[STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT
MEDICAL ASSISTANCE PROGRAM]

Citation
45 CFR
Part 201
AT-76-141

As a condition for receipt of Federal funds under title XIX of the Social Security Act, the New York State Department of Health (single state agency)

submits the following State plan for the medical assistance program, and hereby agrees to administer the program in accordance with the provisions of this State plan, the requirements of titles XI and XIX of the Act, and all applicable Federal regulations and other official issuances of the Department.]

TN #13-0056 Approval Date October 24, 2014
Supersedes TN #96-0033 Effective Date January 1, 2014
[SECTION 1  SINGLE STATE AGENCY ORGANIZATION]

Citation
42 CFR 431.10
AT-79-29

1.1 Designation and Authority

(a) The New York State Department of Health is the single State agency designated to administer or supervise the administration of the Medicaid program under title XIX of the Social Security Act. (All references in this plan to “the Medicaid agency” mean the agency named in this paragraph.)

ATTACHMENT 1.1-A is a certification signed by the State Attorney General identifying the single State agency and citing the legal authority under which it administers or supervises administration of the program.]
The State agency that administered or supervised the administration of the plan approved under Title X of the Act as of January 1, 1965, has been separately designated to administer or supervise the administration of that part of this plan which relates to blind individuals.

[X] Yes. The State Agency so Designated is: Commission for the Blind and Visually Handicapped.

This agency has a separate plan covering that portion of the State Plan under Title XIX for which it is responsible.

[ ] Not applicable. The entire plan under Title XIX is administered or supervised by State agency named in paragraph 1.1(a).]
Waivers of the single State agency requirement which are currently operative have been granted under authority of the Intergovernmental Cooperation Act of 1968.

[X] Yes. ATTACHMENT 1.1-B describes these waivers and the approved alternative organizational arrangements.

[ ] Not applicable. Waivers are no longer in effect.

[ ] Not applicable. No waivers have ever been granted.
[Citation]
42 CFR 431.10
AT-79-29

[X] The agency named in paragraph 1.1(a) has responsibility for all determinations of eligibility for Medicaid under this Plan.

[ ] Determinations of eligibility for Medicaid under this plan are made by the agency(ies) specified in Attachment 2.2-A. There is a written agreement between the agency named in paragraph 1.1(a) and other agency(ies) making such determinations for specific groups covered under this plan. The agreement defines the relationships and respective responsibilities of the agencies.]
NOTE: Page deleted under approved SPA 13-0056-MM4
Approved Date: 10/24/2014 Effective Date: 01/01/2014
Refer to Attachment 1.1-A (PDF A1) Section

[Citation
42 CFR 431.10
AT-79-29

1.1(e) All other provisions of this plan are administered by the Medicaid agency except for those functions for which final authority has been granted to a Professional Standards Review Organization under title XI of the Act.

(f) All other requirements of 42 CFR 431.10 are met.]
1.2 Organization for Administration

(a) Attachment 1.2-A contains a description of the organization and functions of the Medicaid agency and an organization chart of the agency.

(b) Within the State agency, the Office of Medicaid Management has been designated as the medical assistance unit. Attachment 1.2-B contains a description of the organization and functions of the medical assistance unit and an organizational chart of the unit.

(c) Attachment 1.2-C contains a description of the kinds and numbers of professional medical personnel and supporting staff used in the administration of the plan and their responsibilities.

(d) Eligibility determinations are made by the State or local staff of an agency other than the agency named in paragraph 1.1(a). Attachment 1.2-D contains a description of the staff designated to make such determinations and the functions they will perform.

[x] Not applicable. Only staff of the agency named in paragraph 1.1(a) make such determinations.
### Statewide Operation

The plan is in operation on a Statewide basis in accordance with all requirements of 42 CFR 431.50.

- [x] The plan is State administered.
- [x] The plan is administered by the political subdivisions of the State and is mandatory on them.

**Effective Date** January 1, 2014
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

Tribal Consultation Requirements
Section 1902(a)(73) of the Social Security Act (the Act) requires a State in which one or more Indian Health Programs or Urban Indian Organizations furnish health care services to establish a process for the State Medicaid agency to seek advice on a regular, ongoing basis from designees of Indian health programs, whether operated by the Indian Health Service (IHS), Tribes or Tribal organizations under the Indian Self-Determination and Education Assistance Act (ISDEAA), or Urban Indian Organizations under the Indian Health Care Improvement Act (IHCIA). Section 2107(e)(I) of the Act was also amended to apply these requirements to the Children’s Health Insurance Program (CHIP). Consultation is required concerning Medicaid and CHIP matters having a direct impact on Indian health programs and Urban Indian organizations.

Please describe the process the State uses to seek advice on a regular, ongoing basis from federally-recognized tribes, Indian Health Programs and Urban Indian Organizations on matters related to Medicaid and CHIP programs and for consultation on State Plan Amendments, waiver proposals, waiver extensions, waiver amendments, waiver renewals and proposals for demonstration projects prior to submission to CMS. Please include information about the frequency, inclusiveness and process for seeking such advice.

Please describe the consultation process that occurred specifically for the development and submission of this State Plan Amendment, when it occurred and who was involved.

Tribal Consultation Process
For changes to the State’s Medicaid Plan (Plan) that require a State Plan Amendment (SPA), Indian nation leaders and health clinic administrators and Urban Indian Organization leaders and health department administrators will be sent a letter altering that a new tribal consultation has been posted. This notification will be accompanied by summaries of each proposed amendment, an offer of availability of State staff to meet with respective Indian leaders in person upon request made within two weeks of the date of the notification, and also a weblink to the Department of Health website where you may also view the draft plan pages and Federal Public Notice for each proposal. Tribal consultations will be sent at least two weeks prior to submitting a SPA to CMS for approval, allowing for a two-week comment period. [copy of the Federal Public Notice related to a particular SPA, along with a cover letter offering the availability of State staff to meet with respective Indian leaders in person upon requests made within two weeks of the date of notification. A least two weeks’ prior to submitting a SPA to CMS for approval, a draft copy of the proposed amendment will be forwarded to the above Indian representatives, allowing for a two-week comment period.] Indian health clinic administrators will be notified via e-mail, and all other Indian representatives will be notified via U.S. Postal Service.

TN #17-0065 Approval Date 03/12/2018
Supersedes TN #13-0056 Effective Date 12/01/2017
For Medicaid policy changes that do not require a SPA, a draft copy of the Administrative Directive related to the change will be forwarded to Indian representatives, as outlined above, for a two-week comment period. A State contact person will be identified for each draft directive.

Written notification of the State’s intent to submit proposals for demonstration projects or new applications, amendments, extension requests or renewals for waivers that have an impact on Indians, Indian health providers or Urban Indian Organizations will be made to Indian representatives, as identified above, at least 60 days prior to the publication and submission of such. Indian health clinic administrators will be notified via e-mail, and all other Indian representatives will be notified via U.S. Postal Service.

**Tribal Consultation Process Development**

State representatives attended the 2011 Department of Health and Human Services (HHS) Annual Regional Tribal Consultation Session held on March 29, 2011. At that meeting, State staff distributed and discussed the draft Federal Public Notice which contained a summary description of the proposed tribal consultation policy. State staff also distributed a draft SPA and conducted a PowerPoint presentation, both of which elaborated on the proposed tribal consultation policy. Tribal representatives received contact information for various State staff who could answer any questions that may arise. As of May 1, 2011, no questions or comments were received by the State subsequent to the above meeting.

In addition, copies of all handouts were left with HHS IHS representatives to share with those Indian nations and Urban Indian Organizations who did not have representatives in attendance. Further, on April 29, 2011, the State mailed a package to Indian nation and organization leaders and Indian health clinic administrators, which discussed the March 29, 2011 presentation, included the handouts from the presentation, and offered a two-week period of time in which to comment or request a personal meeting with State staff. No responses to our mailing were received as of May 13, 2011.

Pediatric Immunization Program

1. The State has implemented a program for the distribution of pediatric vaccines to program-registered providers for the immunization of federally vaccine-eligible children in accordance with section 1928 as indicated below.

   a. The State program will provide each vaccine-eligible child with medically appropriate vaccines according to the schedule developed by the Advisory Committee on Immunization Practices and without charge for the vaccines.

   b. The State will outreach and encourage a variety of providers to participate in the program and to administer vaccines in multiple settings, e.g., private health care providers, providers that receive funds under Title V of the Indian Health Care Improvement Act, health programs or facilities operated by Indian tribes, and maintain a list of program-registered providers.

   c. With respect to any population of vaccine-eligible children a substantial portion of whose parents have limited ability to speak the English language, the State will identify program-registered providers who are able to communicate with this vaccine-eligible population in the language and cultural context which is most appropriate.

   d. The State will instruct program-registered providers to determine eligibility in accordance with section 1928(b) and (h) of the Social Security Act.

   e. The State will assure that no program-registered provider will charge more for the administration of the vaccine than the regional maximum established by the Secretary. The State will inform program-registered providers of the maximum fee for the administration of vaccines.

   f. The State will assure that no vaccine-eligible child is denied vaccines because of an inability to pay an administration fee.

   g. Except as authorized under section 1915(b) of the Social Security Act or as permitted by the Secretary to prevent fraud or abuse, the State will not impose any additional qualifications or conditions, in addition to those indicated above, in order for a provider to qualify as a program-registered provider.

TN #94-33

Supersedes TN #NEW

Approval Date August 18, 1994

Effective Date October 1, 1994
2. The State has not modified or repealed any Immunization law in effect as of May 1, 1993 to reduce the amount of health insurance coverage of pediatric vaccines.

3. The State Medicaid Agency has coordinated with the State Public Health Agency in the completion of this preprint page.

4. The State agency with overall responsibility for the implementation and enforcement of the provisions of section 1928 is:

   X State Medicaid Agency
   X State Public Health Agency

[2.1(d)] The Medicaid agency has procedures to take applications, assist applicants, and perform initial processing of applications from those low income pregnant women, infants, and children under age 19, described in §1902(a)(10)(A)(i)(IV), (a)(10)(A)(i)(V), (a)(10)(A)(i)(VI), (a)(10)(A)(i)(VII), and (a)(10)(A)(ii)(IX) at locations other than those used by the title IV-A program including FQHCs and disproportionate share hospitals. Such application forms do not include the ADFC form except as permitted by HCFA instructions.]
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT
SECTION 2 – COVERAGE AND ELIGIBILITY

Citation(s)

2.1 Application, Determination of Eligibility and Furnishing Medicaid (Continued)

1902(e)(13) of the Act

[X] (e) Express Lane Option. The Medicaid State agency elects the option to rely on a finding from an Express Lane agency when determining whether a child satisfies one or more components of Medicaid eligibility. The Medicaid State agency agrees to meet all of the Federal statutory and regulatory requirements for this option. This authority may not apply to eligibility determinations made before February 4, 2009, or after 9/30/2017.

(1) The Express Lane option is applied to:

☐ Initial determinations   ☐ Redeterminations

[X] Both

(2) A child is defined as younger than age:

[X] 19        ☐ 20        ☐ 21

(3) The following public agencies are approved by the Medicaid State agency as Express Lane agencies:

[The New York State Department of Health (NYSDOH), Office of Health Insurance Program (OHIP), [Division of Coverage and Enrollment (DCE)] Division of Eligibility and Marketplace Integrations (DEMI) administers the Medicaid and Child Health Plus (CHPlus, New York’s separate CHIP program) programs. At CHPlus redetermination, the Medicaid agency elects to rely on findings from the Child Health Plus program to determine initial eligibility for the Medicaid program.

When applying or renewing for Temporary Assistance the Medicaid agency elects to rely on findings from Temporary Assistance program to automatically enroll and renew eligible children in Medicaid.]

TN #17-0066 Approval Date March 8, 2018
Supersedes TN #15-0003 Effective Date October 1, 2017
2.1 Application, Determination of Eligibility and Furnishing Medicaid (Continued)

(4) The following component/components of Medicaid eligibility are determined under the Express Lane option. Also, specify any differences in budget unit, deeming, income exclusions, income disregards, or other methodology between Medicaid eligibility determinations for such children and the determination under the Express Lane option.

[Child Health Plus annually renews eligibility for children enrolled in CHPlus. Under the screen and enroll process, the first step is to determine if the child is eligible for Medicaid. In order to streamline eligibility for children who screen Medicaid eligible, the Department of Health is implementing a process that will send the eligibility findings made at the renewal by CHPlus to the Local Departments of Social Services (LDSS).

The State will use an income finding from CHPlus and apply this income information to enroll a child in Medicaid if a child is found to be ineligible for CHPlus at renewal. Both Medicaid and Child Health Plus use MAGI (modified adjusted gross income) to determine eligibility. Medicaid will be accepting the income findings determined by CHPlus using MAGI methodology based on Medicaid income rules.

Medicaid and CHPlus both use the same residency rules. Neither Medicaid nor CHPlus require documentation of residency at renewal. Medicaid will accept the CHPlus agency’s finding for residency.

Temporary Assistance requires the same verification of citizenship that Medicaid requires for eligibility. Income budgeting is slightly different, Temporary Assistance uses net income after allowing income disregards. Medicaid determines eligibility using MAGI (modified adjusted gross income) methodology. Since TA income guidelines are lower than the Medicaid levels, this slight discrepancy in budgeting income would not affect eligibility in a majority of the cases.]
2.1 Application, Determination of Eligibility and Furnishing Medicaid (Continued)

(5) Check off which option is used to satisfy the Screen and Enroll requirement before a child may be enrolled under Title XXI.

☐ (a) Screening threshold established by the Medicaid agency as:

☐ (i) ___ percentage of the Federal Poverty Level (FPL) which exceeds the highest Medicaid income threshold applicable to a child by a minimum of 30 percentage points: specify ____________________________; or

☐ (ii) ___ percentage of the FPL (describe how this reflects the value of any differences between income methodologies of Medicaid and the Express Lane agency; or

[X] (b) Temporary enrollment pending screen and enroll.

☐ (c) State’s regular screen and enroll process for CHIP.

[If Medicaid eligible based on the findings of the Express Lane Agency, the child is given two months of temporary CHPlus coverage, and the case information will be sent to LDSS to open a Medicaid case. In upstate counties, this process will be done manually and in NYC, this will be done electronically.]

In both upstate counties and NYC, when a child is determined eligible for Temporary Assistance, the child will automatically be given Medicaid with no action required by the family.]

[X] (6) The State elects the option for automatic enrollment without a Medicaid application, based on data obtained from other sources and with the child’s or family’s affirmative consent to the child’s Medicaid enrollment.

☐ (7) The State elects the option to rely on a finding from an Express Lane agency that includes gross income or adjusted gross income shown by State income tax records or returns.

SECTION 3 - SERVICES: GENERAL PROVISIONS

3.1 Amount, Duration and Scope of Services

(a) Medicaid is provided in accordance with the requirements of 42 CFR Part 440, Subpart B and sections 1902(a), 1902(e), 1905(a), 1905(p), 1915, 1920, and 1925 of the Act.

(1) Categorically needy

Services for the categorically needy are described below and in ATTACHMENT 3.1-A. These services include:

(i) Each item or service listed in section 1905(a)(1) through (5) and (21) of the Act, is provided as defined in 42 CFR Part 440, Subpart A, or for EPSDT services, section 1905(r) and 42 CFR Part 441, Subpart B.

(ii) Nurse-midwife services listed in section 1905(a)(17) of the Act, are provided to the extent that nurse-midwives are authorized to practice under State law or regulation and without regard to whether the services are furnished in the area of management of the care of mothers and babies throughout the maternity cycle. Nurse-midwives are permitted to enter into independent provider agreements with the Medicaid agency without regard to whether the nurse-midwife is under the supervision of, or associated with, a physician or other health care provider.

Not applicable. Nurse-midwives are not authorized to practice in this State.

*Effective February 3, 1995

nurse-midwife services will be known as midwife services in New York State per Education Law, Article 140.

(a)(2) Medically needy.

This State plan covers the medically needy. The services described below and in ATTACHMENT 3.1-B are provided.

Services for the medically needy include:

1902(a)(10)(C)(iv) of the Act

(i) If services in an institution for mental diseases or an intermediate care facility for the mentally retarded (or both) are provided to any medically needy group, then each medically needy group is provided either the services listed in section 1905(a)(1) through (5) and (17) of the Act, or seven of the services listed in section 1905(a)(1) through (20). The services are provided as defined in 42 CER Part 440, Subpart A and in sections 1902, 1905, and 1915 of the Act.

[ ] Not applicable with respect to nurse-midwife services under section 1902(a)(17). Nurse-midwives are not authorized to practice in this State.

1902(e)(5) of the Act

(ii) Prenatal care and delivery services for pregnant women.

Citation 3.1(a)(6) Amount, Duration, and Scope of Services: Limited Coverage for Certain Aliens (continued)

1902(a) and 1903(v) of the Act

(iii) Aliens who are not lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law who meet the eligibility conditions under this plan, except for the requirement for receipt of AFDC, SSI, or a State supplementary payment, are provided Medicaid only for care and services necessary for the treatment of an emergency medical condition (including emergency labor and delivery) as defined in section 1903(v)(3) of the Act.

1905(a)(9) of the Act

(a)(7) Homeless Individuals.

Clinic services furnished to eligible individuals who do not reside in a permanent dwelling or do not have a fixed home or mailing address are provided without restrictions regarding the site at which the services are furnished.

1902(a)(47) and 1920 of the Act

(a)(8) Ambulatory prenatal care for pregnant women is provided during a presumptive eligibility period if the care is furnished by a provider that is eligible for payment under the State plan.

42 CFR 441.55 50 FR 43654 1902(a)(43), 1905(a)(4)(B), and 1905(r) of the Act

(a)(9) EPSDT Services.

The Medicaid agency meets the requirements of sections 1902(a)(43), 1905(a)(4)(B), and 1905(r) of the Act with respect to early and periodic screening, diagnostic, and treatment (EPSDT) services.

TN #91-75 Approval Date March 3, 1992
Supersedes TN NEW Effective Date October 1, 1991
The Medicaid agency has in effect agreements with continuing care providers. Described below are the methods employed to assure the providers' compliance with their agreements.

Except for those items or services for which sections 1902(a), 1902(a)(10), 1903(v), 1915, and 1925 of the Act, 42 CFR 440.250, and (a)(10), 1902(a)(52), section 245A of the Immigration and Nationality Act, permit exceptions:

(i) Services made available to the categorically needy are equal in amount, duration, and scope for each categorically needy person.

(ii) The amount, duration, and scope of services made available to the categorically needy are equal to or greater than those made available to the medically needy.

(iii) Services made available to the medically needy are equal in amount, duration, and scope for each person in a medically needy coverage group.

(iv) Additional coverage for pregnancy-related services and services for conditions that may complicate the pregnancy are equal for categorically and medically needy.

A variety of methods are employed, including –

- review of enrollment and utilization data such as periodic reports.
- validation by the New York State Department of Health of the provider's Quality Assurance Program through review of reports and on-site visits.
- dissemination of informational materials to all individuals.
- review of grievance procedures.
3.1(b) Home health services are provided in accordance with the requirements of 42 CFR 441.15.

(1) Home health services are provided to all categorically needy individuals 21 years of age or over.

(2) Home health services are provided to all categorically needy individuals under 21 years of age.

[x] Yes

[ ] Not applicable. The State plan does not provide for skilled nursing facility services for such individuals.

(3) Home health services are provided to the medically needy:

[x] Yes, to all

[ ] Yes, to individuals age 21 or over; SNF services are provided

[ ] Yes, to individuals under age 21; SNF services are provided

[ ] No; SNF services are not provided

[ ] Not applicable, the medically needy are not included under this plan

3.1 Amount, Duration, and Scope of Services

(c)(1) Assurance of Transportation

Provision is made for assuring necessary transportation of recipients to and from providers. Methods used to assure such transportation are described in ATTACHMENT 3.1-C.

(c)(2) Payment for Nursing Facility Services

The State includes in nursing facility services at least the items and services specified in 42 CFR 483.10(c)(8)(i).
The standards established and the methods used to assure high quality care are described in ATTACHMENT 3.1-C.
Family Planning Services

The requirements of 42 CFR 441.20 are not regarding freedom from coercion or pressure of mind and conscience, and freedom of choice of method to be used for family planning.
3.1(f)(1) Optometric Services

Optometric services (other than those provided under §435.531 and 436.531) are not now but were previously provided under the plan. Services of the type an optometrist is legally authorized to perform are specifically included in the term “physicians’ services” under this plan and are reimbursed whether furnished by a physician or an optometrist.

[ ] Yes.

[ ] No. The conditions described in the first sentence apply but the term “physicians’ services” does not specifically include services of the type an optometrist is legally authorized to perform.

[x] Not applicable. The conditions in the first sentence do not apply.

(2) Organ Transplant Procedures

Organ transplant procedures are provided.

[ ] No.

[x] Yes. Similarly situated individuals are treated alike and any restriction on the facilities that may, or practitioners who may, provide those procedures is consistent with the accessibility of high quality care to individuals eligible for the procedures under this plan. Standards for the coverage of organ transplant procedures are described at ATTACHMENT 3.1-E.

3.1(g) Participation by Indian Health Service Facilities

Indian Health Service Facilities are accepted as providers, in accordance with 42 CFR 431.110(b), on the same basis as other qualified providers.

(h) Respiratory Care Services for Ventilator-Dependent Individuals

Respiratory care services, as defined in section 1902(e)(9)(C) of the Act, are provided under the plan to individuals who--

(1) Are medically dependent on a ventilator for life support at least six hours per day;

(2) Have been so dependent as inpatients during a single stay or a continuous stay in one or more hospitals, SNFs or ICFs for the lesser of—

[ ] 30 consecutive days;

[ ] ___ days (the maximum number of inpatient days allowed under the state plan);

(3) Except for home respiratory care, would require respiratory care on an inpatient basis in a hospital, SNF or ICF for which Medicaid payments would be made;

(4) Have adequate social support services to be cared for at home; and

(5) Wish to be cared for at home.

[ ] Yes. The requirements of section 1902(e)(9) of the Act are met.

[x] Not applicable. These services are not included in the plan.

TN #87-47
Supersedes TN #79-4

Approval Date November 21, 1991
Effective Date October 1, 1987
3.2 Coordination of Medicaid with Medicare and Other Insurance

(a) Premiums

(1) Medicare Part A and Part B

(i) Qualified Medicare Beneficiary (QMB)

The Medicaid agency pays Medicare Part A premiums (If applicable) and Part B premiums for Individuals in the QMB group defined in Item A.25 of ATTACHMENT 2.2-A, through the group premium payment arrangement, unless the agency has a Buy-In agreement for such payment as indicated below.

Buy-in agreement for:

[ ] Part A  [x] Part B

[ ] The Medicaid agency pays premiums for which the beneficiary would be liable, for enrollment in an HMO participating in Medicare.

(ii) Qualified Disabled and Working Individual (QDWI)

The Medicaid agency pays Medicare Part A premiums under a group premium payment arrangement, subject to any contribution required as described in ATTACHMENT 4.18-E, for individuals in the QDWI group defined in item A.26 of ATTACHMENT 2.2-A of this plan.

(iii) Specified Low-Income Medicare Beneficiary (SLMB)

The Medicaid agency pays Medicare Part B premiums under the State buy-in process for individuals in the SLMB group defined in item A.27 of ATTACHMENT 2.2-A of this plan.

(iv) Qualifying Individual - 1 (QI-1)

The Medicaid agency pays Medicare Part B premiums under the State buy-in process for individuals described in 1902(a)(10)(E)(iv)(I) and subject to 1933 of the Act.

(v) Qualifying Individual - 2 (QI-2)

The Medicaid agency pays the portion of the amount of increase to the Medicare Part B premium attributable to the Home Health Provision to the individuals described in 1902(a)(10)(E)(iv)(II) and subject to 1933 of the Act.
(vi) Other Medicaid Recipients

The Medicaid agency pays Medicare Part B premiums to make Medicare Part B coverage available to the following individuals:

[x] All individuals who are: (a) receiving benefits under titles I, IV-A, X, XIV, or XVI (AABD or SSI); b) receiving State supplements under title XVI; or c) within a group listed at 42 CFR 431.625(d)(2).

[x] Individuals receiving title II or Railroad Retirement benefits.

[ ] Medically needy individuals (FFP is not available for this group).

(2) Other Health Insurance

[X] The Medicaid agency pays insurance premiums for medical or any other type of remedial care to maintain a third party resource for Medicaid covered services provided to eligible individuals (except individuals 65 years of age or older and disabled individuals, entitled to Medicare Part A but not enrolled in Medicare Part B).
(b) **Deductibles, Coinsurance**

(1) **Medicare Part A and B**

- **1902(a)(30), 1902(n), 1905(a), and 1916 of the Act**
  
  Supplement 1 to ATTACHMENT 4.19-B describes the methods and standards for establishing payment rates for services covered under Medicare, and/or the methodology for payment of Medicare deductible and coinsurance amounts, to the extent available for each of the following groups.

  (i) **Qualified Medicare Beneficiaries (QMBs)**
  
  The Medicaid agency pays Medicare Part A and Part B deductible and coinsurance amounts for the QMBs (subject to any nominal Medicaid copayment) for all services available under Medicare.

  (ii) **Other Medicaid Requests**
  
  The Medicaid agency pays for Medicaid services also covered under Medicare and furnished to recipients entitled to Medicare (subject to any nominal Medicaid copayment). For services furnished to individuals who are described in section 3.2(a)(1)(iv), payment is made as follows:

  - [ ] For the entire range of services available under Medicare Part B.
  - [x] Only for the amount, duration, and scope of services otherwise available under this plan.

  (iii) **Dual Eligible – QMB plus**
  
  The Medicaid agency pays Medicare Part A and Part B deductible and coinsurance amounts for all services available under Medicare and pays for all Medicaid services furnished to individuals eligible both as QMBs and categorically or medically needy (subject to any nominal Medicaid copayment).

**Effective Date** April 1, 1993
Citation | Condition or Requirement
--- | ---
1906 of the Act | (c) **Premiums, Deductibles, Coinsurance and Other Cost Sharing Obligations**

The Medicaid agency pays all premiums, deductibles, coinsurance and other cost sharing obligations for items and services covered under the State plan (subject to any nominal Medicaid copayment) for eligible individuals in employer-based cost-effective group health plans.

When coverage for eligible family members is not possible unless ineligible family members enroll, the Medicaid agency pays premiums for enrollment of other family members when cost-effective. In addition, the eligible individual is entitled to services covered by the State plan which are not included in the group health plan. Guidelines for determining cost effectiveness are described in section 4.22(h).

1902(a)(10)(F) of the Act | (d) [x] The Medicaid agency pays premiums for individuals described in item 19 of Attachment 2.2-A.
### 3.3 Medicaid for Individuals Age 65 or Over in Institutions for Mental Diseases

Medicaid is provided for individuals 65 years of age or older who are patients in institutions for mental diseases.

- [x] Yes. The requirements of 42 CFR Part 441, Subpart C, and 42 CFR 431.620(c) and (d) are met.

- [ ] Not applicable. Medicaid is not provided to aged individuals in such institutions under this plan.

**Approval Date**: April 17, 1975

**Effective Date**: April 1, 1975
3.4 Special Requirements Applicable to Sterilization Procedures

All requirements of 42 CFR Part 441, Subpart F are met.
3.5 Families Receiving Extended Medicaid Benefits

(a) Services provided to families during the first 6-month period of extended Medicaid benefits under Section 1925 of the Act are equal in amount, duration, and scope to services provided to categorically needy AFDC recipients as described in ATTACHMENT 3.1-A (or may be greater if provided through a caretaker relative employer’s health insurance plan).

(b) Services provided to families during the second 6-month period of extended Medicaid benefits under section 1925 of the Act are --

[X] Equal in amount, duration, and scope to services provided to categorically needy AFDC recipients as described in ATTACHMENT 3.1-A (or may be greater if provided through a caretaker relative employer’s health insurance plan).

[ ] Equal in amount, duration, and scope to services provided to categorically needy AFDC recipients, (or may be greater if provided through a caretaker relative employer’s health insurance plan) minus any one or more of the following acute services:

[ ] Nursing facility services (other than services in an institution for mental diseases) for individuals 21 years of age or older.

[ ] Medical or remedial care provided by licensed practitioners.

[ ] Home health services.
Private duty nursing services.

Physical therapy and related services.

Other diagnostic, screening, preventive, and rehabilitation services.

Inpatient hospital services and nursing facility services for individuals 65 years of age or over in an institution for mental diseases.

Intermediate care facility services for the mentally retarded.

Inpatient psychiatric services for individuals under age 21.

Hospice services.

Respiratory care services.

Any other medical care and any other type of remedial care recognized under State law and specified by the Secretary.
(c) [x] The agency pays the family's premiums, enrollment fees, deductibles, coinsurance, and similar costs for health plans offered by the caretaker's employer as payments for medical assistance --

[x] 1st 6 months  [x] 2nd 6 months

[ ] The agency requires caretakers to enroll in employers' health plans as a condition of eligibility.

[ ] 1st 6 mos.  [ ] 2nd 6 mos.

(d) [ ] (1) The Medicaid agency provides assistance to families during the second 6-month period of extended Medicaid benefits through the following alternative methods:

[ ] Enrollment in the family option of an employer's health plan.

[ ] Enrollment in the family option of a State employee health plan.

[ ] Enrollment in the State health plan for the uninsured.

[ ] Enrollment in an eligible health Maintenance organization (HMO) with a prepaid enrollment of less than 50 percent Medicaid recipients (except recipients of extended Medicaid).
Families Receiving Extended Medicaid Benefits

Supplement 2 to Attachment 3.1-A specifies and describes the alternative health care plan(s) offered, including requirements for assuring that recipients have access to services of adequate quality.

(2) The agency –

(i) Pays all premiums and enrollments fees imposed on the family for such plan(s)

(ii) Pays all deductibles and coinsurance imposed on the family for such plan(s)

Unemployed Parent

For purposes of determining whether a child is deprived on the basis of the unemployment of a parent, the agency –

Uses the following more liberal standard to measure unemployment:

An individual will be considered unemployed if the family's countable income and resources as determined for the group defined in Section 1931 are below the eligibility standard used for that group (Attachment 2.6-A, Supplement 12 and Supplement 1 to Attachment 2.6-A, Item A-1) or if the family's income and resources, minus deductions allowed for medically needy, including incurred medical expenses, is less than the medically needy income level (Supplement 1 to Attachment 2.6-A, Item D) and Resource level (Supplement 2 to Attachment 2.6-A, Item B).

(Note: This effectively eliminates the old AFDC deprivation requirements from all groups.)
Enrollment in an eligible health maintenance organization (HMO) that has an enrollment of less than 50 percent of Medicaid recipients who are not recipients of extended Medicaid.*

Supplement 2 to ATTACHMENT 3.1-A specifies and describes the alternative health care plan(s) offered, including requirements for assuring that recipients have access to services of adequate quality.

(2) The agency--

[ ] (i) Pays all premiums and enrollment fees imposed on the family for such plan(s).

[ ] (ii) Pays all deductibles and coinsurance imposed on the family for such plan(s).

* Only if previously enrolled

**Supersedes TN NEW** Effective Date April 1, 2011
## SECTION 4 – GENERAL PROGRAM ADMINISTRATION

### 4.5 Medicaid Recovery Audit Contractor Program (Exceptions)

<table>
<thead>
<tr>
<th>Citation</th>
<th>Exception from Medicaid RAC 3-year Look Back Period</th>
</tr>
</thead>
<tbody>
<tr>
<td>42 CFR 455.508(f)</td>
<td>New York State requests an exception to the 3-year look back period for the Medicaid RAC program defined in section 455.508. Subparagraph (f) states, “The entity must not review claims that are older than 3 years from the date of the claim, unless it receives approval from the State.” New York State regulations (18 NYCRR Section 504.3) require providers “to prepare and to maintain contemporaneous records demonstrating its right to receive payment under the medical assistance program and to keep for a period of six years from the date the care, services or supplies were furnished, all records necessary to disclose the nature and extent of services furnished and all information regarding claims for payment submitted by, or on behalf of, the provider and to furnish such records and information, upon request, to the department, the Secretary of the United States Department of Health and Human Services, the Deputy Attorney General for Medicaid Fraud Control and the New York State Department of Health”. The State requests the ability to grant a look back period for the Medicaid RAC up to six years, upon State approval of the RAC scenario, for the following reasons:</td>
</tr>
<tr>
<td></td>
<td>• Claim specific detail may be present documenting an overpayment exists for periods beyond the three-years specified in Section 42 CFR 455.508(f);</td>
</tr>
<tr>
<td></td>
<td>• A look-back period longer than three years is more consistent with Medicaid provider record retention requirements required by New York State regulatory agencies; and</td>
</tr>
<tr>
<td></td>
<td>• A longer look-back period will allow for additional efficiencies for both the state and provider when a single effort can review and recover an identified overpayment rather than leveraging multiple entities to review and recover different time periods.</td>
</tr>
</tbody>
</table>

This exception will only apply to reviews based on actual claim specific detail. Audits that require sampling and extrapolation will continue to be limited to the 3-year look back period.

(1) Hospitals, nursing facilities, providers of home health care or personal care services, hospice programs, health maintenance organizations and health insuring organizations are required to do the following:

(a) Maintain written policies and procedures with respect to all adult individuals receiving medical care by or through the provider or organization about their rights under State law to make decisions concerning medical care, including the right to accept or refuse medical or surgical treatment and the right to formulate advance directives.

(b) Provide written information to all adult individuals on their policies concerning implementation of such rights;

(c) Document in the individual’s medical records whether or not the individual has executed an advance directive;

(d) Not condition the provision of care or otherwise discriminate against an individual based on whether or not the individual has executed an advance directive;

(e) Ensure compliance with requirements of State Law (whether
New York
45b

statutory or recognized by the courts) concerning advance directives; and

(f) Provide (individually or with others) for education for staff and the community on issues concerning advance directives.

(2) Providers will furnish the written information described in paragraph (1)(a) to all adult individuals at the time specified below:

(a) Hospitals at the time an individual is admitted as an inpatient.

(b) Nursing facilities when the individual is admitted as a resident.

(c) Providers of home health care or personal care services before the individual comes under the care of the provider;

(d) Hospice program at the time of initial receipt of hospice care by the individual from the program; and

(e) Health maintenance organizations at the time of enrollment of the individual with the organization.

(3) Attachment 4.34A describes law of the State (whether statutory or as recognized by the courts of the State) concerning advance directives.

--- Not applicable. No State law or court decision exist regarding advance directives.
4.13 Utilization/Quality Control

(a) A Statewide program of surveillance and utilization control has been implemented that safeguards against unnecessary or inappropriate use of Medicaid services available under this plan and against excess payments, and that assesses the quality of services. The requirements of 42 CFR Part 456 are met:

_x_ Directly

_x_ By undertaking medical and utilization review requirements through a contract with a Utilization and Quality Control Peer Review Organization (PRO) designated under 42 CFR Part 462. The contract with the PRO –

(1) Meets the requirements of §434.6(a);

(2) Includes a monitoring and evaluation plan to ensure satisfactory performance;

(3) Identifies the services and providers subject to PRO review;

(4) Ensures that PRO review activities are not inconsistent with the PRO review of Medicare services; and

(5) Includes a description of the extent to which PRO determinations are considered conclusive for payment purposes.

_x_ Quality review requirements described in section 1902(a)(30)(C) of the Act relating to services furnished by HMOs under contract are undertaken through contract with the PRO designed under 42 CFR Part 462.

___ By undertaking quality review of services furnished under each contract with an HMO through a private accreditation body.
(b) The Medicaid agency meets the requirements of 42 CFR Part 456, Subpart C, for control of the utilization of inpatient hospital services.

[ ] Utilization and medical review are performed by a Utilization and Quality Control Peer Review Organization designated under 42 CFR Part 462 that has a contract with the agency to perform those reviews.

[ ] Utilization review is performed in accordance with 42 CFR Part 456, Subpart H, that specifies the conditions of a waiver of the requirements of Subpart C for:

[ ] All hospitals (other than mental hospitals).

[ ] Those specified in the waiver.

[X] No waivers have been granted.
4.14

The Medicaid agency meets the requirements of 42 CFR Part 456, Subpart D, for control of utilization of inpatient services in mental hospitals.

[ ] Utilization and medical review are performed by a Utilization and Quality Control Peer Review Organization designated under 42 CFR Part 462 that has a contract with the agency to perform those reviews.

[ ] Utilization review is performed in accordance with 42 CFR Part 456, Subpart H, that specifies the conditions of a waiver of the requirements of Subpart D for:

[ ] All mental hospitals.

[ ] Those specified in the waiver.

[X] No waivers have been granted.

[ ] Not applicable. Inpatient services in mental hospitals are not provided under this plan.

[ ] Those specified in the waiver.

[X] No waivers have been granted.
The Medicaid agency meets the requirements of 42 CFR Part 456, Subpart F, for control of the utilization of intermediate care facility services. Utilization review in facilities is provided through:

- Facility-based review.
- Direct review by personnel of the medical assistance unit of the State agency.
- Personnel under contract to the medical assistance unit of the State agency.
- Utilization and Quality Control Peer Review Organizations.
- Another method as described in ATTACHMENT 4.14-A.

Two or more of the above methods. ATTACHMENT 4.14-B describes the circumstances under which each method is used.

Not applicable. Intermediate care facility services are not provided under this plan.

Relations with State Health and Vocational Rehabilitation Agencies and Title V Grantees

The Medicaid agency has cooperative arrangements with State health and vocational rehabilitation agencies and with title V grantees, that meet the requirements of 42 CFR 431.615.

The Medicaid agency will provide for coordination of the operations under Title XIX with the State's operations under the special supplemental food program for women, infants and children (WIC) under Section 17 of the Child Nutrition Act of 1966 as specified by amendment to Section 1902(a)(11) of the Social Security Act.

ATTACHMENT 4.16-A describes the cooperative arrangements with the health and vocational rehabilitation agencies.
4.17 Liens and Adjustments or Recoveries

(a) Liens

-X- The State imposes liens against an individual's real property on account of medical assistance paid or to be paid.

The State complies with the requirements of section 1917(a) of the Act and regulations at 42 CFR 433.36(c)-(g) with respect to any lien imposed against the property of any individual prior to his or her death on account of medical assistance paid to or be paid on his or her behalf.

-X- The State imposes liens on real property on account of benefits incorrectly paid.

-X- The State imposes TEFRA liens 1917(a)(1)(B) on real property of an individual who is an inpatient of a nursing facility, ICF/MR, or other medical institution, where the individual is required to contribute toward the cost of institutional care all but a minimal amount of income required for personal needs.

The procedures by the State for determining that an institutionalized individual cannot reasonably be expected to be discharged are specified in Attachment 4.17-A. (NOTE: If the State indicates in its State plan that it is imposing TEFRA liens, then the State is required to determine whether an institutionalized individual is permanently institutionalized and afford these individuals notice, hearing procedures, and due process requirements.)

-X- The State imposes liens on both real and personal property of an individual after the individual's death.
New York
53a

(b) **Adjustments or Recoveries**

The State complies with the requirement of section 1917(b) of the Act and regulations at 42 CFR 433.36 (h)-(i).

Adjustments or recoveries for Medicaid claims correctly paid are as follows:

1. For permanently institutionalized individuals, adjustments or recoveries are made from the individual’s estate or upon sale of the property subject to a lien imposed because of medical assistance paid on behalf of the individual for services provided in a nursing facility, ICF/MR, or other medical institution.

   X Adjustments or recoveries are made for all other medical assistance paid on behalf of the individual.

2. The State determines “permanent institutional status” of individuals under the age of 55 other than those with respect to whom it imposes liens on real property under §1917(a)(1)(B) (even if it does not impose those liens).

3. For any individual who received medical assistance at age 55 or older, adjustments or recoveries of payments are made from the individual’s estate for nursing facility services, home and community-based services, and related hospital and prescription drug services.

   X In addition to adjustment or recovery of payments for services listed above, payments are adjusted or recovered for other services under the State plan as listed below:
   Payment for all services are recovered for individuals age 55 and over, except for Medicare cost sharing as specified in section 4.17(b)(3) – continued.

TN #10-14
Supersedes TN #95-28
Approval Date September 22, 2010
Effective Date April 1, 2010
4.17  (b) **Adjustments or Recoveries**

(3) (Continued)

Limitations on Estate Recovery - Medicare Cost Sharing:

(i) Medical assistance for Medicare cost sharing is protected from estate recovery for the following categories of dual eligibles: QMB, SLMB, QI, QDWI, QMB +, SLMB+. This protection extends to medical assistance for four Medicare cost sharing benefits (Part A and B premiums, deductibles, coinsurance, co-payments) with dates of service on or after January 1, 2010. The date of service for deductibles, coinsurance, and co-payments is the date the request for payment is received by the State Medicaid Agency. The date of service for premiums is the date the State Medicaid Agency paid the premium.

(ii) In addition to being a qualified dual eligible the individual must also be age 55 or over. The above protection from estate recovery for Medicare cost sharing benefits (premiums, deductibles, coinsurance, co-payments) applies to approved mandatory (i.e., nursing facility, home and community-based services, and related prescription drugs and hospital services) as well as optional Medicaid services identified in the State plan, which are applicable to the categories of duals referenced above.
New York
53b

(4)  _X_  The State disregards assets or resources for individuals who receive or are entitled to receive benefits under a long term care insurance policy as provided for in Attachment 2.6-A, supplement 8b.

___ The State adjusts or recovers from the individual's estate on account of all medical assistance paid for nursing facility and other long term care services provided on behalf of the individual. (States other than California, Connecticut, Indiana, Iowa, and New York which provide long term care insurance policy-based asset or resource disregard must select this entry. These five States may either check this entry or one of the following entries.)

_ X_  The State does not adjust or recover from the individual's estate on account of any medical assistance paid for nursing facility or other long term care services provided on behalf of the individual.

___ The State adjusts or recovers from the assets or resources on account of medical assistance paid for nursing facility or other long term care services provided on behalf of the individual to the extent described below:

TN  #04-39
Supersedes TN  #95-28
Approval Date  March 23, 2005
Effective Date  December 31, 2004
(c) **Adjustments or Recoveries: Limitations**

The State complies with the requirements of section 1917(b)(2) of the Act and regulations at 42 CFR §433.36(h)-(i).

(1) Adjustment or recovery of medical assistance correctly paid will be made only after the death of the individual's surviving spouse, and only when the individual has no surviving child who is either under age 21, blind, or disabled.

(2) With respect to liens on the home of any individual who the State determines is permanently institutionalized and who must as a condition of receiving services in the institution apply their income to the cost of care, the State will not seek adjustment or recovery of medical assistance correctly paid on behalf of the individual until such time as none of the following individuals are residing in the individual's home:

   (a) a sibling of the individual (who was residing in the individual's home for at least one year immediately before the date that the individual was institutionalized), or

   (b) a child of the individual (who was residing in the individual's home for at least two years immediately before the date that the individual was institutionalized) who establishes to the satisfaction of the State that the care of the child provided permitted the individual to reside at home rather than become institutionalized.

(3) No money payments under another program are reduced as a means of adjusting or recovering Medicaid claims incorrectly paid.
New York 53d

(d) ATTACHMENT 4.17-A

(1) Specifies the procedures for determining that an institutionalized individual cannot reasonably be expected to be discharged from the medical institution and return home. The description of the procedure meets the requirements of 42 CFR 433.36(d).

(2) Specifies the criteria by which a son or a daughter can establish that he or she has been providing care, as specified under 42 CFR 433.36(f).

(3) Defines the following terms:

- estate (at a minimum, estate as defined under State probate law). Except for the grandfathered States listed in section 4.17(b)(3), if the State provides a disregard for assets or resources for any individual who received or is entitled to receive benefits under a long term care insurance policy, the definition of estate must include all real, personal property, and assets of an individual (including any property or assets in which the individual had any legal title or interest at the time of death to the extent of the interest and also including the assets conveyed through devices such as joint tenancy, life estate, living trust, or other arrangement),

- individual's home,

- equity interest in the home,

- residing in the home for at least 1 or 2 years,

- on a continuous basis,

- discharge from the medical institution and return home, and

- lawfully residing.

TN #95-28 Approval Date September 27, 1996
Supersedes TN NEW Effective Date April 1, 1995
(4) Describes the standards and procedures for waiving estate recovery when it would cause undue hardship.

(5) Defines when adjustment or recovery is not cost-effective. Defines cost-effective and includes methodology or thresholds used to determine cost-effectiveness.

(6) Describes collection procedures. Includes advance notice requirements, specifies the method for applying for a waiver, hearing and appeals procedures, and the time frames involved.
4.18 Recipient Cost Sharing and Similar Charges

(a) Unless a waiver under 42 CFR 431.55(g) applies, deductibles, coinsurance rates, and copayments do not exceed the maximum allowable charges under 42 CFR 447.54

(b) Except as specified in items 4.18(b)(4), (5), and (6) below, with respect to individuals covered as categorically needy or as qualified Medicare beneficiaries (as defined in section 1905(p)(1) of the Act) under the plan:

(1) No enrollment fee, premium, or similar charge is imposed under the plan.

(2) No deductible, coinsurance, copayment, or similar charge is imposed under the plan for the following:

   (i) Services to individuals under age 18, or under –

       [ ] Age 19
       [ ] Age 20
       [X] Age 21

   Reasonable categories of individuals who are age 18 or older, but under age 21, to whom charges apply are listed below, if applicable.

   (ii) Services to pregnant women related to the pregnancy or any other medical condition that may complicate the pregnancy.
All services furnished to pregnant women.

Not applicable. Charges apply for services to pregnant women unrelated to the pregnancy.

Services furnished to any individual who is an inpatient in a hospital, long-term care facility, or other medical institution, if the individual is required, as a condition of receiving services in the institution, to spend for medical care costs all but a minimal amount of his or her income required for personal needs.

Emergency services if the services meet the requirements in 42 CFR 447.53(b)(4).

Family planning services and supplies furnished to individuals of childbearing age.

Services furnished by a health maintenance organization in which the individual is enrolled.

Services furnished to an individual receiving hospice care, as defined in section 1905(o) of the Act.
New York
56

Citation 4.18 (b) (Continued)

42 CFR 447.51 through 447.46

(3) Unless a waiver under 42 CFR 431.55(g) applies, nominal deductible, coinsurance, copayment, or similar charges are imposed for services that are not excluded from such charges under item (b)(3) above.

[ ] Not applicable. No such charges are imposed.

(i) For any service, no more than one type of charge is imposed.

(ii) Charges apply to services furnished to the following age groups:

[ ] 18 or older

[ ] 19 or older

[ ] 20 or older

[X] 21 or older

[ ] Charges apply to services furnished to the following reasonable categories of individuals listed below who are 18 years of age or older but under age 21.

TN #92-28
Supersedes TN #91-75
Approval Date January 25, 1994
Effective Date November 1, 1993
For the categorically needy and qualified Medicare beneficiaries, ATTACHMENT 4.18-A specifies the:

(A) Service(s) for which a charge(s) is applied;

(B) Nature of the charge imposed on each service;

(C) Amount(s) of and basis for determining the charge(s);

(D) Method used to collect the charge(s);

(E) Basis for determining whether an individual is unable to pay the charge and the means by which such an individual is identified to providers;

(F) Procedures for implementing and enforcing the exclusions from cost sharing contained in 42 CFR 447.53(b); and

(G) Cumulative maximum that applies to all deductible, coinsurance or copayment charges imposed on a specified time period.

[ ] Not applicable. There is no maximum.
A monthly premium is imposed on pregnant women and infants who are covered under section 1902(a)(10)(A)(ii)(IX) of the Act and whose income equals or exceeds 150 percent of the Federal poverty level applicable to a family of the size involved. The requirements of section 1916(c) of the Act are met. ATTACHMENT 4.18-D specifies the method the State uses for determining the premium and the criteria for determining what constitutes undue hardship for waiving payment of premiums by recipients.

For families receiving extended benefits during a second 6-month period under section 1925 of the Act, a monthly premium is imposed in accordance with sections 1925(b)(4) and (5) of the Act.

A monthly premium, set on a sliding scale, imposed on qualified disabled and working individuals who are covered under section 1902(a)(10)(E)(ii) of the Act and whose income exceeds 150 percent (but does not exceed 200 percent) of the Federal poverty level applicable to a family of the size involved. The requirements of section 1916(d) of the Act are met. ATTACHMENT 4.18-E specifies the method and standards the State uses for determining the premium.
4.18(c)  [X]  Individuals are covered as medically needy under the plan.

(1)  [ ]  An enrollment fee, premium or similar charge is imposed. ATTACHMENT 4.18-B specifies the amount of and liability period for such charges subject to the maximum allowable charges in 42 CFR 447.52(b) and defines the State's policy regarding the effect on recipients of non-payment of the enrollment fee, premium, or similar charge.

(2)  No deductible, coinsurance, copayment, or similar charge is imposed under the plan for the following:

(i)  Services to individuals under age 18, or under -

[ ]  Age 19

[ ]  Age 20

[X]  Age 21

Reasonable categories of individuals who are age 18, but under age 21, to whom charges apply are listed below, if applicable:

TN  #92-28          Approval Date  January 25, 1994
Supersedes TN  #91-75  Effective Date  November 1, 1993
4.18(c)(2) (Continued)

(ii) Services to pregnant women related to the pregnancy or any other medical condition that may complicate the pregnancy.

(iii) All services furnished to pregnant women.

[ ] Not applicable. Charges apply for services to pregnant women unrelated to the pregnancy.

(iv) Services furnished to any individual who is an inpatient in a hospital, long-term care facility, or other medical institution, if the individual is required, as a condition of receiving services in the institution, to spend for medical costs all but a minimal amount of his income required for personal needs.

(v) Emergency services if the services meet the requirements in 42 CFR 447.53(b)(4).

(vi) Family planning services and supplies furnished to individuals of childbearing age.

1916 of the Act, P.L. 99-272 (Section 9505)

(vii) Services furnished to an individual receiving hospice care, as defined in section 1905(o) of the Act.

(viii) Services provided by a health maintenance organization (HMO) to enrolled individuals.

[ ] Not applicable. No such charges are imposed.
Citation 4.18(c)(3)  Unless a waiver under 42 CFR 431.55(g) applies, nominal deductible, coinsurance, copayment, or similar charges are imposed on services that are not excluded from such charges under item (b)(2) above.

[ ] Not applicable. No such charges are imposed.

(i) For any service, no more than one type of charge is imposed.

(ii) Charges apply to services furnished to the following age group:

[ ] 18 or older

[ ] 19 or older

[ ] 20 or older

[X] 21 or older

Reasonable categories of individuals who are 18 years of age, but under 21, to whom charges apply are listed below, if applicable.
For the medically needy, and other optional groups, ATTACHMENT 4.18-C specifies the:

(A) Service(s) for which charge(s) is applied;

(B) Nature of the charge imposed on each service;

(C) Amount(s) of and basis for determining the charge(s);

(D) Method used to collect the charge(s);

(E) Basis for determining whether an individual is unable to pay the charge(s) and the means by which such an individual is identified to providers;

(F) Procedures for implementing and enforcing the exclusions from cost sharing contained in 42 CFR 447.53(b); and

(G) Cumulative maximum that applies to all deductible, coinsurance, or copayment charges imposed on a family during a specified time period.

[ ] Not applicable. There is no maximum.

4.19 Payment for Services

(a) The Medicaid agency meets the requirements of 42 CFR Part 447, Subpart C, and sections 1902(a)(13) and 1923 of the Act with respect to payment for inpatient hospital services.

ATTACHMENT 4.19-A describes the methods and standards used to determine rates for payment for inpatient hospital services.

[X] Inappropriate level of care days are covered and are paid under the State plan at lower rates than other inpatient hospital services, reflecting the level of care actually received, in a manner consistent with section 1861(v)(1)(G) of the Act.

[ ] Inappropriate level of care days are not covered.

March 3, 1992
TN #91-75 Approval Date
Supersedes TN #87-47 Effective Date
October 1, 1991
4.19(b) In addition to the services specified in paragraphs 4.19(a), (d), (k), (l), and (m), the Medicaid agency meets the following requirements:

(1) Section 1902(a)(13)(E) of the Act regarding payment for services furnished by Federally qualified health centers (FQHCs) under section 1905(a)(2)(C) of the Act. The agency meets the requirements of section 6303 of the State Medicaid Manual (HCFA-Pub. 45-6) regarding payment for FQHC services. ATTACHMENT 4.19-B describes the method of payment and how the agency determines the reasonable costs of the services (for example, cost-reports, cost or budget reviews, or sample surveys).

(2) Sections 1902(a)(13)(E) and 1926 of the Act, and 42 CFR Part 447, Subpart D, with respect to payment for all other types of ambulatory services provided by rural health clinics under the plan.

ATTACHMENT 4.19-B describes the methods and standards used for the payment of each of these services except for inpatient hospital, nursing facility services and services in intermediate care facilities for the mentally retarded that are described in other attachments.

1902(a)(10) and 1902(a)(30) of the Act

SUPPLEMENT 1 to ATTACHMENT 4.19-B describes general methods and standards used for establishing payment for Medicare Part A and B deductible/coinsurance.

4.19(i) The Medicaid agency's payments are sufficient to enlist enough providers so that services under the plan are available to recipients at least to the extent that those services are available to the general population.

TN #79-24
Supersedes TN #78-18

Approval Date  October 16, 1979
Effective Date  August 6, 1979
The Medicaid agency meets the requirements of 42 CFR 447.205 for public notice of any changes in Statewide method or standards for setting payment rates.

The Medicaid agency meets the requirements of section 1903(v) of the Act with respect to payment for medical assistance furnished to an alien who is not lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law. Payment is made only for care and services that are necessary for the treatment of an emergency medical condition, as defined in section 1903(v) of the Act.

The Medicaid agency meets the requirements of section 1903(i)(14) of the Act* with respect to payment for physician services furnished to children under 21 and pregnant women. Payment for physician services furnished by a physician to a child or a pregnant woman is made only to physicians who meet one of the requirements listed under this section of the Act.

* and Section 6400 of the State Medicaid Manual
New York
66(b)

4.19(m) Medicaid Reimbursement for Administration of Vaccines under the Pediatric Immunization Program

1928(c)(2)(C)(ii) of the Act

(i) A provider may impose a charge for the administration of a qualified pediatric vaccine as stated in 1928(c)(2)(C)(ii) of the Act. Within this overall provision, Medicaid reimbursement to providers will be administered as follows.

(ii) The State:

_ X _ sets a payment rate at the level of the regional maximum established by the DHHS Secretary.

___ is a Universal Purchase State and sets a payment rate at the level of the regional maximum established in accordance with State law.

___ sets a payment rate below the level of the regional maximum established by the DHHS Secretary.

___ is a Universal Purchase State and sets a payment rate below the level of the regional maximum established by the Universal Purchase State.

The State pays the following rate for the administration of a vaccine:

1926 of the Act

(iii) Medicaid beneficiary access to immunizations is assured through the following methodology:

If indicated, the State will show, via the obstetrical/pediatric State Plan amendment submittal, that the VFC administration fee meets the applicable statutory requirements of the Social Security Act.

4.24 Standards for Payments for Nursing Facility and Intermediate Care Facility for the Mentally Retarded Services

With respect to nursing facilities and intermediate care facilities for the mentally retarded, all applicable requirements of 42 CFR Part 442, Subparts B and C are met.

___ Not applicable to intermediate care facilities for the mentally retarded; such services are not provided under this plan.

Approval Date September 8, 1994
Effective Date April 1, 1994
4.25 Program for Licensing Administrators of Nursing Homes

The State has a program that, except with respect to Christian Science sanatoria, meets the requirements of 42 CFR Part 431, Subpart N, for the licensing of nursing home administrators.
4.26 Drug Utilization Review Program

A.1. The Medicaid agency meets the requirements of Section 1927(g) of the Act for a drug use review (DUR) program for outpatient drug claims.

1927(g)(1)(A)

2. The DUR program assures that prescriptions for outpatient drugs are:
   - Appropriate
   - Medically necessary
   - Are not likely to result in adverse medical results

1927(g)(1)(a)

B. The DUR program is designed to educate physicians and pharmacists to identify and reduce the frequency of patterns of fraud, abuse, gross overuse, or inappropriate or medically unnecessary care among physicians, pharmacists, and patients or associated with specific drugs as well as:
   - Potential and actual adverse drug reactions
   - Therapeutic appropriateness
   - Overutilization and underutilization
   - Appropriate use of generic products
   - Therapeutic duplication
   - Drug disease contraindications
   - Drug-drug interactions
   - Incorrect drug dosage or duration of drug treatment
   - Drug-allergy interactions
   - Clinical abuse/misuse

1927(g)(1)(B)

C. The DUR program shall assess data use against predetermined standards whose source materials for their development are consistent with peer-reviewed medical literature which has been critically reviewed by unbiased independent experts and the following compendia:
   - American Hospital Formulary Service Drug Information
   - United States Pharmacopeia-Drug Information
   - American Medical Association Drug Evaluations

DUR is not required for drugs dispensed to residents of nursing facilities that are in compliance with drug regimen review procedures set forth in 42 CFR 483.60. The State has never-the-less chosen to include nursing home drugs in:

___ Prospective DUR

X Retrospective DUR. *

The DUR program includes prospective review of drug therapy at the point of sale or point of distribution before prescription is filled or delivered to the Medicaid recipient.

Prospective DUR includes screening each prescription filled delivered to an individual receiving benefits for potential drug therapy problems due to:

- Therapeutic duplication
- Drug-disease contraindications
- Drug-drug interactions
- Drug-interactions with non-prescription or over-the-counter drugs
- Incorrect drug dosage or duration of drug treatment
- Drug allergy interactions
- Clinical abuse/misuse

Prospective DUR includes counseling for Medicaid recipients based on standards established by State law and maintenance of patient profiles.

The DUR program includes retrospective DUR through its mechanized drug claims processing and information retrieval system or otherwise which undertakes ongoing periodic examination of claims data and other records to identify:

- Patterns of fraud and abuse
- Gross overuse
- Inappropriate or medically unnecessary care among physicians, pharmacists, Medicaid recipients, or associated with specific drugs or groups of drugs.

* The State’s RetroDUR System will capture and perform retrospective DUR on any drug product not included in a nursing home’s per diem rate.

TN #93-21 Approval Date September 13, 1993
Supersedes TN #92-23 Effective Date April 1, 1993
The DUR program assesses data on drug use against explicit predetermined standards including but not limited to monitoring for:

- Therapeutic appropriateness
- Overutilization and underutilization
- Appropriate use of generic products
- Therapeutic duplication
- Drug-disease contraindications
- Drug-drug interactions
- Incorrect drug dosage/duration of drug treatment
- Clinical abuse/misuse

The DUR program through its State DUR Board, using data provided by the Board, provides for active and ongoing educational outreach programs to educate practitioners on common drug therapy problems to improve prescribing and dispensing practices.

The DUR program has established a State DUR Board either:

- X Directly, or
- ___ Under contract with a private organization

The DUR Board membership includes health professionals (one-third licensed actively practicing pharmacists and one-third but no more than 51 percent licensed and actively practicing physicians) with knowledge and experience in one or more of the following:

- Clinically appropriate prescribing of covered outpatient drugs
- Clinically appropriate dispensing and monitoring of covered outpatient drugs
- Drug use review, evaluation and intervention
- Medical quality assurance.

The activities of the DUR Board include:

- Retrospective DUR,
- Application of Standards as defined in section 1927(g)(2)(C), and
- Ongoing interventions for physicians and pharmacists targeted toward therapy problems or individuals identified in the course of retrospective DUR.
Citation

1927(g)(3)(C) 42 CFR 456.711 (a)-(d)  G.4. The interventions include in appropriate instances:

- Information dissemination
- Written, oral, and electronic reminders
- Face-to-Face discussions
- Intensified monitoring/review of prescribers/dispensers

1927(g)(3)(D) 42 CFR 456.712 (A) and (B)  H. The State assures that it will prepare and submit an annual report to the Secretary, which incorporates a report from the State DUR Board, and that the State will adhere to the plans, steps, procedures as described in the report.

1927(h)(1) 42 CFR 456.722  ___  I.1. The State establishes, as its principal means of processing claims for covered outpatient drugs under this title, a point-of-sale electronic claims management system to perform on-line:

- real time eligibility verification
- claims data capture
- adjudication of claims
- assistance to pharmacists, etc. applying for and receiving payment.

1927(g)(2)(A)(i) 42 CFR 456.705(b)  ___  2. Prospective DUR is performed using an electronic point of sale drug claims processing system.

1927(j)(2) 42 CFR 456.703(c)  J. Hospitals which dispense covered outpatient drugs are exempted from the drug utilization review requirements of this section when facilities use drug formulary systems and bill the Medicaid program no more than the hospital’s purchasing cost for such covered outpatient drugs.

Supersedes TN NEW Effective Date April 1, 1990
Enforcement of Compliance for Nursing Facilities

42 CFR §488.402(f)(a) Notification of Enforcement Remedies

When taking an enforcement action against a non-State operated NF, the State provides notification in accordance with 42 CFR 488.402(f).

(i) The notice (except for civil money penalties and State monitoring) specifies the:

   (1) nature of noncompliance,
   (2) which remedy is imposed,
   (3) effective date of the remedy, and
   (4) right to appeal the determination leading to the remedy.

42 CFR §488.434(ii) The notice for civil money penalties is in writing and contains the information specified in 42 CFR 488.434.

42 CFR §488.402(f)(2)(iii) Except for civil money penalties and State monitoring, notice is given at least 2 calendar days before the effective date of the enforcement remedy for immediate jeopardy situations and at least 15 calendar days before the effective date of the enforcement remedy when immediate jeopardy does not exist.

42 CFR §488.456(c)(d)(iv) Notification of termination is given to the facility and to the public at least 2 calendar days before the remedy's effective date if the noncompliance constitutes immediate jeopardy and at least 15 calendar days before the remedy's effective date if the noncompliance does not constitute immediate jeopardy. The State must terminate the provider agreement of an NF in accordance with procedures in parts 431 and 442.

42 CFR §488.404(b)(1)(i) In determining the seriousness of deficiencies, the State considers the factors specified in 42 CFR 488.404(b)(1) & (2).

--- The State considers additional factors. Attachment 4.35-A describes the State's other factors.
New York
79c.2

(c) Application of Remedies

42 CFR §488.410

(i) If there is immediate jeopardy to resident health or safety, the State terminates the NF's provider agreement within 23 calendar days from the date of the last survey or immediately imposes temporary management to remove the threat within 23 days.

42 CFR §488.417(b) §1919(h)(2)(C)
of the Act.

(ii) The State imposes the denial of payment (or its approved alternative) with respect to any individual admitted to an NF that has not come into substantial compliance within 3 months after the last day of the survey.

42 CFR §488.414 §1919(h)(2)(D)
of the Act.

(iii) The State imposes the denial of payment for new admissions remedy as specified in §488.417 (or its approved alternative) and a State monitor as specified at §488.422, when a facility has been found to have provided substandard quality of care on the last three consecutive standard surveys.

42 CFR §488.408 1919(h)(2)(A)
of the Act.

(iv) The State follows the criteria specified at 42 CFR §488.408(c)(2), §488.408(d)(2), and §488.408(e)(2), when it imposes remedies in place of or in addition to termination.

42 CFR §488.412(a)

(v) When immediate jeopardy does not exist, the State terminates an NF's provider agreement no later than 6 months from the finding of noncompliance, if the conditions of 42 CFR 488.412(a) are not met.

(d) Available Remedies

42 CFR §488.406(b) §1919(h)(2)(A)
of the Act.

(i) The State has established the remedies defined in 42 CFR 488.406(b).

_X_ (1) Termination
_X_ (2) Temporary Management

4.38 Nurse Aid Training and Competency Evaluation for Nursing Facilities

(a) The State assures that the requirements of 42 CFR 483.150(a), which relate to individuals deemed to meet the nurse aide training and competency evaluation requirements, are met.

(b) The State waives the competency evaluation requirements for individuals who meet the requirements of 42 CFR 483.150(b)(1).

(c) The State deems individuals who meet the requirements of 42 CFR 483.150(b)(2) to have met the nurse aide training and competency evaluation requirements.

(d) The State specifies any nurse aide training and competency evaluation programs it approves as meeting the requirements of 42 CFR 483.152 and competency evaluation programs it approves as meeting the requirements of 42 CFR 483.154.

(e) The State offers a nurse aide training and competency evaluation program that meets the requirements of 42 CFR 483.152.

(f) The State offers a nurse aide competency evaluation program that meets the requirements of 42 CFR 483.154.

**Approval Date** January 31, 1995

**Supersedes TN NEW**

**Effective Date** April 1, 1992
1919(g)(2) (A)(i) of the Act

(g) The State has procedures, as provided for at section 1919(g)(2)(A)(i), for the scheduling and conduct of standard surveys to assure that the State has taken all reasonable steps to avoid giving notice through the scheduling procedures and the conduct of the surveys themselves. Attachment 4.40-C describes the State's procedures.

1919(g)(2) (A)(ii) of the Act

(h) The State assures that each facility shall have a standard survey which includes (for a case-mix stratified sample of residents) a survey of the quality of care furnished, as measured by indicators of medical, nursing and rehabilitative care, dietary and nutritional services, activities and social participation, and sanitation, infection control, and the physical environment, written plans of care and audit of resident’s assessments, and a review of compliance with resident’s rights not later than 15 months after the date of the previous standard survey.

1919(g)(2) (A)(iii)(I) of the Act

(i) The State assures that the Statewide average interval between standard surveys of nursing facilities does not exceed 12 months.

1919(g)(2) (A)(iii)(II) of the Act

(j) The State may conduct a special standard or special abbreviated standard survey within 2 months of any change of ownership, administration, management, or director of nursing of the nursing facility to determine whether the change has resulted in any decline in the quality of care furnished in the facility.

1919(g)(2) (B) of the Act

(k) The State conducts extended surveys immediately or, if not practicable, not later than 2 weeks following a completed standard survey in a nursing facility which is found to have provided substandard care or in any other facility at the Secretary’s or State’s discretion.

1919(g)(2) (C) of the Act

(l) The State conducts standard and extended surveys based upon a protocol, i.e., survey forms, methods, procedures and guidelines developed by HCFA, using individuals in the survey team who meet minimum qualifications established by the Secretary.

TN #92-37

Approval Date January 31, 1995

Supersedes TN NEW

Effective Date April 1, 1992
1919(g)(2) (D) of the Act

(m) The State provides for programs to measure and reduce inconsistency in the application of survey results among surveyors. Attachment 4.40-D describes the State's programs.

1919(g)(2) (E)(i) of the Act

(n) The State uses a multidisciplinary team of professionals including a registered professional nurse.

1919(g)(2) (E)(ii) of the Act

(o) The State assures that members of a survey team do not serve (or have not served within the previous two years) as a member of the staff or consultant to the nursing facility or has no personal or familial financial interest in the facility being surveyed.

1919(g)(2) (E)(iii) of the Act

(p) The State assures that no individual shall serve as a member of any survey team unless the individual has successfully completed a training and test program in survey and certification techniques approved by the Secretary.

1919(g)(4) of the Act

(q) The State maintains procedures and adequate staff to investigate complaints of violations of requirements by nursing facilities and onsite monitoring. Attachment 4.40-E describes the State's complaint procedures.

1919(g)(5) (A) of the Act

(r) The State makes available to the public information respecting surveys and certification of nursing facilities including statements of deficiencies, plans of correction, copies of cost reports, statements of ownership and the information disclosed under section 1126 of the Act.

1919(g)(5) (B) of the Act

(s) The State notifies the State long-term care ombudsman of the State's finding of non-compliance with any of the requirements of subsection (b), (c), and (d) or of any adverse actions taken against a nursing facility.

1919(g)(5) (C) of the Act

(t) If the State finds substandard quality of care in a facility, the State notifies the attending physician of each resident with respect to which such finding is made and the nursing facility administrator licensing board.

1919(g)(5) (D) of the Act

(u) The State provides the State Medicaid fraud and abuse agency access to all information concerning survey and certification actions.

6.3 State Financial Participation

(a) State funds are used in both assistance and administration.

[ ] State funds are used to pay all of the non-Federal share of total expenditures under the plan.

[X] There is local participation. State funds are used to pay not less than 40 percent of the non-Federal share of the total expenditures under the plan. There is a method of apportioning Federal and State funds among the political subdivisions of the State on an equalization or other basis which assures that lack of adequate funds from local sources will not result in lowering the amount, duration, scope or quality of care and services or level of administration under the plan in any part of the State.

(b) State and Federal funds are apportioned among the political subdivisions of the State on a basis consistent with equitable treatment of individuals in similar circumstances throughout the State.

7.1 Plan Amendments

42 CFR 430.12(c) The plan will be amended whenever necessary to reflect new or revised Federal statutes or regulations or material change in State law, organization, policy or State agency operation.
In accordance with title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et. seq.), Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 70b), and the regulations at 45 CFR Parts 80 and 84, the Medicaid agency assures that no individual shall be subject to discrimination under this plan on the grounds of race, color, national origin, or handicap.

The Medicaid agency has methods of administration to assure that each program or activity for which it receives Federal financial assistance will be operated in accordance with title VI regulations. These methods for title VI are described in ATTACHMENT 7.2-A.
7.3 **Maintenance of AFDC Efforts**

[X] The State agency has in effect under its approved AFDC plan payment levels that are equal to or more than the AFDC payment levels in effect on May 1, 1988.

STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT
MEDICAL ASSISTANCE PROGRAM

STATE OF NEW YORK

ATTORNEY GENERAL'S CERTIFICATION

I certify that:

The New York State Department of Health is the single State agency responsible for:

[ ] administering the plan.

The legal authority under which the agency administers the plan on a Statewide basis is:

________________________________________________________________________
(Statutory citation)

[x] supervising the administration of the plan by local political subdivisions.

The legal authority under which the agency supervises the administration of the plan on a Statewide basis is contained in:

Sections 363-a and Section 366-a(2)(a) of the Social Services Law and
Section 291 of the Public Health Law

(Statutory citation)

The agency's legal authority to make rules and regulations that are binding on the political subdivisions administering the plan is:

Section 363-a of the Social Services Law and
Sections 201 and 206 of the Public Health Law

(Statutory citation)

State Plan Administration

Designation and Authority

42 CFR 431.10

Designation and Authority

State Name: New York State

As a condition for receipt of Federal funds under title XIX of the Social Security Act, the single state agency named below submits the following state plan for the medical assistance program, and hereby agrees to administer the program in accordance with the provisions of this state plan, the requirements of titles XI and XIX of the Act, and all applicable Federal regulations and other official issuances of the Department.

Name of single state agency: Department of Health

Type of Agency:

☐ Title IV-A Agency
☐ Health
☐ Human Resources
☐ Other

The above named agency is the single state agency designated to administer or supervise the administration of the Medicaid program under title XIX of the Social Security Act. (All references in this plan to “the Medicaid agency” mean the agency named as the single state agency.)

