010 federal census, and operating between one hundred and one hundred thirty beds, will be increased by 17% of the base operating and capital components of the inpatient services rate calculated for that facility. Residential health care facility fee-for-services rates can be found on the Department of Health website at:

https://www.health.ny.gov/facilities/long_term_care/reimbursement/nhr/
Effective on or after May 17, 2018, the Department of Health shall adjust Medicaid service payments in response to a New York State Supreme Court decision in the Matter of The Bronx-Lebanon Highbridge Woodycrest Center. The adjustment shall be a lump sum payment of $4,314,009. This payment is intended to satisfy the judgment in the aforementioned court decision. This payment will be made in SFY 2019.

TN #18-0050 Approval Date __August 6, 2018__________________
Supersedes TN #NE # __Effective Date __May 17, 2018__________________
The New York State Nursing Home Quality Pool (NHQP) is an annual budget-neutral pool of $50 million dollars. The intent of the NHQP is to incentivize Medicaid-certified nursing facilities across New York State to improve the quality of care for their residents, and to reward facilities for quality based on their performance. The set of measures used to evaluate nursing homes are part of the Nursing Home Quality Initiative (NHQI). The performances of facilities in the NHQI determine the distribution of the funds in the NHQP.

NHQI is described below using MDS (Minimum Data Set) year and NHQI (Nursing Home Quality Initiative) year. MDS year refers to the year the assessment data is collected. NHQI year refers to the year when the nursing home performance is evaluated. For example, if the NHQI year is 2019, then the MDS year is 2018. For the [calendar year 2018] NHQI year, the Commissioner will calculate a score and quintile ranking based on data from the [2017 calendar year] MDS year (January 1[, 2017] of the MDS year through December 31[, 2017] of the MDS year), for each non-specialty facility. The score will be calculated based on measurement components comprised of Quality, Compliance, and Efficiency Measures. These measurement components and their resulting score and quintile ranking will be referred to as the Nursing Home Quality Initiative. From the NHQI, the Commissioner will exclude specialty facilities consisting of non-Medicaid facilities, Special Focus Facilities as designated by the Centers for Medicare and Medicaid Services (CMS), Continuing Care Retirement Communities, Transitional Care Units, specialty facilities, and specialty units within facilities. Specialty facilities and specialty units shall include AIDS facilities or discrete AIDS units within facilities, facilities or discrete units for residents receiving care in a long-term inpatient rehabilitation program for traumatic brain injured persons, facilities or discrete units within facilities that provide specialized programs for residents requiring behavioral interventions, facilities or discrete units within facilities for long-term ventilator dependent residents, facilities or discrete units within facilities that provide services solely to children, and neurodegenerative facilities or discrete neurodegenerative units within facilities. The score for each such non-specialty facility will be calculated using the following Quality, Compliance, and Efficiency Measures.

<table>
<thead>
<tr>
<th>Quality Measures</th>
<th>Measure Steward</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Percent of Long Stay High Risk Residents With Pressure Ulcers (As Risk Adjusted by the Commissioner)</td>
<td>CMS</td>
</tr>
<tr>

<td>CMS</td>
</tr>
<tr>
<td>7 Percent of Long Stay Residents Who Lose Too Much Weight (As Risk Adjusted by the Commissioner)</td>
<td>CMS</td>
</tr>
</tbody>
</table>
The maximum points a facility may receive for the Quality Component is 70. The applicable percentages or ratings for each of the 14 measures will be determined for each facility. Two measures will be awarded points based on threshold values. The remaining 12 measures will be ranked and grouped by quintile with points awarded as follows:

<table>
<thead>
<tr>
<th>Scoring for 12 Quality Measures</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quintile</td>
</tr>
<tr>
<td>1st Quintile</td>
</tr>
<tr>
<td>2nd Quintile</td>
</tr>
<tr>
<td>3rd Quintile</td>
</tr>
<tr>
<td>4th Quintile</td>
</tr>
<tr>
<td>5th Quintile</td>
</tr>
</tbody>
</table>

**Note:** The following quality measures will not be ranked into quintiles and points will be awarded based on threshold values:
- Percent of employees vaccinated for influenza: facilities will be awarded five points if the rate is 85% or higher, and zero points if the rate is less than 85%.
- Percent of contract/agency staff used: facilities will be awarded five points if the rate is less than 10%, and zero points if the rate is 10% or higher.

**Compliance Measures**

| 15 | CMS Five-Star Quality Rating for Health Inspections as of April 1, 2018 of the NHQI year (By Region) |
| 16 | Timely Submission and Certification of Complete [2017] New York State Nursing Home Cost Report to the Commissioner for the MDS year |
| 17 | Timely Submission of Employee Influenza Immunization Data for the September 1, 2017 of the MDS year - March 31, 2018 of the NHQI year IInfluenza Season by the deadline of May 1, 2018 of the NHQI year |

**Efficiency Measure**

| 18 | Rate of Potentially Avoidable Hospitalizations for Long Stay Residents January 1, 2017 of the MDS year - December 31, 2017 of the MDS year (As Risk Adjusted by the Commissioner) |
Rate of Staffing Hours per Day

NYS DOH will calculate an annualized adjusted rate of staffing hours per resident per day using Payroll Based Journal Public Use Files (PBJ PUFs). PBJ PUFs are public data sets prepared by the Centers for Medicare & Medicaid Services (CMS). PBJ PUFs have daily data on nursing home staffing levels. For this measure, staff are defined as RNs, LPNs, and Aides. The rate of reported staffing hours and the rate of case-mix staffing hours will be taken from PBJ PUFs and the adjusted rate of staffing hours will be calculated using the formula below.

\[
\text{Rate Adjusted} = \left( \frac{\text{Rate Reported}}{\text{Rate Case-Mix}} \right) \times \text{Statewide average}
\]

Awarding for Improvement

Nursing homes will be awarded improvement points from previous years’ performance in selected measures in the Quality Component only. One improvement point will be awarded for a nursing home that improves in its quintile for a specific quality measure, compared to its quintile in the previous year for that quality measure. Nursing homes that obtain the top quintile in a quality measure will not receive an improvement point because maximum points per measure cannot exceed five. The [two] three quality measures below will not be eligible to receive improvement points:

- Percent of Employees Vaccinated for Influenza (based on threshold)
New York  
110(d)(22.2)

- Percent of Contract/Agency Staff Used (based on threshold)
- Rate of Staffing Hours per Day

The remaining [12] 11 quality measures that are eligible for improvement points are listed below:
- Percent of Long Stay High Risk Residents [W] with Pressure Ulcers
- Percent of Long Stay Residents Experiencing One or More Falls with Major Injury
- Percent of Long Stay Residents Who have Depressive Symptoms
- Percent of Low Risk Long Stay Residents Who Lose Control of Their Bowels or Bladder
- Percent of Long Stay Residents Who Lose Too Much Weight
- Percent of Long Stay Residents Who Self-Report Moderate to Severe Pain
- Percent of Long Stay Residents Whose Need for Help with Daily Activities Has Increased
- Percent of Long Stay Residents with a Urinary Tract Infection
- Percent of Long Stay Residents Who Received the Seasonal Influenza Vaccine
- Percent of Long Stay Antipsychotic Use in Persons with Dementia
- Percent of Long Stay Residents Who Received the Pneumococcal Vaccine
- [Rate of Staffing Hours per Day]

The grid below illustrates the method of awarding improvement points.

<table>

</tbody>
</table>

For example, if [2017] MDS year [NHQI] performance is in the third quintile, and [2018] NHQI year [NHQI] performance is in the second quintile, the facility will receive four points for the measure. This is three points for attaining the second quintile and one point for improvement from the previous year's third quintile.

**Risk Adjustment of Quality Measures**
The following quality measures will be risk adjusted using the following covariates as reported in the MDS 3.0 data to account for the impact of individual risk factors:

- Percent of Long Stay Residents Who Self-Report Moderate to Severe Pain: the covariate includes cognitive skills for daily decision making on the prior assessment.
- Percent of Long Stay High Risk Residents with Pressure Ulcers: The covariates include gender, age, healed pressure ulcer since the prior assessment, BMI, prognosis of less than six months of life expected, diabetes, heart failure, deep vein thrombosis, anemia, renal failure, hip fracture, bowel incontinence, cancer, paraplegia, and quadriplegia.

**TN #19-0012**  
Approval Date May 20, 2019  
Supersedes TN #18-0002  
Effective Date January 1, 2019
Percent of Long Stay Residents who Lose Too Much Weight: The covariates include age, hospice care, cancer, renal failure, prognosis of less than six months of life expected.

For these three measures the risk adjusted methodology includes the calculation of the observed rate; that is the facility's numerator-compliant population divided by the facility's denominator.

The expected rate is the rate the facility would have had if the facility's patient mix was identical to the patient mix of the state. The expected rate is determined through the risk-adjusted model and follows the CMS methodology found in the MDS 3.0 Quality Measures User's Manual, Appendix A-1.

The facility-specific, risk-adjusted rate is the ratio of observed to expected measure rates multiplied by the overall statewide measure rate.

Reduction of Points Base: When a quality measure is not available for a nursing home, the number of points the measure is worth will be reduced from the base of 100 maximum NHQI points. The nursing home's total score will be the sum of its points divided by the base. This reduction can happen in the following scenarios:

- When nursing homes do not have enough cost report data to calculate a percent of contract/agency staff used or the rate of staffing hours per day; or
- When a quality measure has a denominator of less than 30
The maximum points a facility may receive for the Compliance Component is 20 points. Points shall be awarded as follows:

<table>
<thead>
<tr>
<th>Scoring for Compliance Measures</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMS Five-Star Quality Rating for Health Inspections (By Region)</td>

<td>Timely Submission and Certification of Complete [2017] New York State Nursing Home Cost Report to the Commissioner of the MDS year</td>
<td>5 (Facilities that fail to submit a timely, certified, and complete cost report will receive zero points)</td>
</tr>
<tr>
<td>Timely Submission of Employee Influenza Immunization Data</td>
<td>5 for the May 1[ , 2018] of the NHQI year deadline (Facilities that fail to submit timely influenza data by the deadline will receive zero points)</td>
</tr>
</tbody>
</table>

**CMS Five-Star Quality Rating for Health Inspections**

The CMS Five-Star Quality Rating for Health Inspections as of April 1[ , 2018] of the NHQI year will be adjusted by region. This is not a risk adjustment. For eligible New York State nursing homes, the health inspection scores from CMS will be stratified by region. Cut points for health inspection scores within each region will be calculated using the CMS 10-70-20% distribution method. Per CMS’ methodology, the top 10% of nursing homes receive five stars. The middle 70% receive four, three, or two stars, with an equal percentage (~23.33%) receiving four, three, or two stars. The bottom 20% receive one star. Each nursing home will be awarded a star rating based on the health inspection score cut points specific to its region. Regions include the Metropolitan Area (MARO), Western New York (WRO), Capital District (CDRO), and Central New York (CNYRO). Regions are defined by the New York State Health Facilities Information System (NYS HFIS). The counties within each region are shown below.

**Metropolitan Area Regional Offices (MARO):** Bronx, Dutchess, Kings, Nassau, New York, Orange, Putnam, Queens, Richmond, Rockland, Suffolk, Sullivan, Ulster, and Westchester.

**Central New York Regional Offices (CNYRO):** Broome, Cayuga, Chenango, Cortland, Herkimer, Jefferson, Lewis, Madison, Oneida, Onondaga, Oswego, Saint Lawrence, Tioga, and Tompkins.

TN #19-0012 Approval Date May 20, 2019
Supersedes TN #18-0002 Effective Date January 1, 2019

Reduction of Points Base: When a compliance measure is not available for a nursing home, the number of points the measure is worth will be reduced from the base of 100 maximum NHQI points. The nursing home’s total score will be the sum of its points divided by the base. This reduction can happen when a facility does not have a CMS Five-Star Quality Rating for Health Inspections.

The maximum points a facility may receive for the Efficiency Component is 10 points. The rates of potentially avoidable hospitalizations will be determined for each facility and each such rate will be ranked and grouped by quintile with points awarded as follows:

<table>
<thead>
<tr>
<th>Quintile</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st Quintile</td>
<td>10</td>
</tr>
<tr>
<td>2nd Quintile</td>
<td>8</td>
</tr>
<tr>
<td>3rd Quintile</td>
<td>6</td>
</tr>
<tr>
<td>4th Quintile</td>
<td>2</td>
</tr>
<tr>
<td>5th Quintile</td>
<td>0</td>
</tr>
</tbody>
</table>

The Efficiency Measure will be risk adjusted [using the following] for certain conditions chosen from a pool of covariates as reported in the MDS 3.0 data to account for the impact of individual risk factors: gender, age, [race/ethnicity, payor, prior hospitalization (hospitalization less than or equal to 90 days before the long stay episode began), pneumonia, urinary tract infection,) shortness of breath, falls with injury, pressure ulcer, activities of daily living, renal disease, cognitive impairment, dementia, diabetes, parenteral nutrition, rheumatologic disease, gastrointestinal disease, multi-drug-resistant infection, indwelling catheter, wound infection, deep vein thrombosis, cancer, feeding tube, [septicemia, antibiotic-resistant infection,] coronary artery disease, liver disease, paralysis, peripheral vascular disease, and [Charison Index*] malnutrition.

[*The Charlson Index is a score based on several comorbidities following CMS specifications. In the statistical model, the Charlson Index is separated into the following three groups: Low (a score of less than or equal to 1), Mid (2-4), and High (5 and greater).The comorbidities were determined using (1) any MDS assessment during the resident’s long stay episode, or (2) a hospitalization record up to 12 months before the resident’s long stay episode began, or (3) a hospitalization record up to three days after the resident’s long stay episode ended. The comorbidities used to create the Charlson Index include the following: myocardial infarction, congestive heart failure, peripheral vascular disease, cerebrovascular disease, dementia, chronic pulmonary disease, rheumatologic disease, peptic ulcer disease, mild liver disease, diabetes with complications, diabetes without complications, paraplegia and hemiplegia, renal disease, cancer/leukemia, moderate or severe liver disease, metastatic carcinoma, and AIDS/HIV.]
A potentially avoidable hospitalization is found by matching a discharge assessment in the MDS 3.0 data to its hospital record in SPARCS. The following primary [ICD-9 and] ICD-10[*] diagnoses on the SPARCS hospital record are potentially avoidable:

<table>
<thead>
<tr>
<th>Potentially Avoidable Hospitalization Condition</th>
<th>[ICD-9 codes]</th>
<th>ICD-10 codes</th>
</tr>
</thead>
</table>
Anemia | D500, D501, D508, D509, D510, D511, D513, D518, D520, D521, D528, D529, D530, D531, D532, D538, D539, D62, D638

Reduction of Points Base: When the number of long stay residents that contribute to the denominator of the potentially avoidable hospitalization measure is less than 30, the number of points the measure is worth will be reduced from the base of 100 maximum NHQI points. The nursing home’s total score will be the sum of its points divided by the base.

The following [rate adjustments] payments, which will be applicable to the [2018 calendar year] NHQI Year, will be made to fund the NHQP and to make payments based upon the scores calculated from the NHQI as described above.

- Each non-specialty facility will be subject to a Medicaid rate reduction to fund the NHQI, which will be calculated as follows:

- For each such facility, Medicaid revenues, calculated by multiplying each facility’s NHQI Year promulgated rate in effect for such period by reported Medicaid days, as reported in a facility’s MDS Year [2017] cost report, will be divided by total Medicaid revenues of all non-specialty facilities. The result will be multiplied by the $50 million dollars, and divided by each facility’s most recently reported Medicaid days as reported in a facility’s cost report of the MDS Year. If a facility fails to submit a timely filed [2017] cost report in the MDS Year, the most recent cost report will be used.

- The total scores as calculated above for each such facility will be ranked and grouped by quintile. Each of the top three quintiles will be allocated a share of the $50 million NHQI and each such facility within such top three quintiles will receive a payment. Such payments will be paid as a [per diem adjustment] lump sum payment outside of the Nursing Home rate for the [2018] NHQI Year, [calendar year]. Such shares and payments will be calculated as follows:
## Distribution of NHQP Payments

<table>
<thead>
<tr>
<th>Facilities Grouped by Quintile</th>

**TN #19-0012**  
**Supersedes TN #18-0002**  
**Approval Date May 20, 2019**  
**Effective Date January 1, 2019**
The following facilities will not be eligible for [2018] NHQP payments and the scores of such facilities will not be included in determining the share of the NHQP payments:

- A facility with health inspection survey deficiency data showing a level J/K/L deficiency during the time period of July 1[, 2017] of the MDS year through June 30[, 2018] of the NHQI year. Deficiencies will be reassessed on October 1[, 2018] of the NHQI year to allow a three-month window (after the June 30[, 2018] of the NHQI year cutoff date) for potential Informal Dispute Resolutions (IDR) to process. The deficiency data will be updated to reflect IDRs occurring between July 1[, 2018] of the NHQI year and September 30[, 2018] of the NHQI year. Any new J/K/L deficiencies between July 1[, 2018] of the NHQI year and September 30[, 2018] of the NHQI year will not be included in the [2018] NHQI.
Effective May 17, 2018, and every January 1 thereafter, low quality performing residential health care facilities will have their rates reduced as described in this section based on the most recent two years of Nursing Home Quality Initiative (NHOI) data. A low quality performing facility is one that was ranked in the lowest two quintiles for the second most recent year, and ranked in the lowest quintile for the most recent year. In the rate year immediately following the two-year measurement period, a low quality performing facility’s computed Medicaid rate will be reduced by 2 percent. Financially distressed providers will be excluded from this penalty.
Adjustment for Minimum Wage Increases. Effective January 1, 2017, and every January 1, thereafter until the minimum wage reaches the state statutorily described per hour wage as shown below, a minimum wage add-on will be developed and applied to the specialty and non-specialty Nursing Home rate.

<table>
<thead>

</tr>
</tbody>
</table>

The minimum wage adjustment will be developed and implemented as follows:

1. Minimum wage costs will mean the additional costs incurred beginning January 1, 2017 and thereafter, as a result of New York State statutory increases to minimum wages.

2. The 2017 facility specific minimum wage add-on will be developed based on collected survey data received and attested to by nursing facility providers. If a facility does not submit a survey, the minimum wage add-on will be calculated based on the facility's Residential Health Care Facility (RHCF) cost report wage data from two years prior to the period being calculated. If a facility fails to submit both the attested survey and the cost report, the facility’s minimum wage add-on will not be calculated.

i. Minimum wage cost development based on survey data collected.
   a. Survey data will be collected for facility specific wage data.
   b. Facilities will report by wage bands, the total count of FTEs and total hours paid to all employees (contracted and non-contracted staff) earning less than the statutory minimum wage applicable for each region.
   c. Facilities will report an average fringe benefit percentage for the employees directly affected by the minimum wage increase.
   d. The minimum wage costs are calculated by multiplying the total hours paid by the difference between the statutory minimum wage and the midpoint of each wage band where the facility has reported total hours paid. To this result, the facility’s average fringe benefit percentage is applied and added to the costs.

ii. Minimum wage cost development based on the RHCF cost report data.
   a. The average hourly wages of employees where the reported average hourly wage is below the regional statutory minimum wage are identified.
   b. The total payroll hours of the employees identified are then multiplied by the regional statutory minimum wage resulting in a projected payroll. The actual payroll as reported in the cost report is then subtracted from the projected payroll resulting in the expected wage costs increase.
   c. The facility’s fringe benefit costs directly affected by the wage increase are identified, and the average fringe benefit percentage is calculated.
   d. The fringe benefit percentage is applied to the increased wage costs and added resulting in the minimum wage costs.
3. The facility specific cost amount will be adjusted by a factor calculated by dividing the facility’s average dollar per hour under minimum wage by the regional average. The resulting amount will be divided by patient days to arrive at a rate per diem add on, which will be applied to only Medicaid days for purposes of Medicaid reimbursement.

4. In subsequent years until the minimum wage is completely implemented statewide, the Department will survey facilities utilizing the methodology employed in year one. If a facility fails to submit the minimum wage survey, the calculation for minimum wage costs will default to the personnel wage data reported on the Facility’s latest available RHCF cost report. If a facility fails to submit both the survey and the RHCF cost report, its minimum wage add-on will not be calculated. Once the minimum wage costs are included in the development of the nursing home rate, the minimum wage add-on will be excluded from the rate.

5. **Minimum Wage Reconciliation** - After the end of each calendar year, the Department of Health will survey providers to obtain the following information for the purpose of reconciling annual minimum wage reimbursement. The state will release the reconciliation survey by the end of March and providers will have two weeks to complete the survey or request an extension if a provider determines it is unable to complete the survey within that time. Approval of extensions, and the time of the extension, is at the discretion of the state. If the reconciliation survey is not submitted within the two weeks or within the extension time frame, should one be granted, the provider's minimum wage add-on for the calendar year covered by the survey will be recouped.

   i. Total annual minimum wage funding paid to the provider (as determined from the minimum wage add-on to claims paid for services rendered in the prior calendar year) for the Medicaid share of the minimum wage law increase requirement. (This information will be supplied by the Department of Health.) Medicaid's share is the percentage of minimum wage costs that are attributable to Medicaid services based on the proportion of Medicaid services to a provider’s total services.

   ii. Medicaid’s share of the total amount the provider was obligated to pay to bring salaries up to the minimum wage for the calendar year. (This information will be completed by the provider.)

   iii. Minimum wage funds to be recouped or additional funds to be received by the provider. (This information will be completed by the provider.) This will be the difference between the amount paid to the provider for the Medicaid share of the minimum wage law increase requirement and the corresponding amount the provider determined it was actually obligated to pay.

   iv. The State agency will review providers’ submissions for accuracy and reasonableness, following which it will process associated payments and recoupments via retroactive per unit rate adjustments as quickly as practical thereafter.

The agency’s Chief Executive Officer or Chief Financial Officer must sign an Attestation verifying the data that is supplied in the survey.

---

**TN #17-0007**  **Approval Date January 10, 2018**

**Supersedes TN #16-0024**  **Effective Date January 1, 2017**
Nursing Home Advanced Training Incentive Payments

Advanced Training Incentive Payments to Eligible Facilities. Effective June 1, 2015, the state will annually distribute $46 million to eligible nursing facilities in State Fiscal Year 2016 and in 2017. The purpose of these incentive payments is to reduce avoidable hospital admissions for nursing home residents. New York will incentivize and encourage facilities to develop training programs aimed at early detection of patient decline. Such programs will allow frontline caregivers to provide staff with the training/tools needed to identify resident characteristics that may signify clinical complications. A comprehensive training program will lead to consistent staff assignment to ensure that families and residents can rely on highly trained caregivers to provide effective, high quality, individualized care.

Patient decline detection programs will assist caregivers with identifying residents who are exhibiting warning signs for worsening clinical conditions and allow for rapid intervention to avoid the decline and possible hospitalization. The goal of such training programs will be to reign in the high costs of avoidable hospitalizations, improving the quality of life for New York’s nursing home residents. This initiative will reward eligible nursing home providers who are those that have shown a commitment to giving direct care staff the tools to help lower resident hospitalization rates.

The annual amount will be distributed proportionally to each eligible facility based on its relative share of Medicaid bed days to total Medicaid bed days of all such eligible facilities. Incentive payments will be paid in two lump sum adjustments to supplement nursing facility rates. 75% will be paid in the October - December quarter and the 25% will be paid in the January - March quarter.

To be eligible for this incentive payment, in each state fiscal year a facility must:

1) Provide a training program to direct care staff that has been reviewed and approved by the Department to assist direct care staff identify changes in a resident’s physical, mental, or functional status that could lead to hospitalization. The training program will be subject to Department of Health oversight; and

2) Have a direct care staff retention rate above the statewide median; and

3) Not be excluded from participating in this program.

TN #15-0047 Approval Date March 9, 2016
Supersedes TN NEW Effective Date June 1, 2015
Nursing Home Advanced Training Incentive Payments (cont’d)

Excluded Facilities are:

- Hospital based nursing facilities; and
- Nursing Facilities that have been approved to receive Vital Access Provider (VAP) payments during the same state fiscal year the incentive payment is available.

Calculation Statewide Median and Staff Retention Percentage: Data from Schedule P (Staff Turnover) of the most recently filed Cost Report will be used to measure staff turnover and retention rates for direct care staff. For the 2016 payment, the State will use the 2014 cost report. For the 2017 payment, the state will use 2015 cost report. The staff retention percentage will be equal to the number of employees retained as of December 31, who were employed on January 1 of the same year by the number of staff as of January 1 of that year.

\[
\text{(No. of Employees Retained as of December 31, 20XX, who were Employed on January 1, 20XX)} = \frac{\text{Staff Retention \%}}{\text{(No. of Staff as of January 1, 20XX)}}
\]

XX = 2014 or 2015 cost report as applicable.

A statewide staff retention median was derived by sorting the provider percentages from high to low and selecting the percentage in the middle of the range.

Restorative (Intensive) Care in a Nursing Home

Effective December 1, 2016 NYSDOH will implement a Restorative Care Unit Program to reduce hospital admissions and readmissions from residential health care facilities through the establishment of restorative care units. These restorative care units will provide higher-intensity treatment services to residents who are at risk of hospitalization upon an acute change in condition and seeks to improve the capacity of nursing facilities to identify and treat higher acuity patients with multiple co-morbidities as effectively as possible in place, rather than through admission to an acute care facility. Eligible facilities are required to institute new programs through which residents normally transported to hospital will be cared for in the nursing facility through the use of more intensive nursing home units.

The targeted population receiving restorative care unit services are participating in the restorative care program, post hospital admission and have an overall goal of discharging to the community.

Rate payments will be provided, semi-annually, to eligible residential health care facilities which meet the criteria of providing intensive treatments to nursing home residents in the facility and thereby avoid hospitalization. The rate adjustment is intended to:

TN   #16-0051   Approval Date   September 14, 2017
Supersedes TN   #15-0047   Effective Date   December 1, 2016
New York
110(d)(29.2)

- Enhance quality of care
- Provide immediate intensive care in a nursing home setting
- Improve the cost effectiveness through the avoidance of hospital admission

Eligible residential health care providers, the amount of the semi-annual payment, and the duration of each rate adjustment period shall be listed in the table which follows. The total adjustment amount for each period shown below will be paid semi-annually during each period in equal installments. The temporary payment made under this section will be an add-on to services payments made under this Attachment to such facilities during the six months

To remain eligible, providers must submit benchmarks and goals acceptable to the Commissioner and must submit periodic reports, as requested by the Commissioner, concerning the achievement of such benchmarks and goals. Failure to achieve satisfactory progress in accomplishing such benchmarks and goals may result in termination of the provider's temporary rate adjustment prior to the end of the specified timeframe. Once a provider's payment period adjustment ends, the provider will be reimbursed in accordance with the otherwise applicable rate-setting methodology.

Additional payments have been approved for the following providers in the amounts and for the effective periods listed.

Approval Date September 14, 2017
Effective Date December 1, 2016
Provider Assessments.

For purposes of determining rates of payment for residential health care facilities beginning July 1, 1992 for beneficiaries eligible for medical assistance under Title XIX of the federal Social Security Act, a state assessment of 1.2% of residential health care facility gross revenues received during the period April 1, 1992 through March 31, 1994, and as may be extended by statute, shall be a reimbursable cost to be included in calculating rates of payment. The state assessment of 1.2% of RHCF gross revenues shall be in effect from April 1, 1992 through March 31, 1994, and as may be extended by statute, an additional state assessment of 3.8% of facility gross revenues shall be a reimbursable cost to be included in calculating rates of payment.

Effective for the period April 1, 1996 through April 30, 1996, the further additional assessment will be reduced from 3.8% to 1.9% of each facility’s cash receipts from all patient care services and other operating income, for a total state assessment of 3.1% of facility gross revenues which shall be a reimbursable cost to be included in calculating rates of payment. Effective on or after May 1, 1996, rates of payment will be adjusted to allow costs associated with a total state assessment of 5.4% of facility gross revenues which shall be a reimbursable cost to be included in calculating rates of payment.

The reimbursable operating costs of facilities for purposes of calculating the reimbursement rates will be increased prospectively, beginning July 1, 1992, to reflect an estimate of the provider cost for the assessment for the period. As soon as practicable after the assessment period, an adjustment will be made to RHCF rates based on a reconciliation of actual assessment payments to estimated payments. ¹

¹The extent to which a facility is reimbursed for the additional cost of the assessment is dependent upon Medicaid volume of services.

TN #96-24 Approval Date June 6, 2001
Supersedes TN #95-24B Effective Date April 1, 1996
Effective January 1, 1997, the rates of payment will be adjusted to allow costs associated with a total State assessment of 5% of facility gross revenues which will be a reimbursable cost to be included in calculating rates of payment. Effective March 1, 1997, the reimbursable assessment will be 3.1%. Effective April 1, 1997, the total reimbursable state assessment to be included in calculating rates of payment will be 4.8%. Effective April 1, 1999 through December 31, 1999, the total reimbursable state assessment of 2.4% of gross revenues as paid by facilities will be included in calculating rates of payment. Effective April 1, 2002 through March 31, 2003, April 1, 2003 through March 31, 2005, April 1, 2005 through March 31, 2013, April 1, 2013 through March 31, 2015, April 1, 2015 through March 31, 2017 [and] April 1, 2017 through March 31, 2019, and April 1, 2019 through March 31, 2020 and thereafter the total reimbursable state assessment on each residential health care facility’s gross receipts received from all patient care services and other operating income on a cash basis for hospital or health-related services, including adult day service, but excluding, effective October 1, 2002, gross receipts attributable to payments received pursuant to Title XVIII of the federal Social Security Act (Medicare), will be 6%, 5%, and 6% thereafter, respectively.

The reimbursable operating costs of facilities for purposes of calculating the reimbursement rates will be increased prospectively, beginning July 1, 1992, to reflect an estimate of the provider cost for the assessment for the period, provided, however, that effective October 1, 2002 the adjustment to rates of payment made pursuant to this paragraph [shall] will be calculated on a per diem basis and based on total reported patient days of care minus reported days attributable to Title XVIII of the federal social security act (Medicare) units of service. As soon as practicable after the assessment period, an adjustment will be made to RHCF rates of payments applicable within the assessment period, based on a reconciliation of actual assessment payments to estimated payments. The reimbursable portion of the provider's cost for the assessment will only be Medicaid's share of the assessment; which is determined by the appropriate assessment percentage multiplied by Medicaid revenues.

**TN #91-4**  
Approval Date: **July 2, 1993**  
Supersedes TN #87-7  
Effective Date: **January 1, 1991**
GENERAL CONCEPTS

1. USING THESE INSTRUCTIONS: These instructions and the training manual should be read before completing the PRI. These instructions should be kept with the PRIs as they are being completed. FREQUENT REFERENCE TO THE INSTRUCTIONS WILL BE NEEDED TO COMPLETE THE PRI ACCURATELY.

2. ANSWER ALL QUESTIONS: Answer all questions using the numeric codes provided. DO NOT LEAVE ANY QUESTIONS TOTALLY BLANK. UNUSED BOXES FOR A QUESTION SHOULD REMAIN BLANK. For example, Medical Record Number should be entered: / /9 /6 /2 /1 /0 /. If there are unused boxes, they should be on the left side of the number as shown in the example.

3. QUALIFIERS: Many of the PRI questions contain multiple criteria which are labeled qualifiers. All qualifiers must be met for a question to be answered yes. These qualifiers take the following forms:

   ° TIME PERIOD - The time period for the questions is the past four weeks, unless stated otherwise. For patients who have been in the facility less than four weeks (that is, new admissions or readmissions), use the time from admission to PRI completion as the time frame.

   ° FREQUENCY - The frequency specifies how often something needs to occur to meet the qualifier. For example, respiratory care needs to occur daily for four weeks or the PRI cannot be checked for this patient as receiving this care.

   ° DOCUMENTATION - Some of the questions require specific medical record documentation to be present. Otherwise, the question cannot be answered “yes” for the patient.

   ° EXCLUSIONS - Some of the questions specifically state to omit certain types of care or behavior when answering the question. For example, inhalators are excluded from respiratory care.

4. ACTIVITIES OF DAILY LIVING: The approach to measuring ADLs is slightly different from the other PRI questions. Measure the ADLs according to how the activity was completed 60% or more of the time during the past four weeks. Read the specific instructions for ADLs to understand the CHANGED CONDITION RULE and other details. PERFORMANCE: Measure what the patient does, rather than what the patient might be capable of doing.

5. CORRECTIONS: Cross out any responses which you wish to change and re-enter clearly to the right of the original response. Example: /3/ 4.

6. Use pen, not pencil.
INSTRUCTIONS: PRI QUESTIONS

I. ADMINISTRATIVE DATA

1. OPERATING CERTIFICATE NUMBER: Enter the 8 character identifier (7 numbers followed by the letter “N”) stated on the facility’s operating certificate. The last character “N” indicates Nursing Facility.

2. SOCIAL SECURITY NUMBER: Your PRIs can not be processed unless this question is accurately entered. Do not leave this question blank, do not enter zero if there is no social security number. Only use the Social Security number that has been specifically designated for the patient and not the spouse of the patient. Only use the number that has been assigned by the federal Social Security Administration. If there is no such number for a patient, a NEW SYSTEM has been developed to enable all facilities in the State to assign a unique ID number to those patients without a Social Security number. If a patient was assigned a computer generated number by the Department, that number should no longer be used. If the patient has no Social Security number, use this method: Enter the first three (3) letters of the patient’s last name (starting to the far left), and then enter the six digits of the patient’s date of birth. Omit the century in the birth date, which will either be a “19” or “18” as in 1930 or 1896. As an example, if a patient named Cheryl Brant has no social security number and was born on May 18, 1913, you would enter: /B/R/A/0/5/0/8/1/3 on the PRI.

3. RESIDENT IS LOCATED: Former HRF Area of Former SNF Area. This question has been revised to reflect the Omnibus Budget Reconciliation Act of 1987 (OBRA ’87). It is imperative that nursing facilities formerly deemed “dual level” complete this section properly.

4. PATIENT NAME: Enter the patient’s name, last name first, in the boxes provided. Enter up to the first 10 letters of the patient’s last name.

6. MEDICAL RECORD NUMBER: Enter the unique number assigned by the facility to identify each patient. It is not the Medicaid, Medicare or Social Security number unless that is the number used by the facility to identify each of its patients.

7. ROOM NUMBER: Enter the numbers and/or letters which identify the patient’s room in the facility.

8. UNIT NUMBER: Enter the one or the two digit number (01-12) assigned by your facility to each nursing unit for the purpose of this data collection.

11. DATE OF INITIAL ADMISSION: Enter the month, day and year the patient (1) entered the present nursing facility. Use the date of the patient’s first admission and not the most recent. If the patient were transferred from another facility, it would be an initial admission to your facility. As another example, consider a patient that was admitted to a hospital from your facility and subsequently loses bed hold. If this patient is eventually readmitted to your facility at the original level of care, use the original admission date to complete this item.

12. MEDICAID NUMBER: Enter these numbers if patient has the coverage available, whether

</tbody>
</table>
New York
PRI-3

13. **MEDICARE NUMBER:** or not the coverage is being used. If not, enter only one zero in far right box.

14. **PRIMARY PAYOR:** Enter the one source of coverage which pays for most of the patient’s current nursing home stay. Code “Other” only if the primary payor is not Medicaid or Medicare. (Do not code “Other” for a patient with Medicaid coverage supplemented by Medicare Part B Code Medicaid.) Medicaid pending is to be coded as “Medicaid”, if there is no other primary coverage being used for the patients present stay.

15A. **REASON FOR PRI COMPLETION:** Select the one reason why the PRI is being completed. Responses 3, 4, and 5 under Utilization Review have been eliminated.

**REIMBURSEMENT ASSESSMENT CYCLE:**

Indicate whether this assessment is being completed as a part of a full facility assessment or as part of a quality assessment cycle for new admissions only.

1. **Biannual Full Facility Cycle** - The data collection during which all the patients residing in the facility are assessed. These PRI assessments include patients who were assessed during your previous PRI data collection and any new admissions.

2. **Quarterly New Admission Cycle** - The “new admission only data collection,” involving only patients who were not assessed at their present level of care during your previous full facility data collection are reviewed. This specific PRI data collection occurs three months after your full facility PRI data collection. A new admission may be a new patient from the hospital, community or another nursing facility; or was hospitalized during your previous full facility assessment (regardless of bedhold).

15B. **WAS A PRI SUBMITTED BY YOUR FACILITY FOR THIS PATIENT DURING A PREVIOUS FULL FACILITY AND/ OR NEW ADMIT CYCLE:** Review your facility’s records to determine whether a PRI for reimbursement purposes was ever completed for this patient.

II. **MEDICAL EVENTS**

16. **DECUBITUS LEVEL:** Enter the level of skin breakdown (located at pressure points) using the qualifiers stated below:

   **Documentation** - For a patient to be cited as level 4, documentation by a licensed clinician must exist which describes the following three components:

   - A description of the patient’s decubitus
   - Circumstance or medical condition which led to the decubitus.
   - An active treatment plan.

PRI-4

Definition LEVELS:

#0 No reddened skin or breakdown
#1 Reddened skin, potential breakdown.
#2 Blushed skin, dusty colored, superficial layer of broken or blistered skin.
#3 Subcutaneous skin is broken down.
#4 Necrotic breakdown of skin and subcutaneous tissue which may involve muscle, fascia and bone.
#5 Patient is a level 4, but the documentation qualifier has not been met.

17. MEDICAL CONDITIONS: For a “YES” to be answered for any of these conditions, all of the following qualifiers must be met:

Time Period - Condition must have existed during the past four weeks. (The only exception is to use the past twelve weeks for question 17H, urinary tract infection.

Documentation - Written support exists that the patient has the condition.

Definitions - See chart below. (Examples are for clarification and are not intended to be all-inclusive.)

<td></td>
<td></td>
</tr>
</tbody>
</table>

To qualify as “YES” on the PRI the following qualifiers must be met:

1. The contracture must be documented by a physician, physical therapist or occupational therapist.

2. The status of the contracture must be reevaluated and documented by the physician, physical therapist or occupational therapist on an annual basis.

There does not need need to be an active treatment plan to enter “YES” to contractures.

**17G. DIABETES MELLITUS:**
A metabolic disorder in which the ability to oxidize carbohydrates is compromised due to inadequate pancreatic activity resulting in disturbance of normal insulin production. This may or may not be the primary problem (Q. 29) or primary diagnosis. It should be diagnosed by a physician. Include any degree of diabetes, stable or unstable, and any manner it is controlled.

**17H. URINARY TRACT INFECTION:** During the past twelve weeks symptoms of a UTI have been exhibited or it has been diagnosed by lab tests. Symptoms may include frequent voiding, foul smelling urine, voiding small amounts cloudy urine, sediment and an elevated temperature. May or may not be the primary problem under Q. 29. Include as a UTI if it has not been confirmed yet by lab tests, but the symptoms are present. Include patients who appear asymptomatic, but whose lab values are positive (e.g., mentally confused or incontinent patients).

Destruction/malfunction of the pancreas
Exclude hypoglycemia or hyperglycemia which may be a diabetic condition, but by itself does not constitute diabetes mellitus
Exclude if symptoms are present, but the lab values are negative

| **17I. HIV INFECTION**  
**SYMPTOMATIC:** HIV (Human Immunodeficiency Virus)  
Infection, Symptomatic: Includes Acquired Immunodeficiency Syndrome (AIDS) and HIV related illnesses. The patient has been tested for HIV infection AND a positive finding is documented AND the patient has had symptoms, documented by a physician, nurse practitioner (in conformance with a written practice agreement with a physician), or physician assistant as related to the HIV infection. Symptoms include but are not limited to abnormal weight loss, respiratory abnormalities, anemia, persistent fever, fatigue and diarrhea. Symptoms need not have occurred in the past four weeks.  
Exclude patients who have tested positive for HIV infection and have not become symptomatic, and patients who have not received the results of the HIV test. | | |

| **17J. ACCIDENT:**  
An event resulting in serious bodily harm, such as a fracture, a laceration which requires closure, a second or third degree burn or an injury requiring admission to a hospital.  
To qualify as “YES” on the PRI the following qualifier must be met:  
1. During the past six months serious bodily harm occurred as the result of one or more accidents. | | |

**TN #99-34**

**Approval Date**: December 30, 1999

**Supersedes TN #91-25**

**Effective Date**: July 1, 1999
17K. VENTILATOR DEPENDENT: A patient who has been admitted to a skilled nursing facility on a ventilator or has been ventilator dependent within five (5) days prior to admission to the skilled nursing facility. Patients who are in the process of being weaned off of ventilator support will qualify for this category for one month after extubation if they are receiving active respiratory rehabilitation services during that period. Patients in the facility who decompensate and require intubation also qualify for this category.

All services shall be provided in accordance with Sections 416.13, 711.5 and 713.21 of Chapter V of Title 10 of the Official Compilation of Codes Rules and Regulations of the State of New York.

18. MEDICAL TREATMENTS: For a “YES” to be answered for any of these, the following qualifiers must be met:

**Time Period** - Treatment must have been given during the past four weeks in conformance with the frequency requirements cited below and is still be required. For medical treatments having a daily frequency requirement, treatment must be provided every day of the four week period, except for residents newly admitted during the period. For residents newly admitted during the four week period, treatments required daily must have been provided each day from admission to the end of the four week period and documentation must support the seriousness of the condition and the probability that treatment will continue for at least four weeks.

**Frequency** - As specified in the chart below. (The only exception is to use the past twelve weeks for question 18L, catheter.)

**Documentation** - Physician order, nurse practitioner order (in conformance with a written practice agreement with a physician), or appropriately cosigned physician assistant order specifies that treatment should be given and includes frequency as cited below, where appropriate.

**Exclusions** - See chart on next page.

### 18K. BOWEL AND/OR BLADDER REHABILITATION:
The goal of this treatment to gain or regain optimal bowel and/or bladder function and to re-establish a pattern. It is much more than just a toileting schedule or a maintenance/conditioning program. Rather it is an intense treatment which is very specific and unique for each patient and is of short term duration (i.e., usually not longer than six weeks). NOT all patients at level 5 under Toileting Q.22 may be a “YES” with this question. The specific definition for bladder rehabilitation differs from bowel rehabilitation; refer below:

<table>

---

**TN #99-34**  
**Approval Date** December 30, 1999  
**Supersedes TN #91-25**  
**Effective Date** July 1, 1999
### Bladder rehabilitation:
Will generally include these step-by-step procedures which are closely monitored, evaluated and documented: (1) mental and physical assessment of the patient to determine training capacity; (2) a 24 hour flow sheet or chart documenting voiding progress; (3) possibly increased fluid intake during the daytime; (4) careful attention to skin care; (5) prevention of constipation; (6) in the beginning may be toileted 8 to 12 times per day with decreased frequency with progress.

### Bowl rehabilitation:
A program to prevent chronic constipation/impaction. The plan will generally include: (1) assessment of past bowel movements, relevant medical problems, medication use; (2) a dietary regimen of increased fluids and bulk (e.g., bran, fruits); (3) regular toileting for purposes of bowel evacuation; (4) use of glycerine suppositories or laxatives; (5) documentation on a worksheet or Kardex.

### 18L CATHETER:
During the past twelve weeks, an indwelling or external catheter has been needed. Indwelling catheter has been used for any duration during the past twelve weeks. The external catheter was used on a continuous basis (with proper removal and replacement during this period) for one or more days during the past twelve weeks. A physician order is required for an indwelling catheter; for an external catheter a physician order is not required.

</tbody>
</table>
**DEFINITION**

18M. PHYSICAL RESTRAINTS: A physical device used to restrict resident movement. Physical restraints include belts, vests, cuffs, mitts, jackets, harnesses and geriatric chairs.

**SPECIFIC FREQUENCY**

At least two continuous daytime hours for at least 14 days during the past four weeks.

**EXCLUSIONS**

Exclude all of following:

- Medication use for the sole purpose of modifying residents behavior
- Application only at night
- Application for less than two continuous daytime hours for 14 days
- Devices which residents can release/remove such as, Velcro seatbelts on wheelchairs
- Residents who are bed bound
- Side rails, locked doors/gates, domes

To Qualify as “YES” on the PRI the following qualifiers must be met:

1. The restraint must have been applied for at least two continuous daytime hours for at least 14 days during the past four weeks. Daytime includes the time from when the resident gets up in the morning to when the resident goes to bed at night.

2. An assessment of need for the physical restraint must be written by an M.D. or R.N.

3. The comprehensive care plan based on the assessment must include a written physician's order and specific nursing interventions regarding use of the physical restraint.

**NEW ADMISSIONS:** If a patient is a new admission and will require the use of a physical restraint for at least two continuous daytime hours for at least 14 days as specified by the physician order, then enter “YES” on the PRI.
III. ACTIVITIES OF DAILY LIVING: EATING, MOBILITY, TRANSFER, TOILETING

Use the following qualifiers in answering each ADL question:

**Time Period** - Past four weeks.

**Frequency** - Assess how the patient completed each ADL 60% or more of the time performed (since ADL status may fluctuate during the day or over the past four weeks.)

**CHANGED CONDITION RULE:** When a patient’s ADL has improved or deteriorated during the past four weeks and this course is unlikely to change, measure the ADL according to its status during the past seven days.

**Definitions** -

**SUPERVISION** means verbal encouragement and observation, not physical hands-on care.

**ASSISTANCE** means physical hands-on care.

**INTERMITTENT** means that a staff person does not have to be present during the entire activity, nor does the help have to be on a one-to-one basis.

**CONSTANT** means one-to-one care that requires a staff person to be present during the entire activity. If the staff person is not present, the patient will not complete the activity.

Note how these terms are used together in the ADLs. For example there is intermittent supervision and intermittent assistance.

**CLARIFICATION OF ADL RESPONSES**

19. EATING:

#3 “Requires continual help...” means that the patient requires a staff person’s continual presence and help for reasons such as: patient tends to choke, has a swallowing problem, is learning to feed self, or is quite confused and forgets to eat.

#5 “Tube or parenteral feeding...” means that all food and drink is given by nursing staff through the means specified.

20. MOBILITY:

#3 “Walks with constant supervision and/or assistance...” may be required if the patient cannot
maintain balance, has a history of falls, has stress fracture potential, or is relearning to ambulate.

21. TRANSFER: Exclude transfers to bath or toilet.

#4 “Requires two people...“ may be required for reasons such as: the patient is obese, has contractures, has fractures (or stress fracture potential), has attached equipment that makes transfer difficult (for example, tubes). There must be a logical medical reason why the patient needs the help of two people to transfer.

#5 “Bedfast...“ may refer to a patient with acute dehydration, severe decubitus, or terminal illness.

22. TOILETING:

**Definition – INCONTINENT** - 60% or more of the time the patient loses control of his/her bladder or bowel functions, with or without equipment.

#1 “Continent....Requires no or intermittent supervision” and #2 “...and/or assistance” can refer to the continent patient or the incontinent patient who needs no/little help with his/her toileting equipment (for example, catheter).

#3 “Continent...Requires constant supervision/total assistance...” refers to a patient who may not be able to balance him/herself and transfer, has contractures, has fracture, is confused or is on a rehabilitation program. In addition this level refers to the patient who needs constant help with elimination/incontinence appliances (for example, colostomy, ileostomy).

#4 “Incontinent...Does not use a bathroom” refers to a patient who does not go to a toilet room, but instead may use a bedpan or continence pads. This patient may be bed bound or mentally confused to the extent that a scheduled toileting program is not beneficial.

#5 “Incontinent...Taken to a Bathroom...“ refers to a patient who is on a formal toileting schedule, as documented in the medical record. This patient may be on a formal bowel and bladder rehabilitation program to regain or maintain control, or the toileting pattern is known and it is better psychologically and physically for the patient to be taken to the toilet (for example, to prevent decubiti).

A patient may have different levels of toileting capacity for bowel and bladder function. To determine the level of such a patient, note that level four and five refer to incontinence of either bladder or bowel. Thus if a patient receives the type of care described in one of these levels for either type of incontinence, enter that level.

**Example 1:**

A Patient needs constant assistance with a catheter (level 3) and is incontinent of bowel and is taken to the bathroom every four hours (level 5). In this instance, enter level 5 on the PRI because he is receiving the type of care described in this question for bowel incontinence.
Example 2:

The patient requires intermittent supervision for bowel function (level 2) and is taken to the toilet every two hours as part of a bladder rehabilitation program. Enter level 5, as the patient is receiving this type of care for bladder incontinence.

IV. BEHAVIORS - VERBAL DISRUPTION; PHYSICAL AGGRESSION; DISRUPTIVE, INFANTILE/SOCIALLY INAPPROPRIATE BEHAVIOR; AND HALLUCINATIONS

The following qualifiers must be met:

**Time Period** - Past four weeks.

**Frequency** - As stated in the responses to each behavioral question.

**Documentation** - To qualify a patient as LEVEL 4 or to qualify the patient as a “YES” to HALLUCINATIONS, the following conditions must be met:

- Active treatment plan for the behavioral problem must be in current use.

- Psychiatric assessment by a recognized professional with psychiatric training/education must exist to support the fact that the patient has a severe behavioral problem. The problem addressed by this assessment must still be exhibited by the patient.
Definitions - The terms used on the PRI should be interpreted only as they are defined below:

- **PATIENT’S BEHAVIOR:** Measure it as displayed with the behavior modification and treatment plan in effect during the past four weeks.

- **DISRUPTION:** Through verbal outbursts and/or physical actions, the patient interferes with the staff and/or other patients. This interference causes the staff to stop or change what they are doing immediately to control the situation. Without this staff assistance, the disruption would persist or a problem would occur.

- **NONDISRUPTION:** Verbal outbursts and/or physical actions by the patient may be irritating, but do not create a need for immediate action by the staff.

- **UNPREDICTABLE BEHAVIOR:** The staff cannot predict when (that is, under what circumstances) the patient will exhibit the behavioral problem. There is no evident pattern.

- **PREDICTABLE BEHAVIOR:** Based on observations and experiences with the patient, the staff can discern when a patient will exhibit a behavioral problem and can plan appropriate responses in advance. The behavioral problem may occur during activities of daily living (for example, bathing), specific treatments (for example, contracture care, ambulation exercises), or when criticized, bumped into, etc.

CLARIFICATION OF RESPONSES TO BEHAVIORAL QUESTIONS

23. **VERBAL DISRUPTION:** Exclude verbal outbursts/expressions/utterances which do not create disruption as defined by the PRI.

24. **PHYSICAL AGGRESSION:** Note that the definition states “with intent for injury.”

25. **DISRUPTIVE, INFANTILE OR SOCIALLY INAPPROPRIATE BEHAVIOR:** Note that the definition states this behavior is physical and creates disruption. EXCLUDE the following behaviors:

- Verbal outbursts
- Social withdrawal
- Hoarding
- Paranoia

Decision tree:

<table>
<thead>

<td>July 1, 1999</td>
</tr>
</tbody>
</table>
26. **HALLUCINATIONS:** For a “YES” response, the hallucinations must occur at least once per week during the past four weeks, in addition to meeting the other qualifiers noted above for an active treatment plan and psychiatric assessment.

V. **SPECIALIZED SERVICES**

27. **PHYSICAL AND OCCUPATIONAL THERAPIES:**

- For each therapy these three types of information will be entered on the PRI; “Level,” “Days” and “Time” (hour and minutes).

- For a patient not receiving a therapy at all, the “Level” will always be entered in the answer key as #1 (“does not receive”), the “Days” will be entered 0 (zero) and the “Time” will be 0 (zero).

- Use the chart on the following page to understand the qualifiers for each of the three types of information that will be entered. Whether a patient is receiving maintenance or restorative therapy will make a difference in terms of the qualifiers to be used.

**SEE CHART THAT FOLLOWS FOR THE SPECIFIC QUALIFIERS.**
27. **LEVEL QUESTION**: **QUALIFIERS (see level 4 below)**

</table>

TN #99-34 Approval Date December 30, 1999
Supersedes TN #91-25 Effective Date July 1, 1999
SPECIALIZED PROFESSIONAL ON-SITE (ON-SITE MEANS WITHIN THE FACILITY)

| A certified (2 year) or licensed (4 year) specialized professional is on-site supervising or providing therapy. | A licensed (4 year) specialized professional is on-site supervising or providing care. (Do not include care provided by PT or OT aides). |

* QUALIFIERS NOT MET: DO NOT ENTER ON THE PRI ANY DAYS AND TIME OF THERAPY WHICH DO NOT MEET BOTH THE QUALIFIERS UNDER EACH LEVEL OF THERAPY.

28. NUMBER OF PHYSICIAN VISITS: Enter “0” (zero) unless the patient needs qualifiers stated below are met. If, and ONLY if, the patient meets all the patient need qualifiers, then enter the number of physician visits, nurse practitioner visits (in conformance with a written practice agreement with a physician), or a physician assistant visits that meet the physician, nurse practitioner, or physician assistant visit qualifiers.

- **PATIENT TYPE/NEED QUALIFIERS:** The patient has a medical condition that (1) is unstable and changing or (2) is stable, but there is a high risk of instability. If this patient is not closely monitored and treated by medical staff, an acute episode or severe deterioration can result. Documentation must support that the patient is of this type (for example, terminally ill, acute episode, recent hospitalization, post-operative).

- **PHYSICIAN, NURSE PRACTITIONER, OR PHYSICIAN ASSISTANT VISIT QUALIFIER:** If, and only if, the patient meets the PATIENT TYPE/NEED QUALIFIER, then enter the number of physician visits, nurse practitioner visits (in conformance with a written practice agreement with a physician), or physician assistant visits during the past four weeks that meet the following qualifications:
  - A visit qualifies only if there is physician, nurse practitioner, or physician assistant documentation that she/he has personally examined the patient to address the pertinent medical problem. The physician, nurse practitioner, or physician assistant must make a notation or documentation in the medical record as to the result of the visit for the unstable medical condition (e.g., change medications, renew treatment orders, nursing orders, order lab tests).
  - Do not include phone calls as a visit nor visits which could have been accomplished over the phone.
  - A visit qualifies whether it is on-site or off-site, as long as the patient is not an inpatient in a hospital/other facility.

29. MEDICATIONS

A. **Monthly average number for all medications ordered:** Enter the monthly average number of different medications for which physician orders were written over the course of the past six months. If the resident has been in the facility less than six months determine the monthly

| TN #99-34 | Approval Date December 30, 1999 |
| Supersedes TN #91-25 | Effective Date July 1, 1999 |
New York
PRI-21

average number of medications ordered based on the number of months since admission. The average should include the total number of ordered medications whether or not they were administered: (PRN medications; injectables, ointments, creams, ophthalmics, short-term antibiotic regimens and over-the-counter medications, etc.)

B. Monthly average number of psychoactive medications ordered: Enter the monthly average number of psychoactive medications for which physician orders were written over the course of the past six months. If the resident has been in the facility less than six months, determine the monthly average psychoactive medications ordered based on the number of months since admission. The average should include all ordered psychoactive medications whether or not they were actually administered.

A “psychoactive” medication is defined as a medication that is intended to affect mental and/or physical processes, namely to sedate, stimulate, or otherwise change mood, thinking or behavior.

The following are classes of psychoactive medications with several examples listed in each:

- Antidepressants - Amitriptyline (Elavil); Imipramine (Tofranil); Doxepin (Sinequan); Tranzylcypromine (Parnate); Phenelzine (Nardil)
- Anticholinergics - Benztropine (Cogentin); Trihexyphenidyl (Artane)
- Antihistamines - Diphenhydramine (Benadryl); Hydroxyzine (Atarax)
- Anxiolytics - Chlordiazepoxide (Librium); Diazepam (Valium)
- Cerebral Stimulants - Methylphenidate (Ritalin); Amphetamines (Benzedrine)
- Neuroleptics - Phenothiazines; Thiothixene (Navane); Haloperidol (Haldol); Chlorpromazine (Thorazine); Thioridazine (Mellaril)
- Somnifacients - Barbituates (Nembutal); Temazepam (Restoril); Glutethimide (Doriden); Flurazepam (Dalmane)

VI. DIAGNOSIS

30. PRIMARY MEDICAL PROBLEM: Follow the guideline stated below when answering this question.

- NURSING TIME: The primary medical problem should be selected based on the condition that has created the most need for nursing time during the past four weeks. A review of the medical record for nursing and physician, nurse practitioner, or physician assistant notes during the past four weeks may be necessary.

- JUDGMENT: This decision may require the assessor to use her/his own professional judgment in deciding upon the primary problem.
New York
PRI-22

- **ICD-9** Refer to the ICD-9 Codes for Common Diagnoses attached at the end of these instructions for easy access to the most frequently used numbers. An ICD-9 code book containing the complete ICD-9 listing should be available in the nursing and/or medical records office of a facility.

- **NO ICD-9 NUMBER:** Enter “0” (zero) in the far right box if no ICD-9 number can be found for the patient’s primary problem (or if the patient does not have a primary medical problem). If you cannot locate the ICD-9 code for the primary medical problem, PRINT THE NAME OF THE PRIMARY MEDICAL PROBLEM in the space provided on the PRI.

- **NOTE:** If the patient has AIDS or HIV related illnesses, indicate this in Section II, Medical Events, Item 17F. Do not use AIDS or HIV specific ICD codes (042044). Instead, use the code of the specific problem requiring the most caregiver time. For example, for all patients for whom viral pneumonia (NOS) is the condition requiring the most caregiver time, enter 480.9. Do not enter 042.1 for patients with HIV infection.

### 31. QUALIFIED ASSESSOR NUMBER:

The qualified assessor who is attesting to the accuracy of the assessment must sign the completed form and enter the assessor Identification Number which was assigned at an approved N.Y.S. Department of Health Training Program.

Since the PRI is completed and submitted for the purposes of a reimbursement assessment cycle, the certified assessor must have actually completed the patient assessment, utilizing medical records and/or observations or interviews of the patient. This should be indicated by checking the YES box.

### 38. RACE/ETHNIC GROUP:

The following definitions are to be utilized in determining race and ethnic groups.

1. **WHITE:** A person having origins in any of the original peoples of Europe, North Africa or the Middle East.
2. **WHITE/HISPANIC:** A person who meets the definition of both White and Hispanic (See Hispanic Below)
3. **BLACK:** A person having origins in any of the Black racial groups of Africa.
4. **BLACK/HISPANIC:** A person who meets the definition of both black and Hispanic (see below).
5. **ASIAN OR PACIFIC ISLANDER:** A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands. This includes, for example, China, Japan, Korea, the Philippine Islands and Samoa.
6. **ASIAN OR PACIFIC ISLAND/HISPANIC:** A person who meets the definition of both Asian or Pacific Islander and Hispanic (see below).

---

TN #99-34 Approval Date December 30, 1999
Supersedes TN NEW Effective Date July 1, 1999
7. **AMERICAN INDIAN or ALASKAN NATIVE:** A person having origins in any of the original peoples of North American and who maintains tribal affiliation or community recognition.

8. **AMERICAN INDIAN or ALASKAN NATIVE/HISPANIC:** A person who meets the definition of both American Indian or Alaskan Native and Hispanic (see below).

9. **OTHER:** Other groups not included in previous categories.