The state statutory citation for the legal authority under which the single state agency administers the state plan is:

NY Social Services 363-a, PHL 201

The single state agency supervises the administration of the state plan by local political subdivisions.

☐ Yes ☐ No

The state statutory citation for the legal authority under which the agency supervises the administration of the plan on a statewide basis is:

NY Social Services 363-a, PHL 201, PHL 206, 366-a, (2) (a)

The state statutory citation under which the single state agency has legal authority to make rules and regulations that are binding on the political subdivisions administering the plan is:

NY Social Services 363-a, PHL 201, PHL 206

The certification signed by the state Attorney General identifying the single state agency and citing the legal authority under which it administers or supervises administration of the program has been provided.
The state plan may be administered solely by the single state agency, or some portions may be administered by other agencies. The single state agency administers the entire state plan under title XIX (i.e., no other agency or organization administers any portion of it).

☐ Yes  ☐ No

Waivers of the single state agency requirement have been granted under authority of the Intergovernmental Cooperation Act of 1968. The waivers are still in effect.

☐ Yes  ☐ No

Enter the following information for each waiver:

Date waiver granted (MM/DD/YY): 06/11/14

☐ Determining eligibility
☒ Conducting fair hearings
☐ Other

Name of state agency to which responsibility is delegated:

NYS Office of Temporary and Disability Assistance (OTDA).

Describe the organizational arrangement authorized, the nature and extent of responsibility for program administration delegated to the above named agency, and the resources and/or services of such agency to be utilized in administration of the plan:

Consistent with relevant federal and state law with respect thereto and as designated by the Department of Health (DOH), when fair hearings are requested, OTDA: provides such hearings for all non-MAGI Medicaid applicants or beneficiaries with respect to their Medicaid eligibility and any adverse agency action with respect thereto; issues final administrative decisions on behalf of the DOH Commissioner; takes such steps as may be necessary to enforce DOH's final determinations and decisions.

The methods for coordinating responsibilities among the agencies involved in administration of the plan under the alternate organizational arrangement are as follows:

DOH communicates Medicaid eligibility and policy directives to OTDA and trains OTDA personnel on such matters. DOH maintains policies and procedures reasonably necessary to monitor and evaluate the effectiveness and efficiency of the activities performed by OTDA with regard to conducting fair hearings. DOH retains oversight of the State Plan and has a process to monitor the entire appeals process, including the quality and accuracy of the final decisions made by OTDA. OTDA makes and issues the final decision (for non-MAG1 cases) on behalf of the Department of Health (DOH) pursuant to DOH statutes, regulations and policies. In legal force and effect, the decisions are final DOH decisions. DOH regulations set forth the Commissioner's authority to review any issued fair hearing decision and correct any error of law or fact and/or any other error occurring in the production of any decision. OTDA conducts all non-MAGI Medicaid fair hearings including service related.
The agency that administers or supervises the administration of the plan under Title X of the Act as of January 1, 1965, has been separately designated to administer or supervise the administration of that portion of this plan related to blind individuals.

The entity or entities that have responsibility for determinations of eligibility for families, adults, and for individuals under 21 are:

- The Medicaid agency
- Single state agency under Title IV-A (in the 50 states or the District of Columbia) or under Title I or XVI (AABD) in Guam, Puerto Rico, or the Virgin Islands
- An Exchange that is a government agency established under sections 1311(b)(1) or 1321(c)(1) of the Affordable Care Act

The entity that has responsibility for determinations of eligibility for the aged, blind, and disabled are:

- The Medicaid agency
- Single state agency under Title IV-A (in the 50 states or the District of Columbia) or under Title I or XVI (AABD) in Guam, Puerto Rico, or the Virgin Islands
- An Exchange that is a government agency established under sections 1311(b)(1) or 1321(c)(1) of the Affordable Care Act
- The Federal agency administering the SSI program

Indicate which agency determines eligibility for any groups whose eligibility is not determined by the Federal agency:

- Medicaid agency
- Title IV-A agency
- An Exchange

The entity or entities that have responsibility for conducting fair hearings with respect to denials of eligibility based on the applicable modified adjusted gross income standard are:

- Medicaid agency
- An Exchange that is a government agency established under sections 1311(b)(1) or 1321(c)(1) of the Affordable Care Act
- An Exchange appeals entity, including an entity established under section 1411(f) of the Affordable Care Act

The agency has established a review process whereby the agency reviews appeals decisions made by the Exchange or Exchange appeals entity or other state agency, but only with respect to conclusions of law, including interpretations of state or federal policies.

Yes  No

New York

Attachment 1.1-A
Medicaid Administration

Organization and Administration

Provide a description of the organization and functions of the Medicaid agency.

The Office of Health Insurance Programs (OHIP) and the Office of Health Benefit Exchange are two separate offices, out of a total of twelve offices under the authority of the Commissioner of the Department of Health. OHIP is responsible for administering New York's Medicaid program by collaborating with stakeholders across the health care industry including other state agencies, local and federal government agencies, providers, members, and community-based organizations to optimize the health of Medicaid members. The Fair hearing process for the MAGI population is within and conducted by the Office of Health Benefit Exchange.

OHIP encompasses eight distinct divisions.

Division of Finance and Rate Setting
This division is responsible for all functions within OHIP related to rate setting, including managed care rates.

Division of Program Development and Management
This division is responsible for all policy and strategic planning including waiver and State Plan Amendments, and policy related to medical, dental, pharmacy (including EPIC), behavioral health and transportation management.

Division of Health Plan Contracting & Oversight
This division is responsible for managed care organization (MCO) contracting, oversight of health plan compliance with applicable federal and state regulations.

Division of Long Term Care
This division is responsible for the managed long term care program which includes oversight of the growth of the program as well as other care coordination models.

Division of OHIP Operations
This division is responsible for fee-for-service (FFS) program management and operations for medical and dental prior approval, pended claim reviews, utilization edit development, rate loading and payment file maintenance, provider enrollment and the electronic health records incentive program.

Division of Health Reform and Health Insurance Exchange Integration
The division is responsible for administering New York's Medicaid program by collaborating with stakeholders across the health care industry including other state agencies, local and federal government agencies, providers, members, and community-based organizations. The division interprets, develops and implements federal and state legislation. The division also establishes policies, guidelines and instructions by writing directives to local districts for all Medicaid populations including MAGI, Non-MAGI and persons who are aged, blind, or disabled. With division oversight, the local districts process applications and determine eligibility for non-MAGI, Presumptive eligibility for Pregnant Women and Children. Local districts also process renewals for the aforementioned populations, as well as, the MAGI population until the MAGI renewals are transitioned to the SBM. MAGI applications are processed by the Office of Health Benefit Exchange with division guidance.

Division of OHIP Systems
This division is responsible for the oversight of the MMIS (eMedNY system) contract and the technical support of the development of the Health Exchange.

Division of Human Resources and Administration
This division interacts with OHIP management in planning, coordinating, developing and implementing all activities related to OHIP human resources.

Upload an organizational chart of the Medicaid agency.

New York
**Medicaid Administration**

Provide a description of the structure of the state's executive branch which includes how the Medicaid agency fits in with other health, human service and public assistance agencies.

The Executive Branch of New York State is headed by the Governor. The Executive Branch is the part of the government that has the sole authority and responsibility for the daily administration of the State's business. New York State's governmental activities are carried out by several departments within the Executive Branch. The New York Department of Health is one of these agencies. The Department of Health (DOH) coordinates policy and activities specifically to protect, improve and promote the health, productivity and well being of all New Yorkers. The Department of Health is responsible for the Medicaid program. Separate from DOH and its own distinctive agency the Office of Mental Health determines Medicaid eligibility for seriously emotionally disturbed children up to the age of 21 within the 1915(c) waiver. Separate from DOH and its own distinctive agency the Office of People with Developmental Disabilities determines Medicaid eligibility for developmentally disabled adults and children, within the 1915(c) waiver. OTDA administers public assistance programs, including cash assistance, Supplemental Nutrition Assistance Program (SNAP), and Home Energy Assistance Program (HEAP). The Office of Health Benefit Exchange is a separate and distinct office within the Department of Health.

### Entities that determine eligibility other than the Medicaid Agency (If entities are described under Designation and Authority)

<table>

</tr>
</tbody>
</table>

Provide a description of the staff designated by the entity and the functions they perform in carrying out their responsibility.

### Supervision of state plan administration by local political subdivisions (if described under Designation and Authority)

Is the supervision of the administration done through a state-wide agency which uses local political subdivisions?

| ☐ Yes | ☐ No |

TN: 13-0056-MM4  Approval Date: 10/24/2014  Effective Date: 01/01/2014

New York  A1
The types of the local subdivisions that administer the state plan under the supervision of the Medicaid agency are:

- Counties
- Parishes
- Other

Are all of the local subdivisions indicated above used to administer the state plan?

- Yes
- No

Indicate the number used to administer the state plan: 58

Description of the staff and functions of the local subdivisions:

Local Department of Social Services employees are civil servants qualified to be appointed to various positions. They receive and process Medicaid applications pursuant to New York State laws and regulations. They determine financial eligibility, categorical classification, continued financial eligibility, and income maintenance review for the Aged, Blind, Disabled, Presumptive eligibility for Pregnant Women, Children and non-MAGI categories, as well as, renewal determinations of MAGI categories until such time as the categories can be transitioned to the Health Benefit Exchange.

State Plan Administration Assurances

42 CFR 431.10
42 CFR 431.12
42 CFR 431.50

Assurances

☐ The state plan is in operation on a statewide basis, in accordance with all the requirements of 42 CFR 431.50.

☐ All requirements of 42 CFR 431.10 are met.

☐ There is a Medical Care Advisory Committee to the agency director on health and medical services established in accordance with meeting all the requirements of 42 CFR 431.12.

☐ The Medicaid agency does not delegate, to other than its own officials, the authority to supervise the plan or to develop or issue policies, rules, and regulations on program matters.

Assurance for states that have delegated authority to determine eligibility:

☐ There is a written agreement between the Medicaid agency and the Exchange or any other state or local agency that has been delegated authority to determine eligibility for Medicaid eligibility in compliance with 42 CFR 431.10(d).

Assurances for states that have delegated authority to conduct fair hearings:

- There is a written agreement between the Medicaid agency and the Exchange or Exchange appeals entity that has been delegated authority to conduct Medicaid fair hearings in compliance with 42 CFR 431.10(d).

- When authority is delegated to the Exchange or an Exchange appeals entity, individuals who have requested a fair hearing are given the option to have their fair hearing conducted instead by the Medicaid agency.

Assurance for states that have delegated authority to determine eligibility and/or to conduct fair hearings:

TN: 13-0056-MM4 Approval Date: 10/24/2014 Effective Date: 01/01/2014
New York A1
The Medicaid agency does not delegate authority to make eligibility determinations or to conduct fair hearings to entities other than government agencies which maintain personnel standards on a merit basis.

The methods for coordinating responsibilities among the several agencies involved in administration of the plan under the alternate organizational arrangement are as follows:

Under Title II of the Social Services Law, the Department of Social Services has the responsibility of assuring the accuracy of the claims presented for the Federal reimbursement under Title XIX. as the Single State Agency it is responsible for auditing the Title XIX expenditures of the Departments of Health, Mental Hygiene, and the Narcotics Addiction Control Commission.

Under Section 1, Article V of the New York State Constitution and Section 6, Article 2 of the State Finance Law, the State Comptroller has audit responsibility for examination of expenditures, accounts, revenues, and receipts. He is responsible for all fiscal matters, including the accounting systems in State department and agencies. For this reason, the State Comptroller is responsible for conducting audits of Title XIX expenditures made by the Department of Mental Hygiene, Health and the Narcotics Addiction Control Commission, and for reviewing the methods of accounting used by these departments. Under U.S. Bureau of the Budget Circular A-87 we claim for the indirect costs of the services performed by the Department of Audit and Control on behalf of our Federal programs. These indirect costs include the Comptroller's audit functions on behalf of our Title XIX Medicaid Program.]

[Organizational Unit: Division of Health Care Standards and Surveillance]

The responsibilities discharged through the Division of Health Care Standards and Surveillance support the Department’s mandated purposes of protecting, promoting and preserving the health of the residents of New York State. The Division’s activities, include setting the minimum inspection of facilities needed to monitor and enforce those standards to safeguard the health of the State’s entire population, regardless of geographic location or ability to pay. From the newborns in hospitals to the elderly in the nursing homes, the constant surveillance of the full spectrum of medical services provided to the State’s varied population groups serves to reduce morbidity and mortality by ensuring that those services meet Federal and State requirements. This surveillance process includes not only the routine inspection of providers, but also the investigation of all complaints received. Whether they are the frail elderly of the State’s population, or the developmentally disabled children, the surveillance of health care providers helps to ensure that the quality of their lives reaches optimal levels.

The Division discharges its responsibilities through two groups, the Health Care Standards and Analysis Group and the Health Care Surveillance Group.

The Health Care Standards and Analysis Group is comprised of the following bureaus:

1. Bureau of Standards Development

2. Bureau of Health Care Research and Information Services

3. Bureau of Nursing Home Administrator Licensure

The Health Care Surveillance Group is comprised of the following three bureaus:

1. Bureau of Hospital Services

2. Bureau of Long Term Care Services

TN #13-0056 Approval Date October 24, 2014
Supersedes TN #97-0010 Effective Date January 1, 2014
[3. Bureau of Home Health Care Services

The Group’s surveillance function is discharged through area offices located in Albany, Buffalo, Rochester, Syracuse, New York City and New Rochelle. In addition, the New Rochelle area office operates a sub-office on Long Island.

Staff resources are directed toward meeting objectives which will ensure the provision of accessible, efficient, effective and high quality health care services.]

[Organizational Unit: Bureau of Standards Development

The Bureau develops health care standards necessary to implement Federal and State legislation applicable to all types of health care providers and services. These standards include facility or agency operating standards and standards governing the quality and availability of services provided under the Medical Assistance Program (Medicaid). In addition to the revision and modification of standards related to established forms of health care services, the Bureau is responsible for the formulation of standards dealing with new and innovative program areas. The Bureau also staffs the Code Committee of the State Hospital Review and Planning Council.

The Bureau, through its Pharmacy Unit, maintains the list of drugs eligible for reimbursement under the NYS Medicaid program, and the list of drugs eligible to the substituted for brand name prescription drugs under the NYS Generic Drug Substitution Program. Pharmaceutical provider plans, to ensure compliance with the Drug Imprinting and Labeling Law, are monitored by the Pharmacy Unit. In addition, support is provided to the EPIC (Elderly Pharmaceutical Insurance Coverage) program to determine the appropriateness of drugs covered under that program.

The Bureau has responsibility for the administration of Medical Assistance Program training funds and assists in the development of specific training initiatives.

The Bureau serves as the primary resource to the OHSM on the qualifications and scope of practice of particular professions. The staff includes administrative as well as professional personnel in various clinical care disciplines including dentistry, medicine, nursing, occupational therapy, pharmacy, and social work.]

TN #13-0056
Supersedes TN #97-0010
Approval Date October 24, 2014
Effective Date January 1, 2014
The Bureau of Health Care Research and Information Services (BHCR/IS) staff generate and maintain data registries in support of the Division's standard setting and surveillance activities and coordinate health care research and analysis activities throughout the Division. These services, provided through the use of quantitative analysis, management science and electronic data processing, enhance the Division's ability to meet its objective of assuring that the State's health system provides high quality care, thus reducing morbidity and mortality.

The Bureau has four organizational units:

- **Systems Development**: This unit is responsible for the planning and implementation of mainframe user systems and user portions of production systems that support the regulatory missions of the Division.

- **Policy Analysis**: This unit is responsible for providing quantitative policy analysis and program evaluation services to the regulatory bureaus within the Division and to OHSM executive staff.

- **Personal Computer/Data Communications Support and Application Programming**: This unit is responsible for the completion of all special purpose computer programming tasks requested by executive of program staff, and for the installation and support of PC equipment, terminals and printers throughout the Division.

- **Information Systems and Health Statistics Group (ISHS) Liaison**: An individual has been designated for lead responsibility in coordinating day-to-day contacts between Division staff and ISHS. In addition to facilitating Divisional access to ISHS services, this arrangement provides a quasi-management link to the production programmers assigned to the Division.
The activities of the Bureau of Nursing Home Administrator Licensure help to ensure the provision of appropriate and necessary health care services to the chronically ill and frail elderly population residing in nursing homes in New York State.

The Bureau of Nursing Home Administrator Licensure (BNHAL) services as staff to the New York State Board of Examiners of Nursing Home Administrators. The Board is responsible for establishing standards of education, training, and experience and providing for the examination, licensure, and registration of nursing home administrators in New York State. Currently, there are 3,650 individuals licensed as nursing home administrators in New York State.

The Board is also responsible for initiating disciplinary action against administrators who violate provisions of Article 28-D of the Public Health Law, which defines the practice of nursing home administration. The Board may suspend, revoke, annul or censure the license or registration of an administrator for violations of the Public Health law. In addition, the Board may assess civil penalties against administrators when it deems appropriate.]
[Organizational Unit: Bureau of Home Health Services (HHS)]

The Bureau of Home Health Services has six primary areas of program responsibility: 1) regulation and certification of Certified Home Health Agencies (CHHA), 2) licensure and regulation of home care service agencies, 3) development and implementation of the Long Term Home Health Care Program (LTHHCP), 4) certification and regulation of the Hospice program, 5) development, implementation and evaluation of the Chapter 831 Home Health Care Grant program and Home Health Grant Training program, and 6) provision of staff support to the State Council on Health Care Services. The Bureau is responsible for coordinating the activities of program staff in these areas through the six OHSM area offices.

The development of cost effective and high quality noninstitutional alternatives is the common thread which unifies the Bureau's major responsibilities. Each major program area is developmental in nature when compared to the more traditional forms of health delivery. A major focus of Bureau activity is the creation and implementation of innovative surveillance protocols for assuring quality in the care delivered by such programs. The facilitation and revision of legislation, regulations, and policies to create the proper environment for the development and competitive existence of home based programs is also a major component of such ongoing activities.]
The primary goal of the Bureau of Hospital Services is to promote and assure the quality of inpatient, outpatient and emergency room care provided in the 268 hospitals established under Article 28 of the Public Health Law.

In the assurance of regulatory compliance, the Bureau’s programs include a comprehensive Article 28 survey program, targeted Article 28 surveys, complaint investigation surveys, the incident reporting program, character and competence reviews as part of the certificate of need process, and Title XVIII surveys. In addition, the Bureau initiates enforcement actions against facilities to ensure regulatory compliance.

During the 1988-89 fiscal year, the Department consolidated its Utilization Review (UR) program, and as a result, the Department now has one Medicaid UR agent for upstate New York (Network Design Group) and one for the New York City and Long Island region (Island Peer Review Organization). The actual review activity is being conducted through contractual arrangements with these two medical review groups.

Comprehensive Article 28 Survey Program

The comprehensive Article 28 survey program is designed to focus on patient outcomes through the assessment of quality of patient care and the effectiveness of internal hospital quality assurance systems.
The Bureau of Long Term Care Services is the central program office responsible for the Office of Health Systems Management's long term care regulatory activities. The Bureau is responsible for directing the area office surveillance program as specified by the Health Care Financing Administration under the 1864 Agreement designating the Department of Health as the state surveillance agent for nursing homes. The program is required to enforce facility operating standards and monitor the quality of care delivered to approximately 103,714 patients/residents residing in 628 long term care facilities as specified in Titles XVIII/XIX of the Federal Social Security Act and Article 28 of the Public Health Law.

As the central, coordinative point for the survey process, the Bureau must assure that long term care standards are enforced effectively and uniformly throughout the State. The Bureau's activities are directed at ensuring that the State's skilled nursing facilities are providing all services and care necessary to enable each resident to achieve his or her highest practicable level of physical, mental and psychosocial well-being as required by federal regulation.

The activities of the Bureau of Long Term Care Services are carried out by three separate units within the Bureau: (1) Quality Assurance, Complaint Investigation, and Enforcement; (2) Surveillance Program Operations and Development; and (3) Facility Operations and Control.]
The Division of Health Facility Planning, funded within the Health Care Standards and Surveillance program is responsible for the administration of the State's Certificate of Need (CON) activities. The State mandated CON program provides a planning mechanism to ensure that health care resources are developed and made available to the public in a comprehensive, coordinated manner which is responsive to the public's health care needs. Each proposal is evaluated based on community need for beds and services, financial feasibility and cost efficiency of the project, and the competence and character of the sponsors. The review of CON applications and determination of need provide a vital step in achieving the Department's goal of quality care for all that is affordable and accessible.

In addition to its responsibility for administering the State's CON program, the Division is involved in activities designed to improve the efficiency of the existing health care network. Through examination of specific facilities and services, the Division makes recommendations regarding the merger or consolidation of facilities and changes in services to more appropriately reflect factors such as utilization and facility financial status.

The Division is composed of two groups: The Health Facility Planning Group and the Certificate of Need Review Group.

The Health Facility Planning Group is composed of two groups: The Health Facility Planning Group and the Certificate of Need Review Group.

The Health Facility Planning Group is composed of two bureaus:

1. Bureau of Health Facility Planning
2. Bureau of Architectural and Engineering Facility Planning

The Certificate of Need Review Group is composed of two bureaus and one unit:

1. Bureau of Facility and Service Review
2. Bureau of Financial Analysis and Review
3. Project Management Unit

The Division of Health Care Financing is organizationally responsible for ensuring that health care resources are most appropriately allocated. Financial management of New York State's health care system is accomplished through a variety of activities. They include developing reimbursement methodologies, setting third party reimbursement rates, administering State revenue collection programs generated through various assessments charged to health care providers, and reviewing the financing mechanisms of proposed health facility construction and expansion projects. Alternative health care financing mechanisms that offer potential cost control incentives and savings are also examined, tested and evaluated.

The following units are responsible for carrying out the duties of the Division:

1. Bureau of Health Economics
2. Bureau of Primary and Acute Care Reimbursement
4. Bureau of Long Term Care Reimbursement

THE MAJOR RESPONSIBILITIES OF THE DIVISION INCLUDE:

- Calculating and/or promulgating and approving rates of payment for hospitals, residential health care facilities, diagnostic and treatment centers, home health agencies, and other Article 28, 36, 40, 43, and 44 certified facilities.

- Adjudicating appeals to rates of payment consistent with regulations and statute.

- Developing and evaluating new and alternative financing methods for health care providers and insurers. These financing methods include improving methods of pricing health care services, refining patient provider encounters, and examining capital financing methods and utilizing insurance vehicles for providing health care services for the uninsured and underinsured.

- Administering several grant programs for global budgeting, health networks and health care demonstrations.

- Developing and implementing sponsored health care financing research activities.

TN #13-0056
Supersedes TN #97-0010
Approval Date October 24, 2014
Effective Date January 1, 2014
Establishing and administering the financing reforms detailed in the Health Care Reform Act of 1996. Developing policies, procedures and protocols that will for the first time, allow New York to move to negotiated rates for hospital care and will continue support of public policy priorities including uncompensated care, graduate medical education and numerous health care initiatives.

Administering approximately $2.0 billion in pooled funds financed through health care provider and insurer assessments and surcharges for medically indigent subsidies, various health care project initiatives, graduate medical education and physician excess malpractice coverage.

Administering collection of statutory assessments on health care providers pertaining to the Health Facility Cash Receipts Assessment Program, and the HMO Differential.

Maintaining the Patient Review Instrument (PRI) processing system, including collection of data via electronic mail, correction of data, auditing of data, assignment of Resource Utilization Group (RUG), and updating of Residential Health Care Facility (RHCF) rates to reflect changes in case mix index (CMI).

Collecting cost report data via electronic mail for five provider groups; hospitals, RHCFs, Diagnostic & Treatment Centers (D&TCs), Certified Home Health Agencies (CHHAs), and Long Term Home Health Care Programs (LTHHCPs).

Providing financial analysis services to State mortgage loan programs which provide construction financing to non-profit nursing homes and hospitals.

Designing and evaluating payment methodologies for hospitals, nursing homes and ambulatory care programs which includes conducting research studies to support Departmental policy recommendations concerning payment for and delivery of health care services; preparing Title XIX (Medicaid) State Plans for health care services which are submitted to the federal government to procure Medicaid federal financial participation; drafting regulations to implement reimbursement methodologies; preparing responses to litigation brought against the Department by providers pertaining to reimbursement methodologies; responding to inquiries from industry, other State agencies, legislative staff and the general public regarding the Medicaid financing systems; and, developing grant applications to procure outside funding for research on financing issues and economic analyses of health care systems.]

- Coordinating the development of all new Medicaid Program finance regulations and providing administrative services to the State Hospital Review and Planning Council, Fiscal Policy Committee and Medical Advisory Committee.

- Ensuring compliance with Federal statutory requirements relating to the State's provider tax programs. This includes preparation of any necessary waiver applications, and corresponding statistical testing and analysis, pursuant to Federal Law.

- Ensuring compliance with Federal Disproportionate Share payment limitations. This includes projecting hospital distributions, Medicaid and uninsured net revenue/losses and implementing such limits into the pool distribution process.

- Monitoring the Receivership Program and its related Receivership Fund, calculating capital costs, monitoring the Article 28-A Mortgage Program and controlling its related Operating Escrow Account activities.

- Monitoring and evaluating the uniform physician billing form and electronic claims submission legislative requirements, including coordination of the activities of the Physician Claim Task Force.]

[Organizational Unit: Elderly Pharmaceutical Insurance Coverage Program (EPIC)]

The Elderly Pharmaceutical Insurance Coverage (EPIC) program provides assistance to low and moderate income elderly through subsidizing the costs of their prescription medications. As of March 1990, over 76,000 seniors were enrolled in EPIC. Since the program began in October 1987, EPIC has saved these older New Yorkers over $52 million on the costs of their medications.

The program performs outreach and promotion to inform seniors about the program, enrolls eligible persons, supervises a large contractual operation which processes payments to pharmacies and participants, and performs audits of both the contractor and the providers to assure the fiscal integrity of program operations. In addition, a utilization review function assists in the detection of potential fraud or abuse, research is completed on various aspects of program participation and utilization, and a process for reconsideration and fair hearing is maintained to address participant and provider disputes.]

[Office of the Director]

The Office of the Director leads and supports the work of the Office of Medicaid Management (OMM). The Director’s Office performs the following functions:

- Provide ambassadorship to the outside world
- Works with Department of Health (DOH) executives on high-level DOH management and strategy
- Leads the overall internal functioning of OMM
- Serves as a resource to OMM managers to clarify director's views on emerging issues
- Establishes and holds division heads accountable for performance agreements]
The Bureau of Administration and Resource Support provides the other OMM units with the necessary resources to produce OMM's expected results. The Bureau performs the following functions:

- Forecasts and plans resources
- Allocates resources to the divisions and bureaus
- Manages and tracks financial State Purposes expenditures
- Coordinates the preparation of budget initiatives
- Acquires human resources necessary to support program needs
- Secures materials and equipment needed by OMM units
- Space planning
- Day-to-day operational needs
**Division of Consumer and Local District Relations**

The Division of Consumer and Local District Relations will help serve both OMM consumers and local governments. The Division will perform the following functions:

- Create eligibility guidelines
- Determine consumer eligibility (including Third Party Liability and disability reviews)
- Provide local district support (technical assistance, training, transportation)
- Resolving consumer complaints
- Assessing performance of local districts
- Educating consumers
- Connecting consumers to the correct services

Division of Information and System Support

The Division of Information and System Support will manage and support the information and system needs of the entire OMM organization. The Division will perform the following functions:

- Developing systems (planning, coordination and testing)
- Procuring and monitoring system contracts
- Monitoring and correcting the work of systems contractors
- Responding to data requests
- Developing and supporting OMM's internal PC/LAN system (strategic planning, maintenance, Internet access, help desk)
Bureau of Enforcement Activities

The Bureau of Enforcement Activities will combat actions of those groups and individuals who fail to comply with Medicaid and OMM rules and regulations. The Bureau will perform the following functions:

- Confirm occurrences of Medicaid fraud (investigation processing)
- Penalizing (sanctioning) providers guilty of Medicaid fraud
- Penalizing (sanctioning) recipients guilty of Medicaid fraud
- Actualizing due process
- Supporting prosecution with/by other law enforcement authorities
- Establishing and maintaining internal controls for OMM

Effective Date  January 1, 2014
A “health maintenance organization” (HMO) is defined in section 4401 of the Public Health Law, Chapter 45 of the Consolidated Laws of the State of New York, to mean “any person, natural or corporate, or any groups of such persons who enter into an arrangement, agreement or plan or any combination of arrangements or plans which propose to provide or offer, or which do provide or offer, a comprehensive health services plan.”

A “comprehensive health services plan” is defined in Section 4401 to mean “a plan through which each member of an enrolled population is entitled to receive comprehensive health services in consideration for a basic advance of periodic charge.”

“Comprehensive health services” are defined in Section 4401 to mean “all those health services which an enrolled population might require in order to be maintained in good health, and shall include, but shall not be limited to, physician services (including consultant and referral services), in-patient and out-patient hospital services, diagnostic laboratory and therapeutic and diagnostic radiologic services, and emergency and preventive health services.”

Section 4402 of the Public Health Law provides that “no person or groups of persons may operate a health maintenance organization or issue a contract to an enrollee for membership in a comprehensive health services plan without first obtaining a certificate of authority from the commissioner (of health).”

The Commissioner of Health may issue a certificate of authority pursuant to Section 4403 or 4403-a of the Public Health Law only if the applicant demonstrates that it has the capability of organizing, marketing, managing, promoting and operating a comprehensive health services plan, is financially responsible for the cost of providing comprehensive health services to enrollees and satisfies other conditions assuring quality of care, resolution or enrollee complaints, etc.

The HMO must make the services it provides to its Medicaid enrollees as accessible to them (in terms of timeliness, amount, duration and scope) as those services are to non-enrolled Medicaid recipients within the area served by the HMO.

The HMO must make provision, satisfactory to the Medicaid agency, against the risk of insolvency, and assure that Medicaid enrollees will not be liable for the HMO’s debts if it does become insolvent.

___ Aged
___ Blind
___ Disabled

The more restrictive categorical eligibility criteria are described below:

(Financial criteria are described in ATTACHMENT 2.6-A)

* Agency that determines eligibility for coverage.

TN #91-76 Approval Date March 3, 1992
Supersedes TN #87-35A Effective Date October 1, 1991
A. **Mandatory Coverage - Categorically Needy and Other Required Special Groups** (Continued)

14. Qualified severely impaired blind and disabled individuals under age 65, who --

a. For the month preceding the first month of eligibility under the requirements of section 1905(q)(2) of the Act, received SSI, a State supplemental payment under section 1616 of the Act or under section 212 of P.L. 93-66 or benefits under section 1619(a) of the Act and were eligible for Medicaid; or

b. For the month of June 1987, were considered to be receiving SSI under section 1619(b) of the Act and were eligible for Medicaid. These individuals must - –

(1) Continue to meet the criteria for blindness or have the disabling physical or mental impairment under which the individual was found to be disabled;

(2) Except for earnings, continue to meet all nondisability-related requirements for eligibility for SSI benefits;

(3) Have unearned income amounts that would not cause them to be ineligible for a payment under section 1611(b) of the Act;

* Agency that determines eligibility for coverage.

**TN** #91-76 **Approval Date** March 3, 1992

**Supersedes TN** #87-35A **Effective Date** October 1, 1991
### A. Mandatory Coverage - Categorically Needy and Other Required Special Groups (Continued)

<table>
<thead>
<tr>
<th>Agency *</th>
<th>Citation(s)</th>
<th>Groups Covered</th>
</tr>
</thead>
</table>

1. Be seriously inhibited by the lack of Medicaid coverage in their ability to continue to work or obtain employment; and

2. Have earnings that are not sufficient to provide for himself or herself a reasonable equivalent of the Medicaid, SSI (including any Federally administered SSP), or public funded attendant care services that would be available if he or she did have such earnings.

[ ] Not applicable with respect to individuals receiving only SSP because the State either does not make SSP payments or does not provide Medicaid to SSP-only recipients.

* Agency that determine eligibility for coverage.

**TN #91-76**

**Supersedes TN #87-35A**

**Approval Date** March 3, 1992

**Effective Date** October 1, 1991
A. **Mandatory Coverage - Categorically Needy and Other Required Special Groups** (Continued)

1619(b)(3) of the Act  

[ ] The State applies more restrictive eligibility requirements for Medicaid than under SSI and under 42 CFR 435.121. Individuals who qualify for benefits under section 1619(a) of the Act or individuals described above who meet the eligibility requirements for SSI benefits under section 1619(b)(1) of the Act and who met the State’s more restrictive requirements in the month before the month they qualified for SSI under section 1619(a) or met the requirements of section 1619(b)(1) of the Act are covered. Eligibility for these individuals continues as long as they continue to qualify for benefits under section 1619(a) of the Act or meet the SSI requirements under section 1619(b)(1) of the Act.

A. **Mandatory Coverage - Categorically Needy and Other Required Special Groups**

42 CFR 435.135 22. Individuals who --

a. Are receiving OASDI and were receiving SSI/SSP but became ineligible for SSI/SSP after April 1977; and

b. Would still be eligible for SSI or SSP if cost-of-living increases in OASDI paid under section 215(i) of the Act received after the last month for which the individual was eligible for and received SSI/SSP and OASDI, concurrently, were deducted from income.

[ ] Not applicable with respect to individuals receiving only SSP because the State either does not make such payments or does not provide Medicaid to SSP-only recipients.

[ ] Not applicable because the State applies more restrictive eligibility requirements than those under SSI.

[ ] The State applies more restrictive eligibility requirements than those under SSI and the amount of increase that caused SSI/SSP ineligibility and subsequent increases are deducted when determining the amount of countable income for categorically needy eligibility.

---

* Agency that determines eligibility for coverage.
A. **Mandatory Coverage - Categorically Needy and Other Required Special Groups**

1634 of the Act

23. Disabled widows and widowers who would be eligible for SSI or SSP except for the increase in their OASDI benefits as a result of the elimination of the reduction factor required by section 134 of Pub. L. 98-21 and who are deemed, for the purposes of title XIX, to be SSI beneficiaries or SSP beneficiaries for individuals who would be eligible for SSP only, under section 1634 (b) of the Act.

[ ] Not applicable with respect to individuals receiving only SSP because the State either does not make these payments or does not provide Medicaid to SSP-only recipients.

[ ] The State applies more restrictive eligibility standards than those under SSI and considers these individuals to have the income equalling the SSI Federal benefit rate, or the SSP benefit rate for individuals who would be eligible for SSP only, when determining countable income for Medicaid categorically needy eligibility.

* Agency that determines eligibility for coverage.

(Continued)

42 CFR 435.212  
_ X_ 3. The State deems as eligible those individuals who became otherwise ineligible for Medicaid while enrolled in a Medicaid managed care organization as defined in section 1903(m)(1)(A), with a primary care case manager as defined in section 1905(1), or with an eligible organization under section 1876 of the Act, and who would (but for this paragraph) lose eligibility for benefits under this title before the end of the minimum enrollment period (not more than six months beginning on the effective date of enrollment), the State Plan may provide, notwithstanding any other provision of this title that the individual shall be deemed to continue to be eligible for such benefits until the end of such minimum enrollment period, but, except for benefits furnished under section 1905(a)(4)(c), only with respect to such benefits provided to the individual as an enrollee of such organization or entity or by or through the case manager.

___ The State elects not to guarantee eligibility

_ X_ The State elects to guarantee eligibility. The minimum enrollment period in _6_ months (not to exceed six).

The State measures the minimum enrollment period from:

___ The date beginning the period of enrollment in the MCO or other entity, without any intervening disenrollment, regardless of Medicaid eligibility.

_ X_ The date beginning the period of enrollment in the MCO as a Medicaid patient (including periods when payment is made under this section), without any intervening disenrollment.

___ The date beginning the last period of enrollment in the MCO as a Medicaid patient (not including periods when payment is made under this section), without any intervening disenrollment or of periods of enrollment as a private paying patient. (A new minimum enrollment period begins each time the individual becomes Medicaid eligible other than under this section.)

- Aged
- Blind
- Disabled
- Individuals under the age of --
  -- 21
  -- 20
  -- 19
  -- 18
- Caretaker relatives
- Pregnant women

Approval Date  March 11, 1992
Effective Date  October 1, 1991
B. Optional Groups - Other Than Medically Needy (Continued)

42 CFR 435.220  [X]  6. Individuals who would be eligible for AFDC if their work-related child care costs were paid from earnings rather than by a State agency as a service expenditure. The State's AFDC plan deducts work-related child care costs from income to determine the amount of AFDC.

[X] The State covers all individuals as described above.

1902(a)(10)(A) (ii) and 1905(a) of the Act  [ ] The State covers only the following group or groups of individuals:

___ Individuals under the age of  -  -  -  -  -  21
___  -  -  -  -  -  20
___  -  -  -  -  -  19
___  -  -  -  -  -  18
___ Caretaker relatives
___ Pregnant women

42 CFR 435.2  1902(a)(10) (A)(ii) and 1905(a)(i) of the Act  7. [X] a. All individuals who are not described in section 1902(a)(10)(A)(i) of the Act, who meet the income and resource requirements of the AFDC State plan, and who are 21 years of age or younger as indicated below.

___ 20
___ 19
___ 18]
B. Optional Groups - Other Than Medically Needy (Continued)

42 CFR 435.222 [X] b. Reasonable classifications of individuals described in (a) above, as follows:

_ X_ (1) Individuals for whom public agencies are assuming full or partial financial responsibility and who are:

___ (a) In foster homes (and are under the age of 21).

___ (b) In private institutions (and are under the age of 21).

___ (c) In addition to the group under b. (1) (a) and (b), individuals placed in foster homes or private institutions by private, nonprofit agencies (and are under the age of ___).

_ X_ (d) Children under the age of 21 for whom guardianship assistance payments are made and individuals in the care and custody of the local social services district commissioner or who are in the care and custody of the Office of Children and Family Services for the purpose of receiving foster care (and are under the age of 21).

___ (2) Individuals in adoptions subsidized in full or part by a public agency (who are under the age of ___).

___ (3) Individuals in NFs (who are under the age of ___). NF services are provided under this plan.

___ (4) In addition to the group under (b)(3), individuals in ICFs/MR (who are under the age of ___).]

[B. Optional Groups Other Than Medically Needy](Continued)

The following reasonable classifications of children described above who are under age ___ (18,19) with family income at or below the percent of the federal poverty level specified for the classifications:

(Add Narrative Descriptions(s) Of The Reasonable Classification(s) And The Percent Of The Federal Poverty Level Used To Establish Eligibility For Each Classification.)

1920A(b)(3)(A) [X] 21. Continuous Eligibility For Children

A child under age 19 (not to exceed age 19) who has been determined eligible is deemed to be eligible for a total of 12 months (not to exceed 12 months) regardless of changes in circumstances other than attainment of the maximum age stated above.

[1902A(b)(3)(A) [X] 22. Presumptive Eligibility For Children

Children under age 19 who are determined by a “qualified entity” (as determined in §1920(A)(b)(3)(A)) based on preliminary information, to meet the highest applicable income criteria specified in this plan.

The presumptive period begins on the day that the determination is made. If an application for Medicaid is filed on the child’s behalf by the last day of the month following the month in which the determination of presumptive eligibility was made, the presumptive period ends on the day that the State agency makes a determination of eligibility based on that application. If the application is not filed on the child’s behalf by the last day of the month following the month the determination of presumptive eligibility was made, the presumptive period ends on the last day.]

B. Optional Groups Other Than Medically Needy (Continued)

1902(a)(10)(A)(ii)(XVIII) of the Act

23. Women who:

a. have been screened for breast and cervical cancer under the Centers for Disease Control and Prevention Breast and Cervical Early Detection Program established under title XV of the Public Health Service Act in accordance with the requirements of section 1504 of that Act and need treatment for breast or cervical cancer, including a pre-cancerous condition of the breast or cervix;

b. are not otherwise covered under creditable coverage, as defined in section 2701(c) of the Public Health Service Act;

c. are not eligible for Medicaid under any mandatory categorically needy eligibility group; and

d. have not attained age 65.

1920B of the Act

24. Women who are determined by a “qualified entity” (as defined in 1920B (b) based on preliminary information, to be a woman described in 1902 (aa) the Act related to certain breast and cervical cancer patients.

The presumptive period begins on the day that the determination is made. The period ends on the date that the State makes a determination with respect to the woman’s eligibility for Medicaid, or if the woman does not apply for Medicaid (or a Medicaid application was not made on her behalf) by the last day of the month following the month in which the determination of presumptive eligibility was made, the presumptive periods ends on that last day.

Populations Which Will Be Excluded Or Exempt From Managed Care
They Have Serious And/Or Complex Medical And/Or Emotional Needs

I. Excluded Populations

In addition to the Medicaid eligibles previously identified, the following Medicaid population groups will not be eligible for enrollment under this SPA.

1. Children in State-operated psychiatric facilities and residential treatment facilities for children and youth.

2. Children who are residents of residential health care facilities at the time of enrollment and children who enter a residential health care facility subsequent to enrollment, except for short-term rehabilitative stays anticipated to be no greater than 30 days.

4. Infants weighing less than 1200 grams at birth and other infants under six months of age who meet the criteria for the SSI related category (shall not be enrolled or shall be disenrolled retroactive to date of birth).

5. Children with access to comprehensive private health care coverage that is available from or under a third-party payor which may be maintained by payment, or part payment, of the premium or cost-sharing amounts, when payment of such premium or cost-sharing amounts would be cost-effective, as determined by the local social services district.

6. Children expected to be eligible for Medicaid for less than six months.

7. Homeless children residing in a NYC DHS and not enrolled in a plan at the time they enter the shelter.

8. Children in receipt (at the time of enrollment) of institutional long-term care (except ICF services for the Developmentally Disabled), Long Term Home Health Care programs, Child Care Facilities, or Hospice.

9. Children receiving mental health family care services.

10. Children enrolled in the Restricted Recipient Program.

II. Voluntary (Exempt) Populations

There are a number of population groups that will be eligible for an exemption from mandatory enrollment. Information on the exemption criteria and process will be provided.

TN #99-40 Approval Date February 20, 2002
Supersedes TN NEW Effective Date April 01, 2002
included in the enrollment materials sent to all potential eligibles. A separate pamphlet will discuss the implications and conditions of any exemptions from enrollment which are allowed). Children who fall into one of the following categories will be enrolled only on a voluntary basis:

1. **Children who are HIV+**. Once SNPs are established and certified through the milestone process, children with HIV disease must enroll in a managed care arrangement (either mainstream MCOs or SNPs). As soon as HIV SNPs are established through the milestone process in a given service area, those HIV positive children in that area who have voluntarily enrolled in mainstream MCOs will be given the option of enrolling in a SNP.

2. **Children who are diagnosed seriously emotionally disturbed (SED)**. Children who have utilized 10 or more mental health visits (mental health clinic services or mental health specialty services, or a combination of these services) in the previous calendar year will be SED. Once SNPs are established and certified through the milestone process, enrollment in SNPs will remain voluntary for the SNP-eligible population, with the exception of SED children who have not selected a mental health option and are auto-assigned to a mental health SNP. These children will be mandatorily enrolled in a certified SNP for receipt of mental health services. However, a FFS option for mental health services will only be offered in counties where there is only one mental health SNP which is operated by the county.

If SNPs are not eventually established in certain areas of the State, children who would otherwise be eligible for enrollment in mental health SNPs may: (a) receive both mental health and physical benefits on a FFS basis; (b) voluntarily enroll in certified mainstream MCOs and receive the same physical and mental health services available to other Partnership Plan enrollees residing in the same service area; or (c) voluntarily enroll in certified mainstream MCOs for the provision of physical health-only services and receive mental health benefits on a FFS basis.

3. **Children for whom a managed care provider is not geographically accessible** so as to reasonably provide services. To qualify for this exemption, a person must demonstrate that no participating MCO has a provider located within thirty minutes travel time from the children's home who is accepting new patients, and that there is a fee-for-service Medicaid provider available within the thirty minutes travel time.

4. **Pregnant women who are already receiving prenatal care from a prenatal primary care provider** not participating in any managed care plan (note: this status will last through a woman's pregnancy and sixty (60) days postpartum; after that time, she will be enrolled mandatorily into an MCO if she belongs to one of the mandatory aid categories).

5. **Children with a chronic medical condition** who, for at least six months, have been under active treatment with a non-participating subspecialist physician who is not a network provider for any MCO participating in the Medicaid managed care program service area.

6. *Children with end state renal disease (ESRD).*

7. *Children who are residents of Intermediate Care Facilities for the Mentally Retarded (ICF/MR).*

8. *Children with characteristics and needs similar to those who are residents of ICF/MRs based on criteria cooperatively established by the State Office of Mental Retardation and Developmental Disabilities (OMRDD) and the NYS Department of Health (DOH).*

9. *Children already scheduled for a major surgical procedure (within 30 days of scheduled enrollment) with a provider who is not a participant in the network of an MCO under contract for The Partnership Plan.*

10. *Children with a developmental or physical disability who receive services through a Medicaid Home-and-Community-Based Services waiver or Medicaid Model Waiver (care-at-home) through a Section 1915c waiver, or children having characteristics and needs similar to such children (including children on the waiting list), based on criteria cooperatively established by OMRDD and DOH.*

11. *Children who are residents of Alcohol and Substance Abuse Long Term Residential Treatment Programs.*

12. *New York City beneficiaries who are homeless and do not reside in a DHS shelter are exempt. Homeless children residing in a NYC DHS shelter and already enrolled in a plan at the time they enter the shelter may choose to remain enrolled. In areas outside of NYC, exemption of homeless children residing in the shelter system is at the discretion of the local district.*

13. *Children who cannot be served by a managed care provider due to a language barrier which exists when the child is not capable of effectively communicating his or her medical needs in English or a secondary language for which PCPs are available in the managed care program. Children with a language barrier still have a choice of three (3) PCPs, at least one of which is able to communicate in the primary language of the child or has a person on her/his staff capable of translating medical terminology, and the other two (2) PCPs have access to the AT&T Language Line as an alternative to communicating directly with the child in his/her language. Children will be eligible for an exemption when:*

   - The child has established a relationship with a primary care provider who has the language capability to serve the child and who does not participate in any of the managed care plans available within a thirty minute/thirty mile radius of the child’s residence.
   - Neither fee-for-service nor the above described three (3) participating PCPs are available within the thirty minute/thirty mile radius, and a fee-for-service provider with the language capability to serve the child is available outside the thirty minute/thirty mile radius and the above-described three (3) participating PCPs are not available within that radius.

---

**TN #99-40**  
**Approval Date** February 20, 2002  
**Supersedes TN NEW**  
**Effective Date** April 01, 2002
14. *Children with a County of Fiscal/Responsibility code of 98 (OMRDD in MMIS) will be exempt until the state establishes appropriate program features.* Recipients with a code of 97 (OMH in MMIS) will be mandatorily enrolled when the state establishes appropriate program features. However, many of these children will qualify for other exemptions (SED) or exclusions.

15. *Children temporarily residing out of district,* (e.g., college students) will be exempt until such time as the purpose of the absence is accomplished. The definition of temporary absence is set forth in Social Services regulations at Title 18 Section 360-1.4(p). These children will have difficulty accessing services within travel time and distance standards.

Note: Any exemption granted to children with chronic medical conditions being treated by a non-participating sub-specialist physician or those scheduled for major surgical procedures prior to enrollment with a provider outside the MCO network will apply only until such time as the child’s course of treatment is completed. Such exemptions must be renewed annually. The treating physician will determine when a child’s course of treatment is completed. However, if the child’s treating physician subsequently becomes a network provider for one of the participating MCOs the exemption will no longer apply.

Determination of a child’s eligibility for exemption will be conducted by local districts upon the request of the individual or his/her designee. Local districts (or the broker) will follow state guidelines in determining eligibility for exemption. When exemption status is unclear, the district may request assistance from the SDOH Office of Managed Care.

Children may request an exemption to enrollment in an MCO. Children eligible for an exemption who choose to enroll in managed care will be treated as voluntary enrollees for purposes of disenrollment provisions. Accordingly, these children may disenroll from an MCO with thirty days notice and return to the fee-for-service program.

Children who become eligible for exemption due to a change in eligibility status after they have enrolled in managed care may apply for an exemption and be disenrolled within 30-60 days. All managed care enrollees will have received information on the exemption criteria and process in the enrollment kits.

**III. Other Children with Unusually Severe Chronic Care or Complex Referral Needs**

The SDOH Medical Director for Managed Care will, upon the request of an enrollee or his/her guardian, review for a possible exemption from mandatory enrollment in managed care cases of children with unusually severe chronic care needs if such children are not otherwise eligible for an exemption (i.e., meet one of the criteria listed in the previous section). The Medical Director may also authorize disenrollment for such children.

**TN #99-40**

**Approval Date** February 20, 2002

**Supersedes TN NEW**

**Effective Date** April 01, 2002
The local social services districts (LDSS) in New York State will assume primary responsibility for the enrollment process under this State Plan Amendment. Under the existing Medicaid program, each LDSS is responsible for the determination of Medicaid eligibility. LDSS operations, including policies and staffing, will be enhanced to accommodate the new program established under this SPA. LDSS responsibilities (with assistance from SDOH) will include identification of excluded and exempt populations, including the handling of exemption requests.

Children may be either excluded or exempted from mandatory participation. Excluded populations will not participate; exempt populations are not required to participate. However, children designated as exempt may elect to voluntarily enroll.

In some cases, the State and LDSS can identify exempt populations through existing claims and eligibility data. Some excluded populations can be identified through the eligibility system. The State and/or LDSS will append the eligibility records with an identifier that will enable the Enrollment and Benefits Counselor or the Local District to determine whether a child is exempt from mandatory participation. In cases where the State can determine in advance a child’s exempt status the system will flag this child’s eligibility files to prevent an auto-assignment from taking place. However, in the case of children who may be exempt, but cannot be identified in advance and certain children actually eligible for an exemption in other categories), the algorithm will assign these children to an MCO unless they actually apply for and receive an exemption from the LDSS.

In certain cases, the State and LDSS may lack the information necessary to determine in advance whether the child is exempt from participation. Accordingly, the State has developed an exemption application to enable such children to apply for exemption from participation. The LDSS will collect and process applications for exemption from mandatory participation. The exemption application forms and criteria for approving or
denying requests shall be provided by the State to the LDSS. Exemption forms, including the look-alike screening form, are available to beneficiaries through the LDSS.

Eligible enrollees may apply for an exemption at any time. However, if the child is enrolled already in an MCO, s/he may be required to access services through the MCO until the LDSS and State have had the opportunity to process the application and disenroll the child from an MCO.

33-a

Rural Area Residents

For recipients who reside in a rural area with a single MCO, the State will limit enrollment to such MCO, provided however, such recipient may:

1. Choose from at least two physicians or case managers; and

2. Obtain services from any other provider under the following circumstances:

   (a) The service or type of provider is not available within the MCO network.

   (b) The provider is not part of the MCO network, but has an existing relationship with the recipient.

   (c) The only plan or provider available to the recipient does not, because of moral or religious objections, provide the service the enrollee seeks.

   (d) The State determines that other circumstances warrant out-of-network treatment.

Methodology and Process For Capacity/ Network Analysis

A managed care organization (MCO) provider network consists of physicians, groups(s) of physicians, specialists and the service centers, i.e., hospitals, pharmacy, clinics, etc. that are contracted to the MCO to provide all of the health care services that may be required by enrollees. The MCO, through its provider network, must plan, direct, coordinate, and provide for the health care services of every enrollee.

The New York State Department of Health (SDOH), in conjunction with the Local Departments of Social Services (LDSS) and the New York City Office of Medicaid Managed Care (OMMC) will evaluate the provider networks of every MCO to determine that it has an adequate network that will be accessible to all enrollees for their health care needs. This review ensures that the MCO has the adequate capacity in its provider network to meet the needs of the target population and there is an adequate network structure.

To serve the Medicaid population in New York State, an MCO must successfully complete the Certification of Authority (COA) process. Review and evaluation of the provider network are essential components of the Certification process since the inception of Article 44 of the Public Health Law.

MCO network evaluation is a multi-step process. To qualify, a MCO network has to achieve a successful quantitative score assigned by SDOH using a Statistical Analysis Software (SAS) program. Then the network has to pass the scrutiny of the LDSS, which evaluates the network for compliance with time and distance standards. The third and final step is verification of the network during the Readiness Review conducted by SDOH Area Office staff just prior to an MCO becoming operational. During the Readiness Review site visits contracts are pulled to verify the network information submitted by the MCO.

The following discussion provides the necessary information to understand how SDOH calculates and monitors Medicaid MCO capacity on an on-going basis.

A. Network Adequacy Definition

Pursuant to Section 98.5(b)(9) of Title 10, NYCRR, each fully capitated MCO is required to provide:

“Identification of the type of HMO that is proposed and a description of the service delivery system of the proposed HMO, including the numbers and locations of primary care providers and providers of other services such as ambulatory, ancillary and hospital services;...”
In addition, pursuant to Section 98.16(a) of Title 10, NYCRR, MCOs must submit an annual listing of providers and facilities by location. Section 364-j(8)(f) & (g) of the Social Services Law requires:

“(f) Every managed care provider shall ensure that the provider maintains a network of health care providers adequate to meet the comprehensive health needs of its participants and to provide an appropriate choice of providers sufficient to provide the services to its participants by determining that:

(i) there are a sufficient number of geographically accessible participating providers:
(ii) there are opportunities to select from at least three primary care providers; and
(iii) there are sufficient providers in each area of specialty practice to meet the needs of the enrolled population.

(g) The commissioner of health shall establish standards to ensure that managed care providers have sufficient capacity to meet the needs of their enrollees, which shall include patient to provider ratios, travel and distance standards and appropriate waiting times for appointments.”

1. Providers and Service Centers

The MCO provider network must include providers for services included in a core benefit package (listed below) which is required for certification. If the MCO does not directly provide such services, contractual relationships with appropriately qualified providers must exist prior to certification. In addition to the core providers, the network must contain any other providers necessary to provide all the health care services included in the benefit package. If, for example, the MCO covers podiatry services, the network must contain a podiatrist in each service area. The following lists the core group of providers and services required for certification.

**Medicaid Core Benefit Package**

**Optional benefit, not a mandatory benefit**

**2. Network Adequacy Determination**

The Bureau of Certification and Surveillance within SDOH is responsible for assessing the adequacy of the network. While obstetricians, gynecologists and certified nurse mid-wives are not generally considered primary care providers, these specialties may be included with the Primary Care Physician (PCP) grouping because they may act as a PCP if they have met SDOH qualifications. Part of the adequacy determination is evaluating whether the MCO has a sufficient number of PCPs to allow the member to have choice.

**B. Network Capacity Definition**
Most often, the capacity of a provider may depend on the efficiency of the doctor and her associated staff. Capacity may be defined as either a member-to-provider ratio or a maximum number of enrollees a primary care provider can properly handle on a full time basis (i.e., 40 hrs/week). The SDOH is using a combination of these two definitions. SDOH is using the following definition of capacity.

“MCOs must adhere to the member-to-PCP ratios shown below. These ratios are for Medicaid members only, are MCO-specific, and assume that the practitioner is an FTE (practices 40 hours per week for the MCO):

- No more than 1,500 Medicaid members for each physician, or 2,400 for a physician practicing in combination with a physician assistant. (i.e., a physician extender adds 900 to physician capacity)
- No more than 1,000 Medicaid members for each nurse practitioner.
(RFP, p.34)"

The above ratios are used as an initial starting point for the analysis of capacity.

Additionally, SDOH uses the following additional criteria for Article 28 comprehensive community-based primary care provider centers and Outpatient Departments of Hospitals (OPDs).

- Individual providers practicing in Article 28 Comprehensive Community based Primary Care centers may have 3,000 enrollees: 1 PCP and practicing with a Physician Extender they may have 4,000 enrollees: 1 PCP with a physician extender
- Individual providers with practices based primarily in OPDs may have 2,500 enrollees: 1 PCP and practicing with a Year 2 or 3 resident they may have 4,000 enrollees: 1 PCP and FTE Resident.

C. Capacity Calculation and Process

It is important to recognize that there are technically two types of capacity reviewed by the SDOH for each MCO: potential capacity and financial capacity. Potential capacity refers to the number of enrollees that can be managed by the existing provider network. Financial capacity is defined as the capacity that is financial feasible for the MCO to pay for based on their available capital and escrow deposit reserve requirement.

The following discussion details how the potential capacity is calculated; thus, the term capacity in the following section refers to the potential or calculated network capacity. Throughout the process of examining capacity it is also important to note that the value placed on capacity of the number of enrollees that a PCP may serve greatly controls the outcome of the capacity algorithm.

1. Potential Provider Capacity

The first step in calculating capacity for a MCO is the collection of data. SDOH collects network data electronically on an intranet system referred to as the Health Provider...
Network (HPN). This system was established in winter, 1996 for SDOH to collect information electronically from the MCOs. The MCOs are connected to the SDOH by a modem on their personal computer; they submit the data electronically in a specified format, the data is then edited immediately and a report is sent back to the MCOs with the number of records accepted along with an explanation of the records with errors. The steps below outline the methodology created for the entire provider network calculation of capacity.

- Health Provider Network
  a. Elimination of incomplete or incorrect data
  b. Electronic edit program

- Capacity Program
  a. Matching to Physician License Master File
  b. PCP Calculated Capacity based on FTE
  c. PCP Calculated Capacity within and across MCOs
  d. Capacity for each county

a. Health Provider Network (HPN) Process

As described above, all of the MCOs are required to submit provider network information on the SDOHs intranet system called the Health Provider Network (HPN). The details for submitting the provider network information are outlined in the Data Dictionary for Managed Care Provider Network. There are two files that are sent electronically to the SDOH, a provider file on people or physicians and other providers that are contacted to provide services to the members and a service file on places that are contacted with the MCO. Only the provider file is the used for the capacity calculation.

1. Elimination of Incomplete Data

Each submitted provider network record must contain certain data elements which, if omitted, will result in the deletion of a provider record. The required data elements are listed below:

- Last Name
- First Name
- License Number
- County Code
- Address (Street, Town/City)
- Board Status
- Primary Specialty
- Provider Type
- Primary Designation
- Residency Status
- Physician Status
- Panel Status

Data Elements for Primary Care Providers (PCPs) Only- all office hours

</table>

TN #99-40 Approval Date February 20, 2002
Supersedes TN NEW Effective Date April 01, 2002
If any of these data elements are missing or incorrectly coded by the MCO, it will receive an error message for the record(s) containing the missing element.

II. Electronic Edit Program

The edit program on the HPS currently checks for 46 different errors on the provider file; 20 of these are classified as critical or “hard” errors; the remaining errors are referred to as soft errors. MCOs are required to pass all critical errors for the data submission to be acceptable for use in any analysis. If they have not passed critical errors on the day after the submission is due (it is due 15 business days after the end of the calendar quarter) then the MCO is sent a letter requesting that their submission be corrected.

2. Capacity Program

The capacity program was developed using the SAS programming language. The quarterly provider file from the HPN and the physician master file from the NYS Department of Education are the two data sets used in the program. A Primary Care Provider or PCP subset of the Provider File data file is created for New York State providers indicated to be a Medicaid Primary Care Provider.

(Primary Care Providers are identified by editing the primary designation (PRIMDESG) and primary specialty (PRIMSPEC) fields; i.e., PRIMDESG values must equal 1=PCP and/or 3=PCP and Specialist AND PRIMSPEC values must equal 050’ (Family Practice), 060’ (Internal Medicine), 182’ or 776’ (General Practice), 150’ (General Pediatrics) OR 089’, 159’, 169’, (OB/GYN providers) (OBG/GYN are subject to DOH qualifications). The STATE data field must equal NY.

a.) Matching to the Physician License Master File

The first step involves a match of the physician/provider license number on the HPN provider file to the NYS Education file. This is to verify that the physicians on the HPN are currently licensed and registered to practice. During this step a variable is created on each data file to define each individual provider; this variable is created by the concatenation of the last three digits in the provider’s last name and their license number. The records that match on both the HPN provider file and the education file are then stored in a data set, called PCPCAP, to be used for the remainder of the capacity program.

b.) PCP Capacity for Each Individual Provider

The next steps involve the calculation of capacity for each individual PCP using the member-to-provider ratios previously described. Several new variables are created within the PCPCAP data set for use in the capacity program. There are:

| TOTOFFHR (Total Office Hours). This represents the sum of all available office hours. The maximum office hours attributed to an individual provider is 40. If the provider's total office hours across MCOs and sites exceeds 40, the hours |

TN #99-40
Supersedes TN NEW
Approval Date February 20, 2002
Effective Date April 01, 2002
at each site and MCO are reduced and allocated to each site on a prorated basis.

UNIQSITE (each provider's location for each MCO). This variable accounts for the unique MCO and location for each provider and is constructed by concatenating the MCO identifier, provider license number, and location address (site name, street number, room number, and street name). Many IPA and network model MCOs have overlapping provider networks, thus many of the providers are not unique to a particular MCO. (Usually, providers belonging to a staff or group model MCOs are unique to one program). To determine the effect of this on the capacity for each MCO, this field was created to capture the unique capacity that each MCO is offering.

TOTMPANL (Total Medicaid Panel Size). This is the sum of the total Medicaid panel or the total of the capitated enrollees that are recorded for a particular provider in each MCO. This will sum the panel size for all Medicaid MCOs.

FTE (Full Time Equivalent). TOTOFFHR are used to create a Full time equivalent of FTE based upon 40 hours per week. This is done by examining the multiple sites that a provider may have within an MCO and the multiple number of MCOs that a provider may belong to, i.e., a provider may be contracted in more than one MCO.

Only PCPs with TOTOFFHR (total office hours) equaling 16 hours of more per location are selected; this criteria is modified for residents; second year resident physicians must practice at least (8) continuity of care hours per week at a primary site; third and fourth year residents must practice at least twelve (12) continuity of care hours per week at a primary site. If a provider's total office hours at a particular site is below program minimum standards, his/her record is deleted.

The remaining steps calculate the PCP capacity for each provider. Specifically, the remaining steps are:

- For non-medical resident physicians practicing alone, capacity will be set equal to the lesser of: actual capacity reported or 1,500 * FTE

  Under this formula, a physician practicing full time would have a maximum capacity of 1,500 * 40/40 = 1,500.

- For PGY2 medical residents physicians, as denoted by 2" in the Resident Status filed, capacity will be set equal to the lesser of: actual capacity reported or 750 * FTE

- For PGY3 medical residents physicians, as denoted by 3" in the Resident Status filed, capacity will be set equal to the lesser of: actual capacity reported or 1,125 * FTE

- For PGY4 medical residents physicians, as denoted by 4" in the Resident Status filed, capacity will be set equal to the
For nurse practitioners and certified midwives, capacity will be set equal to the lesser of: actual capacity reported or 1,500 * FTE.

The sum of the Medicaid panel size for every MCO that a provider identified is then subtracted from the potential capacity for only those physicians having an open panel.

Physicians that have a closed panel for any MCO are assigned the Medicaid panel size for their capacity.

c.) Capacity Calculation Within And Across MCOs

After the above calculations are made, the program can identify providers if they practiced in multiple MCOs. For those providers, the total reported office hours across sites are summed and compared against a maximum of 40 hours. If the total exceeded 40 hours, the hours at each site and MCO were prorated down and the capacity at each MCO also is prorated accordingly. For example, if a provider reported working 40 hours at MCO A and 40 hours at MCO B (80 hours in total), and reported a capacity of 1,500 at each site, the provider's capacity was reset to equal 750 at each site. She would be counted as a .5 FTE for each MCO.

The next step in the capacity program summarizes the adjusted provider-specific capacity for each MCO. The summation of all the capacity values for each of the individual PCPs determines the MCO’s total capacity.

d.) Capacity for Each County

The final step in the capacity program produces the capacity for all MCO and county combinations; the county service area is based on the geographic border of the location of the physicians within the county borders.

C. Financial Capacity

In addition to the worksheets on provider network information, MCOs are also asked to provide Revenue and Expense and enrollment projections. These are statements detailing the capacity that could be supported by their financial reserves and capital.
D. Borough/County Network Analysis

New York City and the individual counties also will evaluate provider networks. The City and counties are sent a Network Composition proposal for each of the MCOs proposing for contract. They then were responsible for assembling local review teams to examine the proposals and complete a County Network Evaluation Form. (Training has been provided to City and county evaluators to ensure that proposals were reviewed in a consistent manner across the State.)

The Borough/County Network form was designed to supplement the information captured through the State Network Evaluation, by asking New York City and the other LDSS to:

- verify that the distribution of providers re: travel time/distance standards for PCPs, hospitals, and pharmacies;
- verify that networks include all providers with whom the county is mandating MCOs to contract (i.e., public hospitals), and
- document any gaps in service area coverage that the must be filled pursuant to awarding a contract.

Supersedes TN __NEW___

Approval Date: May 15, 1998

Effective Date: January 1, 1998
New York 4c

In determining any excess shelter allowance, utility expenses are calculated using:

___ the standard utility allowance under §5(e) of the Food Stamp Act of 1977; or

___ the actual unreimbursable amount of the community spouse's utility expenses less any portion of such amount included in condominium or cooperative charges.

b. The monthly income allowance for other dependent family members living with the community spouse is:

_ X _ one-third of the amount by which the poverty level component (calculated under §1924(d)(3)(A)(i) of the Act, using the applicable percentage specified in §1924(d)(3)(B)) exceeds the dependent family member's monthly income.

___ a greater amount calculated as follows:

The following definition is used in lieu of the definition provided by the Secretary to determine the dependency of family members under §1924(d)(1):

c. Amounts for health care expenses described below that are incurred by and for the institutionalized individual and are not subject to payments by a third party:

(i) Medicaid, Medicare, and other health insurance premiums, deductibles, or coinsurance charges, or copayments.

(ii) Necessary medical or remedial care recognized under State law but not covered under the State plan. (Reasonable limits on amounts are described in Supplement 3 to ATTACHMENT 2.6-A.)
New York

Citation | Condition or Requirement
---|---
435.725 | 4. In addition to any amounts deductible under the items above the following monthly amounts are deducted from the remaining the remaining monthly income of an institutionalized individual or an institutionalized couple:

a. An amount for the maintenance needs of each member of a family living in the institutionalized individual's home with no community spouse living in the home. The amount must be based on a reasonable assessment of need but must not exceed the higher of the:

- AFDC level; or
- Medically needy level;

(Check One)

___ AFDC levels in Supplement 1
___ Medically needy level in Supplement 1
___ Other: $ ________________________

b. Amounts for health care expenses described below that have not been deducted under 3.c. above (i.e., for an institutionalized individual with a community spouse), are incurred by and for the institutionalized individual or institutionalized couple, and are not subject to the payment by a third party:

(i) Medicaid, Medicare, and other health insurance premiums, deductibles, or coinsurance charges, or copayments.

(ii) Necessary medical or remedial care recognized under State law but not covered under the State plan. (Reasonable limits on amount are described in Supplement 3 to ATTACHMENT 2.6-A.)

435.725 | 5. At the option of the State, as specified below, the following is deducted from any remaining monthly income of an institutionalized individual or an institutionalized couple:

A monthly amount for the maintenance of the home of the individual or couple for not longer than 6 months if a physician has certified that the individual, or one member of the institutionalized couple, is likely to return to the home within that period:

___ No.
___ Yes (the applicable amount is shown on page 5a.)

* The State uses the higher of the standard for Low Income Families (AFDC), or medically needy income level.

</tr>
</tbody>
</table>

In determining financial eligibility for employed medically improved individuals under this provision, the following standards and methodologies are applied:

___ The agency does not apply any income or resource standard.

NOTE: If the above option is chosen, no further eligibility-related options should be elected.

_X_ The agency applies the following income and/or resource standards(s):

Net available monthly income, using SSI methodology for a one-person or two-person household, may not exceed 250% of the applicable Federal Poverty Level. Countable resources may not exceed [the Medically Needy resource level] $20,000 for a one-person or $30,000 for a two-person household.
In determining whether an individual meets the income standard described above, the agency uses the following methodologies.

- **X** The income methodologies of the SSI program.

- The agency uses methodologies for treatment of income that are more restrictive than the SSI program. These more restrictive methodologies are described in Supplement 4 to Attachment 2.6-A.

- The agency uses more liberal income methodologies than the SSI program. More liberal methodologies are described in Supplement 8a to Attachment 2.6-A.

5. Resource Exemptions - Categorically and Medically Needy

a. Except as specified in item C.5.e below, in determining countable resources for AFDC related individuals, the disregards and exemptions in the State’s approved AFDC plan are applied.

1902(a)(10) and 1902(m)(1)
(C) of the Act
P.L. 97-248
(Section 137) and
P.L. 99-509
(Section 9402)

b. In determining countable resources for aged individuals, including aged individuals with incomes up to the Federal nonfarm poverty line described in section 1902(m)(1) of the Act, the following disregards are applied:

  _X_ The disregards of the SSI program. *
  ___ The disregards of the SSI program, except for the following restrictions, applied under the provisions of section 1902(f) of the Act:

c. In determining countable resources for blind individuals, the following disregards are applied:

  _X_ The disregards of the SSI program. *
  ___ The disregards of the SSI program, except for the following restrictions applied under the provisions of section 1902(f) of the Act:

* Except for less restrictive disregards as specified in Supplement 12 to Attachment 2.6A of the State Plan 85-25.

TN #87-35 Approval Date December 5, 1991
SupersedesTN #86-29A Effective Date July 01, 1987
2. Medicaid Qualifying Trusts

In the case of a Medicaid qualifying trust described in section 1902(k)(2) of the Act, the amount from the trust that is deemed available to the individual who established the trust (or whose spouse established the trust) is the maximum amount that the trustee(s) is permitted under the trust to distribute to the individual. This amount is deemed available to the individual, whether or not the distribution is actually made. This provision does not apply to any trust or initial trust decree established before April 7, 1986, solely for the benefit of a mentally retarded individual who resides in an intermediate care facility for the mentally retarded.

[ ] The agency does not count the funds in a trust as described above in any instance where the State determines that it would work an undue hardship. Supplement 10 of ATTACHMENT 2.6-A specifies what constitutes an undue hardship.

3. Medically needy income levels (MNILs) are based on family size.

Supplement 1 to ATTACHMENT 2.6-A specifies the MNILs for all covered medically needy groups. If the agency chooses more restrictive levels under section 1902(f) of the Act, Supplement 1 so indicates.

4. Handling of Excess Income - Spend-down for the Medically Needy in All States and the Categorically Needy in 1902(f) States Only

a. Medically Needy

(1) Income in excess of the MNIL is considered as available for payment of medical care and services. The Medicaid agency measures available income for periods of either 1 or 6 month(s) (not to exceed 6 months) to determine the amount of excess countable income applicable to the cost of medical care and services.

(2) If countable income exceeds the MNIL standard, the agency deducts the following incurred expenses in the following order:

   (a) Health insurance premiums, deductibles and coinsurance charges.

   (b) Expenses for necessary medical and remedial care not included in the plan.

   (c) Expenses for necessary medical and remedial care included in the plan.

Reasonable limits on amounts of expenses deducted from income under a.(2)(a) and (b) above are listed below.

1902(a)(17) of the Act

Incurred expenses that are subject to payment by a third party are not deducted unless the expenses are subject to payment by a third party that is a publicly funded program (other than Medicaid) of a State or local government.

## Treatment of Income and Resources - Categorically and Medically Needy and Qualified Medicare Beneficiaries

### 10. AFDC related individuals (other than under items 9.e. and f. below)

The agency uses the same methodologies for treatment of income and resources as used in the State’s approved AFDC State plan.

### 1902(a)(10)(A), 1902(a)(10)(C), and 1902(m)(1)(B) and (C) of the Act, P.L. 99-509 (Section 9402(a))

### 1902(m)(1)(B) and (C) of the Act, P.L. 99-509 (Section 9402(a))

### 1902(f) of the Act

The methodologies are described in Supplement 5 to ATTACHMENT 2.6-A.

### Blind individuals

The agency uses the same methodologies for treatment of income and resources as used in the SSI program (or the optional State supplement program which meets the requirements of 42 CFR 435.230, as appropriate). *

* Except for less restrictive disregards as specified in Supplement 11 and 12 to Attachment 2.6A of the State Plan 85-25.

Effective Date **January 1, 1998**
2.1 Application, Determination of Eligibility and Furnishing Medicaid
(continued)

√ (f) Using the Income Determination from another Means-Tested Public
Benefit Program to Support Medicaid Determinations

(1) The state elects the option to use income determined by the
following means-tested public benefits program(s) to support
Medicaid eligibility determinations:

__ SNAP
√ TANF
__ Other Means-Tested Program: ________________________

In electing this option, the state assures that it:

(a) Verifies citizenship and non-citizen status consistent with Medicaid
statutory and regulatory requirements in Section 1137 of the Social

(b) Complies with Medicaid reporting requirements with respect to
participants enrolled through this strategy.

(c) Provides applicants with program information required under 42 CFR
435.905, such as information about available services and the rights and
responsibilities of applicants and beneficiaries.

(d) Has procedures to ensure that eligible individuals are enrolled in the
appropriate Medicaid eligibility group. Description:

Medicaid workers in the local department of social services code Medicaid
consumers based on their Medicaid eligibility group. There is a small
population who may look like the Adult group, but have income over the
MAGI level because they reside in temporary housing, such as motels,
domestic violence shelters or AIDS housing, and receive an unlimited shelter
allowance. The State will data mine for these consumers using codes
available in their budgets and code them to claim the appropriate Federal
share of 50 percent if they have income above 138 percent FPL. These
consumers will still be eligible under the State’s 1115 Waiver, which gives
the authority to use the Temporary Assistance determination to authorize
Medicaid coverage.

TN # ___17-0014_________________ Approval Date __December 22, 2016__
Supersedes TN   NEW          Effective Date __December 01, 2016__
(e) Has procedures to ensure that eligible American Indians or Alaska Natives enrolled through this strategy are exempt from cost sharing/and or premiums, consistent with section 1916A(b)(3) of the Social Security Act. Description:

Medicaid does not have premiums. A majority of American Indian and Alaska Native consumers enrolled through this strategy will be below 100 percent of the FPL because Temporary Assistance first compares gross income to 100 percent FPL in order to be found eligible. Medicaid consumers with income under 100 percent FPL do not have cost sharing. A small number of consumers who reside in temporary housing, such as motels, domestic violence shelters or AIDS housing receive an unlimited shelter allowance and therefore may have income about 100 percent FPL. The State intends to data mine for individuals with unlimited shelter allowances to see if they are MAGI eligible. The State will also determine if there are eligible American/Indian or Alaska Natives who should not be charged a copayment and manually exempt them.

2.1 Application, Determination of Eligibility and Furnishing Medicaid (continued)

(f) Has post-enrollment procedures to ensure assignment of rights to third party benefits and to secure cooperation in establishing medical support as appropriate, per 42 CFR 435.610.

(2) SNAP-Specific Criteria

  __ (i) The state will use gross income determined by SNAP to support Medicaid eligibility determinations for all MAGI-based Medicaid eligibility groups at:

  __ Initial application
  __ Renewal of Medicaid eligibility

In applying this option, all of the following conditions are met:

(a) All members of the SNAP household are eligible for SNAP, other than for SNAP transitional benefits.

(b) No one in the SNAP household has any type of income that is excluded in determining gross income for purposes of eligibility for SNAP, but would be included in MAGI-based income.

(c) No one in the SNAP household is part of a tax household that includes an individual who lives outside the home.
SECTION 2- COVERAGE AND ELIGIBILITY

(d) The SNAP household consists of individuals who live alone, parents living with their children, or married couples (with or without children), with the result that they will also be considered a household under Medicaid rules and either:

- There are no other members present who would not be considered to be part of the household used for purposes of determining MAGI-based Medicaid eligibility; or

- Other members are present in the household, but the total household income is below the applicable Medicaid standard for a household of one.

(e) Households with self-employment income are excluded from this option if the state uses a state-specific methodology for treating self-employment income in SNAP.

Does the state use a methodology for treating self-employment income that differs from the standard SNAP methodology?

- Yes
- No

2.1 Application, Determination of Eligibility and Furnishing Medicaid (continued)

(f) None of the household’s income is excluded from gross income as payment of child support for children living outside of the household.

Does the state exclude payment of child support for children from gross income when determining eligibility for SNAP?

- Yes, the state adds the amount of child support excluded to the household’s SNAP gross income.
- Yes, these families will be excluded from the method.
- No

(g) The state obtains all information necessary for a Medicaid eligibility determination that is not contained in the case record for SNAP. If available, electronic data sources are consulted before paper documentation is requested.

(ii) Collection of Information to Determine Eligibility

(a) The state collects information to ensure that no one in the SNAP household is part of a tax household that includes an individual who lives outside the home through the following:

- Information is available through electronic data sources.

TN # 17-0014 Approval Date December 22, 2016

STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT
STATE OF New York

SECTION 2 - COVERAGE AND ELIGIBILITY

☐ Information is collected on the application or renewal form for the means-tested program.
☐ The state agency provides a form to the individual to complete and return.
☐ For renewals only, the state agency provides a renewal notice requesting that the beneficiary notify the agency if household information has changed.
☐ Other. Description:

2.1 Application, Determination of Eligibility and Furnishing Medicaid (continued)

(b) The state identifies individuals who have income which is counted in determining household income using MAGI-based methodologies but is not included in SNAP gross income. This includes, but may not be limited to income received through an AmeriCorps Education Award not used for educational expenses, or income from a minor dependent child above the applicable tax filing threshold. The status uses the following processes:

☐ Information is available through electronic data sources.
☐ Information is collected on the application or renewal form for the means-tested program.
☐ The state agency provides a form to the individual to complete and return.
☐ For renewals only, the state agency provides a renewal notice requesting that the beneficiary notify the agency if anyone in the household has a new type of income.
☐ Other. Description:

(c) The state obtains a signature authorizing a determination of Medicaid eligibility as required under 42 CFR 435.907(f).

☐ The household applies for Medicaid by requesting a Medicaid determination through the application for SNAP.
☐ The household applies for Medicaid at its SNAP recertification by requesting a Medicaid determination on the SNAP recertification form.
☐ Individuals are sent a separate form for signature and return. The state allows the form to be completed:

Supersedes TN NEW Effective Date December 01, 2016
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT
STATE OF New York

SECTION 2- COVERAGE AND ELIGIBILITY

☐ On paper
☐ By telephone
☐ Online
☐ Through other means. Description:

☐ Not applicable. State has only elected option to use strategy at Medicaid renewal.
☐ Other. Description:

2.1 Application, Determination of Eligibility and Furnishing Medicaid (continued)

(3) TANF-Specific Criteria

√ (i) The state will use gross income determined by TANF to support Medicaid eligibility determinations for all MAGI-based Medicaid eligibility groups at:

√ Initial application
√ Renewal of Medicaid eligibility

In applying this option, all of the following conditions are met:

(a) The state has completed or obtained a study indicating that the state’s gross income determination under TANF rules is equal to a MAGI-based determination under the circumstances set forth in the SPA.

(b) All members of the TANF assistance unit are eligible for TANF.

(c) No one in the TANF assistance unit has any type of income that is excluded in determining income for purposes of TANF, but would be included in MAGI-based income.

(d) No one in the TANF assistance unit is part of a tax household that includes an individual who lives outside the home.

(e) The TANF assistance unit consists of individuals who live alone, parents living with their children, or married couples (with or without children), with the result that they will also be considered a household under Medicaid rules and either:

Supersedes TN NEW Effective Date December 01, 2016
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT  
STATE OF New York

SECTION 2- COVERAGE AND ELIGIBILITY

- There are no other members present who would not be considered to be part of the household used for purposes of determining MAGI-based Medicaid eligibility; or

- Other members are present in the household, but the total household income is below the applicable Medicaid standard for a household of one.

2.1 Application, Determination of Eligibility and Furnishing Medicaid (continued)

(f) Households with income from stepparents are excluded from this option if the state uses state-specific methodology to exclude any income from stepparents living in TANF assistance unit.

Does the state exclude any portion of stepparents’ income from the household income?

- Yes
- No

(g) The criteria described under this strategy are applied statewide in states with TANF eligibility requirements that vary by region.

Does the state have TANF eligibility requirements that vary by region?

- Yes. Description:
  The standard of need varies by county in New York State. However, Temporary Assistance, statewide, first compares income to 100 percent of the FPL before comparing income to the county specific standard of need.

- No

(h) The state obtains all information necessary for a Medicaid eligibility determination that is not contained in the case record for TANF. If available, electronic data sources are consulted before paper documentation is requested.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT
STATE OF New York

SECTION 2 - COVERAGE AND ELIGIBILITY

2.1 Application, Determination of Eligibility and Furnishing Medicaid (continued)

(ii) Collection of Information to Determine Eligibility

The state obtains all information necessary for a Medicaid eligibility determination that is not contained in the case record for TANF. If available, electronic data sources are consulted before paper documentation is requested.

(a) Describe how the state collects information to ensure that no one in the TANF household is part of a tax household that includes an individual who lives outside the home:

- [x] Information is collected on the application or renewal form for TANF.
- [ ] Information is available through electronic data sources.
- [ ] The state agency provides a form to the individual to complete and return.
- [ ] The state agency provides a renewal notice requesting that the beneficiary notify the agency if household information has changed.
- [ ] Other. Description:

(b) Describe how the state identifies individuals who have income which is counted in determining household income using MAGI-based methodologies but is not included in TANF income:

- [ ] Information is available through electronic data sources.
- [x] Information is collected on the application or renewal form for the means-tested program.
- [ ] Information is collected on the application or renewal form for TANF.
- [ ] The state agency provides a form to the individual to complete and return.
- [ ] For renewals only, the state agency provides a renewal notice requesting that the beneficiary notify the agency if anyone in the household has a new type of income.
- [ ] Other. Description:

Prior to performing a net income budget, the TANF budget first compares a consumer’s gross income to 100 percent of the federal poverty level. All income included in a MAGI-based budget would be included in this poverty level test.
2.1 Application, Determination of Eligibility and Furnishing Medicaid (continued)

(c) Describe how the state obtains a signature authorizing a determination of Medicaid eligibility as required under 42 CFR 435.907(f).

√ The household applies for Medicaid by requesting a Medicaid determination through the application for TANF.

☐ The household applies for Medicaid at its TANF recertification by requesting a Medicaid determination on the TANF recertification form.

☐ Individuals are sent a separate form for signature and return. The state allows the form to be completed:
  ☐ On paper
  ☐ By telephone
  ☐ Online
  ☐ Through other means. Description: __________________________

☐ Not applicable. State has only elected option to use strategy at Medicaid renewal.

☐ Other. Description: ______________________________________

2.1 Application, Determination of Eligibility and Furnishing Medicaid (continued)

(4) Criteria for Other Public Means-Tested Benefit Program

__ (i) The state will use gross income determined by _____________________ to support Medicaid eligibility determinations for all MAGI-based Medicaid eligibility groups at:

__ Initial application
__ Renewal of Medicaid eligibility

In applying this option, the following conditions are met:

(a) The state has completed or obtained a study indicating that the state’s gross income determination for the means-tested benefit program described above is equal to a MAGI-based determination under the circumstances set forth in the SPA.

(b) All members of the household for the [means-tested benefit program name] ________are eligible for that program.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT
STATE OF New York

SECTION 2- COVERAGE AND ELIGIBILITY

(c) No one in the household for the [means tested benefit program] has any type of income that is excluded in determining gross income for purposes of the program, but would be included in MAGI-based income.

(d) No one in the household for the [means tested benefit program] is part of a tax household that includes an individual who lives outside the home.

(e) The household for the means-tested benefit program consists of individuals who live alone, parents living with their children, or married couples (with or without children), with the result that they will also be considered a household under Medicaid rules and either:

  o There are no other members present who would not be considered to be part of the household used for purposes of determining MAGI-based Medicaid eligibility; or

  o Other members are present in the household, but the total household income is below the applicable Medicaid standard for a household of one.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT
STATE OF New York

SECTION 2- COVERAGE AND ELIGIBILITY

2.1 Application, Determination of Eligibility and Furnishing Medicaid (continued)

(f) The household for the means-tested benefit program consists of individuals who live alone, parents living with their children, or married couples (with or without children), with the result that they will also be considered a household under Medicaid rules and either:

- There are no other members present who would not be considered to be part of the household used for purposes of determining MAGI-based Medicaid eligibility; or
- Other members are present in the household, but the total household income is below the applicable Medicaid standard for a household of one.

(g) The criteria described under this strategy are applied statewide in states with eligibility requirements for the means-tested program described above that vary by region.

Do the eligibility requirements for the means-tested program vary by region?

___ Yes. Description:

[Blank]

___ No

(h) The state obtains all information necessary for a Medicaid eligibility determination that is not contained in the case record for the means-tested program. If available, electronic data sources are consulted before paper documentation is requested.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT
STATE OF New York

SECTION 2- COVERAGE AND ELIGIBILITY

2.1 Application, Determination of Eligibility and Furnishing Medicaid (continued)

(iii) Collection of Information to Determine Eligibility

(a) Describe how the state collects information to ensure that no one in the [means-tested benefit program] household is part of a tax household that includes an individual who lives outside the home:

☐ Information is available through electronic data sources.
☐ Information is collected on the application or renewal form for the means-tested program.
☐ The state agency provides a form to the individual to complete and return.
☐ The state agency provides a renewal notice requesting that the beneficiary notify the agency if household information has changed.
☐ Other. Description:

(b) Describe how the state identifies individuals who have income which is counted in determining household income using MAGI-based methodologies but is not included in total income for the means-tested benefit program:

☐ Information is available through electronic data sources.
☐ Information is collected on the application or renewal form for the means-tested program.
☐ The state agency provides a form to the individual to complete and return.
☐ For renewals only, the state agency provides a renewal notice requesting that the beneficiary notify the agency if anyone in the household has a new type of income.
☐ Other. Description:
2.1 Application, Determination of Eligibility and Furnishing Medicaid (continued)

(c) Describe how the state obtains a signature authorizing a determination of Medicaid eligibility as required under 42 CFR 435.907(f).

☐ The household applies for Medicaid by requesting a Medicaid determination through the application for the means-tested benefit program.

☐ The household applies for Medicaid at recertification for the means-tested benefit program by requesting a Medicaid determination on the recertification form for the means tested benefit program.

☐ Individuals are sent a separate form for signature and return. The state allows the form to be completed:
  ☐ On paper
  ☐ By telephone
  ☐ Online
  ☐ Through other means. Description:

  -----------------------------

☐ Not applicable. State has only elected option to use strategy at Medicaid renewal.

☐ Other. Description:
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

INCOME ELIGIBILITY LEVELS

A. Mandatory Categorically Needy

1. AFDC-Related Groups other than Poverty Level Pregnant Women and Infants:
Eligibility for these groups is based on the monthly standard of need (SON) as
reflected in the Title IV-A State Plan approved as of July 16, 1996. The monthly SON
equals the payment standard. The following illustrated how the SON is derived:

For a household of three living in Suffolk County, and paying for Public Service
Commission (PSC) electric heat, the family is allowed: a basic allowance of $238,
which is intended to be used for food, clothes, personal incidentals, etc.; a Home
Energy Allowance of $30; a Supplemental Home Energy Allowance of $23; a Shelter
Allowance of $387; and a Fuel Allowance for PSC electric heat of $90. The total
monthly SON for a family of 3 living in Suffolk County is $768.

Additional items of need as described on page 1 of Attachment E, “Standard of
Need” for the July 16, 1996 Title IV-A State Plan, in Section 352.1, paragraph (c) are
also provided as circumstances warrant. The SON/payment standard would then
increase accordingly.

2. Pregnant Women and Infants under Section 1902(a)(10)(i)(A)(IV) of the Act:
Effective April 1, 1990, based on the following percent of the official Federal income
poverty level --

133 Percent __________

185 Percent (No more than 185 percent)
(as revised annually in the
Federal Register for the size family involved.)

Note: A State Plan amendment was approved under Section 1902(r)(2) to allow for a disregard
on income between 185% and 200% of the poverty level for pregnant women and infants.]
Supplement 1 to Attachment 2.6-A

New York
1a-1

[Attachment E

[STANDARD OF NEED]

Section 352.1 Standard of need for determining eligibility.

The eligibility for public assistance of all persons who constitute or are members of a family household must be determined by a social services district by applying the following statewide standard of monthly need which must consist of:

(a) regular recurring monthly needs, exclusive of shelter, fuel for heating, home energy payments and supplemental home energy payments, in accordance with the following schedule:

SCHEDULE SA-1
STATEWIDE STANDARD OF NEED

<table>
<thead>
<tr>
<th>Number of persons in household</th>
<th>Each additional Person</th>
</tr>
</thead>
<tbody>
<tr>
<td>One</td>
<td>$112</td>
</tr>
<tr>
<td>Two</td>
<td>$179</td>

<tr>
<td>Four</td>
<td>$307</td>
</tr>
<tr>
<td>Five</td>
<td>$379</td>
</tr>
<tr>
<td>Six</td>
<td>$438</td>
</tr>
</tbody>
</table>

(b) plus the amount of money for shelter, fuel for heating, home energy payments and supplemental home energy payments, required monthly for such persons in accordance with provisions of law and department regulations; and

(c) for any of such persons who may because of their case circumstances require any of the following items in accordance with applicable provisions of law and department regulations, the standard of need must include the cost of the required item or items in accordance with such provisions: furniture and furnishings for the establishment of a home, essential repair of heating equipment, cooking stoves and refrigerators, additional cost of meals for persons unable to prepare meals at home, replacement of clothing or furniture which has been lost in fire, flood or other like catastrophe, cost of services and supplies already received, miscellaneous shelter costs, day care, camp fees and payment of life insurance premiums.

352.2 Allowances and grants for persons who constitute or are members of a family household.

(a) Each social services district must utilize the applicable schedules of monthly grants and allowances as found in subdivision (d) of this section to provide for all items of need, exclusive of:

1. shelter;
2. fuel for heating;

1a-2

[(3) additional cost of meals for persons who are unable to prepare meals at home;
(4) purchase of necessary and essential furniture required for the establishment of a home;
(5) replacement of necessary furniture and clothing for persons in need of public assistance who have suffered the loss of such items as the result of fire, flood, or other like catastrophe;
(6) essential repair of heating equipment, cooking stoves and refrigerators;
(7) allowances for occupational training; and
(8) other items for which specific provision is otherwise made in this Part.

(b) For the purposes of such monthly grants and allowances under Family Assistance or Emergency Assistance to Needy Families with Children, children or adults residing with an SSI beneficiary must be considered as a separate household from the SSI beneficiary.

(c) Supplemental allowances and grants may not be made other than as authorized under the regulations nor in excess of established schedules in no event, except as provided in Part 397 of this Title, must a special allowance and grant be required to be made because the cash has been lost, stolen or mismanaged. Any duplicate allowance and grant made for such purpose is not reimbursable by the State unless made as a result of an order made after May 1, 1977 by a court of competent jurisdiction or a payment made after May 1, 1977 pursuant to an order by a court of competent jurisdiction.

(d) The monthly grants and allowances must be as follows:

<table>
<thead>
<tr>
<th>Number of persons in household</th>
<th>Each additional person</th>
</tr>
</thead>
<tbody>
<tr>
<td>One</td>
<td>$112</td>

TN #13-0053
Supersedes TN #04-0001
Approval Date June 26, 2014
Effective Date January 1, 2014
[(b) When the recipient is obligated to pay for water as a separate charge to a vendor, an allowance must be made for the additional amount required to be paid. When the recipient is obligated to pay for sewer, water (except when paid as a separate charge) and/or garbage disposal, an allowance must be made therefore to the extent that the total of the rent allowances plus such charge or charges does not exceed the appropriate maximum amount in the schedule in subdivision (a) of this section. For the purpose of this subdivision, the term “separate charge” refers to a billing made directly to a recipient in his or her name, which is limited to charges for his or her utility service.

(c) An allowance for household expenses must be made for a period not in excess of 180 days, when essential to retain a housing accommodation and to maintain the home to which a recipient temporarily receiving care in a medical facility is reasonably expected to return upon discharge from such facility. Payments under this subdivision must not continue for more than 45 days unless, within 45 days following placement in the medical facility, the social services official has reviewed the recipient’s status and determined that the recipient is expected to remain in the facility for not more than 180 days and is likely to return to the home following discharge. The basis for these conclusions must be documented in the case record.

(d) (1) Public Housing.

   An allowance for rent must be made for recipients who are tenants of city, State or federally aided public housing up to the amount actually paid or the following schedule, whichever is less, except when a modified schedule or allowances is approved by this department for a specific housing authority or when the housing authority calculates the rent based on a percentage of household income:

<table>

</tbody>
</table>

   (i) Modified scheduled approved.

   When a modified schedule is approved by this department for a specific housing authority, the allowance for rent must be the amount actually paid up to the approved schedule amount.]
[(ii) Rent calculated based on a percentage of income.

For any household for which the amount of rent is determined by a public housing authority as a percentage or either gross or adjusted gross income, the applicable shelter allowance is the amount so calculated up to the maximum allowance for the given household size found in subdivision (a) of this section.

(2) (i) Section 236 Rental Assistance Program, Section 8 Housing Vouchers, Section 8 Housing Program (non-certificate).

The rent allowance for tenants of housing subsidized under the Section 236 Rental Assistance Program or the Section 8 Housing Assistance Payments Program, except as provided in clause (ii) of this paragraph, is the amount of rent actually paid (exclusive of the subsidy) but not more than the amount in the applicable schedule in subdivisions (a) and (b) of this section.

(ii) Section 8 Existing Housing Program (certificate).

The rent and fuel for heating allowance for recipients whose housing payments of rent are subsidized under the Section 8 Existing Housing Program who hold a certificate of family participation (not including a recipient participating in the program of special allowances for owners of manufactured homes) is the amount in the applicable schedule in clause (iii) or clause (iv) of this paragraph. Such amount will not be adjusted in accordance with the actual cost of shelter and utilities. Subdivisions (a) and (b) of this section and subdivision (a) of section 352.5 do not apply; provided, however, that allowances hereunder may not exceed the applicable amount under subdivision (a) of this section. Shelter and fuel allowances pursuant to this subdivision are not subject to proration under section 352.32(e)(2)(ii) of this Part unless the members of each assistance unit in the household reside together as a single economic unit subject to proration of the basic monthly allowance, the home energy allowance and the supplemental home energy allowance under section 352(e)(2)(i) of this Part. Any amounts by which the rental obligation of the tenant is reduced below the amounts in the applicable schedule in clause (iii) or clause (iv) of this paragraph as an allowance for payment of utilities and any amounts remitted to the tenant or to a vendor for payment of utilities as a result of participation in the section 8 program are deemed to be an actual payment for housing by the tenant for the purposes of this clause. No such utility allowance or reimbursement constitutes income for purposes of determining eligibility for or the amount of public assistance.]

For each additional dependent child in the household under the age of 18 years, subtract $17.

(e) Rent allowances for hotel/motel facilities. An allowance for shelter must be made for recipients temporarily housed in hotel/motel facilities under the following circumstances:

(1) No other suitable housing either public or private is available to house the recipient.

(2) Hotel/motel accommodations without cooking facilities must be utilized only when accommodations with such facilities are not available. An allowance for the actual cost of the rental of a refrigerator, not to exceed $10 per week per room, must be made when a homeless family is temporarily placed in a hotel/motel which does not have cooking facilities and which provides a refrigerator on a rental basis.

(3) The continued need for hotel/motel accommodations must be reviewed, evaluated and authorized monthly by the social services district.]
[4] A detailed report of that review, evaluation and authorization must be submitted to
the department’s division of income maintenance on the form prescribed by the
department, on or before the 10th working day of the fourth month of temporary
residence, and at monthly intervals thereafter.

(f) Reimbursement for shelter costs and restaurant allowances and rental fees for
refrigerators as provided for in paragraph (e)(2) of this section is available to social
services districts for expenditures made by such districts on behalf of recipients
temporarily living in hotels or motels for so long as the recipients are actively seeking
permanent housing, but in no event for a period in excess of six months unless the local
commissioner of social services determines on an annual basis that housing other than
hotels or motels or facilities regulated under Part 900 of this Title is not readily available in
the social services district and the commissioner submits such determination to the
department on an annual basis. Upon such a determination and submission, the social
services district will continue to be reimbursed for shelter costs, restaurant allowances as
appropriate and rental fees for refrigerators provided to public assistance recipients
beyond such six month period. A recipient’s continued need for hotel/motel
accommodations must be reviewed and evaluated monthly. The maximum reimbursable
amount for shelter costs after August 1, 1984 is $16 per day for the first person in each
hotel room, and $11 per day for the remaining occupants in each room. Restaurant
allowances, if necessary, must be provided in accordance with department regulations.

(g) Standards.

No family must be referred to a hotel/motel, nor must any reimbursement be made for
costs incurred from such referral unless all of the requirements set forth below are met:

(1) Primary consideration must be given to the needs of children. Specific factors
considered must include but must not be limited to educational needs, security, the
nature of the facility in which the children would be placed, and factors which will
insure the minimum disruption of community ties.

(2) The hotel/motel must have appropriate contractual or other arrangements for
maintenance, repair and sanitation in the hotel/motel. The hotel/motel must have
available for review by the local social services district information verifying the
above-mentioned arrangements or record of such. Such information would include,
for example, contracts with private carters, bills, receipts, or other evidence of
performance. Such arrangements must include but not be limited to agreements for
provision of the following services:

   (i) removal of garbage;]
New York
1a-12

[(ii) maintenance of floor coverings, draperies and furniture;
(iii) repainting of the facility at least once every five years;
(iv) maintenance and inspection of the electrical system;
(v) maintenance of plumbing and plumbing fixtures;
(vi) maintenance and inspection of heating, ventilation and air conditioning systems;
(vii) a regular vermin control program; and
(viii) provision to insure that entrances, exits, steps and walkways are kept clear of garbage, ice, snow and other hazards

(3) Rooms must be cleaned at least every other day by hotel/motel staff.

(4) Furniture necessary for daily living, including but not limited to tables, bureaus, chairs, beds and cribs must be in each room.

(5) No more than two adults must be placed in the same room.

(6) When children are placed in the same room as adults, there must be sufficient beds so children must not have to share single beds.

(7) All mattresses and bedding material must be clean. Each bed must have at least two clean sheets, adequate clean blankets, clean pillows and pillowcases. A complete change of linens must be made by hotel/motel staff at least once a week and more often where individual circumstances warrant or when a new family occupies the unit. Each unit must be supplied with towels, soap and toilet tissues. A clean towel must be provided daily to easy resident.

(8) Each unit must have operational door and window locks. All windows at and above the second floor must have window guards in place unless windows are sealed and the air conditioning works.

(9) A heating system must be permanently installed and operated in accordance with applicable local law. Where local law or code does not govern the provision of heat, the system will provide heat to maintain a temperature of 69°F (20°C) in all occupied parts of the building, including corridors. Where windows do not open, proper ventilation, including but not limited to air condition, must be operational.]
(10) Each family must have a private bathroom. At a minimum, this must include a toilet, a sink and a shower or bathtub, all of which must be properly maintained with hot and cold running water. Couples without children may be placed in rooms with common bathroom facilities.

(h) Inspection.

Local social services districts which make hotel/motel referral must inspect at least once every six months the hotels/motels in which families are placed. In addition to verifying that the hotel/motel meets the requirements set forth in subdivision (g) of this section, the local district must make appropriate inquiries to determine whether the hotel/motel is in compliance with all applicable state and local laws, regulations, codes and ordinances. Any violation found during the on-site inspection must be reported to appropriate authorities. Further, each inspection must at least review arrangements for hygiene, vermin control, security, furnishings, cleanliness and maintenance and must include a review of any applicable documents pertaining to compliance with any local laws or codes. A written report must be made of each such inspection and must be maintained at the office of the local district together with such other information as the district may maintain concerning the families placed in the hotel/motel.

(i) (1) To the extent that units of housing are available and subject to the department approval based upon the housing conditions in the region, social services districts may provide an allowance to secure housing to any homeless family:

(i) residing in a municipality having a rental vacancy rate for low-income housing less than three percent;

(ii) for whom no housing can be located at a rent within the shelter maximum under this section; and

(iii) in which at least one member of the family has resided in a hotel or motel and/or a shelter (including, but not limited to, facilities operated under Part 900 of this Title) at public expense for a period exceeding 12 weeks. Social services districts may consider decreasing this length of stay requirement if a long term temporary placement in a hotel or motel or shelter would be detrimental to the health and welfare of families, including families with immediate medical needs.

(2) In determining priority for placement in housing units for which an allowance is paid under this subdivision, the district must consider factors affecting need such as:]

TN #13-0053  Approval Date  June 26, 2014
Supersedes TN #04-0001  Effective Date  January 1, 2014
(i) the length of stay in a hotel or motel and/or a shelter (including, but not limited to, facilities operated under Part 900 of this Title) at public expense;

(ii) the size of the family; and

(iii) the location of schools in relation to the temporary housing where the family is residing.

(3) Social services districts must submit to the department for approval annual plans for the operation of programs to make allowances available under this subdivision. Plans must be submitted within 45 days after funds have been authorized in the State budget for allowances for this program.

(i) indicate the number of units of housing for which the allowance will be made available pursuant to this subdivision, identifying the number that would be privately owned units and the number that would be publicly owned units, and the amount of funds being requested,

(ii) describe the housing to be utilized,

(iii) indicate the number of months that the allowance will be available (not to exceed eight months in the case of privately owned units or four months in the case of publicly owned units),

(iv) set forth the procedures for assuring local housing code compliance,

(v) set forth the procedures to identify those families likely to be long-term residents of hotels and motels and/or shelters (including, but not limited to, facilities operated under Part 900 of this Title)

(vi) indicate the criteria to be used in determining priorities for placement,

(vii) indicate the services available in the social services district to assist persons to remain in housing after placement under this program;

(viii) indicate the number of homeless facilities in the social services district that requested emergency housing each month during the most recent twelve month period and the number of families that resided in hotels and motels and/or shelters during the most recent twelve month period; and]
[(ix) indicate the number of months that the social services district will require participating landlords to make specified apartments available to selected families.

(4) The allowance consists of a rent supplement in an amount to be determined by the social services district, with the prior approval of the department, but cannot exceed the difference between the maximum shelter allowance and the hotel/motel rate for the family. Social services districts must submit claims for State reimbursement for such allowances on forms and in the manner prescribed by the department.

(5) No allowance will be paid under this subdivision for housing developed for the homeless financed partially or wholly with public funds.

(6) No allowance under this subdivision will be paid unless the social services district documents that such allowance will not be used to replace funds previously used, or designated for use, to secure housing for homeless families.

(7) No allowance provided under this subdivision will be paid for housing which does not comply with or which is not brought into substantial compliance with the local housing code or which has been occupied by a family receiving Family Assistance (FA) or Safety Net Assistance (SNA) within one year prior to the payment of an allowance hereunder; provided, however, that such allowance may be held in escrow by the district pending correction of existing code violations. Moreover, no allowance will be paid unless the participating landlord agrees to make a specified apartment available to the selected family for a period of up to 32 months as approved by the department, except as provided herein. The landlord must agree that, in the event that a selected family does not remain for any reason in the specified apartment for the period for which it is to be available, the landlord will return a pro rata portion of the allowance reflecting the balance of the period. In such event, the district may provide an allowance with respect to a subsequently selected family for the balance of the period, provided further that such family meets the eligibility criteria set forth in this subdivision.

(8) Allowances provided under this subdivision must be paid for a maximum period specified by the district and approved by the department.

(9) Social services districts providing allowances under this subdivision must submit information on a monthly basis in a manner prescribed by the department including but not limited to:]
[(i) the number of units rented that were privately owned and the number of units rented that were publicly owned and the addresses of such units;

(ii) the individual allowances issued; and

(iii) the number of families leaving apartments funded with allowances under this subdivision.

(j) If rent has not been paid for the month in which the case is accepted, a non-prorated shelter allowance, not to exceed the appropriate local agency maximum monthly shelter allowance, must be provided to retain the living accommodation.

(k) Emergency shelter allowances:

(1) An emergency shelter allowance must be provided, upon request, to a household composed of an applicant for or recipient of public assistance, who has been medically diagnosed as having AIDS or HIV-related illness as defined from time-to-time by the AIDS Institute of the State Department of Health, and any family members residing with such person. Such household must be homeless or faced with homelessness and have no viable and less costly alternative housing available. The social and medical needs of the household members must be considered in making a determination concerning the availability of alternative housing.

(2) An emergency shelter allowance must not exceed $480 for the first person in the household and $330 for each additional person in the household, and in no event be greater than the actual monthly rent due. A person with AIDS or HIV-related illness in considered to be the first person in the household. Except for cases specified in paragraph (3) of this subdivision, the emergency shelter allowance is considered to be the household’s public assistance shelter allowance for public assistance budgeting purposes.

(3) When a household comprising both FA and SSI eligible persons requests an emergency shelter allowance, the social services district must compute the amount of the allowance as follows:

(i) determine the public assistance grant of the FA eligible persons using the appropriate rent schedule amount in section 352.3(a) of this Part:]
[(ii) calculate the net amount of actual household shelter costs by subtracting the appropriate rent schedule amount, as determined by referring to section 352.3(a) of this Part, from the total actual household shelter costs;

(iii) calculate the maximum amount of emergency shelter allowance available to the household by subtracting the appropriate rent schedule amount, as determined by referring to section 352.3(a) of this Part, from the maximum allowance authorized by paragraph (2) of this subdivision for the total number of persons in the household; and

(iv) subtract the SSI benefits and other income of the SSI eligible persons from the sum of the amount calculated in accordance with the provisions of subparagraph (ii) or subparagraph (iii) of this paragraph, whichever is less, and the incremental non-shelter public assistance standard of need of the SSI eligible persons. The resulting amount, if greater than zero, is the household’s emergency shelter allowance. This allowance is added to the public assistance grant determined in accordance with subparagraph (i) of this paragraph.

(4) When necessary, social services districts must:

(i) address the social services needs of a person in receipt of an emergency shelter allowance through the direct provision of services or through the provision of appropriate information and referral services; efforts should be made to ensure that an applicant for or a recipient of such an allowance has established appropriate social and medical support networks;

(ii) assist an applicant for or a recipient of an emergency shelter allowance to secure the required documentation so that eligibility for such allowance can be determined; and

(iii) arrange for required face-to-face interviews to be conducted during home visits or at other appropriate sites. In accordance with department regulations, designation representatives may file and sign application and recertification documents on behalf of an applicant for or a recipient of an emergency shelter allowance.]
352.4 Shelter costs for applicant/recipient-owned property.

(a) Purchase of interest in low cost housing development.

(1) A social services official may approve a grant, not to exceed $2,500 toward the purchase of an interest in a cooperative unit in a low cost housing development.

(2) The social services official must require assignment of applicant’s/recipient’s equity in such cooperative housing.

(b) Carrying charges.

On applicant/recipient-owned property used as a home, carrying charges must be met in the amount actually paid by the applicant/recipient, but not in excess of the appropriate maximum of the rent schedule, for the items of taxes; interest on mortgage; fire insurance; and garbage disposal, sewer and water assessments.

(c) Amortization.

The amounts required to amortize a mortgage on the applicant’s/recipient’s property must be included in the carrying charges when property is income-producing and the resulting carrying charges do not exceed the property income by an amount in excess of the maximum of the established rent schedule or when property is not income-producing but it is essential to retain the home of the applicant/recipient and the resulting carrying charges do not exceed the appropriate maximum of the established rent schedule.

(d) Property repairs.

The cost of property repairs must be met when:

(1) the property is income-producing and the repairs are essential to retain that status; or

(2) the repairs are essential to the health or safety of the applicant/recipient.

(e) Shelter costs of property deeded to social services official.

(1) Property on which a social services official has taken a deed under the provisions of section 106 of the Social Services Law may be used to shelter a public assistance recipient whether it be the recipient who conveyed such property or other recipient.
(2) Except in cases when property is used to shelter a surviving spouse of a former recipient who conveyed such property, it much be used to shelter other recipients only for a period of one year subsequent to the date of the death of the recipient who conveyed such property. After the expiration of a six-month period from such date of death but on or before the expiration of such one year, appropriate action must be taken to initiate a sale of such property in accordance with the provisions of section 106 of the Social Services Law.

(3) In cases in which property conveyed to a social services official is used to shelter a recipient other than the recipient who conveyed such property or his surviving spouse, a reasonable rental for such shelter must be determined. Such reasonable rental must be included in the grant of assistance of the recipient sheltered in such property and the net amount of such rent, in excess of all carrying charges paid for by the social services district, must be credited to the amount required to redeem the property as provided in section 106 of the Social Services Law.

352.5 Energy assistance.

(a) Tenant and customer of record requirements.

Prior to granting energy assistance under subdivisions (b) through (g) of this section, it must be documented that the applicant/recipient/grantee is the tenant and customer of record. A tenant of record is a person who has primary responsibility for payment of the monthly rent or mortgage for the dwelling unit. Individuals who contribute a portion of the monthly rent/mortgage to a person responsible for payment of the monthly rent/mortgage for the dwelling unit will not be considered a tenant of record. A customer of record is a person who has an account in his or her name with a home energy vendor. An individual who is not the tenant and customer of record considered to meet the tenant and customer of record requirement(s) when such individual is the spouse of the tenant and customer of record who is living in the same household or who is the surviving spouse of a deceased spouse who was the tenant and customer of record. The term home energy vendor means an individual or entity engaged in the business of selling electricity, natural gas, oil, propane, kerosene, coal, wood, or any other fuel used for residential heating and/or domestic (lights, cooking, hot water) energy.]
[(b) Fuel for heating allowances.]

Each social services district must grant an allowance for fuel for heating to a public assistance applicant/recipient or self-maintaining grantee in receipt of public assistance for a dependent child or children when it is documented that the applicant/recipient/grantee is the tenant of record, as defined in subdivision (a) of this section, with primary responsibility for payment of the residential heating costs. A fuel for heating allowance must also be granted to a public assistance applicant/recipient/grantee whose utility heating bill may include costs for service for the applicant/recipient/grantee’s own residential unit and for space outside that unit or whose non-utility heating bill includes costs for the applicant/recipient/grantee’s own residential unit and for other residential units when it is documented that the applicant/recipient/grantee is the tenant and customer of record as defined in subdivision (a) of this section. When a fuel for heating allowance is granted to an applicant/recipient/grantee who is the customer of record for a utility bill which may include costs for service for the applicant/recipient/grantee’s own residential unit and for space outside that unit, the social services district must determine whether a referral for a shared meter investigation, in accordance with the provisions of section 52 of the Public Service Law, is appropriate. A fuel for heating allowance is not granted to an applicant/recipient/grantee budgeted in accordance with the Section 8 certificate housing provisions outlined in section 352.3(d)(2)(ii) of this Part. To have primary responsibility for the payment of residential heating costs, the applicant/recipient/grantee must be the customer of record, as defined in subdivision (a) of this section, for the residential heating bill with a home energy vendor. Fueled for heating allowances must be provided on a 12-month heating season (October 1st - September 30th) in accordance with the following schedules and must be based upon the applicant/recipient/grantee’s primary residential heating source:

**TN #13-0053**

**Supersedes TN #04-0001**

**Approval Date** June 26, 2014

**Effective Date** January 1, 2014
(c) Payment essential to obtain non-utility heating fuel for an applicant for family assistance (FA), safety net assistance (SNA), veteran assistance or emergency public assistance. The district must authorize a nonrecoupable payment to an applicant for family assistance, safety net assistance, veteran assistance or emergency public assistance for non-utility (other than natural gas or electricity) heating fuel, including an applicant whose non-utility heating bill includes costs for the applicant's own residential unit and for other residential units, provided such payment is necessary to obtain non-utility heating fuel essential for the applicant's residential heating purposes. Such payment may only be made when it is documented that the applicant is the tenant of record and the customer of record, as defined in subdivision (a) of this section, and alternative payment or housing accommodations cannot be arranged and the applicant is without liquid resources to pay for such non-utility heating fuel. Such payment must not exceed the cost of non-utility heating fuel required to meet the applicant's immediate need. However, once an initial payment has been authorized for an applicant whose non-utility heating bill includes costs for the applicant's own residential unit and for other residential units, subsequent emergency payments to obtain non-utility heating fuel for that applicant may only be authorized for deliveries made on an alternate basis with the other unit(s) sharing the fuel source. Prior to issuing payment for each subsequent delivery, it must be documented that heating fuel in amounts reasonably comparable to the most recent delivery paid for by the social services district has been provided by or on behalf of the other unit(s) sharing the fuel source. When the alternate delivery requirement has not been met or cannot be
(d) Payment essential to obtain non-utility heating fuel. This subdivision applies to recipients of family assistance, safety net assistance, veteran assistance or self-maintaining grantees in receipt of family assistance or safety net assistance on behalf of dependent children and in receipt of fuel for heating allowances as outlined in subdivision (b) of this section. An advance allowance subject to recoupment, in accordance with section 352.11 of this Part, must be authorized for such recipient or grantee when it is documented that the recipient/grantee is the tenant and customer of record for the residential heating bill, as defined in subdivision (a) of this section, and when the recipient/grantee has made a request in writing for such an allowance and also has requested in writing that the monthly grant be reduced to recover the advance allowance. This provision is applicable in those cases where the recipient/grantee’s non-utility heating bill includes costs for the recipient/grantee’s own residential unit and for other residential units. Once an initial payment has been authorized for a recipient/grantee whose non-utility heating bill includes costs for the recipient/grantee’s own residential unit and for other residential units, subsequent payments to obtain non-utility heating fuel for that recipient/grantee may only be authorized for deliveries made on an alternate basis with the other unit(s) sharing the fuel source. Prior to issuing payment for each subsequent delivery, it must be documented that heating fuel in amounts reasonably comparable to the most recent delivery paid for by the social services district has been provided by or on behalf of the other unit(s) sharing the fuel source. When the alternate delivery requirement has not been met or cannot be documented, the social services district must address the recipient/grantee’s heating emergency with alternative methods. These methods include, but are not limited to, the following: referrals to services and/or other agencies; exploration of alternative housing; exploration of other funding sources (including HEAP); or lending of safe supplemental heating devices.

(e) Payment essential to continue or restore utility service for an applicant for family assistance, safety net assistance, veteran assistance or emergency public assistance. A payment must be made for utilities previously provided to an applicant for family assistance, safety net assistance, veteran assistance or emergency public assistance if such payment is essential to continue or restore utility service. Payment essential to continue or restore utility service may be provided to an applicant whose utility bill includes costs for service for the applicant’s own residential unit and for space outside that unit. Payment may only be made when it is documented that the applicant is the tenant of record and the customer of record as defined in subdivision (a) of this section, and]
alternative payment or housing accommodations cannot be made and the applicant is without liquid resources to continue or restore utility service. Payment must not exceed the cost of utilities provided to the applicant during the four most recently completed monthly billing periods or two most recently completed bi-monthly billing periods for which a bill has been issued immediately preceding the date of application for such assistance. Payment is limited to the applicant's proportionate share of the cost of service for the most recently completed four monthly or two most recently completed bi-monthly billing periods for which a bill has been issued immediately preceding the date of application for such assistance when the applicant’s utility bill includes costs for service for the applicant’s own residential unit and for space outside that unit. Payment must not exceed the balance due on the account. In a shared meter situation subject to the provisions of section 52 of the Public Service Law, the proportionate share is to be determined by the utility company's apportionment of retroactive charges upon completion of a shared meter investigation and determination. As a condition of receiving such assistance, an applicant not in receipt of recurring public assistance or supplemental security income whose gross monthly household income on the date of application exceeds the public assistance standard of need for the same size household must sign an agreement to repay the assistance within one year of the date of the payment. A household consists of all persons who occupy a housing unit. A house, an apartment or other group of rooms, or a single room is regarded as a housing unit when it is occupied or intended for occupancy as separate living quarters. A household includes related family members and all unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone, or a group of unrelated persons sharing a housing unit as partners, also constitutes a household. The public assistance standard of need is determined by applying the following statewide standards of need in accordance with office regulations: the pre-add allowance as set forth in Schedule SA-2a of section 352.3 of this Part; the shelter allowance as paid, but not to exceed the maximum allowance set forth in section 352.3 of this Part; the fuel allowance set forth in Schedule SA-6a, SA-6b or SA-6c of section 352.5 of this Part, if the applicant is the tenant of record and customer of the record for residential heating bill; the home energy and supplemental home energy payments (HEA and SHEA) as set forth in schedule SA-2b or SA-2c of section 352.1 of this Part; and, if applicable, the additional cost of meals for persons unable to prepare meals at home as set forth in schedule SA-5 of section 352.7 of this Part. The repayment agreement must set forth a schedule of payments that will assure repayment within one year of the date of payment. Subsequent assistance to continue or restore utility service must not be provided unless any prior utility arrearage payments have been repaid or are being repaid in accordance with the schedule of payments contained in each prior repayment agreement as of the date of application for such subsequent assistance. Repayment agreements under this subdivision may be enforced in any manner available to a creditor, in addition to any other remedy the district may have pursuant to the Social Services Law.]
Payment essential to continue or restore utility service for a recipient of family assistance, safety net assistance, veteran assistance, or self-maintaining grantee in receipt of public assistance for dependent children and in receipt of a home energy allowance and supplemental home energy allowance (HEA and SHEA) and/or a fuel for heating allowance, as defined in subdivision (b) of this section. For purposes of this subdivision, the term recipient is defined as: a recipient of family assistance, safety net assistance, veteran assistance, or a self-maintaining grantee in receipt of public assistance on behalf of dependent children and in receipt of a HEA and SHEA and/or a fuel for heating allowance, as defined in subdivision (b) of this section.

1. A payment must be made for utilities previously provided to a recipient of family assistance, safety net assistance, veteran assistance or grantee in receipt of public assistance for dependent children and in receipt of an HEA and SHEA and/or a fuel for heating allowance, as defined in subdivision (b) of this section if such payment is essential to continue or restore utility service. Payment essential to continue or restore utility service may be provided to a recipient whose utility bill includes costs for service for the recipient's own residential unit and for space outside that unit. Payment may only be granted when it is documented that the recipient/grantee is the tenant and customer of record, as defined in subdivision (a) of this section and when alternative payment or housing accommodations cannot be made and the recipient is without liquid resources to continue to restore utility service. Payment must not exceed the cost of utilities provided to the recipient for the four most recently completed monthly billing periods or two most recently completed bi-monthly billing periods in which service was rendered within the 10 monthly or five bi-monthly most recently completed billing periods immediately preceding the date of request for such assistance. When the recipient's utility bill includes costs for service for the recipient's own residential unit and for space outside that unit, payment is limited to the recipient's proportionate share of the cost of service for the time frames outlined above. In a shared meter situation subject to the provisions of section 52 of the Public Service Law, the proportionate share is to be determined by the utility company's apportionment of retroactive charges upon completion of a shared meter investigation and determination. Payment must not exceed the balance due on the account and must be provided in accordance with the provisions of paragraphs (2), (3) and (4), (5), (6), and (7) of this subdivision.

2. Payment must be provided as a nonrecoupable grant when it is documented that during the period specified in paragraph (1) of this subdivision the recipient has fully applied the public assistance grant to purposes intended to be included in such grant. Such documentation for recipients not budgeted in accordance with the Section 8 certificate housing provisions outlined in section 352.3(d)(2)(ii) of this Part must include proof of payment of: an amount at least equal to the combined...
[Home Energy Allowance and supplemental Home Energy Assistance (HEA and SHEA) budgeted in the public assistance grant to domestic (lights, cooking, hot water) energy costs; the monthly fuel for heating allowance budgeted in the public assistance grant to incurred heating costs; and the monthly shelter allowance budgeted in the public assistance grant to shelter costs. In addition, there must be no other evidence of mismanagement. Documentation for recipients budgeted in accordance with the provisions outlined in section 352.3(d)(2)(ii) of this Part must include proof of payment of: an amount at least equal to the combined Home Energy Allowance and Supplemental Home Energy Allowance (HEA and SHEA) budgeted in the public assistance grant to domestic energy costs (lights, cooking, hot water); an amount at least equal to the shelter allowance budgeted in the public assistance grant towards shelter, heating, water, and other shelter-related items covered by the federal Department of Housing and Urban Development utility allowance. In addition, there must be no other evidence of mismanagement.

(3) If such recipient is not eligible for a nonrecoupable grant pursuant to paragraph (2) of this subdivision, or for other available non-recoupable grants including Home Energy Assistance Program benefits, payment must be provided as an advance allowance subject to recoupment in accordance with section 352.11 of this Part.

(4) Whenever a social services district makes an arrearage payment to continue or restore the utility service of a public assistance recipient, the district must also, prospectively for a period of six months or until the case is closed, whichever occurs first, act as a guarantor of the recipient’s future utility bills or place the recipient on voucher payment. When the recipient is the customer of record for a utility bill which includes costs for service for the recipient’s own residential unit and for space outside that unit, only the recipient’s proportionate share of the bill is the prospective responsibility of the social services district.

(5) If the agency uses a voucher payment to meet the prospective responsibility for an FA recipient the agency must be able to document recipient mismanagement. For the purposes of this subdivision, mismanagement is determined in accordance with the provisions outlined in paragraph (2) of this subdivision. In such cases, amounts not to exceed the following are restricted from the recipient’s grant:

(i) if the recipient’s utility bill represents “heat only,” and the recipient does not reside in or is not budgeted in accordance with the Section 8 certificate housing provisions outlined in section 352.3(d)(2)(ii) for this Part, the recipient’s monthly fuel for heating allowance is removed from the recipient’s monthly grant. If the recipient’s utility bill represents “heat only”]
[and the recipient does reside in Section 8 certificate housing or is budgeted in accordance with section 352.3(d)(2)(ii) of this Part, the balance of the shelter allowance minus the actual rent obligation, up to an amount equal to the appropriate fuel allowance schedule set forth in subdivision (b) of this section for the appropriate heating type and public assistance household size, is removed from the grant. Heating costs paid by the district which exceed the amount removed from the recipient’s grant are considered to be overpayments subject to recoupment in accordance with section 352.31 (d) of this Part;

(ii) if the recipient’s utility bill represents domestic costs only (lights, cooking, hot water), the recipient’s Home Energy Allowance and Supplemental Home Energy Allowance (HEA and SHEA) or the average monthly cost of the recipient’s domestic utility service, whichever is less, is removed from the recipient’s grant. Domestic energy costs paid by the district which exceed the amount removed from the grant must be considered to be overpayments subject to recoupment in accordance with section 352.31(d) of this Part.

(iii) if the recipient’s utility bill represents heat and domestic costs, a combination of the amounts outlined in subparagraphs (i) and (ii) of this paragraph is removed from the grant. If the recipient’s combined heat and domestic costs exceed the amounts removed from the recipient’s grant, the balance must be considered an overpayment subject to recoupment in accordance with section 352.31(d) of this Part.

(6) If the agency uses a vendor payment to meet the prospective responsibility for an SNA recipient, the agency may do so in accordance with section 381.3(c)(2) of this Title.

(7) When a recipient has been placed on vendor payment, whereby the social services district pays the energy vendor directly, as a result of mismanagement by the recipient or for administrative ease, the district must at least annually, at case closing, and upon termination of the vendor payment arrangement, determine if there has been an under/overpayment. Identified underpayments/overpayments are to be reconciled in accordance with section 352.31 (d), (e), and/or (f) of this Part.

(g) (1) For recipients with heating costs in excess of their annual allowance provided pursuant to the schedules set forth in this section, the district should explore the possibility of alternative housing (renters only) and/or weatherization/conservation services.]
[(2) Recipients who retain responsibility for the payment of their own heating bills should be made aware of and encouraged to use budget billing programs offered by their heating vendors.

(3) When the heating and/or domestic energy bill of a public assistance recipient/grantee has been placed on vendor payment as a result of a mismanagement determination, voluntary request, or administrative easy provision, the district must determine if there has been an under/overpayment. This reconciliation must be conducted at least annually, at case closing, and upon termination of the vendor payment arrangement. Identified under/overpayments are to be reconciled in accordance with section 352.31(d), (e), and/or (f) of this Part.

(h) The social services official must designate a staff member to function as a liaison to energy vendors, other agencies, and to individuals seeking energy-related information and/or assistance.

(i) The social services official must ensure that 24 hour/seven day a week referral capability exists for receipt of referrals from energy vendors, outside agencies, and individuals with energy related emergencies. The official may either designate social services district staff to be available on a 24 hour, seven days a week basis or may choose to designate an agency/organization in the community which agrees to accept calls after normal business hours and on weekends and to assist a referred household in the temporary alleviation of a life threatening energy emergency until the household can make application for financial assistance on the next normal business day.

352.6 Miscellaneous shelter allowances and grants.

(a) (1) A social services official must provide funds for household moving expenses utilizing the least costly practical method of transportation, a rent security deposit, and/or a brokers’ or finders’ fee only when, in his judgment, one of the following conditions exists:

(i) the move is to a less expensive rental property and the amount paid for a security deposit and moving expenses is less than the amount of a two-year difference in the rentals; or

(ii) the move is necessitated by one of the following criteria:

(a) the need to move results from a disaster/catastrophe and/or a vacate order placed against the premises by a health agency or code enforcement agency;]
(b) the move is necessitated by a serious medical or physical handicap condition. Such need must be verified by specific medical diagnosis;

(c) the individual or family is rendered homeless as a result of having been put out by another occupant with whom they were sharing accommodations;

(d) the move is from temporary to permanent housing;

(e) the move is from permanent housing to temporary housing whenever necessary due to the unavailability of permanent housing;

(f) the move is from one temporary accommodation to another temporary accommodation whenever necessary due to the unavailability of permanent housing;

(g) the move is from an approved relocation site or to an approved cooperative apartment; or

(h) there is a living situation which adversely affects the mental or physical health of the individual or family, and the need for alternative housing is urgent, and not issuing a security deposit, moving expenses and/or brokers’ or finders’ fees would prove detrimental to the health, safety and well-being of the individual or family.

(2) A security deposit and/or brokers’ or finders’ fees must be provided only when an applicant or recipient is unable to obtain a suitable vacancy without payment of such allowances.

(3) Documentation of the need for a security deposit, moving expenses and/or brokers’ or finders’ fees must be fully recorded in the case record.

(b) **Avoidance of abuses in connection with rent security deposits.**

(1) Whenever a landlord requires that he be secured against nonpayment of rent or for damages as a condition to renting a housing accommodation to a recipient of public assistance, a local social services official may secure the landlord by either of the following means:

   (i) by means of an appropriate agreement between the landlord and the social services official; or]
((ii) by depositing money in an escrow account, not under the control of the landlord or landlord’s agent, subject to the terms and conditions of an agreement between the landlord and the social services official in such form as the department may require or approve; provided, however, that the provisions of this subparagraph do not apply where a public assistance recipient resides in public housing.

(2) A social services official may not pay money to a landlord to be held as a security deposit against the payment of rent or for damages by a public assistance recipient, or issue a grant to a recipient of public assistance therefor, except as provided in paragraph (3) of this subdivision.

(3) When, in the judgment of a social services official, housing accommodations available in a particular area are insufficient to accommodate properly recipients of public assistance in need of housing, and in order to secure such housing, it is essential that the official pay money to landlords to be held as security deposits against the non-payment of rent or for damages by public assistance recipients or to issue grants to recipients of public assistance therefor, such social services official may pay or furnish funds for such security deposits until sufficient housing accommodations are available in the particular area to accommodate properly recipients of public assistance in need of housing. Social services officials must not pay or furnish such funds where recipients of public assistance reside in public housing. In no case will temporary residence in a shelter, including those defined in Parts 900 or 1000 of this Title, a hotel/motel or any other such emergency or transitional residential facility be considered sufficient housing accommodations for purposes of this paragraph. Landlords receiving such security deposits must comply with the provisions of article seven of the General Obligations Law. The recipient is required to assign to the social services official any right the recipient may have to the return of the security deposit and interest accrued thereon. Any social services official paying or furnishing funds for a security deposit in accordance with this paragraph must make diligent efforts to recover such payments or funds from the landlord as allowed by law. Such efforts must not delay recoupment or recovery from a recipient if recoupment or recovery from the recipient is required by this section.]
[(c) Recovery of rent security payments.]

(1) If as a result of non-payment of the shelter allowance, the security deposit or security agreement for non-payment of rent is required to be paid to the landlord, such payment must be considered to be an overpayment made to the recipient and as such, must be recovered according to the provisions of section 352.31(d) of this Part. If rent has not been paid due to a legitimate landlord/tenant dispute, a rent strike or as a result of the application of Section 143-b of the Social Services Law, such payment is not an overpayment and cannot be recouped or recovered.

(2) When a security deposit or monies under a security agreement are paid to a landlord for damages caused by a recipient, such payment must be considered an overpayment and must be recovered from a recipient pursuant to the provisions of section 352.31(d) of this Part provided that a social services official has conducted (or arranged for) a pre-tenancy and post-tenancy inspection or survey of the premises, or verified by some other means that the damages were caused by the recipient. The condition of the premises when the recipient moves and when the recipient moves out must be documented and agreed to by signature of the landlord and the recipient. If the verification does not confirm that there are damages caused by the recipient, then cash much not be issued under a security agreement or, if a cash security deposit had been issued and the landlord retains it for alleged damages, the social services official must attempt to recover the deposit from the landlord. When the verification confirms that the recipient caused the damages, the district must recover the deposit amount from the recipient.

(d) When non-payment of the shelter allowance or client-caused damages, as confirmed by a pre-tenancy inspection and post-tenancy inspection or survey conducted by the social services district or by some other means of verifying that the damages were caused by the recipient pursuant to paragraph (2) of subdivision (c) of this section necessitates the authorization of finders’ or brokers’ fees, or household moving expenses, such payments must be considered to be overpayments made to the recipient and as such, must be recovered according to the provisions of section 352.31(d) of this Part. If rent has not been paid due to a legitimate landlord/tenant dispute, a rent strike or as a result of the application of Section 143-b of the Social Services Law, such payments are not overpayments and cannot be recouped or recovered.

(e) Unless prohibited by State or federal law or regulation, an allowance for expenses, not otherwise authorized under this title, for the repair, maintenance or retention of housing occupied by, but not owned by, a recipient of public assistance must be paid when necessary for the health and safety of the recipient and his or her family, when other appropriate housing is not available and when the payment is necessary to permit the recipient and his or her family to remain in the housing. An allowance for expenses for]
[repair and maintenance must be paid only when the owner of the housing is not obligated to provide the repair or maintenance. An allowance under this subdivision does not include payments for utility deposits for gas and electricity, payments covered under subdivision (b) of this section, payments for rent, property taxes or mortgage arrears and payments for litigation costs of any kind, including attorney's fees.

(f) An allowance for storage of furniture and personal belongings must be made when it is essential, for circumstances such as relocation, eviction or temporary shelter, so long as eligibility for public assistance continues and so long as the circumstances necessitating the storage continue to exist.

352.7 Allowances and grants for other items of need.

(a) Furnishings.

(1) If provision therefore cannot otherwise be made, each social services district must provide for the purchase of necessary and essential furniture, furnishings, equipment and supplies required for the establishment of a home for persons in need of public assistance. For purposes of this subdivision, such an allowance must be provided only when, in the judgment of the social services official, one of the following conditions exists:

(i) An individual or family temporarily housed in a hotel, motel, homeless shelter, residential program for victims of domestic violence or other temporary accommodation to which the individual or family has been referred by the social services district is being permanently rehoused in unfurnished housing accommodations, and suitable furnished accommodations are not available.

(ii) An unattached individual, whose needs cannot otherwise be met under Part 397 of this Title is discharged from an institution, is determined to be capable of maintaining an apartment in the community and suitable furnished accommodations are not available.

(iii) An adult whose needs cannot otherwise be met under Part 397 of this Title, is discharged from an institution and wishes to rejoin his family, which is in need of additional furniture to provide adequate shelter for him.

(iv) A child is returned to his parents, who are in need of additional furniture to provide adequate shelter for him.]
An individual's or family's living situation adversely affects the physical and mental health of that individual or family, and it is essential that the individual or family be rehoused in unfurnished housing accommodations in order to safeguard his or their health, safety and well-being.

An allowance provided under paragraph (1) of this subdivision may not exceed the amounts authorized for the appropriate rooms and items in the following schedule:

**SCHEDULE SA-4a**
INITIAL OR REPLACEMENT COST OF ESSENTIAL HOUSEHOLD FURNITURE, FURNISHINGS, EQUIPMENT AND SUPPLIES

Documentation of the need for such furniture must be fully recorded in each case record.

**Equipment repairs.**

Each social services district must provide for the essential repair of heating equipment, cooking stoves and refrigerators used by persons in need of public assistance in their homes, provided provision therefor cannot otherwise be made except that replacement may be authorized when less expensive than repair. Such allowances for cooking stoves and refrigerators cannot exceed the amount authorized under schedule SA-4a.

**Additional cost of meals.**

Each social services district must provide for the additional costs of meals for persons unable to prepare meals at home or who do not otherwise receive meals in their residences in accordance with the following schedule:

[SCHEDULE SA-5
RESTAURANT ALLOWANCE
SCHEDULE

Monthly allowances to be added to appropriate monthly grants and allowances for combinations of restaurant meals and meals prepared at home or meals otherwise provided in the residence, including sales tax.

Dinner in a restaurant $29.00
Lunch and dinner in a restaurant $47.00
All meals in a restaurant $64.00

Additional special restaurant allowance as described below.

Effective November 1, 1986, a special monthly restaurant allowance of an additional $36 must be granted to any pregnant woman or person under 18 years of age, or any person under 19 years of age who is a full-time student regularly attending a secondary school or in the equivalent level of vocational or technical training if, before such person attains age 19, such person may reasonably be expected to complete the program of such secondary school or training.

HOME DELIVERED MEALS

Monthly allowances to be added to appropriate monthly grants and allowances.

Extra allowance $36.00

(d) Replacement of clothing or furniture. Each social services district must provide for partial or total replacement of clothing or furniture which has been lost in a fire, flood or other like catastrophe, provided such needs cannot otherwise be met through assistance from relatives or friends or from other agencies or other resources. Such allowances must not exceed the amounts authorized under schedules SA-4a and SA-4b.

Supersedes TN #04-0001
Approval Date June 26, 2014
Effective Date January 1, 2014
[(g) Payment for services and supplies already received. Assistance grants must be made to meet only current needs. Under the following specified circumstances payment for services or supplies already received is deemed a current need:

(1) Replacement of lost or stolen checks.

   (i) If an applicant or recipient reports to a local social services official that a check has been lost or stolen, an affidavit of loss much be required of the recipient, and payment of the check must be stopped: If the recipient has not already done so, he must be required by the local social services official to report the loss or theft to the police, to obtain from them the blotter entry number, or classification number, or file number or other available evidence of the reporting, and to furnish such evidence to the local social services official. When satisfied that such police report has been made, the local social services official must issue a replacement check to the recipient, on which there must appear above the place for the recipient’s signature, the following: “By endorsing or cashing this check I acknowledge that this is a replacement for a check, number dated drawn to my order on which was lost/stolen, that I have not received the proceeds of said check directly or indirectly; and that I have been informed it is illegal for me to cash said check, and if I do so, I am liable to prosecution.”

   (ii) If payment is not stopped on the original check and it and the replacement check are both cashed, only one must be subject to State reimbursement, and the social services district must limit its claim for State reimbursement to one of the two checks.

   (iii) If it is established that a recipient endorsed and cashed an allegedly lost or stolen check which has been replaced, the amount of such check must be recovered from the recipient as provided for by the provisions of the regulations of this department.

(2) Replacement of electronic benefits.

When a recipient claims that he or she has not received electronic cash public assistance benefits which the Department’s computer issuance record indicated were issued, the social services district must verify the validity of the computer issuance record in accordance with procedures established by the Department. If it is verified that a valid issuance transaction occurred, the benefits cannot be replaced. If it is determined that a valid issuance transaction did not occur, the benefits must be restored in accordance with section 352.31(f) of this Part.]
A grant may be made to pay for rent, property taxes or mortgage arrears for the time prior to the month in which the public assistance case was opened or for applicants for emergency assistance under Parts 370 and 372 of this Title only when:

(i) such payment is essential to forestall eviction or foreclosure and no other shelter accommodations are available; or

(ii) the health and safety of the applicant is severely threatened by failure to make such payment; and

(iii) the authorization for the payment receives special written approval by the social services official or such other administrative officer as he or she may designate, provided such person is higher in authority than the supervisor who regularly approves authorization.

(iv) the applicant reasonably demonstrates an ability to pay shelter expenses, including any amounts in excess of the appropriate local agency maximum monthly shelter allowance, in the future. However, when in the judgment of the local social services official, the individual or family has sufficient income or resources to secure and maintain alternate permanent housing, shelter arrears need not be paid to maintain a specific housing accommodation;

(v) such payment does not exceed the local agency maximum monthly shelter allowance. A district may, consistent with subparagraph (iv) of this paragraph, issue a grant for arrears in excess of the maximum monthly shelter allowance. However, any amount above the local agency maximum monthly shelter allowance paid towards the monthly arrears is an overpayment subject to recovery and recoupment in accordance with section 352.31 of this Part;

(vi) the applicant, if accepted for on-going public assistance, agrees to future restriction of shelter payments in accordance with Part 381 of this Title; and

(vii) in the case of an applicant who is not eligible for Safety Net Assistance, Family Assistance, Emergency Assistance to Families or Emergency Assistance to Adults, such applicant is without income or resources immediately available to meet an emergency need, such applicant’s gross household income at the time of application does not
[exceed 125 percent of the federal income official poverty line as defined and annually revised by the Federal Office of Management and Budget, and such applicant signs an agreement to repay the assistance in a period not to exceed 12 months from receipt of such assistance. The repayment agreement must set forth a schedule of payments that will assure repayment within the 12 month period, and must specify the frequency of the payments, the due date of the first payment, the address where payments must be made and the consequences of failing to repay the assistance as agreed. Subsequent assistance to pay arrears may not be granted unless there are not past-due amounts owed under any such repayment agreement. The social services district, in addition to any rights it has pursuant to the Social Services Law, may enforce the repayment agreement in any manner available to a creditor.

(4) A recipient of family assistance or safety net assistance who is threatened with eviction or foreclosure or who is being evicted or whose property is being foreclosed upon for non-payment of rent, mortgage or taxes incurred during a period for which a grant had been previously issued to the recipient may be provided with an advance allowance for rent, mortgage principal and interest payments or taxes in accordance with section 352.11 of this Part. Advance investigation of the need for restricted payments must be conducted in accordance with Part 381 of this Title. An allowance for rent, mortgage principal and interest payments or taxes which exceeds the appropriate local agency maximum monthly shelter allowance can be made only if all of the following conditions are met:

(i) notwithstanding section 352.23(b) of this Part, the recipient agrees to use all available liquid resources for the payment of shelter expenses necessary to prevent eviction or foreclosure;

(ii) the recipient demonstrates an ability to pay shelter expenses in the future, including any amounts in excess of the appropriate local agency maximum monthly shelter allowance;

(iii) the recipient agrees to future restriction of rent or mortgage payments; and

(iv) the recipient has not previously received an allowance pursuant to this paragraph and, subsequent to receiving such allowance, requested discontinuation of restriction of the shelter payments to which he or she agreed pursuant to this paragraph.]
(h) Chattel mortgages or conditional sales contracts.

If the furniture or household equipment of an applicant, who has not been a recipient of public assistance within the previous six months preceding his application, is essential to making his living accommodations habitable but are presently encumbered by a chattel mortgage or a conditional sales contract, every effort must be made to defer, cancel or reduce payments on such chattel mortgage or conditional sales contract. If all such efforts fail, an allowance may be made for a compromise settlement of such payments or, if a compromise cannot be reached, for other essential payments; provided, however, that the compromise settlement or allowances must not exceed the cost of replacement.

(i) Camp fees.

When funds cannot be obtained from other sources, camp fees may be paid for children receiving FA not in excess of total cost of $400 per child per annum, in amounts not to exceed $200 per week.

(j) Reserved.

(k) Additional needs because of pregnancy.

A monthly allowance of $50 must be added to the appropriate monthly grant and allowance of a needy pregnant woman beginning with the fourth month of pregnancy or the month in which medical verification of pregnancy is presented to the district, whichever is later.

(l) Reserved.

(m) Supplemental payments.

The social services official must provide a monthly allowance to supplement the income of an FA, SNA or VA household when the household experiences a net loss of cash income due to the acceptance of employment by a JOBS participant who is a member of the household, when such acceptance is required by the social services district. A net loss of cash income occurs when the monthly gross income of the household, subtracting necessary actually work-related expenses, is less than the cash assistance the household received in the month in which the offer of employment was made. The supplement must equal the monthly net loss of cash income that would occur if the supplement were not paid to the household.

(1) Gross income includes, but is not limited to, earnings, unearned income and cash assistance.

(2) Cash assistance means the budget deficit as defined in section 352.29 of this part.

(3) Necessary actually work-related expenses are the actual, verifiable and unreimbursed expenses directly related to maintaining employment.]
[(i) Such expenses include, but are not limited to:

(a) mandatory payroll deductions such as federal, State and local taxes, social security taxes, disability insurance and union dues;

(b) tools, materials, uniforms and other special clothing required for the job;

(c) mandatory fees for licenses or permits fixed by law;

(d) deductions for medical insurance coverage;

(e) child care up to the local market rate; and

(f) transportation, including the cost of transporting children to and from day care, except that the amount for use of a motor vehicle must be computed on a mileage basis at the same rate paid to employees to the social services district and must only be allowed when public transportation is not available.