**HISPANIC:** A person of Puerto Rican, Mexican, Cuban, Dominican, Central or South American, or other Spanish Culture or origins.

   M. Physical Restraint (Daytime Only)

TN 91-25  Approval Date July 14, 1994
Supersedes TN 89-4  Effective Date April 1, 1991
III. ACTIVITIES OF DAILY LIVING (ADLs)

19 EATING: PROCESS OF GETTING FOOD BY ANY MEANS FROM THE RECEPTACLE INTO THE BODY (FOR EXAMPLE, PLATE, CUP, TUBE)

1 = Feeds self without supervision or physical assistance. May use adaptive equipment.

2 = Requires intermittent supervision (that is, verbal encouragement/guidance) and/or minimal physical assistance for minor parts of eating, such as cutting food, buttering bread or opening milk can.

3 = Requires continual help (encouragement/teaching/physical assistance) with eating or meal will not be completed.

4 = Totally fed by hand; patient does not manually participate.

5 = Tube or parenteral feeding for primary intake of food (Not just for supplemental nourishments)

20 MOBILITY: HOW THE PATIENT MOVES ABOUT

1 = Walks with no supervision or human assistance. May require mechanical device (for example, a walker), but not a wheelchair.

2 = Walks with intermittent supervision (that is, verbal cueing and observation). May require human assistance for difficult parts of walking (for example, stairs, ramps).

3 = Walks with constant one-to-one supervision and/or constant physical assistance.

4 = Wheels with no supervision or assistance, except for difficult maneuvers (for example, elevators, ramps). May actually be able to walk, but generally does not move.

5 = Is wheeled, chair-ras or bedfast. Relies on someone else to move about. If at all

21 TRANSFER: PROCESS OF MOVING BETWEEN POSITIONS TO/FROM BED, CHAIR, STANDING (EXCLUDE TRANSFERS TO/FROM BATH AND TOILET)

1 = Requires no supervision or physical assistance to complete necessary transfers. May use equipment, such as railings, trapeze.

2 = Requires intermittent supervision (that is, verbal cueing, guidance) and/or physical assistance for difficult maneuvers only.

3 = Requires one person to provide constant guidance, steadiness and/or physical assistance. Patient may participate in transfer.

4 = Requires two people to provide constant supervision and/or physically lift. May need lifting equipment.

5 = Cannot and is not gotten out of bed.

22 TOILETING: PROCESS OF GETTING TO AND FROM A TOILET (OR USE OF OTHER TOILETING EQUIPMENT SUCH AS BEDPAN). TRANSFERRING ON AND OFF TOILET, CLEANSING SELF AFTER ELIMINATION AND ADJUSTING CLOTHES

1 = Requires no supervision or physical assistance. May require special equipment, such as a raised toilet or grab bars.

2 = Requires intermittent supervision for safety or encouragement, or minor physical assistance (for example, clothes adjustment or washing hands).

3 = Continent of bowel and bladder. Requires constant supervision and/or physical assistance with major/all parts of the task, including appliances (i.e., colostomy, ileostomy, urinary catheter).

4 = Incontinent of bowel and/or bladder and is not taken to a bathroom.

5 = Incontinent of bowel and/or bladder, but is taken to a bathroom every two to four hours during the day and as needed at night.

IV. BEHAVIORS

23 VERBAL DISRUPTION: BY YELLING, BAITING, THREATENING, ETC

1 = None during the past four weeks. (May have verbal outbursts which are not disruptive.)

2 = Verbal disruption one to three times during the past four weeks.

3 = Short-lived disruption at least once per week during the past four weeks or predictable disruption regardless of frequency (for example, during specific care routines, such as bathing).

4 = Unpredictable, recurring verbal disruption at least once per week for no foretold reason.

5 = Patient is at level #4 above, but does not fulfill the active treatment and psychiatric assessment qualifiers (in the instructions).

24 PHYSICAL AGGRESSION: ASSAULTIVE OR COMBATIVE TO SELF OR OTHERS WITH INTENT FOR INJURY, DANGEROUS MANEUVERS WITH WHEELCHAIR.

1 = None during the past four weeks.

2 = Unpredictable aggression during the past four weeks (whether mild or extreme), but not at least once per week.

3 = Predictable aggression during specific care routines or as a reaction to normal stimuli (for example, bumped into), regardless of frequency. May strike or fight.

4 = Unpredictable, recurring aggression at least once per week during the past four weeks for no apparent or foretold reason (that is, not just during specific care routines or as a reaction to normal stimuli).

5 = Patient is at level #4 above, but does not fulfill the active treatment and psychiatric assessment qualifiers (in the instructions).

TN 91-25 Approval Date July 11, 1994
Supersedes TN 89-4 Effective Date April 1, 1991
25 DISRUPTIVE, INFANTILE OR SOCIALLY INAPPROPRIATE BEHAVIOR: CHILDISH, REPETITIVE OR ANTISOCIAL PHYSICAL BEHAVIOR WHICH CREATES DISRUPTION WITH OTHERS (FOR EXAMPLE, CONSTANTLY UNDRESSING SELF, STEALING, SMEARING FECES, SEXUALLY DISPLAYING ONESELF TO OTHERS). EXCLUDE VERBAL ACTIONS. READ THE INSTRUCTIONS FOR OTHER EXCLUSIONS.

1 = No infantile or socially inappropriate behavior, whether or not disruptive, during the past four weeks.
2 = Displays this behavior, but is not disruptive to others (for example, rocking in place).
3 = Disruptive behavior during the past four weeks but not at least once per week.
4 = Disruptive behavior at least once per week during the past four weeks.
5 = Patient is at level #4 above, but does not fulfill the active treatment and psychiatric assessment qualifiers (in the instructions).

26 HALLUCINATIONS: EXPERIENCED AT LEAST ONCE PER WEEK DURING THE PAST FOUR WEEKS. VISUAL, AUDITORY OR TACTILE PERCEPTIONS THAT HAVE NO BASIS IN EXTERNAL REALITY.

1 = Yes
2 = No
3 = Yes, but does not fulfill the active treatment and psychiatric assessment qualifiers (in the instructions).

V. SPECIALIZED SERVICES

27 PHYSICAL AND OCCUPATIONAL THERAPIES: READ INSTRUCTIONS AND QUALIFIERS. EXCLUDE REHABILITATIVE NURSES AND OTHER SPECIALIZED THERAPISTS (FOR EXAMPLE, SPEECH THERAPIST). ENTER THE LEVEL, DAYS AND TIME (HOURS AND MINUTES) PER WEEK.

A. Physical Therapy (P.T.)

B. Occupational Therapy (O.T.)

LEVEL

1 = Does not receive.
2 = Maintenance Program - Requires and is currently receiving physical and/or occupational therapy to help stabilize or slow functional deterioration.
3 = Restorative Therapy - Requires and is currently receiving physical and/or occupational therapy for four or more consecutive weeks.
4 = Receives therapy, but does not fulfill the qualifiers stated in the instructions. (For example, restorative therapy given or to be given for only two weeks.)

DAYS AND TIME PER WEEK: ENTER THE CURRENT NUMBER OF DAYS AND TIME (HOURS AND MINUTES) PER WEEK THAT EACH THERAPY IS PROVIDED. ENTER ZERO IF AT #1 LEVEL ABOVE. READ INSTRUCTIONS AS TO QUALIFIERS IN COUNTING DAYS AND TIME.

28 NUMBER OF PHYSICIAN VISITS: ENTER ONLY THE NUMBER OF VISITS DURING THE PAST FOUR WEEKS THAT ADHERE TO THE PATIENT NEED AND DOCUMENTATION QUALIFIERS IN THE INSTRUCTIONS. EXCLUDE VISITS BY PSYCHIATRISTS.

29 MEDICATIONS

A. Monthly average number of medications ordered.
B. Monthly average number of psychoactive medications ordered.

DIAGNOSIS

30 PRIMARY PROBLEM: THE MEDICAL CONDITION (ICD-9 CODE) REQUIRING THE LARGEST AMOUNT OF NURSING TIME. THIS MAY NOT BE THE ADMISSION DIAGNOSIS BY THE PHYSICIAN.

ICD-9 Code of medical problem...

If code cannot be located, print medical name here.

Date:__________

Supersedes TN:__________

Approval Date: July 11, 1994

Effective Date: April 1, 1991
Specialized programs for residents requiring behavioral interventions.

(a) General.

(1) Specialized programs for residents requiring behavioral interventions (“the program”) shall mean a discrete unit with a planned combination of services with staffing, equipment and physical facilities designed to serve individuals whose severe behavior cannot be managed in a less restrictive setting. The program shall provide goal-directed, comprehensive and interdisciplinary services directed at attaining or maintaining the individual at the highest practicable level of physical, affective, behavioral and cognitive functioning.

(2) The program shall serve residents who are a danger to self or others and who display violent or aggressive behaviors which are typically exhibited as physical or verbal aggression such as clear threats of violence. This behavior may be unpredictable, recurrent for no apparent reason, and typically exhibited as assaultive, combative, disruptive or socially inappropriate behavior such as sexual molestation or fire setting.

(3) The program shall be located in a nursing unit which is specifically designated for this purpose and physically separate from other facility residents. The unit shall be designed in accordance with the provisions as set forth in Subpart 713-2 of this Title.

(4) The facility shall have a written agreement with an inpatient psychiatric facility licensed under the Mental Hygiene Law to provide for inpatient admissions and consultative services as needed.

(5) In addition to the implementation of the quality assessment and assurance plan for this program as required by section 415.27 of this Part, the facility shall participate with the commissioner or his or her designee in a review of the program and resident outcomes. The factors to be reviewed shall include but not be limited to a review of admissions, the care and services provided, continued stays, and discharge planning. The facility shall furnish records, reports and data in a format as requested by the commissioner or his or her designee and shall make available for participation in the review, as necessary, members of the interdisciplinary resident care team.

(b) Admission.

\[\text{TN \ #94-04 \ Approval Date \ September 8, 1998} \]
\[\text{Supersedes TN \ NEW \ Effective Date \ January 1, 1994 \ March 16, 1994}\]
New York

2

(1) The facility shall develop written admission criteria which are applied to each prospective resident. As a minimum, for residents admitted to the program, there shall be documented evidence in the resident’s medical record that:

(i) the resident’s behavior is dangerous to him or herself or to others;

(ii) the resident’s behavior has been assessed according to severity and intensity;

(iii) within 30 days prior to the date of application to the program, the resident has displayed:

(a) verbal aggression which constitutes a clear threat of violence towards others or self; or

(b) physical aggression which is assaultive or combative and causes or is likely to cause harm to others or self; or

(c) persistently regressive or socially inappropriate behavior which causes actual harm.

(iv) various alternative interventions have been tried and found to be unsuccessful;

(v) the resident cannot be managed in a less restrictive setting; and

(vi) the prospective resident has the ability to benefit from such a program.

(2) Prior to admission, the facility shall fully inform the resident and the resident’s designated representative both orally and in writing about the program plan and the policies and procedures governing resident care in this unit. Such policies and procedures shall at a minimum include a statement that the resident’s right to leave or be discharged from the program shall be consistent with the rights of other residents in the facility.

(c) Assessment and Care Planning.

(1) The interdisciplinary team shall have determined preliminary approaches and interventions to the severe behavior and recorded them in the resident care plan prior to admission to the unit.

(2) Each resident’s care plan shall include care and services which are therapeutically beneficial for the resident and selected by the resident.
when able and as appropriate. The care plan shall be prepared by the interdisciplinary team, as described in section 415.11 of this Part, which shall include psychiatrist, psychologist, or social worker participation as appropriate to the needs of the resident.

(3) Based on the resident’s response to therapeutic interventions, the care plan including the discharge plan shall be reviewed and modified, as needed, but at least once a month.

(d) Discharge.

(1) A proposed discharge plan shall be developed within 30 days of admission for each resident as part of the overall care plan and shall include input from all professionals caring for the resident, the resident and his or her family, as appropriate, and any outside agency or resource that will be involved with the resident following discharge.

(2) When the interdisciplinary team determines that discharge of a resident to another facility or community-based program is appropriate, a discharge plan shall be implemented which is designed to assist and support the resident, family and caregiver in the transition to the new setting. Program staff shall be available post-discharge to act as a continuing resource for the resident, family or caregiver.

(3) The resident shall be discharged to a less restrictive setting when he or she no longer meets the admission criteria for this program as stated in subdivision (b) of this section.

(4) A resident discharged to an acute care facility shall be accompanied by a member of the program’s direct care staff during transfer. He or she shall be given priority readmission status to the program as his or her condition may warrant.

(5) There shall be a written transfer agreement with any nursing home of origin which allows for priority readmission to such transferring facility when a resident is capable of a safe discharge.

(e) Resident services and staffing requirements.

(1) The program shall consist of a variety of medical, behavioral, counseling, recreational, exercise, and other services to help the resident control or redirect his or her behavior through interventions carried out in a therapeutic environment provided on-site.

(2) There shall be dedicated staffing in sufficient numbers to provide for the direct services in the unit and to allow for small group activities and for one-on-one care.
New York

4

(3) The unit shall be managed by a program coordinator who is a licensed or certified health care professional with previous formal education, training and experience in the administration of a program concerned with the care and management of individuals with severe behavioral problems. The program coordinator shall be responsible for the operation and oversight of the program. Other responsibilities of the program coordinator shall include:

(i) the planning for and coordination of direct care and services;

(ii) developing and implementing inservice and continuing education programs, in collaboration with the interdisciplinary team, for all staff in contact with or working with these residents;

(iii) participation in the facility's decisions regarding resident care and services that affect the operation of the unit; and

(iv) ensuring the development and implementation of a program plan and policies and procedures specific to this program.

(4) A physician who has specialized training and experience in the care of individuals with severe behavioral or neuropsychiatric conditions shall be responsible for the medical direction and medical oversight of this program and shall assist with the development and evaluation of policies and procedures governing the provision of medical services in this unit.

(5) A qualified specialist in psychiatry who has clinical experience in behavioral medicine and experience working with individuals who are neurologically impaired shall be available on staff or a consulting basis to the residents and to the program.

(6) A clinical psychologist with at least one year of training in neuropsychology shall be available on staff or a consulting basis to the residents and to the program.

(7) A social worker with experience associated with severe behavioral conditions shall be available either on staff or a consulting basis to work with the residents, staff and family as needed.

(8) Other than the program coordinator, there shall be at least one registered professional nurse deployed on each shift in this unit who has training and experience in caring for individuals with severe behaviors.

(9) A full-time therapeutic recreation specialist shall be responsible
for the therapeutic recreation program.

(10) The facility shall ensure that all staff assigned to the direct care of the residents have pertinent experience or have received training in the care and management of individuals with severe behaviors.

(11) The facility shall ensure that educational programs are conducted for staff not providing direct care but who come in contact with these residents on a regular basis such as housekeeping and dietary aides. The programs shall familiarize staff with the program and the residents.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

State of New York

Methods and Standards for Establishing Payment Rates

Intermediate Care Facilities for the Mentally Retarded

TN #99-07 Approval Date June 6, 2001
Supersedes TN NEW Effective Date January 1, 1999 April 1, 1999 July 1, 1999
Rate setting and financial reporting for intermediate care facilities for persons with developmental disabilities (ICF/DD). This section is effective [January 1, 1999] January 1, 2003 for under thirty one bed non-state operated facilities classified as Region II and III facilities, [April 1, 1999] April 1, 2003 for all under thirty one bed State operated facilities, and [July 1, 1999] July 1, 2003 for under thirty one bed non-state operated facilities classified as Region I facilities.

(a) Definitions applicable to this section.

(1) Intermediate Care Facilities for the Developmentally Disabled.

For the purpose of this section: “Provider” shall mean the individual, corporation, partnership or other organization to which the OMRDD has issued an operating certificate, to operate a facility, or a State owned developmental center and to which the New York State Department of Health has issued a Medicaid provider agreement for such facility. For the purpose of this section: “Facility” shall mean

(i) (a) that program and site for which OMRDD has issued an operating certificate to operate as an intermediate care facility for the developmentally disabled or

(b) a development center which consists of institutional beds, including those beds in Small Resident Units operated by a Developmental Disabilities Services Office (DDSO), but excluding those beds in Small Residential Units operated by a DDSO whose developmental center has closed or is schedule to close, and

(ii) for which the New York State Department of Health has issued a Medicaid provider agreement.

(2) For the purposes of this section:

(i) A Region I facility is a facility which is located in Region I (other than a facility located in Region I which has been designated or elected to a Region II and III reporting cycle), or a facility which is located in Region II or II which has been designated or elected to a Region I reporting cycle in accordance with 14 NYCRR subpart 635-4.

(ii) A Region II or III facility is a facility which is located in Region II or III (other than a facility located in Region II or III which has been designated or elected to a Region I reporting cycle), or a facility which is located in Region I which has been designated or elected to a Region II or III reporting cycle in accordance with 14 NYCRR subpart 635-4.

(3) Region - The geographic regions are:

Region I (NYC) is New York City and includes the counties of New York, Bronx, Kings, Queens, and Richmond.

Region II (NYC Suburban) includes the counties of Putnam, Rockland, Nassau, Suffolk and Westchester.

Region III (Upstate New York) includes all other counties in New York State.

Newly certified facility is an under thirty-one bed facility which has been in operation for less than four full years as of the start of a rate cycle, or an over thirty bed facility which has been in operation for less than two full years as of the start of a rate cycle.

Operating costs are allowable costs which are non-capital in nature and which are allowable as specified in paragraph s (f)(1) and (2) of this section and subdivision (j) General Rules for Capital Costs and Costs of Related Party Transactions, and subdivision (k) Glossary. For purposes of this section, this includes day treatment, day service, transportation and regional FTE add-ons.

Capital Costs are allowable costs as specified in paragraph (f)(1) and (3) of this section and subdivision (j) General Rules for Capital Costs and Costs of Related Party Transactions, and subdivision (k) Glossary.

Reimbursable Costs are allowable costs, either operating or capital, adjusted per the application of this section, and prior to the application of the trend factor.

Total reimbursable costs are reimbursable costs trended, as appropriate, per the application of subdivision (g) of this section.

Reporting requirements. Each provider shall submit reports in accordance with the requirements of 14 NYCRR subpart 635-4.

Rate setting.

Units of service.

A unit of service is the unit of measure denoting lodging and services rendered to one consumer between the census-taking hours of the facility on two successive days; the day of admission but not the day of discharge shall be counted. One unit of service shall be counted if the consumer is discharged on the same day the consumer is admitted, providing there was an expectation that the admission would have at least a 24-hour duration.

Reserve bed days determined in accordance with 18 NYCRR section 505.9 and subdivision (i) of this section are units of service.
New York

3

(2) Rate cycle.

(i) For facilities of over thirty beds, the rate cycle is comprised of two twelve month rate periods.

(ii) For facilities of under thirty-one beds the rate cycle is comprised of [three twelve month rate periods except that the rate cycles beginning January 1, 1999, April 1, 1999 and July 1, 1999 shall consist of four twelve month rate periods] a base period and subsequent period or periods.

((iii) This rate cycle is divided into a base period and a subsequent period or periods.)

(a) The base period is the first twelve month period of the rate cycle.

(1) The base period for under thirty one bed non-state operated facilities is from January 1 to December 31 for Region II or III facilities. The first base period for non-state operated facilities begins January 1, 1988 for over thirty bed Region II or III facilities. The [first] base period for non-state operated under thirty one bed facilities begins January 1, 1999 for under thirty-one bed Region II or III facilities.

(2) The base period for under thirty one bed non-state operated facilities is from July 1 to June 30 for region I facilities. The first base period for non-state operated facilities begins July 1, 1988 for over thirty bed Region I facilities [, and July 1, 1999]. The base period for non-state operated facilities begins July 1, 2003 for under thirty-one bed Region I facilities.

(3) For state operated facilities of under 31 beds, regardless of region, the [first] base period shall be [April 1, 1999 to March 31, 2000] April 1, 2003 to March 31, 2004 and shall remain April 1 to March 31 for every rate cycle thereafter. For state operated facilities of more than 30 beds and developmental centers, regardless of region, the first base period shall be April 1, 1988 to March 31, 1989 and shall remain April 1 to March 31 for every rate cycle thereafter.

(b) The subsequent period for over thirty bed facilities is the second twelve month period of the rate cycle. The subsequent periods for under thirty-one bed facilities are the [second and third] subsequent twelve month periods of the rate cycle. [For the rate cycles beginning January 1, 1999, April 1, 1999 and July 1, 1999 there shall be additional]
subsequent period of January 1, 2002 to December 31, 2002; April 1, 2002 to March 31, 2003; and July 1, 2002 to June 30, 2003 for under 31 bed facilities.]

(1) The subsequent period for non-state operated facilities is from January 1 to December 31 for Region II or III facilities. The first subsequent period begins January 1, 1989 for non-state operated over thirty bed Region II or III facilities. The first subsequent period for non-state operated facilities begins January 1, 2000 January 1, 2004 for under thirty-one bed Region II or III facilities.

(2) The subsequent period for non-state operated facilities is from July 1 to June 30 for Region I facilities. The first subsequent period for non-state operated facilities begins July 1, 1989 for over thirty bed Region I facilities. The first subsequent period for non-state operated facilities begins July 1, 2000 July 1, 2004 for under thirty-one bed Region I facilities.

(3) For state operated facilities of less than 31 beds, regardless of region, the first subsequent period begins April 1, 2000 April 1, 2004 and shall remain April to March for every rate cycle thereafter. For developmental centers and state operated facilities over 30 beds, regardless of region, the first subsequent period shall be April 1, 1989 to March 31, 1990 and shall remain April 1 to March 31 for every rate cycle thereafter.

(3) Computation of Rates (General).

(i) All rates shall not be final unless approved by the Director of the Division of the Budget.

(ii) The commissioner may make adjustments to rates calculated in accordance with this section based upon the allowability of costs as determined by subdivision (f) of this section and subdivision (j) General Rules for Capital Costs and Costs of Related Party Transactions, and subdivision (k) Glossary. In addition, costs may be reallocated and adjusted following a desk audit of cost reports.
New York

4a

(a) The desk audit will examine the allocation of costs and OMRDD will reallocate unidentified and improperly classified costs, if any, to appropriate cost categories.

(b) The desk audit will examine base year costs against both the prior and subsequent years' costs. OMRDD will determine if costs are recurring, or are atypical and/or expended only in the base year.

(1) If OMRDD determines that base year costs for a facility are recurring, for the base periods beginning January 1, 2003, April 1, 2003 or July 1, 2003, the methodology described in this section will apply.

(2) If OMRDD determines that base year costs for a facility are atypical and/or were expended only in the base year, OMRDD will expand the desk audit. OMRDD may make adjustments to base year costs so that such costs represent typical and recurring costs.

(3) For a facility whose base year costs are subject to an expanded desk audit per subclause (b)(2) of this subparagraph, OMRDD shall continue the rate in effect on December 31, 2002, March 31, 2003 or June 30, 2003, and, if applicable, trended to 2003 or 2003-2004 dollars, until OMRDD completes the desk audit. For Region II and III facilities, OMRDD shall notify the provider by December 1, 2002 if the December 31, 2002 rate shall continue. For Region I facilities, OMRDD shall notify the provider by June 1, 2003 if the June 30, 2003 rate shall continue. For all State operated facilities, OMRDD shall notify the provider by March 1, 2003 if the March 31, 2003 rate shall continue. Upon OMRDD’s completion of the expanded desk audit, for the base periods beginning January 1, 2003, April 1, 2003 or July 1, 2003, the methodology described in this section will apply.
New York
4b

(c) **Administrative review of expanded desk audits shall be in accordance with subdivision 635-4.6(b) of 14 NYCRR**

[(iii)] (iii) The commissioner may also make adjustments based on errors which occurred in the computation of the rate, changes in certified capacity, changes in payment for real property which have the prior approval of the commissioner and the Director of the Division of the Budge, or changes based upon previously determined final audit findings. If a facility has undergone a change in certified capacity, the commissioner may:

(a) request the facility to submit a budget report subject to 14 NYCRR subpart 635-4; or

(b) request the facility to submit incremental/decremental cost data which is associated with the capacity change.

(c) Utilizing the submitted incremental/decremental data or budget report, OMRDD shall make the appropriate upward or downward adjustment in a facility's rate; or

(d) continue the then existing rate for the remainder of the subject rate period in those instances where the commissioner has determined that the facility is operating at a loss for the rate period in question and adjusting the current rate would further increase such loss, or the facility is operating at a surplus for the rate period in question and adjusting the rate would further increase such surplus.

[(iii)] (iv) Rate adjustments as described in subparagraph (ii) of this paragraph will be limited to those adjustments which will result in an annual increase or decrease in reimbursement of $1,000 or more.

[(iv)] (v) Notwithstanding any other provisions of this section, for over thirty bed facilities the reimbursable operating costs contained in the rates shall be computed as follows.

(a) For over thirty bed facilities other than developmental centers, OMRDD shall determine the total reimbursable operating costs (with the exception of education and related service costs, sheltered workshop services, and day training services) included in the payment rate in effect on December 31, March 31 or June 30 of the immediately preceding rate period applicable to that facility.

| TN #03-36 | Approval Date | March 11, 2004 |
| Supersedes TN | NEW | Effective Date | January 1, 2003 |
The dollars for sheltered workshop and day training services shall be revised based upon the number of individuals participating in the program. The reimbursable operating costs plus any revised sheltered work and day training costs will be increased by the trend factor calculated in subdivision (g) of this section and may be adjusted for appropriate appeals. Education and related services will be updated in accordance with clause (4)(ix)(c)(f) of this subdivision. To determine the capital cost portion of the subsequent period rate, OMRDD shall review the component relating to capital costs for substantial material changes and, if said changes conform to the requirements of paragraphs (f)(1) and (3) of this section and subdivision (j) General Rules for Capital Costs and Costs of Related Party Transactions, and subdivision (k) Glossary, make corresponding adjustments in computing the subsequent period rate.

(b) (i) For developmental centers, the statewide average rate for the period from April 1 to March 31 shall be calculated as follows. The total reimbursable operating costs contained in the payment rate in effect on the preceding March 31, with the exception of education and related service costs, after the adjustment for the latest available
projected number of client days, shall be increased by the trend factor described in subdivision (g) and increased by an amount for education and related services in accordance with clause 4(ix)(c)(f). In addition, if substantial, material changes that conform to the requirements of subdivision (h) are projected for the rate year these changes may be incorporated into the computation of the April 1 to March 31 period rate without an appeal being filed. OMRDD shall perform a rate year end volume variance adjustment to the April 1 to March 31 period rate for developmental centers by taking into account recalculated operating costs based upon a fixed to variable ratio of 64 percent fixed/36 percent variable, and actual client days.

(ii) In addition, to encourage the closure of developmental centers, the commissioner will allow the net variable costs associated with the planned reduction of the developmental centers to become part of the operating costs of remaining like facilities. Net variable costs are total variable costs less the sum of that portion of the variable costs that become part of the operating costs of new state operated programs and services and the projected personal service attrition savings, as determined using historical attrition trends over the preceding three years, that occur at the developmental centers. The commissioner will allow reimbursement of these net variable costs as part of a plan to close the developmental centers. This incentive plan would provide for the reimbursement in total of net variable costs in the developmental centers without adjustment or offsets.

(a) For each rate period, the net variable cost will be calculated based on the number of reduced beds planned for that rate period. 100 percent reimbursement of the net variable cost will be allowed for that rate period.

(b) Under this incentive plan eligible costs will be limited to personal service costs including fringe benefits and overhead and other than personal service costs excluding capital costs.

(c) To determine the capital cost portion of the rate, OMRDD shall review the component relating to capital costs for substantial material changes and if said changes conform to the requirements of paragraphs (f)(1) and (3) of this section and subdivision (j) General Rules for Capital Costs and Costs of Related Party Transactions, and subdivision (k) Glossary, make corresponding adjustments in computing the subsequent period rate.

TN #03-36 Approval Date March 11, 2004
Supersedes TN #00-47 Effective Date January 1, 2003
The computation of the rate resulting from the application of this paragraph can also be represented by the following formula:

(a) trended reimbursable operating costs + untrended reimbursable operating costs + reimbursable capital costs = total reimbursable costs.

(b) total reimbursable costs / units of service = the rate.

If OMRDD is unable to compute a rate for a newly certified facility, it may establish an interim rate which shall be the regional average for other facilities.

(a) OMRDD shall replace the interim rate retroactively to the starting date of such interim rate by a rate developed from the initial budget report submitted by the facility.

(b) The rate developed from the initial budget report shall be subject to all the requirements of this section, and shall be effective for the remainder of the then current rate period.

Since July 1, 1996, providers have been responsible for any necessary transportation to and from physician, dentist, and other clinical services, and any other transportation appropriate to the consumer’s participation in community-based out of residence activities planned for or sponsored by the facility. Nothing herein shall be interpreted as precluding the accessing of separate Medicaid claiming for emergency/nonemergency ambulance services (as defined in 18 NYCRR 505.10) necessitated by the consumer’s medical condition.

To encourage the closure of developmental centers, the commissioner will consider proposals to allow the variable costs associated with the closed facility or facilities to become part of the operating expenses of new or existing state operated under 31 bed facilities. The commissioner will allow a reasonable incentive plan for the reimbursement of the increased costs in the state operated under 31 bed facilities if it is coupled with the closure of a developmental center. An incentive plan would provide for the reimbursement in total of increased costs in the state operated under 31 bed facilities without adjustment or offsets.

(i) 100 percent reimbursement of the increased cost for at least one full rate period, but less than two full rate periods.
(ii) 75 percent reimbursement of the increased cost for the second full rate period.

(iii) 50 percent reimbursement of the increased cost for the third full rate period.

(iv) 25 percent reimbursement of the increased cost for the fourth full rate period.

(b) Costs to be eligible for this incentive plan will include but not be limited to direct care, support and clinical personal service and fringe benefit amounts for employees whose most recent prior employment was at a closed or scheduled to close developmental center.

(i) In order to have the cost of former developmental center employees included in the incentive plan, the state operated facility applying for a rate adjustment must hire such employee within twelve months of the official closing date of the developmental center.

(ii) Salaries and fringe benefit amounts paid to eligible employees by the facility cannot exceed the average salary and fringe benefit amount paid to comparable employees currently on that facility’s payroll.

(c) Incentive plan applications from provider shall be made in writing to the commissioner.

(i) The application shall identify the employees, their job titles, salary levels, date hired and B/DDSO.

To accelerate the closure and to encourage a reduction in the size of developmental centers, the commissioner will consider proposals to allow the variable costs associated with a developmental center to become part of the operating expenses of new and existing state operated under 31 bed facilities. The variable costs associated with the developmental center will be allowed for the transition which is the period beginning on the date an official announcement to close a facility or facilities and ending on the date of actual closure. Also variable costs associated with the planned conversion of beds which is at least 10 percent change in the facility census will be allowed. The commissioner will allow a reasonable incentive for the reimbursement of the increased costs in the state operated under 31 bed facilities during the transition and/or conversion period. An incentive plan would provide for the reimbursement in total of increased costs in the state operated under 31 bed facilities without adjustments or offsets.
(a) The commissioner will allow the following reimbursement for approved proposals:

(i) 75 percent reimbursement of the increased costs incurred during the transitional closure period. On the effective date of closure, reimbursement of increased costs will be considered under subsection (c)(3)(viii).

(ii) 75 percent reimbursement of the increased costs incurred during the conversion period. The conversion period will be for at least one full rate period but less than two full rate periods. If during the conversion period, an official announcement of closure occurs, the reimbursement of increased costs may be considered under (c)(3)(ix)(a)(i).

(b) Costs to be eligible for this incentive plan will include but not be limited to direct care, support and clinical personal service and fringe benefit amounts for employees whose most recent prior employment was at a developmental center.

(i) In order to have the cost of former developmental center's employee included in the incentive plan, the facility applying for a rate adjustment must hire such employee during the transitional and conversion periods.

(ii) Salaries and fringe benefit amounts paid to eligible employees by the facility cannot exceed the average salary and fringe benefit amount paid to comparable employees currently on that facility's payroll.

(c) Incentive plan applications from the provider shall be filed in accordance with (c)(3)(viii)(c).

(4) Computation of the base period rate.

(i) For each facility the commissioner shall establish rates in accordance with the certified capacity as stated in a facility's provider agreement.

(ii) Base period rates for over thirty bed facilities and developmental centers shall be computed on the basis of a full 12-month cost report submitted by the provider for the 12-month period beginning 24 months prior to the effective date of the base period, and subject to the cost category screens described herein. For a newly certified over thirty bed facility, OMRDD
shall use budget data, as submitted pursuant to NYCRR subpart 635-4 or 681.12 (which ever is applicable).

(iii) The [initial] base period rate for under thirty-one bed Region II and III non-state operated facilities shall be computed on the basis of a full twelve month cost report submitted by the provider for the twelve month period beginning January 1, [1994] 1999 and adjusted in accordance with subparagraph (3)(ii) of this subdivision. The [initial] base period rate for under thirty-one bed Region I non-state operated facilities shall be computed on the basis of a full twelve month cost report submitted by the provider for the twelve month period beginning July 1, [1994] 1999 and adjusted in accordance with subparagraph (3)(ii) of this subdivision. For state operated facilities of under thirty-one beds, regardless of region, the initial base period shall be computed on the basis of a full twelve month cost report submitted by the provider for the twelve-month period beginning April 1, [1994] 1999 and adjusted in accordance with subparagraph (3)(ii) of this subdivision. Thereafter the base period rates for under thirty-one bed facilities shall be computed on the basis of a full twelve month cost report submitted by the provider for the twelve-month period beginning [36] 48 months prior to the effective date of the base period. [However, there shall be no base period rate for the rate periods beginning January 1, 2002, April 1, 2002 and July 1, 2002.] For a newly certified under thirty-one bed facility, OMRDD shall use the budget data submitted pursuant to NYCRR subpart 635-4 or 681.12 (which ever is applicable).

(iv) For a newly certified facility, the initial base period rate shall be determined pursuant to subparagraph (vii) of this paragraph. For under thirty-one bed facilities the units of service are determined by multiplying the certified capacity of the facility by 365 days. For over thirty bed facilities, units of service are the certified capacity of the facility multiplied by 365 days multiplied by 99 percent. A facility's submitted budget costs may be adjusted based on a comparison to the actual costs of other existing facilities operated by the provider in order to determine the costs of an efficient and economic operation. If the provider does not operate other facilities, the submitted budget costs may be adjusted based on a comparison to the average costs of other facilities in the same region.

(v) For facilities which are not newly certified facilities, the initial base period rate shall be determined pursuant to subparagraph (vii) of this paragraph. For under thirty-one bed facilities the units of service are determined by multiplying the certified capacity of the facility by 365 days. For over thirty bed facilities, units of service are the higher of the certified capacity of the facility multiplied by 365 days multiplied by 99 percent, or the actual reported units of service.

(vi) As appropriate, OMRDD shall apply trend factors to each facility's reimbursable operating costs, except for education and related services.
New York

11

(vii) The computation of the rate resulting from the application of this paragraph can also be represented by the following formula:

(a) trended reimbursable operating costs + untrended reimbursable operating costs + reimbursable capital costs = total reimbursable costs.

(b) total reimbursable costs / units of service = the rate.

(viii) For [under thirty-one bed] all facilities there shall be a day [treatment] program services add-on [such] so that facilities which have day [treatment] program services included in their [operating costs] rate shall be reimbursed [in their base period rate. For day treatment services, a facility shall be reimbursed at a varying funding level, for a maximum of 225 days per year. The facility will be reimbursed at the lower of either the actual costs per the cost report (or for budget costs for newly certified facilities) or the calculated per diem fee for day treatment services pursuant to 14 NYCRR section 690.7 of this Title in effect for the appropriate fee period.] as follows for these services. The add-on shall reflect service needs as well as the efficiency and economy of operation.

[(ix) For all facilities there shall be a day services add-on such that facilities which have the following day services included in their operating costs shall be reimbursed as follows for these services.]

(a) For sheltered workshop services, effective July 1, 1995, the facility will receive a reimbursable cost of $9,899 per annum for each program participant. For program participants to whom the conditions set forth in subparagraph [(x)](ix) of this paragraph apply, the facility will receive a reimbursable cost of $9,499 per annum for each program participant.

(b) For day training [services] programs effective July 1, 1995, the facility will receive a reimbursable cost of $11,033 per annum for each program participant. For program participants to whom the conditions set forth in subparagraph [(x)](ix) of this paragraph apply, the facility will receive a reimbursable cost of $10,633 per annum for each program participant.
(c) [Upon an agency’s application] If an agency applies to OMRDD prior to January 1, 2003 and for participants receiving services in day training facilities where the Developmental Disability Profile average score for the site exceeds 348 for the adaptive score and exceeds 10 for the health score, the amount of [reimbursement] the add-on shall be determined by a budget review. The amount of [reimbursement] the add-on received by the ICF/DD for such day training services shall reflect individual service needs as well as efficiency and economy of service provision. Effective January 1, 2003, for any facility to which this subclause applies the add-on will be equal to the reimbursement that was in the facility’s rate on December 21, 2002, and that was applicable to day training services described in this subclause.

(d) The costs of day program services delivered in a certified Day treatment facility (see Part 690 of 14 NYCRR) may not be included as an add-on to the ICF/DD rate.

(e) Effective January 1, 2003, a provider may request that a day services add-on be included in the facility’s rate. The day program services add-on for all day program services shall be either the day program services reimbursement included in the rate on December 31, 2002 and adjusted for actual service delivery; or the lower of:

1. the actual costs per the cost report, or
2. the budget costs
3. The costs in subclauses (1) and (2) of this clause are subject to a desk audit. Administrative review of these desk audits shall be in accordance with subdivision 635-6(h) if 14 NYCRR.

(f) Effective June 1, 1995, the facility will be reimbursed for education and related services in accordance with Title 8 NYCRR. These costs shall not be trended.

(ix) Effective July 1, 1997 an under thirty-one bed facility may submit to the commissioner a request for a transportation add-on for the transportation of
persons to and from an outpatient service certified pursuant to Article 28 of the Public Health Law for certain persons if:

(a) in order to meet a person’s active treatment needs the person’s Individual Program Plan requires a day service (comprising regular attendance at a sheltered workshop or a day training service) in combination with visits to the outpatient service described above, and

(b) prior to July 1, 1996, transportation to and from the outpatient service was not included in the rate for the operator of the outpatient service, and

(c) prior to July 1, 1996, the rate approved by the local social services district was billed separately by a transportation vendor for transportation to and from the outpatient service, and

(d) the vendor ceased billing for transportation of persons residing in the facility to and from the outpatient service.

The transportation add-on shall be a reimbursable cost added to a facility’s rate subject to the conditions set forth in subparagraph [(x)](ix) of this paragraph. The transportation add-on shall be calculated using payment/rate data based on local social service district approved Medicaid payment rates made to transportation vendors as of June 30, 1996. A weighted transportation average shall be calculated for each facility by dividing the aggregate transportation payments by the aggregate day service transportation round trips for all persons described in subparagraph [(x)](ix) of this paragraph.

(a) The weighted transportation average for each facility shall be ranked among all day treatment facilities state wide pursuant to the methodology for calculating the transportation component add-on for day treatment facilities described in NYCRR Part 690 subclauses 690.7(e)(3)(vii)(a)(1) through and including (a)(3).

(b) The modified weighted transportation average shall be multiplied by the total to and from day service transportation units of service to determine reimbursable transportation costs.

(5) Computation of the subsequent period rate.

(i) The reimbursable operating costs contained in the subsequent period rates shall be computed as follows. OMRDD shall determine the total
reimbursable operating costs (with the exception of education and related service costs, sheltered workshop services, day training services) included in the payment rate in effect on December 31, March 31, or June 30 of the immediately preceding rate period applicable to that facility. The dollars for sheltered workshop and day training services shall be revised based upon the number of individuals participating in the program. The reimbursable operating costs plus any revised sheltered work and day training costs will be increased by the trend factor described in subdivision (g) of this section and may be adjusted for appropriate appeals. Education and related services will be updated in accordance with clause (4)(ix)(c)(f) of this subdivision. OMRDD will determine the capital cost portion of the subsequent period rate by reviewing the component relating to capital costs for substantial material changes. If such changes conform to the requirements of paragraphs (f)(1) and (3) of this section and subdivision (j) General Rules for Capital Costs and Costs of Related Party Transactions, and subdivision (k) Glossary, OMRDD will make corresponding adjustments in computing the subsequent period rate.

(ii) The computation of the rate resulting from the application of this paragraph can also be represented by the following formula:

\[
\text{(a) trended reimbursable operating costs + untrended reimbursable operating costs + reimbursable capital costs = total reimbursable costs.}
\]

\[
\text{(b) total reimbursable costs / units of service = the rate.}
\]

(iii) For a newly certified facility which begins to provide services that fall within a subsequent period, the initial rate shall be calculated as though it were a base period rate.

(d) Cost category screens and reimbursement for under thirty-one bed facilities.

In order to determine the reimbursable operating costs to be included in the rate calculation, the following screens (i.e., the maximum amount that will be allowed for a specific item or group of items) will be used. The regional screens corresponding to the actual geographic location of the facility will be applied.

(1) Administration screens and reimbursement.

(i) Screens.

(a) Administrative screen values shall be equal to the sum of the total reimbursable administrative costs and the total reimbursable administrative fringe benefits, less the value of the efficiency adjustment, included in the rate effective on the last day of the

<table>

</tr>
</tbody>
</table>
immediately preceding rate period. This amount shall be detrended to the base period.

(b) For facilities, without a screen as determined in clause (a) of this subparagraph, operated by a provider which does operate other facilities, an agency administrative percentage based on the current reimbursement of those other facilities shall be applied.

(c) For facilities without a screen as determined in clauses (a) and (b) of this subparagraph, operated by a provider which operates other OMRDD certified residential programs, an agency administrative percentage based on the current reimbursement of the other OMRDD certified residential programs shall be applied.

(d) For facilities without a screen as determined in clauses (a) – (c) of this subparagraph, operated by a provider which does not operate any other OMRDD certified residential programs, a regional average administrative percentage based on the current reimbursement of facilities operated by other providers shall be applied.

(e) For facilities without a screen value as determined per clause (a) of this subparagraph, the administrative screen value shall be equal to the percentages derived from clause (b), (c), or (d) of this paragraph times the reimbursable operating costs other than administration. This value shall be detrended to the base year.

(ii) Reimbursable administration costs shall be the lesser of administrative base year costs/ budget costs, or the screen value as determined in subparagraph (i) of this paragraph.

(2) Direct care screens and reimbursement.

(i) Screen.

The direct care screen value shall be the direct care FTEs multiplied by the regional salary.

(a) Direct care FTEs shall be calculated utilizing the facility specific disability increment plus bed size increment. The term disability increment shall mean the process of developing facility specific direct care FTEs based upon aggregate consumer disability characteristics as described in 14 NYCRR subdivision 690.7(g) of this Title and reported on the Developmental Disabilities Profile (DDP). The disability increment methodology will only be calculated if at least 50 percent of the DDP scores are available. If less than 50 percent of the DDP scores are...
available, the direct care FTEs calculated shall be based upon bed size increment alone. The disability increment using the DDP scores is calculated as follows: 0.063 FTEs times the facility mean direct care score plus .008 FTEs times the facility mean behavior score plus 0.062 FTEs times the facility standard deviation direct care score minus 0.019 FTEs times the facility standard deviation behavior score. The direct score is computed for each consumer from the DDP adaptive and health/medical scores as follows: 7.962 plus 0.156 times the adaptive score plus 1.611 times the health/medical score. The bed size increments are as follows:

<tr>
<td>III</td>
<td>$40,414</td>
</tr>
</tbody>
</table>

Note: The above values are in base year dollars.
(ii) For newly certified facilities, that have a rate effective on the last day of the immediately preceding rate period, the [clinical screen will be equal to the clinical costs] reimbursable clinical costs will be the clinical FTEs approved and reimbursed in the rate effective on the last day of the immediately preceding rate period multiplied by the lesser of:

(a) the clinical average salary reimbursed in the rate on the last day of the immediately preceding rate period detrended to the base year; or

(b) the appropriate clinical regional salary listed in subparagraph (i) of this paragraph.

(iii) For newly certified facilities, that do not have a rate effective on the last day of the immediately preceding rate period, [the clinical screen will be based upon budgeted FTEs] OMRDD will consider budgeted FTEs and average salaries, reviewed and adjusted if necessary through a desk audit process [and multiplied by the base year average reimbursed clinical salary of the other facilities operated by the provider. If the provider does not operate any other facilities then a base year regional average reimbursed clinical salary will be utilized.] The reimbursable clinical costs shall be the desk-audited budgeted clinical FTEs multiplied by the lesser of:

(a) the desk audited budgeted clinical average salary, detrended to the base year; or

(b) the appropriate regional clinical salary listed in subparagraph (i) of this paragraph.
New York
18

(iv) For facilities which are not newly certified the reimbursable clinical costs shall be the base year clinical costs. For newly certified facilities the reimbursable costs shall be the lesser of the clinical budget year costs or the screen values established in subparagraph (ii) or (iii) of this paragraph. base year cost report clinical FTEs multiplied by the lesser of:

(a) the base year cost report clinical average salary; or

(b) The appropriate clinical regional clinical salary listed in subparagraph (i) of this paragraph.

(5) Fringe benefit screens and reimbursement.

(i) For every new rate cycle, OMRDD shall compute a facility-specific fringe benefit percentage. This percentage shall be determined by summing the direct care, clinical and support fringe benefit costs from the base year budget or cost report and dividing this sum by the sum of direct care, clinical and support personal service costs (exclusive of contracted personal service) from the base year budget or cost report.

(ii) For newly certified facilities, that have a rate effective on the last day of the immediately preceding rate period, the fringe benefit percentage screen shall equal the fringe benefit percentage contained in the rate effective on the last day of the immediately preceding rate period.

(iii) For newly certified facilities, that do not have a rate effective on the last day of the immediately preceding rate period, the fringe benefit percentage screen (as calculated in subparagraph (i) above) shall equal the average percentage reimbursed to existing facilities currently operated by the provider. If there are no existing facilities, then the fringe benefit percentage screen shall equal the average reimbursed fringe benefit percentage of any other programs operated by the provider. If the provider does not operate any other programs, then the fringe benefit percentage screen shall equal the regional average percentage reimbursed to other facilities.

(iv) Reimbursable fringe benefit costs shall be equal to the computed fringe benefit percent established in subparagraphs (i), (ii) or (iii) of this paragraph multiplied by the reimbursable direct care, clinical and support personal service dollars, exclusive of contracted personal service.

(6) Support OTPS (other than personal service) screens and reimbursement.

</tr>
</tbody>
</table>

Note: The above values are in base year dollars.

[(ii)(iii)] Reimbursable support OTPS costs shall be the lesser of the base year costs/ budget costs, or the screen values established in subparagraph (i) of this paragraph.

(7) Utility costs will not be included within the support OTPS screen. The reimbursable utility costs shall be the base year costs or budget costs.

[(8) OMRDD shall include in reimbursable costs a regional FTE add-on calculated by multiplying FTEs established per subparagraph (2)(i)(a) of this paragraph by the following dollar amounts:

Region One $624.00
Region Two $623.35
Region Three $556.87

Note: The above values are in base year dollars.]
(e) **Cost Category Screens and reimbursement for over thirty bed facilities.**

In order to determine the reimbursable operating costs to be included in the rate calculation, the following screens (i.e., the maximum amount that will be allowed for a specific item or group of items) will be used.

1. **Direct care, mid-level supervision, and clinical personal service cost category screens:**
   
   (i) For every new rate cycle, OMRDD shall develop values by applying a maximum statewide salary amount to a facility's applicable consumer specific staffing standards. Refer to paragraphs (5)-(8) of this subdivision.

   (ii) These standards shall reflect the severity of disabilities of the population residing at the facility as determined by the procedures outlined in paragraphs (5)-(7) of this subdivision; the number of beds in the facility; whether or not a facility provides on site day program services; and the persons the facility provides services to (i.e., adults, children or both).

   (iii) For any facility which elected to participate in the salary enhancement plan as evidenced by adoption of a resolution of its governing body, effective on the later of October 1, 1987, or the date of adoption of such resolution, the direct care/support reimbursement will be adjusted to reflect the obligation to pay salary levels established by adoption of the resolution referred to in this subclause. In absence of such an election, the standard shall be determined by the facility's actual salary amount based upon the budget or cost report used to establish the rate being adjusted or calculated.

2. **Administrative and support cost category screens:**
   
   (i) OMRDD shall develop values for every new rate cycle by application of a statewide maximum allowable cost.

   (ii) The personal service costs shall be determined by applying a maximum statewide salary amount to the allowable staffing level contained in this subdivision.

   (iii) For any facility which elected to participate in the salary enhancement plan as evidenced by adoption of a resolution of its governing body, effective on the later of October 1, 1987, or the date of adoption of such resolution, the direct care/support reimbursement will be adjusted to reflect the obligation to pay salary levels established by adoption of the resolution referred to in this subclause. In the absence of such an election, the standard shall be
determined by the facility’s actual salary amount based upon the budget or cost report used to establish the rate being adjusted or calculated.

(3) **Fringe benefit cost category screens:**

(i) For every new rate cycle, OMRDD shall compute a facility-specific fringe benefit percentage. This percentage shall be determined by computing the total fringe benefit cost from the base year budget or cost report and dividing this total by the total personal service cost (exclusive of contracted personal service) from the base year budget or cost report. For every rate cycle after April 1, 1984, this percentage shall be the lower of the previous rate cycle’s cost-based fringe benefit percentage plus one percent or a new percentage computed in accordance with the immediately preceding sentence. If a facility’s previous rate is based upon a budget, it is not subject to the aforementioned one-percent fringe benefit limitation.

(ii) To determine the fringe benefit component of the rate, the facility-specific fringe benefit percentage shall be multiplied by the total reimbursable personal service dollars exclusive of contracted personal services.

(iii) For newly certified facilities, the fringe benefit percentage allowed shall not exceed the average allowed for existing facilities (regardless of size) currently operated by the provider. If there are no existing facilities, then the fringe benefit percentage allowed shall not exceed the fringe benefit percentage of any other programs operated by the provider. If the provider does not operate any other programs, then the fringe benefit percentage allowed shall not exceed the regional average for other facilities.

(iv) Any increase in the fringe benefit percentage due to Federal or State laws, rules or regulations shall not be subject to the percent increase limitation described in subparagraph (i) of this paragraph.

(v) If a newly certified facility whose base period rate was determined from total reimbursable budget costs, submits a cost report for the subsequent period in accordance with 14 NYCRR subpart 635-4 [of this Title], a new fringe benefit percentage shall be computed by dividing these costs by the total personal service costs (exclusive of contracted services) as submitted in the new cost report. This percentage shall be subject to the limitations of subparagraphs (i) and (ii) of this paragraph.

(4) **Other than Personal Service (OTPS) and Overhead shall be combined into one cost category screen.**

</table>
(i) The Other than Personal Service cost category screen will be based on a per bed amount effective at the beginning of each new rate cycle (see paragraph (8) of this subdivision.)

(ii) The Overhead cost category screen will be a percentage of reimbursable personal service and fringe benefits (see paragraph (8) of this subdivision). This screen will be compared to reported cost or budget costs (agency administration, personal service, OTPS, fringe benefits and capital costs) to determine reimbursable costs.

(iii) Costs associated with transportation to and from physician, dentist and other clinical services shall be included in the Other than Personal Service screen and subject to the limitations contained therein.
(5) **Over thirty bed facility staffing standards, algorithm and screens.** FTE factors to determine staff allocations for consumers with differing day programs, who reside in over thirty bed facilities.

**TN #99-07** Approval Date **June 6, 2001**

Supersedes TN #88-12 Effective Date **January 1, 1999 April 1, 1999 July 1, 1999**
For the purposes of developing an economy of scale, the following FTE offsets shall be applied against the clinical ratios listed in paragraph (5) of this subdivision:

(i) For children, bed sizes 32-59, a straight deduction of 0.00182 will be computed per 1-bed increase from the 0.4878 at 31 beds.

(ii) For children, bed sizes 61-99, a straight deduction of 0.00119 will be computed per 1-bed increase from the 0.4350 at 60 beds.

(iii) For adults, bed sizes 32-59, a straight deduction of 0.00136 will be computed per 1-bed increase from 0.4046 at 31 beds.

(iv) For adults, bed sizes 61-99, a straight deduction of 0.00034 will be computed per 1-bed increase from 0.3651 at 60 beds.

An assessment of consumer level of disability for the purposes of designating direct care staffing levels, as listed in paragraph (5) of this subdivision, shall be completed utilizing the following criteria.

<table>

Supersedes TN #87-12 Effective Date January 1, 1999 April 1, 1999 July 1, 1999
(vi) April 1 to March 31 the cost center screens shall be:

(a) Salaries

Administration and Support $21,560
Direct Care and Mid-level Supervision 20,643
Clinical 34,495

(b) Other Cost Center Screens

Cost Area

OTPS/Bed $9,121
Overhead 6.34%
Administration and Support FTE .6288 FTE/Bed
(f) **Allowable costs.**

To be considered allowable, costs must be properly chargeable to necessary consumer care rendered in accordance with the requirements of this Part.

(1) **Allowable costs (general).**

(i) Except where specific rules concerning allowability of costs are stated herein, or in subdivision (j) General Rules for Capital Costs and Costs of Related Party Transactions, or subdivision (k) Glossary, the Medicare Provider Reimbursement Manual, commonly referred to as HIM-15, shall be used to determine the allowability of costs. HIM-15 is published by the U.S. Department of Health and Human Services' Health Care Financing Administration (HCFA) and is available from:

Health Care Financing Administration  
Division of Publications Management-SSL-12-15  
7500 Security Boulevard  
Baltimore, MD 21244-1850

It may be reviewed in person during regular business hours at the NYS Department of State, 41 State Street, Albany, NY 12207; or, by appointment, at the NYS Office of Mental Retardation and Developmental Disabilities, Division of Revenue Management, 44 Holland Avenue, Albany, NY 12229-0001.

(ii) Where [specific] rules stated herein, in subdivision (j) General Rules for Capital Costs and Costs of related Party Transactions, subdivision (k) Glossary or in HIM-15, are silent concerning the allowability of costs, the commissioner shall determine allowability of costs based on reasonableness and relationship to consumer care and generally accepted accounting principles.

(iii) Expenses of portions of expenses reported by a facility that are not reasonably related to the efficient and economical provision of care in accordance with the requirements of this Part, because of either the nature or the amount of the item, shall not be allowed.

(iv) Costs which are not properly related to consumer care or treatment, and which principally afford diversion, entertainment or amusement to owners, operators or employees of the facility, shall not be allowed.

(v) The OMRDD shall reduce a facility's base year costs/budget costs by the costs of such services and activities that are not chargeable to the care of the consumers in accordance with this subdivision.

**TN #00-47 Approval Date August 3, 2001**  
**Supersedes TN #99-07 Effective Date October 1, 2000 January 1, 2001**
(a) In the event that the commissioner determines that it is not practical to establish the costs of such services and activities, the income derived therefrom shall be substituted as the basis for reductions of the facility’s reported or estimated costs.

(b) Examples of sources of such income include, but are not limited to:

1. supplies and drugs sold by the facility for use by nonresidents;
2. telephone and telegraph services for which a charge is made;
3. discount on purchases;
4. employees’ rental of living quarters;
5. cafeterias;
6. meals provided to staff or a consumer’s guests for which there is a charge;
7. operating parking facilities for community convenience; and
8. lease of office and other space by concessionaires providing services not related to intermediate care facility services.

(vi) Costs for any interest expense related to funding expenses in excess of an approved rate, or penalty imposed by governmental agencies or courts and the costs of insurance policies obtained solely to insure against such penalty, shall not be allowed. OMRDD will not pay interest on the final dollar settlement resulting from the retrospective impact of the rate appeals.

(vii) Costs of contributions or other payments to political parties, candidates or organizations shall not be allowed.

[(viii) Costs of related organizations, other than costs incurred pursuant to a lease, rent or purchase of real property, may be an allowable cost subject to the following:]
(a) A related organization means and entity of which the facility is in control or by which the facility is controlled including the organizations and persons listed in clauses (3)(iii)(e)-(f) of this subdivision, either directly or indirectly, or where an association of common interest exists in an entity which supplies goods and/or services to the facility.

(b) The costs of goods and/or services furnished to a facility, within the course of normal business operations, by a related organization, are allowable at the cost to the related organization, or the market price of comparable goods and/or services available in the facility’s region whichever is lower.

[(ix)](viii) Restricted funds are funds expended by the facility, which include grants, gifts, and income from endowments, whether cash or otherwise, which must be used only for a specific purpose as designated by the donor or grant instrument. Except as provided for in [clauses (3)(iv)(d) and (e)] subparagraphs (3)(iii) and (iv) of this subdivision, restricted funds are to be deducted from the designated costs when determining allowable costs. The commissioner may waive the provisions of this subparagraph at his discretion only in those instances where the provider makes a reasonable showing that the imposition of requirements of this subparagraph would cause undue financial harm to the existence of the facility.

[(x)](ix) Only that portion of the dues paid to any professional association which has been demonstrated to be attributable to expenditures other than for lobbying or political contributions shall be allowed.

[(xi)](x) A monetary value assigned to services provided by a religious order for services rendered to an owner and operator of a facility shall be considered allowable subject to review by the OMRDD for reasonableness.

[(xii)](xi) Funded depreciation.

(a) Applicability.

This subparagraph shall apply to all facilities except those governed by [clause (3)(iv)(d) or (e)] subparagraphs (3)(iii) or (iv) of this subdivision and those for which the provider is receiving or has a commitment to receive HUD funding. This section shall apply to facilities which were governed by [clause (3)(iv)(d) or (e)] subparagraphs (3)(iii) or (iv), but which are no longer governed by either such section because the provider has repaid the entire principal owed on the real property of the facility.

Aug 3, 2001

Approval Date August 3, 2001

Supersedes TN #99-07

Effective Date October 1, 2000 January 1, 2001
Effective April 1, 1986, for any rate period during which the reimbursement attributable to depreciation on a facility’s real property, excluding equipment, exceeds the provider’s principal repayment obligations on indebtedness attributable to such real property, such provider shall fund depreciation by depositing such differences in an interest-bearing checking account or other secure investment. If the provider operates more than one facility governed by this paragraph, the provider may maintain one funded depreciation account for two or more facilities. The provider shall not commingle such funded depreciation accounts with other monies of the provider. The provider shall not be required to fund depreciation attributable to the provider’s equity in such real property. The provider may expend the funds in such account, including accrued interest, to retire all or a portion of the indebtedness attributable to such real property, or for building improvements and/or fixed equipment necessary to the facility.

OMRDD will not reimburse interest expense incurred to meet funded depreciation, pursuant to this subparagraph and [clauses (3)(iv)(d) and (e)] subparagraphs (3)(iii) and (iv) of this subdivision.