(ii) Such expenses do not include:

(a) meals;

(b) business-related depreciation;

(c) personal business and entertainment expenses;

(d) personal (not work related) transportation;

(e) purchase of capital equipment; and

(f) payments of the principal of loans.

(n) Burials.

Allowances must be made for burial of applicants for and recipients of public assistance in accordance with section 141 of the Social Services Law.

(o) Removals.

Allowances must be made to applicants for or recipients of public assistance who are removed to another state or country in accordance with section 310.1(h) of this Title. Such allowances can only be made for the reasonable and necessary expenses of such removals, as authorized by section 310.1(h)(2) of this Title.]

If an individual receives a title II benefit, any amount attributable to the most recent increase in the monthly insurance benefit as a result of a title II COLA is not counted as income during a “transition period” beginning with January, when the title II benefit for December is received, and ending with the last day of the month following the month of publication of the revised annual Federal poverty level.

For individuals with title II income, the revised poverty levels are not effective until the first day of the month following the end of the transition period.

For individuals not receiving title II income, the revised poverty levels are effective no later than the beginning of the month following the date of publication.

* These are Partnership qualified long-term case policies meeting New York State’s guidelines and are available from selected insurance carriers. Policies must guarantee certain standards and requirements and will carry the project logo to identify them as meeting the necessary standards and requirements for participation in this public/private partnership. If purchasers utilize the minimum required benefits under the private insurance policy, they will be enrolled in a special State Medicaid program. Under this program, the Medicaid applicant either will not be subject to a resource test as usually required under 42 CFR 435.840 and 42 CFR 435.841, and as otherwise specified in New York State’s Title XIX State Plan, or will be subject to a more limited resource test different than usually required under 42 CFR 435.840 and 42 CFR 435.841, and as otherwise specified in New York State’s Title XIX State Plan that is based on the disregard of an amount of resources equal to the amount of private insurance benefits paid by a selected insurance carrier on behalf of the applicant.

STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

TRANSFER OF RESOURCES *

1902(f) and 1917 of the Act
The agency provides for the denial of eligibility by reason of disposal of resources for less than fair market value.

A. Except as noted below, the criteria for determining the period of ineligibility are the same as criteria specified in section 1613(c) of the Social Security Act (Act).

1. Transfer of resources other than the home of an individual who is an inpatient in a medical institution.

a. [X] The agency uses a procedure which provides for a total period of ineligibility greater than 24 months for individuals who have transferred resources for less than fair market value when the uncompensated value of disposed of resources exceeds $12,000. This period bears a reasonable relationship to the uncompensated value of the transfer. The computation of the period and the reasonable relationship of this period to the uncompensated value is described as follows:

Where the UCV is more than $12,000, the time limit for consideration of the UCV amount toward resources shall be extended for one month for each additional $2,000 in excess of the $12,000.

The amount of the UCV may be diminished by an amount equal to the amount of medical expenses incurred in this period.

* The State is in compliance with the transfer of assets provision of the MCCA as amended by the Family Support

TN  #91-79B
Supersedes TN  #85-25
Approval Date  June 26, 1992
Effective Date  October 1, 1991
b. [X] The period of ineligibility is less than 24 months, as specified below:

Where the UCV is $12,000 or less the UCV amount must be counted towards the resource limit for a period of 24 months from the date of the transfer, or until the amount of medical expenses equals the UCV.

c. [ ] The agency has provisions for waiver of denial of eligibility in any instance where the State determines that a denial would work an undue hardship.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

2. Transfer of the home of an individual who is an inpatient in a medical institution.

[X] A period of ineligibility applies to inpatients in an SNF, ICF or other medical institution as permitted under section 1917(c)(2)(B)(i).

a. Subject to the exceptions on page 2 of this supplement, an individual is ineligible for 24 months after the date on which he disposed of the home. However, if the uncompensated value of the home is less than the average amount payable under this plan for 24 months of care in an SNF, the period of ineligibility is a shorter time, bearing a reasonable relationship (based on the average amount payable under this plan as medical assistance for care in an SNF) to the uncompensated value of the home as follows:
b. [ ] Subject to the exceptions on page 2 of this supplement, if the uncompensated value of the home is more than the average amount payable under this plan as medical assistance for 24 months of care in an SNF, the period of ineligibility is more than 24 months after the date on which he disposed of the home. The period of ineligibility bears a reasonable relationship (based upon the average amount payable under this plan as medical assistance for care in an SNF) to the uncompensated value of the home as follows:
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

No individual is ineligible by reason of item A.2 if --

(i) A satisfactory showing is made to the agency (in accordance with any regulations of the Secretary of Health and Human Services) that the individual can reasonably be expected to be discharged from the medical institution and to return to that home;

(ii) Title to the home was transferred to the individual’s spouse or child who is under age 21, or (for States eligible to participate in the State program under title XVI of the Social Security Act) is blind or permanently and totally disabled or (for States not eligible to participate in the State program under title XVI of the Social Security Act) is blind or disabled as defined in section 1614 of the Act;

(iii) A satisfactory showing is made to the agency (in accordance with any regulations of the Secretary of Health and Human Services) that the individual intended to dispose of the home either at fair market value or for other valuable consideration; or

(iv) The agency determines that denial of eligibility would work an undue hardship.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

3. **1902(f) States**

   [ ] Under the provisions of section 1902(f) of the Social Security Act, the following transfer of resource criteria more restrictive than those established under section 1917(c) of the Act, apply:

   **B.** Other than those procedures specified elsewhere in the supplement, the procedures for implementing denial of eligibility by reason of disposal of resources for less than fair market value are as follows:

   1. If the uncompensated value of the transfer is $12,000 or less:

   2. If the uncompensated value of the transfer is more than $12,000:
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

3. If the agency sets a period of ineligibility of less than 24 months and applies it to all transfers of resources (regardless of uncompensated value):

4. Other procedures:

Supersedes TN #85-25
Approval Date June 26, 1992
Effective Date October 1, 1991
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

TRANSFER OF ASSETS

1917(c) The agency provides for the denial of certain Medicaid services by reason of disposal of assets for less than fair market value.

1. Institutionalized individuals may be denied certain Medicaid services upon disposing of assets for less than fair market value on or after the look-back date.

The agency withholds payment to institutionalized individuals for the following services:

- Payments based on a level of care in a nursing facility;
- Payments based on a nursing facility level or care in a medical institution;
- Home and community-based services under a 1915 waiver.

2. Non-institutionalized individuals:

[ ] The agency applies these provisions to the following non-institutionalized eligibility groups. These groups can be no more restrictive than those set forth in section 1905(a) of the Social Security Act:

The agency withholds payment to non-institutionalized individuals for the following services:

- Home health services (section 1905(a)(7));
- Home and community care for functionally disabled and elderly adults (section 1905(a)(22));
- Personal care services furnished to individuals who are not inpatients in certain medical institutions, as recognized under agency law and specified in section 1905(a)(24).

[ ] The following other long-term care services for which medical assistance is otherwise under the agency plan:

TN #95-12
Supersedes TN NEW
Approval Date August 18, 1995
Effective Date January 1, 1995
TRANSFER OF ASSETS

3. **Penalty Date --**

   The beginning date of each penalty period imposed for an uncompensated transfer of assets is:

   [ ] the first day of the month in which the asset was transferred;

   [X] the first day of the month following the month of transfer.

4. **Penalty Period – Institutionalized Individuals --**

   In determining the penalty for an institutionalized individual, the agency uses:

   [ ] the average monthly cost to a private patient of nursing facility services in the agency;

   [X] the average monthly cost to a private patient of nursing facility services in the community in which the individual is institutionalized.

5. **Penalty Period – Non-institutionalized Individuals --**

   The agency imposes a penalty period determined by using the same method as is used for an institutionalized individual, including the use of the average monthly cost of nursing facility services;

   [ ] imposes a shorter penalty period than would be imposed for institutionalized individuals, as outlined below:
TRANSFER OF ASSETS

6. **Penalty period for amounts of transfer less than cost of nursing facility care** --

   a. Where the amount of the transfer is less than the monthly cost of nursing facility care, the agency;

      [ ] does not impose a penalty;

      [X] imposes a penalty for less than a full month, based on the proportion of the agency’s private nursing facility rate that was transferred.

   b. Where an individual makes a series of transfers, each less than the private nursing facility rate for a month, the agency:

      [ ] does not impose a penalty;

      [X] imposes a series of penalties, each for less than a full month.

7. **Transfers made so that penalty periods would overlap** --

   The agency:

   [X] totals the value of all assets transferred to produce a single penalty period;

   [ ] calculates the individual penalty periods and imposes them sequentially.

8. **Transfers made so that penalty periods would not overlap** --

   The agency:

   [X] assigns each transfer its own penalty period;

   [ ] uses the method outlined below:
9. **Penalty periods - transfer by a spouse that results in a penalty period for the individual** --

(a) The agency apportions any existing penalty period between the spouses using the method outlined below, provided the spouse is eligible for Medicaid. A penalty can be assessed against the spouse, and some portion of the penalty against the individual remains.

In the case of a transfer by a spouse of an individual which results in a period of ineligibility for the individual, if the spouse becomes eligible for MA before such period of ineligibility ends, the remaining portion of the period of ineligibility will be divided equally between the individual and the spouse so long as both remain eligible for MA.

(b) If one spouse is no longer subject to a penalty, the remaining penalty period must be served by the remaining spouse.

10. **Treatment of income as an asset** --

When income has been transferred as a lump sum, the agency will calculate the penalty period on the lump sum value.

[X] The agency will impose partial month penalty periods.

When a stream of income or the right to a stream of income has been transferred, the agency will impose a penalty period for each income payment.

[X] For transfers of individual income payments, the agency will impose partial month penalty periods.

[X] For transfers of the right to an income stream, the agency will use the actuarial value of all payments transferred.

[ ] The agency uses an alternate method to calculate penalty periods, as described below:
11. Imposition of a penalty would work an undue hardship --

The agency does not apply the transfer of assets provisions in any case in which the agency determines that such an application would work an undue hardship. The agency will use the following procedures in making undue hardship determinations:

- The form, “Explanation of the Effect of Transfer of Assets on Medical Assistance Eligibility”, is made available to all individuals who request such information and must be given to all MA-only applicants at the time of the initial application. The form must also be sent when an A/R is denied/discontinued due to a prohibited transfer. This form notifies A/R’s that an undue hardship provision exists.

- At any time during or after the application process, an A/R or his/her representative may request that a determination based on undue hardships be made. The local district must base its decision on the criteria set forth below. Local districts must determine whether an undue hardship waiver will be granted within 30 days of such a request by an A/R or his/her representative. A longer time period may be allowed in situations where additional time is needed due to difficulties or delays in obtaining evidence.

- The mandated client notice that informs the A/R of his/her denial/discontinuation for MA due to transfer of assets, provides detailed information on the process under which an adverse action determination can be appealed via fair hearing process.

The following criteria will be used to determine whether the agency will not count assets transferred because the penalty would work an undue hardship:

Undue hardship cannot be claimed; if the client failed to fully cooperate, to the best of his/her ability, as determined by the social services district, in having all of the transferred assets returned or the trust declared void (where possible). Cooperation may include but is not limited to, assisting in providing all legal records pertaining to the transfer creation of the trust, assisting the district, wherever possible, in providing information regarding the transfer amount, to whom it was transferred, any documents to support the transfer or any other information related to the circumstances of the transfer; or

Additionally, undue hardship cannot be claimed when after payment of medical expenses, the individual’s or couple’s income and/or resources is above the allowable MA exemption standard for a household or the same size; or

When the only result is the individual’s or the individual’s spouse claim that the assets are needed to maintain a pre-existing life style; or

when application of the transfer of assets provision merely causes
TRANSFER OF ASSETS

11. **Imposition of a penalty would work an undue hardship** --

The agency does not apply the transfer of assets provisions in any case in which the agency determines that such an application would work an undue hardship. The agency will use the following procedures in making undue hardship determinations:

(continued from previous page)

Fair hearings are provided pursuant to federal regulations (Goldberg v. Kelly)

The following criteria will be used to determine whether the agency will not count assets transferred because the penalty would work an undue hardship:

(continued from previous page)

the individual inconvenience; or

when such application might restrict his or her lifestyle but would not put him/her at risk of serious deprivation.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

TRANSFER OF ASSETS

1917(c) FOR TRANSFERS OF ASSETS FOR LESS THAN FAIR MARKET VALUE MADE ON OR AFTER FEBRUARY 8, 2006, the agency provides for the denial of certain Medicaid services.

1. Institutionalized individuals are denied coverage of certain Medicaid services upon disposing of assets for less than fair market value on or after the look-back date.

   The agency does not provide medical assistance coverage for institutionalized individuals for the following services:

   Nursing facility services;

   Nursing facility level of care provided in a medical institution;

   Home and community-based services under a 1915(c) or (d) waiver.

2. Non-institutionalized individuals:

   The agency applies these provisions to the following non-institutionalized eligibility groups. These groups can be no more restrictive
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

TRANSFER OF ASSETS

than those set forth in section 1905(a) of the Social Security Act:

The agency withholds payment to non-institutionalized individuals for the following services:

Home health services (section 1905(a)(7));

Home and community care for functionally disabled elderly adults (section 1905(a)(22));

Personal care services furnished to individuals who are not inpatients in certain medical institutions, as recognized under agency law and specified in section 1905(a)(24).

The following other long-term care services for which payment for medical assistance is otherwise made under the agency plan:

3. Penalty Date --

The beginning date of each penalty period imposed for an uncompensated transfer of assets is the later of:

- the first day of a month during or after which assets have been transferred for less than fair market value;

month in which the assets were transferred

_ X_ The State uses the first day of the month after the month in which the assets were transferred

or

• the date on which the individual is eligible for medical assistance under the State plan and is receiving institutional level care services described in paragraphs 1 and 2 that, were it not for the imposition of the penalty period, would be covered by Medicaid;

AND

which does not occur during any other period of ineligibility for services by reason of a transfer of assets penalty.

4. **Penalty Period – Institutionalized Individuals --**

In determining the penalty for an institutionalized individual, the agency uses:

--- the average monthly cost to a private patient of nursing facility services in the State at the time of application;

_ X_ the average monthly cost to a private patient of nursing facility services in the community in which the individual is institutionalized at the time of application.

5. **Penalty Period – Non-institutionalized Individuals --**
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

TRANSFER OF ASSETS

The agency imposes a penalty period determined by using the same method as is used for an institutionalized individual, including the use of the average monthly cost of nursing facility services;

___ imposes a shorter penalty period than would be imposed for institutionalized individuals, as outlined below:

6. Penalty period for amounts of transfer less than cost of nursing facility care --

  _X_ Where the amount of the transfer is less than the monthly cost of nursing facility care, the agency imposes a penalty for less than a full month, based on the option selected in item 4.

  _X_ The state adds together all transfers for less than fair market value made during the look-back period in more than one month and calculates a single period of ineligibility, that begins on the earliest date that would otherwise apply if the transfer had been made in a single lump sum.

7. Penalty periods - transfer by a spouse that results in a penalty period for the individual --

  (a) The agency apportions any existing penalty period between the spouses using the method outlined below, provided the spouse is eligible for Medicaid. A penalty can be assessed against the spouse, and some portion of the penalty against the individual remains.

  (b) If one spouse is no longer subject to a penalty, the remaining penalty period must be served the remaining spouse.

8. Treatment of a transfer of income --

When income has been transferred as a lump sum, the agency will calculate the penalty period on the lump sum value.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

TRANSFER OF ASSETS

When a stream of income or the right to a stream of income has been transferred, the agency will impose a penalty period for each income payment.

_X_ For transfers of individual income payments, the agency will impose partial month penalty periods using the methodology selected in 6. above.

_X_ For transfers of the right to an income stream, the agency will base the penalty period on the combined actuarial value of all payments transferred.

9. **Imposition of a penalty would work an undue hardship** --

The agency does not impose a penalty for transferring assets for less than fair market value in any case in which the agency determines that such imposition would work an undue hardship. The agency will use the following criteria in making undue hardship determinations:

Application of a transfer of assets penalty would deprive the individual:

(a) Of medical care such that the individual's health or life would be endangered; or

(b) Of food, clothing, shelter, or other necessities of life.

10. **Procedures for Undue Hardship Waivers**

The agency has established a process under which hardship waivers may be requested that provides for:

(a) Notice to a recipient subject to a penalty
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

TRANSFER OF ASSETS

that an undue hardship exception exists;

(b) A timely process for determining whether an undue hardship waiver will be granted; and

(c) A process, which is described in the notice, under which an adverse determination can be appealed.

These procedures shall permit the facility in which the institutionalized individual is residing to file an undue hardship waiver application on behalf of the individual with consent of the individual or the individual's personal representative.

11. Bed Hold Waivers For Hardship Applicants

The agency provides that while an application for an undue hardship waiver is pending in the case of an individual who is a resident of a nursing facility:

[___] Payments to the nursing facility to hold the bed for the individual will be made for a period not to exceed [____] days (may not be greater than 30).
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

TRANSFER OF ASSETS

TN #06-71

Supersedes TN NEW

Approval Date December 12, 2006

Effective Date August 1, 2006
New York

STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

The agency does not apply the trust provisions in any case in which the agency determines that such applications would work as undue hardship.

The following criteria will be used to determine whether the agency will not count assets transferred because doing so would work an undue hardships.

The same criteria will be used as applies to transfer of assets.

Under the agency’s undue hardship provisions, the agency exempts the funds in an irrevocable burial trust.

The maximum value of the exemption for an irrevocable burial trust is $______*______.

*There is no maximum value.
COST EFFECTIVENESS METHODOLOGY FOR COBRA CONTINUATION BENEFICIARIES

Premium payments are made by the agency only if such payments are likely to be cost-effective. The agency specifies the guideline used in determining cost-effectiveness by selecting one of the following methods:

___ The methodology as described in SMM section 3598.

_X_ Another cost-effective methodology as described below. *

*See Supplement 11 to Attachment 2.6(A), pages 2 and 3
COST EFFECTIVENESS DETERMINATION FOR PREMIUM PAYMENTS UNDER THE COBRA CONTINUATION COVERAGE PROGRAM

The determination of cost benefit for any health insurance policy is an evaluation of many varied but interrelated criteria. It is difficult to establish exact guidelines for cost benefit determinations that can be applied uniformly in all cases. Unless a person is already in poor health, whenever insurance is purchased a risk is taken as to whether or not health expenses will be incurred. Therefore, cost benefit determinations must be made on an individual basis after the local district staff obtain insurance policy and the individual applying for the premium payment.

Please note that for some cases, even after reviewing these criteria, the determination to pay for a health insurance policy may still be unclear. In these cases, the final decision will rest solely on the judgment of local district staff.

The following points should be considered in making a determination whether or not to pay insurance premiums within the framework of the COBRA Continuation Coverage Program.

1. Assess the types of medical services covered by the health insurance policies.

2. Has there been a high utilization of medical services by the applicant/recipient (A/R)?

   Request the applicant/recipient to bring to the interview all medical bills (paid and unpaid), statements of insurance benefit payments and premium notices for the past year. Determine the total amount paid by all parties for the medical services.

3. Can the past utilization of medical expenses be expected to continue or increase?

   During the interview inquire if any acute or chronic medical conditions exist. If so, does the condition require or could it potentially require extensive medical services? Will these potential expenses be covered by the policy?

4. Does a situation exist which warrants maintaining the policy even though there is no history of high medical utilization?
**New York**

Due to the client’s age or a pre-existing condition, is it reasonable to assume that the client may not be able to obtain another policy in the future or that a pre-existing condition would not be covered by a new policy for a period where medical utilization may be expected.

5. For policies in force, what are the maximum benefit levels of the policy?

   a) Have the maximum benefit levels been met, rendering the A/R?

   b) If so, is the maximum benefit recurring? Will it be reinstated on an annual basis, at the end of a specific benefit period, or does it apply separately to unrelated injuries, sicknesses, and/or conditions?

   c) If there will be benefits or recurring benefits that will pertain to the A/R’s potential medical expenses, how do these benefits compare to the cost of the premium?

6. Review the number of dependents in a family. In general, the larger the family, the more cost beneficial it is to purchase family coverage.

7. Compare the cost of the COBRA premium to the cost of all medical services received by the applicant/recipient in the previous year (see #2). Using this comparison and the other factors related to anticipated future utilization (3 through 6) decide whether or not it is cost beneficial to pay the premium. That is, does the cost of the COBRA premium payment appear likely to be less than the Medicaid expenditures for an equivalent set of services.

**NOTE:** For those districts that use the “Health Insurance Automated Decision Tree” (HIADT), make sure that the premium payment used in the calculation is the total premium. Under COBRA continuation coverage, the individual (or Medicaid) is generally responsible for both the employer’s and employee’s share of the insurance premium not to exceed 102% of the applicable premium (or 150% of the premium for disabled individuals beginning in the nineteenth month of coverage). In addition, only use the Medicaid payments for the equivalent set of services that would otherwise be paid for by the insurance policy.

ELIGIBILITY UNDER SECTION 1931 OF THE ACT

The State covers low-income families and children under section 1931 of the Act.

The following groups were included in the AFDC State plan effective July 16, 1996:

- X  Pregnant woman with no other eligible children.

- X  AFDC children age 18 who are full-time students in a secondary school or in the equivalent level of vocational or technical training.

--- In determining eligibility for Medicaid, the agency uses the AFDC standards and methodologies in effect as of July 16, 1996 without modification.

- X  In determining eligibility for Medicaid, the agency uses the AFDC standards and methodologies in effect as of July 16, 1996, with the following modifications.

--- The agency applies lower income standards which are no lower than the AFDC standards in effect on May 1, 1988, as follows:

--- The agency applies higher income standards than those in effect as of July 16, 1996, increased by no more than the percentage increases in the CPI-U since July 16, 1996, as follows:

The income standard by household size is based on 130% of the Suffolk County Standard of Need in 1996, adjusted each year effective January 1st by the annual increase in the October CPI-U. (see Page 4a)

[[ ] The agency applies higher resource standards than those in effect as of July 16, 1996, increased by no more than the percentage increases in the CPI-U since July 16, 1996, as follows:

[X] The agency uses less restrictive income and/or resource methodologies than those in effect as of July 16, 1996, as follows:

1. Individual development accounts*

2. Household gross income is first compared to 185% of the 1931 income level for the appropriate household size. If gross income is equal to or below this level and the combined earned and unearned gross income does not exceed 100% of the federal poverty level (FPL) for a household of the appropriate size, a percentage (as defined below) of earned income is disregarded. This percentage disregard is calculated as follows: from 100% FPL amount for a household of three, subtract $90 work disregard and the 1931 income level for a household of three. The amount remaining is divided by the difference between 100% FPL for a household of three and $90. This result, rounded up, is the percent of earned income to be disregarded. This percentage is adjusted June 1st yearly, based on the Federal Poverty Level amounts published for that year in the Federal Register. However, if it is more advantageous, $30 and 1/3 of the remaining income is disregarded if the employed person was on PA one of the four proceeding months instead of disregarding income based on the percentage above. At the conclusion of the four months, only the $30 portion of the $30 and 1/3 disregard is applied for an additional eight months.

3. All wages paid by the Census Bureau for temporary employment related to Census activities are excluded.

4. All resources are to be disregarded.

*Individual development accounts (IDA) are excluded from resources; interest earned on IDA accounts is excluded from income.]
[The income and/or resources methodologies in effect as of July 16, 1996 that the less restrictive methodologies replace are as follows:

1. Individual development accounts (IDA) are an available resource; interest from IDA is income.

2. The income standard is equal to the PA Standard of need, which is based on household size and county of residence, and consists of the Public Assistance (PA) basic allowance, home energy allowance, supplemental home energy allowance, shelter allowance, and fuel for heating allowance. The $30 and 1/3 of remaining income is disregarded if the employed person was on PA one of the four preceding months. At the conclusion of the four months, only the $30 portion of the $30 and 1/3 disregard is applied for an additional eight months.

3. $1500 equity value of an automobile is excluded from the total value; the remaining value is counted as an available resource.

4. Census Bureau wages are counted as earned income.

5. Countable resources cannot exceed $1000.

--- The agency terminates medical assistance (except for certain pregnant women and children) for individuals who fail to meet TANF work requirements.

--- The agency continues to apply the following waivers of provisions of Part A of title IV in effect as of July 16, 1996, or submitted prior to August 22, 1996 and approved by the Secretary on or before July 1, 1997.]
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

ELIGIBILITY UNDER SECTION 1925 OF THE ACT
TRANSITIONAL MEDICAL ASSISTANCE

The State covers low-income families and children for Transitional Medical Assistance (TMA) under section 1925 of the Social Security Act (the Act). This coverage is provided for families who no longer qualify under section 1931 of the Act due to increased earned income, or working hours, from the caretaker relative’s employment, or due to the loss of a time-limited earned income disregard while there is a dependent child in the household. ([42 CFR 435.112,] 1902(a)(52), 1902(e)(1)(B), and 1925 of the Act)

The amount, duration, and scope of services for this coverage are specified in Section 3.5 of this State plan.

For Medicaid eligibility to be extended through TMA, families must have been Medicaid eligible under section 1931 (months of retroactive eligibility may be used to meet this requirement):

_X_ During at least 3 of the 6 months immediately preceding the month in which the family became ineligible under section 1931.

_X_ For fewer than 3 of the 6 previous months immediately preceding the month in which the family became ineligible under section 1931. Specify:

For at least 1 of the 6 previous months immediately preceding the month in which the family became ineligible under section 1931.

The State extends Medicaid eligibility under TMA for an initial period of:

___ 6 months. For TMA eligibility to continue into a second 6-month extension period, the family must meet the reporting, technical, and income eligibility requirements specified at section 1925(b) of the Act.

_X_ 12 months. Section 1925(b) does not apply for a second 6-month extension period.

The State collects and reports participation information to the Department of Health and Human Services as required by section 1925(g) of the Act, in accordance with the format, timing, and frequency specified by the Secretary and makes such information publicly available.

| g. [X]     | The State provides assurance that for an individual whom it enrolls in Medicaid under the CHIPRA section 214 option, it has verified, at the time of the individual’s initial eligibility determination and at the time of the eligibility redetermination, that the individual continues to be lawfully residing in the United States. The State must first attempt to verify this status using information provided at the time of initial application. If the State cannot do so from the information readily available, it must require the individual to provide documentation or further evidence to verify satisfactory immigration status in the same manner as it would for anyone else claiming satisfactory immigration status under section 1137(d) of the Act.]
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

ASSET VERIFICATION SYSTEM

1940(a) of the Act

1. The agency will provide for the verification of assets for purposes of determining or redetermining Medicaid eligibility for aged, blind and disabled Medicaid applicants and recipients using an Asset Verification System (AVS) that meets the following minimum requirements:

A. The request and response system must be electronic:

(1) Verification inquiries must be sent electronically via the internet or similar means from the agency to the financial institution (FI).

(2) The system cannot be based on mailing paper based requests.

(3) The system must have the capability to accept responses electronically.

B. The system must be secure, based on a recognized industry standard of security (e.g., as defined by the U.S. Commerce Department’s National Institute of Standards and Technology, or NIST).

C. The system must establish and maintain a database of FIs that participate in the agency’s AVS.

D. Verification requests also must be sent to FIs other than those identified by applicants and recipients, based on some logic such as geographic proximity to the applicant’s home address, or other reasonable factors whenever the agency determines that such requests are needed to determine or redetermine the individual’s eligibility.

E. The verification requests must include a request for information on both open and closed accounts, going back up to 5 years as determined by the State.

TN #09-40 Approval Date May 27, 2009
Supersedes TN NEW Effective Date September 30, 2009
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

ASSET VERIFICATION SYSTEM

2. System Development

___ A. The agency itself will develop an AVS.

In 3 below, provide any additional information the agency wants to include.

___ B. The agency will hire a contractor to develop an AVS.

In 3 below provide any additional information the agency wants to include.

___ C. The agency will be joining a consortium to develop an AVS.

In 3 below, identify the States participating in the consortium. Also, provide any other information the agency wants to include pertaining to how the consortium will implement the AVS requirements.

___ D. The agency already has a system in place that meets the requirements for an acceptable AVS.

In 3 below, describe how the existing system meets the requirements in Section 1.

___ E. Other alternative not included in A. – D. above.

In 3 below, describe this alternative approach and how it will meet the requirements in Section 1.
ASSET VERIFICATION SYSTEM

3. Provide the AVS implementation information requested for the implementation approach checked in Section 2, and any other information the agency may want to include.

[New York State’s Financial Institution Recipient Match (FIRM) is a State developed financial institution computer match that provides Local Departments of Social Services (LDSS) with resource information for use in assessing Medicaid and Temporary Assistance eligibility of applicant/recipients (A/Rs). FIRM is part of the resource file integration (RFI) system. The RFI system compares A/Rs against individuals on the resource files of various State and Federal agencies and financial institutions in order to verify the information provided by A/Rs on the Medicaid application and renewal forms and to provide additional information to the Medicaid eligibility worker.

When an applicant/recipient is being reviewed for eligibility or having their eligibility redetermined, they are subject to the RFI process. As part of this process, FIRM is accomplished by electronically matching the demographic information of the A/Rs to the financial institution database maintained by the Office of Temporary and Disability Assistance (OTDA). The A/R is matched against all financial institutions on the database. If multiple matches are made, all information will be provided electronically to the eligibility worker at the LDSS office to review.

OTDA maintains a database of financial information from approximately 800 financial institutions. These financial institutions are comprised of New York State only financial institutions as well as national and international financial institutions. Financial institutions submit their account information through a secure file transmission to OTDA. Some institutions update their information weekly while some update the information quarterly. The information collected reflects current and closed accounts as well as demographic changes to the account since the last submission by the financial institution.]

New York State executed a contract with Public Consulting Group on August 15, 2014 for an automated asset and real property verification service. PCG and the Department defined portal requirements and began testing at the end of July 2015. The program will be phased in starting with three upstate counties in March 2016. The remaining upstate counties will begin in June 2016. The AVS portal will be used for both applications and renewals as part of the eligibility (re)determination.

Due to unique data requirements, NYC will begin using AVS in June 2016 for nursing home applications and conversion cases (community Medicaid cases that transition to nursing home coverage). NYC will expand to community applications and renewals in the last quarter of 2016.

A nightly batch file of Medicaid applicants/recipients (aged, blind and disabled) is pulled from our eligibility system (Welfare Management System) and sent to PCG to access AVS information. A manual web service allows a Medicaid eligibility worker to access AVS information for a non-applying spouse. New forms were created to obtain authorization to use AVS from a non-applying spouse. Information from AVS is returned on a web-based, secure portal.

The Department has established rules to set flags for potential transfer of assets.

Numerous user roles were created in order for Medicaid eligibility workers to manage tasks related to AVS responses.

State Plan under Title XIX of the Social Security Act

METHODOLOGY FOR IDENTIFICATION OF APPLICABLE FMAP RATES

The State will determine the appropriate FMAP rate for expenditures for individuals enrolled in the adult group described in 42 CFR 435.119 and receiving benefits in accordance with 42 CFR Part 440 Subpart C. The adult group FMAP methodology consists of two parts: an individual-based determination related to enrolled individuals, and as applicable, appropriate population-based adjustments.

Part 1 – Adult Group Individual Income-Based Determinations

For individuals eligible in the adult group, the State will make an individual income-based determination for purposes of the adult group FMAP methodology by comparing individual income to the relevant converted income eligibility standards in effect on December 1, 2009, and included in the MAGI Conversion Plan (Part 2) approved by CMS on January 28, 2014. In general, and subject to any adjustments described in this SPA, under the adult group FMAP methodology, the expenditures of individuals with incomes below the relevant converted income standards for the applicable subgroup are considered as those for which the newly eligible FMAP is not available. The relevant MAGI-converted standards for each population group in the new adult group are described in Table 1.

Supersedes TN **NEW** Effective Date **January 1, 2014**
Part 2 - Population-based Adjustments to the Newly Eligible Population
Based on Resource Test, Enrollment Cap or Special Circumstances

A. Optional Resource Criteria Proxy Adjustment (42 CFR 433.206(d))

1. New York applies a resource proxy adjustment to a population group(s) that was subject to a resource test that was applicable on December 1, 2009.

   ✔ New York does NOT apply a resource proxy adjustment (Skip items 2 through 3 and go to Section B).

Table 1 indicates the group or groups for which New York applies a resource proxy adjustment to the expenditures applicable for individuals eligible and enrolled under 42 CFR 435.119. A resource proxy adjustment is only permitted for a population group(s) that was subject to a resource test that was applicable on December 1, 2009.

The effective date(s) for application of the resource proxy adjustment is specified and described in Attachment B.

2. Data source used for resource proxy adjustments:

   New York:

   ___ Applies existing state data from periods before January 1, 2014.

   ___ Applies data obtained through a post-eligibility statistically valid sample of individuals.

Data used in resource proxy adjustments is described in Attachment B.

3. Resource Proxy Methodology:

   Attachment B describes the sampling approach or other methodology used for calculating the adjustment.

TN #13-14
Supersedes TN NEW
Approval Date July 2, 2014
Effective Date January 1, 2014
B. Enrollment Cap Adjustment (42 CFR 433.206(e))

1. ___ An enrollment cap adjustment is applied (complete items 2 through 4).
   ✓ An enrollment cap adjustment is not applied (skip items 2 through 4 and go to Section C).

2. Attachment C describes any enrollment caps authorized in section 1115 demonstrations as of December 1, 2009 that are applicable to populations that New York covers in the eligibility group described at 42 CFR 435.119 and received full benefits, benchmark benefits, or benchmark equivalent benefits as determined by CMS. The enrollment cap or caps are as specified in the applicable section 1115 demonstration special terms and conditions as confirmed by CMS, or in alternative authorized cap or caps as confirmed by CMS. Attach CMS correspondence confirming the applicable enrollment cap(s).

3. New York applies a combined enrollment cap adjustment for purposes of claiming FMAP in the adult group:
   ___ Yes. The combined enrollment cap adjustment is described in Attachment C.
   ✓ No.

4. Enrollment Cap Methodology:

   Attachment C describes the methodology for calculating the enrollment cap adjustment, including the use of combined enrollment caps, if applicable.

C. Special Circumstances (42 CFR 433.206(g)) and Other Adjustments to the Adult Group FMAP Methodology

1. ___ New York applies special circumstances adjustment(s).
   ✓ New York does not apply a special circumstances adjustment.

2. ___ New York applies additional adjustment(s) to the adult group FMAP methodology (complete item 3).
   ✓ New York does not apply any additional adjustment(s) to the adult group FMAP methodology (skip item 3 and go to Part 3).

3. Attachment D describes the special circumstances and other proxy adjustment(s) that are applied, including the population groups to which the adjustments apply and the methodology for calculating the adjustments.
New York

Part 3 – One-Time Transitions of Previously Covered Populations into the New Adult Group

A. Transitioning Previous Section 1115 and State Plan Populations to the New Adult Group

✓ Individuals previously eligible for Medicaid coverage through a section 1115 demonstration program or a mandatory or optional state plan eligibility category will be transitioned to the new adult group described in 42 CFR 435.119 in accordance with a CMS-approved transition plan and/or a section 1902(e)(14)(A) waiver. For purposes of claiming federal funding at the appropriate FMAP for the populations transitioned to new adult group, the adult group FMAP methodology is applied pursuant to and as described in Attachment E, and where applicable, is subject to any special circumstances or other adjustments described in Attachment D.

Individuals previously eligible for Medicaid coverage through the state’s 1115 demonstration program, specifically the Temporary Assistance for Needy Families (TANF) recipients, enrolled in the state’s section 1115 Demonstration Population 11, will be transitioned to the new adult group described in 42 CFR 435.119 in accordance with a section 1902(e)(14)(A) waiver. For purposes of claiming federal funding at the appropriate FMAP for the populations transitioned to new adult group, the adult group FMAP methodology is applied pursuant to and as described in Attachment E.

___ New York does not have any relevant populations requiring such transitions.

Part 4 – Applicability of Special FMAP Rates

A. Expansion State Designation

New York:

___ Does NOT meet the definition of expansion state in 42 CFR 433.204(b). (Skip section B and go to Part 4).

✓ Meets the definition of expansion state as defined in 42 CFR 433.204(b), determined in accordance with the CMS letter confirming expansion state status, dated June 18, 2013.

B. Qualification for Temporary 2.2 Percentage Point Increase in FMAP

New York:

✓ Does NOT qualify for temporary 2.2 percentage point increase in FMAP under 42 CFR 433.10(c)(7).

___ Qualifies for temporary 2.2 percentage point increase in FMAP under 42 CFR 433.10(c)(7), determined in accordance with the CMS letter confirming eligibility for the temporary FMAP increase, dated ______________ (insert date). New York will not claim any federal funding for individuals determined eligible under 42 CFR 435.119 at the FMAP rate described in 42 CFR 433.10(c)(6).
Part 5 – State Attestations

The State attests to the following:

A. The application of the adult group FMAP methodology will not affect the timing or approval of any individual’s eligibility for Medicaid.

B. The application of the adult group FMAP methodology will not be biased in such a manner as to inappropriately establish the numbers of, or medical assistance expenditures for, individuals determined to be newly or not newly eligible.

ATTACHMENTS

Not all of the attachments indicated below will apply to all states; some attachments may describe methodologies for multiple population groups within the new adult group. Indicate those of the following attachments which are included with this SPA:

Attachment D
Special Circumstances Adjustment and Other Adjustments to the Adult Group FMAP Methodology

Individuals in the new adult population, determined eligible under the Modified Adjusted Gross Income (MAGI) methodology, will receive continued benefits during any period within a twelve month eligibility period when these individuals would have been found ineligible if subject to redetermination. To reflect that only the regular matching rate is available for these demonstration expenditures, pursuant to the State’s Special Terms and Conditions of the 1115 Waiver, the State will make a downward adjustment of 2.6 percent in claimed expenditures for federal matching at the enhanced federal matching rate, and will instead claim those expenditures at the regular matching rate.

Re: Request for authority under section 1902(e)(14)(A) to waive certain requirements

Dear Mr. Fishman:

In response to CMS’ guidance regarding targeted enrollment strategies that are available to states to help support a streamlined enrollment process in implementing the Affordable Care Act (ACA), and to establish income and eligibility determination systems that protect beneficiaries, New York requests a waiver under section 1902(e)(14)(A) of the Social Security Act in three areas: 1) compliance with grandfathering protections, 2) delayed application of full MAGI-based methods to current beneficiaries and 3) transition of 1115 demonstration beneficiaries into the adult group.

Waiver of Compliance with Grandfathering Protections

New York seeks to waive full compliance with the grandfathering protections afforded under section 435.603 (a)(3) of the regulations. With respect to Medicaid individuals eligible as of December 31, 2013 who are renewed based on 2013 standards and methodologies prior to April 1, 2014, the State is requesting waiver authority to not apply an income test using MAGI-based methodologies until the next renewal in 2015. If on or after April 1, 2014, there is a reported change in income or a family member is added to or removed from a case, methodologies and standards that approximate the MAGI-based rules (MAGI-like) would apply to the re-determination of eligibility. This will enable the State to operate only one set of rules on the legacy system for months leading up to February 2014 (months when renewals are completed for new authorization periods starting January, February and March 2014). This will ensure continuity of care and protect beneficiaries.

The State seeks the same waiver authority for the Children’s Health Insurance Program.

TITLE XIX STATE PLAN

AMOUNT, DURATION, AND SCOPE OF MEDICAL
AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY.

NOTE: By prior approval, when indicated below, is meant that prior approval/authorization of the local professional director and/or the local social services commissioner is required for that service.

1. Inpatient care, services and supplies in a general hospital shall, in the case of a person admitted to such a facility on a Friday or Saturday, be deemed to include only those inpatient days beginning with and following the Sunday after such date of admission, unless such care, services and supplies are furnished for an actual medical emergency or pre-operative care for surgery as provided in paragraph (d) of subdivision five of section 365a of the Social Services Law, or are furnished because of the necessity of emergency or urgent surgery for the alleviation of severe pain or the necessity for immediate diagnosis or treatment of conditions which threaten disability or death if not promptly diagnosed or treated; provided, however, inpatient days of a general hospital admission beginning on a Friday or a Saturday shall be included commencing with the day of admission in a general hospital which the commissioner or his designee has found to be rendering and which continues to render full service on a seven day a week basis which determination shall be made after taking into consideration such factors as the routine availability of operating room services, diagnostic services and consultants, laboratory services, radiological services, pharmacy services, staff patterns consistent with full services and such other factors as the commissioner or his designee deems necessary and appropriate.

Inpatient care, services and supplies in a general hospital shall not include care, services and supplies furnished to patients for certain uncomplicated procedures which may be performed on an outpatient basis in accordance with regulations of the commissioner of health, unless the person or body designated by such commissioner determines that the medical condition of the individual patient requires that the procedure be performed on an inpatient basis.

1. Limits other than medical necessity are not applicable to EPSDT recipients in accord with 1903(r)3.

2. We have received the State Plan and reviewed it and determined that we are in compliance with EPSDT requirements.

TN #91-39
Supersedes TN #85-30
Approval Date February 18, 1992
Effective Date July 1, 1991
New York
1(a)

2a. **Outpatient Hospital Services**

Outpatient Hospital Services provided by hospitals licensed pursuant to Article 31 of the Mental Hygiene Law and Article 28 of the Public Health Law are in accordance with 42 CFR § 440.20(a) title Outpatient Hospital Services. Such services include Clinic Treatment Services, Partial Hospitalization, Continuing Day Treatment, and Day Treatment Services for Children, as set forth in item 9a of the Supplement to Attachment 3.1-A of the Plan.
2a. **Outpatient Hospital Services (continued)**

Outpatient Hospital Services provided by hospitals licensed pursuant to Article 28 of the Public Health Law are in accordance with 42 CFR § 440.20(a) title Outpatient Hospital Services. Effective January 1, 2015, such services include Collaborative Care Services as set forth in item 9 of the Supplement to Attachment 3.1-A of the Plan.
4a. Prior approval is required for all out-of-state placements at Specialized Care Facilities for difficult to place individuals or High level Care facilities for the head injured.

Medicaid payments shall not be authorized for nursing facilities which are not certified or have not applied for certification to participate in Medicare.

Care days in nursing facilities is reimbursed for Medicaid patients requiring and receiving medically necessary lower level of care services. Medical Assistance is provided until such time as the appropriate level of care becomes available.

4d.i. Face-to-Face Counseling Services
4d.ii. Face-to-Face Tobacco Cessation Counseling Services for Pregnant Women

Effective October 1, 2013, Medicaid coverage of comprehensive counseling and pharmacotherapy for cessation of tobacco use by all Medicaid eligible recipients, including pregnant women, will be provided. Such services will be provided face-to-face, by or under the supervision of a physician and no cost sharing (co-pays) will apply. In accordance with section 4107 of the Patient Protection and Affordable Care Act, current coverage of smoking cessation services for all Medicaid recipients, including pregnant women, will be modified to include a maximum of two quit attempts per 12 months, which will include a maximum of four face-to-face counseling sessions per quit attempt.

5. Prior approval is required for certain procedures which may be considered cosmetic or experimental. Physicians are informed of the specific prior approval requirements in the MMIS Physician Provider Manual.

5a. Lactation consultant services: effective September 1, 2012, reimbursement will be provided to physicians for breastfeeding health education and counseling services. Physicians must be currently registered and licensed by the State in accordance with 42 CFR 440.60(a) and also International Board Certified Lactation Consultants (IBCLC). Date of implementation will occur on the first day of the month following 30 days after Federal approval of this provision of the State Plan.

Collaborative Care Services: Effective January 1, 2015, Physician services shall include Collaborative Care Services as set forth in item 9 of the Supplement to Attachment 3.1-A of the Plan. Physician Services are in accordance with 42 CFR §440.50 and requirements for claim submission comply with the State Medicaid Manual, §4281 titled Restriction on Payments for Physician Services.

6. Care and services will be provided only if they are in accordance with regulations of the Department of Health.

TN #14-0027 Approval Date November 28, 2017
Supersedes TN #13-0010 Effective Date January 1, 2015
4b. Early and periodic screening, diagnostic and treatment services (EPSDT).

School Supportive Health Services and Pre-School Supportive Health Services

School Supportive Health Services (SSHS) and Pre-School Supportive Health Services (PSSHS) are services provided by or through a school district, a Section 4201 school, a county in the State, or New York City to children with disabilities, who attend public or State Education Department approved schools or preschools. The services must be:

- medically necessary and included in a Medicaid covered category in accordance with 1905(a), 1905(r)(5), 1903(c) of the Social Security Act;
- ordered or prescribed by a physician or other licensed practitioner acting within his or her scope of practice under New York State Law;
- included in the child’s Individualized Education Program (IEP);
- provided by qualified professionals under contract with or employed by a school district, a Section 4201 school, or a county in the State or the City of New York;
- furnished in accordance with all requirements of the State Medicaid Program and other pertinent state and federal laws and regulations, including those for provider qualifications, comparability of services, and the amount, duration and scope provisions; and
- included in the state’s plan or available under Early Periodic Screening, Diagnostic and Treatment (EPSDT) services.

Effective September 1, 2009, the services covered by the SSHS and PSSHS Program for Medicaid eligible children under the age of 21 who are eligible for Early and Periodic Screening, Diagnostic and Treatment services (EPSDT) include medically necessary physical therapy services, occupational therapy services, speech therapy services, psychological counseling, skilled nursing services, psychological evaluations, medical evaluations, medical specialist evaluations, audiological evaluations, and special transportation within the limits of EPSDT services. A school district, Section 4201 school, a county in the State, and New York City must be enrolled as a Medicaid provider in order to bill Medicaid.

1. Physical Therapy Services

Definition: Physical therapy services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42 CFR 440.110(a).
Services: Physical therapy services provided by or through: a school district[; a Section 4201 school]; a county in the State or the City of New York, must have a written order or prescription from a physician, physician assistant, or nurse practitioner who is acting within the scope of his or her practice under NYS law and must be provided to a child by or under the direction of a qualified physical therapist. Physical therapy services must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE). These services include any necessary supplies and equipment utilized during the therapy session.

Medically necessary EPSDT services are health care, diagnostic services, treatments and other measures necessary to correct or ameliorate physical defects, mental illnesses, and other disabilities.

Physical therapy services include but are not limited to:

- Identification of children with physical therapy needs;
- Evaluation for the purpose of determining the nature, extent and degree of the need for physical therapy services;
- Provision of physical therapy services for the purpose of preventing or alleviating movement dysfunction and related functional problems;
- Obtaining, interpreting, and integrating information appropriate to program planning;
- Diagnosis and treatment of physical disability, injury or disease using physical and mechanical means, including but not limited to, heat, cold, light, air, water, sound, electricity, massage, mobilization and therapeutic exercise with or without assistive devices, and
- The performance and interpretation of tests and measurements to assist pathopsychological, pathomechanical and developmental deficits of human systems to determine treatment and assist in diagnosis and prognosis.

Physical therapy services may be provided in an individual or group setting.

Providers: Services must be provided by:

- a New York State licensed and registered physical therapist qualified in accordance with 42 CFR 440.110(a) and with applicable state and federal laws and regulations, acting within his or her scope of practice under New York State Law; or
- a certified physical therapy assistant “under the direction of” such a qualified licensed and registered physical therapist, acting within his or her scope of practice under New York State Law.
“Under the direction of” means that, with respect to each Medicaid beneficiary, the qualified therapist:

- sees the participant at the beginning of and periodically during the course of treatment;
- is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State law;
- has continued involvement in the care provided, and reviews the need for continued services throughout treatment;
- assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
- spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards of practice;
- ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment; and
- keeps documentation supporting the supervision of services and ongoing involvement in the treatment.

Services may be rendered in the setting in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Educational Services (BOCES) programs, approved preschool programs, public schools, approved private schools, Section 4201 schools, state operated schools, in private practitioner’s offices, at home and/or in community based settings.

2. **Occupational Therapy Services**

**Definition:** Occupational therapy services as outlined in this section of the State Plan are available to Medicaid eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42 CFR 440.110(b).

**Services:** Occupational therapy services provided by or through: a school district[; a Section 4201 school]; a county in the State or the City of New York must have a written order or prescription from a physician, physician assistant, or nurse practitioner who is acting within the
New York
2(xii)(D)

Scope of his or her practice under New York State Law and must be provided to a child by or under the direction of a qualified occupational therapist. Occupational therapy services must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE). These services include any necessary supplies and equipment utilized during the therapy session.

Medically necessary EPSDT services are health care, diagnostic services, treatments, and other measures necessary to correct or ameliorate physical defects, mental illnesses, and other disabilities.

Occupational therapy services include but are not limited to:

- Identification of children with occupational therapy needs;
- Evaluation for the purpose of determining the nature, extent and degree of the need for occupational therapy services;
- Improving, developing or restoring functions impaired or lost through illness, injury, or deprivation;
- Preventing through early intervention, initial or further impairment or loss of function; and
- Planning and utilization of a program of activities to develop or maintain adaptive skills designed to achieve maximal physical and mental functioning of the student in daily life tasks.

Occupational therapy services may be provided in an individual or group setting.

Providers: Services must be provided by:

- a New York State licensed and registered occupational therapist qualified in accordance with 42CFR 440.110(b) and applicable state and federal laws and regulations, acting within his or her scope of practice under New York State Law; or
- a certified occupational therapy assistant (COTA) “under the direction of” such a qualified licensed and registered occupational therapist, within his or her scope of practice under New York State Law.

“Under the direction of” means that, with respect to each Medicaid beneficiary, the qualified therapist:

- sees the participant at the beginning of and periodically during the course of treatment.
- is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State law;
- has continued involvement in the care provided, and reviews the need for continued services throughout treatment;
- assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
- spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards of practice;
- ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment and
- keeps documentation supporting the supervision of services and ongoing involvement in the treatment.

Services may be rendered in the settings in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Educational Services (BOCES) programs, approved preschool programs, public schools, approved private schools, 4201 schools, state operated schools, in private practitioner’s offices, at home and/or in community based settings.

3. Speech Therapy Services

Definition: Speech therapy services as outlined in this section of the State Plan are available to Medicaid eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42 CFR 440.110(c).

Services: Speech therapy services provided by or through: a school district[; a Section 4201 school]; a county in the State or the City of New York must have a written order or prescription from a physician, physician assistant, nurse practitioner, or a speech-language pathologist who is acting within his or her scope of practice under New York State law and must be provided to a child by or under the direction of a qualified speech-language pathologist. Speech therapy services must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE).

Medically necessary EPSDT services are health care, diagnostic services, treatments and other measures to correct or ameliorate physical defects, mental illnesses, and other disabilities.
Speech therapy services include but are not limited to:

- Identification of children with speech disorders;
- Diagnosis and appraisal of specific speech disorders;
- Referral for medical or other professional attention necessary for the habilitation of speech disorders;
- Provision of speech or language services for the habilitation or prevention of communicative disorders;
- Evaluation and application of principles, methods and procedures of measurement, prediction, diagnosis, testing, counseling, consultation, rehabilitation and instruction, related to the development of disorders of speech, voice, and/or language, and
- Preventing, ameliorating or modifying speech disorder conditions in children and/or groups of children.

Speech therapy services may be provided in an individual or group setting.

Providers: Services must be provided by:

- a licensed and registered speech-language pathologist qualified in accordance with 42CFR Section 440.110(c) and applicable state and federal laws and regulations, acting within his or her scope of practice under New York State law; or
- a teacher certified to provide speech and language services, under the documented direction of such a qualified licensed and registered speech language pathologist (ASHA-Certified or equivalent), acting within his or her scope of practice under New York State Law.

“Under the direction of” means that, with respect to each Medicaid beneficiary, the qualified therapist:

- sees the participant at the beginning of and periodically during the course of treatment;
- is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State law;
- has continued involvement in the care provided, and reviews the need for continued services throughout treatment;
- assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;

TN __#09-61_________ Approval Date __April 26, 2010____
Supersedes TN ____NEW____ Effective Date __September 1, 2009____
New York
2(xii)(G)

- spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards of practice;
- ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment; and
- keeps documentation supporting the supervision of services and ongoing involvement in the treatment.

Services may be rendered in the setting in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Educational Services (BOCES) programs, approved preschool programs, public schools, approved private schools, Section 4201 schools, state operated schools, in private practitioner’s offices, at home and/or in community based settings.

4. Psychological Counseling

**Definition:** Psychological counseling services outlined in this section of the State Plan are available to Medicaid-eligible beneficiaries under 21 years of age who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42 CFR Section 440.60(a) and 440.50(a)(2).

**Services:** Psychological counseling provided by or through a school district; a Section 4201 school; a county in the State or the City of New York must have a referral from a physician, physician assistant, or a nurse practitioner who is acting within the scope of his or her practice under NYS law or an appropriate school official or other voluntary health or social agency and must be provided to a child by or under the direction of a qualified practitioner. Psychological counseling services must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE).

Medically necessary EPSDT services are health care, diagnostic services, treatments and other measures to correct or ameliorate physical defects, mental illnesses, and other disabilities.

Psychological counseling services include:

- treatment services using a variety of techniques to assist the child in ameliorating behavioral and emotional problems that are severe enough to require treatment.

Psychological counseling services may be provided in an individual or group setting.

TN #17-0057 Approval Date November 28, 2017
Supersedes TN #09-0061 Effective Date July 1, 2017
Providers: Psychological counseling services must be provided by a qualified practitioner, within his or her scope of practice in accordance with New York State Law and with the qualification requirements of 42 CFR Section 440.60(a) and 440.50(a)(2) and with other applicable state and federal laws or regulations. Psychological counseling services may only be provided by a professional whose credentials are comparable to those of providers who are able to provide psychological counseling services in the community.

Services may be provided by:

- a New York State licensed and registered psychiatrist qualified in accordance with 42 CFR Section 440.50(a) and other applicable state and federal law or regulations, acting within his or her scope of practice under New York State Law;
- a New York State licensed and registered psychologist qualified in accordance with 42 CFR Section 440.60(a) and other applicable state and federal law or regulations, acting within his or her scope of practice under New York State Law;
- a New York State licensed clinical social worker (LCSW), qualified in accordance 42 CFR Section 440.60(a) and other applicable state and federal law or regulations, acting within his or her scope of practice under NYS law; or
- a licensed master social worker (LMSW) qualified in accordance with 42 CFR Section 440.60(a) and other applicable state and federal law or regulations, acting within his or her scope of practice under New York State Law, under the supervision of such a qualified licensed clinical social worker, a qualified licensed and registered psychologist, or a qualified licensed and registered psychiatrist as described above.

Supervision of the clinical social work services provided by the licensed master social worker, with respect to each Medicaid beneficiary, shall consist of contact between the licensed master social worker and supervisor during which:

- the licensed master social worker apprises the supervisor of the diagnosis and treatment of each client;
- the licensed master social worker's cases are discussed;
- the supervisor provides the licensed master social worker with oversight and guidance in diagnosing and treating clients;
- the supervisor regularly reviews and evaluates the professional work of the licensed master social worker; and
- the supervisor provides at least one hour per week or two hours every other week of in-person individual or group clinical supervision, provided that at least two hours per month shall be individual clinical supervision.
Services may be rendered in the setting in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Educational Services (BOCES) programs, approved preschool programs, public schools, approved private schools, Section 4201 schools, state operated schools, in private practitioner’s offices, at home and/or in community based settings.

5. Skilled Nursing

**Definition:** Skilled nursing services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42 CFR 440.60(a).

**Services:** Skilled nursing services provided by or through: a school district[; a Section 4201 school]; a county in the State or the City of New York, must have a written order or prescription from a physician, physician assistant, or nurse practitioner acting within his or her scope of practice under New York State law and must be provided to a child by a registered nurse acting within his or her scope of practice under New York State law, or by a NYS licensed practical nurse acting within his or her scope of practice under New York State law “under the direction of” a NYS licensed and registered nurse or licensed physician, dentist or other licensed health care provider authorized under the Nurse Practice Act. Skilled nursing services must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE) when there is a specific need based on a medical condition of the child.

Medically necessary EPSDT services are health care, diagnostic services, treatments and other measures necessary to correct and ameliorate physical defects, mental illnesses, and other disabilities.

Skilled nursing services include the promotion of health, prevention of illness, care of the ill and disabled people through the provision of services essential to the maintenance and restoration of health. Skilled nursing services may include:

- health assessments and evaluations;
- medical treatments and procedures;
- administering and/or monitoring medication needed by the student during school hours; and
- consultation with licensed physicians, parents and staff regarding the effects of medication.

**TN #17-0057**
**Supersedes TN #09-0061**
**Approval Date November 28, 2017**
**Effective Date July 1, 2017**
New York
2(xii)(J)

Providers: Skilled nursing services must be provided by:

- a New York State licensed registered nurse qualified in accordance with the requirements at 42 CFR 440.60(a) and other applicable state and federal law and regulations, acting within his or her scope of practice; or

- a New York State licensed practical nurse qualified in accordance with 42 CFR 440.60(a) and other applicable state and federal law or regulations, acting within his or her scope of practice “under the direction of” a licensed registered nurse, a physician, dentist or other licensed health care provider authorized under the Nurse Practice Act.

“Under the direction of” means that the licensed registered nurse, physician or other licensed health care provider authorized under the Nurse Practice Act:

- sees the participant at the beginning of and periodically during the course of treatment;
- is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State law;
- has continued involvement in the care provided, and reviews the need for continued services throughout treatment;
- assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
- spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards of practice;
- ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment; and
- keeps documentation supporting the supervision of services and ongoing involvement in the treatment.

Services may be provided by:

- a New York State licensed and registered nurse; or

- a New York State licensed practical nurse, under the direction of a New York State licensed and registered nurse, or licensed physician, dentist or other licensed health care practitioner legally authorized under the Nurse Practice Act.

Services may be rendered in the setting in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Educational Services (BOCES).
programs, approved preschool programs, public schools, approved private schools, Section 4201 schools, state operated schools, in private practitioner’s offices, and/or in community based settings.

6. Psychological Evaluations

**Definition:** Psychological evaluations outlined in this section of the State Plan are available to Medicaid-eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42CFR Section 440.50(a) and 42CFR Section 440.60(a).

Psychological evaluations provided by or through a school district[; a Section 4201 school]; a county in the State or the City of New York must have a referral from a physician, physician assistant, or nurse practitioner acting within his or her scope of practice under New York State law or an appropriate school official or other voluntary health or social agency and must be provided to a child by a qualified practitioner. Psychological evaluations must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE). If a psychological evaluation is used to identify a child’s health related needs as part of the IEP process, the evaluation is eligible for Medicaid coverage once the evaluation is reflected in the child’s IEP.

**Services:** Medically necessary EPSDT services are health care, diagnostic services, treatments, and other measures to correct or ameliorate physical defects, mental illnesses, and other disabilities.

Psychological evaluations include but are not limited to:

- Administering psychological tests and other assessment procedures;
- Interpreting testing and assessment results, and
- Evaluating a Medicaid recipient for the purpose of determining the needs for specific psychological, health or related services.

**Providers:** Psychological evaluations must be provided by a qualified provider who meets the requirements of 42 CFR Section 440.60 or 42 CFR Section 440.50(a) and other applicable state and federal laws and regulations. Psychological evaluation services may only be provided by a professional whose credentials are comparable to those of providers who are able to provide psychological evaluation services in the community.
Services may be provided by:

- a New York State licensed and registered psychiatrist, qualified in accordance with 42CFR Section 440.50(a) and other applicable state and federal law or regulations, acting within his or her scope of practice under NYS law; or

- a New York State licensed and registered psychologist, qualified in accordance with 42CFR Section 440.60(a) and other applicable state and federal law or regulations, acting within his or her scope of practice under NYS law.

Services may be rendered in the setting in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Educational Services (BOCES) programs, approved preschool programs, public schools, approved private schools, Section 4201 schools, state operated schools, in private practitioner’s offices, and/or in community based settings.

7. Medical Evaluations

**Definition:** Medical evaluations outlined in this section of the State Plan are available to Medicaid-eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42CFR Section 440.50(a), 440.60(a), and 440.166(a).

**Services:** Medically necessary EPSDT services are health care, diagnostic services, treatments, and other measures to correct or ameliorate physical defects, mental illnesses, and other disabilities.

Medical evaluations provided by or through: a school district[; a Section 4201 school]; a county in the State or the City of New York must be performed by a physician, physician assistant, or nurse practitioner acting within the scope of his or her practice under New York State law. A medical evaluation must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE). If a medical evaluation is used to identify a child’s health related needs as part of the IEP process, the evaluation is eligible for Medicaid coverage once the evaluation is reflected in the child’s IEP.

A medical evaluation is the recording of:

- chief complaints;
- present illness;
past medical history;
• personal history and social history;
• a system review;
• a complete physical evaluation;
• ordering of appropriate diagnostic tests and procedures, and
• recommended plan of treatment

Providers: A medical evaluation must be provided by a New York State licensed and registered, physician, physician assistant, or nurse practitioner qualified in accordance with 42 CFR Section 440.50(a), 440.60(a) and 440.166(a) and other applicable state and federal laws and regulations, acting within his or her scope of practice under NYS law.

Services may be rendered in the setting in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Educational Services (BOCES) programs, approved preschool programs, public schools, approved private schools, Section 4201 schools, state operated schools, in private practitioner’s offices, and/or in community based settings.

8. Medical Specialist Evaluations

Definition: Medical specialist evaluations outlined in this section of the State Plan are available to Medicaid-eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42CFR Section 440.50(a), 440.60(a), and 440.166(a).

Services: Medically necessary EPSDT services are health care, diagnostic services, treatments, and other measures to correct and ameliorate physical defects, mental illnesses, and other disabilities.

Medical specialist evaluations provided by or through: a school district[; a Section 4201 school]; a county in the State or the City of New York must be provided by a New York State licensed and registered physician, physician assistant, or nurse practitioner specialist acting within his or her scope of practice and related area of specialization. A medical specialist evaluation must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE). If a medical specialist evaluation is used to identify a child’s health related needs as part of the IEP process, the evaluation is eligible for Medicaid coverage once the evaluation is reflected in the child’s IEP.

TN #17-0057 Approval Date November 28, 2017
Supersedes TN #09-0061 Effective Date July 1, 2017
A medical specialist evaluation is:

- an examination of the affected bodily area or organ system and other symptomatic or related organ systems;
- the ordering of appropriate diagnostic tests and procedures, and
- the reviewing of the results and reporting on the tests and procedures.

**Providers:** A medical specialist evaluation must be provided by a qualified New York State licensed and registered physician, physician assistant, or nurse practitioner specialist practicing in the related area of specialization within his or her scope of practice under NYS law, in accordance with 42CFR Section 440.50(a), 440.60(a), and 440.166(a) and other applicable state and federal laws and regulations.

Services may be rendered in the setting in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Educational Services (BOCES) programs, approved preschool programs, public schools, approved private schools, Section 4201 schools, state operated schools, in private practitioner's offices, and/or in community based settings.

9. **Audiological Evaluations**

**Definition:** Audiological evaluations as outlined in this section of the State Plan are available to Medicaid-eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42 CFR Section 440.60(a) and 42CFR Section 440.110(c)(3).

**Services:** Audiological evaluations provided by or through: a school district; a Section 4201 school; a county in the State or the City of New York must have a written order from a physician, physician assistant, or nurse practitioner who is acting within the scope of his or her practice under NYS law and provided to a child by a qualified practitioner. An audiological evaluation must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE). If an audiological evaluation is used to identify a child’s health related needs as part of the IEP process, the evaluation is eligible for Medicaid coverage once the evaluation is reflected in the child’s IEP.

Medically necessary EPSDT services are health care, diagnostic services, treatments, and other measures to correct and ameliorate physical defects, mental illnesses, and other disabilities.

---

**TN**  #17-0057  
**Approval Date**  November 28, 2017

**Supersedes TN** #09-0061  
**Effective Date**  July 1, 2017
Medically necessary audiology services include but are not limited to:

- Identification of children with hearing loss;
- Determination of the range, nature and degree of hearing loss, including the referral for medical or other professional attention for the amelioration of hearing; and
- Determination of the child’s need for group and individual amplification.

An audiological evaluation is the determination of the range, nature and degree of hearing loss including:

- Measurement of hearing acuity;
- Tests relating to air and bone conduction;
- Speech reception threshold;
- Speech discrimination;
- Conformity evaluations;
- Pure tone audiometry.

**Providers:** Audiology evaluation services must be provided by a New York State licensed and registered audiologist, qualified in accordance with 42 CFR Section 440.60(a) and 42 CFR Section 440.110(c)(3) and other applicable state and federal law or regulations, acting within his or her scope of practice under NYS law.

Services may be rendered in the setting in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Educational Services (BOCES) programs, approved preschool programs, public schools, approved private schools, Section 4201 schools, state operated schools, in private practitioner’s offices, and/or in community based settings.

### 10. Special Transportation

**Definition:** Special transportation outlined in this section of the State Plan is available to Medicaid-eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary.

Medically necessary EPSDT services are health care, diagnostic services, treatments, and other measures to correct and ameliorate physical defects, mental illnesses, and other disabilities.
New York
2(xii)(P)

Services: Special transportation provided by or through a school district; a Section 4201 school; a county in the State or the City of New York must be included in the IEP as recommended by the Committee on Special Education (CSE), or the Committee on Preschool Special Education (CPSE). Special transportation arrangements must be identified in the IEP.

Special transportation is provided when a child requires specialized transportation equipment, supports or services because of his/her disability as cited in 34 CFR 300.34(c)(16)(iii).

Special transportation is limited to those situations where the child receives transportation to obtain a Medicaid covered service (other than transportation), and both the Medicaid covered service and the need for special transportation are included in the child’s IEP. Special transportation can only be billed on a day that a Medicaid reimbursable service was delivered and may only be billed at the rate for each one-way trip.

Providers: Special transportation services must be provided by a qualified Medicaid provider. Attendance documentation (bus logs) is required in order to bill Medicaid. In order to receive payment for services provided to a Medicaid recipient, a vendor must be lawfully authorized to provide transportation services on the date the services are rendered.
Early Intervention Services

“Early Intervention” Services are provided to children who have a developmental delay or disability and are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary.

These services must be:

- Medically necessary and included in a Medicaid covered category in accordance with 1905(a), 1905(r)(5), 1903(c) of the Social Security Act;
- Ordered or prescribed by a physician or other licensed practitioner acting within his or her scope of practice under New York State law;
- Included in the child's Individualized Family Service Plan (IFSP);
- Provided by qualified professionals working independently or employed by or under contract with an approved early intervention agency;
- Furnished in accordance with all requirements of the State Medicaid Program and other pertinent state and federal laws and regulations, including those for provider qualifications, comparability of services, and the amount, duration and scope provisions; and
- Included in the state's plan or available under Early Periodic Screening, Diagnostic and Treatment EPSDT) services.

Services may be rendered in the setting in which the child’s IFSP will be implemented, including but not limited to Article 28 facilities, approved preschools, daycare settings, in private practitioners’ offices, and natural environments including homes or other community settings.

Collateral visits: Collateral services are services that are provided to the child/family (caregiver) or to the parent (caregiver) in accordance with the child’s IFSP. Collateral services are reimbursed as early intervention services and are provided to a family member or significant other of a Medicaid-eligible member, regardless of the family member or significant other’s eligibility for Medicaid, who has an interim or final individualized family service plan (IFSP). For purposes of this section, a significant other is a person who substitutes for the recipient’s family, interacts regularly with the recipient, and affects directly the recipient's developmental status. Collateral services must be included in the child’s and family's IFSP, and include psychological services, social work services, and special instruction services provided to infants and toddlers and/or their families/caregivers with an interim or final IFSP. Payment is available for collateral services furnished pursuant to an interim or final individualized family service plan and which are provided by a qualified professional working independently or employed by or under contract with and approved early intervention agency. Collateral services must relate to the medical treatment.
specified in the recipient's interim or final individualized family service plan and must be for the beneficiary's direct benefit. Persons who receive collateral services to support the child’s development must be identified in the interim or final individualized family service plan.

Early Intervention services, limited to EPSDT, which are provided by qualified professionals employed by or under contract to an Early Intervention agency or approved by the State pursuant to an interim or final Individualized Family Service Plan (IFSP) include:

1. **Screening Services**

   **Definition:** Screening is a process involving those instruments, procedures, family information and observations, and clinical observations used by qualified, state-approved early intervention providers to assess a child's developmental status to indicate what type of evaluation, if any, is warranted.

   **Services:** Screening services are provided in accordance with 42 CFR section 440.130(b). Screening services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.

   **Providers:** Screening services are provided by qualified licensed practitioners, within their scope of practice in accordance with New York State law. Practitioners of EPSDT EI screening services include:

   - New York State licensed and registered audiologists, qualified in accordance with 42 CFR Section 440.110(c)(3) and other applicable state and federal law or regulations, acting within his or her scope of practice under NYS law.

   - New York State licensed and registered occupational therapist qualified in accordance with 42CFR 440.110(b) and applicable state and federal laws and regulations, acting within his or her scope of practice under New York State Law; or

   - A certified occupational therapy assistant “under the direction of” such a qualified licensed and registered occupational therapist, within his or her scope of practice under New York State Law.

   - New York State licensed and registered physical therapist qualified in accordance with 42 CFR 440.110(a) and with applicable state and federal laws and regulations, acting within his or her scope of practice under New York State Law; or

   - A certified physical therapy assistant “under the direction of” such a qualified licensed and registered physical therapist, acting within his or her scope of practice under New York State Law.
New York State licensed and registered physicians, acting within his or her scope of practice under NYS law.

New York State licensed and registered psychologists, qualified in accordance with applicable state and federal laws and regulations, acting within his or her scope of practice under NYS law.

New York State licensed and registered speech-language pathologists, qualified in accordance with 42 CFR Section 440.110(c) and applicable state and federal laws and regulations, acting within his or her scope of practice under New York State law; or

A teacher certified to provide speech and language services, under the documented direction of such a qualified licensed and registered speech-language pathologist (ASHA certified or equivalent), acting within his or her scope of practice under New York State law.

A New York State licensed clinical social worker (LCSW) qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or

A licensed master social worker (LMSW) qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law, under the supervision of such a qualified licensed clinical social worker, a qualified licensed and registered psychologist, or a qualified licensed and registered psychiatrist as described above;

New York State certified teachers of special education, with master's degrees and certified by the New York State Education Department's Office of Teaching Initiatives.

2. Evaluation Services

Definition: Evaluation services are the procedures used by appropriately qualified, state-approved early intervention providers to determine a child’s initial and continuing eligibility for early intervention services.

Services: Evaluation services determine the child's level of functioning and needs in the areas of cognitive, physical, communication, social or emotional, and adaptive development and include a health assessment including a physical examination, routine vision and hearing screening, and where appropriate, a neurological assessment. When indicated, evaluation services include diagnostic procedures and review of medical and other records to identify a diagnosed physical or mental condition with a high probability of resulting in developmental delay.
Evaluation services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.

**Providers:** Providers of EPSDT EI evaluation services include:

New York State licensed and registered audiologists, qualified in accordance with 42 CFR Section 440.110(c)(3) and other applicable state and federal law or regulations, acting within his or her scope of practice under NYS law.

New York State licensed and registered occupational therapists qualified in accordance with 42 CFR 440.110(b) and applicable state and federal laws and regulations, acting within his or her scope of practice under New York State Law; or

A certified occupational therapy assistant “under the direction of” such a qualified licensed and registered occupational therapist, within his or her scope of practice under New York State Law.

New York State licensed and registered physical therapist qualified in accordance with 42 CFR 440.110(a) and with applicable state and federal laws and regulations, acting within his or her scope of practice under New York State Law; or

A certified physical therapy assistant “under the direction of” such a qualified licensed and registered physical therapist, acting within his or her scope of practice under New York State Law.

New York State licensed and registered physicians, acting within his or her scope of practice under NYS law.

New York State licensed and registered nurses qualified in accordance with applicable state and federal law and regulations, acting within his or her scope of practice.

New York State licensed and registered psychologists, qualified in accordance with applicable state and federal laws and regulations, acting within his or her scope of practice under NYS law.

New York State licensed and registered speech-language pathologists, qualified in accordance with 42 CFR Section 440.110(c) and applicable state and federal laws and regulations, acting within his or her scope of practice under New York State law; or

A teacher certified to provide speech and language services, under the documented direction of such a qualified licensed and registered speech-language pathologist (ASHA certified or equivalent), acting within his or her scope of practice under New York State law.
A New York State licensed clinical social worker (LCSW) qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or

A licensed master social worker (LMSW) qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law, under the supervision of such a qualified licensed clinical social worker, a qualified licensed and registered psychologist, or a qualified licensed and registered psychiatrist as described above;

Licensed Mental Health Practitioners (Mental Health Counselors, Marriage and Family Therapists, Creative Arts Therapists, and Psychoanalysts,) acting within their scope of practice under New York State law.

New York State certified teachers of special education, with master's degrees and certified by the New York State Education Department’s Office of Teaching Initiatives.

Teacher of Students with Disabilities (birth through grade 2) certified by the New York State Education Department's Office of Teaching Initiatives in the subject area of Early Childhood Education, for birth through grade 2, for students with disabilities.

Teachers of the Blind and Visually Impaired (Partially Sighted) certified by the New York State Education Department's Office of Teaching Initiatives in the subject area Blind and Visually Impaired, for pre-Kindergarten through Grade 12 (all grade levels).

Teachers of the Deaf and Hard of Hearing (Hearing Impaired) certified by the New York State Education Department's Office of Teaching Initiatives in the subject area Deaf and Hard of Hearing, for pre-Kindergarten through Grade 12 (all grade levels).

New York State registered certified dieticians/nutritionists who meet the education and experience requirements set forth by the New York State Education Department under applicable NYS law and regulations.
3. **Audiology Services**

**Definition:** Audiology services as outlined in this section of the State Plan are available to Medicaid-eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary.

**Services:** Audiology services are provided in accordance with 42 CFR section 440.110 (c). Audiology services include services provided to an individual child and instruction provided to child’s parent or caregiver when these contacts directly benefit the needs of the child as described in his or her treatment plan, the IFSP, and pursuant to a written order or prescription from a physician, physician assistant or nurse practitioner acting within his or her scope of practice under New York State law as appropriate. Covered services include services to identify, evaluate, and treat hearing loss, including identification of children with auditory impairment using at risk criteria and appropriate audiologic screening techniques; determination of the range, nature, and degree of hearing loss and communication functions, by use of audiological evaluation procedures; referral for medical and other services necessary for the habilitation or rehabilitation of children with auditory impairment; provision of auditory training, aural rehabilitation, speech reading and listening device orientation and training, and other services; and, provision of services for prevention of hearing loss; and, determination of the child's need for individual amplification, including selecting, fitting, and dispensing appropriate listening and vibrotactile devices, and evaluating the effectiveness of those devices.

**Providers:** Audiology services must be provided by a New York State licensed and registered audiologist, qualified in accordance with 42 CFR Section 440.110(c)(3) and other applicable state and federal law or regulations, acting within his or her scope of practice under NYS law.

4. **Nursing Services**

**Definition:** Nursing services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.

**Services:** Nursing services are provided in accordance with 42 CFR section 440.70(b)(1). Nursing services include services provided to an individual child and instruction to the child’s parent or caregiver when such contacts directly benefit the needs of the child as described in his or her treatment plan, the IFSP, and pursuant to a written order or prescription from a physician acting within his or her scope of practice under New York State law.

Nursing services include the promotion of health, prevention of illness, care of the ill and disabled people through the provision of services essential to the maintenance and restoration of health. Nursing services may include:

- Health assessments and evaluations;
- Medical treatments and procedures;
- Administering and/or monitoring medication, treatments or regimens needed by the child; and
- Consultation with licensed physicians, parents and other service / health care providers regarding the effects of medication.

TN ___ #18-0039 ____________ Approval Date ________________
Supersedes TN ____ NEW ____ Effective Date ____________

June 13, 2019

July 1, 2018
Providers: Nursing services are provided by New York State licensed registered nurses qualified in accordance with applicable state and federal law and regulations, acting within his or her scope of practice; or a New York State licensed practical nurse qualified in accordance with applicable state and federal law and regulations, acting within his or her scope of practice under the direction of a licensed registered nurse, a physician, dentist or other licensed health care provider authorized under the Nurse Practice Act.

“Under the direction of” means that, with respect to each Medicaid beneficiary, the qualified clinician:

- Sees the participant at the beginning of and periodically during the course of treatment;
- Is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State law;
- Has continued involvement in the care provided, and reviews the need for continued services throughout treatment;
- Assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
- Spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards of practice;
- Ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment and
- Keeps documentation supporting the supervision of services and ongoing involvement in the treatment.

5. Nutrition Services

Definition: Nutrition services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary. Nutrition services outlined in this section of the state plan are provided in accordance with 42 CFR section 440.130(c).

Services: Nutrition services include services provided to an individual child and instruction provided to the child’s parent or caregiver when such contacts directly benefit the needs of the child as described in his or her treatment plan, the IFSP, and pursuant to a written order or prescription from a physician, physician assistant or nurse practitioner acting within his or her scope of practice under New York State law.

Covered services include individual assessments in nutritional history and dietary intake; anthropometric, biochemical, and clinical variables; feeding skills and feeding problems; and, food habits and food preferences; developing and monitoring appropriate plans to address the nutritional needs of an eligible child; and, making referrals to appropriate community resources to carry out nutrition goals.
Providers: Nutrition services are provided by qualified New York State registered certified dieticians/nutritionists acting within the scope of their profession.

6. Occupational Therapy Services

Definition: Occupational therapy services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.

Services: Occupational therapy services are provided in accordance with 42 CFR section 440.110(b). Occupational therapy services include services provided to an individual child and instruction provided to the child’s parent or caregiver, and services provided to children individually or in a group when such contacts directly benefit the needs of the child as described in his or her treatment plan, the IFSP, and pursuant to a written order or prescription from a physician, physician assistant or nurse practitioner acting within his or her scope of practice under New York State law.

Covered services include services to address the functional needs of a child related to adaptive development, adaptive behavior and play, and sensory, motor, and postural development. These services are designed to improve the child’s functional ability to perform tasks in home, school, and community settings, and include identification, assessment, and intervention; adaptation of the environment, and selection, design and fabrication of devices to facilitate development and promote the acquisition of functional skills; and prevention or minimization of the impact of initial or future impairment, delay in development, or loss of functional ability.

Providers: Services must be provided by:

- A New York State licensed and registered occupational therapist qualified in accordance with 42CFR 440.110(b) and applicable state and federal laws and regulations, acting within his or her scope of practice under New York State Law; or

- A certified occupational therapy assistant “under the direction of” such a qualified licensed and registered occupational therapist, within his or her scope of practice under New York State Law.

“Under the direction of” means that, with respect to each Medicaid beneficiary, the qualified therapist:

- Sees the participant at the beginning of and periodically during the course of treatment;
- Is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State law;
- Has continued involvement in the care provided, and reviews the need for continued services throughout treatment;
New York
2(xii)(Q.8)

- Assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
- Spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards of practice;
- Ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment and
- Keeps documentation supporting the supervision of services and ongoing involvement in the treatment.

7. Physical Therapy Services

Definition: Physical therapy services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.

Services: Physical therapy services are provided in accordance with 42 CFR section 440.110(a). Physical therapy includes services provided to an individual child and instruction provided to the child’s parent or caregiver, either individually or in a group, when such contacts directly benefit the needs of the child as described in his or her treatment plan, the IFSP, and pursuant to a written order or prescription from a physician, physician assistant or nurse practitioner acting within his or her scope of practice under New York State law.

Covered services include services to address the promotion of sensory motor function through enhancement of musculoskeletal status, neurobehavioral organization, perceptual and motor development, cardiopulmonary status and effective environmental adaptation. These services include evaluation and assessment of infants and toddlers to identify movement dysfunction; obtaining, interpreting, and integrating information appropriate to prevent, alleviate, or compensate for movement dysfunction and related functional problems; and providing individual and group services or treatment to prevent, alleviate, or compensate for movement dysfunction and related functional problems.

Providers: Services must be provided by:

- A New York State licensed and registered physical therapist qualified in accordance with 42 CFR 440.110(a) and with applicable state and federal laws and regulations, acting within his or her scope of practice under New York State Law; or

- A certified physical therapy assistant “under the direction of” such a qualified licensed and registered physical therapist, acting within his or her scope of practice under New York State Law.
“Under the direction of” means that, with respect to each Medicaid beneficiary, the qualified therapist:

- Sees the participant at the beginning of and periodically during the course of treatment;
- Is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State law;
- Has continued involvement in the care provided, and reviews the need for continued services throughout treatment;
- Assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
- Spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards of practice;
- Ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment and
- Keeps documentation supporting the supervision of services and ongoing involvement in the treatment.

8. Psychological Services

**Definition:** Psychological services outlined in this section of the State Plan are provided in accordance with 42 CFR 440.60 and are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.

**Providers:** Psychological services must be provided by a qualified licensed practitioner, within his or her scope of practice in accordance with New York State law. Services may be provided by:

- A New York State licensed and registered psychiatrist qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or
- A New York State licensed and registered psychologist qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or
- A New York State licensed clinical social worker (LCSW) qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or
A licensed master social worker (LMSW) qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law, under the supervision of such a qualified licensed clinical social worker, a qualified licensed and registered psychologist, or a qualified licensed and registered psychiatrist as described above; or

A New York State licensed Mental Health Counselor qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or

A New York State licensed Marriage and Family Therapist qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or

A New York State licensed Psychoanalyst qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or

A New York State licensed Creative Arts Therapist qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law.

Supervision of the clinical social work services provided by the licensed master social worker, with respect to each Medicaid beneficiary, shall consist of contact between the licensed master social worker and supervisor during which:

- The licensed master social worker apprises the supervisor of the diagnosis and treatment of each client;
- The licensed master social worker’s cases are discussed;
- The supervisor provides the licensed master social worker with oversight and guidance in diagnosing and treating clients;
- The supervisor regularly reviews and evaluates the professional work of the licensed master social worker; and
- The supervisor provides at least two hours per month of in-person individual or group clinical supervision.

The supervision shall be provided by a New York State licensed and registered psychiatrist, psychologist, or licensed clinical social worker. The supervisor shall be responsible for maintaining records of the client contact hours in diagnosis, psychotherapy and assessment-based treatment planning and supervision hours provided to the qualified individual.
9. Social Work Services

**Definition:** Social work services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary. Social work services outlined in this section of the state plan are provided in accordance with 42 CFR 440.60(a).

**Providers:** Social work services must be provided by a qualified licensed practitioner, within his or her scope of practice in accordance with New York State law. Social work services may be provided by:

- A New York State licensed clinical social worker (LCSW) qualified in accordance applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or

- A licensed master social worker (LMSW) qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law, under the supervision of such a qualified licensed clinical social worker, a qualified licensed and registered psychologist, or a qualified licensed and registered psychiatrist as described above.

Supervision of the clinical social work services provided by the licensed master social worker, with respect to each Medicaid beneficiary, shall consist of contact between the licensed master social worker and supervisor during which:

- The licensed master social worker apprises the supervisor of the diagnosis and treatment of each client;
- The licensed master social worker's cases are discussed;
- The supervisor provides the licensed master social worker with oversight and guidance in diagnosing and treating clients;
- The supervisor regularly reviews and evaluates the professional work of the licensed master social worker; and
- The supervisor provides at least two hours per month of in-person individual or group clinical supervision.

The supervision shall be provided by a New York State licensed and registered psychiatrist, psychologist, or licensed clinical social worker. The supervisor shall be responsible for maintaining records of the client contact hours in diagnosis, psychotherapy and assessment-based treatment planning and supervision hours provided to the qualified individual.

10. Special Instruction/Developmental Services

**Definition:** Special instruction services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.
New York
2(xii)(Q.12)

**Services:** Special instruction services are provided in accordance with 42 CFR 440.130(c). Special instruction services include working with the child and family to correct deficits in motor development, physical growth and development, sensory perception and information processing, behavioral interactions, cognitive processes, and social interactions that are caused by medical, developmental, or other health-related concerns. Special instruction services include working directly with the child to enhance the child’s development. Special instruction services are provided to an individual child and instruction provided to the child’s parent or caregiver, and services provided to children and/or family in a group when such contacts directly benefit the developmental needs of the child as described in his or her treatment plan, the IFSP. Special instruction includes the design of environments and activities that extend the benefits of intervention/therapy into the child’s daily routine and which promote the child’s acquisition of skills in a variety of developmental areas, including motor development, physical growth and development, sensory perception and information processing; behavioral interactions; cognitive processes; and, social interactions.

Special instruction also includes the provision of instruction, information, and support to parents and primary caregivers in assisting them in planning and maintaining a daily therapeutic regime related to enhancing the child’s developmental progress, including skills such as fine and gross motor, feeding, and other adaptive skills.

**Providers:** Special instruction services are provided by qualified individuals possessing the following certification issued by the State Education Department pursuant to State regulations; special education teachers, teachers of students with disabilities - birth to grade two, teachers of the blind and partially sighted, teachers of the blind and visually handicapped, teachers of the blind and visually impaired, and teachers of the deaf and hard of hearing, acting within the scope of practice of their professions.

**11. Speech-Language Pathology Services**

**Definition:** Speech-language pathology services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.

**Services:** Speech-language pathology services are provided in accordance with 42 CFR section 440.110(c). Speech-language pathology services are provided to an individual child and instruction provided to the child’s parent or caregiver, either individually or in a group, when such contacts directly benefit the needs of the child as described in his or her treatment plan, the IFSP, and pursuant to a written order or prescription from a speech-language pathologist, physician, physician assistant or nurse practitioner acting within his or her scope of practice under New York State law.

These services include the identification of children with communicative or oropharyngeal disorders and delays in development of communication skills, including the diagnosis and appraisal of specific disorders and delays in those skills; referral for medical or other professional
services necessary for the habilitation or rehabilitation of children with communicative or oropharyngeal disorders and delays in development of communication skills; and provision of services for the habilitation, rehabilitation, or prevention of communicative or oropharyngeal disorders and delays in development of communication skills.

**Providers:** Services must be provided by:
- A licensed and registered speech-language pathologist qualified in accordance with 42 CFR Section 440.110(c) and applicable state and federal laws and regulations, acting within his or her scope of practice under New York State law; or
- A teacher certified to provide speech and language services, under the documented direction of such a qualified licensed and registered speech-language pathologist (ASHA certified or equivalent), acting within his or her scope of practice under New York State law.

"Under the Direction of" means that, with respect to each Medicaid beneficiary, the qualified therapist:
- Sees the participant at the beginning of and periodically during the course of treatment;
- Is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State Law;
- Has continued involvement in the care provided, and reviews the need for continued services throughout treatment;
- Assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
- Spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards;
- Ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment; and
- Keeps documentation supporting the supervision of services and ongoing involvement in the treatment.

12. Medical Equipment and Appliances

**Definition:** Medical equipment and appliances outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.

Medical equipment and appliances are provided in accordance with 42 CFR section 440.70(b), and include medical supplies, equipment and appliances suitable for use in any setting in which normal life activities take place, other than a hospital, nursing facility, or intermediate care facility for individuals with intellectual disabilities, or any setting in which payment is or could be made under Medicaid for inpatient services that include room and board. Under the EPSDT EI benefit, such equipment is used to increase, maintain, or improve the functional capabilities of the child.
Services: Assistive technology services are provided in accordance with 42 CFR section 440.70(b) and 42 CFR section 441.57. Assistive technology services are services provided to an individual child and include instruction to the child’s parent or caregiver when such contacts directly benefit the needs of the child as described in his or her treatment plan, the IFSP. Assistive technology services are services that directly assist a child with a disability in the selection, acquisition, or use of an assistive technology device. Assistive technology services include: the evaluation of the needs of a child with a disability, including a functional evaluation of the child in the customary environment; purchasing, leasing, or otherwise providing for the acquisition of assistive technology devices by children with disabilities; selecting, designing, fitting, customizing, adapting, applying, maintaining, repairing, or replacing assistive technology devices; coordinating and using other therapies, interventions, or services with assistive technology devices, such as those associated with existing education and rehabilitation plans; training or technical assistance for a child with disabilities or, if appropriate, that family; and, training or technical assistance for professionals (including individuals providing early intervention services) or other individuals who provide services to, or are otherwise substantially involved in, the major life functions of individuals with disabilities.

Providers: Assistive technology services are provided by medical equipment and supply dealers, clinics, hospitals, pharmacies, residential health facilities, and certified home health agencies enrolled in the medical assistance program as a medical equipment dealer. Assistive technology services may also be provided by state-licensed licensed audiologists, speech-language pathologists, physical therapists and assistants, occupational therapists and assistants, orientation and mobility specialists, physicians, practical nurses, registered nurses, and nurse practitioners and other individuals with licensure, certification, or registration in a professional medical, health-related, and/or developmental discipline, within the scope of their professions and to the extent authorized by their licenses.

13. Vision Services

Definition: Vision services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary. Vision services are provided in accordance with 42 CFR section 440.130(c).

Services: Vision services are provided to an individual child and include instruction provided to the child’s parent or caregiver, and services provided to children and/or family members in a group when such contacts directly benefit the needs of the child as described in his or her treatment plan, the IFSP, pursuant to a written order or prescription from a physician, physician assistant or nurse practitioner acting within his or her scope of practice under New York State law.

Vision services include evaluation and assessment of visual functioning, including the diagnosis and appraisal of specific visual disorders, delays, and abilities; professional services necessary for the treatment of visual functioning disorders; communication skills training, orientation and
mobility training for all environments, visual training, independent living skills training, and additional training necessary to activate visual motor abilities.

**Providers:** Vision services are provided by certified low vision specialists, orientation and mobility specialists and vision rehabilitation therapists certified by the Academy for the Certification for Vision Rehabilitation and Education Professionals, state licensed physicians including ophthalmologists; and licensed optometrists, and orientation and mobility specialists, within the scope of their profession and to the extent authorized by their license or certification.

**14. Applied Behavioral Analysis (ABA) Services**

**Definition:** ABA services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary. ABA services outlined in this section of the state plan are provided in accordance with 42 CFR 440.60(a).

**Providers:** ABA services must be provided by a qualified practitioner, within his or her scope of practice in accordance with New York State law. ABA services are provided by:

- A licensed and registered behavior analyst qualified in accordance with applicable state and federal laws and regulations, acting within his or her scope of practice under New York State law, Education Law Article 167; or
- A certified behavior analyst assistant, under the documented direction of such a qualified licensed and registered behavior analyst, acting within his or her scope of practice under New York State law, Education Law Article 167.

“Under the Direction of” means that, with respect to each Medicaid beneficiary, the qualified therapist:

- Sees the participant at the beginning of and periodically during the course of treatment;
- Is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State Law;
- Has continued involvement in the care provided, and reviews the need for continued services throughout treatment;
- Assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
- Spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards;
- Ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment; and
- Keeps documentation supporting the supervision of services and ongoing involvement in the treatment.
15. Transportation Services

**Definition:** Transportation outlined in this section of the State Plan is available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary. Transportation for family members who are not Medicaid eligible is not considered non-emergency medical transportation but may be part of the cost of the service.

**Services:** Transportation delivered by the State’s designated transportation provider pursuant to prior authorization by a municipal Early Intervention Official or Early Intervention Official Designee in the State or the City of New York must be included in the IFSP as recommended by the IFSP Team. Transportation arrangements must be identified in the IFSP.

Transportation is limited to those situations where the child and an accompanying parent or guardian receive transportation to obtain a Medicaid covered early intervention service other than transportation and both the Medicaid covered service and the need for transportation are included in the child’s IFSP. Transportation can only be billed on a day that a Medicaid reimbursable service was delivered and may only be billed at the rate for each one-way trip.

**Providers:** Transportation services must be provided by a qualified, Medicaid-enrolled provider. Each one-way trip must be documented in accordance with Medicaid record keeping requirements in order to bill Medicaid. To receive payment for services provided to a Medicaid recipient, a vendor must be an enrolled Medicaid transportation provider authorized to provide transportation services on the date the services are rendered.

TN __#18-0039____________ Approval Date __June 13, 2019__
Supersedes TN ___NEW____ Effective Date __July 1, 2018__
6b. Prior approval is required for orthoptic training.

6c. Chiropractor services. Provision of chiropractic services shall be limited to EPSDT recipients by medical necessity. Services shall be provided to the extent that such services result from the referral of the recipient’s physician or primary care clinic.

6d. Clinical psychologists. Provision of clinical psychology services shall require referral by:
   1. The patient’s personal physician or medical resource, such as a clinic, acting as the patient’s physician;
   2. the medical director in an industrial concern;
   3. an appropriate school official;
   4. an official or voluntary health or social agency.
6d. Other Practitioner Services (Continued)

**Pharmacists as Immunizers**

1. Reimbursement will be provided to pharmacies for vaccines and anaphylaxis agents administered by certified pharmacists within the scope of their practice.

2. Service setting.

   Services will be provided by a certified pharmacist in a pharmacy or in other locations where mass immunization may take place, such as retail stores/outlets, assisted living centers, and health fairs.

3. Provider qualifications.

   Pharmacists must be currently licensed, registered and certified by the NYS Department of Education Board of Pharmacy to administer immunizations.

**Diabetes Self-Management Training by Pharmacists**

1. Reimbursement will be provided to pharmacies for Diabetes Self-Management Training (DSMT) when provided by licensed pharmacists within the scope of their practice.

2. Service setting: Services will be provided by a licensed pharmacist in a pharmacy that is accredited by a CMS approved national accreditation organization (NAO), such as the American Diabetes Association (ADA), the American Association of Diabetes Educators (AADE), or Indian Health Services (IHS).

3. Provider qualifications: Pharmacists must be currently licensed and registered by the NYS Department of Education Board of Pharmacy. Pharmacies must be accredited by a CMS approved national accreditation organization.

4. Coverage parameters: A beneficiary with newly diagnosed diabetes or a beneficiary with diabetes who has a medically complex condition will be allowed up to 10 hours of Diabetes Self-Management Training (DSMT) during a continuous 6-month period. A beneficiary with diabetes who is medically stable may receive up to 1 hour of DSMT in a continuous 6-month period.
New York 2(xv)

6d. Nurse Practitioner’s Services

New York State covers all nurse practitioner specialties recognized under State Law with no limitations.
6.d(i). **Other Licensed Practitioners (EPSDT only).** A non-physician licensed behavioral health practitioner (NP-LBHP) who is licensed in the State of New York operating within the scope of practice defined in State law and in any setting permissible under State practice law.

NP-LBHPs include individuals licensed and able to practice independently as a:
- Licensed Psychoanalyst
- Licensed Clinical Social Worker (LCSW)
- Licensed Marriage & Family Therapist; or
- Licensed Mental Health Counselor

An NP-LBHP also includes the following individuals who are licensed to practice under supervision or direction of a Licensed Clinical Social Worker (LCSW), a Licensed Psychologist, or a Psychiatrist:
- Licensed Master Social Worker (LMSW)

In addition to licensure, service providers that offer addiction services must demonstrate competency as defined by state law and regulations. Any practitioner above must operate within a child serving agency that is licensed, certified, designated and/or approved by OCFS, OMH, OASAS or DOH or its designee, in settings permissible by that designation.

Inpatient hospital visits by these licensed practitioners are limited to those ordered by the child’s physician. Visits to nursing facilities are allowed for licensed professionals other than social workers if a Preadmission Screening and Resident Review (PASRR) indicates it is medically necessary treatment. Social worker visits are included in the Nursing Facility Visit and may not be billed separately. Visits to ICF-IDD facilities are non-covered. All NP-LBHP services provided while a person is a resident of an (Institution for Mental Diseases) (IMD), such as a free standing psychiatric hospital or psychiatric residential treatment facility, are part of the institutional service and not otherwise reimbursable by Medicaid.

Non-physician licensed behavioral health practitioners (NP-LBHPs)will assess the child prior to developing a treatment plan for the child. Authorization of the treatment plan is required by the DOH or its designee. Evidence-based practices (EBPs) require approval, designations, and fidelity reviews on an ongoing basis as determined necessary by New York State. Treatment services must be part of a treatment plan including goals and activities necessary to correct or ameliorate conditions discovered during the initial assessment visits.

**Assurances:**
The State assures that all NP-LBHP services are provided to, or directed exclusively toward the treatment of, the Medicaid eligible individual in accordance with section 1902(a)(10)(A)(i) of the Act.

The State assures that NP-LBHP services do not include and FFP is not available for any of the following:
- educational, vocational and job training services;
- room and board;
- habilitation services;
- services to inmates in public institutions as defined in 42 CFR § 435.1010;
- services to individuals residing in institutions for mental diseases as describe in 42 CFR § 435.1009;
- recreational and social activities; and
- services that must be covered elsewhere in the state Medicaid plan.

6a. **Medicaid does not cover routine hygienic care of the feet in the absence of pathology.**

Payment for podiatry services will be made for services provided to Medicaid eligibles under twenty-one years of age under the EPSDT program and only by written referral from a physician, physician assistant, nurse practitioner or certified nurse midwife. Effective September 1, 2012, payment for podiatry services will include services provided to Medicaid recipients age 21 and older with a diagnosis of diabetes mellitus and only with a written referral from a physician, physician assistant, nurse practitioner or certified nurse midwife. Date of implementation will occur on the first day of the month following 30 days after Federal approval of this provision in the State Plan.

Only a qualified podiatrist, per 18 NYCRR Section 505.12(a)(1), who is licensed and currently registered to practice podiatry in New York State by the State Education Department, can provide podiatry services.

Such podiatry care and services may only be provided upon written referral by a physician, physician’s assistant, nurse practitioner or nurse midwife, per their individual scope of practice consistent with New York State Education Law and the rules of the Commissioner of Education.

Nursing facilities, Intermediate Care Facilities for Individuals with Intellectual Disabilities, and Article 28 or Article 31 inpatient facilities and certified clinics which include foot care services in the rate established for medical care for Medicaid recipients will continue to receive payments for these services through their rates. Additionally, Medicaid will continue to pay for medically necessary items and supplies (e.g., prescription drugs) for all recipients when ordered by a private practicing podiatrist.

In the office setting, a podiatrist may only provide a limited number of clinical laboratory tests. Podiatrists are informed of the specific clinical laboratory tests they may perform, in their office setting, in the MIS Podiatrists Manual. A podiatrist may only provide radiological services which are within the scope of podiatric practice. Amputation and bunion surgery may be performed by a podiatrist in a hospital setting.

**TN #13-10**

Supersedes TN #12-16

Approval Date **November 6, 2013**

Effective Date **October 1, 2013**
New York
2(a)

[6b. Prior approval is required for orthoptic training.]

6c. Chiropractor services.

Provision of chiropractic services shall be limited to EPSDT recipients by medical necessity. Services shall be provided to the extent that such services result from the referral of the recipient’s physician or primary care clinic.

6d. Clinical psychologists.

Provision of clinical psychology services shall require referral by:

1. the patient's personal physician or medical resource, such as a clinic, acting as the patient's physician;
2. the medical director in an industrial concern;
3. an appropriate school official;
4. an official or voluntary health or social agency.]

7a. Home care services are medically necessary services (physician order required) provided by a Certified Home Health Agency (CHHA) to individuals, regardless of residence, in the home and community. Such services include both part time and intermittent skilled health care [and long-term] nursing and home health aide services. Home (health) care services include nursing, home health aide, physical therapy, occupational therapy, and speech therapy. [Patients must be assessed as being appropriate for intermittent or part-time nursing services ordered by a physician pursuant to a written plan of care provided by a home health agency upon admission to an Assisted Living Program (ALP), no later than 45 days from the date of admission, and at least once during each subsequent six month period. The social services district must review the assessment and prior authorize the service].

Providers of home (health) care services must possess a valid certificate of approval issued pursuant to the provisions of Article 36 or the Public Health Law, be certified in accordance with certified home health agency, long term home health care program and AIDS home care program certification and authorization and provide services in accordance with minimum standards.

Home (health) care services provider qualifications are provided for registered professional nurse, home health aide, physical therapist, occupational therapist and speech pathologist.

Registered professional nurse shall mean a person who is licensed and currently registered as a registered professional nurse pursuant to Article 139 of the New York State Education Law.

The State assures the provision of Home Health services will be provided in accordance with 42 CFR 440.70.
7b. Home Health aide will mean a person who carries out health care tasks under the supervision of a registered nurse or licensed therapist and who may also provide assistance with personal hygiene, housekeeping and other related supportive tasks to a patient with health care needs in his/her home. Home health aides will have successfully completed a basic training program in home health aide services or an equivalent exam approved by the Department and possess written evidence of such completion.

Certified home health agencies (CHHA) may provide home health services pursuant to the requirements of 42 CFR 440.70(b)(2). Home health services may be provided to income and/or medically eligible participants in home and community based settings, which could be the individual's home.
AIDS home care services providers qualifications are provided pursuant to Article 36 of the PHL.

The [S]tate assures the provision of AIDS home care services will be provided in accordance with 42 CFR 440.70 (for the provision of home health services).
Home Telehealth Services

Beginning on October 1, 2007, the Commissioner of Health is authorized to establish fees to reimburse the cost of home telehealth services provided by a certified home health agency, including those that provide AIDS home care services.

The Commissioner shall reimburse for telehealth services if such services are provided only in connection with federal Food and Drug Administration approved and interoperable devices, which are incorporated as part of a patient’s plan of care.

The purpose of providing telehealth services shall be to assist in the effective monitoring and management of patients whose medical, functional, and/or environmental needs can be appropriately and cost-effectively met at home through the application of telehealth intervention.

Reimbursement for home telehealth services is to be provided for Medicaid patients with conditions or clinical circumstances associated with the need for frequent monitoring, and/or the need for frequent physician, skilled nursing or acute care services, and where the provision of telehealth services can appropriately reduce the need for on-site or in-office visits or acute long term care facility admissions. Conditions or clinical circumstances shall include, but not be limited to, congestive heart failure, diabetes, chronic pulmonary obstructive disease, wound care, polypharmacy, mental or behavioral problems limiting self-management, and technology-dependent care such as continuous oxygen, ventilator care, total parenteral nutrition and enteral feeding.
Telehealth Services - Remote Patient Monitoring

Effective on or after [June 1, 2016] April 1, 2018, the Commissioner of Health is authorized to establish fees to reimburse the cost of telehealth services provided by remote patient monitoring.

The purpose of providing telehealth remote patient monitoring services is to assist in the effective monitoring and management of patients whose medical needs can be appropriately and cost-effectively met at home through the application of telehealth intervention.

Telehealth remote patient monitoring services use synchronous or asynchronous electronic information and communication technologies to collect personal health information and medical data from a patient at an “originating site”; this information is then transmitted to a provider at a “distant site” for use in treatment and management of unstable/uncontrolled medical conditions that require frequent monitoring. Such conditions include, but are not limited to, congestive heart failure, diabetes, chronic obstructive pulmonary disease, wound care, polypharmacy, mental or behavioral problems and technology-dependent care such as continuous oxygen, ventilator care, total parenteral nutrition or enteral feeding. Telehealth remote patient monitoring services [may be provided] will be ordered by a [facility licensed under Article 28 of Public Health Law or by a] physician, nurse practitioner, or a midwife [, or physician assistant who has examined the patient and] with whom the patient has a[n established,] substantial and ongoing relationship. [Payment for remote patient monitoring while receiving home health services through a Certified Home Health Agency (CHHA) is pursuant to public health law 3614 section (3-c) (a-d).] Telehealth remote patient monitoring services are based on medical necessity and should be discontinued when the patient’s condition is determined to be stable/controlled.

[The Commissioner will reimburse for telehealth remote patient monitoring services if such services are provided with federal Food and Drug Administration approved interoperable devices, which are incorporated as part of a patient’s plan of care.]

All services delivered via telehealth remote patient monitoring must be performed on dedicated secure transmission linkages that meet the minimum federal and state requirements, including but not limited to 45 CFR, Parts 160 and 164 (HIPAA Security Rules). All existing confidentiality requirements that apply to written medical records will apply to services delivered by remote patient monitoring, including the actual transmission of health care data and any other electronic information/records.

TN 18-0043 Approval Date 07/18/2018
Supersedes TN #16-0015 Effective Date 04/01/2018
Telehealth Services - Store and Forward

Effective on or after [June 1, 2016] April 1, 2018, the Commissioner of Health is authorized to establish fees to reimburse the cost of telehealth store and forward technology.

Telehealth store and forward technology is the asynchronous, secure electronic transmission of a patient’s health information in the form of patient-specific digital images and/or pre-recorded videos from a [qualified physician, nurse practitioner, midwife, or physician assistant,] provider at an originating site to a consulting [physician] provider at a distant site.

[Telehealth store and forward technology may be utilized in the specialty areas of dermatology, ophthalmology and other disciplines, as determined by the Commissioner.]

Reimbursement for telehealth store and forward services is to be provided for Medicaid patients with conditions or clinical circumstances where the provision of telehealth services can appropriately reduce the need for on-site or in-office visits.

[The Commissioner shall reimburse for services, specifically telehealth store and forward technology, if such services are provided with federal Food and Drug Administration approved interoperable devices, which are incorporated as part of a patient’s plan of care.]

All services delivered via telehealth store and forward technology must be performed on dedicated secure transmission linkages that meet the minimum federal and state requirements, including but not limited to 45 CFR, Parts 160 and 164 (HIPAA Security Rules). All existing confidentiality requirements that apply to written medical records will apply to services delivered by store and forward technology, including the actual transmission of health care data and any other electronic information/records.
7c. **Certain specialty items require prior approval.**

These items are identified for equipment dealers in the MMIS DME Provider Manual. Prior approval is required for most repairs to durable medical equipment. Personal Emergency Response Services (PERS) are provided according to [LDSS] Local Social Services District (LSSD) written authorization for recipients of personal care services and home health services ordered by a physician pursuant to a written plan of care.

7d. Physical therapist shall mean a person who is licensed by and currently registered with the New York State Education Department or who has been issued a valid limited permit by that Department. The state assures the provision of physical therapy services will be provided in accordance with 42 CFR 440.110(a)(2)(i) and 440.110(a)(2)(ii).

Occupational therapist shall mean a person who is registered with the American Occupational Therapy Association, or either a graduate of a program in occupational therapy approved by the Council on Medical Education of the American Medical Association in collaboration with the American Occupational Therapy Association or a graduate of a curriculum in occupational therapy which is recognized by the World Federation of Occupational Therapists and is eligible for a registration with the American Occupational Therapy Association. The state assures the provision of occupational therapy services will be provided in accordance with 42 CFR 440.110(b)(2)(i) and 440.110(b)(2)(ii).

Speech pathologist shall mean a person who is licensed as required by Article 159 of the New York State Education Law. The state assures the provision of speech therapy services will be provided in accordance with 42 CFR 440.110(c)(2).

8. **Private Duty Nursing (PDN)** is medically necessary nursing services, ordered by and in accordance with a written physician's treatment plan, provided in a person's home on a continuous basis normally considered beyond such nursing services available from a Certified Home Health Agency (CHHA) or intermittent nursing services normally provided through a CHHA but which are unavailable. Prior approval is required for private duty nursing services either in a person's home or in a hospital except in an urgent situation in which the attending physician may order the services for no more than two nursing days.

Care and services of a private duty nurse will be provided only if they are in accordance with the regulations of the Department of Health.
Service providers who provide private duty nursing include a Licensed Home Care Services Agency’s (LHCSA) registered nurses (NS) or licensed practical nurses (LPN) enrolled on an independent practitioner basis.

Nurses providing PDN must possess a license to practice in the State of New York and be currently registered by the New York State Education Department (NYSED). In addition, nurses providing an appropriate attestation regarding their training and ability to care for medically fragile children receive a Specialty code on their file entitling them to increased reimbursement for the provision of such care.

The [S]tate assures that the provision of PDN will be provided in accordance with 42 CFR 440.80.

9. Clinic services provided in Article 28 clinics are in accordance with 42 CFR §440.90 title clinical services. Requirements for physicians supervision comply with the [S]tate Medicaid Manual, §4320B titled Physician Direction Requirement.
Collaborative Care Services: Freestanding Clinics

Effective January 1, 2015, Freestanding Clinics licensed pursuant to Article 28 of the Public Health Law will provide Collaborative Care Services for purposes of providing integrated physical and mental health care to patients diagnosed with mental illness. Freestanding Clinics must obtain prior approval from the New York State Department of Health and the New York State Office of Mental Health to furnish Collaborative Care Services. Collaborative Care Services include screening, diagnostic, preventative and therapeutic services to treat the symptoms of mental illness.

Collaborative Care Services include a minimum of one clinical contact between the Collaborative Care Manager and the patient per month, and the completion of the screening tool for the patient’s specific mental illness diagnosis specified by the New York State Office of Mental Health. The clinical contact with the Collaborative Care Manager may be by phone or in person. Collaborative Care Services also include a minimum of at least one face-to-face contact between a licensed provider and the patient once every three months.

A patient is limited to 12 months of Collaborative Care Services, which are not required to be consecutive. With the prior approval of the New York State Office of Mental Health, a patient may receive an additional 12 months of Collaborative Care Services, which are not required to be consecutive.
Clinic Services provided in Article 31 clinics licensed by the New York State Office of Mental Health (OMH) are in accordance with 42 CFR § 440.90 title clinic services. Such services include Clinic Treatment Services, Partial Hospitalization, Continuing Day Treatment, and Day Treatment Services for Children. Any limitations on the amount, duration or scope of these services may be exceeded based on medical necessity for Medicaid beneficiaries under the age of 21.

OMH-licensed clinic services are provided under the direction of a physician in accordance with 42 CFR § 440.90 and comply with § 4320B of the State Medicaid Manual. A physician must see the patient at least once, approve the patient's treatment plan, and periodically review the need for continued care. The physician assumes professional responsibility for the services provided and assures that the services are medically appropriate and provided in a safe and efficient manner in accordance with accepted medical standards. The physician may be either an employee of the OMH-licensed clinic service provider or affiliated with the provider. OMH-licensed clinic service providers choosing to utilize affiliated physicians must enter into a contractual agreement or some other type of formal arrangement obligating the physician to supervise the care provided to the OMH-licensed clinic service provider's patients.

1. Clinic Treatment Services

Clinic Treatment Services are preventive, diagnostic, therapeutic, and rehabilitative mental health services. Clinic Treatment Services are provided based upon the clinical assessment of an individual's mental, physical and behavioral condition and history, which is the basis for establishing the individual’s diagnosis. Medically necessary Clinic Treatment Services are documented in a treatment plan which is signed by a physician and reviewed on a periodic basis. Medically necessary Clinic Treatment Services include: Initial Assessment; Psychiatric Assessment; Psychotherapy; Psychotropic Medication Treatment; Injectable Psychotropic Administration and Monitoring; Crisis Intervention; Complex Care Management; Developmental Testing, Psychological Testing; Psychiatric Consultation; Health Physical; Health Monitoring; Smoking Cessation Treatment; and Screening, Brief Intervention, and Referral to Treatment.

2. Partial Hospitalization Services

Partial Hospitalization Services are preventive, diagnostic, therapeutic, and rehabilitative intensive mental health services which are designed to stabilize and ameliorate acute symptoms and serve as an alternative to inpatient hospitalization or to reduce the length of a hospital stay within a medically supervised program. Partial Hospitalization Services are provided based upon the clinical assessment of an individual’s mental, physical and behavioral condition and history, which is the basis for establishing the individual's diagnosis, functional deficits, and recovery goals. Medically necessary Partial Hospitalization Services are documented in a treatment plan which is signed by a physician and reviewed on a periodic basis. Medically necessary Partial Hospitalization Services include: Health Screening and Referral; Preadmission
Screening; Symptom Management; Medication Therapy; Medication Skill-Building; Verbal Therapy; Rehabilitation Readiness Assessment and Development; Crisis Intervention Services; Functional Skill Development; Clinical Support Services; and Discharge Planning Services.

Partial Hospitalization services are provided in preadmission visits for individuals prior to formal enrollment. Preadmission visits are limited to a maximum of three visits which must occur over a period of time not to exceed the remaining days of the month in which the first preadmission visit occurred and the next full calendar month.

Clinical Support Services may also be provided to collaterals, who are members of the individual’s family or household, or others who regularly interact with the individual and are directly affected by or can affect the individual’s condition and are identified in the treatment plan as having a role in the individual’s treatment. Clinical support services that are provided to collaterals are for the direct benefit of the Medicaid beneficiary. Collateral and group collateral visits are limited to two hours per day.

Other limitations on amount and duration of Partial Hospitalization Services include:

i. Reimbursement is limited to no more than 180 hours per course of treatment. A course of treatment shall not exceed six calendar weeks, unless during the course of treatment the recipient is admitted to an inpatient psychiatric facility. Such course of treatment may be extended to include the number of days of inpatient treatment, up to a maximum of 30 days. Partial Hospitalization Services provided during crisis, collateral or group collateral visits do not count towards the 180 hour maximum.

ii. Reimbursement is limited to 360 hours per calendar year. Services provided during crisis, collateral or group collateral visits do not count towards the 360 hour maximum.

iii. Reimbursement is limited to one visit, including preadmission visits (of up to 7 hours) and one individual or group collateral visit (of up to 2 hours) per individual per day. Additional Partial Hospitalization Services may be provided on the same day during a crisis visit.

3. Continuing Day Treatment Services

Continuing Day Treatment Services are mental health preventive, diagnostic, therapeutic, and rehabilitative services. Continuing Day Treatment Services are provided based upon the clinical assessment of an individual’s mental, physical and behavioral condition and history, which is the basis for establishing the individual’s diagnosis, functional deficits, and recovery goals. Medically necessary Continuing Day Treatment Services are documented in a treatment plan which is signed by a physician and reviewed on a periodic basis. Medically necessary Continuing Day
Treatment Services include: Health Screening and Referral; Preadmission Screening; Symptom Management; Medication Therapy; Medication Skill-Building; Verbal therapy; Rehabilitation Readiness Assessment and Development; Crisis Intervention Services; Functional Skill Development; Clinical Support services; and, Discharge Planning Services.

Continuing Day Treatment Preadmission Screening services are provided in preadmission visits for individuals prior to formal enrollment. Preadmission visits are limited to a maximum of three visits which must occur over a period of time not to exceed the remaining days of the month in which the first preadmission visit occurred and the next full calendar month.

Clinical Support Services may be provided to collaterals, who are members of the individual’s family or household, or others who regularly interact with the individual and are directly affected by or can affect the individual’s condition and are identified in the treatment plan as having a role in the individual’s treatment. Clinical support services that are provided to collaterals are for the direct benefit of the Medicaid beneficiary.

Other limitations on amount and duration of Continuing Day Treatment Services include:

i. Reimbursement is limited to one visit, including preadmission visits and one individual or group collateral visit per recipient per day. Additional Continuing Day Treatment Services may be provided on the same day during a crisis visit.

ii. Continuing Day Treatment services are not reimbursable if an individual is concurrently receiving Clinic Treatment Services, except where either:
   a. an individual is in transition from Clinic Treatment Services to Continuing Day Treatment Services, in which case reimbursement is permitted for a maximum of three Continuing Day Treatment preadmission visits; or
   b. an individual is enrolled in Clinic Treatment Services solely for the purpose of Clozapine Medication Therapy.

4. **Day Treatment Services for Children**

Day Treatment Services for Children are preventive, diagnostic, therapeutic, and rehabilitative mental health services designed to stabilize children’s adjustment to educational settings, prepare children for return to educational settings, and transition children to educational settings. Medicaid reimbursement is not available for educational activities, which are the sole responsibility of the school district of the child’s residence. Day Treatment Services for Children may be provided in free-standing clinics located within schools. Medically necessary Day Treatment Services for Children include: Medication Therapy; Verbal Therapy; Crisis

---

TN #10-0018 Approval Date November 1, 2017
Supersedes TN NEW Effective Date July 1, 2010
Intervention Services; Clinical Support Services; Task and Skill Development; Social Skill Development; Recreational Rehabilitation Services; and Discharge Planning Services.

Day Treatment Services for Children are provided in preadmission visits for children prior to formal enrollment. Preadmission visits are limited to a maximum of three visits which must occur over a period of time not to exceed the remaining days of the month in which the first preadmission visit occurred and the next full calendar month.

Clinical Support Services may also be provided to collaterals, who are members of the child’s family or household, or others who regularly interact with the child and are directly affected by or can affect the child’s condition and are identified in the treatment plan as having a role in the child’s treatment. Clinical support services that are provided to collaterals are for the direct benefit of the Medicaid beneficiary.

Other limitations on amount and duration of Day Treatment Services for Children include:

i. Reimbursement is limited to one visit, including preadmission visits and one collateral visit per child per day. Additional Day Treatment Services for Children may be provided on the same day during a crisis visit.

ii. Day Treatment Services for Children are not reimbursable if a child is concurrently receiving Clinic Treatment Services, except where either:
   a. a child is in transition from Clinic Treatment Services to Day Treatment Services for Children, in which case reimbursement is permitted for a maximum of three Day Treatment Services for Children preadmission visits; or
   b. a child is enrolled in Clinic Treatment Services solely for the purpose of Clozapine Medication Therapy.
10. Prior approval is required for all dental care except preventive prophylactic and other routine dental care services and supplies.

12a. Prior authorization or dispensing validation is required for some prescription drugs. The State has established a preferred drug program with prior authorization for drugs not included on the preferred drug list. The prior authorization complies with the requirements of Section 1927(d)(5) of the Social Security Act and provides for a 24-hour turnaround by either telephone or other telecommunications device from receipt of request and provides for a 72-hour supply of drugs in emergency circumstances. In addition, brand-name drugs that have a FDA approved, A-rated generic equivalent must be prior authorized unless exempted by the Commissioner of Health. Prior authorization is required for a generic equivalent of a brand name drug, including a generic equivalent that is on the preferred drug list or the clinical drug review program, when the net cost of the brand name drug, after consideration of all rebates, is less than the cost of the generic equivalent.

Drugs for which Medical Assistance reimbursement is available are limited to the following:

1. Outpatient drugs of any manufacturer which has entered into and complies with a rebate agreement under Sections 1902(a)(54) and 1927(a) of the Act with the Centers for Medicare and Medicaid Services (CMS) which are prescribed for a medically accepted indication. All drugs covered by the National Drug Rebate Agreements remain available to Medicaid beneficiaries, although some may require prior authorization. Drugs for the treatment of erectile dysfunction, as set forth in 42 U.S.C. §1396r-8(d)(2)(K), are not a covered service, on and after April 1, 2006, unless such drugs are used to treat conditions other than sexual or erectile dysfunction and these uses have been approved by the Food and Drug Administration.

2. Supplemental Rebate Programs

The State is in compliance with Section 1927 of the Social Security Act. The State has the following policies for the Supplemental Rebate Programs for the Medicaid population.

a) CMS has authorized the State of New York to enter into the National Medicaid Pooling Initiative (NMPI) for drugs provided to Medicaid beneficiaries. The NMPI Supplemental Rebate Agreement (SRA) and the Amendment to the SRA submitted to CMS on March 30, 2006 have been authorized for pharmaceutical manufacturers’ existing agreements through their current expiration dates. The updated NMPI SRA submitted to CMS on June 30, 2013 has been authorized for renewal and new agreements with pharmaceutical manufacturers for drugs provided to Medicaid beneficiaries.

b) CMS has authorized the State of New York to enter into Medicaid State-specific Supplemental Rebate Agreement directly with manufacturers to receive supplemental rebates of covered outpatient drugs for Medicaid beneficiaries. The State-specific Supplemental Rebate Agreement was submitted to CMS on [March 31, 2010] December 31, 2014 and has been authorized by CMS.
New York
2(b.1)

c) The prior authorization process complies with the requirements of Section 1927 of the Social Security Act and provides for a 24-hour turn-around response by either telephone or telecommunications device from the receipt of a prior authorization request. In emergency situations, providers may dispense a 72-hour supply of medications.

d) The terms of the supplemental rebate programs apply only to covered outpatient drugs for which the State is eligible for federal financial participation. Supplemental rebates received by the State in excess of those required under the National Drug Rebate Program will be shared with the Federal Government on the same percentage basis as applied under the National Drug Rebate Agreement.

e) Any Supplemental Rebate Agreement not authorized by CMS will be submitted to CMS for authorization.

f) All drugs covered by the programs will comply with the provisions of the national drug rebate agreement.

3. Any changes to the NMPI Supplemental Rebate Agreement must be submitted to CMS for authorization. Any changes to the State-specific Supplemental Rebate Agreement NY State holds directly with the manufacturer must be submitted to CMS for authorization.

4. As provided by the Act, a new drug manufactured by a company which has entered into a rebate agreement may be covered subject to prior approval, unless the drug is subject to the allowable exclusion categories provided by the Act.

5. As specified in Section 1927(b)(3)(D) of the Act, notwithstanding any other provisions of law, rebate information disclosed by a manufacturer shall not be disclosed by the state for purposes other than rebate invoicing and verification.
6. Effective January 1, 2006, the Medicaid agency will not cover any Part D drug for full-benefit dual eligible individuals who are entitled to receive Medicare benefits under Part A or Part B.

7. The Medicaid agency provides coverage for the following excluded or otherwise restricted drugs or classes of drugs or their medical uses to all Medicaid recipients, including full benefit dual eligible beneficiaries under the Medicare Prescription Drug Benefit – Part D.

☒ The following excluded drugs are covered:
  - (a) agents when used for anorexia, weight loss, weight gain
  - (b) agents when used to promote fertility: Some – bromocriptine, clomiphene citrate, letrozole, and tamoxifen only.
  - (c) agents when used for the symptomatic relief cough and colds: Some - benzonatate only
  - (d) prescription vitamins and mineral products, except prenatal vitamins and fluoride: Some - select B Vitamins (niacin, pyridoxine, thiamine, cyanocobalamin); Folic Acid; Vitamin K; Vitamin D (ergocalciferol, cholecalciferol); Iron (including polysaccharide iron complex); Iodine
  - (e) nonprescription drugs: Some - select allergy, asthma and sinus products; analgesics; cough and cold preparations; digestive products; insulin; feminine products; topical products, minerals and vitamin combinations
  - (f) covered outpatient drugs which the manufacturer seeks to require as a condition of sale that associated tests or monitoring services be purchased exclusively from the manufacturer or its designee

TN #17-0058,
Supersedes TN #17-0047,
Approval Date November 2, 2017
Effective Date July 1, 2017
8. The State will cover APIs that are included in extemporaneously compounded prescriptions when the API serves as the active drug component in the compounded formulation. A current list of covered APIs can be found at the following at:

https://www.emedny.org/info/formfile.aspx

13c. Preventive Services

New York State Medicaid covers and reimburses all United States Preventive Services Task Force (USPSTF) grade A and B preventive services and approved vaccines recommended by the Advisory Committee on Immunization Practices (ACIP), and their administration, without cost-sharing, when provided in a practitioner’s office.

Preventive Services specified in section 4106 of the Affordable Care Act are all available under the State Plan and are covered under the physician, other practitioner, nurse-midwife and nurse practitioner service benefits and are reimbursed according to the methodologies provided in Attachment 4.19-B.

The State will maintain documentation supporting expenditures claimed for these Preventive Services and ensure that coverage and billing codes comply with any changes made to the USPSTF or ACIP recommendations.
Other Licensed Practitioners. A non-physician licensed behavioral health practitioner (NP-LBHP) who is licensed in the State of New York, operating within the scope of practice defined in State law and in any setting permissible under State practice law.

NP-LBHPs include individuals licensed and able to practice independently as a:

- Licensed Clinical Social Worker (LCSW)

NP-LBHPs also includes the following individuals who practice psychotherapy services:

- Licensed Master Social Worker (LMSW);
- Applied Behavioral Sciences Specialist (ABSS) - An Applied Behavioral Sciences Specialist (ABSS) with a Master’s degree in a clinical and/or treatment field of psychology from an accredited institution and/or a NYS license in Mental Health Counseling, who has training in assessment techniques and behavioral program development.

- Supervision requirement: Services delivered by an ABSS must be performed under the supervision of a NYS Licensed Psychologist in accordance with the supervisory functions described in the scope of practice in state law. Services delivered by an ABSS will be billed under the NPI of the supervising Licensed Psychologist who is ultimately responsible for services rendered. Services delivered by an LMSW must be performed under the supervision of a NYS Licensed Psychologist or LCSW in accordance with the supervisory functions described in the scope of practice in state law. Services delivered by an LMSW will be billed under the NPI of the supervising Licensed Psychologist or LCSW (whichever is applicable), who is ultimately responsible for services rendered.

Limitations: Services cannot duplicate services available through other State Plan options and must be prior authorized. An annual prior authorization for a maximum of 50 visits for psychotherapy service will be granted based upon attestation of medical necessity by a qualified billing provider. Further visits beyond the initial 50 visits can be prior authorized upon the State’s review and approval of documentation supporting medical necessity.
13c. Preventive Services

National Diabetes Prevention Program (NDPP)

For dates of service on or after July 1, 2019, Medicaid will begin covering diabetes prevention services as outlined in the Centers for Disease Control and Prevention (CDC)-recognized National Diabetes Prevention Program (NDPP). The NDPP is an evidence-based, educational and support program designed to assist at-risk individuals from developing Type 2 diabetes. Diabetes services are provided as preventive services pursuant to 42 C.F.R. Section 440.130(c) and must be recommended by a physician or other licensed practitioner of the healing arts within his or her scope of practice under state law to prevent diabetes, prolong life, and promote the physical and mental health of the beneficiary.

The CDC grants NDPP recognition only to organizational entities. Therefore, only organizations that have achieved CDC recognition can be enrolled in Medicaid as an NDPP provider. Individuals who wish to participate in the Medicaid NDPP program may do so as a trained “Lifestyle Coach” once they meet the standards and guidelines specified in the CDC’s Diabetes Prevention Recognition Program (DPRP). Only the organizations that are enrolled in Medicaid as NDPP providers may bill for NDPP services. The CDC-recognized organization will supervise Lifestyle Coaches and must ensure that the individual Lifestyle Coaches providing NDPP services on behalf of the organization have been formally trained and have complied with the requirements outlined by the CDC.

A Lifestyle Coach may be a physician, non-physician practitioner, or an unlicensed person who has received formal training on a CDC-approved curriculum for at least 12 hours and is recognized as having met the NDPP requirements specified in the CDC’s Diabetes Prevention Recognition Program (DPRP) standards and guidelines.

Lifestyle Coaches will work with Medicaid members to provide them with a practical understanding of the positive impacts of healthier, sustained dietary habits; increased physical activity; and behavior change strategies for weight control; and will offer the following services with the goal to prevent Type 2 diabetes:

- Counseling related to long-term dietary change, increased physical activity, and behavior change strategies for weight control;
- Counseling and skill building to facilitate the knowledge, skill, and ability necessary to prevent the onset of Type 2 diabetes; and
- Nutritional counseling.
13d. Harm Reduction Services

Harm reduction services represent a fully integrated client-oriented approach to care. Such services are remedial services recommended by a physician or other licensed practitioner and are for maximum restoration of a beneficiary to his or her best possible functional level. The role of the harm reduction service is to ensure that clients obtain needed services at the appropriate time by assessing and reducing any barriers to accessing these programs. Harm reduction services begin immediately as service needs are assessed. The determination of the type(s) of service, frequency, and intensity is an ongoing responsibility of the harm reduction staff, and there is no limitation in the amount, duration, and scope of services. Harm reduction services continue until the staff determine that the service goals have been met or if the client decides he/she no longer wants to participate in programming.

Harm reduction programs will provide the following:
1. Development of a Treatment Plan
2. Individual/Group Supportive Counseling
3. Medication management and Treatment Adherence Counseling
4. Psychoeducation - Support groups

1. Development of a Treatment Plan

**Definition:** Development of a treatment plan through either an initial assessment or a scheduled or event-generated reassessment for harm reduction services is part of a package of remedial services recommended by a physician or other licensed practitioner and are for maximum restoration of a beneficiary to his or her best possible functional level. Referrals may be made for more intensive behavioral interventions, support groups, wellness services, substance use disorder (SUD) treatment, and overdose prevention as needed.

A reassessment is a scheduled or event-generated formal re-examination of the client’s situation, functioning, substance use, and medical and psychosocial needs to identify changes which have occurred since the initial or most recent assessment. The reassessment measures progress toward the desired goals and is used to prepare a new or revised harm reduction program plan or confirm that current services remain appropriate.

There are no limitations on the amount, duration, and scope of these services.

**Providers:** Services must be provided by:
- a direct service provider who has a high school diploma or has passed the general educational development (GED) test or the Test Assessing Secondary Completion (TASC™) and has earned a high school equivalency credential or has at least three (3) years’ experience either 1) providing community-based services to active substance users or persons living with a history of substance use or 2) providing harm reduction or community-based social services to women, children and families; substance users; mentally ill chemical abusing clients; homeless persons; adolescents; or parolees and other high-risk populations:

TN_____#13-0019 _______ Approval Date _August 10, 2017_____
Supersedes TN ____ NEW _____ Effective Date __April 01, 2014 _____

or a case worker who has a high school diploma or has passed the general educational development (GED) test or the Test Assessing Secondary Completion (TASC™) and has earned a high school equivalency credential or has at least three (3) years’ experience in case management or related supportive services position serving women, children and families; substance users; mentally ill chemical abusing clients; homeless persons; adolescents; or parolees and other high-risk populations, including one year of HIV-related experience; or

• director of harm reduction services who may be a clinical social worker; possess a master of social work degree; be a licensed clinical or masters social worker; or has a bachelor’s degree and at least three (3) years’ experience in the provision of supportive services to women, children and families; substance users; mentally ill chemical abusing clients; homeless persons; adolescents; or parolees and other high-risk populations; or

• a peer who has been certified through a Department-approved certification program or one conducted by another entity recognized by the Department and who is supervised by the director of harm reduction services. A person seeking harm reduction peer certification is required to complete 68 training hours of core courses such as Introduction to HIV, STIs, and Viral Hepatitis; Sex, Gender, and HIV; and Overview of Harm Reduction Counseling, as well as courses addressing health and medical needs and cultural competency among at-risk populations and health literacy. An additional 22 hours of training are required in topics specific to harm reduction among substance users and include promoting PrEP; retention in care; opioid overdose prevention; HCV prevention; safer injection and wound care; and addressing sexual risk. Other requirements for certification include completing a 500-hour practicum and passing a knowledge assessment. Certified peers must complete at least 10 hours of training annually to maintain their certification.

2. Individual/Group Supportive Counseling

Definition: Supportive counseling services are part of a package of remedial services recommended by a physician or other licensed practitioner and are for maximum restoration of a beneficiary to his or her best possible functional level. Effective supportive counseling assists individuals in understanding how to reduce the behaviors that interfere with their ability to lead healthy, safe lives and to restore them to their best possible functional level. Supportive counseling may be provided to an individual or in a group setting and can cover such topics as HIV/HCV/STD status or substance use disclosure to family members and friends; addressing stigma for drug users in accessing services; how to maximize health care services interactions; how to reduce substance use or use more safely and avoid overdose; and how to address anxiety, anger, and depressive episodes. There are no limitations on the amount, duration, and scope of these services.

Providers: Services must be provided by:

• a direct service provider who has a high school diploma or has passed the general educational development (GED) test or the Test Assessing Secondary Completion (TASC™) and has earned a high school equivalency credential or has at least three (3) years’ experience either 1) providing community-based services to active substance users or persons living with a history of substance use or 2) providing harm reduction or community-based social services to women, children and families; substance users; mentally ill chemical abusing clients; homeless persons; adolescents; or parolees and other high-risk populations;
New York 2(c.4)

- or a case worker who has a high school diploma or has passed the general educational development (GED) test or the Test Assessing Secondary Completion (TASC™) and has earned a high school equivalency credential or has at least three (3) years’ experience in case management or related supportive services position serving women, children and families; substance users; mentally ill chemical abusing clients; homeless persons; adolescents; or parolees and other high-risk populations, including one year of HIV-related experience; or

- director of harm reduction services who may be a clinical social worker; possess a master of social work degree; be a licensed clinical or masters social worker; or has a bachelor's degree and at least three (3) years’ experience in the provision of supportive services to women, children and families; substance users; mentally ill chemical abusing clients; homeless persons; adolescents; or parolees and other high-risk populations.

3. Medication Management and Treatment Adherence Counseling

Medication management and treatment adherence counseling assists clients to recognize the need for medication to address substance use or psychiatric issues, reinforce the importance of adherence to treatment regimens, and identify tools to follow the prescribed regimens. Such services are remedial services recommended by a physician or other licensed practitioner and are for maximum restoration of a beneficiary to his or her best possible functional level. There are no limitations on the amount, duration, and scope of these services.

**Providers:** Services must be provided by:

- a direct service provider who has a high school diploma or has passed the general educational development (GED) test or the Test Assessing Secondary Completion (TASC™) and has earned a high school equivalency credential and has at least three (3) years’ experience in case management or related supportive services position; or

- director of harm reduction services who may be a clinical social worker; possess a master of social work degree; be a licensed clinical or masters social worker; or has a bachelor's degree and has at least three (3) years’ experience in the provision of supportive services and supervision of staff; or

- a peer who has achieved Department-approved certification and is supervised by the director of harm reduction services.

4. Psychoeducation - Support Groups

**Definition:** Support groups are stand-alone services that may also be used to supplement individual and/or group supportive counseling. Such services are remedial services recommended by a physician or other licensed practitioner. Support groups restore individuals to his or her best possible functional level by focusing on group members' issues and experiences relative to substance use, finances, medical/health care, support system, incarceration history and other factors that contribute to risk behaviors for HIV/STD/HCV. Support groups may be facilitated by a direct service provider, a case worker, or the director of harm reduction services or co-facilitated by a peer. There are no limitations on the amount, duration, and scope of these services.
Providers: Services must be provided by:

- a direct service provider who has a high school diploma or has passed the general educational development (GED) test or the Test Assessing Secondary Completion (TASC™) and has earned a high school equivalency credential or has at least three (3) years’ experience as a direct service provider in a supportive services position; or
- a case worker who has a high school diploma or has passed the general educational development (GED) test or the Test Assessing Secondary Completion (TASC™) and has earned a high school equivalency credential or has at least three (3) years’ experience in case management or a related supportive services position; or
- director of harm reduction services who may be a clinical social worker; possess a master of social work degree; be a licensed clinical or masters social worker; or has a bachelor’s degree and at least three (3) years’ experience in the provision of supportive services to women, children and families; substance users; mentally ill chemical abusing clients; homeless persons; adolescents; or parolees and other high-risk populations and
- a peer who has achieved Department-approved certification and is supervised by the director of harm reduction services.

Qualifications of Provider Organizations

Community-based organizations, including local health units, facilities licensed under Article 28 of New York State Public Health Law, and non-profit organizations that have been approved by the Commissioner of Health with a waiver to conduct a comprehensive harm reduction program, including syringe exchange.

Freedom of Choice – Access to Services

The State assures that the provision of harm reduction services will not restrict an individual’s free choice of providers in violation of section 1902(a)(23) of the Act.

1. Access to services will be limited to the authorized syringe exchange programs.
2. Eligible recipients will have free choice of the providers of harm reduction services within the specified geographic area identified in this Plan.
3. Eligible recipients will have free choice of the providers of other medical care under the Plan.
4. Eligible recipients who refuse harm reduction services will not be denied access to other services offered under the Plan.
5. Harm reduction program services will not be used to restrict an individual's access to other services under the Plan.
Harm reduction program services do not include the following:

- case management activities that are an integral component of another covered Medicaid service; and
- substance use disorder treatment services.

Harm reduction program services:

- must not be utilized to restrict the choice of services a recipient can obtain, including medical care or services from any provider participating in the Medical Assistance program that is qualified to provide such or who undertakes to provide such care or service(s) including an organization which provides such care or services or which arranges for the delivery of such care or services on a prepayment basis; and
- must not duplicate certain services currently provided under the Medical Assistance Program or other funding sources such as the Long Term Home Health Care program, AIDS Home Care program under 622 of the Laws of 1988, and the Care at Home Program (Katie Beckett Model Waivers).
“Off-site” services shall be provided to developmentally disabled persons whose therapeutic requirements are most effectively satisfied in an appropriate environment that is specific to the treatment needs of the developmentally disabled individual. Such services shall be provided by persons authorized pursuant to NYCRR Title 14 Part 679. “Off-site” services shall not be provided at the location of a clinic certified by NYCRR Title 14 Part 679.

“Early Intervention” Services are provided to children who have or who are suspected of having a developmental delay or disability. These services, limited to EPSDT, which are provided by or on behalf of a county or the City of New York pursuant to an Individualized Family Services Plan (IFSP) include:

1. Screening  
2. Evaluation  
3. Audiology  
4. Nursing  
5. Nutrition Services
6. Occupational Therapy  
7. Physical Therapy  
8. Psychological Services  
9. Social Work Services  
10. Anticipatory Guidance (Special Instruction and Allied Health Professional Assistance)
11. Speech Pathology Services  
12. Assistive Technology Services  
13. Vision Services  
14. Collateral contacts for all of the above services

TN #10-0018
Supersedes TN #06-0012
Approval Date November 1, 2017
Effective Date July 1, 2010
New York 3

12a. Prior authorization or dispensing validation is required for some prescription drugs. In addition, brand-name drugs that have a FDA approved, A-rated generic equivalent must be prior authorized unless exempted by the Commissioner of Health.

Drugs for which Medical Assistance reimbursement is available are limited to the following:

1. those non-prescription drugs contained on a list established by the New York State Commissioner of Health.
2. covered outpatient drugs of any manufacturer which has entered into and complies with an agreement under Sections 1902(a) (54) and 1927 (a) of the Act which are prescribed for a medically accepted indication.  (As provided by Section 1927 (d) (2) of the Act certain outpatient drugs may be excluded from coverage).

12b. Prior approval is required for all dentures.

12c. Prior approval is required for prosthetic and orthotic devices over a dollar amount established by the State Department of Health and identified for providers in the MMIS DME Provider Manual.

Prior approval is required for artificial eyes as specified in the MMIS Ophthalmic Provider Manual. Program also includes coverage of orthotic appliances including hearing aids. All hearing aids require prior approval.

12d. Prior approval is required for certain special lenses and unlisted eye services as specified for providers in the MMIS Ophthalmic Provider Manual.

13b. Screening Services (see 13.d Rehabilitative Services – Early Intervention).

13d. Rehabilitative Services

[(1) Directly Observed Therapy (DOT) – Clients must be assessed as medically appropriate for DOT based upon the client's risk of non-adherence to a medication regimen necessary to cure an active, infectious, potentially fatal disease process and to prevent the development and spread of an infectious, potentially fatal disease which may not respond to conventional therapies.]

Off-site services shall be provided to developmentally disabled persons whose therapeutic requirements are most effectively satisfied in an appropriate environment that is specific to the treatment needs of the developmentally disabled individual. Such services shall be provided by persons authorized pursuant to NYCRR Title 14 Part 679. “Off-site” services shall not be provided at the location of a clinic certified by NYCRR Title 14 Part 679. Coverage of “off-site” services shall end effective December 31, 2015.

[“Early Intervention” Services are provided to children who have or who are suspected of having a developmental delay or disability. These services, limited to EPSDT, which are provided by or on behalf of a county or the City of New York pursuant to an Individualized Family Services Plan (IFSP) include:

TN #18-0039 Approval Date June 13, 2019
Supersedes TN #10-0018 Effective Date July 1, 2018
[13d. Rehabilitative Services:

School Supportive Health Services

School Supportive Health Services are services provided by or through local school districts or the New York City Board of Education to children with, or suspected of having disabilities, who attend public or State Education Department approved private schools. These services, which are provided to children with special needs pursuant to an Individualized Education Program (IEP) and are limited to EPSDT, are:

1. Physical therapy services
2. Occupational therapy services
3. Speech pathology services
4. Audiological evaluations
5. Evaluations for all available services
6. Nursing Services
7. Psychological and social work services (psychological counseling)
8. Transportation see Supplement to Attachment 3.1.A, Item 24a
9. Medical evaluations (physician, physician assistant and nurse practitioner)

Preschool Supportive Health Services

Preschool Supportive Health Services are services provided by or through counties or the New York City Board of Education to children, with or suspected of having disabilities, who attend State Education Department approved preschools. These services, which are provided to children with special needs pursuant to an Individual Education Program (IEP) and are limited to EPSDT, are:

1. Physical therapy services
2. Occupational therapy services
3. Speech pathology services
4. Audiological evaluation
5. Evaluations for all available services
6. Nursing services
7. Psychological and social work services (psychological counseling)
8. Transportation see Supplement to Attachment 3.1.A, Item 24a
9. Medical evaluations (physician, physician assistant and nurse practitioner)
13.d (Cont’d) Rehabilitative services for residents of community-based residential programs licensed by the Office of Mental Health (OMH) are of three types:

1. Community residences of sixteen beds or less;
2. Family-based treatment and
3. Teaching family homes.

1. Community Residences

Rehabilitative services in community residences are interventions, therapies and activities which are medically therapeutic and remedial in nature, and are medically necessary for the maximum reduction of functional and adaptive behavior deficits associated with the person’s mental illness. Community residences for adults may be either a congregate-type arrangement or apartment-based. Community residence services are also provided to children.

Limitations on services include the following:

- All providers must be currently licensed by OMH as community residences under 14 NYCRR 586 and 594. Congregate locations have sixteen beds or less.
- Adults admitted must be determined to have a severe and persistent mental illness, as defined by the Commissioner of OMH.
- Children admitted must be determined to have a serious emotional disturbance, as defined by the Commissioner of OMH.
- Services are limited to those described in 14 NYCRR 593.
- All services must be provided pursuant to a physician’s written authorization and provided in accordance with an approved service plan, as described in 14 NYCRR 593.