(2) **Allowable costs (operating).**

(i) Interest on working capital indebtedness in accordance with standards listed in [subparagraph (3)(vii) of this] subdivision (j) General Rules for Capital-Costs and Costs of Related Party Transactions and subdivision (k) Glossary and subject to the limitations of paragraph (d)(1) or (e)(4) of this section will be considered allowable. In the event that a loan is not in accordance with the standards listed above, then the approval of the commissioner is required.

(ii) Effective April 16, 1992, costs incurred as a result of the provider of services assessment charged pursuant to section 43.04 of the Mental Hygiene Law in the amount of 2.4 percent of the 3 percent assessment charged on cash receipts shall be included in the rate.

(iii) Effective April 4, 1996, costs in excess of 0.6 percent incurred as a result of the provider of services assessment charged on cash receipts pursuant to section 43.04 of the Mental Hygiene Law shall be included in the rate. Effective April 1, 1999, costs in excess of 0.3 percent incurred as a result of the provider of services assessment charged on cash receipts pursuant to section 43.04 of the Mental Hygiene Law shall be included in the rate. Effective April 1, 2000, the assessment charged on cash receipts pursuant to section 43.04 of the Mental Hygiene Law shall be a reimbursable expense.
(iv) Allowable operating costs shall also include, but not be limited to, personal service, fringe benefits, OTPS, utility, administration costs, as well as day treatment, day services, and transportation costs, and regional FTE add-ons.

(v) Liability for compensated absences determined and accrued in accordance with generally accepted accounting principles for governments as promulgated by the Governmental Accounting Standards Board shall be considered an allowable cost.

(3) Allowable costs (capital).

(i) Start-up costs are those costs which are incurred from the period the provider receives approval pursuant to 14 NYCRR Part 620 for a facility to become an intermediate care facility to the date the first consumer is admitted. However, costs incurred during the period from the first admission to the effective date of the initial provider agreement shall not be considered as start-up costs.

(a) OMRDD may, at the discretion of the commissioner, reimburse a provider for all allowable start-up costs incurred in the preparation of the provider during that six-month period prior to the date of the first consumer admission. A provider may apply to the commissioner for an extension of the six-month reimbursable start-up period, provided that the provider can demonstrate why such an extension is necessary. However, under no circumstances shall a facility be allowed reimbursement of start-up costs for any period of time exceeding 18 months prior to the date of the first consumer admission.

(b) Allowable start-up costs may include, but not be limited to:

1. personal service expenses;
2. utility expenses;
3. taxes;
4. insurance expenses;
5. employee training expenses;
6. housekeeping expenses;
(7) repair and maintenance expenses; and

(8) administrative expenses.

(c) Any costs that are properly identifiable as organization costs, or capitalizable as construction costs, shall be classified as such and excluded from start-up costs.

(d) If a provider intends to prepare all portions of its entire facility at the same time, start-up costs for all portions of the facility shall be accumulated in a single deferred account and shall be amortized from the date of the first consumer admission. However, if a provider intends to prepare only portions of its facility (e.g., preparation of a floor or wing), start-up costs shall be capitalized and amortized separately. In either case, unless reimbursed as described in [subparagraph (iv) of this paragraph] paragraph (3) of subdivision (j) of the ICF/DD section of this Plan, start-up costs shall be amortized over a period not to exceed 60 months from the date of the first consumer admission.

(ii) Any cost of the sale, purchase, alteration, construction, rehabilitation and/or renovation of a physical plant or interest in real property manifested by cooperative shares shall be considered allowable up to the amount approved by the commissioner and the director of the Division of the Budget.

(g) (ii) For any transaction resulting in a change of ownership, the valuation of the assets shall be limited to the lesser of the allowable acquisition cost of the assets to the first owner of record who has received Medicaid payment for the assets in question on or after August 1, 1982, minus paid depreciation i.e., seller's net book value) or the acquisition cost of the asset to the new owner.

(b) Costs including legal fees, accounting and administrative costs, travel costs, and the costs of the feasibility studies (attributable to the negotiation or settlement of the sale or purchase of any capital asset by acquisition or merger) for which any payment has previously been made under Medicaid, shall not be allowable for reimbursement.

(iii) A facility's annual rental payments for real property and maintenance charges associated with cooperative shares may be considered an allowable cost subject to the following conditions:
New York
32

(a) The lease, or in the case of cooperative shares, the subscription agreement, is reviewed by and acceptable to OMRDD and any other State agency which must by law or regulation review and approve reimbursement rates.

(b) The lease agreement must be considered an “arm’s-length transaction” not involving an affiliate, controlling person, immediate family or principal stockholder. The “arms-length transaction” requirement may be waived by the commissioner upon application for those corporations holding title to the intermediate care facility’s physical plant, created pursuant to the Not-for-Profit Corporation Law with the approval of the commissioner.

(c) For the purposes of this section, affiliate means:

1. with respect to a partnership, each partner thereof;
2. with respect to a corporation, each officer, director, principal stockholder and controlling person thereof;
3. with respect to a natural person, each member of said person’s immediate family, or each partnership and each partner of such person, or each corporation in which said person or any affiliate of said person is an officer, director, principal stockholder or controlling person.

(d) For the purposes of this section, controlling person of any corporation, partnership or other entity means any person who by reason of a direct or indirect ownership interest (whether of record or beneficial) has the ability, acting either alone or in concert with others with ownership interest, to direct or exert a controlling influence on the direction of the management policies of said corporation, partnership or other entity. Neither the commissioner, nor any employee of the OMRDD, nor any member of a local legislative body of a county or municipality, nor any county or municipal official except when acting as the administrator of a facility, shall by reason of his or her official position be deemed a controlling person of any corporation, partnership or other entity; nor shall any person who serves as an officer, administrator or other employee of any corporation, partnership or other entity, or as a member of a board of directors or trustees of any corporation, be deemed to be a controlling person.

TN #00-47 Approval Date August 3, 2001
Supersedes TN #99-07 Effective Date October 1, 2000 January 1, 2001
person of such corporation, partnership or other entity solely as a result of such position or his or her official actions in such position.

(e) For the purposes of this section, immediate family means brother, sister, grandparent, grandchild, first cousin, aunt or uncle, spouse, parent or child of such person, whether such relationship arises by reason of birth, marriage or adoption.

(f) For the purposes of this section, principal stockholder of a corporation means any person who beneficially owns, holds or has the power to vote, 10 percent or more of any class of securities issued by said corporation.

(g) The rental amount is comparable to similar leases for properties with similar functions in the same geographic area.

(h) If the criteria in this paragraph are not met, reimbursement for lease costs will be the lower of lease costs or the amount determined in accordance with subparagraphs (iv) and (vii) of this paragraph.

(i) Existing leases shall be approved during the original term of the lease. However, lease options to renew shall not be exercised without review and approval of the parties listed in clause (a) of this subparagraph. Such review and decision shall occur more than 30 days before the last date the option may be exercised, the date of which the facility has notified OMRDD in accordance with clause (j) of this subparagraph.

(j) Effective January 1, 1983, requests for approval of lease renewals must be submitted whenever possible at least 120 days prior to the last date for the exercise of the lease renewal option.

(iv) Depreciation shall be an allowable cost when based upon factors of historical costs and useful life of buildings, fixed equipment and/or capital improvements or acquisition of an interest in real property manifested by cooperative shares. For the purpose of this section:

(a) Unless an exception is made by the commissioner, the useful life shall be the higher of the reported useful life or those from the Estimated Useful Lives of Depreciable Hospital Assets (1983 edition), published by the American Hospital Association, and
available by writing to the American Hospital Association, 840 Lake Shore Drive, Chicago, IL 60611. In certain instances, a useful life that is based upon historical experience as shown by documentary evidence and approved by OMRDD may be allowed.

(b) The depreciation method used shall be the straight-line method.

(c) In the event that the historical cost of the facility cannot be adequately determined by the commissioner, an appraisal value shall be the basis for depreciation. The appraisal of the historical cost of assets shall produce a value approximating the cost of reproducing substantially identical assets of like type, quality, and quantity at a price level and in a bona fide market as of the date of acquisition. Such appraisal shall be conducted by an appraiser approved by OMRDD and pursuant to a method approved by OMRDD.

(d) (iii) Notwithstanding subparagraph (f)(1)(ix)(viii) of this paragraph, in the case of any provider which has been notified by OMRDD on or after April 1, 1986 that there is a preliminary reservation of State aid funds for a capital grant pursuant to Mental Hygiene Law, section 41.18(c) or section 41.23, the basis for computing depreciation on the facility which is subject of the capital grant shall include the facility's depreciable project costs which were funded with such capital grant, provided that the provider is not receiving and has not repaid the entire principal owed on the real property of the facility. If the depreciable project costs are adjusted after audit, the basis for computing depreciation on the facility will be changed to such adjusted depreciable project costs. Upon full repayment of principal, the basis for depreciation for the facility will cease to include the amount of the capital grant. Any provider which receives such a capital grant shall enter into certain assurances with the OMRDD whereby the provider agrees that:

[(1)] (a) The difference between depreciation in the rate attributable to the facility's depreciable project costs (other than depreciation attributable to the provider's equity in the facility's real property at the time such property is put into use as a facility) and the principal
which is repaid shall be deposited in a secure investment approved by the commissioner.

(b) Withdrawals from such investment shall be made only for the purpose of repayment of indebtedness owed on the real property of the facility. With the commissioner's approval based on cost savings, a provider may use withdrawals from such investment for repayment of indebtedness owed on the real property of another facility which received a capital grant under this subparagraph or under subparagraph (ix) of this paragraph, or if there is no such other facility which is mortgaged, for the repayment of indebtedness owned on the real property of another facility which is mortgaged under the same mortgage as the facility.

(c) Each withdrawal must be approved by the commissioner.

(d) If the provider ceases to operate the facility as an intermediate care facility for the developmentally disabled, or as any facility certified by OMRDD, it will repay to OMRDD the balance on deposit in the secure investment at the time of such cessation, including interest earned on the investment.

(e) Depreciable project costs shall mean those acquisition and construction costs of a facility which have been approved, either before or after audit, by the New York State Office of the State Comptroller or by OMRDD or by OMRDD's designee. Such costs shall include the cost of land.

(f) HUD funding shall mean lower income housing assistance under section 8 of the United State Housing Act of 1937, as amended 42 U.S.C. section 1437(f) and/or a loan or loans pursuant to section 202 of the Housing Act of 1959, as amended 12 U.S.C. section 1701(q).

(iv) Notwithstanding subparagraph (f)(1)(viii) of this paragraph, any provider which has been notified by OMRDD before April 1, 1986 that there is a preliminary reservation of State aid funds for a capital grant pursuant to Mental Hygiene Law, section 41.18(c) or section 41.23, which is not receiving and has no commitment to receive HUD funding for the facility which is the subject of the capital grant, may apply to the commissioner to have the basis for computing depreciation on the facility include the facility’s depreciable project costs which were funded with the capital grant. Such application must be submitted to the commissioner on or before September 30, 1986 on the forms prescribed by the commissioner. Such application shall be granted at the discretion of the commissioner upon a showing that inclusion in the depreciation basis of the facility’s depreciable projects which were funded with the capital grant is necessary.

Attachment 4.19-D  
Part II ICF/DD

Approval Date  

January 1, 2003

Effective Date
to the financial viability of the facility and will not impede the facility’s efficient and economical operation. If the commissioner approves such application, the facility’s rate shall be revised retroactive to April 1, 1986 to include in the depreciation basis the facility’s depreciable project costs which were funded with the capital grant, and the provider shall enter into certain assurances described in subparagraph (iii) of this paragraph. Upon full repayment of principal, the basis for depreciation for the facility will cease to include the amount of the capital grant. If the depreciable project costs are adjusted after audit, the basis for computing depreciation on the facility will be changed to such adjusted depreciation project costs.

(v) Effective April 29, 2005, for non State operated facilities, costs incurred as a result of requests for criminal history record information under section 16.33 of the New York State Mental Hygiene Law and section 845-b of the New York State Executive Law shall be allowable costs and shall be considered part of the rate.

#00-47 April 29, 2005
Advance refunding costs incurred in connection with the refunding of bonds, and determined in accordance with generally accepted accounting principles, shall be an allowable cost.

(g) Trend factors.
(1) As appropriate, OMRDD shall apply trend factors to each facility's total reimbursable operating costs as determined by subdivision (c)-(f) and as submitted on the budget or cost reports required by section (a)(1)(i) and (ii) respectively. Except for educational and related services as defined at (3)(viii)(b)(3), such trend factors shall be applied to only reimbursable operating costs, with capital costs and start-up costs added to this result to compute the final rate.

(i) For all facilities, effective on the first day of the applicable fiscal cycle the trend factor utilized shall be that figure developed by the New York State Office of Mental Retardation and Developmental Disabilities.

(2) Effective January 1, 2006, for all facilities, in addition to the trend factor identified in subparagraph (1)(i), a variable adjustment within a range of zero percent to three percent [may] shall be applied to the rate. This variable adjustment shall be that figure developed by the New York State Office of Mental Retardation and Developmental Disabilities from a review of the provider’s application and historical expenditures for fringe benefits as a result of an initiative aimed at improving the recruitment and retention of the facility’s lower paid employees, e.g., health care.

November 21, 2006

TN #06-14 ___________ Approval Date November 21, 2006
Supersedes TN #00-47 ___________ Effective Date January 1, 2006
[(2)] (3) Where appropriate, the commissioner shall use some combination in whole or in part of the yearly components to project cost data into the appropriate rate period.

(h) Appeals to rates.

(1) The commissioner will consider only the following appeals for adjustment to the rates which would result in an annual increase of $1,000 or more in a facility’s allowable costs, and are:

(i) needed because of changes in the statistical information used to calculate a facility’s staffing or utilization standards; or

(ii) requests for relief from the standards contained in subdivision (d) or (e) of this section which were applied to costs used in calculating the base period and subsequent period rates.

(iii) Appeals for adjustments needed because of material errors in the information submitted by the facility which OMRDD used to establish the rate, or material errors in the rate computation.

(iv) Appeals for significant increases or decreases in a facility’s overall base period operating costs due to implementation of new programs, changes in staff or service, changes in the characteristics or number of individuals, changes in a lease agreement so as not to involve a related party, capital renovations, expansions or replacements which have been either mandated or approved by the commissioner and, except in life-threatening situations, approved in advance by the appropriate State agencies.

(2) Notification of first level appeal.

(i) In order to appeal to a rate in accordance with subparagraphs (1)(ii-iii) of this subdivision, the facility must send to OMRDD an appeal application by certified mail, return receipt requested, either within 90 days of the facility receiving the rate computation or within 90 days of the beginning of the rate period in question, whichever is later.
(ii) In order to appeal a rate in accordance with subparagraphs (1)(i and iv) of this subdivision, the facility must send to OMRDD, within one year of the close of the rate period in question, a first level appeal application by certified mail, return receipt requested.

(3) First level rate appeal applications shall be made in writing to the commissioner.

(i) The application shall set forth the basis for the first level appeal and the issues of fact. Appropriate documentation shall accompany the application and OMRDD may request such additional documentation as it deems necessary.

(ii) Actions on first level rate appeal applications will be processed without unjustifiable delay.

(4) The burden of proof on the first level appeal shall be on the facility to demonstrate that the rate requested in the appeal is necessary to ensure efficient and economical operation.

(5) A rate revised by OMRDD pursuant to an appeal shall not be considered final unless and until approved by the State Division of the Budget.

(6) At no point in the first level appeal process shall the facility have a right to an interim report of any determinations made by any of the parties to the appeal. At the conclusion of the first level appeal process OMRDD shall notify the facility of any proposed revised rate or denial of same by certified mail, return receipt requested. OMRDD shall inform the facility that the facility may either accept the proposed revised rate or request a second level appeal in accordance with 14 NYCRR section 602.9 [of this Title] in the event that the proposed revised rate fails to grant some or all of the relief requested.

(7) If OMRDD approves the revision to the rate and State Division of the Budget denies the revision, the facility shall have no further right to administrative review pursuant to this section.

(8) Any rate revised in accordance with this subdivision shall be effective according to the dates indicated in the rate appeal notification.

(9) Any additional reimbursement received by the facility, pursuant to a rate revised in accordance with this subdivision, shall be restricted to the specific purpose set forth in the appeal decision.

(10) Second level appeals to rates.

**Attachment 4.19-D**

**Part II ICF/DD**

**New York**

**41**

**August 3, 2001**

**TN #00-47 Approval Date**

**Supersedes TN #99-07 Effective Date**

**October 1, 2000 January 1, 2001**
(i) OMRDD’s denial of the first level appeal of any or all of the relief requested in the appeals provided for in paragraph (1) of this subdivision shall be final, unless the facility requests a second level appeal to the commissioner in writing within 30 days of service of notification of denial or proposed revised rate.

(ii) Second level appeals shall be brought and determined in accordance with the applicable provisions of 14 NYCRR Part 602.

(i) Reserve bed days for overnight absences for hospitalization or leaves of absence in facilities.

(1) Payment.

(i) Payment for overnight absences due to hospitalization shall be in accordance with 18 NYCRR section 505.9.

(ii) Payment for overnight absences due to leaves of absence shall be in accordance with 18 NYCRR section 505.9 and the following additional requirements.

(a) A leave of absence due to visits with relatives or friends, must not be medically or programmatically contraindicated.

(b) In the case of a leave of absence due to medically acceptable therapeutic leave or rehabilitative plans of care, the plan of care must be documented.

(c) Leaves of absence covered under the bed reservation program must be provided for in the consumer’s individual program plan as designated by the interdisciplinary team.

(d) Such planning should most appropriately take place during the development and monitoring process of the individual program plan during the quarterly and annual reviews. A consumer’s assigned bed cannot be reserved if another person is occupying that bed.

(2) Reporting.

(i) Each facility shall maintain an absence register for each consumer who is absent overnight.
(ii) The facility shall record the duration and purpose of each absence and make an annotation indicating whether or not the consumer’s bed was reserved.

(iii) Each month the facility shall complete a report summarizing all consumer absences and submit the report to OMRDD. The facility shall submit the report to the consumer’s sponsoring local social services district within ten working days following the end of the month. This report shall reflect the information contained in each consumer’s absence register.

(iv) The facility shall report reserve bed absences in the form and format as prescribed by the commissioner.

(j) **General Rules for Capital Costs and Costs of Related Party Transactions**

(1) **Determination of Whether Transaction is Between Related Parties**

(i) Where a transaction is not presumed to be between related parties under subparagraphs (ii) or (iv) below, OMRDD will determine whether the transaction is between related parties.

(a) Such determination shall be made on a case-by-case basis.

(b) Such determination shall be based on whether the facts and circumstances of the transaction, and the parties’ situation and history, indicate that the party from whom the provider or consumer obtained the real property, equipment, goods, services or property is a related party.

(c) If a transaction is between a provider or consumer and a party not presumed to be a related party (under subparagraphs (ii) or (iv) below), OMRDD never-the-less can determine that the transaction is between related parties (using the criteria in subparagraph (i)(b) above), where the party transacting with the provider or consumer directly or indirectly obtained the real property, equipment, goods, services or property in question from someone or an organization presumed to be related to the provider or consumer (under subparagraphs (ii) or (iv) below).

(ii) The existence of any of the conditions in clauses (a) through (f) below will create a presumption that the transaction is between a provider and a related party.

(a) The provider is a partnership and the other party to the transaction is a partner of the provider.
(b) The provider is a corporation and the other party to the transaction is an officer, director, trustee, principal stockholder or controlling party of the provider.

(c) The provider is a corporation and the other party to the transaction is a corporation, where someone is an officer, director, trustee, principal stockholder or controlling party of both corporations.

(d) The provider is a natural person and the other party to the transaction is either:

1. a member of the provider's immediate family;
2. a partnership in which the provider is a partner;
3. a co-partner of the provider;
4. a corporation in which the provider is an officer, director, trustee, principal stockholder or controlling party;
5. a corporation in which a member of the provider's immediate family is an officer, director, trustee, principal stockholder or controlling party;
6. a corporation in which any partnership in which the provider is a partner is a principal stockholder;
7. a corporation in which a co-partner of the provider is an officer, director, trustee, principal stockholder or controlling party, or
8. a corporation in which another corporation is a principal stockholder, where the provider is an officer, director, trustee, principal stockholder or a controlling party of such other corporation.

(e) The provider is an unincorporated association and the other party to the transaction is either:

1. someone who is a member of the provider;
2. someone, a member of whose immediate family is a member of the provider;
(3) a partnership in which one partner is a member of the provider;

(4) a corporation in which a member of the provider is an officer, director, trustee, principal stockholder or controlling party;

(5) a corporation in which a member of the provider has an immediate family member who is an officer, director, trustee, principal stockholder or controlling party;

(6) a corporation in which any partnership, in which a member of the provider is a partner, is a principal stockholder;

(7) a corporation in which a co-partner of a member of the provider is an officer, director, trustee, principal stockholder or controlling party, or

(8) a corporation in which another corporation is a principal stockholder, where a member of the provider is an officer, director, trustee, principal stockholder or a controlling party of such other corporation.

(f) The other party to the transaction is a special purpose organization.

(iii) A provider may overcome a presumption that the transaction is between related parties by clearly demonstrating that:

(a) The other party to the transaction in question is a bona fide separate organization;

(b) A substantial part of the other party's business activity of the type carried on with the provider is transacted with other organizations or those not related to the provider and the other party by common ownership or control and there is an open, competitive market for the type of real property, equipment, goods, services or property furnished by the other party;

(c) The real property, equipment, goods, services or properties are those which commonly are obtained by organizations such as the provider from other organizations and are not a basic element of care ordinarily furnished directly to consumers by such programs, and

Approval Date August 3, 2001
Effective Date October 1, 2000 January 1, 2001
(d) The charge to the provider is comparable to the charge for such real property, equipment, goods, services or property in the open market and no more than the charge made under comparable circumstances to others by the other party to the transaction for such real property, equipment, goods, services or property.

(iv) The existence of any of the conditions in clauses (a) through (e) below will create a presumption that the transaction is between a consumer and a related party.

(a) The other party to the transaction is a member of the consumer's immediate family.

(b) The other party to the transaction is a partnership in which the consumer or a member of the consumer's immediate family is a partner.

(c) The other party to the transaction is a corporation in which the consumer or a member of the consumer's immediate family is an officer, director, trustee, principal stockholder or controlling party.

(d) The other party to the transaction is a corporation in which:

(1) any partnership, in which the consumer or a member of the consumer's immediate family is a partner, is a principal stockholder, or

(2) another corporation is a principal stockholder, where the consumer or a member of the consumer's immediate family is an officer, director, trustee, principal stockholder or controlling party of such other corporation.

(e) The other party to the transaction is an unincorporated association which has as a member either:

(1) the consumer;

(2) a member of the consumer's immediate family;

(3) a partnership in which the consumer or a member of the consumer's immediate family is a partner;

(4) a corporation in which the consumer or a member of the consumer's immediate family is an officer, director, trustee.
(5) a corporation in which any partnership, in which the consumer or a member of the consumer’s immediate family is a partner, is a principal stockholder, or

(6) a corporation in which another corporation is a principal stockholder, where the consumer or a member of the consumer’s immediate family is an officer, director, trustee, principal stockholder or a controlling party of such other corporation.

(2) **Leases for Real Property**

(i) In order for lease costs to be considered for allowability, the provider or consumer must submit the lease to OMRDD for approval. In deciding whether to approve a lease, OMRDD shall consider whether the lease is in the best interests of the programs and the persons it serves and whether the lease in any way violates public policy. In deciding whether to approve an amount for rent, OMRDD shall consider whether the provider’s rate, fee or price, as a whole, including the amount of rent to be approved, would result in a payment which is consistent with efficiency and economy.

(ii) If an approved lease or approved proprietary lease is between the provider or consumer and a party which is not a related party, allowable lease costs shall be the lesser of contract rent or fair market rental.

(iii) If an approved lease or approved proprietary lease is between the provider or consumer and a related party, allowable lease costs shall be the least of:

(a) contract rent,

(b) fair market rental, or

(c) the landlord’s net cost (see subdivision (k), glossary)

(iv) The Commissioner may waive the limitations on allowable costs as state in subparagraph (iii) above upon a showing that such limitations would jeopardize the opening or continued operation of the program or services and that the negotiations for the lease or proprietary lease were conducted as though the parties were not related.

(v) The commissioner may, upon application from a provider, allow lease costs in an

**principal stockholder or controlling party:**

---

**TN #00-47 ______ Approval Date August 3, 2001**

**Supersedes TN NEW ______ Effective Date October 1, 2000 January 1, 2001**
amount equal to contract rent and greater than fair market rent if the following conditions are met. The commissioner will allow such lease costs only for as long as it is necessary for the provider to relocate the program or services located on the lease property.

(a) the lease is a renewal which is not pursuant to an option to renew;

(b) the lease is a renewal of a lease for an existing program or services, and

(c) the provider has shown that:

   (1) the provider has made diligent efforts to negotiate a lease renewal for fair market rent or less;

   (2) the provider has been unable to negotiate a lease renewal for less than the current rent;

   (3) the parties to the lease renewal are not related;

   (4) allowance of lease costs in the amount of contract rent is necessary to ensure the continued operation of the program of services.

(vi) From October 1, 2000 until January 1, 2001, allowable costs under leases between related parties in effect on September 1, 1984 shall be determined in accordance with the State Plan in effect on September 30, 2000. On and after January 1, 2001, allowable costs under leases between related parties in effect on September 1, 1984 shall be determined in accordance with subparagraph (iii) above.

(vii) Contract rent incurred pursuant to an approved lease or approved proprietary lease which is renewed pursuant to an option to renew is allowable.

(viii) Costs incurred pursuant to an approved lease or approved proprietary lease which is renewed other than pursuant to an option to renew shall be allowable as follows:

   (a) If the lease is between parties who are not related, allowable costs are determined in accordance with subparagraph (ii) above.

   (b) If the lease is between parties who are related, allowable costs are determined in accordance with subparagraph (iii) above.
OMRDD shall decide whether to approve any such renewal at least 30 days before the last day the lease may be renewed, if the provider or consumer has notified OMRDD in accordance with subclause (d) below.

Whenever possible, the provider or consumer shall submit to OMRDD a request for approval of lease renewals at least 120 days prior to the last date for renewing the lease.

(3) **Costs of Ownership of Real Property**

(i) Unless specifically otherwise provided for in this part of the Plan, costs of ownership of real property shall be allowable in the amount of depreciation, interest and costs attributable to the negotiation or settlement of sale or purchase of real property, or in the amount of costs related to loans from the Dormitory Authority of the State of New York.

(ii) Depreciation is based upon the historical cost and useful life of buildings, fixed equipment and/or capital improvements.

(iii) Historical cost shall be determined as follows:

(a) The historical cost of any real property which is transferred, purchased, altered, constructed, rehabilitated and/or renovated shall be equal to the amount approved by the OMRDD and the Division of the Budget. In deciding whether to approve any such cost, OMRDD shall consider whether the provider's reimbursement as a whole for the services in question, including the cost of purchase, transfer, construction, alteration, rehabilitation and/or renovation to be approved, would result in payment which is consistent with efficiency and economy. In no event shall OMRDD or the Division of Budget approve an historical cost which exceeds the lesser of fair market value or the provider's or consumer's actual cost.

(b) The historical cost of any real property which is transferred or purchased from a party related to the provider or consumer is the lesser of fair market value or the acquisition cost of the real property to the transferor or the seller.

(c) The historical cost of any real property which is altered, constructed, rehabilitated and/or renovated by a party related to the provider or consumer is the lesser of:

(1) the fair market value of such alteration, construction, rehabilitation or renovation, or

(2) the related party’s cost of the alteration, construction, rehabilitation
(iv) Where the previous owner of the real property had the costs of such property funded, in whole or in part, by the State of New York, the historical cost of the property shall be the least of:

(a) the acquisition cost of the property to the new owner;

(b) the seller's net book value (see subdivision (k), glossary), or

(c) fair market value.

(v) If the previous owner is related to the provider or consumer purchasing the property, any amount paid by the State to the provider or consumer for rent equal to depreciation on the property shall be counted as paid depreciation and as funding for the costs of such property.

(vi) If the seller or transferor of the real property to the provider or consumer is not a party related to the provider or consumer, but any prior owner of the property in question is a party related to the provider or consumer, and the sale or transfer from the prior related party occurs within five years of the sale or transfer to the provider or consumer, the transaction shall be deemed to be between the provider or consumer and the prior owner related to the provider or consumer.

(vii) If OMRDD cannot determine the historical cost of real property, OMRDD shall use an appraisal value as the basis for depreciation. The appraisal value shall be based upon an appraisal which is done by OMRDD or by an appraiser approved by OMRDD, which uses an appraisal methodology which is generally accepted within the profession and which is factually correct in all significant matters. OMRDD shall approve an appraiser if one of the following tests is met:

(a) the appraiser is a New York State certified or licensed appraiser, or

(b) no licensed or certified appraiser is available in the geographic area in which the property is located; the appraiser is recommended by another State agency and, in OMRDD's opinion, the appraiser has the professional experience and qualifications to do the appraisal in question.

(viii) The commissioner may allow an alternative historical cost of ownership of real property obtained from a related party.

(a) The commissioner may allow such alternative historical cost if
(1) the provider or consumer demonstrates that allowing such alternative historical cost would make property available to consumers or providers which would not otherwise be available;

(2) such alternative historical cost is substantially less than the cost which would be allowed under this subpart for property which is obtained from an unrelated party and which is of similar function and value to OMRDD and to the provider or consumer;

(3) the seller or transferor has owned the property in question for at least five years, and

(4) the fair market value of such property is greater than the seller's cost.

(b) Such alternative historical cost may be greater than the cost of the property to the transferor or seller, but shall not be greater than the lesser of:

(1) the acquisition cost of the property to the provider or consumer, or

(2) the cost of the property to the seller or transferor, increased by one-half of the percentage increase (as measured from the date of acquisition by the seller to the date of the change of ownership) in the Consumer Price Index for New York – Northeastern New Jersey (All items), as reported by the United States Department of Labor, Bureau of Labor Statistics.

(c) The commissioner may allow an alternative historical cost only for transfers, purchases, alteration, construction, renovation or rehabilitation, the terms of which were agreed to after October 1, 2000.

(ix) Useful Life and Amortization Period.

(a) The useful life of depreciable assets shall be the higher of the reported useful life or the useful life from the Estimated Useful Lives of Depreciable Hospital Assets (current edition).
New York
52

published by the American Hospital Association.

(b) A provider or consumer may use a different useful life or amortization period if such different useful life is approved by OMRDD. OMRDD shall base such approval upon historical experience, documentary evidence, loan agreements (if any) and need for the services for which depreciable assets are used.

(x) The provider or consumer shall use the straight-line method of depreciation.

(xi) Interest costs.

(a) Interest costs shall be allowable if the following criteria are met:

(1) The interest rate is not in excess of the amount a prudent borrower would pay at the time the loan was incurred.

(2) The loan agreement is entered into between the provider or consumer and a party not related to the provider or consumer. The commissioner may waive this provision based on a demonstration of need for the services and cost savings resulting from the transaction.

(3) If the interest expense results from either start-up costs and/or the initial financing of the capital indebtedness, the capital indebtedness shall represent all or part of the current OMRDD and Division of the Budget approved value of the property, after subtracting any equity contributions such as, but not limited to, grants applied to the property.

(4) In the case of interest expense, or a portion of interest expense, resulting from the refinancing of the capital indebtedness, the refinancing has the prior approval of the commissioner and the Division of the Budget, and the interest is in the amount associated with the outstanding principal balance prior to refinancing.

(b) Interest expense resulting from the inclusion of the reasonable closing costs, such as, but not limited to, attorney's fees, recording costs and points, is allowable in the initial financing and start-up costs, and in the refinancing of the capital indebtedness.

(c) Interest income generated from the provider's revenues for the operation of the services shall be used to offset interest expense incurred during the same reporting period. Notwithstanding the foregoing, a provider is not required to use the following to offset...
Interest expense: income earned on qualified pension funds, income from gifts or grants which are donor-restricted, income earned on funded depreciation accounts or secure investments for depreciable project costs above principal repayments.

(xii) Where any real property for which previous Medicaid payment has been made is transferred by sale, purchase, acquisition or merger (other than as a result of a receivership under New York Mental Hygiene Law, section 16.27), the costs (including legal fees, accounting and administrative costs, travel costs and the costs of feasibility studies) attributable to the negotiation or settlement of sale or purchase are not allowable.

(xiii) Costs related to Dormitory Authority loans shall be allowable as follows:

(a) The cost of principal and interest payments on loans from the Dormitory Authority pursuant to subdivision 13-d of section 5 of the Facilities Development Corporation Act, net of the portion of such payments attributable to operating costs, are allowable; provided that the reimbursement of such costs is an allowance in lieu of reimbursement of interest and depreciation associated with the property, and in lieu of reimbursement of the underlying allowable costs, which may include allowable start-up costs, for which the dormitory Authority loan is received. A provider which receives a Dormitory Authority loan shall not have the option of having included, in the calculation of its rate, fee or price, the loan’s underlying costs instead of the loan principal and interest payments.

(b) Operational period fees imposed by OMRDD and annual administrative fees imposed by the dormitory Authority in connection with Dormitory Authority mortgage loans shall be allowable costs.

(c) Interest payments on Dormitory Authority loans pursuant to this subparagraph (xiii) for capital indebtedness and start-up costs will be considered allowable where interest expense results from capital indebtedness and start-up costs in an amount equal to the OMRDD and Division of Budget approved value of the loan.

(d) Interest payments on Dormitory Authority loans pursuant to the provisions of subparagraph (xiii) are allowable in excess of the amount associated with the outstanding principal balance prior to refinancing, if the purpose of the debt is to acquire assets to be used for care of the persons served by the program or services and all other applicable requirements of this Plan are met.

(4) Costs of Co-operate (see subdivision (k), glossary) Ownership of Real Estate

(i) If an agreement to purchase membership or ownership interest in a co-operative, which agreement has been approved by OMRDD and the New York State Division of Budget, is...
agreement has been approved by OMRDD and the New York State Division of Budget, is between the provider or a consumer and a party which is not a related party, allowable costs shall be the lesser of the actual purchase price or the price of a membership or ownership interest in a co-operative for real estate with similar functions in the same geographic area.

(ii) If an agreement to purchase membership or ownership interest in a co-operative, which agreement has been approved by OMRDD and the New York State Division of Budget, is between the provider or a consumer and a related party, allowable costs for such purchase shall be the least of:

(a) the actual purchase price.

(b) the price of membership or ownership interest in a co-operative with similar functions in the same geographic area, or

(c) the co-operative’s costs attributable to the provider or consumer.

(iii) The allowable cost of purchasing membership or ownership interest in a co-operative shall be amortized over fifteen years, or the term of the mortgage given by the provider or consumer, whichever is greater.

(5) Moveable Equipment and Personal Property

(i) Costs of ownership of moveable equipment and personal property shall be allowable in the amount of depreciation and interest if the purchase is made through a multiple bid process. Depreciation shall be based upon the historical cost and useful life.

(a) If the equipment or personal property is purchased from a party not related to the provider or consumer, the historical cost shall be the lesser of the actual cost of purchasing the equipment or personal property or the fair market value of such equipment or personal property.

(b) If the equipment or personal property is purchased from a party related to the provider or the consumer, the historical cost shall be the least of:

(1) actual acquisition cost,

(2) fair market value, or

(3) the seller’s cost

(c) The useful life is the higher of the reported useful life or the useful life as reported in the Estimated Useful Lives of Depreciable Hospital Assets (current edition), published by the American Hospital Association. A provider or consumer may
OMRDD shall base such approval upon historical experience and documentary evidence.

(d) The provider or consumer shall use the straight-line, double declining balance or sum-of-the-years’ digits depreciation method. Once selected, the depreciation method shall remain constant for the useful life of the asset.

(ii) Costs of leasing moveable equipment and personal property shall be allowable as follows:

(a) If lease payments are made to a party which is not a related party, allowable costs shall be the lesser of:

(1) actual lease payments, or

(2) fair market rental.

(b) If lease payments are made to a related party, allowable costs shall be the least of:

(1) actual lease payments,

(2) fair market rental, or

(3) allowable depreciation, the associated interest expense, if any, and other related expenses, including, but not limited to, maintenance costs.

(6) Costs Applicable to Goods, Services or Property Not Covered Elsewhere in this Section.

(i) Costs applicable to goods, services, or property not covered elsewhere in the ICF/DD portion of this Plan and furnished to the provider or consumer by a related party shall be allowable at the lesser of:

(a) the cost to the related part, or

(b) the price of comparable goods, services or properties that could be obtained elsewhere.

(ii) Interest on working capital indebtedness in accordance with subparagraph (xi) of paragraph (3) of the ICF/DD portion of this Plan are allowable. In the event that a loan is not in accordance with the standards listed in subparagraph (xi), the need for such loan shall be demonstrated in writing to the commissioner, and the express written approval of the commissioner is required.

(k) **Glossary**

1. **Approved lease** - A lease approved by OMRDD and the New York State Division of the Budget.

2. **Approved proprietary lease** - A proprietary lease approved by OMRDD and the New York State Division of Budget

3. **Common ownership** - An individual or individuals possessing significant ownership or equity in the provider and the organization serving the provider.

4. **Consumer** - Anyone with a diagnosis of developmental disability who receives services from OMRDD or from a provider, or anyone to whom OMRDD provides funds (other than payment from competitive employment with OMRDD) to purchase services from a provider or to purchase other goods, services or property.

5. **Control** - The power, directly or indirectly, to significantly influence or direct the actions or policies of someone or an organization.

6. **Controlling party** - An organization or someone who, by reason of a direct or indirect ownership interest (whether of record or beneficial), has the ability, acting either alone or in concert with others with ownership interest, to direct or exert a controlling influence on the management policies of the provider. Except as otherwise provided in this section, neither the commissioner, nor any employee of the OMRDD, nor any member of a local legislative body of a county or municipality, nor any county or municipal official except when acting as the administrator of a program, shall by reason of his or her official position be deemed a controlling party of the provider; nor shall anyone who serves as an administrator or other employee of a provider be deemed to be a controlling party of such provider solely as a result of such position or his or her official actions in such position.

7. **Contract rent** - The amount of rent stated in the lease or proprietary lease as rent, additional rent, maintenance, special assessments, or any other additional charges, costs, expenses, liabilities and obligations. Notwithstanding the foregoing, A contract rent shall not include an amount greater than the amount approved by OMRDD and the Division of Budget.

8. **Co-operative** - A corporation or organization formed for the purpose of co-operative ownership of real estate.

9. **Co-partner** - A partner in a partnership of which the provider is also a partner.

10. **Dormitory Authority** - The Dormitory Authority of the State of New York as successor to the Facilities Development Corporation and the Dormitory Authority of the State of New York as the Successor to the Medical Care Facilities Finance Agency.
(11) **Fair market rental** - The rental that the property would most probably command on open market as indicated by rentals being paid and asked for comparable properties in the same geographic area as of the date of the appraisal.

(12) **Fair market value** -

(i) In the case of goods and services, the price of comparable goods and services that could be obtained elsewhere.

(ii) In the case of real property, the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

(a) buyer and seller are typically motivated;

(b) both parties are well-informed or well-advised, and acting in what they consider their own best interest;

(c) a reasonable time is allowed for exposure in the open market;

(d) payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto, and

(e) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

(13) **Immediate family** - Brother, sister, grandparent, grandchild, first cousin, aunt, uncle, spouse, parent or child of an individual, whether such relationship arises by reason of birth, marriage or adoption.

(14) **Landlords net cost** - The amount equal to depreciation (subject to the limitation in section (j)), the associated interest expense on capital indebtedness, if any, and other expenses approved by OMRDD. OMRDD shall approve such other expenses if they are reasonable in an amount and directly related to owning and maintaining the property in question. The types of other expenses directly related to owning and maintaining the property in question include, but are not limited to, real estate taxes, water and sewer charges, heat and utilities, maintenance costs, legal and accounting fees, lawn care, snow removal, rubbish and insurance.
removal, rubbish and insurance.

(15) **Option to renew a lease** - An option, stated in a lease, to renew the lease at a specific amount of rent and term of renewal, where such rent and term of renewal were stated in the original lease at the time the parties entered into the original lease, and were not negotiated by the parties subsequent to the signing of the original lease.

(16) **Organization** - A corporation, partnership or unincorporated association.

(17) **Principal stockholder** - Someone or an organization beneficially owning, holding or having the power to vote, 10 percent or more of any class of securities issued by a corporation.

(18) **Proprietary lease** - A lease between a co-operative, as lessor, and a person or organization with membership or ownership interest in the co-operative, as lessee.

(19) **Provider** - Someone or an organization licensed or otherwise approved by OMRDD to provide goods, services or property to consumers.

(20) **Related Party** - Someone or an organization which to a significant extent is associated or affiliated with the consumer or provider by common ownership or control, or which to a significant extent has control of, or is controlled by, the consumer or provider, by common ownership or control.

(21) **Seller's new book value** - The allowable acquisition cost of the asset(s) to the first owner of record who has received payment from the State of New York for the asset(s), minus any paid depreciation.

(22) **Special purpose organization** - For the purpose of this subpart is:

   (a) an organization which the provider controls through the contracts or other legal documents that give the provider the authority to direct the organization’s activities, management and policies;

   (b) an organization, the activities of which the provider is, for all practical purposes, the sole beneficiary. The provider will be considered the organization’s sole beneficiary if one or more of the three following circumstances exist:

      (1) the provider has assigned certain of its functions to the organization and the organization is operating primarily for the benefit of the provider;

      (2) the provider has transferred some of its resources to the organization.
and substantially all of the organization's resources are held for the benefit of the provider; or

(3) the organization has solicited funds in the name of and with the express or implied approval of the provider, and substantially all the funds solicited by the organization were intended by the contributor or were otherwise required to be transferred to the provider or used at its discretion or direction; or

(c) an organization which was created for the sole purpose of benefiting the provider, where the provider of such organization has been in operation for less than one year. The organization will be considered to be created for the sole purpose of benefitting the provider if the organization's or provider's certificate of incorporation, by-laws, partnership agreement or other governing rule state one or more of the following:

(1) the provider must assign certain of its functions to the organization and the organization must operate primarily for the benefit of the provider;

(2) the provider must transfer some of its resources to the organization, and substantially all of the organization's resources must be held for the benefit of the provider; or

(3) the organization shall solicit funds in the name of and with the express or implied approval of the provider, where substantially all the funds to be solicited by the organization will be intended by the contributor or otherwise required to be transferred to the provider or used at its discretion or direction.
(1) **Adjustments.**

Effective January 1, 2005 for Region II and III voluntary operated facilities, effective April 1, 2005 for all state operated facilities, and effective July 1, 2005 for voluntary operated Region I facilities, there shall be an efficiency adjustment for under-31 bed facilities as described herein and applied as a reduction to reimbursable operating costs.

(1) A determination shall be made as to whether each provider has a **per bed surplus or loss for all its under-31 bed facilities.**

   (i) Surplus/loss shall equal operating revenue minus operating costs.

      (a) For purposes of this efficiency adjustment, operating revenue and costs are net of day treatment, day service, transportation and regional FTE add-ons.

      (b) Revenue for determining the surplus/loss calculations for all facilities in all regions is from the rate effective July 1, 2004.

      (c) Costs for determining the surplus/loss calculations are from the 2001 or 2001-2002 cost reporting year, trended to 2004 or 2004-2005 dollars.

   (ii) The value of the surplus/loss is divided by the total number of beds in all of the provider’s under-31 bed facilities to determine the provider's per bed surplus/loss value.

(2) **Regional ranking of the per bed surplus/loss.**

   (i) Within each of the three regions, the per bed surplus/loss values are ranked and identified in descending order.

   (ii) Within each region, the ranking is divided into five groups:

<table>
<thead>
<tr>
<th>Region 1</th>
<th>Surplus/ Loss Range (Per Bed)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Efficiency Group 5</td>
<td>$17,498 to $4,289</td>
</tr>
<tr>
<td>Efficiency Group 4</td>
<td>$4,288 to $523</td>
</tr>
<tr>
<td>Efficiency Group 3</td>
<td>$522 to ($2,986)</td>
</tr>
<tr>
<td>Efficiency Group 2</td>
<td>($2,987) to ($7,465)</td>
</tr>
<tr>
<td>Efficiency Group 1</td>
<td>($7,466) to ($42,035)</td>
</tr>
</tbody>
</table>
### Region II

<table>
<thead>
<tr>
<th>Efficiency Group</th>
<th>Surplus/ Loss Range (Per Bed)</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>$17,478 to $6,354</td>
</tr>
<tr>
<td>4</td>
<td>$6,353 to $4,081</td>
</tr>
<tr>
<td>3</td>
<td>$4,080 to $873</td>
</tr>
<tr>
<td>2</td>
<td>$872 to ($5,343)</td>
</tr>
<tr>
<td>1</td>
<td>($5,344) to ($16,087)</td>
</tr>
</tbody>
</table>

### Region III

<table>
<thead>
<tr>
<th>Efficiency Group</th>
<th>Surplus/ Loss Range (Per Bed)</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>$12,398 to $7,216</td>
</tr>
<tr>
<td>4</td>
<td>$7,215 to $2,207</td>
</tr>
<tr>
<td>3</td>
<td>$2,206 to ($1,049)</td>
</tr>
<tr>
<td>2</td>
<td>($1,050) to ($6,440)</td>
</tr>
<tr>
<td>1</td>
<td>($6,441) to ($15,631)</td>
</tr>
</tbody>
</table>

(3) Each of the five groups within each region is assigned an ordinal weight.

Group 5=5  
Group 4=4  
Group 3=3  
Group 2=2  
Group 1=1

(4) Determination of total adjustment per facility.

(i) The number of beds in the facility is multiplied by its assigned ordinal weight and the result is multiplied by $334.

(ii) The facility’s reimbursable operating costs are reduced by the amount determined in subparagraph (i) of this paragraph.

(5) Reallocation of costs.

The following changes to cost allocations for all under-31 bed facilities are effective January 1, 2005 for voluntary operated Region II and III facilities, effective April 1, 2005 for all state operated facilities, and effective July 1, 2005 for voluntary operated Region I facilities.

(i) General insurance costs are reallocated from base year administration OTPS costs to base year support OTPS costs.

(ii) Property and casualty insurance costs are removed from base year administration OTPS costs. Property and casualty insurance costs from the appropriate cost report period are included in capital costs.

(iii) Expensed equipment costs from the base year cost report are included in Support OTPS costs. Expensed equipment costs are not included in capital costs.

Effective April 1, 2013, the methodology described in the Rate Setting and Financial Reporting for Intermediate Care Facilities for Persons with Developmental Disabilities (ICF/DDs) section in this Attachment for government operated facilities will be terminated, with the exception of those sections outlined in Paragraph (m), which follows. The new methods and standards for establishing payment rates are described in Paragraph (m) of this section.

(m) Effective April 1, 2013, rate setting for Intermediate Care Facilities for the Developmentally Disabled operated by New York State will be governed by this section of Part II of Attachment 4.19-D. These facilities are Developmental Centers and Community-based State Operated Intermediate Care Facilities for the Developmentally Disabled (SOICF/DDs). The Developmental Centers’ rate is an all inclusive rate. The rate for Community-based SOICF/DDs include services being provided in the ICF/DD with the addition of Day Services and Tax Assessment components which will be added to the calculated rate as set forth in paragraphs (6) and (7).

(1) **Reporting Requirements.** The State will report cost in accordance with Generally Accepted Accounting principles in a complete Consolidated Fiscal Report (CFR) format.

(2) **Definitions** applicable to this section:

(i) **Allowable Operating Costs** - Are all necessary and proper costs which are appropriate and helpful in developing and maintaining the operation of ICF/DDs. Necessary and proper costs are costs which are common and accepted occurrences in the field of intermediate care facilities for the developmentally disabled. These costs will be determined in accordance with the cost principles described in the Medicare Provider Reimbursement Manual (HIM-15). This will include allowable program administration, direct care, support, clinical, fringe benefits, and indirect personal service/non-personal service.

(ii) **Allowable Capital Costs** - Are all necessary capital costs incurred to provide covered services to beneficiaries determined in accordance with the cost principles described in the Medicare Provider Reimbursement Manual (HIM-15). This will include allowable lease/rental and ancillary payments; depreciation of equipment, vehicles, leasehold improvements and real property; financing expenditures associated with the purchase of equipment, vehicles and real property, and related expenditures and leasehold improvements.

(iii) **Base Period** – is the CFR period from which the Initial Period rate will be calculated.

(iv) **Base Period CFR** – is the CFR from three years prior to the initial rate period.

(v) **Beginning Census/Capacity** – is the beginning census/capacity on March 31st immediately prior to the beginning of the rate period.

(vi) **Capital Costs** – Costs that are related to the acquisition and/or long term use of land, buildings, construction, and equipment.

(vii) **Certified Capacity (Community-based SOICF/ DDs)** – represents the total capacity of the Community-based SOICF/DDs in the Operating Certificates.

(viii) **Census (Developmental Centers)** – is the number of individuals in all Developmental Centers on a given day.

(ix) **Consolidated Fiscal Report (CFR)** – is the reporting tool utilized by all government and non-government providers to communicate annual costs incurred as a result of operating OPWDD programs and services, along with related utilization and staffing statistics.
Depreciation - is the allowable cost based on historical costs and useful life of buildings, fixed equipment, capital improvements and/or acquisition of real property. The useful life shall be based on “The Estimated Useful Life of Depreciable Hospital Assets (2008 edition).” The depreciation method used shall be straight-line method.

Facility - the site or physical building where actual services are provided.

Financing Expenditures - interest expense and fees charged for financing of costs related to the purchase/acquisition, alteration, construction, rehabilitation and/or renovation of real property.

Historic Utilization Factor - For Community-based SOICF/DDs, the historic utilization factor shall be the number of reported units of service for all individuals residing in Community-based SOICF/DDs in the base period, divided by the maximum possible units of service. The maximum possible units of service shall be the product of the certified capacity for all Community-based SOICF/DDs on March 31 immediately prior to the first day of the base period and the number of days in the base period. For developmental centers, the historic utilization factor shall be the number of reported units of service for all individuals residing in all Developmental Centers in the base period who were not projected to move to the community during that base period, divided by the maximum possible units of service for such individuals. The maximum possible units of service for such individuals shall be the product of the number of individuals residing in all Developmental Centers on March 31 immediately prior to the first day of the base period who were not projected to move to the community during the base period and the number of days in the base period.

Individual - a person who resides in a Developmental Center or a Community Based SOICF/DD.

Initial Period - is the first 12 months of the two-year rate cycle. Costs will be calculated by using the CFR from three years prior to the rate period.

Lease/Rental and Ancillary Payments - a facility's annual rental payments for real property and ancillary outlays associated with the property, such as utilities and maintenance.

Operating Costs for Developmental Centers - are all allowable operating costs with the exception of Tax Assessment and Capital.

Operating Costs for Community Based State Operated ICF/ DDs - are all allowable operating costs with the exception of Tax Assessment, Day Services and Capital.

Phase Factor - represents the projection of time during the rate period individuals will live in a Developmental Center prior to moving to the community. The phase factor is 60%.

Projected Units of Service Developmental Centers - is determined by multiplying the number of anticipated individuals moving to the community in the rate period by the calendar days in the rate period multiplied by the phase factor, and adding that value to the product of the number of individuals anticipated to remain in the Developmental Center for the entire rate period multiplied by the calendar days in the rate period multiplied by the historic utilization factor.

Projected Units of Service-Community SOICF/ DDs - is determined by multiplying the certified capacity on March 31 immediately prior to the rate period by the number of calendar days in the rate period by the historic utilization factor.

Rate Period - is the annual time period that rates are effective, i.e. April 1st through March 31st.

Rate Cycle - the rate cycle is a 24 month period that consists of two rate periods beginning on April 1st of each year.

Reimbursable Costs - are the allowable costs calculated from the base period CFR.

Staffing Ratio - is the calculated ratio between individuals and staff in the base period CFR.

Subsequent Period - is the second 12 months of the rate cycle.
**Trend Factor** - is a percentage applied to all applicable operating costs that represent inflations in the costs of goods and services as described in (m)(5).

**Unit of Service** - is the unit of measure denoting lodging and services rendered to one individual between the census taking hours of the facility on two successive days. The day of admission but not the day of discharge will be counted as a unit of service. Also, one unit of service will be counted if the individual is discharged on the same day he/she is admitted, providing there was an expectation that the admission would have at least 24-hour duration. Reserved bed days under Attachment 4.19-C are included in the units of service.

### Computation of Rates (General)

(i) There will be one Statewide rate for all Developmental Centers and one Statewide rate for all Community-based SOICF/DDs.

(ii) New York State will make an adjustment to the rate resulting from any final audit findings or reviews.

(iii) Developmental Center costs include any necessary transportation to and from physician, dentist, and other clinical services as well as any other transportation appropriate to the individual’s participation in community-based activities planned for or sponsored by the facility. Developmental Center costs do not include emergency/nonemergency ambulance services which were separately billed to Medicaid.

(iv) The rate for the initial period will be computed on the basis of a full 12-month base period CFR, adjusted in accordance with (m)(3)(ii). If a facility closes or is no longer used as an ICF/DD during or subsequent to the base year, all costs and statistics for that facility will be removed from the base period before calculating the initial period rate. The computation of the base period staffing ratio using the end of year census/certified capacity is effective for the first rate cycle. The State will submit a State Plan Amendment to establish the staffing ratio that will be effective for the 2015-17 rate cycle.

(v) For a Community-based SOICF/DD that has been in operation less than four full years as the start of the initial period, the initial period rate will be the Statewide rate for Community-Based SOICF/DDs in effect during such initial period, and the subsequent period rate will be the Statewide rate for Community-Based SOICF/DDs in effect during such subsequent period, until the beginning of the next rate cycle.

### Reimbursable Costs for the Initial Period of the 24-month Rate Cycle

(i) Program Administration Reimbursement is the Administration directly related to the provision of the service.

A per person average staffing ratio will be calculated using the direct personal service from the base period CFR-4. The total Program Administration FTE’s (full time equivalents) is divided by the ending census (Developmental Centers)/certified capacity (Community-based SOICF/DD) from the base period CFR which will result in a Program Administration staffing ratio.

(a) An average Program Administration salary will be calculated by dividing the direct personal service from the base period CFR-4 total annual salary of all Program Administration employees by the total.
Program Administration FTE's.

(b) The Program Administration staffing ratio is then multiplied by the census (Developmental Centers)/certified capacity (Community-based SOICF/DDs) of the March 31st date immediately prior to the beginning of the rate period. The product of this calculation is the total number of Program Administration FTE's.

(c) The calculated average Program Administration salary is then multiplied by the calculated Program Administration FTE's. The product of this calculation is the total Program Administration salary cost.

(d) The result of paragraph (4)(i)(c) is then trended in accordance with paragraph (5) of this section, then divided by the total projected units of service on March 31st immediately prior to the beginning of the rate period to arrive at the Program Administration salary cost per diem.

(ii) Direct Care Reimbursement.

A per person average staffing ratio will be calculated using the direct personal service from the base period CFR-4. The total Direct Care FTE's is divided by the ending census (Developmental Centers)/certified capacity (Community-based SOICF/DDs) from the base period CFR which will result in a Direct Care staffing ratio.

(a) An average Direct Care salary is calculated by dividing the direct personal service from the base period CFR-4 total annual salary of all Direct Care employees by the total Direct Care FTE's.

(b) The Direct Care staffing ratio is multiplied by the census (Developmental Centers)/certified capacity (Community-based SOICF/DDs) of the March 31st date immediately prior to the beginning of the rate period. The product of this calculation is the total number of Direct Care FTE's.

(c) The calculated average Direct Care salary is multiplied by the calculated Direct Care FTE's. The product of this calculation is the total Direct Care salary cost.

(d) The result of paragraph (4)(ii)(c) is then trended in accordance with paragraph (5) of this section, then divided by the total projected units of service on March 31st immediately prior to the beginning of the rate period to arrive at the Direct Care salary per diem.

(iii) Support Reimbursement.

A per person average staffing ratio will be calculated using the direct personal service from the base period CFR-4. The total Support FTE's is divided by the ending census (Developmental Centers)/certified capacity (Community-based SOICF/DDs) from the base period CFR which will result in a Support staffing ratio.

(a) An average Support salary is calculated by dividing the direct personal service from the base period CFR-4 total annual salary of all Support employees by the total Support FTE's.
The Support staffing ratio is then multiplied by the census (Developmental Centers)/certified capacity (Community-based SOICF/DDs) of the March 31st immediately prior to the beginning of the rate period. The product of this calculation is the total number of Support FTE's.

The calculated average Support salary is multiplied by the calculated Support FTE's. The product of this calculation is the total Support salary cost.

The result of paragraph (4)(iii)(c) is trended in accordance with paragraph (5) of this section, then divided by the total projected units of service on March 31st immediately prior to the beginning of the rate period to arrive at the Support salary per diem.

A per person average Clinical staffing ratio will be calculated using the direct personal service from the base period CFR-4. The total Clinical FTE's is divided by the ending census (Developmental Centers)/certified capacity (Community-based SOICF/DDs) from the base period CFR which will result in the Clinical staffing ratio.

An average Clinical salary is calculated by dividing the direct personal service from the base period CFR-4 total annual salary of all Clinical employees by the total Clinical FTE's.

The Clinical staffing ratio is multiplied by the census (Developmental Centers)/certified capacity (Community-based SOICF/DDs) of the March 31st date immediately prior to the beginning of the rate period. The product of this calculation is the total number of Clinical FTE's.

The calculated average salary is then multiplied by the calculated Clinical FTE's. The product of this calculation is the total Clinical salary cost.

The result of Paragraph (4)(iv)(c) is trended in accordance with Paragraph (5) of this section, then divided by the total projected units of service on March 31st immediately prior to the beginning of the rate period to arrive at the Clinical salary cost per diem.

Fringe Benefits are calculated by multiplying the sum of trended allowable Personal Service dollars calculated in (m)(4)(i) through (m)(4)(iv) by the budgeted fringe factor of 55.48%. The result is divided by the total projected units of service as on March 31st immediately prior to the beginning of the rate period to arrive at the fringe per diem. Fringe benefit related accruals will also be included. Accruals are calculated as change between the end of the current benefit period and the next benefit period, for this period the accrual would be .25%. The computation of the base year fringe benefits is effective for the first rate cycle. The State will submit a State Plan Amendment to establish the fringe benefits factor that will be effective for the 2015-17 rate cycles.

Indirect Personal Service and Non-Personal Service Costs are calculated as follows:

(a) The Total Personal Service dollars from the base period CFR-1 less the total Direct Personal Service dollars from the base period CFR-4 results in the Indirect Personal Service dollars.
(b) The Indirect Personal Service amount is then multiplied by the fringe benefit percentage.

(c) The Indirect Personal Service dollars with associated fringe is added to Non-Personal Service dollars from the base period CFR. The product is Total Indirect Personal Service dollars and Non-Personal Service dollars.

(d) Total Indirect Personal Service and Non-Personal Service dollars are divided by the ending census/capacity on the base period CFR resulting in a per-person annual Non-Personal Service dollar amount.