2. Family-based treatment

Rehabilitative services in family-based treatment programs are intended to provide treatment to seriously emotionally disturbed children and youth to promote their successful functioning and integration into the natural family, community, school or independent living situations. Such services are provided in consideration of a child’s developmental stage. Those children determined eligible for admission are placed in surrogate family homes for care and treatment.

TN #94-27 Approval Date September 13, 1994
Supersedes TN #93-16 Effective Date April 1, 1994
New York
3b

Limitations on services include the following:

- All providers must be currently licensed by OMH as family-based treatment programs under 14 NYCRR 594.

- Children admitted must be determined to have a serious emotional disturbance, as defined by the Commissioner of OMH.

- Services are limited to those described in 14 NYCRR 593.

- All services must be provided pursuant to a physician’s written authorization and provided in accordance with an approved service plan, as described in 14 NYCRR 593.

3. Teaching Family Homes

Rehabilitative services in teaching family homes are intended to provide treatment to seriously emotionally disturbed children and youth to promote their successful functioning and integration into the natural family, community, school or independent living situations. Such services are provided in consideration of a child’s developmental stage. Eligible children are placed in small congregate care homes (4 children or less) in a supervised living arrangement with approved teaching parents, based on the National Teaching Family Model.

This program is different from family based treatment because some children are not able to tolerate the family closeness of family based treatment programs, and, therefore, are more appropriately treated in teaching family homes.

Limitations on services include the following:

- All providers must be currently licensed by OMH as teaching family homes under 14 NYCRR 594.

- Children admitted must be determined to have a serious emotional disturbance, as defined by the Commissioner of OMH.

- Services are limited to those described in 14 NYCRR 593.

- All services must be provided pursuant to a physician’s written authorization and provided in accordance with an approved service plan, as described in 14 NYCRR 593.
13.d. **Assertive Community Treatment (ACT)**

Assertive Community Treatment (ACT) programs will provide case management, treatment and rehabilitation to persons with a serious psychiatric disorder who exhibit a pattern of institutional utilization and/or are at risk of a severely dysfunctional lifestyle; present symptoms and impairments not effectively remedied by other available treatment; do not or cannot be engaged in treatment in other outpatient settings as a result of their mental illness; or cannot maintain consistency in treatment through other outpatient services.

Programs will be licensed under 14 NYCRR Part 508. Services will be provided primarily in the community. Services will be provided by a licensed multi-disciplinary team under the supervision of a psychiatrist which meets with the recipient or the recipient's significant others a minimum of six times per month. Of these six contacts, at least three of the contacts must be with the Medicaid recipient. Step down services may be provided to clients found by the team to be no longer in need of full ACT team services. A client who is receiving ACT step down must receive a minimum of two face to face contacts per month. Individuals shall be allowed to alternate between the full ACT team services and step-down services depending on the level of services needed to remain in the community.
13d. Rehabilitative Services
Personalized Recovery Oriented Services

[A comprehensive] Personalized Recovery Oriented Services (PROS) programs [will] provide Community Rehabilitation and Support, Intensive Rehabilitation and Ongoing Rehabilitation and Support services to individuals for whom such services have been recommended by a licensed practitioner of the healing arts (LPHA). PROS providers may, at their option and with approval from the Office of Mental Health, also provide Clinical Treatment Services to individuals enrolled in PROS for whom such services are determined to be necessary and appropriate by a physician or psychiatric nurse practitioner. [A “limited license” will be made available for free-standing Intensive Rehabilitation and Ongoing Rehabilitation and Support programs that are operated by a provider that does not have the capability to offer Community Rehabilitation and Support.

Community Rehabilitation and Support (CRS) is designed to engage and assist individuals in managing their mental illness and in restoring those skills and supports necessary to live successfully in the community. Intensive Rehabilitation (IR) is a customized package of rehabilitation and support services designed to intensely assist an individual in attaining specific life goals such as successful completion of school, attainment of stable and independent housing, and gainful employment.

Intensive Rehabilitation services may also be used to provide targeted interventions to reduce the risk of hospitalization, loss of housing, involvement in the criminal justice system, and to help individuals manage their symptoms. Ongoing Rehabilitation and Support (ORS) will provide interventions designed to assist in managing symptoms in an integrated workplace setting.

PROS programs will offer a comprehensive menu of services, customized for each client through development of an individualized recovery plan. Services provided by the CRS component of a PROS program will include but are not limited to: engagement; assessment; wellness self-management; basic living skills training; benefits and financial management; community living skills exploration; crisis intervention; individual recovery planning; information and education regarding self help; and structured skill development and support. Services provided by the IR component of a PROS program will include but are not limited to: family psychoeducation; intensive rehabilitation goal acquisition; clinical counseling and therapy; and intensive relapse prevention. Service provided in the IR component of a “limited license” PROS program will include, but is not limited to, intensive rehabilitation goal acquisition for employment and education-oriented goals. Services provided by the ORS component of a PROS program will include, but not limited to, vocational support services, defined as the ongoing provision of counseling, mentoring and advocacy services designed to sustain an individual’s role in integrated employment by providing supports which assist the individual in symptom management. PROS services will be provided both onsite and offsite, but ORS services will always be provided off-site in the community.

Programs may, at their option, provide clinical treatment services designed to stabilize ameliorate and control the disabling symptoms of mental illness. Programs that provide clinical treatment services will be reimbursed at a higher rate for the clinic component than programs which do not provide clinical treatment services.]
13d. Rehabilitative Services  
**Personalized Recovery Oriented Services - continued**

[The goal of the program is to provide integrated services, but clients can choose to receive service from different service components in more than one program. Clients enrolled in a PROS program which provides clinical treatment services will be given free choice as to whether they wish to receive clinical treatment through the PROS program, or receive those services from a clinic licensed under 14 NYCRR Part 587.]

Programs will be licensed and reimbursed under criteria set forth in 14 NYCRR Part 512. Staffing requirements will include differing staff to client ratios depending on the component of services the program offers.]

PROS provider agencies are licensed by the New York State Office of Mental Health to offer a comprehensive menu of services, customized for each individual through the development of an Individualized Recovery Plan.

PROS services are delivered in accordance with documented Individualized Recovery Plans which, at a minimum, must include a description of the individual's strengths, resources, including collaterals, and mental health-related barriers that interfere with functioning; a statement of the individual's recovery goals and program participation objectives; an individualized course of action to be taken, including the specific services to be provided, the expected frequency of service delivery, the expected duration of the course of service delivery, and the anticipated outcome; criteria to determine when goals and objectives have been met; a relapse prevention plan; and a description and goals of any linkage and coordination activities with other service providers.

For individuals receiving Intensive Rehabilitation, Ongoing Rehabilitation and Support or Clinical Treatment Services, the Individualized Recovery Plan shall identify the reasons why these services are needed, in addition to Community Rehabilitation and Support services, to achieve the individual's recovery goals.

PROS services provided to collaterals are provided solely for the benefit of Medicaid beneficiaries.

Individualized Recovery Plans must be approved by a Professional Staff member as well as the individual recipient. For individuals receiving Clinical Treatment Services, either a physician or a psychiatric nurse practitioner shall approve the Individualized Recovery Plan.
13d. **Rehabilitative Services**  
**Personalized Recovery Oriented Services (PROS) - continued**

**Practitioner qualifications:**

A PROS must employ a minimum of one full-time LPHA. LPHAs include:
- Nurse Practitioner;
- Physician;
- Physician Assistant;
- Psychiatric Nurse Practitioner;
- Psychiatrist;
- Psychologist;
- Registered Professional Nurse;
- Licensed Mental Health Counselor;
- Licensed Clinical Social Worker (LCSW);
- Licensed Master Social Worker, under the supervision of a LCSW, licensed psychologist, or psychiatrist employed by the agency;
- Licensed Creative Arts Therapist;
- Licensed Marriage and Family Therapist; and
- Licensed Psychoanalyst.

Each licensed PROS must have a minimum of 40% full-time equivalents of Professional Staff, including:

- **Creative Arts Therapist** - an individual who is currently licensed or permitted as a creative arts therapist by the New York State Education Department, or who has a master's degree in a mental health field from a program approved by the New York State Education Department and registration or certification by the American Art Therapy Association, American Dance Therapy Association, National Association of Music Therapy or American Association for Music Therapy;

- **Credentialed Alcoholism and Substance Abuse Counselor** - an individual who is currently credentialed by the New York State Office of Alcoholism and Substance Abuse Services in accordance with Part 853 of Title 14 of the NYCRR;

- **Marriage and Family Therapist** - an individual who is currently licensed or permitted as a marriage and family therapist by the New York State Education Department;

- **Mental Health Counselor** - an individual who is currently licensed or permitted or as a mental health counselor by the New York State Education Department;

- **Nurse Practitioner** - an individual who is currently certified or permitted to practice as a nurse practitioner by the New York State Education Department;

- **Nurse Practitioner in Psychiatry** - an individual who is currently certified as a nurse practitioner in psychiatry by the New York State Education Department. For purposes of this Attachment, nurse practitioner in psychiatry will have the same meaning as psychiatric nurse practitioner, as defined by the New York State Education Department;

**Supersedes TN NEW**  
**Effective Date 04/01/2016**
13d. Rehabilitative Services
PROS – continued

- **Occupational Therapist** - an individual who is currently licensed or permitted to practice as an occupational therapist by the New York State Education Department and who meets the qualifications set forth in 42 CFR § 440.110(b)(2);

- **Pastoral Counselor** - an individual who has a master's degree or equivalent in pastoral counseling or is registered as a Pastoral Care Specialist of the American Association of Pastoral Counselors;

- **Physician** - an individual who is currently licensed or permitted to practice as a physician by the New York State Education Department;

- **Physician Assistant** - an individual who is currently registered or permitted to practice as a physician assistant or a specialist's assistant by the New York State Education Department;

- **Psychiatrist** - an individual who is currently licensed or permitted to practice as a physician by the New York State Education Department and who is certified by, or eligible to be certified by, the American Board of Psychiatry and Neurology;

- **Psychoanalyst** - an individual who is currently licensed or permitted as a psychoanalyst by the New York State Education Department;

- **Psychologist** - an individual who is currently licensed or permitted as a psychologist by the New York State Education Department. Individuals with at least a master's degree in psychology who do not meet this definition may not be considered licensed practitioners of the healing arts, and may not be assigned supervisory responsibility. However, individuals who have obtained at least a master's degree in psychology may be considered professional staff for the purposes of calculating professional staff and full time equivalent professional staff;

- **Registered Professional Nurse** - an individual who is currently licensed or permitted to practice as a registered professional nurse by the New York State Education Department;

- **Rehabilitation Counselor** - an individual who has either a master's degree in rehabilitation counseling from a program approved by the New York State Education Department or current certification by the Commission on Rehabilitation Counselor Certification;
13d. **Rehabilitative Services**

**PROS – continued**

- **Social Worker** - an individual who is currently licensed or permitted as a master social worker (LMSW) or clinical social worker (LCSW) by the New York State Education Department. LMSWs must be supervised by a LCSW, licensed psychologist, or psychiatrist employed by the agency. Social workers who do not meet this criteria may not be considered licensed practitioners of the healing arts. However, social workers who have obtained at least a master's degree in social work from a program approved by the New York State Education Department may be considered professional staff for the purposes of calculating professional staff and full-time equivalent professional staff; and

- **Therapeutic Recreation Specialist** - an individual who has either a master's degree in therapeutic recreation from a program approved by the New York State Education Department or certification as a therapeutic recreation specialist by the National Council for Therapeutic Recreation Certification.

A PROS program licensed to provide Clinical Treatment Services must have a minimum of .125 FTE psychiatrist and .125 FTE registered professional nurse for every 40 individuals receiving clinical treatment services. Additional psychiatry staff must be added, as necessary, to meet the volume and clinical needs of participants receiving clinical treatment services.

**Minimum Qualifications for Paraprofessional Staff**

Paraprofessional Staff are PROS staff members who are not professional staff, as specified above. Paraprofessional Staff must possess a combination of educational and professional and/or personal experience in a mental health or human services setting. Paraprofessional Staff shall have attained at least 18 years of age, possess at least a High School diploma or GED, and demonstrate six (6) months professional and/or personal experience in a mental health or human services field.

**Paraprofessional Staff Training**

PROS programs shall ensure Paraprofessional Staff demonstrate competency in rehabilitation practices and PROS service components through formal and informal training practices, including job-shadowing of Professional Staff and experienced Paraprofessional Staff, as appropriate, based on the educational background and professional experience of the Paraprofessional Staff member.

**Required Supervisory Arrangements**

Initial service recommendations and Individualized Recovery Plans must be developed and documented under the supervision of Professional Staff. Professional Staff must provide direct supervision to Paraprofessional Staff in the delivery of service components identified herein. Professional Staff supervision must also be available at all times to address any issues related to quality of care in the provision of any PROS service components. Additionally, PROS Programs must demonstrate a formal plan for the provision of professional supervision of group-delivered services as a condition of program licensure.

**Effective Date 04/01/2016**
Community Rehabilitation and Support (CRS) Services
Community Rehabilitation and Support (CRS) services are an array of recovery-oriented assessment, psychosocial rehabilitation, counseling, family psychoeducation, and crisis intervention services designed to restore, rehabilitate and support individuals to regain skills and functionality lost due to mental illness, and manage the symptoms of their mental illness so that they may live successfully in the community.

Service Components:

- **Psychiatric Rehabilitation Assessment**
  With the active involvement of the individual, the Rehabilitation Assessment process involves a multi-disciplinary review of the individual’s strengths and barriers encountered as a result of his or her psychiatric condition and identifies life role goals to be addressed in the individual’s Individualized Recovery Plan.

  **Practitioner qualifications:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Alcohol, Tobacco and Other Drug Assessment**
  An assessment service designed to gather data concerning an individual’s substance-related history and current use and assess such data to determine the individual’s substance abuse status, the need for substance abuse services or referral.

  **Practitioner qualifications:** Professional Staff.

- **Basic Living Skills**
  A psychosocial rehabilitation service designed to improve an individual’s ability to perform the basic skills necessary to achieve maximum independence and acceptable community behaviors that are critical to his or her recovery. This service focuses on the reacquisition of capabilities and skills, and strategies for appropriate use of skills.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Benefits and Financial Management**
  A psychosocial rehabilitation services which assists individuals in reacquiring skills and capabilities that were lost as a result of the onset of mental illness and that are necessary to manage their own finances. This service is designed to support an individual’s functioning in the community through understanding, and skill in handling, his or her own financial resources.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.
13d. **Rehabilitative Services**

**PROS – continued**

- **Cognitive Remediation**
  A counseling service designed to improve and restore an individual's functioning by restoring the cognitive skill that is the target of the remediation task. Cognitive remediation is an optional PROS service, subject to prior review and written approval of the Office of Mental Health.

  **Practitioners:** Professional Staff who have had training approved by the Office of Mental Health.

- **Community Living Exploration**
  A psychosocial rehabilitation service designed to help an individual understand the demands of specific community life roles, in order to make decisions regarding participation and to overcome barriers to participate and perform in desired roles. This service also includes motivating individuals to explore and increase their knowledge of opportunities available in the community.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Crisis Intervention**
  A service designed to safely and respectfully de-escalate situations of acute distress or agitation which require immediate attention.

  **Practitioners:** Professional Staff.

- **Engagement in Recovery**
  A psychosocial rehabilitation service designed to motivate and support individuals receiving PROS to continue to participate in the rehabilitation and recovery process. This includes: fostering therapeutic relationships supportive of the individual's recovery, evaluating recovery goals, readiness, and overall satisfaction of life roles and the individual recovery plan.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Individualized Recovery Planning**
  A continuous, dynamic process that engages each person as an active partner in developing, reviewing and modifying a care plan that supports his or her progress towards recovery. The individualized recovery planning process also includes working with the individual in the development of a relapse prevention plan and advance directive, where appropriate.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

---

**TN #16-0041** Approval Date 11/22/2019

Supersedes TN NEW Effective Date 04/01/2016
13d. **Rehabilitative Services**

**PROS – continued**

- **Skill Building for Self-help**
  A psychosocial rehabilitation service designed to help individuals restore the skills necessary to identify and participate in or take advantage of appropriate self-help resources or mutual aid groups.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Pre-admission screening**
  A service including engaging, interviewing and evaluating an individual to determine whether the individual is appropriate for the program and identifying and addressing any unique circumstances and functional limitations which may impact the individual's ability and desire to receive PROS services.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Structured Skill Development and Support**
  A psychosocial rehabilitation service designed to assist individuals to regain the skills necessary for performing normative life roles associated with group membership, work, education, parenting, or living environments by modeling and practicing skills in actual community settings off-site or community environments replicated at the program site and through the use of structured activities.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Wellness Self-management**
  Psychosocial rehabilitation services designed to develop or improve personal coping strategies, prevent relapse, and promote recovery. Services may be provided to recipients and/or collaterals for the benefit of the recipient, and may include, but are not limited to coping skills training, disability education, dual disorder education, medication education and self-management, problem-solving skills training, and relapse prevention planning.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.
13d. Rehabilitative Services
PROS – continued

- **Clinical Treatment**
  If an individual attending a PROS that does not include Clinical Treatment services requires those services, the individual may receive Clinical Treatment services at an OMH licensed clinic or an independent practitioner. If the individual is not receiving Clinical Treatment services directly within the PROS, the PROS documents that the services provided by the OMH licensed clinic are integrated with those provided by the PROS.

  Clinical Treatment Services are designed to stabilize, ameliorate and control the disabling symptoms of mental illness. In order to be licensed to offer Clinical Treatment services within a PROS, the PROS staffing plan must meet minimum clinical treatment staffing requirements as described under the PROS practitioner requirements, the PROS staffing must include sufficient qualified staff to deliver clinical treatment services and additional space to perform services is required.

  Clinical Treatment services include:

- **Clinical Counseling and Therapy**
  A service designed to provide goal-oriented verbal counseling or therapy, including individual, group and family counseling or therapy, for the purpose of addressing the emotional, cognitive and behavioral symptoms of a mental health disorder or for engaging, motivating and stabilizing persons with a co-occurring mental health and substance abuse (including alcohol) disorder, and the related effects on role functioning.

  **Practitioners:** Licensed Practitioners of the Healing Arts, as defined in this section and Professional Staff under the supervision of a Licensed Practitioner of the Healing Arts, as defined in this section.

- **Health Assessment**
  A service designed to gather data concerning an individual's medical history and any current signs and symptoms, and assess such data to determine his or her physical health status and need for referral.

  **Practitioners:** Nurse practitioner, nurse practitioner in psychiatry, physician, physician's assistant, psychiatrist or registered professional nurse.

Attachment 3.1-A
Supplement

New York
3b-10

TN #16-0041 Approval Date 11/22/2019

Supersedes TN NEW Effective Date 04/01/2016
13d. **Rehabilitative Services**

**PROS – continued**

- **Medication Management**
  A service designed to prescribe or administer medication to treat the primary symptoms of an individual's psychiatric condition. This service is intended to include medication trials which are adequate in dose and duration, as well as assessments of the appropriateness of the individual's existing medication regimen through record reviews, ongoing monitoring, and consultation with the PROS participant and/or collateral. Medication management may include monitoring the side effects of prescribed medications including, but not limited to, extrapyramidal, cardiac and metabolic side effects, and may include providing individuals with information concerning the effects, benefits, risks and possible side effects of a proposed course of medication. The Medication itself is reimbursable under separate State Plan authority.

**Practitioners:** Psychiatrist and/or psychiatric nurse practitioner.

- **Psychiatric Assessment**
  A service designed to gather data concerning an individual's psychiatric history and current mental health symptoms, assess such data for determination of the individual's current mental health status, and identify the need for clinical treatment services.

**Practitioners:** Psychiatrist or psychiatric nurse practitioner.

- **Symptom Monitoring**
  A service designed to identify the ongoing effects of an individual's course of care. This service involves the continuous process of monitoring a recipient's symptoms of mental illness, as identified in his or her individualized recovery plan, and his or her response to treatment, within the context of other support and rehabilitation services.

**Practitioners:** Licensed Practitioners of the Healing Arts, as defined in this section and Professional or Paraprofessional Staff under the supervision of a Licensed Practitioners of the Healing Arts, as defined in this section.

- **Intensive Rehabilitation (IR)**
  Intensive Rehabilitation services include the following four psychosocial rehabilitation and counseling services which are designed to be delivered with greater frequency, in smaller group sizes or by specifically qualified staff. Individuals may require IR when they experience episodes of acute loss of functioning increasing their risk of hospitalization, loss of housing or involvement in the criminal justice system or heightened urgency and motivation to work towards a specific rehabilitation goal over a short period of time.

Supersedes TN  **NEW**  Effective Date  **04/01/2016**
13d. **Rehabilitative Services**

**PROS – continued**

**Service Components:**

- **Intensive Rehabilitation Goal Acquisition**
  A psychosocial rehabilitation service designed to assist an individual expressing heightened urgency and motivation to restore functionality and achieve a personally meaningful life role goal. This service may be delivered one-on-one and outside of normally scheduled group programming.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Intensive Relapse Prevention**
  A rehabilitation counseling service designed to address an exacerbation of acute symptoms or manage existing symptoms that have not been responsive to the current service formulation. This service may also include the execution of a series of predetermined steps identified in the relapse prevention plan. Individuals who are experiencing an exacerbation of symptoms that is interfering with their recovery process and that is not responding to the current plan of care are assisted in implementing their relapse prevention plan or in using other methods to either minimize their symptoms or permit the individual to continue to work towards their recovery notwithstanding their symptomatology.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Integrated Treatment for Dual Disorders**
  A rehabilitation counseling service based on evidence-based practices that include motivational, cognitive-behavioral and harm reduction techniques designed to restore functionality and promote recovery for persons with both mental health and substance use disorders. This specialty service is integrated as the focus is to overcome barriers/impairments caused by both mental health and substance use disorders.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff, who have completed a core set of “Focused Integrated Treatment” (FIT) training modules.
13d. **Rehabilitative Services**
PROS – continued

- **Family Psychoeducation/ Intensive Family Support**
  A psychosocial education service designed to provide information, clinical guidance and support to collateral(s) of individuals receiving PROS as well as the individual when desired and appropriate, for the purpose of assisting and enhancing the capacity of a collateral to reduce an individual’s symptomatology, restore functioning, and facilitate an individual’s overall recovery.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff, who have completed OMH approved training.

- **Ongoing Rehabilitation and Support**
  Ongoing Rehabilitation and Support (ORS) services are psychosocial rehabilitation services including rehabilitation counseling, social, coping, and basic living skills training services designed to assist an individual manage the disabling symptoms of mental illness in the workplace, develop strategies for resolving workplace issues, and maintain other functional skills necessary to sustain competitive employment. These services are customized to the individual and necessary to help the individual achieve a rehabilitation goal defined in his or her individualized recovery plan. ORS is provided to individuals who are working in integrated employment settings. ORS does not include educational, vocational or job training services.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.
Other Diagnostic, Screening, Preventive, and Rehabilitative Services - Rehabilitative Services
1905(a) (13)
42 CFR 440.130(d)

Item 4.b. EPSDT services - **Rehabilitative Services**: **42 CFR 440.130(d)**

The State provides coverage for this benefit as defined at 42 CFR 440.130(d) and as described in this section:

Provided as an Early and Periodic Screening, Diagnostic and Treatment service for individuals who are eligible under the plan and are under the age of 21 1902(a) (43), 1905(a) (4) (B) and 1905(r)).

**Rehabilitative Services Description**

The rehabilitative service (or services) described below is:

- Community Psychiatric Support and Treatment
- Psychosocial Rehabilitation
- Family Peer Support

**Assurances:**

The State assures that all rehabilitative services are provided to, or directed exclusively toward the treatment of, the Medicaid eligible individual in accordance with section 1902 (a) (10)(A)(i) of the Act.

The State assures that rehabilitative services do not include and FFP is not available for any of the following in accordance with section 1905(a) (13) of the Act.

A. educational, vocational and job training services;
B. room and board;
C. habilitation services;
D. services to inmates in public institutions as defined in 42 CFR §435.1010;
E. services to individuals residing in institutions for mental diseases as described in 42 CFR§435.1010;
F. recreational and social activities; and-
G. services that must be covered elsewhere in the state Medicaid plan.
Crisis Intervention (Continued):

Description (Continued):
not additional crisis response services are required to further evaluate, resolve, and/or stabilize the crisis. CI services are designed to interrupt and/or ameliorate the crisis experience and include an assessment that is culturally and linguistically sensitive and result in immediate crisis resolution and de-escalation, and development of a crisis plan. The goals of CI are engagement, symptom reduction, stabilization, and restoring individuals to a previous level of functioning or developing the coping mechanisms to minimize or prevent the crisis in the future. Family is a birth, foster, adoptive, or self-created unit of people residing together, with significant attachment to the individual, consisting of adult(s) and/or child (ren), with adult(s) performing duties of parenthood/caregiving for the child(ren) even if the individual is living outside of the home. The service is recommended by any of the following licensed practitioners of the healing arts operating within the scope of their practice of their State license, who may or may not be part of the crisis intervention team: Psychiatrist, Physician, Licensed Psychoanalyst, Registered Professional Nurse, Nurse Practitioner, Clinical Nurse Specialist, Licensed Clinical Social Worker (LCSW), Licensed Marriage and Family Therapist, Licensed Mental Health Counselor, or Licensed Psychologist. CI is a face-to-face intervention and can occur in a variety of settings including community locations where the beneficiary lives, works, attends school, engages in services (e.g. provider office sites), and/or socializes. CI includes engagement with the child, family/caregiver or other collateral sources (e.g., school personnel) that is culturally and linguistically sensitive, child centered, and family focused in addition to trauma informed to determine level of safety, risk, and to plan for the next level of services. All activities must occur within the context of a potential or actual behavioral health crisis with a desired outcome of diverting an emergency room visit and/or inpatient admission, when appropriate. Service is available with 24/7 availability and capacity to respond within one hour of call.

Practitioner qualifications: Services should be provided by a culturally competent, trauma-informed, and linguistically responsive multidisciplinary team (of at least two professionals unless noted below), for programmatic or safety purposes. One member of a two-person crisis intervention team must be a behavioral health professional and have experience with crisis intervention service delivery. If determined through triage only one team member is needed to respond to a psychiatric crisis, that team member must be a behavioral health professional and have experience with crisis intervention. If determined through triage only one team member is needed to respond to a substance use disorder (SUD) crisis, the team member may be a Credentialed Alcoholism and Substance Abuse Counselor (CASAC) and a licensed practitioner must be available via phone. A peer support specialist may not respond alone. Behavioral health professionals are practitioners possessing a license or a permit from the New York State Education Department who are qualified by credentials, training, and experience to provide direct services related to the treatment of mental illness. For Crisis Intervention, these behavioral health professionals include: Psychiatrist, Physician, Licensed Psychoanalyst, Licensed Clinical Social Worker (LCSW), Licensed Master Social Worker (LMSW), Licensed Mental Health Counselor, Licensed Psychologist, Licensed Marriage and Family Therapist, or Nurse Practitioner with experience/background treatment mental health and/or substance use disorders OR one practitioner from the above list and one practitioner from the following who is]
not considered a behavioral health professional: Certified alcoholism and substance abuse counselor, Credentialed family peer advocate with lived experience as a family member, Certified Recovery Peer Advocate-Family, Certified rehabilitation counselor, or a Registered Professional Nurse.

If one member of the crisis intervention team is a Peer support specialist, the Peer support provider must have a credential/certification as either:

1) An OMH established Family Peer Advocate credential, or
2) An OASAS established Certified Recovery Peer Advocate - Family.

**Family Peer Support will be delivered by a New York State Credentialed Family Peer Advocate (FPA). To be eligible for the FPA Credential, the individual must:**

- Demonstrate ‘lived experience’ as a parent or primary caregiver who has navigated multiple child serving systems on behalf of their child (ren) with social, emotional, developmental, health and/or behavioral healthcare needs.
- Have a high school diploma, high school equivalency preferred or a State Education Commencement Credential (e.g. SACC or CDOS). This educational requirement can be waived by the State if the person has demonstrated competencies and has relevant life experience sufficient for the peer certification.
- Completed Level One and Level Two of the Parent Empowerment Program Training for Family Peer Advocates training or approved comparable training.
- Submitted three letters of reference attesting to proficiency in and suitability for the role of a Family Peer Advocate (FPA) including one from the FPAs supervisor.
- Documented 1000 hours of experience providing Family Peer Support services.
- Agreed to practice according to the Family Peer Advocate Code of Ethics.
- Completed 20 hours of continuing education and renew their FPA credential every two years.

An FPA may obtain a provisional credential and complete all other requirements of the professional family peer advocate credential that will allow services they provide to be billed if the applicant has:

- Demonstrate ‘lived experience’ as a parent or primary caregiver who has navigated multiple child serving systems on behalf of their child(ren) with social, emotional, developmental, health and/or behavioral healthcare needs.

**TN**  #18-0053  
Supersedes TN  #17-0004  
**Approval Date**  December 17, 2018  
**Effective Date**  July 01, 2018
[13d. **Rehabilitative Services: EPSDT only (Continued)**

**Crisis Intervention (Continued):**

**Practitioner qualifications (Continued):**

An FPA may obtain a provisional credential if the applicant has (Continued)

- Have a high school diploma, high school equivalency preferred or a State Education Commencement Credential (e.g. SACC or CDOS). This educational requirement can be waived by the State if the person has demonstrated competencies and has relevant life experience sufficient for the peer credential.
- Completed Level One of the Parent Empowerment Program Training for Family Peer Advocates or approved comparable training.
- Submitted two letters of reference attesting to proficiency in and suitability for the role of a Family Peer Advocate (FPA).

An FPA with a provisional credential must complete all other requirements of the Professional Family Peer Advocate Credential within 18 months of commencing employment as an FPA OR Family Peer Support will be delivered by a Certified Recovery Peer Advocate (CRPA) with a Family Specialty.

**To be certified as CRPA-Family, the individual must be at least 18 years of age and have the following:**

- Have ‘lived experience’ as a family member impacted by youth substance use disorders. The CRPA – Family may be in recovery themselves.
- Have a high school diploma or a State Education Commencement Credential or General Equivalency Degree (GED).
- Completed a minimum of 46 hours of content specific training, covering the topics: advocacy, mentoring/education, recovery/wellness support, medication assisted treatment and ethical responsibility.
- Documented 1,000 hours of related work experience, or document at least 500 hours of related work experience if they: have a bachelor’s degree; are credentialed by OASAS as a CASAC, CASAC Trainee, or Prevention Professional; or completed the 30-Hour Recovery Coach Academy training.
- Provided evidence of at least 25 hours of supervision specific to the performance domains of advocacy, mentoring/education, recovery/wellness support, and ethical responsibility. Supervision must be provided by an organization documented and qualified to provide supervision per job description.
- Passed the NYCB/IC & RC Peer Advocate Exam or other exam by an OASAS designated certifying body.
- Submitted two letters of recommendation.
- Demonstrated a minimum of 16 hours in the area of Family Support.
- Completed 20 hours of continuing education earned every two years, including six hours of Ethics.]
Reserved

[13d. Rehabilitative Services: EPSDT only (Continued):
  Crisis Intervention (Continued):
  Practitioner qualifications (Continued):

Certified Recovery Peer Advocate with a Family Specialty as defined in the NYS OASAS: An individual who is supervised by a credentialed or licensed clinical staff member to provide outreach and peer support services based on clinical need as identified in the patient’s treatment/recovery plan.

Crisis Intervention Team Training: All members of the Crisis Intervention team are required to have training in first aid, CPR, Mandated Reporting, Crisis De-escalation, Resolution and Debriefing, Suicide Prevention (e.g. SAFETALK), and crisis plan development.

Supervisor Qualifications: The supervisor is a competent mental health professional and must provide regularly scheduled supervision for all team members including peers. The supervisor must have the qualifications of at least a Licensed Clinical Social Worker (LCSW), Licensed Mental Health Counselor, Licensed Creative Arts Therapist, Licensed Marriage and Family Therapists, Licensed Psychoanalyst, Licensed Psychologist, Physician’s Assistant, Psychiatrist, Physician, Registered Professional Nurse, or Nurse Practitioner operating within the scope of their practice, with at least 2-3 years of work experience. The supervisor must practice within the State health practice laws and ensure that providers are supervised as required under state law. For example, if a psychiatric nurse practitioner is on the team with fewer than 3,600 hours of experience, a psychiatrist must be on the team and supervise him/her. Supervisors must also be aware of and sensitive to trauma informed care and the cultural needs of the population of focus and how to best meet those needs, and be capable of training staff regarding these issues.

Provider Agency Qualifications: CI practitioners must work within agencies that possess a current license to provide crisis and/or crisis treatment services or any child serving agency or agency with children’s behavioral health and health experience that is licensed, certified, designated and/or approved by OMH, OASAS, OCFS or DOH or its designee to provide comparable and appropriate crisis services referenced in the definition.]
Mental Health and Substance Abuse Services Assessment:
Description: Assessment of risk and mental status and the need for further evaluation and/or other health/behavioral health services.

Practitioner qualifications: Assessments may be provided by any member of a culturally competent, trauma-informed, and linguistically responsive multidisciplinary crisis intervention team except for a peer including: Psychiatrist, Physician, Licensed Psychoanalyst, Licensed Clinical Social Worker (LCSW), Licensed Master Social Worker (LMSW), Licensed Mental Health Counselor, Licensed Psychologist, Licensed Marriage and Family Therapist, Nurse Practitioner with experience/background in treatment mental health and/or substance use, Certified alcoholism and substance abuse counselor, Certified rehabilitation counselor, or a Registered Professional Nurse.

Service Planning:
Description: Development of a safety plan, which addresses the immediate circumstances and the prevention of future crises, and signing of appropriate releases.

Practitioner qualifications: Service Planning may be provided by any member of a culturally competent, trauma-informed, and linguistically responsive multidisciplinary crisis intervention team except for a peer including: Psychiatrist, Physician, Licensed Psychoanalyst, Licensed Clinical Social Worker (LCSW), Licensed Master Social Worker (LMSW), Licensed Mental Health Counselor, Licensed Psychologist, Licensed Marriage and Family Therapist, Nurse Practitioner with experience/background in treatment mental health and/or substance use, Certified alcoholism and substance abuse counselor, Certified rehabilitation counselor, or a Registered Professional Nurse.

Individual Counseling/Therapy
Describe: Crisis resolution and debriefing with the identified Medicaid eligible child, the child’s family/caregiver and treatment provider.

Practitioner qualifications: Individual Counseling/Therapy may be provided by any member of a culturally competent, trauma-informed, and linguistically responsive multidisciplinary crisis intervention team including: Psychiatrist, Physician, Licensed Psychoanalyst, Licensed Clinical Social Worker (LCSW), Licensed Master Social Worker (LMSW), Licensed Mental Health Counselor, Licensed Psychologist, Licensed Marriage and Family Therapist, Nurse Practitioner with experience/background in treatment mental health and/or substance use, Certified alcoholism and substance abuse counselor, Credentialed family peer advocate with lived experience as a family member, Certified Recovery Peer Advocate-Family, Certified rehabilitation counselor, or a Registered Professional Nurse.]
[13d. Rehabilitative Services: EPSDT only (Continued)
Crisis Intervention (Continued)

Family Counseling/Therapy

**Describe:** Crisis resolution and debriefing with the child’s family/caregiver and the treatment provider.

**Practitioner qualifications:** Family Counseling/Therapy may be provided by any member of a culturally competent, trauma-informed, and linguistically responsive multidisciplinary crisis intervention team including: Psychiatrist, Physician, Licensed Psychoanalyst, Licensed Clinical Social Worker (LCSW), Licensed Master Social Worker (LMSW), Licensed Mental Health Counselor, Licensed Psychologist, Licensed Marriage and Family Therapist, Nurse Practitioner with experience/background treatment mental health and/or substance use, Certified alcoholism and substance abuse counselor, Credentialed family peer advocate with lived experience as a family member, Certified Recovery Peer Advocate-Family, Certified rehabilitation counselor, or a Registered Professional Nurse.

Care Coordination:

**Description:** Care coordination includes:
1) Consultation with a physician or other licensed practitioner of the healing arts to assist with the child’s specific crisis and planning for future service access.
2.) It is the expectation that there will be documented follow-up.
3.) Follow-up with the child and family/caregiver within 24 hours of initial contact/response, including informing existing supports/providers of the developed crisis plan. The entity that the child is referred to conducts an evaluation/assessment for additional longer term services.

**Practitioner qualifications:** Care Coordination may be provided by any member of a culturally competent, trauma-informed, and linguistically responsive multidisciplinary crisis intervention team except for a peer including: Psychiatrist, Physician, Licensed Psychoanalyst, Licensed Clinical Social Worker (LCSW), Licensed Master Social Worker (LMSW), Licensed Mental Health Counselor, Licensed Psychologist, Licensed Marriage and Family Therapist, Nurse Practitioner with experience/background treatment mental health and/or substance use, Certified alcoholism and substance abuse counselor, Credentialed family peer advocate with lived experience as a family member, Certified Recovery Peer Advocate-Family, Certified rehabilitation counselor, or a Registered Professional Nurse.

Peer/Family Peer Support:

**Describe:** Crisis resolution with the identified Medicaid eligible child, the child’s family/caregiver and the treatment provider.

**Practitioner qualifications:** Family Peer Support will be delivered by a New York State Credentialed Family Peer Advocate (FPA) or a Certified Recovery Peer Advocate-Family as defined above in this section.]
**Program Name:** Community Psychiatric Support and Treatment (CPST)

**Description:** Community Psychiatric Support and Treatment (CPST) services are goal-directed supports and solution-focused interventions intended to address challenges associated with a behavioral health need and to achieve identified goals or objectives as set forth in the child’s treatment plan. This includes the implementation of interventions using evidence-based techniques, drawn from cognitive-behavioral therapy and/or other evidence-based psychotherapeutic interventions approved by New York State. CPST is a face-to-face intervention with the child, family/caregiver or other collateral supports. This service is recommended by any of the following licensed practitioners of the healing arts operating within the scope of their practice under State license: Licensed Master Social Worker (LMSW), Licensed Clinical Social Worker (LCSW), Licensed Mental Health Counselor, Licensed Creative Arts Therapist, Licensed Marriage and Family Counselor, Licensed Psychoanalyst, Licensed Psychologist, Physician’s Assistant, Psychiatrist, Physician, Registered Professional Nurse, or Nurse Practitioner. CPST is designed to provide community-based services to children and families who may have difficulty engaging in formal office settings, but can benefit from community based rehabilitative services. CPST allows for delivery of services within a variety of permissible settings including community locations where the child lives, works, attends school, engages in services (e.g. provider office sites), and/or socializes. Family is a birth, foster, adoptive or self-created unit of people residing together, with significant attachment to the individual, consisting of adult(s) and/or child (ren), with adult(s) performing duties of parenthood/caregiving for the child (ren) even if the individual is living outside of the home. CPST face-to-face interventions may include other collateral supports beyond the individual or family/caregiver, as necessary.

**Practitioner qualifications:** CPST may be provided by an individual who has at least a bachelor's degree level with a minimum of two years of applicable experience in children's mental health, addiction, and/or foster care/child welfare/ juvenile justice. These practitioners may include: Registered Professional Nurses with one year of behavioral health experience, Licensed Occupational Therapists, and Licensed Creative Arts Therapists to the extent they are operating under the scope of their license.

Practitioners with a bachelor's degree may only perform the following activities under CPST: Family and Group Counseling/Therapy (Rehabilitative psychoeducation), Service Planning (Strengths-based treatment planning), or the Rehabilitative Supports portion of Individual and Group Counseling/Therapy.

Practitioners with at least a bachelor's degree level, certified in an Evidenced Based Practice consistent with the CPST component being delivered, and designated by the State OR a master's degree level in social work, psychology, or in related human services plus one year of applicable experience OR who has been certified in an Evidenced Based Practice may perform any of the activities under CPST listed above without any exclusions.

The interventions and skill building identified by the CPST practitioner and family may be implemented by the child and family with the assistance of a peer (under Peer Supports Services), Psychosocial Rehabilitation practitioner (under Psychosocial Rehabilitation Services) or the CPST practitioner, if necessary.
13d. **Rehabilitative Services: EPSDT only (Continued)**

**Community Psychiatric Support and Treatment (CPST) Description (Continued)**

**Practitioner Qualifications (Continued)**

**Supervisor Qualifications:** Individuals providing services under CPST must receive regularly scheduled supervision from a professional meeting the qualifications of at least a Licensed Clinical Social Worker (LCSW), Licensed Mental Health Counselor, Licensed Creative Arts Therapist, Licensed Marriage and Family Therapists, Licensed Psychoanalyst, Licensed Psychologist, Physician’s Assistant, Psychiatrist, Physician, Registered Professional Nurse, or Nurse Practitioner operating within the scope of their practice, with at least 2-3 years of work experience. Supervisors must also be aware of and sensitive to trauma informed care and the cultural needs of the population of focus and how to best meet those needs, and be capable of training staff regarding these issues.

**Provider Agency Qualifications:** Any child serving agency or agency with children’s behavioral health and health experience that is licensed, certified, designated and/or approved by OCFS, OMH, OASAS or DOH or its designee, to provide comparable services referenced in the definition.

The provider agency will assess the child prior to developing a treatment plan for the child. Authorization of the treatment plan is required by the DOH or its designee. Treatment services must be part of a treatment plan including goals and activities necessary to correct or ameliorate conditions discovered during the initial assessment visits. CPST service delivery may also include collateral contact. Evidence-based practices (EBPs) require approval, designations, and fidelity reviews on an ongoing basis as determined necessary by New York State.

**Service Planning (Strengths-based treatment planning):**

**Description:** Strengths-based treatment planning - Facilitate participation in and utilization of strengths-based planning for Medicaid services and treatments related to child’s behavioral health/health needs which include assisting the child and family members, caregiver or other collateral supports with identifying strengths and needs, resources, natural supports, within the context of the client’s culture and developing goals and objectives to utilize personal strengths, resources, and natural supports to address functional deficits associated with their behavioral health disorder.

**Practitioner Qualifications:** Strengths-based treatment planning may be provided by an individual who has at least a bachelor’s degree level with a minimum of two years of applicable experience in children’s mental health, addiction, and/or foster care/child welfare/juvenile justice OR At least a bachelor’s degree level, certified in an Evidenced Based Practice consistent with the CPST component being delivered, and designated by the State OR A master's degree level in social work, psychology, or in related human services plus one year of applicable experience OR who has been certified in an Evidenced Based Practice.
13d. Rehabilitative Services: EPSDT only (Continued)
Program Name: Community Psychiatric Support and Treatment (CPST) (Continued):

Individual Counseling/Therapy (Intensive Interventions):
Description: Intensive Interventions - Provide individual supportive treatment and counseling; solution-focused interventions consistent with cognitive behavior therapy and psycho-educational therapy; harm reduction; emotional, cognitive and behavioral management; and problem behavior analysis with the child and family/caregiver, with the goal of assisting the child with social, interpersonal, self-care, daily functioning, and independent living skills to restore stability, to support functional gains and to adapt to community living. This includes the implementation of interventions using evidence-based techniques, drawn from cognitive-behavioral therapy and/or other evidence based psychotherapeutic interventions with prior authorization from NYS that ameliorate targeted symptoms and/or recover the person's capacity to cope with or prevent symptom manifestation.

Individual Counseling/Therapy (Crisis Avoidance):
Description: Crisis Avoidance - Assist the child and family/caregiver with effectively responding to or preventing identified precursors or triggers that would risk their ability to remain in a natural community location, including assisting the child and family members, caregivers or other collateral supports with identifying a potential psychiatric or personal crisis; practicing de-escalation skills; developing a crisis management plan; assessing the step-by-step plan before a crisis occurs; developing strategies to take medication regularly; and seeking other supports to restore stability and functioning.

Individual Counseling/Therapy (Rehabilitative Supports):
Description: Rehabilitative Supports - Restoration, rehabilitation, and support to minimize the negative effects of behavioral health symptoms or emotional disturbances that interfere with the individual's daily functioning. Counseling helps restore life safety skills such as ability to access emergency services, basic safety practices and evacuation, physical and behavioral health care (maintenance, scheduling physicians appointments) recognizing when to contact a physician, self-administration of medication for physical and mental health or substance use disorder conditions, understanding purpose and possible side effects of medication prescribed for conditions, other common prescription and non-prescription drugs and drug uses. Group face-to-face counseling may occur in rehabilitative supports.

Practitioner qualifications:
Rehabilitative Supports components of Individual Counseling/Therapy may be provided by an individual who has at least a bachelor's degree level with a minimum of two years of applicable experience in children's mental health, addiction, and/or foster care/child welfare/ juvenile justice OR At least a bachelor's degree level, certified in an Evidenced Based Practice consistent with the CPST component being delivered, and designated by the State OR a master's degree level in social work, psychology, or in related human services plus one year of applicable experience OR who has been certified in an Evidenced Based Practice.
13d. **Rehabilitative Services: EPSDT only (Continued)**

**Community Psychiatric Support and Treatment (CPST) (Continued):**

**CPST Components (Continued):**

**Individual, family and Group Counseling/Therapy (Rehabilitative Supports) (Continued):**

**Practitioner Qualifications (Continued):**

Intensive Interventions and Crisis avoidance may only be performed by practitioners who have at least a bachelor’s degree level, certified in an Evidenced Based Practice consistent with the CPST component being delivered, and designated by the State OR a master’s degree level in social work, psychology, or in related human services plus one year of applicable experience OR who has been certified in an Evidenced Based Practice.

**Family and Group Counseling/Therapy (Rehabilitative psychoeducation):**

**Description:** Rehabilitative psychoeducation - Assist the child and family members, caregivers or other collateral supports to identify appropriate strategies or treatment options for the child’s behavioral health needs, with the goal of minimizing the negative effects of mental illness symptoms or emotional disturbances, substance use or associated behavioral health stressors that interfere with the child’s life.

**Practitioner qualifications:** Rehabilitative psychoeducation may be provided by an individual who has at least a bachelor’s degree level with a minimum of two years of applicable experience in children’s mental health, addiction, and/or foster care/child welfare/juvenile justice OR At least a bachelor’s degree level, certified in an Evidenced Based Practice consistent with the CPST component being delivered, and designated by the State OR a master’s degree level in social work, psychology, or in related human services plus one year of applicable experience OR who has been certified in an Evidenced Based Practice.

**Family and Group Counseling/Therapy (Rehabilitative supports in the community):**

**Description:** Rehabilitative supports in the community - Provide restoration, rehabilitation, and support to the child and family members, caregivers or other collateral supports to develop skills necessary to meet the child’s goals and to sustain the identified community goals.

**Practitioner qualifications:** Rehabilitative supports in the community may be provided by an individual with at least a bachelor’s degree level, certified in an Evidenced Based Practice consistent with the CPST component being delivered, and designated by the State OR a master’s degree level in social work, psychology, or in related human services plus one year of applicable experience OR who has been certified in an Evidenced Based Practice.
13d. **Rehabilitative Services: EPSDT only (Continued)**

**Community Psychiatric Support and Treatment (CPST) (Continued):**

**CPST Components (Continued):**

**Crisis Intervention (Intermediate term crisis management):**

**Description:** Intermediate term crisis management - Provide intermediate-term crisis management to the child and family following a crisis (beyond 72 hour period) as stated in the crisis management plan. The purpose of this activity is to stabilize the child/youth in the home and natural environment. Goal setting is focused upon the issues identified from crisis intervention, emergency room crisis and other referral. The service is intended to be stability focused and for existing clients of CPST services or for children needing longer term crisis managements services.

**Practitioner qualifications:** Intermediate term crisis management may be provided by an individual who has at least a bachelor's degree level, certified in an Evidenced Based Practice consistent with the CPST component being delivered, and designated by the State OR a master's degree level in social work, psychology, or in related human services plus one year of applicable experience OR who has been certified in an Evidenced Based Practice.

**Rehabilitative Services: EPSDT only**

**Program Name: Psychosocial Rehabilitation**

**Description:** Psychosocial Rehabilitation Services (PSR) are designed for children and their families to assist with implementing interventions outlined on a treatment plan to compensate for or eliminate functional deficits and interpersonal and/or behavioral health barriers associated with a child/youth’s behavioral health needs. The intent of PSR is to restore, rehabilitate, and support a child/youth’s functional level as possible and as necessary for integration of the child/youth as an active and productive member of their community and family with minimal ongoing professional intervention. PSR can occur in a variety of settings including community locations where the child/youth lives, works, attends school, engages in services (e.g. provider office sites), and/or socializes. Family is a birth, foster, adoptive, or self-created unit of people residing together, with significant attachment to the individual, consisting of adult(s) and/or child(ren), with adult(s) performing duties of parenthood/caregiving for the child(ren) even if the individual is living outside of the home.

Activities included must be intended to achieve the identified goals or objectives as set forth in the child/youth individualized treatment plan. PSR is an individual or group face-to-face intervention and may include collateral contact. PSR is recommended by any of the following licensed practitioners of the healing arts operating within the scope of their practice under State license: Licensed Master Social Worker (LMSW), Licensed Clinical Social Worker (LCSW), Licensed Mental Health Counselor, Licensed Creative Arts Therapist, Licensed Marriage and Family Therapist, Licensed Psychoanalyst, Licensed Psychologist, Physician's Assistant, Psychiatrist, Physician, Registered Professional Nurse, or Nurse Practitioner.
13d. **Rehabilitative Services: EPSDT only (Continued)**  
*Psychosocial Rehabilitation (Continued)*

**Description (Continued):**

The professional uses partnerships and mutual support, as well as hands-on implementation of rehabilitation interventions to improve personal independence and autonomy including:

1) **Restoration, rehabilitation and support to reduce the effect of the child’s behavioral health diagnosis and re-establish social and interpersonal skills to increase community tenure, enhance personal relationships, establish support networks, increase community awareness, develop coping strategies and effective functioning in the individual’s social environment, including home, work and school. This includes learning to confidently manage stress, unexpected daily events and disruptions, and behavioral health and physical health symptoms. It also includes support to establish and maintain friendships/supportive social networks, improve interpersonal skills such as social etiquette and anger management.**

2) **Restoration, rehabilitation and support to reduce the effect of the child’s diagnosis and reestablish daily functioning skills to improve self-management of the negative effects of psychiatric or emotional symptoms that interfere with a person’s daily functioning. This includes supporting the individual with implementation of interventions to re-establish daily functioning skills and daily routines necessary to remain in home, school, work and community, including managing medications and learning self-care. It also includes development of constructive and comfortable interactions with healthcare professionals, develop relapse prevention strategies, and re-establishing good health routines and practices.**

3) **Restoration, rehabilitation and support to reduce the effect of the child’s diagnosis and re-establish social skills so that the person can remain in a natural community location and re-achieve developmentally appropriate functioning including using collaboration, partnerships and mutual supports to strengthen the individuals community integration in areas of personal interests as well as other domains of community life including home, work and school. This includes assisting the individual with generalizing coping strategies and social and interpersonal skills in community settings. The professional may assist the individual with effectively responding to or avoiding identified precursors or triggers that result in functional impairments.**

**Practitioner Qualifications:**  Must be 18 years old and have a high school diploma, high school equivalency preferred, or a State Education Commencement Credential (e.g. SACC or CDOS); with a minimum of three years’ experience in children’s mental health, addiction and/or foster care.
13d. **Rehabilitative Services: EPSDT only (Continued)**

**Psychosocial Rehabilitation (Continued):**

**Description (Continued):**

**Supervisor Qualifications:**
The PSR provider must receive regularly scheduled supervision from a Licensed Clinical Social Worker (LCSW), Licensed Mental Health Counselor, Licensed Creative Arts Therapist, Licensed Marriage and Family Therapist, Licensed Psychoanalyst, Licensed Psychologist, Physician’s Assistant, Psychiatrist, Physician, Registered Professional Nurse, or Nurse Practitioner operating within the scope of their practice. Supervisors must also be aware of and sensitive to trauma informed care and the cultural needs of the population of focus and how to best meet those needs, and be capable of training staff regarding these issues.

**Provider Agency qualifications:** Any child serving agency or agency with children’s behavioral health and health experience that is licensed, certified, designated and/or approved by OCFS, OMH, OASAS OR DOH or its designee, to provide comparable services referenced in the definition. The caseload size must be based on the needs of the child/youth and families with an emphasis on successful outcomes and individual satisfaction and must meet the needs identified in the individual treatment plan.

The provider agency will assess the child prior to developing a treatment plan for the child. A licensed CPST practitioner or OLP must develop the treatment plan, with the PSR worker implementing the interventions identified on the services/plan. Group should not exceed more than 8 members. Authorization of the treatment plan is required by the DOH or its designee. Treatment services must be part of a treatment plan including goals and activities necessary to correct or ameliorate conditions discovered during the initial assessment visits.
Youth Peer Support and Training is recommended by any following licensed practitioners of the healing arts operating within the scope of their practice under State license: a Licensed Master Social Worker (LMSW), Licensed Clinical Social Worker (LCSW), Licensed Mental Health Counselor, Licensed Creative Arts Therapist, Licensed Marriage and Family Therapist, Licensed Psychoanalyst, Licensed Psychologist, Physician’s Assistant, Psychiatrist, Physician, Registered Professional Nurse, Nurse Practitioner, operating within the scope of their practice with the youth, family/caregiver or other collateral supports. Activities may include: Restoration, rehabilitation, and support to develop skills for coping with and managing psychiatric symptoms, trauma and substance use disorders; promote skills for wellness and recovery support; develop skills to independently navigate the service systems; develop skills to set goals; and build community living skills. To enhance resiliency/recovery-oriented attitudes such as hope, confidence and self-efficacy; Self-Advocacy & Empowerment skill building to develop, link to and facilitate the use of formal and informal resources, including connection to peer support groups in the community; serve as an advocate, mentor or facilitator for resolution of issues; and, assist in navigating the service system including assisting with engagement and bridging during transitions in care.

**Practitioner qualifications:**

YPST is delivered by a New York State Credentialed Youth Peer Advocate. To be eligible for the Youth Peer Advocate Professional Credential, an individual must:

- Be an individual 18 to 30 years who has self-identified as a person who has first-hand experience with social, emotional, medical, developmental, substance use, and/or behavioral challenges.
- Have a high school diploma, high school equivalency preferred or a State Education Commencement Credential (e.g. SACC or CDOS). This educational requirement can be waived by the credentialing agency if the person has demonstrated competencies and has relevant life experience sufficient for the youth peer-credential.
- Completed Level One (online) and Level Two (online and in person) training of the Youth Peer Support Services Advisory Council recommended and State approved training for YPAs followed by a minimum of three consultation calls.
- Submitted three letters of reference attesting to proficiency in and suitability for the role of a YPA including one from YPAs supervisor.
- Agree to practice according to the Youth Peer Advocate Code of Ethics.
- Documented 600 hours of experience providing Youth Peer Support services.
- Completed 20 hours of continuing education every 2 years.
- Demonstrates qualities of leadership, including: Knowledge of advocacy and group development and/or facilitation of peer-to-peer groups or activities.
- Is able to use lived experience with a disability, mental illness, juvenile justice, special education, substance use disorder, and/or foster care to assist in supporting youth in their resiliency/recovery and wellness.
- Be supervised by a credentialed YPA OR a credentialed Family Peer Advocate, both with four years direct service experience OR an individual who meets the criteria for a "qualified mental health staff person" found in 14 NYCRR 594 or 14 NYCRR 595.

**TN #18-0053**

[13d.  Rehabilitative Services: EPSDT only (Continued)
Youth Peer Support and Training (Continued):
Practitioner qualifications (Continued):

A YPA may obtain a provisional credential that will allow services they provide to be billed if the applicant:

- Is an individual 18 to 30 years who has self-identified as a person who has first-hand experience with social, emotional, medical, developmental, substance use, and/or behavioral challenges.
- Has a high school diploma, high school equivalency preferred or a State Education Commencement Credential (e.g. SACC or CDOS). This educational credential can be waived by the certifying agency if the person has demonstrated competencies and has relevant life experience sufficient for the peer certification.
- Has completed Level One of the Youth Peer Support Services Advisory Council recommended and State approved training for YPAs.
- Demonstrates qualities of leadership, including: Knowledge of advocacy and group development and/or facilitation of peer-to-peer groups or activities.
- Is able to use lived experience with a mental illness, juvenile justice, special education, substance use disorder, and/or foster care to assist in supporting youth in their resiliency/recovery and wellness.
- Submits two letters of reference attesting to proficiency in and suitability for the role of an YPA.
- Be supervised by a credentialed YPA OR a credentialed FPA, both with four years direct service experience OR an individual who meets the criteria for a “qualified mental health staff person” found in 14 NYCRR 594 or 14 NYCRR 595. Refer to Supervisor Qualifications for specificity.
- Agreed to practice according to the YPA Code of Ethics.

A YPA with a provisional credential must complete all other requirements of the professional credential within 18 months of employment as an YPA OR a Certified Recovery Peer Advocate - Youth who is an individual 18 to 30 years of age and has:

- Lived experience defined as having been impacted or affected by substance use disorders and/or be in recovery from substance use disorders.
- Has a high school diploma, high school equivalency preferred or a State Education Commencement Credential (e.g. SACC or CDOS).
- Completed a minimum of 46 hours content specific training, covering topics of advocacy, mentoring/education, recovery/wellness support and ethical responsibility.
- Documented 1,000 hours of relative work experience or document at least 500 hours of related work experience if they:
  - Have a Bachelor’s Degree, is certified by OASAS as a CASAC or CASAC trainee or Prevention Professional or completed the 30 hour Recovery Coach Academy training.]
[13d. Rehabilitative Services: EPSDT only (Continued):
Youth Peer Support and Training (Continued):

A YPA with a provisional credential must complete all other requirements of the professional credential within 18 months of employment as an YPA OR a Certified Recovery Peer Advocate - Youth who is an individual 18 to 30 years of age and has:

(Continued)

• Provided evidence of at least 25 hours of supervision specific to the performance domains of advocacy, mentoring/education, recovery/wellness and ethical responsibility. Supervision must be provided by an organization documented and qualified to provide supervision per job description.
• Passed the NYCB/IC & RC Peer Advocate exam or other exam by an OASAS designated certifying body.
• Submitted two letters of recommendations.
• Demonstrated a minimum of 16 hours specifically related to Youth Peer Support.
• Completed 20 hours of continuing education earned every two years, including 6 hours of ethics.

Supervisor Qualifications: YPAs will be supervised by:
1) A credentialed YPA with four years of direct YPST service experience with access to clinical consultation as needed. The clinical supervision may be provided by a staff member or through a contract with another organization OR
2) A credentialed FPA with 4 years of experience providing FPSS that has been trained in YPST services and the role of the YPAs and efforts are made as the YPST service gains maturity in NYS to transition to supervision by an experienced credentialed YPAs within the organization.
3) A qualified “mental health staff person” found in 14 NYCRR 594 or 14 NYCRR 595 that has training in YPST services and the role of YPAs and efforts are made as the YPST service gains maturity in NYS to transition to supervision by an experienced credentialed YPA within the organization.

Additional Supervisor Qualifications:
• The individual providing consultation, guidance, mentoring, and on-going training need not be employed by the same agency.
• Supervision of these activities may be delivered in person or by distance communication methods.
• It is required that one hour of supervision be delivered for every 40 hours of Peer Support and Training duties performed.
• There may be an administrative supervisor who signs the youth peer specialist’s timesheet and is the primary contact on other related human resource management issues.
• Supervisors must also be aware of and sensitive to the cultural needs of the population of focus and how to best meet those needs, and be capable of training staff regarding these issues.]

Youth Peer Support and Training (Continued):

Provider Agency Qualifications: Any child serving agency or agency with children’s behavioral health and health experience that is licensed, certified, designated and/or approved by OCFS, OMH, OASAS OR DOH or its designee, to provide comparable services referenced in the definition.

The provider agency will assess the child prior to developing a treatment plan for the child. Authorization of the treatment plan is required by the DOH or its designee. Treatment services must be part of a treatment plan including goals and activities necessary to correct or ameliorate conditions discovered during the initial assessment visits. Group should not exceed more than 8 members. Medicaid family support programs will not reimburse for the following:

- 12-step programs run by peers.
- General outreach and education including participation in health fairs, and other activities designed to increase the number of individuals served or the number of services received by individuals accessing services; community education services, such as health presentations to community groups, PTA’s, etc.
- Contacts that are not medically necessary.
- Time spent doing, attending, or participating in recreational activities.
- Services provided to teach academic subjects or as a substitute for educational personnel such as, but not limited to, a teacher, teacher’s aide, or an academic tutor.
- Time spent attending school (e.g. during a day treatment program).
- Habilitative services for the beneficiary (child) to acquire self-help, socialization, and adaptive skills necessary to reside successfully in community settings.
- Child Care services or services provided as a substitute for the parent or other individuals responsible for providing care and supervision.
- Respite care.
- Transportation for the beneficiary or family. Services provided in the car are considered transportation and time may not be billed under rehabilitation.
- Services not identified on the beneficiary’s authorized treatment plan.
- Services not in compliance with the service manual and not in compliance with State Medicaid standards.
- Services provided to children, spouse, parents, or siblings of the eligible beneficiary under treatment or others in the eligible beneficiary’s life to address problems not directly related to the eligible beneficiary’s issues and not listed on the eligible beneficiary’s treatment plan.
- Any intervention or contact not documented or consistent with the approved treatment plan/recovery plan goals, objectives, and approved services will not be reimbursed.]
13d. Rehabilitative Services: EPSDT only (Continued):

**Family Peer Support:**

**Description:** Family Peer Support Services (FPSS) are an array of formal and informal activities and supports provided to families caring for/raising a child who is experiencing social, emotional, medical, developmental, substance use and/or behavioral challenges in their home, school, placement, and/or community. FPSS provide a structured, strength-based relationship between a Family Peer Advocate (FPA) and the parent/family member/caregiver for the benefit of the child/youth. Family is defined as the primary care-giving unit and is inclusive of the wide diversity of primary caregiving units in our culture. Family is a birth, foster, adoptive, or self-created unit of people residing together, with significant attachment to the individual, consisting of adult(s) and/or child(ren), with adult(s) performing duties of parenthood/caregiving for the child(ren) even if the individual is living outside of the home.

Activities included must be intended to achieve the identified goals or objectives as set forth in the child/youth’s treatment plan. FPSS is a face-to-face intervention, a group face-to-face intervention. A group is a composition of members should share common characteristics, such as related experiences, developmental age, chronological age, challenges or treatment goals. The Service is directed to the child, and includes contacts necessary for treatment with the family/caregiver or other collateral supports. FPSS is recommended by a licensed practitioner of the healing arts including: Licensed Master Social Worker (LMSW), Licensed Clinical Social Worker (LCSW), Licensed Mental Health Counselor, Licensed Creative Arts Therapist, Licensed Marriage and Family Therapist, Licensed Psychoanalyst, Licensed Psychologist, Physician’s Assistant, Psychiatrist, Physician, Registered Professional Nurse, or Nurse Practitioner, operating within the scope of their practice. FPSS can be provided through individual and group face-to-face work and can occur in a variety of settings including community locations where the beneficiary lives, works, attends school, engages in services (e.g. provider office sites), and/or socializes. Components of FPSS include:

- **Engagement, Bridging and Transition Support:** Provide a bridge between families and service providers, support a productive and respectful partnership by assisting the families to express their strengths, needs and goals.
- **Self-Advocacy, Self-Efficacy and Empowerment:** Coach and model shared decision-making and skills that support collaboration, in addition to providing opportunities for families to self-advocate.
- **Parent Skill Development:** Support the efforts of families in caring for and strengthening their children’s mental, and physical health, development and well-being.
- **Community Connections and Natural Supports:** Enhance the quality of life by supporting the integration of families into their own communities.
**Practitioner qualifications:** Family Peer Support will be delivered by a New York State Credentialed Family Peer Advocate (FPA); FPA with a provisional credential; or a Certified Recovery Peer Advocate (CRPA) with a Family Specialty.

- **FPA Credential:** To be eligible for the FPA Credential, the individual must:
  - Demonstrate ‘lived experience’ as a parent or primary caregiver who has navigated multiple child serving systems on behalf of their child(ren) with social, emotional, developmental, health and/or behavioral healthcare needs.
  - Have a high school diploma, high school equivalency preferred or a State Education Commencement Credential (e.g. SACC or CDOS). This educational requirement can be waived by the State if the person has demonstrated competencies and has relevant life experience sufficient for the peer credential.
  - Completed Level One and Level Two of the Parent Empowerment Program Training for Family Peer Advocates approved comparable training.
  - Submitted three letters of reference attesting to proficiency in and suitability for the role of a Family Peer Advocate (FPA) including one from the FPAs supervisor.
  - Documented 1000 hours of experience providing Family Peer Support services.
  - Agreed to practice according to the Family Peer Advocate Code of Ethics.
  - Completed 20 hours of continuing education and renew their FPA certification every two years.

- **A provisional FPA credential:**
  - Demonstrate ‘lived experience’ as a parent or primary caregiver who has navigated multiple child serving systems on behalf of their child(ren) with social, emotional, developmental, health and/or behavioral healthcare needs.
  - A high school diploma, high school equivalency preferred or a State Education Commencement Credential (e.g. SACC or CDOS). This educational requirement can be waived by the State if the person has demonstrated competencies and has relevant life experience sufficient for the peer certification.
  - Completed Level One of the Parent Empowerment Program Training for Family Peer Advocates or approved comparable training.
  - Submitted two letters of reference attesting to proficiency in and suitability for the role of a Family Peer Advocate (FPA). The provisional FPA must complete all other requirements of the Professional Family Peer Advocate Credential within 18 months of commencing employment as an FPA.
  - Agreed to practice according to the Family Peer Advocate Code of Ethics.
13d. **Rehabilitative Services: EPSDT only (Continued):**

**Family Peer Support (Continued):**

**Certified Recovery Peer Advocate (CRPA) with a Family Specialty:**

To be certified as CPRA-Family, the individual must be at least 18 years of age and have the following:

- Have ‘lived experience’ as a family member impacted by youth substance use disorders. The CRPA – Family may be in recovery themselves.
- Have a high school diploma or a State Education Commencement Credential or General Equivalency Degree (GED).
- Completed a minimum of 46 hours of content specific training, covering the topics: advocacy, mentoring/education, recovery/wellness support and ethical responsibility.
- Documented 1,000 hours of related work experience, or document at least 500 hours of related work experience if they: Have a Bachelor's Degree; Are certified by OASAS as a CASAC, CASAC Trainee, or Prevention Professional; or Completed the 30-Hour Recovery Coach Academy training.
- Provide evidence of at least 25 hours of supervision specific to the performance domains of advocacy, mentoring/education, recovery/wellness support, and ethical responsibility. Supervision must be provided by an organization documented and qualified to provide supervision per job description.
- Pass the NYCB/IC & RC Peer Advocate Exam or other exam by an OASAS designated certifying body.
- Submitted two letters of recommendation.
- Demonstrated a minimum of 16 hours in the area of Family Support.
- Completed 20 hours of continuing education earned every two years, including 6 hours of Ethics.

Certified Recovery Peer Advocate with a Family Specialty as defined in the NYS OASAS:

An individual who is supervised by a credentialed or licensed clinical staff member to provide outreach and peer support services based on clinical need as identified in the patient’s treatment/recovery plan.

**Supervisor Qualifications:** FPAs will be supervised by:

1) Individuals who have a minimum of 4 years’ experience providing FPSS services, at least 1 year of which is as a credentialed FPA with access to clinical consultation as needed. The clinical consultation may be provided by a staff member or through a contract OR
2) A “qualified mental health staff person” with a) training in FPSS and the role of FPAs b) efforts are made as the FPSS service gains maturity in NYS to transition to supervision by experienced credentialed FPA within the organization OR
3) From a competent behavioral health professional meeting the criteria for a "qualified mental health staff person" found in 14 NYCRR 594 or 14 NYCRR 595 OR
4) A Certified Alcohol and Substance Abuse Counselor (CASAC) working within an OASAS certified program.
13d. **Rehabilitative Services: EPSDT only (Continued):**

**Family Peer Support (Continued):**

**Supervisor Qualifications: (Continued)** The individual providing consultation, guidance, mentoring, and on-going training need not be employed by the same agency. Supervision of these activities may be delivered in person or by distance communication methods. It is the expectation that 1 hour of supervision be delivered for every 40 hours of Family Peer Support Services duties performed. There may be an administrative supervisor who signs the family peer specialist’s timesheet and is the primary contact on other related human resource management issues.

**Provider Agency Qualifications:** Any practitioner providing behavioral health services must operate within an agency licensed, certified, designated and/or approved by any child serving agency or agency with children’s behavioral health and health experience that is licensed, certified, designated and/or approved by OCFS, OMH, OASAS OR DOH or its designee, to provide comparable services referenced in the definition.

The provider agency will assess the child prior to developing a treatment plan for the child. Authorization of the treatment plan is required by the DOH or its designee. Treatment services must be part of a treatment plan including goals and activities necessary to correct or ameliorate conditions discovered during the initial assessment visits. A group is composed may not exceed more than 12 individuals total. Medicaid family support programs will not reimburse for the following:

- 12-step programs run by peers.
- General outreach and education including participation in health fairs, and other activities designed to increase the number of individuals served or the number of services received by individuals accessing services; community education services, such as health presentations to community groups, PTA’s, etc.
- Contacts that are not medically necessary.
- Time spent doing, attending, or participating in recreational activities.
- Services provided to teach academic subjects or as a substitute for educational personnel such as, but not limited to, a teacher, teacher’s aide, or an academic tutor.
- Time spent attending school (e.g. during a day treatment program).
- Habilitative services for the beneficiary (child) to acquire self-help, socialization, and adaptive skills necessary to reside successfully in community settings.
- Child Care services or services provided as a substitute for the parent or other individuals responsible for providing care and supervision.
- Respite care.
- Transportation for the beneficiary or family. Services provided in the car are considered transportation and time may not be billed under rehabilitation.
- Services not identified on the beneficiary’s authorized treatment plan.
- Services not in compliance with the service manual and not in compliance with State Medicaid standards.

Family Peer Support (Continued):

**Limitations:**
- Services provided to children, spouse, parents, or siblings of the eligible beneficiary under treatment or others in the eligible beneficiary’s life to address problems not directly related to the eligible beneficiary’s issues and not listed on the eligible beneficiary’s treatment plan.
- Any intervention or contact not documented or consistent with the approved treatment plan/recovery plan goals, objectives, and approved services will not be reimbursed.
13d. Rehabilitative Services (Continued)

**Directly Observed Therapy (DOT)**

Directly Observed Therapy for Tuberculosis (TB/DOT) is the direct observation of oral ingestion of tuberculosis medications to assure patient adherence and tolerance with the prescribed medication regimen. Directly observed therapy is the standard of care for every individual with active tuberculosis and for some persons on treatment for latent TB infection. TB/DOT may be provided on an outpatient basis in a community setting (including the home) or on an inpatient basis.

**Services**

Outpatient TB/DOT involves the administering of medication and observation thereof, assessing any adverse reactions to the medications, and case follow up.

**Providers**

Servicing providers for TB/DOT include New York State licensed and registered professionals acting within their scope of practice: nurses (both Licensed Practical Nurses (LPN) and Registered Professional Nurses (RN)), nurse practitioners, physician assistants, and physicians, as well as non-licensed individuals specially trained to do DOT.
13d. Rehabilitative Services

Other Diagnostic, Screening, Preventive, and Rehabilitative Services
1905(a)(13); 42 CFR 440.130(d)

The State provides coverage for Outpatient and Residential Addiction Rehabilitative Services as defined at 42 CFR 440.130(d) and in this section. The State assures that all rehabilitative services are provided to, or directed exclusively toward the treatment of, the Medicaid eligible individual in accordance with section 1902(a)(10)(A)(i) of the Act. The State assures that rehabilitative services do not include and FFP is not available for any of the following in accordance with section 1905(a)(13) of the Act:

a. educational, vocational and job training services;
b. room and board;
c. habilitation services;
d. services to inmates in public institutions as defined in 42 CFR §435.1010;
e. services to individuals residing in institutions for mental diseases as described in 42 CFR§435.1010;
f. recreational and social activities; and
g. services that must be covered elsewhere in the state Medicaid plan.

Outpatient Addiction Rehabilitative Services

Outpatient addiction services include individual-centered activities consistent with the individual's assessed treatment needs with a rehabilitation and recovery focus designed to promote skills for coping with and managing symptoms and behaviors associated with substance use disorders. These activities are designed to help individuals achieve and maintain recovery from Addictions. Services should address an individual's major lifestyle, attitudinal, and behavioral problems that have the potential to undermine the goals of treatment. Face-to-face interventions may include other collateral supports beyond the individual or family/caregiver, as necessary.

Outpatient addiction services are delivered on an individual or group basis in a wide variety of settings including provider offices, in the community or in the individual's place of residence. These outpatient addiction services may be provided on site or on a mobile basis as defined by the New York State Office of Alcoholism and Substance Abuse Services (OASAS). Addiction services may not be provided in inpatient or outpatient hospital settings. The setting in which the service is provided will be determined by the identified goal to be achieved in the individual's written treatment plan.

Outpatient services are individualized interventions which may include more intensive treatment any time during the day or week, essential skill restoration and counseling services, and rehabilitation skill-building when the client has an inadequate social support system to provide the emotional and social support necessary for recovery, physical health care needs or substantial deficits in functional skills. Medication-assisted therapies (MAT) should only be utilized when a client has an established opiate or alcohol dependence condition that is clinically appropriate for MAT. Opioid treatment includes the dispensing of medication and all needed counseling services including a maintenance phase of treatment for as long as medically necessary. Reimbursement for the medication is covered under the Medicaid pharmacy benefit.

TN #16-0004 Approval Date March 25, 2019
Supersedes TN NEW Effective Date July 1, 2016
Provider Qualifications:

Services are provided by licensed and unlicensed professional staff, who are at least 18 years of age with a high school or equivalent diploma, according to their areas of competence as determined by degree, required levels of experience as defined by state law and regulations and OASAS approved guidelines and certifications. All outpatient Addiction agencies are licensed or certified under state law.

Licensed practitioners are licensed by the New York State Department of Education and include licensed master social workers (LMSWs), licensed clinical social workers (LCSWs), licensed mental health counselors (LMHCs), licensed marriage and family therapists (LMFTs), licensed psychoanalysts; registered nurses (RNs); licensed creative arts therapists, physician assistants (PAs), licensed practical nurses (LPNs); nurse practitioners (NPs); physicians and psychologists. Only physicians, Psychiatrists, nurse practitioners, physician assistants, and registered nurses may provide medication management functions as permitted under state law with any supervision required. All agencies with MAT interventions must comply with federal and state laws regarding controlled substance prescriber availability. Reimbursement for the medication is covered under the Medicaid pharmacy benefit.

Any staff who is unlicensed and providing addiction services must be credentialed by OASAS as a credentialed alcoholism and substance abuse counselor (CASAC); a credentialed alcoholism and substance abuse counselor–trainee (CASAC-T); Certified Recovery Peer Advocate (CRPA); or be under the supervision of a qualified health professional (QHP).

State regulations require supervision of CASAC-T, Certified Recovery Peer Advocate and non-credentialed counselors by a QHP, meeting the supervisory standards established by OASAS. A QHP includes the following professionals who are currently licensed by the New York State Department of Education or credentialed by OASAS: Credentialed Alcoholism and Substance Abuse Counselor (CASAC); LMSW; LCSW; NP; occupational therapist (OT); physician; physician assistants; RN; psychologist; rehabilitation counselor certified by the Commission of Rehabilitation Counselor Certification; a therapeutic recreation specialist who holds a baccalaureate degree in a field allied to therapeutic recreation and, either before or after receiving such degree, has five years of full-time, paid work experience in an activities program in a health care setting or an equivalent combination of advanced training, specialized therapeutic recreation education and experience, or is a recreational therapist certified by the National Council on Therapeutic Recreation or the American Therapeutic Recreation Association; licensed marriage and family therapists (LMFTs); a licensed mental health counselor licensed by the New York State Education Department (Title VIII, Article 163); and a counselor certified by and currently registered as such with the National Board of Certified Counselors. The QHP provides clinical/administrative oversight and supervision of non-credentialed staff as permitted under the statutory and/or regulatory scopes of practice. All the stated above requirements for certified and credentialed practitioners are overseen and/or coordinated by OASAS.
New York 
3b-37(ii)

CASAC must be at least 18 years of age; have earned at least a high school diploma or a General Equivalency Diploma (GED); and reside or work in New York State at least 51 percent of the period during which their application is being processed to be issued a credential. In addition, a CASAC must:

(1) provide three references attesting to the attainment of specific competency and ethical conduct requirements;

(2) document a minimum of 6,000 hours of supervised, full-time equivalent experience in an approved OASAS work setting or substitute a) a Master’s Degree in a Human Services field for 4,000 hours experience; b) a Bachelor’s Degree in a Human Services field for 2,000 hours experience; c) an Associate’s Degree in a Human Services field for 1,000 hours experience;

(3) meet minimum education and training requirements including a minimum of 350 hours which address the full range of knowledge, skills and professional techniques related to chemical dependence counseling; Note: A formal internship or formal field placement may be claimed as work experience OR education and training, but not both. Work experience claimed may not include any experience gained as part of, or required under, participation as a patient in a formal alcoholism and/or substance abuse or problem gambling treatment/aftercare program and/or plan and

(4) pass the International Certification and Reciprocity Consortium (IC&RC) examination for Alcohol and Drug Counselors. The International Certification & Reciprocity Consortium (IC&RC) examination for Alcohol and Drug Counselors is comprised of 150 multiple-choice questions derived from the counselor tasks identified in the IC&RC Candidate Guide.

Credentialed Alcoholism and Substance Abuse Counselor (CASAC-T) Trainee must be at least 18 years of age; have earned at least a high school diploma or a General Equivalency Diploma (GED); and reside or work in New York State at least 51 percent of the period during which their application is being processed to be issued a credential. Applicants may be considered for a CASAC Trainee certificate upon satisfying a minimum of:

- 350 hours of the required education and training; OR
- 4,000 hours of appropriate work experience and the 85 clock hours in Section 1 of the education and training related to knowledge of alcoholism and substance abuse.

The CASAC Trainee certificate is effective from the date that any of the above eligibility requirements are approved until the end of the five-year period that the application is active. The CASAC Trainee certificate is not renewable. However, if the CASAC-T is an examination candidate when the CASAC Trainee certificate expires, a three year extension may be requested.

TN #16-0004 Approval Date March 25, 2019
Supersedes TN NEW Effective Date July 1, 2016
Certified Recovery Peer Advocate (CPRA) as defined in the NYS OASAS regulations is:

- An individual who is supervised by a credentialed or licensed clinical staff member as identified in the patient’s treatment/recovery plan working under the direction of a certified agency.
- CRPA is a self-identified consumer who is in recovery from mental illness and/or substance use disorder
- To be eligible for the CRPA, the applicant must:
  
  - Demonstrate they have completed appropriate education and training relevant to the performance domains identified in the Recovery Coach Job Task Analysis Report.
  - Hold a high school diploma or jurisdictionally certified high school equivalency.
  - 46 hours specific to the domains, with 10 hours each in the domains of Advocacy, Mentoring/Education, and Recovery/Wellness Support and 16 hours in the domain of Ethical Responsibility.
  - Complete 500 hours of volunteer or paid work experience specific to the PR domains.
  - Receive 25 hours of supervision specific to the domains. Supervision must be provided by an organization’s documented and qualified supervisory staff per job description.
  - Pass the NYCB/IC&RC Peer Advocate Exam.
  - Complete 20 hours of continuing education earned every two years, including six hours in Ethics.

All providers listed may provide any component of the outpatient Addiction services consistent with State law and practice act with three exceptions: Certified Recovery Peer Advocates can only perform peer supports, service planning, care coordination, and assistance in a crisis intervention; unlicensed and/or uncredentialed professionals may assist with the performance of any activity listed here so long as supervised as noted above; and all agencies with MAT interventions must comply with federal and state laws regarding controlled substance prescriber availability.

**Service Limitations:**
Services must be medically necessary and must be recommended by a licensed practitioner or physician, who is acting within the scope of his/her professional license and applicable state law (Licensed practitioners include licensed by the New York State Department of Education, licensed master social worker (LMSW), licensed clinical social worker (LCSW), licensed mental health counselor (LMHC), licensed marriage and family therapists (LMFTs), licensed psychoanalysts; licensed creative arts therapists, physician assistants, nurse practitioners (NPs); physicians and psychologists), to promote the maximum reduction of symptoms and/or restoration of an individual to his/her best age-appropriate functional level according to an individualized treatment plan. No more than one medication management may be billed per day.

**Components include:**

- **Assessment** - The purpose of the assessment is to provide sufficient information for problem identification, Addiction treatment or referral for the beneficiary to gain access to other needed Medicaid Addiction or mental health services.
• **Service Planning** - Clinical treatment plan development - The treatment plan for Medicaid Addiction and mental health services must be patient-centered and developed in collaboration with the patient and patients family/collaterals, where appropriate.

• **Counseling/Therapy** - Counseling/Therapy to address a beneficiary's major lifestyle, attitudinal, and behavioral problems. Counseling/Therapy includes highly structured psychosocial therapy to address issues that have the potential to undermine the goals of treatment; skill development for coping with and managing symptoms and behaviors associated with Addiction, such as the participant's perspective and lack of impulse control or signs and symptoms of withdrawal. Collateral contact is permitted as needed to address the therapeutic goals of the Medicaid beneficiary receiving treatment. The following activities are excluded: financial management, supportive housing, supportive employment services, and basic skill acquisition services that are habilitative in nature.

• **Medication Management** - Psychotropic and other medication management as permitted under State Law. Medication Assisted Therapies (MAT) when medically necessary, including the direct administration of medication.

• **Care Coordination** - Care coordination includes: 1) Consultation to assist with the individual’s needs and service planning for Medicaid behavioral health services. 2) Referral and linkage to other Medicaid behavioral health services to avoid more restrictive levels of treatment.

• **Peer/Family Peer Support** - Peer counseling to address a beneficiary’s major lifestyle, attitudinal, and behavioral problems. Peer counseling includes highly structured psychosocial therapy to address issues that have the potential to undermine the goals of treatment; skill development for coping with and managing symptoms and behaviors.

• **Crisis Intervention** - Assist the individual with effectively responding to or avoiding identified persecutors or triggers that would risk their remaining in the community location or that result in functional impairments, including assisting the individual and family members or other collaterals with identifying a potential psychiatric or personal crisis, developing a crisis management plan, and/or, as appropriate, seeking other supports to restore stability and functioning.
13d. Rehabilitative Services

Residential Addiction Rehabilitative Services
Residential addiction services include individual centered residential treatment consistent with the individual’s assessed treatment needs, with a rehabilitation and recovery focus designed to promote skills for coping with and managing substance use disorder symptoms and behaviors. These services are designed to help individuals achieve changes in their substance use disorder behaviors. Services should address an individual’s major lifestyle, attitudinal, and behavioral problems that have the potential to undermine the goals of treatment. Residential services are delivered on an individual or group basis in a wide variety of settings including treatment in residential settings of 16 beds or less designed to help individuals achieve changes in their substance use disorder behaviors. Face-to-face interventions may include other collateral supports beyond the individual or family/caregiver, as necessary.

Provider Qualifications:
Services are provided by licensed and unlicensed professional staff, who are at least 18 years of age with a high school or equivalent diploma, according to their areas of competence as determined by degree, required levels of experience as defined by state law and regulations and departmentally approved guidelines and certifications. All residential agencies are certified under state law. Non-credentialed counselors must be at least 18 years of age with a high school or equivalent diploma. Licensed practitioners are licensed by the New York State Department of Education and include licensed master social workers (LMSWs), licensed clinical social workers (LCSWs), licensed mental health counselors (LMHCs), licensed marriage and family therapists (LMFTs), licensed psychoanalysts; registered nurses (RNs); licensed practical nurses (LPNs); nurse practitioners (NPs); medical doctors (MDs and DOs) and psychologists. Any staff who is unlicensed and providing addiction services must be credentialed by OASAS as a CASAC or a CASAC-T; Certified Recovery Peer Advocate; or be under the supervision of a QHP. State regulations require supervision of CASAC-T, Certified Recovery Peer Advocate, and non-credentialed counselors by a QHP meeting the supervisory standards established by OASAS.

A QHP includes the following professionals who are licensed by the New York State Department of Education or credentialed by OASAS: CASAC; LMSW; LCSW; NP; OT; physician (MD); physician assistants (PA); RN; psychologist; rehabilitation counselor certified by the Commission of Rehabilitation Counselor Certification; a therapeutic recreation specialist who holds a baccalaureate degree in a field allied to therapeutic recreation and, either before or after receiving such degree, has five years of full-time, paid work experience; licensed marriage and family therapists (LMFTs); and a licensed mental health counselor (Title VIII, Article 163); and a counselor certified by and currently registered as such with the National Board of Certified Counselors. The QHP provides clinical/administrative oversight and supervision of non-credentialed staff as permitted under the statutory and/or regulatory scopes of practice. All the stated requirements above are overseen and/or coordinated by the Office of Alcoholism and Substance Abuse Services (OASAS).

Only physicians, Psychiatrists, nurse practitioners, physician assistants, and registered nurses may perform medication management as permitted under state law with any supervision as required. All agencies with MAT interventions must comply with federal and state laws regarding controlled substance prescriber availability.

TN #16-0004 Approval Date March 25, 2019
Supersedes TN NEW Effective Date July 1, 2016
Credentialed Alcoholism and Substance Abuse Counselor (CASAC) must be at least 18 years of age; have earned at least a high school diploma or a General Equivalency Diploma (GED); and reside or work in New York State at least 51 percent of the period during which their application is being processed to be issued a credential. In addition, a CASAC must:

1. provide three references attesting to the attainment of specific competency and ethical conduct requirements;

2. document a minimum of 6,000 hours of supervised, full-time equivalent experience in an approved OASAS work setting or substitute a) a Master’s Degree in a Human Services field for 4,000 hours experience; b) a Bachelor’s Degree in a Human Services field for 2,000 hours experience; c) an Associate’s Degree in a Human Services field for 1,000 hours experience;

3. meet minimum education and training requirements including a minimum of 350 hours which address the full range of knowledge, skills and professional techniques related to chemical dependence counseling; Note: A formal internship or formal field placement may be claimed as work experience OR education and training, but not both. Work experience claimed may not include any experience gained as part of, or required under, participation as a patient in a formal alcoholism and/or substance abuse or problem gambling treatment/aftercare program and/or plan. And

4. pass the International Certification and Reciprocity Consortium (IC&RC) examination for Alcohol and Drug Counselors. The IC&RC examination for Alcohol and Drug Counselors is comprised of 150 multiple-choice questions derived from the counselor tasks identified in the IC&RC Candidate Guide.

CASAC-Trainee must be at least 18 years of age; have earned at least a high school diploma or a General Equivalency Diploma (GED); and reside or work in New York State at least 51 percent of the period during which their application is being processed to be issued a credential. Applicants may be considered for a CASAC Trainee certificate upon satisfying a minimum of:

- 350 hours of the required education and training; OR
- 4,000 hours of appropriate work experience and the 85 hours in Section 1 of the education and training related to knowledge of alcoholism and substance abuse.

The CASAC Trainee certificate is effective from the date that any of the above eligibility requirements are approved until the end of the five-year period that the application is active. The CASAC Trainee certificate is not renewable. However, if the CASAC-T is an examination candidate when the CASAC Trainee certificate expires, a three year extension may be requested.

Certified Recovery Peer Advocate (CRPA) as defined in the NYS OASAS is:
An individual who is “supervised by a credentialed or licensed clinical staff member to provide outreach and peer support services based on clinical need as identified in the patient’s

TN #16-0004              Approval Date March 25, 2019
Supersedes TN NEW         Effective Date July 1, 2016
treatment/recovery plan which occur on the premises of a certified agency.” Peer Advocates may also provide other types or forms of peer support that go beyond those services provided in a certified setting.

**CRPA** is a self-identified consumer who is in recovery from mental illness and/or substance use disorder. To be eligible for the CRPA, the applicant must:

- Demonstrate they have completed appropriate education and training relevant to the performance domains identified in the Recovery Coach Job Task Analysis Report.
- Hold a high school diploma or jurisdictionally certified high school equivalency.
- 46 hours specific to the domains, with 10 hours each in the domains of Advocacy, Mentoring/Education, and Recovery/Wellness Support and 16 hours in the domain of Ethical Responsibility.
- Completed 500 hours of volunteer or paid work experience specific to the PR domains.
- Received 25 hours of supervision specific to the domains. Supervision must be provided by an organization’s documented and qualified supervisory staff per job description.
- Pass the NYCB/IC&RC Peer Advocate Exam.
- Complete 20 hours of continuing education earned every two years, including six hours in Ethics.

All providers listed may provide any component of the residential Addiction services consistent with State law and practice act with three exceptions: Certified Recovery Peer Advocates may only perform peer supports, service planning, care coordination, and assistance in a crisis intervention; unlicensed and/or uncredentialed professionals may assist with the performance of any activity listed here so long as supervised as noted above; and all agencies with MAT interventions must comply with federal and state laws regarding controlled substance prescriber availability.

**Service Limitations:**

Services are subject to prior approval, must be medically necessary and must be recommended by a licensed practitioner or physician, who is acting within the scope of his/her professional license and applicable state law (licensed practitioners include licensed by the New York State Department of Education and include licensed master social worker (LMSW), licensed clinical social worker (LCSW), licensed mental health counselor (LMHC), licensed marriage and family therapists (LMFTs), licensed psychoanalysts; licensed creative arts therapists, physician assistants (PAs), nurse practitioners (NPs); physicians and psychologists, to promote the maximum reduction of symptoms and/or restoration of an individual to his/her best age-appropriate functional level according to an individualized treatment plan.
Components include:

- **Assessment** - The purpose of the assessment is to provide sufficient information for problem identification, Addiction treatment or referral for the beneficiary to gain access to other needed Medicaid Addiction or mental health services.

- **Service Planning** - Clinical treatment plan development - The treatment plan for Medicaid Addiction and mental health services must be patient-centered and developed in collaboration with the patient.

- **Counseling/Therapy** - Counseling/Therapy to address a beneficiary's major lifestyle, attitudinal, and behavioral problems. Counseling/therapy includes highly structured psychosocial therapy to address issues that have the potential to undermine the goals of treatment; skill development for coping with and managing symptoms and behaviors associated with Addiction such as the participant's perspective and lack of impulse control or signs and symptoms of withdrawal. Collateral contact is permitted as needed to address the therapeutic goals of the Medicaid beneficiary receiving treatment. The following activities are excluded: financial management, supportive housing, supportive employment services, and basic skill acquisition services that are habilitative in nature.

- **Medication Management** - Psychotropic and other medication management as permitted under State Law. Medication Assisted Therapies (MAT) when medically necessary, including the direct administration of medication.

- **Care Coordination** - Care coordination includes: 1) Consultation other practitioners to assist with the individual's needs and service planning for Medicaid services. 2) Referral and linkage to other Medicaid services to avoid more restrictive levels of treatment.

- **Peer/Family Peer Support** - Peer counseling to address a beneficiary's major lifestyle, attitudinal, and behavioral problems. Peer counseling includes highly structured psychosocial therapy to address issues that have the potential to undermine the goals of treatment; skill development for coping with and managing symptoms and behaviors associated with substance use disorders (Addiction) such as the participant's perspective and lack of impulse control or signs and symptoms of withdrawal; The following activities are excluded: financial management, supportive housing, supportive employment services, and basic skill acquisition services that are habilitative in nature.

- **Crisis Intervention** - Assist the individual with effectively responding to or avoiding identified precursors or triggers that result in functional impairments, including assisting the individual and family members or other collaterals with identifying a potential psychiatric or personal crisis, developing a crisis management plan, and/or, as appropriate, seeking other supports to restore stability and functioning.
13d. Rehabilitative Services

Crisis Services for Individuals with Intellectual and/or Developmental Disabilities (CSIDD)

Office for People With Developmental Disabilities (OPWDD)

The services described below are: CSIDD Clinical Team Services

Assurances
The State assures that all Crisis Services for Individuals with Intellectual and/or Developmental Disabilities (CSIDD) services are provided to, or directed exclusively toward the treatment of, Medicaid eligible individuals in accordance with Section 1902(a)(10)(A)(i) of the Act.

The State assures that CSIDD services do not include and FFP is not available for any of the following.

A. educational, vocational and job training services;
B. room and board except when furnished as part of respite care services;
C. habilitation services;
D. services to inmates in public institutions as defined in 42 CFR § 435.1010;
E. services to individuals residing in institutions for mental diseases as described in 42 CFR § 435.1009;
F. recreational and social activities; and
G. services that must be covered elsewhere in the Medicaid State Plan.

Description
Crisis Services for Individuals with Intellectual and/or Developmental Disabilities (CSIDD) are rehabilitative short-term targeted services for individuals with intellectual and/or developmental disabilities (I/DD) who have significant behavioral or Mental Health (MH) needs. Services are delivered by multi-disciplinary teams that provide personalized and intensive, time-limited services for those age 6 and older. This is a high intensity service recommended for individuals who experience frequent hospitalizations, crisis visits, and use of mobile emergency services and are at risk of losing placement and/or services. Services will be provided to all individuals who meet medical necessity criteria for this service. Teams provide clinical consultation and treatment and will maintain 24/7 service accessibility throughout the course of treatment for those individuals enrolled in CSIDD. CSIDD is a short-term tertiary care service designed to help stabilize individuals with MI/DD within their existing care networks using specially trained behavior support professionals to build skills and de-escalate the individual’s behaviors. Once the individual is stabilized, the CSIDD team will discharge the individual from the team’s caseload.

All services provided are for the direct benefit of the individual in accordance with the individual’s needs and treatment goals identified in the individual’s treatment plan, and for the purpose of assisting in the individual's recovery.

TN #19-0014
Supersedes TN NEW
Approval Date December 16, 2019
Effective Date January 01, 2019
The CSIDD must be recommended by one of the following licensed practitioners operating within the scope of their practice of their State license: a licensed professional (MD, DO or APRN) or licensed psychologist (Clinical Director).

**Qualification of Providers**

The CSIDD designated provider(s) are State providers or not-for-profit agency(ies) that meet all qualifications and program standards as outlined by OPWDD. Each provider must be qualified to participate in the Medicaid program, certified by OPWDD to operate CSIDD services, have sufficient professional staffing to operate in the region, and the ability to coordinate a network of providers to ensure coordination of services for CSIDD recipients.

The CSIDD provider must be certified by New York State for the provision of CSIDD services in at least one OPWDD service region. The following disciplines with expertise in the behavioral health aspects of I/DD are required team members.

**CSIDD Team Membership**

The CSIDD Team will be staffed by a CSIDD Team Leader and support staff and an interdisciplinary team as outlined below. Team membership must represent an array of clinical behavioral health disciplines likely to be required in providing multidisciplinary assessment and treatment. The CSIDD services are delivered by Clinical Team Leaders and Clinical Team Coordinators under the supervision of the Clinical and/or Medical Director. All CSIDD staff must have at least one year of relevant experience with the behavioral health aspects of I/DD. CSIDD staff must complete training in the mental health aspects of individuals with developmental disabilities. The following disciplines are required to participate as core constituents of the interdisciplinary treatment team:

- **Clinical Director** (Ph.D. in Psychology and licensed by the State's Psychology Board). The Clinical Director is licensed by the State of New York and operates within the scope of the practice of their State license. The Clinical Director consults with the Medical Director, and also reviews CSIDD Treatment Plans and recommends services.

- **Medical Director** (M.D./D.O. or APRN, licensed to practice in the State). The Medical Director is licensed by the State of New York and operates within the scope of the practice of their State license. The Medical Director consults with the Clinical Director, and also reviews CSIDD Treatment Plans and recommends services.

- **Clinical Team Leaders** (Doctorate or Master’s Degree in Social Work, Counseling, Psychology or human service field). This position is not required to be licensed and operates under the supervision of the Clinical and/or Medical Director.

- **Clinical Team Coordinators** (Doctorate or Master’s Degree in Social Work, Psychology, Counseling or other human service field). This position is not required to be licensed and operates under the supervision of the Clinical and/or Medical Director.
Service Description

Crisis Services for Individuals with Intellectual and/or Developmental Disabilities (CSIDD) is a high intensity service recommended for individuals with significant behavioral or Mental Health (MH) needs who experience frequent hospitalizations, crisis visits, and use of mobile emergency services and are at risk of losing placement and/or services. Teams include licensed professionals from appropriate behavioral health disciplines who provide clinical consultation and initial assessment within 2 hours of referral from OPWDD. All elements of the service are conducted by clinical professionals and are under the supervision of licensed Clinical and/or Medical Directors. Teams will maintain 24/7 service accessibility throughout the course of treatment.

Assessment

The Clinical Team Leader or Clinical Team Coordinator under the supervision of the Clinical or Medical Director will clinically assess the individual prior to developing a treatment plan, any time the individual experiences a significant change (improvement or decompensation) in his or her behavioral and/or Mental Health symptom presentation or is discharged from CSIDD services. The clinical assessment will include the Aberrant Behavior Checklist, the Matson Evaluation for Medication Side Effects (Meds), and other standardized clinical questionnaires required by the State. Qualifications: Clinical Team Leader or Clinical Team Coordinator under the supervision of the Clinical or Medical Director. All CSIDD staff must have, at least, one year of relevant experience with the behavioral health aspects of I/DD. CSIDD staff must complete training in the mental health aspects of individuals with developmental disabilities.

Treatment Planning

Based on clinical assessments, the Clinical Team Leader or Clinical Team Coordinator, under the supervision of the Clinical and/or Medical Director, will develop an individualized clinical crisis plan and treatment plan. The CSIDD Clinical Team Coordinator consults with the team to identify which CSIDD services the enrolled individual should receive. These services are listed on the CSIDD treatment plan. The ultimate responsibility for the content of the treatment plan is the Clinical Director or Medical Director, who may designate a different team member to develop a crisis plan or treatment plan for particular individual cases. The treatment services must be part of a treatment plan including goals and activities necessary to reduce the symptoms associated with behavioral health conditions discovered during the assessments and restore the individual to his or her best possible function level. Qualifications: Clinical Team Leader or Clinical Team Coordinator under the supervision of the Clinical or Medical Director. All CSIDD staff must have, at least, one year of relevant experience with the behavioral health aspects of I/DD. CSIDD staff must complete training in the mental health aspects of individuals with developmental disabilities.

Stabilization

Stabilization includes: skill building and restoration, medication monitoring, and counseling to assist the individual and family/caregiver with effectively responding to identified precursors or triggers that would risk their ability to remain in a natural community location. Stabilization also includes assisting the individual and family members, caregivers or other collateral supports with identifying a potential psychiatric or personal crisis; practicing de-escalation skills; and seeking other supports to restore stability and functioning. Qualifications: Clinical Team Leader or Clinical Team Coordinator under the supervision of the Clinical or Medical Director. All CSIDD staff must have, at least, one year of relevant experience with the behavioral health aspects of I/DD. CSIDD staff must complete training in the mental health aspects of individuals with developmental disabilities.

TN #19-0014
Supersedes TN NEW
Approval Date December 16, 2019
Effective Date January 01, 2019
Monitoring

CSIDD Team Members will monitor the efficacy of the Treatment Plan in supporting the beneficiary’s stabilization in preparation for discharge from CSIDD services. Monitoring may also include service referral as needed. The team reviews the CSIDD treatment plan at least monthly to assess the needs of the individual and to ensure services are provided in a timely manner. Qualifications: Clinical Team Leader or Clinical Team Coordinator under the supervision of the Clinical or Medical Director. All CSIDD staff must have, at least one year of relevant experience with the behavioral health aspects of I/DD. CSIDD staff must complete training in the mental health aspects of individuals with developmental disabilities.

CSIDD Treatment Plan

The CSIDD treatment plan:

1. Identifies the intensity of the needs of the person enrolled in services as well as the person’s system of support. It is geared towards preventing the occurrence of similar events in the future.

2. Provides clear, concrete, and realistic set of treatment and supportive interventions that prevents, de-escalates, and protects an individual from experiencing a behavioral health crisis.

CSIDD recipients receive CSIDD Stabilization services commensurate with their identified level of need based on the Assessment, Service Planning and Reporting process. The level of involvement informs the level of CSIDD services intensity. Levels of intensity vary, depending on the needs identified in the initial CSIDD assessment and ongoing re-assessment. As a person responds to the service and gains clinical stability, the level of involvement from the CSIDD team is reduced. If the individual receives home and community-based services (HCBS), the CSIDD Team will coordinate with the person’s HCBS Care Manager and ensure needed services are incorporated into the HCBS Life Plan to support the fading of CSIDD supports, as applicable.

Level of Involvement and Intensity: As a person responds to the service and gains clinical stability, the level of involvement from the clinical team is reduced. The levels of involvement and intensity are categorized as follows:
Level of CSIDD Clinical Team Involvement:

1. **Stable**: individual is clinically stable and only needs periodic clinical team outreach and plan review. Stabilization intervention and monitoring is provided at least quarterly.

2. **Mild**: individual is showing clear improvements in level of clinical stability and has Stabilization intervention and monitoring is provided once a month.

3. **Moderate**: individual is not yet stable and has clinical needs that require multiple monitoring contacts per month with active Stabilization interventions and reassessment of the plan, consultations, system engagement and linkages to other resources and or supports/services. Stabilization intervention and monitoring are provided multiple times per month.

4. **Intensive**: individual has acute clinical needs that require active crisis planning and system engagement with contact weekly or more often. Stabilization intervention and monitoring are provided weekly or more often.

The system of support for the individual, including his/her involved family member/caregiver(s) are active participants in all aspects of the CSIDD service while the person is enrolled. Active participation is the full engagement of the family member/caregiver(s) in ongoing person-centered planning, discussions and participation in the delivery of CSIDD services. All services provided are for the direct benefit of the individual, in accordance with the individual’s needs and treatment goals identified in the individual’s treatment plan, and for the purpose of assisting in the individual’s recovery. As clinical improvement is demonstrated, based on the ongoing reassessment process, the individual and his/her involved family member/caregiver(s) are engaged in the process and trained in the revisions to the CSIDD treatment plan and movement to less intense levels of CSIDD Clinical team involvement. CSIDD staff also are also responsible for working with the individual’s HCBS Care Manager, if applicable, to make appropriate referrals to other community integrated services.
[Rehabilitative Services (cont.)]

“Off-site” services shall be provided to developmentally disabled persons whose therapeutic requirements are most effectively satisfied in an appropriate environment that is specific to the treatment needs of the developmentally disabled individual. Such services shall be provided by persons authorized pursuant to NYCRR Title 14 Part 679. “Off-site” services shall not be provided at the location of a clinic certified by NYCRR Title 14 Part 679.

18. Limitations on Hospice Services:

Hospice services are provided to individuals who are certified by a physician as being terminally ill, with a life expectancy of approximately [six] twelve months or less.

Recipients must sign an informed consent electing hospice over conventional care, subject to periodic review.

Services provided are palliative in nature as opposed to curative: Services include supportive medical, social, emotional, and spiritual services to terminally ill individuals as well as emotional support for family members. Hospice services may be delivered at home, in a nursing home, in a hospital, or in a hospice residence.

Recipients who elect hospice care waive all rights to Medicaid reimbursement made on their behalf for the duration of the election of any services covered under the Medicaid State Plan that are related to the treatment of the terminal condition for which hospice care was elected, or a related condition. A Medicaid or Children's Health Insurance Program (CHIP) eligible child, under age 21, electing hospice is not required to forego curative treatment for the treatment of the terminal illness.

Hospice services provider qualifications are provided for registered professional nurse, home health aide, physical therapist, occupational therapist, speech pathologist, personal care aide, housekeeper/homemaker, pastoral care coordinator, social worker, nutritionist, audiologist, and respiratory therapist. Registered professional nurse shall mean a person who is licensed and currently registered as a registered professional nurse pursuant to Article 139 of the New York State Education Law.
Home Health aide shall mean a person who carries out health care tasks under the supervision of a registered nurse or licensed therapist and who may also provide assistance with personal hygiene, housekeeping and other related supportive tasks to a patient with health care needs in his/her home. Home health aides shall have successfully completed a basic training program in home health aide services or an equivalent exam approved by the Department and possess written evidence of such completion.

Physical therapist shall mean a person who is licensed by and currently registered with the New York State Education Department or who has been issued a valid limited permit by that Department.

Occupational therapist shall mean a person who is registered with the American Occupational Therapy Association, or either a graduate of a program in occupational therapy approved by the Council on Medical Education of the American Medical Association in collaboration with the American Occupational Therapy Association or a graduate of a curriculum in occupational therapy which is recognized by the World Federation of Occupational Therapists and is eligible for a registration with the American Occupational Therapy Association.

Speech pathologist shall mean a person who is licensed as required by Article 159 of the New York State Education Law.

Personal care aide shall mean a person who, under professional supervision, provides patients assistance with nutritional and environmental support and personal hygiene, feeding and dressing and/or, as an extension of self-directed patients, selects health-related tasks. A personal care aide shall have successfully completed:

(i) a training program in home health aide services or equivalent exam as specified in the description for home health aide above; or

(ii) one full year of experience in providing personal care services through a home care services agency within three years preceding the effective date of an initial license issued pursuant to Article 36 of the Public Health Law; or

(iii) a training program in personal care services approved by the New York State Department of Health, which shall include basic training, periodic and continuing in-service training, and on-the-job instruction and supervision; and
New York
3(c)(ii)

In those instances where the personal care aide is to be providing assistance with health-related tasks, such aide shall be trained as described in subparagraph (iii) of this paragraph and training in health-related tasks shall be completed in full prior to the personal care aide’s assignment to any patient, as evidenced by written documentation of such completion.

Homemaker shall mean a person who meets the standards established by the Department of Social Services and assists and instructs persons at home because of illness, incapacity or absence of a caretaker relative in providing assistance with environmental and nutritional tasks.

Pastoral care coordinator shall mean a person who has had a minimum of one year of training and experience in pastoral/spiritual counseling, and has a baccalaureate degree from a regionally accredited college or university or one recognized by the New York State Department of Education.

Social worker shall mean a person who holds a master’s degree in social work after successfully completing a prescribed course of study at a graduate school of social work accredited by the Council on Social Work Education and the Education Department, and who is certified or licensed by the Education Department to practice social work in the State of New York. When employed by a certified home health agency, long-term home health care program or hospice, such social worker must have had one year of social work experience in a health care setting.

Nutritionist shall mean a person who applies the principles of normal and therapeutic nutrition and of the physical, biological, social and behavioral sciences to the assessment and management of those factors in the personal community environment which influence nutritional status. A nutritionist must possess a baccalaureate degree, with major studies in food and nutrition, for a regionally accredited or New York State registered four-year college or university, and be registered or be eligible for registration by the American Dietetic Association.
Audiologist shall mean a person who is licensed as required by Article 159 of the New York State Education Law.

Respiratory therapist shall mean a person who is licensed and currently registered as a respiratory therapist pursuant to Article 164 of the New York State Education Law.

Providers of Hospice Services must be certified in accordance with Article 40 of the PHL. Services are provided in accordance with 42 CFR Part 418.

The State assures the provision of Hospice services will be provided in accordance with 42 CFR Part 418.

19. **Limitations on Tuberculosis related services:**

Directly Observed Therapy (DOT) – will be provided to clients who are being treated for Tuberculosis Disease.

21. **Lactation consultant services:** effective September 1, 2012, reimbursement will be provided for breastfeeding health education and counseling services by pediatric or family nurse practitioners. Pediatric or family nurse practitioners must be currently registered and licensed by the State in accordance with 42 CFR 440.60(a) and also International Board Certified Lactation Consultants (IBCLC). Date of implementation will occur on the first day of the month following 30 days after Federal approval of this provision of the State Plan.

22. **Limitation on Respiratory Care:**

Services may be rendered to EPSDT population by medical necessity and that services is furnished through the clinic and home benefits to this population.
New York  
3(d)

24a. Prior approval is required for non-emergent transportation, including the services and subsistence of the attendant. Requests can be made by recipients or their family members; or medical practitioners acting on behalf of a recipient.

Transportation providers are assigned to requests for non-emergency transportation services based upon first, a recipient’s choice of available participating vendors at the medically appropriate level of transportation; then, if the recipient indicates no preference, the ordering practitioner’s choice among available participating vendors at the medically appropriate level of transportation; and finally, if no choice is made by the ordering practitioner, the request is given via rotation among the medically available and appropriate mode of transportation providers.

1. To assure comparability and statewideness, each county’s local department of social services manages transportation services on behalf of recipient’s assigned to the county.

2. The Commissioner of Health is authorized to assume the responsibility of managing transportation services from any local social services district. If the Commissioner elects to assume this responsibility, the Commissioner may choose to contract with a transportation manager or managers to manage transportation services in any local social services district.

[2.]3. Recipient, family member, or volunteer reimbursement is made as an administrative expense of the Medicaid Program. This applies to any personal vehicle mileage reimbursement, lodging, airfare, or other expense borne on behalf of the Medicaid recipient by a non-direct vendor.

24d. Prior approval is required for skilled nursing facility services except when admitted directly from a hospital, another skilled nursing facility or from a health related facility.

Medicaid payments shall not be authorized for skilled nursing facilities which are not certified or have not applied for certification to participate in Medicare.

26. Personal Care Services means some or total assistance with personal hygiene, dressing and feeding and nutritional and environmental support functions. Prior approval is required for all personal care services. The authorization period and amount of personal care services authorized depends upon patient need, as indicated in the patient’s assessment.

Personal care services, shared aide and individual aide, furnished to an individual who is not an inpatient or resident of a hospital, nursing facility, intermediate care facility for the mentally retarded, or institution for mental disease, as determined to meet the recipient’s needs for assistance, and when prescribed by a physician, in accordance with the recipient’s plan of treatment and provided by individuals who are qualified to provide such services, who are supervised by a registered nurse and who are not members of the recipient’s family, and furnished in the recipient’s home or other location.

Attachment 3.1-A
Supplement

TN #12-33 Approval Date April 29, 2013
Supersedes TN #09-47 Effective Date October 1, 2012
New York
3(d)(A)

Providers of personal care services (personal care aides) must have:

- maturity, emotional and mental stability, and experience in personal care or homemaking;
- the ability to read and write, understand and carry out directions and instructions, record messages, and keep simple records;
- a sympathetic attitude toward providing services for patients at home who have medical problems;
- good physical health, as indicated by the documentation in the personnel file of all persons providing personal care services. This documentation must include the same assurances and proof of good physical health that the Department of health requires for employees of certified home agencies;
- a criminal history record check performed to the extent required under section 124 of the PHL; and
- successfully completed a training program approved by the Department.

Personal care aides must be supervised by a registered professional nurse who is licensed and currently certified to practice in New York State and who has at least two years satisfactory recent home health care experience. Nursing supervision includes orienting the personal care aide to his/her job assignment(s); providing needed on-the-job training; making nursing supervisory visits to the patient’s home PRN, but at least every 90 days; and, annually conducting an overall job performance evaluation of the aide.

New York State’s Personal Care Services are provided in accordance with 42 CFR 440.167.
26 (cont.). Consumer Directed Personal Assistance Program

The Consumer Directed Personal Assistance Program (CDPAP) is a consumer directed home care services delivery model. The program serves Medicaid recipients who have a Medicaid need for home care services and who choose to participate in this model. It has operated under the State’s Personal Care Services benefit since 1990. As such, the eligibility, assessment and prior authorization of services processes mirror that of the Personal Care Services Program (PCSP). In the traditional PCSP, the local social services district (LSSD) contracts with home care agencies for the provision of services. The home care agency is responsible for hiring, training, supervising, and providing the home care worker with salary and benefits. In the CDPAP a local social services district contracts with a CDPAP agency and there is a co-employer relationship between the CDPAP agency and the consumer that encompasses these functions. The CDPAP consumer is responsible for hiring/training/supervising/and firing his/her aides. The CDPAP agency acts as the co-employer of each aide hired by the consumer for the purpose of setting wage levels and fringe benefits, including health insurance coverage and other benefits, e.g. unemployment and workers compensation. It is the CDPAP agency that actually pays each aide and administers related fringe benefits. The CDPAP agency also submits claims for payment to the Department's agent that processes and pays claims for services provided to Medicaid recipients.
New York
3e

27. The State elects to provide medical assistance services to eligible individuals through a Primary Care Case Management Program. PCCMs are responsible for locating, coordination, and monitoring covered primary care to all individuals enrolled with a case manager.

PCCM providers may be physicians, physician group practices, entities employing or having other arrangements with physicians to provide PCCM Services under the contract. Nurse practitioners may also be a PCCM provider.

A PCCM will provide for arrangements with, or referrals to a sufficient number of physicians and other appropriate health care professionals to ensure that services under the contract can be furnished to enrollees promptly and without compromise to quality of care.

PCCMs are required to be accessible 24 hours/seven days per week to provide information, referral and treatment to enrollees. PCCMs may not restrict an enrollee's access to emergency services, or require prior authorization of emergency services.

A PCCM shall be geographically accessible to enrollees. Primary care providers must meet State standards for travel time and distance.
New York
4

General

a) Prior approval of the local professional director shall be required for medical care and services which are to be provided outside New York State, except in the following situations:

1. When it is customary for the inhabitants of the district generally to use medical care resources and facilities outside New York State.

2. When out-of-state care was provided in an emergency.

b) When a request subject to prior approval has been modified or denied in whole or in part because of disagreement with the proposed plan of treatment, recipients are notified that they may request a fair hearing.

4(a)

29. **Lactation consultant services**: effective September 1, 2012, reimbursement will be available for breastfeeding health education and counseling services by physician assistants. Physician assistants must be currently registered and licensed by the State in accordance with 42 CFR 440.60(a) and also International Board Certified Lactation Consultants (IBCLC). Date of implementation will occur on the first day of the month following 30 days after Federal approval of this provision of the State Plan.

30. **Lactation consultant services**: effective September 1, 2012, reimbursement will be available for breastfeeding health education and counseling services by registered nurses. Registered nurses must be currently registered and licensed by the State in accordance with 42 CFR 440.60(a) and also International Board Certified Lactation Consultants (IBCLC). Date of implementation will occur on the first day of the month following 30 days after Federal approval of this provision of the State Plan.
AMOUNT, DURATION AND SCOPE OF MEDICAL AND REMEDIAL CARE SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

In addition to the limitations specified on pages 1 through 4 regarding services, the following limitations also apply to the noted services:

2a.; 2b.; 2c.; 2d.;

Services will be provided in accordance with the utilization threshold requirements described in departmental regulations, which are based on medical necessity and identified for providers in the MMIS Clinic Provider Manual. Such threshold requirements are applicable to specific provider service types including medical clinics, dental clinics and mental health clinics certified under Article 28 of the Public Health Law and/or Article 31 of the Mental Hygiene Law. The requirements mandate that providers obtain prior authorization based on medical necessity for the provision of services in excess of prescribed utilization thresholds per recipient per benefit year, unless the services provided were urgent or emergent in nature, or otherwise excluded.

3.

Services will be provided in accordance with the utilization threshold requirements described in departmental regulations, which are based on medical necessity and identified for providers in the MMIS Laboratory Provider Manual. Such threshold requirements are applicable to specific provider service types including laboratories. The requirements mandate that providers obtain prior authorization based on medical necessity for the provision of services in excess of prescribed utilization thresholds per recipient per benefit year, unless the services provided were urgent or emergent in nature, or otherwise excluded.

5.

Services will be provided in accordance with the utilization threshold requirements described in departmental regulations, which are based on medical necessity and identified for providers in the MMIS Physician Provider Manual. Such threshold requirements are applicable to specific provider service types including physicians, for services furnished in the office or patient’s home. The requirements mandate that providers obtain prior authorization based on medical necessity for the provision of services in excess of prescribed utilization thresholds per recipient per benefit year, unless the services provided were urgent or emergent in nature, or otherwise excluded.
New York
5(a)

A utilization threshold service is decremented each time a patient is seen by a physician including those times when the patient is seen by a physician and an electronic prescription/fiscal order is transmitted for medically necessary pharmaceuticals and select over the counter medications.

9. Services will be provided in accordance with the utilization threshold requirements described in departmental regulations which are based on medical necessity and identified for providers in the MMIS Clinic Provider Manual. Such threshold requirements are applicable to specific provider service types including adult day health services, medical clinics, dental clinics and mental health clinics certified under Article 28 of the Public Health Law and/or Article 31 of the Mental Hygiene Law. The requirements mandate that providers obtain prior authorization based on medical necessity for the provision of services in excess of prescribed utilization thresholds per recipients per benefit year, unless the services provided were urgent or emergent in nature, or otherwise excluded.

Physical Therapy Services

11a. Effective on or after [October 1, 2011] July 1, 2018, services are limited to coverage of [twenty] forty visits per year; however, this limitation does not apply to enrollees who are less than 21 years of age, to individuals with traumatic brain injury, to persons with developmental disabilities, or to Medicare/Medicaid dually eligible recipients when that service is covered by Medicare. The benefit limit does not apply to inpatient hospital settings, services provided by a certified home health agency, or to nursing home inpatients receiving therapy in skilled nursing facilities in which they reside. The benefit limit is not subject to review or exception.

Occupational Therapy Services

11b. Effective on or after October 1, 2011, services are limited to coverage of twenty visits per year; however, this limitation does not apply to enrollees who are less than 21 years of age, to individuals with traumatic brain injury, to persons with developmental disabilities, or to Medicare/Medicaid dually eligible recipients when that service is covered by Medicare. The benefit limit does not apply to inpatient hospital settings, services provided by a certified home health agency, or to nursing home inpatients receiving therapy in skilled nursing facilities in which they reside. The benefit limit is not subject to review or exception.
Speech-Language Therapy Services

11c. Services will be provided in accordance with the utilization threshold requirements described in departmental regulations which are based on medical necessity and identified for providers in the MMIS Clinic Provider Manual. Such threshold requirements are applicable to specific provider service types including medical clinics, dental clinics and mental health clinics certified under Article 28 of the Public Health Law and/or Article 31 of the Mental Hygiene Law. The requirements mandate that providers obtain prior authorization for the provision of services based on medical necessity in excess of prescribed utilization thresholds per recipients per benefit year, unless the services provided were urgent or emergent in nature, or otherwise excluded. Effective on or after October 1, 2011, services are limited to coverage of twenty visits per year; however, this limitation does not apply to enrollees who are less than 21 years of age, to individuals with traumatic brain injury, to persons with developmental disabilities, or to Medicare/Medicaid dually eligible recipients when that service is covered by Medicare. [STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

CASE MANAGEMENT SERVICES]

[A. Target Group: A

B. Areas of State in which services will be provided:

[ ] Entire State.

[X] Only in the following geographic area (authority of section 1915(g)(1) of the Act is invoked to provide services less than Statewide):

C. Comparability of Services

[ ] Services are provided in accordance with Section 1902(a)(10)(B) of the Act.

[X] Services are not comparable in amount, duration, and scope. Authority of Section 1915(g)(1) of the Act is invoked to provide services without regard to the requirements of Section 1902(a)(10)(B) of the Act.

D. Definition of Services:

See attached.

E. Qualification of Providers:

See Page 1-A10.]
The State assures that the provision of case management services will not restrict an individual’s free choice of providers in violation of section 1902(a)(23) of the Act.

1. Eligible recipients will have free choice of the providers of case management services.

2. Eligible recipients will have free choice of the providers of other medical care under the plan.

G. Payment for case management services under the plan does not duplicate payments made to public agencies or private entities under other program authorities for this same purpose.
CASE MANAGEMENT SERVICES

[A. TARGET GROUP

The primary targeted group consists of an adolescent, male or female, under 21 years of age who is a categorically needy or medically needy Medicaid eligible and is a parent and resides in the same household with his or her child(ren), or is pregnant.

The target group may also consist of any eligible child of an adolescent or any adolescent, male or female under 21 years of age, who is a categorically needy or medically needy Medicaid eligible and is deemed to be at risk of pregnancy or parenthood and meets one or more of the following at-risk criteria:

1) receives public assistance in his or her own right;

2) is homeless or at imminent risk of becoming homeless;

3) has had an abortion or miscarriage

4) has had a pregnancy test, even if the test outcome was negative;

5) is sexually active;

6) is the non-custodial mother or father of a child;

7) is the younger sibling of an individual who was or is a teenage parent;

8) is a rape or incest victim;

9) has dropped out of high school without graduating;

10) is having academic and/or disciplinary problems in school;

11) requests case management activities, or his or her authorized representative requests such activities on behalf of the adolescent; or

12) is the child of adolescent parent(s).

Sixty percent of the current ADC cases in New York State are headed by mothers who were teenagers when they gave birth to their first child. The goal of case management for this target population is to provide access for youth to medical, educational, employment and other services which will increase their potential to become financially independent. Case management services continue for this target population through age 21.]

Supersedes TN   #90-0007
Approval Date   September 4, 2015
Effective Date  April 1, 2015
[B. AREAS OF STATE IN WHICH SERVICES WILL BE PROVIDED TO TARGET GROUP A]

Case management services will be provided to residents of the following counties: Albany, Allegany, Cattaraugus, Cayuga, Chemung, Columbia, Cortland, Dutchess, Franklin, Fulton, Genesee, Herkimer, Jefferson, Livingston, Madison, Monroe (zip codes 14605, 14621, and 14609), Onondaga, Orange, Orleans, Rensselaer, St. Lawrence, Schenectady, Schoharie, Schuyler, Seneca, Steuben, Suffolk, Sullivan, Tompkins, Ulster, Washington, Westchester, Wyoming, Yates and New York City (Bronx Commun. Dist. 1-4, Brooklyn Commun. Dist. 5, 8, 9, 16-18, Manhattan Commun. Dist. 9-12, Queens Commun. Dist. 3, 4, 6, 7, 8, 11-13, and Richmond Commun. Dist. 1-3).

[D. DEFINITION OF COMPREHENSIVE MEDICAID CASE MANAGEMENT REIMBURSABLE UNDER MEDICAID]

Case management is a process which will assist persons eligible for Medical Assistance to access necessary services in accordance with goals contained in a written case management plan.

BASIC PREMISES OF COMPREHENSIVE MEDICAID CASE MANAGEMENT

1. Case management services are those services which will assist persons eligible for Medical Assistance to obtain needed medical, social, psychological, educational, financial, and other services.

2. Case management is a human services agency tool for the effective management of multiple resources for the benefit of individuals identified as high utilizers of service, or having problems accessing care, or belonging to certain age, diagnosis or specialized program groups. Effective management is concerned with service: the quality, adequacy and continuity of service, and a concern for cost effectiveness to assure each eligible individual served receives the services appropriate to their needs. Targeted groups consist of persons with multiple needs or high vulnerability who require intensive and/or long term intervention by health and other human services providers.]
[3. Case management services enable Medicaid eligibles to exercise their freedom of choice by providing knowledge of services available to them, providing access to the most appropriate service to meet their needs and assisting them to achieve their maximum level of functioning and independence in their most appropriate environment. Case managers do not have the authority to prior authorize Medicaid service or to limit the amount, duration or scope of Medicaid services.

4. Case management empowers the individual by encouragement in the decision making process, allowing choice among all available options as a means of moving the individual to the optimum situation where the person and/or his/her support system can address his/her needs. Case management implies utilization and development of such support networks as will maximize the effectiveness, efficiency and accountability of support services on behalf of the individual.

DEFINITION OF CASE MANAGEMENT RELATED TO TARGET GROUP A

Case management for Target Group A means those activities performed by case management staff, in consultation with an adolescent parent of an eligible child or with a eligible adolescent and other individuals involved with the child or adolescent if appropriate, related to ensuring that the adolescent and child have full access to the comprehensive array of services and assistance available in the community which the adolescent needs to maintain and strengthen family life and to attain or retain capability for maximum self support and personal independence.

Case management for Target Group A requires referral to and coordination with medical, social, educational, psycho-social, employment, habilitation, rehabilitation, financial, environmental, legal and child care services available within the community appropriate to the needs of the adolescent.

CASE MANAGEMENT FUNCTIONS

Case management functions are determined by the recipient’s circumstances and therefore must be determined specifically in each case and with each recipient’s involvement. A separate case record must be established for each individual recipient of case management services and must document each case management function provided, including:]

TN       #15-0031
Supersedes TN  #90-0007
Approval Date  September 4, 2015
Effective Date  April 1, 2015
[A. Intake and screening.

This function consists of: the initial contact with the recipient providing information concerning case management; exploring the recipient's interest in the case management process; determining that the recipient is a member of the provider's targeted population; and, identifying potential payors for services.

B. Assessment and reassessment.

The case manager must secure directly, or indirectly through collateral sources, with the recipient's permission: a determination of the nature and degree of the recipient's functional impairment through a medical evaluation; a determination of the recipient's functional eligibility for services; information from other agencies/individuals required to identify the barriers to care and existing gaps in service to the recipient; assessment of the recipient's service needs including medical, social, psychosocial, educational, financial and other services; and, a description of the recipient's strengths, informal support system and environmental factors relative to his/her care.

C. Case Management plan and coordination.

The case management activities required to establish a comprehensive written case management plan and to effect the coordination of services include: identification of the nature, amount, frequency, duration and cost of the case management services required by a particular recipient; selection of the nature, amount, type, frequency and duration of services to be provided to the recipient with the participation of the recipient, the recipient's informal support network and providers of services; specification of the long term and short term goals to be achieved through the case management process; collaboration with hospital discharge planners, health care providers and other service providers, including informal caregivers and other case managers, through case conferences to encourage exchange of clinical information and to assure:

1. the integration of clinical care plans throughout the case management process;

2. the continuity of service;

3. the avoidance of duplication of service (including case management services); and,]
[4. the establishment of a comprehensive case management plan that addresses the medical, social, psychosocial, educational, and financial needs of the recipient.

D. **Implementation of the case management plan** includes: securing the services determined in the case management plan to be appropriate for a particular recipient through referral to those agencies or persons who are qualified to provide the identified services; assisting the recipient with referral and/or application forms required for the acquisition of services; advocating for the recipient with all providers of service; and developing alternative services to assure continuity in the event of service disruption.

E. **Crisis intervention** by a case manager or practitioner when necessary, includes: assessment of the nature of the recipient's circumstances; determination of the recipient's emergency service needs; and, revision of the case management plan, including any changes in activities or objectives required to achieve the established goal.

F. **Monitoring and follow-up** of case management services includes: assuring that quality services, as identified in the case management plan, are delivered in a cost-conscious manner; assuring that the recipient is adhering to the case management plan; ascertaining the recipient's satisfaction with the services provided and advising the preparer of the case management plan of the findings if the plan has been formulated by a practitioner; collecting data and documenting in the case record the progress of the recipient making necessary revisions to the case management plan; making alternate arrangements when services have been denied or are unavailable to the recipient; and, assisting the recipient and/or provider of services to resolve disagreements, questions or problems with implementations of the case management plan.

G. **Counseling and exit planning** include: assuring that the recipient obtains, on an ongoing basis, the maximum benefit from the services received; developing support groups for the recipient, the recipient's family and informal providers of services; mediating amount the recipient, the family network and/or other informal providers of services when problems with]
[service provision occur; facilitating the recipient's access to other appropriate care if and when eligibility for the targeted services ceases; and, assisting the recipient to anticipate the difficulties which may be encountered subsequent to discharge from or admission to facilities or other programs, including other case management programs.

**PROCEDURAL REQUIREMENTS FOR PROVISION OF SERVICE**

1. **Assessments.**

   The case management process must be initiated by the recipient and case manager through a written assessment of the recipient’s need for case management as well as medical, social, psychosocial, educational, financial and other services.

   An assessment provides verification of the recipient’s current functioning and continuing need for services, the service priorities and evaluation of the recipient’s ability to benefit from such services. The assessment process includes those activities listed in paragraph B of **CASE MANAGEMENT FUNCTIONS**.

   An assessment must be completed by a case manager within 15 days of the date of the referral or as specified in a referral agreement. The referral for the service may include a plan of care containing significant information developed by the referral source which should be included as an integral part of the case management plan.

   An updated assessment of the recipient’s need for case management and other services must be completed by the case manager every six months, or sooner if required by changes in the recipient's condition or circumstances.

2. **Case management plan.**

   A written case management plan must be completed by the case manager for each recipient of case management services within 30 days of the date of referral or as specified in a referral agreement, and must include those activities outlined in paragraph C under **CASE MANAGEMENT FUNCTIONS.**]
[The recipient’s case management goals, with anticipated dates of completion, must be established in the initial case management plan, consistent with the recipient’s service needs and assessment.

The case management plan must be reviewed and updated by the case manager as required by changes in the recipient's condition or circumstances, but not less frequently than every six months subsequent to the initial plan; and each time the case management plan is reviewed, the goals established in the initial case management plan must be maintained or revised, and new goals and new time-frames may be established with the participation of the recipient.

The case management plan must specify:

a. those activities which the recipient is expected to undertake within given period of time toward the accomplishment of each case management goal;

b. the name of the person or agency, including the individual and/or family members, who will perform needed tasks;

c. the type of treatment program or service providers to which the recipient will be referred.

d. the method of provision and those activities to be performed by a service provider or other person to achieve the recipient's related goal and objective; and

e. the type, amount, frequency, duration and cost of case management and other services to be delivered or tasks to be performed.

3. Continuity of service.

Case management services must be ongoing from the time recipient is accepted by the case management agent for services to the time when: the coordination of services provided through case management is not required or is no longer required by the recipient; the recipient moves from the social services district to a district in which case management services are not provided; the long term goal has been reached; the recipient refuses to accept case management services; the recipient requests that his/her case be closed; the recipient is no longer eligible for services; or, the recipient’s case is appropriately transferred to another case manager.]
[Contact with the recipient or with a collateral source on the recipient’s behalf must be maintained by the case manager at least monthly or more frequently as specified in the provider’s agreement with New York State Department of Social Services.

LIMITATIONS TO THE PROVISION OF MEDICAID CASE MANAGEMENT SERVICES

Case management services:

1. must not be utilized to restrict the choice of a case management services recipient to obtain medical care or services from any provider participating in the Medical Assistance Program who is qualified to provide such care or services and who undertakes to provide such care or service(s) including an organization which provides such care or services or which arranges for the delivery of such care or services on a prepayment basis;

2. must not duplicate case management services currently provided under the Medical Assistance Program or under any other program;

3. must not be utilized by providers of case management to create a demand for unnecessary services or programs particularly those services or programs within their scope of authority; and,

4. must not be provided to persons receiving institutional care reimbursed under the Medical Assistance Program or to persons in receipt of case management services under a Federal Home and Community Based Services Waiver.

While the activities of case management services secure access to, including referral to and arrangement for, an individual’s needed service, the activities of case management do not include:

1. the actual provision of the service;
2. Medicaid eligibility determinations/redeterminations;]
Supplement 1 to Attachment 3.1-A

New York
1-A10

[3. Medicaid preadmission screening;

4. prior authorization for Medicaid services;

5. required Medicaid utilization review;

6. EPSDT administration;

7. activities in connection with “lock-in” provisions under 1915(a) of the Social Security Act;

8. institutional discharge planning as required of hospitals, SNF’s, ICF’s and ICF/MR’s; and

9. client outreach.

LIMITATIONS SPECIFIC TO TARGET GROUP A

Case managers and case management staff with respect to any eligible child of an adolescent or adolescent in Target Group A for whom case management activities are being performed and the child(ren) of such adolescent, are prohibited from and do not have the authority to:

1. provide, authorize or purchase services or assistance reimbursable under Title XX of the federal Social Security Act or otherwise administered or funded by the social services district;

2. accept or deny any application for public assistance or for services or assistance reimbursable under Title XX of the federal Social Security Act or otherwise administered or funded by the social service district; or,

3. place the adolescent or his or her child(ren) in foster care, or remove the adolescent or his or her child(ren) from the home of his or her parent or guardian.

E. QUALIFICATIONS OF PROVIDERS

1. Providers

Case management services may be provided by social services agencies, facilities, persons and other groups possessing the capability to provide such services who are approved by the New York State Commissioner of Social Services based upon an approved proposal submitted to the New York State Department of Social Services. Providers may include:]

TN #15-0031
Supersedes TN #88-0005

Approval Date September 4, 2015
Effective Date April 1, 2015
2. Case Managers

The case manager must have two years experience in a substantial number of activities outlined under **CASE MANAGEMENT FUNCTIONS**, including the performance of assessments and development of care management plans. Voluntary or part-time experience which can be verified will be accepted on a pro-rata basis. The following may be substituted for this requirement:

a. one year of case management experience and a degree in a health or human services field; or

b. one year of case management experience and an additional year of experience in other activities with the target population; or

c. a bachelor’s or master’s degree which includes a practicum encompassing a substantial number of activities outlined under **CASE MANAGEMENT FUNCTIONS**, including the performance of assessments and development of case management plans; or

d. the individual meets the regulatory requirements for case manager of a State Department within New York State.

3. Qualifications of Providers Specific to Target Group A*

1. Providers

Providers of case management to the adolescents in Target Group A may be public or private agencies and organizations, whether operated on a profit-making or not-for-profit basis.

2. Case Managers

Case managers must have the education, experience, training and/or knowledge in the areas necessary to assess the needs and capabilities of, and to assist pregnant, parenting or at-risk adolescents access to services and assistance needed to maintain and strengthen]
[family life, to attain or retain the capability for maximum self support and personal independence including, but not limited to the areas of adolescent development, adolescent sexuality, and effective interviewing techniques.

Primary responsibility for performing case management activities must be given to case managers. Para-professional and volunteers may be used as case management staff to assist the case managers and may perform those activities which are appropriate based on their training and experience.]

CASE MANAGEMENT SERVICES

A. TARGET GROUP B

Persons enrolled in Medical Assistance who:

(1) Have a documented diagnosis of mental retardation or a developmental disability as defined in New York Mental Hygiene Law §1.03, and

(2) Are in need of ongoing and comprehensive service coordination rather than incidental service coordination, and

(3) Have chosen to receive the services, and

(4) Do not reside in intermediate care facilities for the developmentally disabled; State operated Developmental Centers; Small Residential Unit (SRU); Nursing Facilities, or hospitals or any other medical assistance institutional settings that provide service coordination, and

(5) Are not concurrently enrolled in any other comprehensive service coordination service funded under Medical Assistance.

B. AREAS OF STATE IN WHICH SERVICES WILL BE PROVIDED TO TARGET

Entire State

C. DEFINITION OF MEDICAID SERVICE COORDINATION TO TARGET GROUP B

Medicaid Service Coordination (MSC) for Target Group B is a service which assists persons with developmental disabilities in gaining access to necessary services and supports appropriate to the needs of the individual. MSC is provided by qualified service coordinators and uses a person-centered approach to planning, developing, maintaining, and monitoring an Individualized Service Plan (ISP) with and for a person with developmental disabilities. MSC promotes the concepts of choice, individualized services and supports and consumer satisfaction.
D. Medicaid Service Coordination Functions

General Service Description

Medicaid Service Coordination helps a person access necessary supports and services including medical, social, educational, psychosocial, employment, habilitation, rehabilitation, financial, residential and legal services available and in accordance with the person’s valued outcomes as expressed in the Individualized Service Plan (ISP).

Medicaid Service coordination functions are:

- Enrollment (“Intake”)
- Development of the Individualized Service Plan (ISP)
- Implementation of the ISP
- Maintenance of the ISP

Enrollment

The service coordinator assesses eligibility for MSC based on the criteria specified in A above. The service coordinator completes necessary enrollment documents.

Development of the Individualized Service Plan (ISP)

The Individualized Service Plan (ISP) is developed using a person-centered approach. The service coordinator helps the person plan by choosing personal valued outcomes, and developing a personal network of activities, supports and services. The plan identifies those supports and services chosen by the consumer with the service coordinator’s assistance, as well as the entities that will supply them. The resulting planning information is written in the appropriate ISP format.

ISP development also includes the execution of a Service Coordination Agreement. This agreement, between the person served and the service coordinator, describes the service coordination activities the person wants and needs to meet his or her individualized goals as described in the ISP.
Implementation of the Individualized Service Plan (ISP)

Using the ISP as a blueprint, the service coordinator works with the person to achieve his or her valued outcomes. Chosen activities, supports, and the full array of services are accessed as identified in the plan. The service coordinator uses knowledge of the community and available resources and employs specialized skills to successfully implement the ISP. The service coordinator:

- Locates or creates natural supports and community resources.
- Locates funded services, helps determine eligibility, completes referrals, facilitates visits and interviews.
- Helps arrange for transportation to the community activities and services as necessary.
- Assists in communicating the content of the ISP, including valued outcomes, to service providers and assists providers in designing and implementing services consistent with the ISP.

Maintenance of the ISP

This is the ongoing service provided by the service coordinator. It includes:

- Assessing the person's satisfaction with his or her ISP, including the Service Coordination Agreement, and making adjustments as necessary.
- Supporting the person towards achievement of valued outcomes.
- Establishing and maintaining an effective communication network with service providers.
- Keeping up to date with changes, choices, temporary setbacks and accomplishments relating to the ISP
- Managing through difficulties or problems or crises as they occur.
- Assisting the consumer in assuring that rights, protections and health and safety needs are met pursuant to state law and regulations.
- Keeping the ISP document, including the Service Coordination Agreement, current by adapting it to change.
- Reviewing the ISP at least semi-annually.
Systemic Features and Functions

OMRDD centrally and through its local DDSOs will:

- Ensure access to the service for all eligible people.
- Assist people served in choosing a service coordination provider by making the full range of provider options known to the person and his/her family.
- Match individual needs of people with special provider capabilities and characteristics.
- Ensure uniformity in service coordinator and service coordinator supervisor basic training.
- Provide standardized curricula for service coordinators’ ongoing training.
- Organize and schedule training and carry out training.
- Carry out functions necessary to ensure quality of service and proper management of the program.
- Monitor Service Coordination Agreements between the service coordinator and the person served to ensure service coordinator fulfillment of commitments according to the agreed upon time frame.
- Make referrals to other service coordination providers when a person is dissatisfied with the current service provider.
- Monitor complaints of persons served and their families to detect patterns of poor service quality.
- Require provider corrective action as necessary.
- Oversee provider terminations and necessary referrals to other service coordination providers as necessary.

E. LIMITATIONS ON THE PROVISION OF MEDICAID SERVICE COORDINATION

Medicaid service coordination will not:

1. Be utilized to restrict the choice of a service coordination consumer to obtain medical care or services from any provider participating in the Medical Assistance Program who is qualified to provide such care or services and who undertakes to provide such care or service(s), including an organization which provides such care or services or which arranges for the delivery of such care or services on a prepayment basis.

2. Duplicate case management services currently provided under the Medical Assistance Program or under any other program.
December 16, 1999

3. Be utilized by providers of service coordination to create a demand for unnecessary services or programs particularly those services or programs within their scope of authority and

4. Be provided to persons receiving institutional care reimbursed under the Medical Assistance Program, except that Medicaid service coordination may be provided for up to 30 days to persons who are temporarily institutionalized, when the admission to the institution is initially expected to be 30 days or less.

While the activities of Medicaid Service Coordination secure access to an individual's needed service, the activities of service coordination do not include:

1. The actual provision of the service;
2. Medicaid eligibility determinations/redetermination;
3. Medicaid pre-admission screening;
4. Prior authorization for Medicaid services;
5. Required Medicaid utilization review;
6. EPSDT administration;
7. Activities in connection with “lock-in” provisions under §1915(a) of the Social Security Act;
8. Institutional discharge planning as required of hospitals, SNF’s, and ICFs/MR and
9. Client outreach considered necessary for the proper and efficient administration of the Medicaid State Plan.

TN #00-07 Approval Date January 10, 2001
Supersedes TN #89-16 Effective Date March 1, 2000
F. **QUALIFICATIONS**

1. **Providers**

   Pursuant to §1915(g)(1) of the Social Security Act, Medicaid service coordination will be provided by New York State OMRDD through a network of OMRDD employees and contractors.

2. **Service Coordinators**

   Service coordinators must:

   (a) either;

   (1) have experience providing OMRDD Comprehensive Medicaid Case Management (CMCM) or OMRHH Home and Community Based (HCBS) Waiver Service coordination or

   (2) (i) be a registered nurse or have at least an associate's degree (or equivalent accredited college credit hours) in a health or human services field, and

   (ii) have at least one year's experience working with persons with developmental disabilities or at least one year's experience providing service coordination to any population, and

   (b) attend professional development courses required by OMRDD.
G. **METHOD OF REIMBURSEMENT**

The method of reimbursement shall be a monthly fee established by OMRDD in conjunction with the New York State Department of Health and approved by the New York State Division of the Budget.
2. **Case Managers**

The case manager must have two years experience in a substantial number of activities outlined under CASE MANAGEMENT FUNCTIONS, including the performance of assessments and development of care management plans. Voluntary or part-time experience which can be verified will be accepted on a pro-rata basis. The following may be substituted for this requirement:

a. one year of case management experience and a degree in a health or human service field; or

b. one year of case management experience and an additional year of experience in other activities with the target population; or

c. a bachelor’s or master’s degree which includes a practicum encompassing a substantial number of activities outlined under CASE MANAGEMENT FUNCTIONS, including the performance of assessments and development of case management plans; or

d. the individual meets the regulatory requirements for case manager of a State Department within New York State.