(e) The per-person annual Non-Personal Service amount is multiplied by the beginning census/certified capacity, giving the annual Indirect Non-Personal Service dollars.

(f) The result of paragraph (4)(vi)(e) is trended in accordance with Paragraph (5) of this section, then divided by the total projected units of service on March 31st immediately prior to the beginning of the rate period to arrive at the Indirect Non-Personal Service cost per diem.

(vii) Sum products of paragraphs (4)(i)(d), (4)(ii)(d), (4)(iii)(d), (4)(iv)(d), (4)(v), and (4)(vi)(f) of this section to arrive at the total trended operating cost per diem.

(5) **Trend Factors.**

(i) The trend factor used will be the applicable years from the Medical Care Services Index for the period April to April of each year from www.BLS.gov/cpi; Table 1 Consumer Price Index for All Urban Consumers (CPI-U); U.S. city average, by expenditure category and commodity and service group.

(ii) Generally, actual index values will be used for all intervening years between the base period and the rate period. However, because the index value for the last year immediately preceding the current rate period will not be available when the current rate is calculated, an average of the previous five years actual known indexes will be calculated and used as a proxy for that one year.

(iii) A compounded trend factor will be calculated in order to bring base period costs to the appropriate rate period.

(6) **Day Service add-on for Community-based SOICF/DDs.** To reimburse Community-based SOICF/DDs that obtain day services from State and Voluntary providers, the State will calculate an interim amount that will approximate the costs Community-based SOICF/DDs will incur to obtain these services for the individuals they serve, and this interim amount will be reconciled to the actual rate year costs incurred. The interim amount included in the rate will be calculated as stated below:

(i) The Day Services from the base period CFR will be added to an approximate payment to be made to the day services providers for the individuals residing in Community-based SOICF/DDs and attending Day Services.
(ii) The result of paragraph (6)(i) is trended in accordance with paragraph (5) of this section, then divided by the total units of service as projected on March 31st immediately prior to the beginning of the rate period to arrive at the Day Services per diem.

(iii) The Day Services reconciliation to final rate - New York State will pay for SOICF Day Services at the same rate established by OWPDD under the comprehensive home and community based services waiver for the day habilitation program operated by the same provider and in the same location as such day services. Subsequent to the rate period OPWDD will determine the actual billings for day services for each individual and reconcile the interim amount in (I) to the amount of actual billings.

(7) **Tax Assessment costs** in the amount of a 5.5 percent assessment uniformly imposed on all SOICF/DD services of all such providers will be included in the rate.

(8) **Capital Add-on Cost**

(i) The Capital add-on will be calculated using the Base Period CFR.

(ii) Capital costs are calculated by adding Base Period CFR Total Equipment and Total Property-Provider Paid.

(iii) The result of paragraph (8)(ii) of this section is divided by total projected units of service on March 31st immediately prior to beginning of rate period to arrive at the Capital cost per diem.

(9) **Total Per Diem** will be the sum products of paragraphs (4)(vii), (6)(ii), (7), and (8)(iii) of this section.

(10) **Computation of the Subsequent Period Rate.**

(i) The reimbursable costs contained in the subsequent period rate will be computed as follows:

(a) New York State will update the census (Developmental Center) and certified capacity (Community-based SOICF/DDs) based on the number of individuals in the facility as of March 31st of the immediately preceding rate period. Once these updates have been made OPWDD will increase the costs by the trend factor as described in Paragraph (5) of this section.

(b) An adjustment will be made to reflect the capital in the CFR three years prior to the rate period. The first full year after an institution is closed OPWDD will remove all related capital.

(ii) The computation of the subsequent period rate can also be represented by the following formula:

\[
\text{Trended Reimbursable Operating costs} + \text{Trended Adjusted Day Service costs} + \text{Adjusted Reimbursable Capital costs} + \text{Tax Assessment} = \text{Total Reimbursable Costs.}
\]

(11) **Upper Payment Limit Assurance.**
(i) So that CMS may monitor the reasonableness of the methodology set forth in paragraph (4) on an ongoing basis, the State will report to CMS on a quarterly basis the current quarter’s average salaries and the number of individuals that have been placed in the community that quarter. The State will also report to CMS annually beginning census information and the number of individuals who actually moved from Developmental Centers to the community and the State’s anticipated placements for the next year.

(ii) When the cost data for each rate period is finalized, the State will calculate the aggregate upper payment limit in accordance with applicable federal law, regulations, and official guidance from CMS for all Developmental Centers and Community-based SOICF/DDs, and will provide CMS with its upper payment limit calculation. The State anticipates it will finalize the cost data for each rate period by completing a CFR in the normal course of business within 18 months of the end of the rate period. If the total payments received and expected to be received under this section (m) for all Developmental Centers and Community-based SOICF/DDs exceed the upper payment limit for such rate period as calculated by the State and accepted by CMS, the State will treat any overage as an overpayment the federal share of which will be refunded.
Effective July 1, 2011, the methodology described in the Rate Setting and Financial Reporting for under thirty-one bed Intermediate Care Facilities for Individuals with Developmental Disabilities (ICF/DDs) section in this Attachment for voluntary operated facilities will be terminated, with the exception of those sections outlined in this section (n). The methods and standards effective July 1, 2011 for establishing payment rates for under thirty-one bed voluntary operated ICF/DDs are described in this section (n). Rates for ICF/DD services delivered on dates after June 30, 2011 and before July 1, 2014 shall be determined in accordance with this section (n).

(1) Definitions (applicable to this section):

**Allowable Capital Costs** – All necessary costs incurred to provide covered services to beneficiaries determined in accordance with the cost principles described in the Medicare Provider Reimbursement Manual (PRM-15). This will include allowable lease/rental and ancillary payments; depreciation of equipment, vehicles, leasehold improvements and real property; and bonding, principal, interest and financing expenditures associated with the purchase of equipment, vehicles and real property, and related expenditures and leasehold improvements.

**Allowable Operating Costs** – All necessary and proper costs which are appropriate and helpful in developing and maintaining the operation of ICF/DDs. Necessary and proper costs are costs which are common and accepted occurrences in the field of ICF/DDs. These costs will be determined in accordance with the cost principles described in the Medicare Provider Reimbursement Manual (PRM-15), which will include allowable Administration, OTPS, Clinical, Direct Care, Support, Fringe Benefits and Utilities.

**Base Period** – The period from July 1, 1999 to June 30, 2000 for Region I facilities and January 1, 1999 to December 31, 1999 for Region II and Region III facilities.

**Capital Costs** – Costs that are related to the acquisition and/or long term use of land, buildings, construction and equipment.

**Certified Capacity** - Represents the total capacity of the ICF/DD in the provider’s operating certificate as of the first day of the rate period.

**Consolidated Fiscal Report (CFR)** – A reporting tool prepared in accordance with Generally Accepted Accounting Principles and utilized by all New York State (NYS) government and non-government providers to communicate their annual costs incurred as a result of operating Office of People with Developmental Disabilities (OPWDD) programs and services, along with related utilization and staffing statistics.
**New York**

**71**

**Cost Component Category** - The following cost component categories are utilized when establishing rates: Administration, OTPS, Clinical, Direct Care, Support, Fringe Benefits, Utilities, Day Services, Efficiency Adjustments, Capital and a Provider Assessment.

**Depreciation** - The allowable cost based on historical costs and useful life of buildings, fixed equipment, capital improvements and/or acquisition of real property. The useful life will be based on “The Estimated Useful Life of Depreciable Hospital Assets (2008 edition).” The depreciation method used will be the straight line method.

**De-trend** - The process of deflating dollars to represent those dollars in a prior period, using the applicable trend factors.

**DDP Score** - A Developmental Disabilities Profile (DDP) score is an index which measures an individual's disabilities in various domains, such as Medical, Behavior, Adaptive, and Clinical Service needs.

**Disability Increment** - The methodology for developing facility-specific Direct Care full-time equivalents (FTEs) using aggregate and measurable consumer disability characteristics.

**Facility** - The site or physical building where actual services are provided.

**ICF/DD** - An Intermediate Care Facility for the Developmentally Disabled (ICF/DD) that has a certified capacity of under thirty-one beds and that is not operated by the State.

**Individual** - A person who resides in an ICF/DD.

**Lease/Rental and Ancillary Payments** - A facility's annual rental payments for real property and ancillary outlays associated with the property, such as utilities and maintenance.

**Maximum Units of Service** - Maximum units of service are equal to the certified capacity multiplied by the number of days in the rate period.
New York
72

**Newly Certified Facility** - A Region I facility which opened after July 1, 2008, or a Region II or III facility which opened after January 1, 2008.

**Operating Certificate** - The authority and documentation issued by OPWDD permitting a provider to operate a residential facility for the care and treatment of persons with developmental disabilities. Each physical ICF/DD location is assigned a unique operating certificate.

**Pass-Through Costs** - Allowable costs that are not subjected to screen values.

**Provider** - A voluntary agency that has been issued a Medicaid provider agreement for an ICF/DD. A provider may operate multiple ICF/DDs.

**Provider Rate** - The provider-specific rate resulting from implementation of the reimbursement methodology. The provider rate is unique for each provider.

**Provider Assessment** - An assessment in the amount of 5.5% uniformly imposed on all providers of ICF/DD services.

**Rate Period** - The time period for which rates are effective.

**Reimbursable Costs** - Allowable and pass through costs that have prevailed after being subjected to screen values.

**Re-based Period** - The period from July 1, 2008 to June 30, 2009 for Region I facilities, and January 1, 2008 to December 31, 2008 for Region II and III facilities.

**Regions**

i. **Region I:**

A facility which is located in the counties of New York, Bronx, Kings, Queens, and Richmond.

The cost report period and rate period for Region I is July 1st to June 30th. A provider located in Region I may request to report on the Region II and III period.
ii. **Region II:**

A facility which is located in the counties of Putnam, Rockland, Nassau, Suffolk, and Westchester.

The cost report period and rate period for Region II is January 1st to December 31st. A provider located in Region II may request to report on the Region I period.

iii. **Region III:**

A facility which is located in any other county in New York State, not specified in Region I or Region II.

The cost report period and rate period for Region III is January 1st to December 31st. A provider located in Region III may request to report on the Region I period.

**Screen Values** - A dollar figure, represented in base period dollars, which actual costs are measured against in determining reimbursable costs.

**Trend Factor** - A percentage applied to all applicable costs that represent inflation in the costs of goods and services.

**Unit of Service** - A unit of service is equal to one day that an individual resides in an ICF/DD. Maximum units of service are equal to the certified capacity times the number of days in the rate period.

**(2) General Overview of the Methodology:**

i. The methodology first de-trends costs from the re-based period to the base period using the trend factors in paragraph (6)(i)(a); compares these amounts to screen values as described in paragraph (3) to determine the lower of cost or screen; compares these results to the costs as of June 30, 2011, as per paragraph (4); establishes reimbursable operating costs; then trends those costs up to the rate period; and incorporates costs for Day Service, Capital and a Provider Assessment. The methodology results in one per diem rate for each provider operating one or more ICF/DDs.

ii. **Provider Rate** = (Reimbursable Operating Costs + Day Services + Efficiency Adjustments + Capital + Provider Assessment) / Maximum Units of Service

The facility-specific efficiency adjustments are listed in the Supplemental Detail Schedule in Appendix A.

**TN #11-85 Approval Date November 6, 2014**  
Supersedes TN NEW Effective Date July 1, 2011
(3) Establishing Screen Values and Reimbursable Operating Costs

i. Administration Screen Value and Reimbursable Costs
   (a) **Administration Screen Value** is equal to 85% of the provider’s administration screen value as of June 30, 2011.
   
   The facility-specific administration screens are listed in the Supplemental Detail Schedule in Appendix A.
   
   (b) **Reimbursable Administration Costs** are the lesser of:
       
       1. The administrative costs as reported on the re-based CFR, de-trended to the base period; or
       
       2. Screen value as described in paragraph (3)(i)(a).

ii. Other than Personal Service (OTPS) Screen Value and Reimbursable Costs
   (a) **OTPS Screen Value** is calculated by multiplying the per bed value for the facility’s region, by the certified capacity.
   
   (b) OTPS regional per bed value (in base period dollars) are as follows:
       
       | Region     | Value      |
       |------------|------------|
       | Region I   | $16,097    |
       | Region II  | $13,085    |
       | Region III | $16,418    |
   
   (c) **Reimbursable OTPS Costs** are the lesser of:
       
       1. OTPS costs, as reported on the re-based CFR, de-trended to the base period; or
       
       2. Screen values as described in paragraph (3)(ii)(a).
   
   (d) **Expensed Equipment and General Insurance** – Costs as reported on the re-based CFR, de-trended to the base period, are pass-through costs and will not be subject to a screen value.
iii. **Personal Service (PS) Clinical Screen Value and Reimbursable Costs**

(a) **PS Clinical Screen Value** is calculated by multiplying the base period PS Clinical salary for the facility's region, by the Clinical FTEs reported on the re-based CFR, Personal Services and Contracted Direct Care and Clinical Personal Services Schedules. The contracted clinical FTEs are calculated as follows: (clinical contracted personal service dollars, deflated to the base period) divided by (the base period PS Clinical salary for the facility's region adjusted to include the facility's fringe benefit percentage described in paragraph (3)(vii)(a)).

(b) PS Clinical regional salaries (in base period dollars) are as follows:

<table>
<thead>
<tr>
<th>Region</th>
<th>Salary</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>$56,510</td>
</tr>
<tr>
<td>II</td>
<td>$53,584</td>
</tr>
<tr>
<td>III</td>
<td>$40,414</td>
</tr>
</tbody>
</table>

(c) **Reimbursable PS Clinical Costs** are the lesser of:

1. PS Clinical costs, as reported on the re-based CFR, Personal Services and Contracted Direct Care and Clinical Personal Services Schedules, de-trended to the base period; or
2. Screen value as described in paragraph (3)(iii)(a).

iv. **Personal Service (PS) Direct Care Screen Value and Reimbursable Costs**

(a) **PS Direct Care Screen Values** are calculated by multiplying the base period PS Direct Care salary for the facility's region, by the calculated Direct Care FTEs as described in paragraph (3)(iv)(c).

(b) Direct Care regional salaries (in base period dollars) are as follows:

<table>
<thead>
<tr>
<th>Region</th>
<th>Salary</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>$29,375</td>
</tr>
<tr>
<td>II</td>
<td>$29,522</td>
</tr>
<tr>
<td>III</td>
<td>$25,005</td>
</tr>
</tbody>
</table>

(c) Direct Care FTEs are calculated by utilizing the facility-specific disability increment plus bed size increment.

1. The disability increment is only calculated if at least 50% of the DDP scores for individuals that resided in the facility during the re-based...
period are available. If less than 50% of the DDP scores are available, the direct care FTEs are based on bed size increment alone.

2. The disability increment using the DDP scores is calculated as follows:

\[(0.063 \text{ FTEs} \times \text{the facility-specific mean direct care score}) + (0.008 \text{ FTEs} \times \text{the facility-specific mean behavior score}) + (0.062 \text{ FTEs} \times \text{the facility standard deviation direct care score}) - (0.019 \text{ FTEs} \times \text{the facility standard deviation behavior score})\]

3. Direct care score is calculated for each individual from the DDP Adaptive and Health/Medical scores as follows:

\[7.962 + (0.156 \times \text{the Adaptive score}) + 1.611 \times \text{the Health/Medical score}.\]
4. The bed size increments are as follows:

<table>

</table>

(d) **Reimbursable PS Direct Care Costs** are the lesser of:

1. PS Direct Care costs, as reported on the re-based CFR, Personal Services and Contracted Direct Care and Clinical Personal Services Schedules, de-trended to the base period; or

2. Screen values as described in paragraph (3)(iv)(a).
v. **Personal Service (PS) Support Screen Value and Reimbursable Costs**

(a) **PS Support Screen Value** is calculated by multiplying the salary for the facility's region by Support FTEs in the re-based CFR, Personal Services Schedule.

(b) Support regional salaries (in base period dollars) are as follows:

<table>
<thead>
<tr>
<th>Region</th>
<th>Salary</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>$29,375</td>
</tr>
<tr>
<td>II</td>
<td>$29,522</td>
</tr>
<tr>
<td>III</td>
<td>$25,005</td>
</tr>
</tbody>
</table>

(c) **Reimbursable PS Support Costs** are the lesser of:

1. PS Support Costs, as reported on the re-based CFR, Personal Services Schedule, de-trended to the base period; or

2. Screen values as described in paragraph (3)(v)(a).

vi. **Fringe Benefit Percentage and Reimbursable Costs**

(a) For each facility, a **Fringe Benefit Percentage** is calculated by dividing the sum of the PS Direct Care, PS Clinical, and PS Support fringe benefits costs, as reported on the re-based CFR de-trended; plus the addition of certain facility specific reimbursable fringe costs incurred subsequent to the re-based CFR, de-trended; by the sum of the PS Direct Care, PS Clinical, and PS Support costs (exclusive of contracted Personal Service) as reported on the re-based CFR, de-trended.

Fringe Benefit % = (de-trended PS Direct Care + PS Clinical + PS Support fringe benefits costs + certain facility specific reimbursable fringe costs incurred subsequent to the re-based CFR) divided by (de-trended total PS Direct Care + PS Clinical + PS Support costs, exclusive of contracted Personal Service).

The facility-specific reimbursable fringe costs incurred subsequent to the re-based CFR (HCA IV-VI) are listed in the Supplemental Detail Schedule in Appendix A.

(b) **Reimbursable Fringe Benefit Costs** are calculated by multiplying the facility-specific fringe benefit percentage, as described in paragraph (3)(vi)(a), by the total PS Direct Care, PS Clinical, and PS Support reimbursable costs, exclusive of contracted Personal Service.
vii. **Utilities Reimbursable Costs**

(a) **Reimbursable Utility Costs** will be equal to the sum of all utilities costs reported on the re-based CFR, Program/Site Data Schedule, de-trended.

(b) All utilities costs are pass-through costs and will not be subjected to a screen value.

(4) **Comparison of Costs** - The rationale of the cost comparison is to prevent providers from experiencing decreases exceeding 10% of the June 30, 2011 costs or increases above their June 30, 2011 costs. If the re-based costs fall within 90% - 100% of the June 30, 2011 costs, OPWDD will proceed calculating the provider rate using the re-based costs. The methodology for the comparison of costs is as follows:

The sum of each provider's re-based, de-trended, reimbursable operating costs as described in paragraphs (3)(i)(b), (3)(ii)(c), (3)(ii)(d), (3)(iii)(c), (3)(iv)(d), (3)(v)(c), (3)(vi)(b), and (3)(vii)(a) of this section less the efficiency adjustment are compared to the reimbursable operating costs in the provider's rates less the efficiency adjustment as of June 30, 2011. As a result of this comparison, one of these conditions will prevail in calculating the provider rate:

i. If the re-based, de-trended, reimbursable operating costs are between 90% and 100% of the June 30, 2011 de-trended reimbursable operating costs, the re-based, de-trended, reimbursable operating costs prevail in calculating the provider rate;

ii. If the re-based, de-trended reimbursable operating costs fall below 90% of the June 30, 2011 de-trended reimbursable operating costs, an adjustment will be made to bring the provider's re-based, de-trended reimbursable operating costs up to 90% of the provider's June 30, 2011 de-trended reimbursable operating costs, and prevail in calculating the provider rate; or

iii. If the re-based de-trended reimbursable operating costs are higher than the June 30, 2011 de-trended reimbursable operating costs, then the June 30, 2011 de-trended reimbursable operating costs will prevail, less the administrative 15% reduction, in calculating the provider rate.

(5) **Day Services** - ICF/DD s are reimbursed for individuals who participate in day service programs/activities provided by State and voluntary providers.
The facility-specific day services are listed in the Supplemental Detail Schedule in Appendix A.

(6) **Trend Factors**

(i) Once the reimbursable costs for all of the appropriate cost component categories have been established as per paragraphs (4)(i), (4)(ii), or (4)(iii) of this section, each cost component category is then trended up to the rate period.

(a) The trend factors from the base period to June 30, 2014 are as follows:

<table>
<thead>
<tr>
<th>Calendar Year From</th>
<th>From To</th>
<th>Fiscal Year From To</th>
<th>Trend Factor % Change</th>
</tr>

<td>0.00%</td>
</tr>
</tbody>
</table>

(7) **Capital** – The rate will include capital if the provider has been approved for capital reimbursement. Providers requesting the incorporation of property reimbursement in an ICF/DD rate must get the reimbursement level prior approved by OPWDD. Providers are reimbursed for capital according to depreciation, amortization, lease and capital indebtedness schedules that are developed as part of an OPWDD prior property approval process. OPWDD’s prior property review process includes an assessment that assets and leases are within fair market value and that capital interest costs are at market rates. Property reimbursement schedules, developed as part of the prior approval process, delineate by rate period the exact amount of approved capital reimbursement including the expiration date for that reimbursement. Useful asset lives utilized in the depreciation and amortization schedules are in accordance with the Provider Reimbursement Manual (PRM-15).
The facility-specific property reimbursement levels are listed in the Supplemental Detail Schedule in Appendix A.

In addition to the capital reimbursement described above, allowable equipment and vehicle related costs will be updated annually based on the costs reported on the CFR from two years prior. (e.g., the January 1, 2012 cost update will be based on the January 1, 2010 through December 31, 2010 CFR.)

(8) **Provider Assessment** - The provider assessment on ICF/IID services rendered to Medicaid recipients shall be considered an allowable cost and reimbursed through Medicaid service rates of payment.

(9) **Existing Facilities** - Rates for ICF/DDs that are not newly certified facilities will be calculated in accordance with paragraphs (3), (4), (5), (6), (7), (8), and (11) of this section.

**Newly Certified Facilities** - For newly certified facilities, OPWDD will request a budget from the provider. A desk audit process will compare budgeted average salaries, OTPS, Administration and Fringe with those reimbursed in other ICF/DDs operated by the provider. If the provider does not operate other ICF/DDs, OPWDD will desk audit against regional ICF/DD averages. The budgeted dollars for all of the cost component categories are subject to the screen values as per paragraph (3) of this section. Rates for newly certified facilities will continue to be calculated as described in paragraphs (5), (6), (7), (8), and (11) of this section.

(10) **Computation of the Provider Rate** - The provider rate will be the sum of the trended cost component categories of the provider’s facility rates, aggregated as one provider agency rate, as described in paragraph (4), with the addition of the provider assessment, as described in paragraph (8), divided by the maximum units of service.

(11) **Rate Appeals** - A provider may appeal for an adjustment to its rate that would result in an annual increase of $5,000 or more in the provider’s allowable costs and that is needed because of bed vacancies. The appeal request must be made within one year of the close of the rate period in which the bed vacancies occurred. OPWDD will only grant the appeal if the provider has demonstrated that the vacancies were unavoidable. No amount granted on appeal will exceed the provider’s ICF/DD program loss.

(12) **Adjustments** - A provider may request a rate revision based on rate computation errors by notifying OPWDD either within 90 days of the provider receiving the rate or within 90 days of the beginning of the period in question, whichever is later. Adjustments to rates will be limited to those adjustments which will result in an annual increase or
New York 82

decrease of $5,000 or more in the provider's allowable cost. For changes in certified capacity, the operating portion and units of service used to calculate the provider’s rate will be prorated up or down in the same ratio as the change in capacity.

(13) Supplemental Schedule - Refer to the Supplemental Schedule in Appendix A beginning on the next page.

Methods and Standards for Establishing Payment Rates

Out of State Services

[Skilled Nursing and Intermediate Care Facilities (SNF’s and ICF’s)]

Nursing Facilities

New York State reimburses [SNF/ICF] nursing facility services provided in accordance with rates negotiated by the [recipient’s district of fiscal responsibility or directly] State and the facility. The rate negotiated is based on the approved Medicaid rate established by the facility’s home state. Where ancillary services for the necessary care of the recipient are not included in the home state’s Medicaid rate, the rate approved by New York State may be augmented to include the additional services. All out-of-state rates, except those equal to or less than the facility’s home state Medicaid rate must be approved by both the State Department of Social Services and the Division of the Budget. In those instances where the proposed rate is not approved, an alternative rate is negotiated and re-submitted to the Division of the Budget. Only one rate for a level or type of care will be established for a given out-of-state facility and will be applicable to all local districts. The implementation of a single locator code for all out-of-state billings precludes the potential for different rates being paid to the same facility on behalf of different local districts.
DEFINITION OF A CLAIM BY TYPE OF SERVICE

A claim is defined as a request for reimbursement for medical services rendered to an eligible Medicaid recipient.

Claims must be submitted on acceptable claim forms.

1) **Claim Form A** - used by Practitioners (physicians, podiatrists, private duty nurses, therapists, clinical psychologists), Clinics (Outpatient and Free-Standing), Dental providers, (private practicing, schools and clinics), Laboratories, HMO’s Referred Ambulatory, Home Health, Personal Care Services, Transportation and Eye Care providers.

2) **Practitioner Claim Form** - used by Physicians.

3) **Claim Form B** - used by Skilled Nursing Facilities, Health Related Facilities, Child Care Agencies and Intermediate Care Facilities.

4) **Claim Form C** - used by Hearing Aid dealers and Durable Medical Supplies, Equipment and Appliances vendors.

5) **UBF-1-81** - used by Inpatient Hospital providers.

6) **Pharmacy Claim Form** - used by pharmacy providers.

7) **Child Health Assurance Program Claims and report Form** - used by physicians and clinics to bill for services rendered under the CHAP (EPSDT) program.

8) **Universal Physician Claim Form** - (New York State’s modification of the HCFA-1500) (when implemented will be used by physicians).
Claims are submitted either using the approved rate for each service or billing on a fee-for-service basis.

**Providers which submit claims on a fee-for-service basis include:**

- Physicians/CHAP physicians
- Podiatrists
- Private Duty Nurses
- Therapists
- Clinical Psychologists
- Pharmacies
- Dentists (private practice, dental school)
- Laboratories
- Eye Care
- Referred Ambulatory
- Transportation
- Durable Medical Supplies, Equipment, Appliances
- Hearing Aid Dealers

**Providers which submit claims based on a rate include:**

- Outpatient Clinics
- Free Standing Clinics
- Inpatient Hospital
- Skilled Nursing Facilities
- Health Related Facilities
- HMO
- Home Health Agencies (including Long Term Home Health)
- Personal Care Services
- Child Care Agencies
- Intermediate Care Facilities/MR
New York

1

1. **Frequency of Data Exchanges**

433.138(d)(1) **State Wage Information Collection Agency (SWICA) and SSA Wage and Earnings File.**

Matches with the SWICA in NYS are performed daily and quarterly. Matches with SSA Wage and Earnings files occur monthly.

433.138(d)(3) **State Title IV-A Agency.**

In New York State, all potentially employable recipients are matched with an employee file from the Department of Labor. Since these recipients and their resources are carried on a single eligibility file, a data exchange is not needed.

433.138(d)(4)(i) **State Worker's Compensation.**

A match with Worker's Compensation is performed on an annual basis.

433.138(d)(4)(ii) **Department of Motor Vehicle Accident File.**

This is conducted on an annual basis.

433.138(e) **Diagnosis and Trauma Code Edit**

The Department uses diagnosis and trauma codes and provider entered accident indicator codes on a monthly basis to determine the legal liability of third parties.
Follow-up Requirements

433.138(g)(1)(i) SWICA, SSA Wage and Earning Files and Title IV-A Data Exchanges.

Districts are required to follow-up on information obtained during initial application and redetermination so that it can be used for claims processing and/or recoveries within 60 days of the district first becoming aware of it.

433.138(g)(2)(i) Health Insurance Information and Worker’s Compensation.

The Department has issued an Administrative Directive to all local district eligibility and Third Party Workers that establishes procedures for identifying third party resources and requires entering the information on the data base within 60 days so it can be used for claims processing.

433.138(d)(4)(ii) Department of Motor Vehicle.

If the match identifies a Medicaid recipient who was involved in an auto accident, a questionnaire is sent to the recipient to determine if any medical services were necessary as a result of the accident. Questions are also asked about insurance coverage.

If a positive response is received, it is sent to the local district which has fiscal responsibility for the recipient. The local district is instructed to investigate the potential liability and pursue recoveries when necessary. If medical services are still being provided as a result of the accident, the coverage is added to MMIS to affect claims processing.

433.138(e) Diagnosis and Trauma Code Follow-up.

The Department has been editing claims using diagnosis and trauma codes as well as provider entered accident indicator codes since MMIS was implemented. Through this experience, which has included extensive analysis by local district staff, the Department has developed an efficient program to pursue potential liability for accident/casualty cases.
433.138(e) **Diagnosis and Trauma Code Follow-up** (cont.)

On a monthly basis, claims that meet the criteria using trauma diagnosis codes and accident indicators are selected and are used to generate questionnaires to both the recipient and the medical provider for further information concerning the accident. If the questionnaires are not returned, a follow-up letter is sent to the provider and/or recipient. If either questionnaire is returned indicating the potential for a third party to pay for medical expenses, the questionnaire is forwarded to the local district that has fiscal responsibility for the recipient. After the local district has investigated the potential resource a lien is filed if a third party is found to be liable. In any event the Department is to be notified of the outcome of the local district investigation.

The information will only be added to the data base where a provision for medical coverage is involved and it is expected that the recipient will require additional medical services past the date of accident.
New York

1. **Providers Compliance with 433.139(b)(3)(ii)(C).**

Compliance with these billing requirements is determined through third party edits in MMIS. If the Medicaid recipient is covered by insurance that is furnished through medical support enforcement carried out by the State IV-D agency, the claim is denied if the specific medical service is covered by the insurance and the provider fails to indicate that the third party was billed by making a positive entry in the other insurance payment field on the claim form.

2&3. **Threshold Amount 433.139(F)(2) and (3).**

New York State will continue to pursue third party reimbursement through cost avoidance in the first instance by requiring providers to pursue third party resources prior to submitting claims to Medicaid. However, upon discovering insurance which was previously unknown or not utilized, the State will elect not to pursue any potential recovery below threshold amounts periodically established to represent a cost effective return for particular classes of cases. Claims may be accumulated for a period not to exceed two years, for purposes of recovery.

Specific exceptions to this policy include but are not restricted to the following:

- Where accumulated amounts of claims per individual, carrier or provider provide a cost effective basis to submit claims for reimbursement.

- The deterrent effect of recovery is felt to outweigh the administrative cost of claims submission.

- Special audit situations which warrant a recovery based on the specific merits of the case.

- Technological advances which allow computer techniques to be utilized to provide an efficient submission procedure.

<tbody>
<tr>
<td>1906 of the Act</td>
<td>State Method on Cost Effectiveness of Employer-Based Group Health Plans</td>
</tr>
</tbody>
</table>

The determination of cost benefit for any health insurance policy is an evaluation of many varied but interrelated criteria. It is difficult to establish exact guidelines for cost benefit determinations that can be applied uniformly in all cases. Unless a person is already in poor health, whenever insurance is purchased a risk is taken as to whether or not health expenses will be incurred. Therefore, cost benefit determinations must be made on an individual basis after the local district or Department of Health staff obtain information about the insurance policy and the individual applying for the premium payment. If the average Medicaid payment is known for certain demographics (e.g., sex, age, location), cost effectiveness for paying the premium can be easily determined by comparing that cost to the cost of a premium for the same demographics.

Please note that for some cases, even after reviewing these criteria, the determination to pay for a health insurance policy may still be unclear. In these cases, the final decision will rest solely on the judgement of local district or Department of Health staff.

The following points should be considered at the time of determination and redetermination for coverage provided through employer-based group health plans.

1. Assess the types of medical services covered by the health insurance policies.

2. Has there been a high utilization of medical services by the applicant/recipient (A/R)? Request the applicant/recipient to bring to the interview all medical bills (paid and unpaid), statements of insurance benefit payments and premium notice for the past year. Determine the total amount paid by all parties for the medical services.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

3. Can the past utilization of medical expenses be expected to continue or increase?

During the interview, inquire if any acute or chronic medical conditions exist. If so, does the condition require or could it potentially require extensive medical services? Will these potential expenses be covered by the policy?

4. Does a situation exist which warrants maintaining the policy even though there is no history of high medical utilization.

Due to the client’s age or a pre-existing condition, is it reasonable to assume that the client may not be able to obtain another policy in the future or that a pre-existing condition would not be covered by a new policy for a period where medical utilization may be expected?

5. For policies in force, what are the maximum benefit levels of the policy?

- Have the maximum benefit levels been met, rendering the A/R ineligible for benefits?
- If so, is the maximum benefit recurring? Will it be reinstated on an annual basis, at the end of a specific benefit period, or does it apply separately to unrelated injuries, sicknesses, and/or conditions?
- If there will be benefits or recurring benefits that will pertain to the A/R’s potential medical expenses, how do these benefits compare to the cost of the premium?

6. Review the number of dependents in a family. In general, the larger the family, the more cost beneficial it is to purchase family coverage.

7. Compare the cost of premium to the cost of all medical services received by the applicant/recipient in the previous year (see #2). Using this comparison and the other factors related to anticipated future utilization (3 through 6) decide whether or not it is cost beneficial to maintain the policy. That is, does the cost of the premium payment and cost-sharing amounts appear likely to be less than Medicaid expenditures for an equivalent set of services?

NOTE: For those districts that use the [Health Insurance Automated Decision Tree] “Health Insurance Cost Appraisal Program (HICAP)” make sure that the premium payment used in the calculation is the Medicaid portion of the premium payment.

STATE LAWS REQUIRING THIRD PARTIES TO PROVIDE COVERAGE ELIGIBILITY AND CLAIMS DATA

1902(A)(25)(I) The State has in effect laws that require third parties to comply with the provisions, including those which require third parties to provide the State with coverage, eligibility and claims data, of 1902(a)(25)(I) of the Social Security Act.
**Citation**

1902(y)(1), 1902(y)(2)(A), and Section 1902(y)(3) of the Act

(P.L. 101-508, Section 4755(a)(2))

**Sanctions for Psychiatric Hospitals**

(a) The State assures that the requirements of section 1902(y)(1), section 1902(y)(2)(A), and section 1902(y)(3) of the Act are met concerning sanctions for psychiatric hospitals that do not meet the requirements of participation when the hospital's deficiencies immediately jeopardize the health and safety of its patients or do not immediately jeopardize the health and safety of its patients.

(b) The State terminates the hospital's participation under the State plan when the State determines that the hospital does not meet the requirements for a psychiatric hospital and further finds that the hospital's deficiencies immediately jeopardize the health and safety of its patients.

(c) When the State determines that the hospital does not meet the requirements for a psychiatric hospital and further finds that the hospital's deficiencies do not immediately jeopardize the health and safety of its patients, the State may:

1. terminate the hospital's participation under the State plan; or
2. provide that no payment will be made under the State plan with respect to any individual admitted to such hospital after the effective date of the finding; or
3. terminate the hospital's participation under the State plan and provide that no payment will be made under the State plan with respect to any individual admitted to such hospital after the effective date of the finding.

(d) When the psychiatric hospital described in (c) above has not complied with the requirements for a psychiatric hospital within 3 months after the date the hospital is found to be out of compliance with such requirements, the State shall provide that no payment will be made under the State plan with respect to any individual admitted to such hospital after the end of such 3-month period.

METHOD FOR ISSUANCE OF MEDICAID ELIGIBILITY CARDS TO HOMELESS INDIVIDUALS

New York will mail an ID card to any address indicated by the otherwise eligible client. This includes Post Office boxes as well as residential addresses or other addresses of convenience.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

REQUIREMENTS FOR ADVANCE DIRECTIVES UNDER STATE PLANS FOR MEDICAL ASSISTANCE

The following is a written description of the law of the State (whether statutory or as recognized by the courts of the State) concerning advance directives. If applicable States should include definitions of living will, durable power of attorney for health care, durable power of attorney, witness requirements, special State limitations on living will declarations, proxy designation, process information and State forms, and identify whether State law allows for a health care provider or agent of the provider to object to the implementation of advance directives on the basis of conscience.

Established by Chapter 752 of the Laws of 1990 by adding Article 29-c of the Public Health Law. Establishes in statute the right of a competent adult to appoint a health care agent to make decisions about healthcare treatment for the adult in the event the adult no longer has the capacity to make such decisions.

The law confers no new rights regarding the provision or rejection of any specific health care treatment and affirms existing laws and policies which limit individual conduct, including those laws and policies against homicide, suicide, assisted suicide and mercy killing.

The following are definitions that are applicable:

“Adult” means any person who is eighteen years of age or older, or is the parent of a child, or has married.

“Capacity to make health care decisions” means the ability to understand and appreciate the nature and consequences of health care decisions, including the benefits and risks of and alternatives to any proposed health care, and to reach an informed decision.

“Health Care” means any treatment, service or procedure to diagnose or treat an individual's physical or mental condition.

“Health Care Agent” or “Agent” means an adult to whom authority to make health care decisions is delegated under a health care proxy.

“Health Care Decision” means any decision to consent or refuse to consent to health care.

“Health Care Proxy” means a document delegating the authority to make health care decisions, executed in accordance with the requirements of this law.

Appointment of Temporary Management (Alternative)

New York State provides under §2806-b of the Public Health Law pertaining to caretakers and §2810 of the Public Health Law pertaining to receivers, for management of a facility to assure resident health and safety and an orderly closure or correction of requirements. These receivers and caretakers must pass a character and competence review.

The caretaker/receiver remedy described above is being submitted as an alternative remedy. It is more stringent than OBRA '87 requirements for facilities with care problems so serious as to warrant new management imposed by the state and that control not be returned to the same operator. Our experience has demonstrated great success in gaining court support for the appointment of caretakers or receivers under our current provisions. In instances of immediate jeopardy, §2806-b(c) calls for the caretaker to be appointed under the provisions specified in §2810(2). This procedure allows the state's request for a caretaker appointment to be before a Supreme Court judge 5 days after notice of the caretaker action is given to the provider. The notice is given immediately upon the state decision that a caretaker is necessary.

Over the last 10 years, 25 facilities have had receivers utilized on a voluntary or involuntary basis to resolve care issues.

In Emergency Cases, Closure of Facility and/or Transfer of Residents

Section 2806 of the Public Health Law gives the Commissioner the authority to revoke or suspend a facility’s operating certificate and/or transfer residents. Rather than subject residents to unnecessary transfer, Section 2806-b of the Public Health Law is utilized to seek emergency appointment by a court of a caretaker on a temporary basis, to protect the interests of the residents while legal action is taken to revoke the operating certificate of the facility and place the facility in receivership and ultimately under a new operator.

Enforcement of Compliance for Nursing Facilities

Additional Remedies: Describe the criteria (as required at §1919(h)(2)(A) for applying the additional remedy. Include the enforcement category in which the remedy will be imposed (i.e., category 1, category 2, category 3 as described as 42 CFR 488.408).

STATE CIVIL MONEY PENALTIES IMPOSED AS A CATEGORY 2 ENFORCEMENT REMEDY

New York provides under Section 12 of the Public Health law a civil money penalty system which allows fining facilities for each occurrence of a deficiency. A facility may be fined up to $2,000 for the one time occurrence of any violation of state requirements even if that violation has been corrected. It provides us with the flexibility to evaluate the deficiencies cited, to determine the existence of poor performing facilities, and to fine or not to fine a facility which has corrected the deficiencies, based on the severity and repetitiveness of the violation. Any facility with deficiencies identified with a scope and severity in box (D-L) on the remedy grid will be screened to determine whether a fine will be recommended. Effective October 1, 1990, 10 NYCRR Part 415 was revised and mirrors 42 CFR Part 483 of the federal nursing home requirements in most areas exceeding requirements in some sections. Since the requirements are analogous, compliance with state regulations that might be achieved as a result of utilizing this remedy should also result in a comparable outcome related to the federal requirements also.

State fines will be assessed at a higher level for facilities identified at subsequent surveys with repetitive violations as an incentive to maintain compliance. In some cases a portion of the state fine may be suspended contingent on maintaining compliance with selected regulatory groupings for a specified period of time. Failure to comply with that provision would result in the collection of the suspended fine as well as assuming a new fine for those violations.

This remedy encourages facilities not to allow deficiencies to recur and discourages initial deficiencies, as facilities understand that they cannot allow deficiencies to occur and avoid a penalty by correction within 30 days.

Funds collected by the state from imposition of a penalty are not applied to maintain operation of a facility pending correction or closure or to costs of relocation or to lost resident funds. Facilities in such a situation are monitored by the state to assure that operations are maintained. The Department requires operator(s) to provide a final account of residents’ monies. In addition, Public Health Law Section 2810(3) provides a mechanism for non-interest bearing payments to receivers who take over deficient facilities. The receiver must repay such loans.

State Plan Under Title XIX of the Social Security Act

DEFINITION OF SPECIALIZED SERVICES

1) For mental illness, specialized services means the services specified by the State which [combined with services provided by the NF], result[s] in [the continuous and aggressive implementation of] an individualized plan of care that demands hospitalization.

The care plan must require one or more of the following:

a. [Is developed and supervised by an interdisciplinary team, which includes a physician, qualified mental health professionals, and, as appropriate, other professionals.] Hospital level assessment or diagnosis of recent behavioral change;

b. [Prescribes specific therapies and activities for the treatment of persons experiencing an acute episode of serious mental illness, which necessitates supervision by trained mental health personnel; and] Intensive observation, protection, assistance, or supervision from the professional staff of a hospital;

c. [Is directed toward diagnosing and reducing the resident’s behavioral symptoms that necessitated institutionalization, improving his or her level of independent functioning, and achieving a functioning level that permits reduction in the intensity of mental health services to below the level of specialized services at the earliest possible time]. Introduction or change in medication or other somatic treatment that needs frequent round the clock monitoring by professional staff.

The plan must be developed and supervised by an interdisciplinary team which includes a physician, qualified mental health professional and, as appropriate, other professionals.

The plan must be directed toward diagnosing and reducing the resident’s behavioral symptoms that necessitated hospitalization, so as to improve his or her independent functioning to a level that permits reduction in the intensity of mental health services to below the level of specialized services at the earliest possible time.

2) For mental retardation, specialized services means the services specified by the State which, combined with services provided by the NF or other service providers, results in treatment which meets the requirements of Section 483.440(a)(1).
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

CATEGORICAL DETERMINATIONS

Categories for which the State Mental health or mental retardation authority may make an advance group determination that Nursing Facility (NF) services are needed are:

1) **Convalescent care from an acute physical illness which:**
   
   (i) Required hospitalization; and
   
   (ii) Does not meet all the criteria for an exempt hospital discharge, which is not subject to preadmission screening as specified in Section 483.106(b)(2).

2) **Terminal illness**, as defined for hospice purposes in Section 418.3 of this chapter.

3) **Severe physical illness** such as coma, ventilator dependence, functioning at a brain stem level, or diagnoses such as chronic obstructive pulmonary disease, Parkinson’s disease, Huntington’s disease, amyotrophic lateral sclerosis, and congestive heart failure which result in a level of impairment so severe that the individual could not be expected to benefit from specialized services.

4) **Very brief and finite stays** of up to a fixed number of days to provide respite to in-home caregivers to whom the individual with Mental Illness (MI) or Mental Retardation (MR) is expected to return following the brief NF stay.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

ELIGIBILITY CONDITIONS AND REQUIREMENTS

Survey and Certification Education Program

The State has in effect the following survey and certification periodic educational program for the staff and residents (and their representatives) of nursing facilities in order to present current regulations, procedures, and policies.

- Health Facility Memorandums – The Health Department's medium for issuing items in the New York State Official Compilation of Codes, Rules and Regulations, and written information on policy and procedures of concern to certified health facilities.

- Bureau of Long Term Care Staff conduct seminars and training for facility providers.

- The Health Department contracts with private vendors to present programs to providers.

- The survey process includes surveyors meeting with the facility's resident council.

- Ongoing communication occurs between the Bureau of Long Term Care and the State Ombudsman Office.

- Bureau of Long Term Care Staff meet with the provider associations regarding specific issues on policies and regulations.

- Bureau of Long Term Care Staff are available by telephone to answer specific provider questions.
The State has in effect the following process for the receipt and timely review and investigation of allegations of neglect and abuse and misappropriation of resident property by a nurse aide or a resident in a nursing facility or by another individual used by the facility in providing services to such a resident.

See Supplement 1A
Complaint Program Overview

The Department maintains a Patient Abuse Investigation program for investigation of complaints of physical abuse, mistreatment, and neglect. A General Complaint program is maintained for the investigation of complaints involving systemic problems in RHCFs. Complaints involving misappropriation of resident funds are investigated under the General Complaint Program.

The patient abuse reporting legislation was enacted to protect Residential Health Care Facility (RHCF) patients from abuse. The original statute became effective on September 1, 1977, and mandated the immediate reporting of RHCF patient abuse, mistreatment or neglect by certain licensed health care professionals and encouraged reports from all sources.

On September 1, 1980, the statute was amended to require all RHCF employees and licensed health care personnel to make such reports.

The administration of the patient abuse reporting program is the responsibility of the Office of Health Systems Management's Bureau of Long Term Care Services. Following is a brief overview of the administrative procedures associated with the program.

- Reports may be made anytime, night or day, via the Office of Health Systems Management’s Hotline. The telephone number for each Office of Health Systems Management Area Office is displayed on the Hotline poster in every RHCF. An emergency contact number for evenings, weekends and holidays (518-445-9989) is also listed. Collect calls are accepted on all numbers.

- Each report to the Office of Health Systems Management is referred to the Deputy Attorney General for Medicaid Fraud Control for possible criminal investigation and to the Local District Attorney if a prior request for such information has been made by the District Attorney. Thirteen (13) such referral arrangements are currently honored. (August 1994)

- Each report is investigated on-site by Office of Health Systems Management Staff within 48 hours. A full investigation is conducted. This may include multiple visits to the residential health care facility, interviews of all involved, and a review of pertinent facility and patient records.

- The investigation results are compiled by the Office of Health Systems Management’s Area Offices and forwarded to the Commissioner of Health’s Designee for review.
The Commissioner of Health’s Designee renders a findings that either sustains the allegation of abuse or finds the allegation unsustained. If the allegation is unsustained, all records related to the report are expunged in accordance with the statute and the accused, the facility administrator and all officials previously contacted are notified of the determination. If an allegation is sustained, the accused is notified by certified mail that he/she may request a fair hearing and that as a result of the sustained finding he/she may be liable for a fine up to $2,000. The administrator of the facility is also notified of the sustained finding.

The request for a fair hearing must be made in writing within 30 days of receipt of the finding of the Commissioner of Health’s Designee. All fair hearings are scheduled and conducted by the Department of Health’s Division of Legal Affairs. The purpose of the hearing is to determine whether the record of the report of the written determination of the sustained finding should be amended or expunged on the grounds that the record is inaccurate or the determination is not supported by the evidence. The burden of proof in such a hearing is on the Office of Health Systems Management. The hearing will determine whether or not the sustained finding will be upheld, and if so, whether or not a fine is to be assessed. In the case of a licensed person, a referral will be made to the appropriate licensing board, and in the case of a certified nurse aide, a referral would be made to the RHCF Nurse Aide Registry.

10NYCRR 415.26j requires RHCFs to establish and implement policies and procedures for the receipt, review and investigation of allegations of misappropriation of resident property by the individuals in the employ of and/or whose services are utilized by the facility. This is to be done regardless of the monetary value of the property.

An investigation is required to be made no later than 48 hours after the receipt of the allegation. The facility must maintain a log regarding the receipt, review, investigation, and disposition of every allegation including the name of the complainant and resident, a description of the personal property involved, and the staff designated to conduct the review and investigation.

Under the General Complaint program, the Department investigates complaints of inadequate response by RHCFs to allegations of misappropriation of resident property. These complaints may be made to the Office of Health Systems Management Hotline as indicated above.
• The RHCF is required to notify the resident and complainant in writing as to the findings upon disposition of the allegation and to notify the appropriate police agency when the results of the investigation indicate that there is reasonable cause to believe that a resident’s personal property valued at more than two hundred fifty dollars has been misappropriated. The RHCF may elect to make such notification when the personal property is valued at less than that amount.

• The RHCF is required to monitor all such referrals at least quarterly and to notify the New York State Department of Health within 72 hours of receipt of notice that such referral resulted in the conviction of an individual who was involved in the misappropriation of resident property.

• Upon receipt of notice of a conviction involving misappropriation of resident property by a nurse aide, the Department provides the individual with an opportunity to dispute the allegations and conviction. Report is then made to the New York State Nurse Aide Registry.

• Upon of receipt of notice of a conviction involving misappropriation of resident property involving a licensed professional, a referral is made to the appropriate licensing authority. The licensing authority takes appropriate action after satisfying the individual’s due process rights.

• When a referral to the Registry is made of a sustained finding of physical abuse, mistreatment or neglect, or a conviction for misappropriation of resident property, the individual is given an opportunity to provide a brief statement, not exceeding 150 words, disputing the findings provided that this does not name any residents or the complainant.
Upon receipt of a written request, the New York State RHCF Nurse Aide Registry provides the following information:

Verification that an individual is a certified nurse aide,

The certification number,

The date of certification/recertification,

Copies of any final findings of resident abuse, mistreatment or neglect by a nurse aide and any statement from the nurse aid disputing the findings.

A report of a criminal conviction for resident abuse, mistreatment, neglect or misappropriation of resident property and the date of conviction.

This information is also available by telephone to RHCFs, nurse aide agencies/employment organizations, and nurse aide registries maintained by other states.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

ELIGIBILITY CONDITIONS AND REQUIREMENTS

Procedures for Scheduling and Conduct of Standard Surveys

The State has in effect the following procedures for the scheduling and conduct of standard surveys to assure that it has taken all reasonable steps to avoid giving notice.

New York State utilizes the flexible survey schedule which assigns nursing home surveys on a variable interval basis according to facility performance. Poor facilities are surveyed more often, whereas good facilities are surveyed less often. Facilities are surveyed in accordance with the Federal Surveillance process at 6-10 month, 10-13 month and 12-15 month intervals. These wide intervals makes it difficult for nursing homes to predict a general survey date, thus enabling the State to conduct surveys on a surprise basis. The flexible survey schedule ensures the average survey cycle is no more than twelve months.
The State has in effect the following programs to measure and reduce inconsistency in the application of survey results among surveyors.

The Bureau of Long Term Care Services evaluates and fosters statewide consistency of the surveillance process. Area Office surveyors are trained to consistently apply federal decision making criteria contained in TASK 6 of Appendix P, Survey Protocol for Long Term Care Facilities. Statements of deficiencies are routinely reviewed by Area Office supervisory staff.

The Central Office Quality Improvement Unit reviews Statements of Deficiencies to ensure statewide uniformity. Area Office Long Term Care Program Directors are informed verbally and in writing of the results of these reviews.

Quality Improvement staff also conduct onsite reviews of the surveillance process. Surveyors performance in regard to consistent application of the survey process is evaluated and feedback is provided to individuals and supervisors.

The Bureau of Long Term Care Services staff respond to code interpretation and surveillance questions from the area offices. These questions and answers are sent to all offices to ensure consistency of code interpretation and application of the survey process.

Various improvement measures to foster consistency are in effect including regularly scheduled meetings with Long Term Care Program Directors from the 6 area offices and workgroups of surveillance staff who are participating in the development of tools to measure and reduce inconsistencies.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

ELIGIBILITY CONDITIONS AND REQUIREMENTS

Process for Investigations of Complaints and Monitoring

The State has in effect the following process for investigating complaints of violations of requirements by nursing facilities and monitors onsite on a regular, as needed basis, a nursing facility's compliance with the requirements of subsection (b), (c), and (d) for the following reasons:

(i) the facility has been found not to be in compliance with such requirements and is in the process of correcting deficiencies to achieve such compliance;

(ii) the facility was previously found not to be in compliance with such requirements and has corrected deficiencies to achieve such compliance, and verification of continued compliance is indicated; or

(iii) the State has reason to question the compliance of the facility with such requirements.

Complaints received by the Area Offices are screened by the Long Term Care Program Director and Team Leader. Based on severity, the complaint is categorized as a 340 (patient abuse or neglect) or a general complaint. If the complaint is determined to be a 340, it is investigated within 48 hours. (See Supplement 1A). General complaints may result in an onsite visit or be investigated at the next surveillance visit. The substance of the general complaint will determine when the onsite visit is completed.

Based on the type, number and severity of the complaints received, the Area Office may conduct a focus survey to determine the facility's compliance with the regulations. Monitoring visits may also be conducted to ensure the facility is progressing toward compliance. In addition, prior to the recertification survey all complaints are reviewed in order for surveyors to investigate and determine compliance with all applicable regulations.

(1) **Definitions.**

(A) An “entity” includes a governmental agency, organization, unit, corporation, partnership, or other business arrangement (including any Medicaid managed care organization, irrespective of the form of business structure or arrangement by which it exists), whether for-profit or not-for-profit, which receives or makes payments, under a State Plan approved under title XIX or under any waiver of such plan, totaling at least $5,000,000 annually.

If an entity furnishes items or services at more than a single location or under more than one contractual or other payment arrangement, the provisions of section 1902(a)(68) apply if the aggregate payments to that entity meet the $5,000,000 annual threshold. This applies whether the entity submits claims for payments using one or more provider identification or tax identification numbers.

A governmental component providing Medicaid health care items or services for which Medicaid payments are made would qualify as an “entity” (e.g., a state mental...
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

health facility or school district providing school-based health services). A government agency which merely administers the Medicaid program, in whole or part (e.g., managing the claims processing system or determining beneficiary eligibility), is not, for these purposes, considered to be an entity.

An entity will have met the $5,000,000 annual threshold as of January 1, 2007, if it received or made payments in that amount in Federal fiscal year 2006. Future determinations regarding an entity's responsibility stemming from the requirements of section 1902(a)(68) will be made by January 1 of each subsequent year, based upon the amount of payments an entity either received or made under the State Plan during the preceding Federal fiscal year.

(B) An “employee” includes any officer or employee of the entity.

(C) A “contractor” or “agent” includes any contractor, subcontractor, agent, or other person which or who, on behalf of the entity, furnishes, or otherwise authorizes the furnishing of, Medicaid health care items or services, performs billing or coding functions, or is involved in the monitoring of health care provided by the entity.

(2) The entity must establish and disseminate written policies which must also be adopted by its contractors or agents. Written policies may be on paper or in electronic form, but must be readily available to all employees, contractors, or agents. The entity needs not create an employee handbook if none already exists.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

(3) An entity shall establish written policies for all employees (including management), and of any contractor or agent of the entity, that include detailed information about the False Claims Act and the other provisions named in section 1902(a)(68)(A). The entity shall include in those written policies detailed information about the entity’s policies and procedures for detecting and preventing waste, fraud, and abuse. The entity shall also include in any employee handbook a specific discussion of the laws described in the written policies, the rights of employees to be protected as whistleblowers and a specific discussion of the entity’s policies and procedures for detecting and preventing fraud, waste, and abuse.

(4) The requirements of this law should be incorporated into each State’s provider enrollment agreements.

(5) The State will implement this State Plan amendment on 01/01/07 (date).

(b) ATTACHMENT 4.42-A describes, in accordance with section 1902(a)(68) of the Act, the methodology of compliance oversight and the frequency with which the State will re-assess compliance on an ongoing basis.
New York

Oversight will primarily be the responsibility of the Office of the Medicaid Inspector General, which will incorporate criteria to address these mandates into its periodic audits and investigations.

Under proposed regulatory provisions, each covered provider and entity, as defined in section 4.42(a)(1)(A) above, shall be required to submit to the Office of the Medicaid Inspector General on or before October 1, 2007, and on or before January 1, every year thereafter, a certification that it maintains the written policies, and any employee handbook, required under the above mandates and that they have been properly adopted and published by the provider entity, and disseminated among employees, contractors and agents. The written policies and any employee handbook shall be retained for a period of six years from the latter of the due date or the actual date of submission of the certification.

The Office of the Medicaid Inspector General will review the certifications of the entity, and will also review the written policies and any employee handbook maintained by the entity during audits, for compliance with the Social Security Act, and any additional requirements of which entities are notified. Failure to timely submit the required certifications, or to bring the written policies and any employee handbook into compliance upon reasonable notice from the Medicaid Inspector General, may be considered an unacceptable practice and subject the entity to sanctions and/or penalties. CMS may, at its discretion, independently determine compliance through audits of entities or other means.

In addition, the Medicaid Inspector General will request participation from other state agencies responsible for regulatory oversight and will strongly recommend inclusion of this periodic review during such agencies’ routine audits and investigations. These agencies will include:

Department of Law: Medicaid Fraud Control Unit
Office of Mental Health
Department of Health: Offices of Health Systems Management, Professional Medicaid Conduct
State Education Department: Office of Professions
Office of Alcoholism and Substance Abuse Services
Office of Mental Retardation and Developmental Disabilities

附录4.42-A

新1

监督主要由医疗补助检查总署承担，该署将把上述要求合并到其定期审计和调查中。

根据提议的监管条款，每个被覆盖的提供商及实体，如之前在4.42(a)(1)(A)节规定的，应在2007年10月1日和每年1月1日前向医疗补助检查总署提交认证，确认其拥有并发布上述要求的书面政策及员工手册，并将其分发给工作人员、承包商和代理。上述政策及手册应保存六年。

医疗补助检查总署将审查实体的认证，以及实体的上述政策及手册，在审计期间也会审查。如果未能及时提交认证，或在合理通知后未能将上述政策及手册带入符合上述要求的状态，可能被视为不可接受的行为，并可能受到处罚。

此外，医疗补助检查总署将要求其他有监管职责的州级机构参与，强烈推荐在他们所负责的常规审计和调查中包含上述审计。

这些机构包括：

法律部：医疗补助欺诈控制部
卫生部：卫生系统管理办公室、专业医疗补助行为
教育厅：职业办公室
酒精与药物滥用部
精神障碍及发展性障碍部

STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

NONDISCRIMINATION ON THE BASIS OF HANDICAP

METHODS OF ADMINISTRATION

1. The Affirmative Action Officer of the New York State Department of Social Services is primarily responsible for insuring compliance with the 45 CFR Part 84 Non-discrimination on the Basis of Handicap Regulations and Section 504 of the Rehabilitation Act of 1973 throughout the Department itself and for all agencies, institutions, organizations and vendors which provide services or benefits. The Bureau of Local Agency Manpower is responsible for compliance with the regulations for the fifty-eight local social service districts.

2. (a) The New York State Department of Social Services has issued a memorandum to all Department employees regarding the regulations. In addition the regulations will be included in the orientation program for all new employees.

(b) The Department has issued an Administrative Directive to all local social service districts informing them of the provisions of the regulations and instructing them to notify all agencies, institutions, organization vendors which provide services as well as instruct them to file the Assurance of Compliance if they haven’t done so. In addition the Directive instructs local service districts to inform all applicants and recipients for any of the programs they administer of the provisions of the regulations.

(c) The Department has published a display advertisement in a number of newspapers throughout the State indicating that the Department complies with the provisions of the regulations.

3. (a) The Affirmative Action Officer will conduct regular reviews of Department practices and policies to assure the individual is being discriminated against on the handicap.

(b) The Bureau of Local Agency Manpower will conduct reviews of the local social service districts to insure that they are complying with the provisions of the regulations both in employability and equal availability services.