3. **Qualifications of Providers Specific to Target Group “B”**

1. **Providers**

Providers of Comprehensive Medicaid Case Management to developmentally disabled persons in Target Group “B” shall only be the Borough/District Developmental Services Offices (B/DDSO) of CMRDD and voluntary non-profit agencies and organizations authorized by CMRDD as CMCM/CMRDD providers, and identified by CMRDD to SDSS.

2. **Case Managers**

Case managers serving Target Group “B” must meet the minimum qualifications described above.
State Plan under Title XIX of the Social Security Act
State/Territory: New York

TARGETED CASE MANAGEMENT SERVICES
Target Group B – Medicaid Service Coordination (MSC)

Office of People With Development Disabilities (OPWDD) -
Individuals with Intellectual and Developmental Disabilities (II/DD)

Target Group (42 Code of Federal Regulations 441.18(8)(i) and 441.18(9)):

Persons enrolled in Medical Assistance who:

(1) Have a developmental disability as defined in New York Mental Hygiene Law §1.03, and
(2) Are in need of the support of Care Manager to assist in coordinating the Medicaid-funded Long Term Supports that the person receives or would benefit from receiving, and
(3) Have chosen to receive the services and not to receive comprehensive Health Home Care Management through the Health Home model, and
(4) Reside in their own or family home, live in an OPWDD certified residence (Individualized Residential Alternative, Community Residence or Family Care Home). However, persons who receive Basic Home and Community-Based Services (HCBS) Plan Support and are receiving institutional care reimbursed under the Medical Assistance Program may continue to receive Basic HCBS Plan Support for up to 30 days when persons are temporarily institutionalized, and when the admission to the institution is initially expected to be 30 days or less.

___ Target group includes individuals transitioning to a community setting. Case-management services will be made available for up to 0 (zero) consecutive days of a covered stay in a medical institution. The target group does not include individuals between ages 22 and 64 who are served in Institutions for Mental Disease or individuals who are inmates of public institutions). (State Medicaid Directors Letter (SMDL), July 25, 2000)

Areas of State in which services will be provided (§1915(q)(1) of the Act):

X Entire State
___ Only in the following geographic areas: [Specify areas]

Comparability of services (§§1902(a)(10)(B) and 1915(g)(1))

X Services are provided in accordance with §1902(a)(10)(B) of the Act.

— Services are not comparable in amount duration and scope (§1915(g)(1)).

Definition of services (42 CFR 440.169): Targeted case management services are defined as services furnished to assist individuals, eligible under the State Plan, in gaining access to needed medical, social, educational and other services. Targeted Case Management includes the following assistance:

TN # ___ 18-0058__________________ Approval Date __02/28/2019__________
Supersedes TN # _12-0030__________ Effective Date __07/01/2018__________
State Plan under Title XIX of the Social Security Act
State/Territory: New York

TARGETED CASE MANAGEMENT SERVICES
Target Group B – Medicaid Service Coordination (MSC)

Office of People With Development Disabilities (OPWDD) -
Individuals with Intellectual and Developmental Disabilities (II/DD)

- Comprehensive assessment and periodic reassessment of individual needs, to determine the need for any medical, educational, social or other services. These assessment activities include
  - Gathering pertinent individual and family history;
  - identifying the individual’s needs and completing related documentation; and
  - gathering information from other sources such as family members, medical providers, social workers, and educators (if necessary), to form a complete assessment of the eligible individual;

Assessment activities include taking the person’s history, identifying needs of the individual, and completing related documentation. It also includes gathering information from other sources such as family members, medical providers, clinical assessments, educators, and other individuals/providers associated with the person, if necessary, to form a complete assessment (i.e., picture) of the person and his/her needs and goals. Re-assessment should occur when the care plan (known as an Individualized Service Plan (ISP) or Life Plan) is reviewed semi-annually or more frequently if necessary based on the changing needs of the person or his or her request for a reassessment. The Care Manager may recommend an individual seek more comprehensive services through the Health Home model if the needs of the individual require more frequent reviews and re-assessments than is available under this option. Basic HCBS Plan Support provides care management and does not provide the comprehensive, core services available through the Health Home model. The individual may choose to enroll in the Health Home service at any time. A request to change from between Basic HCBS Plan Support and Health Home Care Management may be submitted to the OPWDD Development Disabilities Regional Office (DDRO) which can authorize the new service for the first date of the following month.

- Development (and periodic revision) of a specific care plan that is based on the information collected through the assessment that
  - specifies the goals and actions to address the medical, social, educational, and other services needed by the individual;
  - includes activities such as ensuring the active participation of the eligible individual, and working with the individual (or the individual’s authorized health care decision maker) and others to develop those goals; and
  - identifies a course of action to respond to the assessed needs of the eligible individual;

- Referral and related activities (such as scheduling appointments for the individual) to help the eligible individual obtain needed services including activities that help link the individual with medical, social, educational providers, or other programs and services that are capable of providing needed services to address identified needs and achieve goals specified in the care plan; and

TN # 18-0058 Approval Date 02/28/2019
Supersedes TN # 12-0030 Effective Date 07/01/2018
TARGETED CASE MANAGEMENT SERVICES
Target Group B - Medicaid Service Coordination (MSC)

Office of People With Development Disabilities (OPWDD) - Individuals with Intellectual and Developmental Disabilities (II/DD)

- Monitoring and follow-up activities:
  - activities and contacts that are necessary to ensure the care plan is implemented and adequately addresses the eligible individual’s needs, and which may be with the individual, family members, service providers, or other entities or individuals and conducted as frequently as necessary, and including at least one annual monitoring, to determine whether the following conditions are met:
    - services are being furnished in accordance with the individual’s care plan;
    - services in the care plan are adequate; and
    - changes in the needs or status of the individual are reflected in the care plan. Monitoring and follow-up activities include making necessary adjustments in the care plan and service arrangements with providers.

This is the service provided by the Care Manager. It includes direct contacts on a biannual or up to a quarterly basis:
- Assessing the person's satisfaction with his or her supports and services as identified within the care plan, known as an ISP or Life Plan, and making adjustments as necessary;
- Supporting the person towards achievement of valued outcomes;
- Establishing and maintaining an effective communication network with service providers;
- Keeping up to date with changes, choices, temporary setbacks;
- Accomplishments relating to the persons supports and services as reflected in the ISP or Life Plan;
- Managing through difficulties or problems or crises as they occur;
- Assisting the person in assuring that his or her rights, protections and health and safety needs are met pursuant to state law and regulations;
- Keeping the ISP or Life Plan document current by adapting it to change; and
- Reviewing the ISP or Life Plan at least semi-annually.

Case management includes contacts with non-eligible individuals that are directly related to identifying the eligible individual’s needs and care, for the purposes of helping the eligible individual access services; identifying needs and supports to assist the eligible individual in obtaining services; providing case managers with useful feedback, and alerting case managers to changes in the eligible individual’s needs.

(42 CFR 440.169(e))

Qualifications of providers (42 CFR 441.18(a)(8)(v) and 42 CFR 441.18(b)):

TN # __ 18-0058 _____________ Approval Date __02/28/2019________
Supersedes TN # __ 12-0030 ___________ Effective Date __07/01/2018 ___
State Plan under Title XIX of the Social Security Act  
State/Territory: New York

TARGETED CASE MANAGEMENT SERVICES  
Target Group B - Medicaid Service Coordination (MSC)  
Office of People With Development Disabilities (OPWDD) -  
Individuals with Intellectual and Developmental Disabilities (I/DD)

Effective 07/01/2018, provider organizations will be known as CCO/HH. The following are the general provider qualifications under the Health Home model:

- CCO/HH providers must be enrolled (or be eligible for enrollment) in the NYS Medicaid program and agree to comply with all Medicaid program requirements and CCO/HH standards, requirements and guidance issued by the State.

- CCO/HH providers eligible to deliver Basic HCBS Plan Support must also be designated by NYSDOH and the OPWDD to deliver Health Home Care Management Services and Basic HCBS plan support.

- CCO/HH providers must also have:
  - the capacity to conduct IT-enabled planning services for the I/DD population; and
  - a Regional Network for referrals to developmental disability, health and behavioral health services.

Effective 07/01/2018, Care Managers will be regulated by the Health Home model. The following are the educational and experience qualifications a Care Manager employed by the CCO/HH:

1) A Bachelor’s degree with two (2) years of relevant experience, OR

2) A License as a Registered Nurse with two (2) years or relevant experience, which can include any employment experience and is not limited to case management/service coordination duties OR

3) A Master’s degree with one (1) year of relevant experience.

To support the transition to CCO/HH and Basic HCBS Plan Support services, the following special allowance is made for Care Managers who served as a MSC Service Coordinator and do not meet the above educational requirements.

1) Care Managers who served as an MSC Service Coordinators prior to July 1, 2018 are “grandfathered” to facilitate continuity for the individual receiving coordination. Documentation of the employee’s prior status as an MSC Service Coordinator may include a resume or other record created by the MSC Agency or the CCO/HH demonstrating that the person was employed as an MSC Service Coordinator prior to July 1, 2018.

2) CCO/HHs will be required to provide the CCO/HH core services training for current MSC Service Coordinators transitioning to CCO/HH Care Management and who do not meet the minimum education and experience requirements. Such training will be provided by the CCO/HH within one (1) year of contracting with an MSC Service Coordinator.

Office of People With Development Disabilities (OPWDD) -
Individuals with Intellectual and Developmental Disabilities (II/DD)

Coordinator. The CCO/HH will adjust training activities for Care Managers serving individuals enrolled in Basic HCBS Plan Support, but all Care Managers must be able to deliver both the Health Home Care Management service and Basic HCBS Plan Support.

Care Managers who serve Willowbrook Class members must be Qualified Intellectual Disabilities Professionals (QIDP).

Freedom of choice (42 CFR 441.18(a)(1):
The State assures that the provision of case management services will not restrict an individual's free choice of providers in violation of section 1902(a)(23) of the Act.
   1. Eligible individuals will have free choice of any qualified Medicaid provider within the specified geographic area identified in this plan.
   2. Eligible individuals will have free choice of any qualified Medicaid providers of other medical care under the plan.

Access to Services (42 CFR 441.18(a)(2), 42 CFR 441.18(a)(3), 42 CFR 441.18(a)(6):
The State assures the following:
   • Case management (including targeted case management) services will not be used to restrict an individual's access to other services under the plan.
   • Individuals will not be compelled to receive case management services, condition receipt of case management (or targeted case management) services on the receipt of other Medicaid services, or condition receipt of other Medicaid services on receipt of case management (or targeted case management) services; and
   • Providers of case management services do not exercise the agency's authority to authorize or deny the provision of other services under the plan.

Payment (42 CFR 441.18(a)(4):
Payment for case management or targeted case management services under the plan does not duplicate payments made to public agencies or private entities under other program authorities for this same purpose.

Case Records (42 CFR 441.18(a)(7)):
Providers maintain case records that document for all individuals receiving case management as follows: (i) The name of the individual; (ii) The dates of the case management services; (iii) The name of the provider agency (if relevant) and the person providing the case management service; (iv) The nature, content, units of the case management services received and whether goals specified in the care plan

have been achieved; (v) Whether the individual has declined services in the care plan; (vi) The need for, and occurrences of, coordination with other case managers; (vii) A timeline for obtaining needed services; (viii) A timeline for reevaluation of the plan.

Limitations:

Freedom of Choice Exception (§1915(g)(1) and 42 CFR 441.18(b)):
X Target group consists of eligible individuals with developmental disabilities. Providers are limited to qualified Medicaid providers of case management services capable of ensuring that individuals with developmental disabilities or with chronic mental illness receive needed services:

A CCO/HH is a Health Home that is tailored to meet the needs of individuals with intellectual and/or developmental disabilities (I/DD). CCO/HHs will be designated by the NYSDOH in collaboration with the NYS OPWDD. CCO/HHs and Care Managers provide person-centered care management, planning and coordination services that are tailored specifically to help people with I/DD and their families coordinate all services.

Effective 07/01/2018, entities must demonstrate they are controlled (at least 51 percent) by one or more non-profit organizations with a history of providing or coordinating developmental disability, health, and long-term care services to persons with II/DD, including MSC and/or I/DD long term supports and services (LTSS). New York State's expectation is that the governance structure and leadership of the I/DD Health Home (board members and officers) will have extensive experience coordinating care for individuals with I/DD in New York State; prior experience in overseeing and operating entities that have delivered MSC or I/DD HCBS waiver services to individuals with I/DD, and are in good standing with the State.

Case management does not include, and Federal Financial Participation (FFP) is not available in expenditures for, services defined in §44[1]0.169 when the case management activities are an integral and inseparable component of another covered Medicaid service (State Medicaid Manual (SMM) 4302.F).

Case management does not include, and Federal Financial Participation (FFP) is not available in expenditures for, services defined in §44[1]0.169 when the case management activities constitute the direct delivery of underlying medical, educational, social, or other services to which an eligible individual has been referred, including for foster care programs, services such as, but not limited to, the following: research gathering and completion of documentation required by the foster care program; assessing adoption placements; recruiting or interviewing potential foster care parents; serving legal papers; home investigations; providing

transportation; administering foster care subsidies; making placement arrangements.
(42 CFR 441.18(c))

FFP only is available for case management services or targeted case management services if there are no other third parties liable to pay for such services, including as reimbursement under a medical, social, educational, or other program except for case management that is included in an individualized education program or individualized family service plan consistent with §1903(c) of the Act. (§§1902(a)(25) and 1905(c))

While the activities of Care Managers secure access to an individual's needed services, the activities of care coordination do not include:

1. The actual provision of the service;
2. Medicaid eligibility determinations/redetermination;
3. Medicaid pre-admission screening;
4. Prior authorization for Medicaid services;
5. Required Medicaid utilization review;
6. Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) administration;
7. Activities in connection with "lock-in" provisions under §1915(a) of the Social Security Act;
8. Institutional discharge planning as required of hospitals, Skilled Nursing Facilities (SNFs), and ICFs/IIDs; and
9. Client outreach considered necessary for the proper and efficient administration of the Medicaid State Plan.

TN #90-42
Supersedes TN NEW
Approval Date October 10, 1991
Effective Date July 1, 1990
F. The State assures that the provision of case management services will not restrict an individual’s free choice of providers in violation of section 1902(a)(23) of the Act.

1. Eligible recipients will have free choice of the providers of case management services.

2. Eligible recipients will have free choice of the providers of other medical care under the plan.

G. Payment for case management services under the plan does not duplicate payments made to public agencies or private entities under other program authorities for this same purpose.
F. The State assures that the provision of case management services will not restrict an individual’s free choice of providers in violation of section 1902(a)(23) of the Act.

1. Eligible recipients will have free choice of the providers of case management services.

2. Eligible recipients will have free choice of the providers of other medical care under the plan.

G. Payment for case management services under the plan does not duplicate payments made to public agencies or private entities under other program authorities for this same purpose.
A. Target Group C

This target group consists of any categorically needy or medically needy individual who meets one or more of the following criteria:

1. All HIV infected persons;

2. All HIV antibody positive infants up to age 3 years if seroconversion has not been firmly established; and

3. All high risk individuals for a temporary period of time not to exceed 6 months with transition to another appropriate case management program for individuals who are HIV negative or continued unknown status. High risk individuals as the term is used in the expanded target Group C AIDS CMCM population are those individuals who are members of the following category:

   Men who have sex with men (MSM), substance abusers, persons with history of sexually transmitted diseases, sex workers, bisexual individuals, sexually active adolescents engaging in unprotected sex, and persons who engage in unprotected sex with HIV+ or high risk individuals.

Family members and coresidents (ie. collaterals) of the above targeted index clients may also receive case management services as necessary, to allow for the provision of necessary care and services to the targeted individual. Services for case collaterals shall be considered as one family unit in the case manager's caseload. Separate assessments and service plans are not required for collaterals, but may be incorporated into the case records of the primary client. Collaterals may have services arranged for by the case management provider. Case management services for collaterals should be limited to issues that directly affect the care of and services to the primary client.

The clients targeted under this proposal face enormous barriers to care, such as continuing drug and alcohol use, and their associated medical and social problems, domestic violence, mistrust of medical care and other services, fear of losing their children to foster care, fear of HIV infection and its consequences, lack of transportation and day care services, and lack of support in accessing care for their sexual partner and/or coresidents. These barriers to care can be overcome by the persistent efforts of indigenous community follow-up workers in cooperation with case managers. These workers must have special skills and strengths to deal with these problems, to win the trust and confidence of their clients in order to motivate them to return to care and to be continuously monitored thereafter. The magnitude of the effort required to accomplish this exceeds the capabilities of existing institutional bound and community case managers and requires the extensive frequent personal contact possible through an intensive case management program under Comprehensive Medicaid Case Management.
B. AREAS OF THE STATE WHERE SERVICES MAY BE PROVIDED

Services to this target group may be provided statewide.

C. COMPARABILITY OF SERVICES

Services will only be provided to those individuals who meet one or more of the criteria set forth in Section A, Target Group, of this Supplement.

Case management services will be provided without limitation as to amount, duration or scope.

D. DEFINITION OF CASE MANAGEMENT UNDER THE COMMUNITY FOLLOW-UP PROGRAM (CFP)

Case management is a process which will assist persons eligible for Medical Assistance to access necessary services in accordance with goals contained in a written case management plan.

Case management is a multi-step process comprised of the following activities:

1. Intake
2. Assessment
3. Initial Care Plan Development
4. Initial Care Plan Implementation
5. Reassessment
6. Care Plan Update
7. Care Plan Update Implementation
8. Monitoring
9. Crisis Intervention Activities
10. Termination/Case Disposition Activities
11. Client Advocacy, Interagency Coordination and Systems Development Activities
12. Supervisory Review/Case Conferencing

The sections below describe the specific functions in detail.

1. Intake

The case manager should collect identifying information concerning the client, family, care givers and informal supports including the intake elements required on forms developed or approved by the State Department of Health. A list of family members, coresidents and children not currently living at home should be recorded including identification of the primary caregiver, primary contacts and legal guardian(s) of the child(ren). Client consent to case management, including home visitation, case conferencing, service acquisition and registration procedures, should be obtained and documented in the case records.
New York
1-C4

Intake procedures should be initiated upon referral to the Community Follow-up Program provider and completed after the first visit. The Intake Procedures may be completed by the case manager, technician or the community follow-up worker. The intake includes confirmation that the case management program has been fully explained to the client. Clients have the right to choose care providers and, therefore, may choose whether or not to enroll in the case management program.

2. **Assessment**

Assessment is the collection of information about the client’s medical, physical and psychosocial condition, resources, needs, and confirmation of eligibility for the program. The assessment process should include a home visit to evaluate the client’s needs, informal supports, and general living conditions. All family members should be seen in the assessment interview(s), if possible. Direct caregivers and family members not able to be interviewed should be contacted by phone, if possible. The purpose of assessment is to identify the client’s/family’s problems and care needs, what care needs are being met and by whom, and what needs are not adequately met. The initial assessment will focus on immediate health and social services needs and address the client’s history of underutilization of care, and the reasons for such underutilization. Assessments will be documented on forms required or approved by the State Department of Health, AIDS Institute.

Assessment activities should be completed following the second visit but no later than 15 days from the date of receipt of the referral. The assessment should be completed by the case manager with assistance from the case management technician.

3. **Initial Service Plan Development**

Development of the service plan is the translation of assessment information into specific goals and objectives, and specific services, providers and timeframes to reach each objective. The service plan is developed by the case manager, in coordination with the client, representative and other providers.

The service plan will reflect goals and services to be provided to the client and family members. If services actually provided differ, a note explaining the difference should be made. The costs and sources of payment for all services should be documented as required by Department of Social Services regulations 505.16. The client’s response to the final plan, consent to case management and/or declination of any part of the plan by the client should be documented on forms approved by the Department of Health.

---

**TN #90-42**

**Supersedes TN NEW**

**Approval Date** October 10, 1991

**Effective Date** July 1, 1990
It is the intent of New York State that case management in the Community Follow-up Program represent a fully integrated case management approach. The case manager coordinates all necessary services along the continuum of care - both institutional and community based by both directly accessing services and by establishing linkages with other service programs including those under the jurisdiction of the local department of social services. The role of the case manager is to reduce the barriers in crossing administrative boundaries to ensure that clients obtain needed services at the appropriate time from wherever the services are available. Services accessed for the client should include institutional and non-institutional medical and non-medical services, social and other support services and linkages to existing community resources. In so doing, the case manager will access and coordinate services with other case managers who may also serve the client. The service plan will be developed following the second client contact. Immediate needs should be addressed by the case manager and such services should be implemented immediately after the intake. Other assessed needs should be addressed as soon as possible but in no case later than 30 days from the date of receipt of the referral. The service plan is to be developed by the case manager with the assistance of the technician or community follow-up worker.

4. **Initial Service Plan Implementation**

In implementation of the service plan, or service acquisition, the case manager assists the client and family or coresidents as needed, in contacting the support persons and other service providers to negotiate the delivery of planned services. The service plan may be modified to accommodate the client, family members, coresidents, support persons, and service providers. Any changes from the original plan should be noted in the record. These activities may be accomplished by the case manager or a member of the case management team.

The case manager, case management technician or community follow-up worker will (in accordance with the client’s assessed abilities):

a. contact providers, including support persons, by phone, in writing or in person

b. assist the client and family members or coresidents in making applications for services and entitlements, including basic needs such as transportation, child care, baby-sitting, etc.

c. confirm service delivery dates with providers, and supports

d. schedule multiple visits by family members on the same day to accommodate the needs of the family and children

e. document services that aren’t available or cannot be accessed

<table>

</tbody>
</table>
f. gain assurance from other care providers that services will be initiated, and confirm the delivery of these services

g. decide, with the client and other providers, on the ongoing responsibilities of each provider

h. give other service providers accurate and complete information about the service(s) they are expected to provide and the services provided by others.

Any changes to the service plan due to scheduling or availability of services will be documented. Service plan implementation should begin immediately after service needs are assessed and is an ongoing responsibility of the case manager. The case manager and support staff, in accordance with the client's assessed abilities, will assist the client by contacting providers and support persons when needs are identified. Assistance continues until the case manager or staff determines that the services have been arranged and received. Confirmation of need for, application for and receipt of services is required.

5. **Reassessment**

Reassessment is a scheduled or event generated formal re-examination of the client's situation, functioning, clinical and psychosocial needs, to identify changes which have occurred since the initial or most recent assessment. The reassessment should measure progress toward the desired goals outlined in the care plan and is used to prepare a new or revised service plan or confirm that current services remain appropriate. Reassessment is the responsibility of the case manager.

A formal reassessment under the program for clients who are receiving intensive case management is due within 90 days of admission and every 90 days thereafter or when a change in the client's status occurs which significantly effects the service plan. Significant changes in status include:

a. death, illness or hospitalization of a family member or care giver(s), or a condition or circumstance which impairs the client's ability to provide for the family's physical and/or emotional needs,

b. change in the client's clinical or functioning status,

c. loss of domicile, entitlement, or service.

e. document services that aren't available or cannot be accessed
6. **Service Plan Update**

Updating the service plan means modification to or revision of the service plan based on reassessment. Update of the service plan may also occur as a result of changes in clients’ needs, or information from monitoring contacts when changes are not significant as to require a formal reassessment. Update of the service plan includes all activities of service plan development, described above in subsection c, relative to new or changed needs and services. The service plan should be updated at every reassessment or when a change in client status occurs which significantly affects the service plan. The service plan may be updated by the case manager with assistance from the members of the case management team.

7. **Service Plan Update Implementation**

Implementation of the updated service plan includes the same activities as described for service plan implementation noted in subsection d, and may be the responsibility of the technician or community follow-up worker under the supervision of a case manager.

8. **Monitoring**

Monitoring is contact between the case manager or support staff and the client or representative. Support persons and service providers will also be contacted if necessary. The purpose of these contacts is to assure that services are being delivered according to the service plan. Contacts may include encounters in the agency, home, hospital or outpatient department, contacts by phone or in person. Any problems noted during monitoring contacts will be followed up immediately with the client, support person or provider, as needed, to address the problem.
The case manager and case management team will also coordinate the medical monitoring of all persons who are HIV positive with the primary care physician, clinic or AIDS Center responsible for the medical monitoring of asymptomatic HIV disease. This service includes the ongoing monitoring of preclinical HIV infection (asymptomatic) to determine the appropriate stage to initiate active prophylactic and secondary treatment for opportunistic infections. This service applies to HIV positive persons prior to clinical manifestations or laboratory evidence of HIV illness. The case manager should assure that CD4 (T4) testing is done every three or six months as appropriate, and if symptoms of HIV illness are identified, therapies provided by a referral to an AIDS Center hospital or appropriate outpatient department be arranged. Periodic testing for persons at risk, when requested, or when high risk behavior is reported or suspected should also be arranged by the case manager and case management team.

For clients receiving intensive case management in the Community Follow-up Program, a minimum of 9 contacts is required every 90 days. A minimum of six of these contacts must be face to face with the client. A minimum of four of these contacts must be home visits. Greater frequency of contacts in all categories will be arranged on an as needed basis and are in fact encouraged and anticipated in an intensive case management program. The case manager must personally have two contacts with the primary client every 90 days. Case conferences will be held for families with multiagency service plans including agencies such as Certified Home Health Agencies, local child welfare or community based organizations. Conferences will take place within 90 days of initial care plan implementation and every 180 days thereafter.

9. **Crisis Intervention**

The purpose of crisis service is to provide assessment and intensive short term treatment of acute medical, social, physical or emotional distress. Crisis intervention should be made available to all Community Follow-up Program clients on an emergency 24 hour basis through subcontract with a 24 hour crisis agency, or via direct provision by the case manager, by a crisis hotline, use of mobile crisis teams, or through referral to the Community Follow-up Program Director or supervisor. Crisis services may be needed for a variety of reasons. The crisis may relate to an emergency medical need, drug use or drug overdose, domestic violence or child abuse, etc. Irrespective of the nature of the crisis, it is the responsibility of the case manager or provider agency to assist the client, family, coresident or lover in obtaining the appropriate response to the situation, keeping in mind the need to maintain the client's dignity and rights to privacy and confidentiality. In addition, the crisis intervention should be designed to decrease inappropriate utilization of emergency rooms by targeting the response more appropriately to the identified crisis.
10. **Exit Planning/Case Discontinuations**

Exit planning procedures are initiated when the client:

a. expires

b. loses Medicaid or programmatic eligibility, though Medicaid eligibility is not required for eligibility in the CFP, or

c. declines the case management services of CFP, or

d. desires to be referred to a different CFP provider agency or to an existing case management program such as the Long Term Home Health Care Program, AIDS Home Care Program, or

e. will be institutionalized for greater than 30 days if Medicaid is the payor for such hospitalization and discharge to community based care is not anticipated. For private pay and third party individuals, case management services may continue beyond the 30 day limit while hospitalized, or

f. the client relocates out of the CFP providers’ service area.

In all cases, except where the client expires, the provider must complete a referral process designed to link the client with appropriate ongoing case management and other vital services necessary to meet their care needs. The provider must refer the client to another eligible CFP provider if one exists within the geographic area in which the client resides. With the client's consent, a case summary should be prepared for referral to the new provider. A final assessment noting disposition and measures of progress toward identified goals should be prepared and placed in the final record. The local Department of Social Services should be notified of the case disposition and can assist in referral of the client to alternate case management providers. Exit planning is a responsibility of the case manager with assistance from the members of the case management team.

11. **Patient Advocacy, Interagency Coordination and Systems Development**

The function of the case manager is to be an advocate for services for the client with particular emphasis on self-sufficiency in the community and avoidance of premature or unnecessary institutionalization.

---

TN  #90-42

Supersedes TN  NEW

Approval Date  October 10, 1991

Effective Date  July 1, 1990
12. **Supervisory Review/Case Conferencing**

An important component of the required quality assurance process for each CFP provider will be supervisory review of case management documentation, care plans and other products as well as peer review or case conferencing with other case managers. Therefore, for clients receiving case management, supervisory review of each client care plan by the designated supervisor or agency director will be conducted initially at the time of the development of the original service plan and every 90 days thereafter. In addition, each agency participating as a CFP provider will establish a peer review process wherein all case managers will present and discuss client specific case management plans with other case managers in the agency at least once annually. While we are requiring the supervisory function, we are not requiring a supervisory role. In this way agencies will have the flexibility to provide supervision with either in house staff or through an outside consultant.

Case managers will also be required to case conference with other agencies regarding specific clients at 90 days after service plan implementation and every 180 days thereafter, taking into consideration client consent, the client’s need for confidentiality and privacy, as well as Department of Health Regulations on confidentiality. This would include contacts with discharge planners, case managers from other agencies, etc. Supervisory review and case conferencing are billable on a direct patient specific basis in the community Follow-up Program. Agency conferences that are not patient specific are not directly billable; however, projected costs for these activities may be included in the administrative budget submitted by each provider.

13. **Program Limitations**

**Case Management under the Community Follow-up Program:**

1. must not be utilized to restrict the choice of a case management services recipient to obtain medical care or services from any provider participating in the Medical Assistance Program that is qualified to provide such care or services and who undertakes to provide such care or service(s) including an organization which provides such care or services or which arranges for the delivery of such care or services on a prepayment basis;

2. must not duplicate certain case management services currently provided under the Medical Assistance Program or other funding sources such as the Long Term Home Health Care Program, AIDS, Home Care Program under Chapter 622 of the Laws of 1988, and the Care at Home Program (Katie Beckett Model Waivers).
New York
1-C11

3. must not be utilized by providers of case management to create a demand for unnecessary services or programs, particularly those services or programs within their scope of authority; and

4. must not be provided to persons receiving institutional care for more than 30 days or when discharge to community based care is not anticipated and care is reimbursed under the Medical Assistance Program. Case management services may be provided for children and family members during this period of hospitalization.

While the activities of case management services secure access to, including referrals to and arrangements for, an individual’s needed service, reimbursement for case management does not include:

1. the actual provision of the service;
2. Medicaid eligibility determinations/redeterminations;
3. Medicaid preadmission screening;
4. prior authorization for Medicaid services;
5. required Medicaid utilization review;
6. administration of Child-Teen Health Program Services;
7. activities in connection with “lock-in” provisions under 1915(a) of the Social Security Act;
8. institutional discharge planning as required of hospitals, SNFs, ICFs and ICF/MRs; and
9. client outreach.

E. QUALIFICATIONS

1. Provider Qualifications

Provider agencies applying for participation in the Community Follow-up Program must meet one of the following requirements:

(a) have 2 years demonstrated experience in the care of the clients with HIV related illnesses or in providing case management or other services to clients with HIV illness. Examples of eligible agencies will include: Article 28 facilities, Community Based Organizations (CBOs), Community Health Centers (CHCs), or Community Service Programs (CSPs), Certified Home Health Agencies (CHHAs), or

(b) have 3 years demonstrated experience in the provision of maternal/pediatric services or in providing case management or care planning services to prenatal or post partum women and their children or families, or
New York
1-C12

(c) have 3 years demonstrated experience in the provision of drug abuse and/or drug treatment services, foster care preventive services or adult protective services including case management to clients and families that are at risk of foster care, including but not limited to local departments of social services, or

(d) be a hospital that has a provider agreement with the New York State Department of Health to participate in the Department’s Obstetrical HIV Counseling/Testing/Care Initiative.

2. **Staff Qualifications**

   A. **Case Manager Qualifications**

      To be eligible for reimbursement under this program, the case manager employed by the agency must meet the following required education/experience:

      1. a Bachelor's or Master's Degree which includes a practicum encompassing case management practices or a major in Psychology, Sociology, Social Work, or related subjects, or

      2. one year of qualified experience and an Associate Degree or 60 credit hours of college study from a regionally accredited college or university or one recognized by the New York State Education Department as following acceptable educational practices, or

      3. two years of qualified experience and/or of case management experience, or

      4. a degree in nursing or certification as a registered professional nurse or a licensed practical nurse with one year of qualified experience, or

      5. qualifications meeting the regulatory requirements of a state agency for case manager.

      **Qualified Experience** means verifiable full, part time or voluntary case management or case work with the following target populations:

      1. persons with HIV related illnesses
      2. women, children and families at risk of foster care
      3. substance using families

   B. **Case Management Technician Qualifications**

      Case management technicians must have a high school diploma or equivalent or must be working towards a high school equivalency diploma (GED) at the time of employment, have one year of qualified experience and have received intensive training in the Case Management Technician curriculum developed by Hunter College, and shall work under the supervision of the case manager.

   **TN #90-42**
   **Approval Date** October 10, 1991
   **Supersedes TN** NEW
   **Effective Date** July 1, 1990
C. **Community Follow-up Worker Qualifications**

The community follow-up worker, under the supervision of the case manager or case management technician, has no required educational or experiential requirements, but should have the following characteristics:

a. maturity, emotional and mental stability

b. ability to read and write, understand and carry out directions and instructions, record messages and keep simple records

c. be a resident or at least familiar with the local community and have knowledge of services and resources that are available

d. good physical health

e. a sympathetic attitude towards providing services to persons with HIV illness

f. fluency in local languages such as Spanish and Creole

g. experience working in the community preferable

In addition, the agency shall have the responsibility of assuring that all case managers, technicians and community follow-up workers employed (including volunteers) receive a 2-3 day orientation training within the first month of employment in the agency. Each agency must maintain a training log to document the provision of training to all employees.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

CASE MANAGEMENT SERVICES

A. Target Group:

See attached Target Group “D”

B. Areas of State in which services will be provided:

[X] Entire State.

[ ] Only in the following geographic areas (authority of section 1915(g)(1) of the Act is invoked to provide services less than Statewide:

C. Comparability of Services

[ ] Services are provided in accordance with section 1902(a)(10)(B) of the Act.

[X] Services are not comparable in amount, duration, and scope. Authority of section 1915(g)(1) of the Act is invoked to provide services without regard to the requirements of section 1902(a)(10)(B) of the Act.

D. Definition of Services:

See attached

E. Qualification of Providers:

See attached

 TN #89-17 Approval Date August 23, 1990
 Supersedes TN NEW Effective Date April 1, 1989
The State assures that the provision of case management services will not restrict an individual’s free choice of providers in violation of section 1902(a)(23) of the Act.

1. Eligible recipients will have free choice of the providers of case management services.

2. Eligible recipients will have free choice of the providers of other medical care under the plan.

Payment for case management services under the plan does not duplicate payments made to public agencies or private entities under other program authorities for this same purpose.
A. **TARGET GROUP D**

The targeted group consists of medical assistance eligibles who are served by the Office of Mental Health’s Intensive Case Management Program and who:

(i) are seriously and persistently (chronically) mentally ill and

(ii) require intensive, personal and proactive intervention to help them obtain services, which will permit or enhance functioning in the community and

(iii) either have symptomology which is difficult to treat in the existing mental health care system or are unwilling or unable to adapt to the existing mental health care system.

These individuals include:

(1) high risk/heavy service users who are known to staff in emergency rooms, acute inpatient units, psychiatric centers as well as to providers of other acute and crisis service. May have multiple disabilities including drug abuse, alcohol abuse or developmental disabilities;

(2) extended care state psychiatric center patients who could be discharged but are not because of the absence of needed support in the community;

(3) mentally ill who are homeless and live on the streets or in shelters;

(4) seriously mentally ill children and adolescents whose disability disrupts their ability to function in educational, social, vocational and interpersonal spheres and may, without intervention, be institutionalized, incarcerated or hospitalized.

The aim is to benefit these clients by reducing hospitalization and reliance on emergency psychiatric services, as well as increasing employment, encouraging better medication compliance and generally improving the individual’s quality of life within the community.

B. **AREAS OF STATE IN WHICH SERVICES WILL BE PROVIDED TO TARGET GROUP D**

Entire State

D. **DEFINITION OF COMPREHENSIVE MEDICAID CASE MANAGEMENT REIMBURSABLE UNDER MEDICAID**

Case management is a process which will assist persons eligible for Medical Assistance to access necessary services in accordance with goals contained in a written case management plan.

**BASIC PREMISES OF COMPREHENSIVE MEDICAID CASE MANAGEMENT**

1. Case management services are those services which will assist persons eligible for Medical Assistance to obtain needed medical, social, psychosocial, educational, financial and other services.
Case Management is a human services agency tool for the effective management of multiple resources for the benefit of individuals identified as high utilizers of service who have problems accessing care, or belonging to certain age, diagnosis or specialized program groups. Effective case management must address quality, adequacy and continuity of service, and balance a concern for affordable service with assuring that eligible individuals receive the services appropriate to their needs. Target groups consist of functionally limited persons with multiple needs or high vulnerability who require intensive and/or long term intervention by health and other human services providers.

Case management services enable Medicaid eligibles to exercise their freedom of choice by providing knowledge of services available to them, providing access to the most appropriate service to meet their needs and assisting them to achieve their maximum level of functioning and independence in the most appropriate environment.

Case management empowers individuals by involving them in the decision making process, and allowing them to choose among all available options as a means of moving to the optimum situation where these individuals and their support system can address their needs. Case management implies utilization and development of such support networks as will maximize the effectiveness, efficiency and accountability of support services on behalf of the individual.

**DEFINITION OF CASE MANAGEMENT RELATED TO TARGET GROUP “D”**

Case management for Target Group “D” means those activities performed by case management staff related to ensuring that the mentally disabled individual has full access to the comprehensive array of services and assistance which the individual needs to maintain community life and to attain or retain capability for maximum personal independence.

Case management for Target Group “D” requires referral to and coordination with medical, social, educational, psycho-social, employment, habilitation, rehabilitation, financial, environmental, and legal services available within the community appropriate to the needs of the mentally ill individual.

**CASE MANAGEMENT FUNCTIONS**

Case management functions are determined by the recipient’s circumstances and therefore must be determined individually in each case. In no instance will case management include the provision of clinical or treatment services. A separate case record must be established for each individual recipient of case management services and must document each case management function provided.

---

**Supersedes TN:** NEW

**Approval Date:** August 23, 1990

**Effective Date:** April 1, 1989
A. **Intake and screening.**

This function consists of: the initial contact to provide information concerning case management; exploring the recipient's receptivity to the case management process; determining that the recipient is a member of the provider's targeted population; and identifying potential payors for services.

B. **Assessment and reassessment.**

During this phase the case manager must secure directly, or indirectly through collateral sources, with the recipient's permission: a determination of the nature and degree of the recipient's functional impairment through a medical evaluation; a determination of the recipient's functional eligibility for services; information from other agencies/individuals required to identify the barriers to care and existing gaps in service to the recipient; assessment of the recipient's service needs including medical, social, psychosocial, educational, financial and other services; and a description of the recipient's strengths, informal support system and environmental factors relative to his/her care.

C. **Case management plan and coordination.**

The case management activities required to establish a comprehensive written case management plan and to effect the coordination of services include: identification of the nature, amount, frequency, and duration of the case management services required by a particular recipient; with the participation of the recipient, a cost-conscious selection of the nature, amount, type, frequency and duration of services to be provided to the recipient; identification of the recipient's informal support network and providers of services; specification of the long term and short term goals to be achieved through the case management process; collaboration with hospital discharge planners, health care providers and other services providers, including informal caregivers and other case managers. It also includes, through case conferences, an exchange of clinical information which will assure:

1. the integration of clinical care plans throughout the case management process;
2. the continuity of service;
3. the avoidance of duplication of service (including case management services); and,
4. the establishment of a comprehensive case management plan that addresses the interdisciplinary needs of the recipient.

D. **Implementation of the case management plan.**

Implementation of the plan includes securing the services determined in the case management plan to be appropriate for a particular recipient through referral to those agencies or to persons who are qualified to provide the identified services; assisting the recipient with referral and/or application forms required for the acquisition of services; advocating for the recipient with all providers of service; and developing alternative services to assure continuity in the event of service disruption.
E. Crisis intervention. Crisis intervention by a case manager or practitioner includes when necessary: assessment of the nature of the recipient’s circumstances; determination of the recipient’s emergency service needs; and, revision of the case management plan, including any changes in activities or objectives required to achieve the established goal.

F. Monitoring and follow-up. As dictated by the client’s needs and desires, case manager services include: assuring that quality services, as identified in the case management plan, are delivered in a cost-conscious manner; assuring the recipient’s satisfaction with the services provided and advising the preparer of the case management plan of the findings; collecting data and documenting in the case record the progress of the recipient; making necessary revisions to the case management plan; making alternate arrangements when services have been denied or are unavailable to the recipient; and, assisting the recipient and/or provider of services to resolve disagreements, questions or problems with implementation of the case management plan.

G. Counseling and exit planning. This function consists of: assuring that the recipient obtains, on an ongoing basis, the maximum benefit from the services received; developing support groups for the recipient, the recipient’s family and informal providers of services; mediating among the recipient, the family network and/or other informal providers of services when problems with service provision occur; facilitating the recipient’s access to other appropriate care if and when eligibility for the targeted services ceases; and, assisting the recipient to anticipate the difficulties which may be encountered subsequent to discharge from or admission to facilities or other programs, including other case management programs.

PROCEDURAL REQUIREMENTS FOR PROVISION OF SERVICES

1. Assessments. The case management process must be initiated by the recipient and case manager (or practitioner as appropriate) through a written assessment of the recipient’s need for case management as well as medical, social, psychosocial, educational, financial and other services.

An assessment provides verification of the recipient’s current functioning and continuing need for services, the service priorities and evaluation of the recipient’s ability to benefit from such services. The assessment process includes, but is not limited to, those activities listed in paragraph B of CASE MANAGEMENT FUNCTIONS.

An assessment must be completed by a case manager within 15 days of the date of the referral or as specified in a referral agreement. The referral for service may include a plan of care containing significant information developed by the referral source which should be included as an integral part of the case management plan.
An assessment of the recipient’s need for case management and other services must be completed by the case manager every six months, or sooner if required by changes in the recipient’s condition or circumstances.

2. **Case management plan.**

A written case management plan must be completed by the case manager for each recipient of case management services within 30 days of the date of referral or as specified in a referral agreement, and must include, but is not limited to, those activities outlined in paragraph C under **CASE MANAGEMENT FUNCTIONS.**

The recipient's case management goals, with anticipated dates of completion, must be established in the initial case management plan, consistent with the recipient's service needs and assessment.

The case management plan must be reviewed and updated by the case manager as required by changes in the recipient's condition or circumstances, but not less frequently than every six months subsequent to the initial plan. Each time the case management plan is reviewed the goals established in the initial case management plan must be maintained or revised, and new goals and new time frames may be established with the participation of the recipient.

The case management plan must specify:

a. those activities which the recipient is expected to undertake within a given period of time toward the accomplishment of each case management goal;

b. the name of the person or agency, including the individual and/or family members, who will perform needed tasks;

c. the type of treatment program or service providers to which the recipient will be referred;

d. the method of provision and those activities to be performed by a service provider or other person to achieve the recipient's related goal and objective; and

e. the type, amount, frequency, and duration of services to be delivered or tasks to be performed.

3. **Continuity of service.**

Case management services must be ongoing from the time the recipient is accepted by the case management agency for services to the time when: the coordination of services provided through case management is not required or is no longer required by the recipient; the recipient moves from the social services district*; the long term goal has been reached; the recipient refuses to accept case management services; the recipient requests that his/her case be closed; the recipient is no longer eligible for services or, the recipient's case is appropriately transferred to another case manager.
Contact with the recipient or with a collateral source on the recipient’s behalf must be maintained by the case manager at least monthly or more frequently as specified in the provider’s agreement with the New York State Department of Social Services.

* The criteria for discontinuance by a particular entity when a client moves are inaccessibility and the provider’s incapability to provide adequate service to someone removed from their usual service area. Although equally qualified, each CMH entity is not capable of serving clients in all other parts of the State since serving this clientele requires frequent contact and an intimate knowledge of the support system in the client’s community. The current case manager is responsible to help transition clients to case managers in their new location or, if a program is not available to the best substitute. Clients are free to choose among qualified providers within the State.

**LIMITATIONS TO THE PROVISION OF MEDICAID CASE MANAGEMENT SERVICES**

Case management services must not:

1. be utilized to restrict the choice of a case management services recipient to obtain medical care or services from any provider participating in the Medical Assistance Program who is qualified to provide such care or services and who undertakes to provide such care or service(s), including an organization which provides such care or services or which arranges for the delivery of such care or services on a prepayment basis;

2. duplicate case management services currently provided under the Medical Assistance Program or under any other program;

3. be utilized by providers of case management to create a demand for unnecessary services or programs particularly those services or programs within their scope of authority;

4. be provided to persons receiving institutional care reimbursed under the Medical Assistance Program or to persons in receipt of case management services under a federal Home and Community Based Services waiver.

While the activities of case management services secure access to an individual’s needed service, the activities of case management do not include:

1. the actual provision of the service;

2. Medicaid eligibility determinations/redeterminations;

3. Medicaid preadmission screening;
4. prior authorization for Medicaid services;

5. required Medicaid utilization review;

6. EPSDT administration;

7. activities in connection with “lock-in” provisions under 1915(a) of the Social Security Act;

8. institutional discharge planning as required of hospitals, SNF, ICFs and ICF/MRs; and

9. client outreach considered necessary for the proper and efficient administration of the Medicaid State Plan.

LIMITATIONS SPECIFIC TO TARGET GROUP “D”

In order to support an intensive, personal and proactive service, Intensive Case Managers will carry an average active case load of twelve clients. Active adult ICM clients are seen a minimum of four times during a month. Active seriously emotionally disturbed children in the ICM program must receive four contacts during a month, three face-to-face and the fourth face-to-face may be with either the client or a collateral. Collaterals are defined in 14 NYCRR Part 587.4(a)(2) as members of the patient’s family or household, or significant others who regularly interact with the patient and are directly affected by or have the capability of affecting the patient’s condition and are identified in the treatment plan as having a role in treatment and/or identified in the pre-admission notes as being necessary for participation in the evaluation and assessment of the patient prior to admission. Each Office of Mental Health Regional Office shall maintain a listing by name (roster) of individuals meeting the basic participation criteria. These individuals may be referred to the roster by various community agencies, mental health agencies, (including State psychiatric facilities), and human service agencies with whom the client has been in contact. From these prospective clients, the Intensive Case Manager will determine which are viable to become active (i.e. that the client can be engaged in activities directed at fulfilling a case plan based on the goals of the program.)

If an active client has fewer than the minimum required face-to-face meetings described above during a month for two continuous months, she/he will be evaluated for return to the roster. Clients returned to rostered status may be placed back into active status expeditiously when the need arises.

E. QUALIFICATIONS OF PROVIDERS

1. Providers

Case management services may be provided by social services agencies, facilities, persons and other groups possessing the capability to provide such services who are approved by the New York State Commissioner of Social Services based upon an approved proposal submitted to the New York State Department of Social Services. Providers may include:

TN #95-48 Approval Date March 14, 1996
Supersedes TN #89-17 Effective Date October 1, 1995
Supplement 1 to Attachment 3.1-A

New York
1-D9

a. facilities licensed or certified under New York State law or regulation;
b. health care or social work professionals licensed or certified in accordance with New York State law;
c. state and local governmental agencies; and
d. home health agencies certified under New York State law.

2. **Case Managers**

The case manager must have two years experience in a substantial number of activities outlined under CASE MANAGEMENT FUNCTIONS, including the performance of assessments and development of care management plans. Voluntary or part-time experience which can be verified will be accepted on a pro-rata basis. The following may be substituted for this requirement:

a. one year of case management experience and a degree in a health or human services field; or

b. one year of case management experience and an additional year of experience in other activities with the target population; or

c. a bachelor's or master's degree which includes a practicum encompassing a substantial number of activities outlined under CASE MANAGEMENT FUNCTIONS, including the performance of assessments and development of case management plans; or

d. the individual meets the regulatory requirements for case manager of a State Department within New York State.

3. **Qualifications of Providers Specific to Target Group “D”**

1. **Providers**

The New York State Department of Social Services will authorize as ICM providers either employees of the New York State Office of Mental Health meeting the qualifications described below or employees of those organizations determined by OMH and certified to SDSS to have the capacity to provide specialized Intensive Case Management Services.

2. **Case Manager**

**Minimum Qualifications for Appointment As An Intensive Case Manager**

A bachelor’s degree in a human service field* or a NYS teacher’s certificate for which a bachelor's degree is required, and four years of experience in providing direct services to mentally disabled patients/clients or in linking mentally disabled patients/clients to a

Supplement 1 to Attachment 3.1-A

New York
1-D10

broad range of services essential to successfully living in a community setting, (e.g. medical, psychiatric, social, educational, legal, housing and financial services).

A master’s degree in human services field* may be substituted for two years of the required experience.

Minimum Qualifications for Appointment As A Coordinator of Intensive Case Management Services

A master’s degree in a human services field* and four years of experience in providing direct services to mentally disabled patients/clients or in linking mentally disabled patients/clients to a broad range of services essential to successfully living in a community setting (e.g. medical, psychiatric, social, education, legal, housing and financial services). Two years of this experience must have involved supervisory or managerial experience for a mental health program or major mental health program component.

* For purposes of qualifying for these titles a “Human Services Field” includes Social Work, Psychology, Nursing, Rehabilitation, Education, Occupational Therapy, Physical Therapy, Recreation or Recreation Therapy, Counseling, Community Mental Health, Child and Family Studies, Speech and Hearing, Sociology.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

CASE MANAGEMENT SERVICES

A. Target Group:

Target Group D1

B. Areas of State in which services will be provided:

[X] Entire State.

[ ] Only in the following geographic area (authority of section 1915(g)(1)) of the Act is invoked to provide services less than Statewide:

C. Comparability of Services

[X] Services are provided in accordance with section 1902(a)(10)(B) of the Act.

[ ] Services are not comparable in amount, duration, and scope. Authority of section 1915(g)(1) of the Act is invoked to provide services without regard to the requirements of section 1902(a)(10)(B) of the Act.

D. Definition of Services:

See attached

E. Qualifications of Providers:

See attached

F. The State assures that the provision of case management services will not restrict an individual’s free choice of providers in violation of section 1902(a)(23) of the Act.

1. Eligible recipients will have free choice of the providers of case management services.

2. Eligible recipients will have free choice of the providers of other medical care under the plan.

TN #01-02 Approval Date June 19, 2001

Supersedes TN NEW Effective Date January 1, 2001
G. Payment for case management services under the plan does not duplicate payments made to public agencies or private entities under other program authorities for this same purpose.

A. TARGET GROUP D1

The targeted group consists of medical assistance eligibles who are served by the Office of Mental Health’s (OMH) Flexible Intensive Case Management Program and who:

(i) are seriously and persistently (chronically) mentally ill and

(ii) require intensive, personal and proactive intervention to help them obtain services, which will permit or enhance functioning in the community and

(iii) either have symptomology which is difficult to treat in the existing mental health care system or are unwilling or unable to adapt to the existing mental health care system.

These individuals include:

(1) high risk/heavy service users who are known to staff in emergency rooms, acute inpatient units, psychiatric centers as well as to providers of other acute and crisis service. They may also have multiple disabilities including drug abuse, alcohol abuse or developmental disabilities;

(2) extended care state psychiatric center patients who could be discharged but are not because of the absence of needed support in the community;

(3) mentally ill who are homeless and live on the streets or in shelters;

(4) seriously mentally ill children and adolescents whose disability disrupts their ability to function in educational, social, vocational and interpersonal spheres and who might, without invention, be institutionalized, incarcerated or hospitalized.

The aim to benefit these clients by reducing hospitalization and reliance on emergency psychiatric services, as well as by increasing employment, encouraging better medication compliance and generally improving the individual’s quality of life within the community.

B. AREAS OF STATE IN WHICH SERVICES WILL BE PROVIDED TO TARGET GROUP D1

Statewide
C. DEFINITION OF COMPREHENSIVE MEDICAID CASE MANAGEMENT REIMBURSABLE UNDER MEDICAID

Case management is a process which will assist persons eligible for Medical Assistance to access necessary services in accordance with goals contained in a written case management plan.

BASIC PREMISES OF COMPREHENSIVE MEDICAID CASE MANAGEMENT

1. Case management services are those services which will assist persons eligible for Medical Assistance to obtain needed medical, social, psychosocial, educational, financial and other services.

2. Case Management is a human services agency tool for the effective management of multiple resources for the benefit of individuals identified as high utilizers of service who have problems accessing care, or belonging to certain age, diagnosis or specialized program groups. Effective case management must address quality, adequacy and continuity of service, and balance a concern for affordable services while assuring that eligible individuals receive the services appropriate to their needs. Targeted groups consist of functionally limited persons with multiple needs or high vulnerability who require intensive and/or long term intervention by health and other human services providers.

3. Case management services enable Medicaid eligibles to exercise their freedom of choice by providing information regarding services available to them, providing access to the most appropriate service to meet their needs and assisting them to achieve their maximum level of functioning and independence in the most appropriate environment.

4. Case management empowers individuals by involving them in the decision making process, and allowing them to choose among all available options as a means of moving to the optimum situation where these individuals and their support systems can address their needs. Case management implies utilization and development of support networks that will maximize the effectiveness, efficiency and accountability of support services on behalf of the individual.

DEFINITION OF CASE MANAGEMENT RELATED TO TARGET GROUP “D1”

Case management for Target Group “D1” means those activities performed by case management staff related to ensuring that the mentally disabled individual has full access to the comprehensive array of services and assistance which the individual needs to maintain community life and to attain or retain capability for maximum personal independence.
New York
1-D14

Case management for Target Group “D1” requires referral to and coordination with medical, social, educational, psycho-social, employment, habilitation, rehabilitation, financial, environmental, and legal services available within the community appropriate to the needs of the mentally ill individual.

CASE MANAGEMENT FUNCTIONS

Case management functions are determined by the recipient’s circumstances and therefore must be determined individually in each case. In no instance will case management include the provision of clinical or treatment services. A separate case record must be established for each individual recipient of case management services and must document each case management function provided.

A. **Intake and screening.**

This function consists of: the initial contact to provide information concerning case management; exploring the recipient’s receptivity to the case management process; determining that the recipient is a member of the provider’s targeted population; and identifying potential payors for services.

B. **Assessment and reassessment.**

During this phase the case manager or case management team must secure directly, or indirectly through collateral sources, with the recipient’s permission: a determination of the nature and degree of the recipient’s functional impairment through a medical evaluation; a determination of the recipient’s functional eligibility for services; information from other agencies/individuals required to identify the barriers to care and existing gaps in service to the recipient; assessment of the recipient’s service needs including medical, social, psychosocial, educational, financial and other services; and a description of the recipient’s strengths, informal support system and environmental factors relative to his/her care.

C. **Case management plan and coordination.**

The case management activities required to establish a comprehensive written case management plan and to effect the coordination of services include: identification of the nature, amount, frequency, and duration of the case management services required by a particular recipient; with the participation of the recipient, a cost-conscious selection of the nature, amount, type, frequency and duration of services to be provided to the recipient; identification of the recipient’s informal support network and providers of services; specification of the long term and short term goals to be achieved through the case management process; collaboration with hospital discharge planners, health care providers and other service providers, including informal caregivers and other case managers. It also includes, through case conferences, an exchange of clinical information which will assure:
1. the integration of clinical care plans throughout the case management process;
2. the continuity of service;
3. the avoidance of duplication of service (including case management services); and
4. the establishment of a comprehensive case management plan that addresses the interdisciplinary needs of the recipient.

D. Implementation of the case management plan.

Implementation of the plan includes securing the services determined in the case management plan to be appropriate for a particular recipient through referral to those agencies or to persons who are qualified to provide the identified services; assisting the recipient with referral and/or application forms required for the acquisition of services; advocating for the recipient with all providers of services; and developing alternative services to assure continuity in the event of service disruption.

E. Crisis intervention.

Crisis intervention by a case manager or practitioner includes when necessary: assessment of the nature of the recipient’s circumstances, determination of the recipient’s emergency service needs, and revision of the case management plan, including any changes in activities or objectives required to achieve the established goal.

F. Monitoring and follow-up.

As dictated by the client’s needs and desires, case manager services include: assuring that quality services, as identified in the case management plan, are delivered in a cost-conscious manner; assuring the recipient’s satisfaction with the services provided and advising the preparer of the case management plan of the findings; collecting data and documenting in the case record the progress of the recipient; making necessary revisions to the case management plan; making alternate arrangements when services have been denied or are unavailable to the recipient; and assisting the recipient and/or provider of services to resolve disagreements, questions or problems with implementation of the case management plan.

G. Counseling and exit planning.

This function consists of: assuring that the recipient obtains, on an ongoing basis, the maximum benefit from the services received; developing support groups for the recipient, the recipient’s family and informal providers of services; mediating among the recipient, the family network and/or other
informal providers of services when problems with service provision occur; facilitating the recipient's access to other appropriate care if and when eligibility for the targeted services ceases; and, assisting the recipient to anticipate the difficulties which may be encountered subsequent to discharge from or admission to facilities or other programs, including other case management programs.

PROCEDURAL REQUIREMENTS FOR PROVISION OF SERVICE

1. **Assessments.**

   The case management process must be initiated by the recipient and case manager, case management team, or practitioners as appropriate, through a written assessment of the recipient's need for case management as well as medical, social, psychosocial, educational, financial and other services.

   An assessment provides verification of the recipient's current functioning and continuing need for services, the service priorities and evaluation of the recipient's ability to benefit from such services. The assessment process includes, but is not limited to, those activities listed in paragraph B of CASE MANAGEMENT FUNCTIONS.

   An assessment shall be initiated within fifteen days and must be completed by a case manager or case management team within 30 days or as specified in a referral agreement. The referral for services may include a plan of care containing significant information developed by the referral source which should be included as an integral part of the case management plan.

   An assessment of the recipient's need for case management and other services must be completed by the case manager every six months, or sooner if required by changes in the recipient's condition or circumstances.

2. **Case management plan.**

   A written case management plan must be completed by the case manager or case management team for each recipient of case management services within 30 days of the date of referral or as specified in a referral agreement, and must include, but is not limited to, those activities outlined in paragraph C under CASE MANAGEMENT FUNCTIONS.

   The recipient's case management goals, with anticipated dates of completion, must be established in the initial case management plan, consistent with the recipient's service needs and assessment and must address those needs necessary to achieve
and maintain stabilization. The case management plan must be reviewed and updated by the case manager or case management team as required by changes in the recipient's condition or circumstances, but not less frequently than every six months subsequent to the initial plan. Each time the case management plan is reviewed the goals established in the initial case management plan must be renewed or revised, and new goals and new time frames may be established with participation of the recipient.

The case management plan must specify:

a. those activities which the recipient is expected to undertake within a given period of time toward the accomplishment of each case management goal;

b. the name of the person or agency, including the individual and/or family members, who will perform needed tasks;

c. the type of treatment program or service providers to which the recipient will be referred;

d. those activities to be performed by a service provider or other person to achieve the recipient's related goal and objective; and the method by which those activities will be performed, and

e. the type, amount, frequency, and duration of services to be delivered or tasks to be performed.

3. **Continuity of service.**

Case management services must be ongoing from the time the recipient is accepted by the case management agency for services to the time when: the coordination or services provided through case management is not required or is no longer required by the recipient; the recipient moves from the social services district; the long term goal has been reached; the recipient refuses to accept case management services; the recipient requests that his/her case by closed; the recipient is no longer eligible for services; of the recipient's case is appropriately transferred to another case manager.

Contact with the recipient or with a collateral source on the recipient's behalf must be maintained by the case manager or case management team at least monthly or more frequently as specified in the provider's agreement with the New York State Department of Health.
LIMITATIONS TO THE PROVISION OF MEDICAID CASE MANAGEMENT SERVICES

Case management services must not:

1. be utilized to restrict the choice of a case management services recipient to obtain medical care or services from any provider participating in the Medical Assistance Program who is qualified to provide such care or services and who undertakes to provide such care or service(s), including an organization which provides such care or services or which arranges for the delivery of such care or services on a prepayment basis;

2. duplicate case management services currently provided under the Medical Assistance Program or under any other program;

3. be utilized by providers of case management to create a demand for unnecessary services or programs particularly those services or programs within their scope of authority;

4. be provided to persons receiving institutional care reimbursed under the Medical Assistance Program or to persons in receipt of case management services under a federal Home and Community Based Waiver except as provided for in July 25, 2000 HCFA letter to State Medicaid Directors (Olmstead Update No. 3) which informed the States that Targeted Case Management (TCM), defined in section 1915(g) of the Act, may be furnished as a service to institutionalized persons who are about to leave the institution, to facilitate the process of transition to community services and to enable the person to gain access to needed medical, social, educational and other services in the community.

While the activities of case management services secure access to an individual's needed service, the activities of case management do not include:

1. the actual provision of the service;

2. Medicaid eligibility determinations/redeterminations;

3. Medicaid preadmission screening;

4. prior authorization for Medicaid services;
New York
1-D19

5. required Medicaid utilization review;

6. EPSDT administration;

7. activities in connection with “lock-in” provisions under 1915(a) of the Social Security Act;

8. institutional discharge planning as required of hospitals, SNF, ICFs and ICF/MRs; and

9. client outreach considered necessary for the proper and efficient administration of the Medicaid State Plan.

LIMITATIONS SPECIFIC TO TARGET GROUP “D1”

In order to support an intensive, personal and proactive service, Intensive Case Managers will carry an average active case load of twelve clients. Active adult ICM clients must be seen a minimum of two times during a month, but the program must provide in the aggregate a minimum of four visits times the number of Medicaid eligible clients per month per case manager. Active seriously emotionally disturbed children in the ICM program must be seen a minimum of two times during a month, but a maximum of one-quarter of the required total aggregate face-to-face contacts may be with collaterals as defined in 14 NYCRR Part 587. Individuals may be referred to the program by various community agencies, mental health agencies, (including State psychiatric facilities), and human service agencies with whom the client has been in contact. From these prospective clients, the Intensive Case Manager or Case Management team will determine which clients are suitable candidates for Intensive Case management (i.e., that the client can be engaged in activities directed at fulfilling a case plan based on the goals of the program.)

If an active client has fewer than the minimum required face-to-face meetings described above during a month for two continuous months, she/he will be evaluated for disenrollment. Clients ready for disenrollment may be placed into transitional status for a period not to exceed two months, and during that period the program/provider can bill for a maximum face to face contact of one visit per month. Clients who are disenrolled may be placed back into active status expeditiously when the need arises.
E. QUALIFICATIONS OF PROVIDERS

1. Providers

Case management services may be provided by social services agencies, facilities, persons and other groups possessing the capability to provide such services who are approved by the New York State Office of Mental Health and certified to the Department of Health (DOH) to have the capacity to provide specialized Intensive Case Management Services, so that DOH can enroll the providers in the Medicaid program. Providers may include:

a. facilities licensed or certified under New York State law or regulation;

b. health care or social work professionals licensed or certified in accordance with New York State law;

c. state and local governmental agencies; and

d. home health agencies certified under New York State law.

2. Case Managers

The case manager must have two years experience in a substantial number of activities outlined under CASE MANAGEMENT FUNCTIONS, including the performance of assessments and development of case management plans. Voluntary or part-time experience which can be verified will be accepted on a pro-rata basis. The following may be substituted for this requirement:

a. one year of case management experience and a degree in a health or human services field; or

b. one year of case management experience and an additional year of experience in other activities with the target population; or
c. a bachelor’s or master’s degree which includes a practicum encompassing a substantial number of activities outlined under CASE MANAGEMENT FUNCTION, including the performance of assessments and development or case management plans; or
d. the individual meets the regulatory requirements for case manager of a State Department within New York State.

3. **qualification of providers specific to target group “D1”**

1. **providers**

The New York State Office of Mental Health will authorize as ICM providers either employees of the New York State Office of Mental Health meeting the qualifications described below or employees of those organizations approved by OMH and certified to the Department of Health (DOH) to have the capacity to provide specialized Intensive Case Management Services, in order for the DOH to enroll the providers in the Medicaid program.

2. **Case Manager**

**minimum qualifications for appointment as an intensive case manager**

A bachelor’s degree in a human services field* or a NYS teacher’s certificate for which a bachelor’s degree is required, and four years of experience in providing direct services to mentally disabled patients/clients or in linking mentally disabled patients/clients to a broad range of services essential to successfully living in a community setting, (e.g. medical, psychiatric, social, educational, legal, housing and financial services).

A master’s degree in human services field* may be substituted for two years of the required experience.

**minimum qualifications for appointment as a coordinator of intensive case management services**

A master’s degree in a human services field* and four years of experience in providing direct services to mentally disabled patients/clients or in linking mentally disabled patients/clients to a broad range of services essential to successfully living in a community setting, (e.g. medical, psychiatric, social, educational, legal, housing and financial services).
enabled patients/clients to a broad range of services essential to successfully living in a community setting (e.g. medical, psychiatric, social, educational, legal, housing and financial services). Two years of this experience must have involved supervisory or managerial experience for a mental health program or major mental health program component.

* For purposes of qualifying for these titles a “Human Services Field” includes Social Work, Psychology, Nursing, Rehabilitation, Education, Occupational Therapy, Physical Therapy, Recreation or Recreation Therapy, Counseling, Community Mental Health, Child and Family Studies, Speech and Hearing, Sociology.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

CASE MANAGEMENT SERVICES

A. Target Group:

See attached Target Group D2

B. Areas of State in which services will be provided:

[X] Entire State.

[ ] Only in the following geographic areas (authority of section 1915(g)(1)) of the Act is invoked to provide services less than Statewide:

C. Comparability of Services

[X] Services are provided in accordance with section 1902(a)(10)(B) of the Act.

[ ] Services are not comparable in amount, duration, and scope. Authority of section 1915(g)(1) of the Act is invoked to provide services without regard to the requirements of section 1902(a)(10)(B) of the Act.

D. Definition of Services:

See attached

E. Qualifications of Providers

See attached

F. The State assures that the provision of case management services will not restrict an individual’s free choice of providers in violation of section 1902(a)(23) of the Act.

1. Eligible recipients will have free choice of the providers of case management services.

2. Eligible recipients will have free choice of the providers of other medical care under the plan.

G. Payment for case management services under the plan does not duplicate payments made to

public agencies or private entities under other program authorities for this same purpose.

A. **TARGET GROUP D2**

The targeted group consists of medical assistance eligibles who are served by the Office of Mental Health’s Blended and Flexible Case Management Program and who:

(i) are seriously and persistently (chronically) mentally ill, or seriously mentally ill and

(ii) require intensive, personal and proactive intervention to help them obtain services, which will permit or enhance functioning in the community, or require personal and proactive intervention to help them obtain and maintain services, which will permit or enhance functioning in the community; and

(iii) either have symptomatology which is difficult to treat in the existing mental health care system, or are unwilling or unable to adapt to the existing mental health care system, or need support to maintain their treatment connections and/or residential settings.

These individuals include:

(1) high risk/heavy service users who are known to staff in emergency rooms, acute inpatient units, psychiatric centers as well as to providers of other acute and crisis service. May have multiple disabilities including drug abuse, alcohol abuse or developmental disabilities, or

(2) persons with recent hospitalizations in either State psychiatric centers or acute care general hospitals, or

(3) extended care state psychiatric center patients who could be discharged but are not because of the absence of needed support in the community; or

(4) mentally ill who are homeless and live on the streets or in shelters; or

(5) seriously mentally ill children and adolescents whose disability disrupts their ability to function in educational, social, vocational and interpersonal spheres and who may, without invention, be institutionalized, incarcerated or hospitalized, or

(6) people in need of ongoing mental health support in order to maintain or enhance community tenure.
The aim is to benefit these clients by reducing hospitalization and reliance on emergency psychiatric services, as well as by increasing employment, encouraging better medication compliance and generally improving the client’s quality of life within the community.

B. AREAS OF STATE IN WHICH SERVICES WILL BE PROVIDED TO TARGET GROUP D2

Entire State

C. DEFINITION OF COMPREHENSIVE MEDICAID CASE MANAGEMENT REIMBURSABLE UNDER MEDICAID

Case management is a process which will assist persons eligible for Medical Assistance to access necessary services in accordance with goals contained in a written case management plan.

BASIC PREMISES OF COMPREHENSIVE MEDICAID CASE MANAGEMENT

1. Case management services are those services which will assist persons eligible for Medical Assistance to obtain needed medical, social, psychosocial, educational, financial and other services.

2. Case Management is a human services agency tool for the effective management of multiple resources for the benefit of individuals identified as high utilizers of service who have problems accessing care, or belonging to certain age, diagnosis or specialized program groups. Effective case management must address quality, adequacy and continuity of service, and balance a concern for affordable service while assuring that eligible individuals receive the services appropriate to their needs. Targeted groups consist of functionally limited persons with multiple needs or high vulnerability who require intensive and/or long term intervention by health and other human service providers.

3. Case management services enable Medicaid eligibles to exercise their freedom of choice by providing them with information regarding the services available to them, providing access to the most appropriate service to meet their needs and assisting them to achieve their maximum level of functioning and independence in the most appropriate environment.

4. Case management empowers individuals by involving them in the decision making process, and allowing them to choose among all available options as a means of
moving to the optimum situation in which these individuals and their support system can address their needs. Case management implies utilization and development of such support networks as will maximize the effectiveness, efficiency and accountability of support services on behalf of the individual.

DEFINITION OF CASE MANAGEMENT RELATED TO TARGET GROUP “D2”

Case management for Target Group “D2” means those activities performed by case management staff related to ensuring that the mentally disabled individual has full access to the comprehensive array of services and assistance which the individual needs to maintain community life and to attain or retain capability for maximum personal independence.

Case management for Target Group “D2” requires referral to and coordination with medical, social, education, psycho-social, employment, habilitation, rehabilitation, financial, environmental, and legal services available within the community appropriate to the needs of the mentally ill individual.

CASE MANAGEMENT FUNCTIONS

Case management functions are determined by the recipient’s circumstances and therefore must be determined individually in each case. In no instance will case management include the provision of clinical or treatment services. A separate case record must be established for each individual recipient of case management services which documents each case management function provided.

A. Intake and screening.

This function consists of: the initial contact to provide information concerning case management; exploring the recipient’s receptivity to the case management process; determining that the recipient is a member of the provider’s targeted population; and identifying potential payors for services.

B. Assessment and reassessment.

During this phase the case management team must secure directly, or indirectly through collateral sources, with the recipient’s permission: a determination of the nature and degree of the recipient’s functional impairment through a medical evaluation; a determination of the recipient’s functional eligibility for services; information from other agencies/individuals required to identify the barriers to care and existing gaps in service to the recipient; assessment of the recipient’s service needs including medical, social, psychosocial, educational, financial and other services; and a description of the recipient’s strengths, informal support system and environmental factors relative to his/her care.
C. Case management plan and coordination.

The case management activities required to establish a comprehensive written case management plan and to effect the coordination of services include: identification of the nature, amount, frequency, and duration of the case management services required by a particular recipient; with the participation of the recipient, a cost-conscious selection of the nature, amount, type, frequency and duration of services to be provided to the recipient; identification of the recipient’s informal support network and providers of services; specification of the long term and short term goals to be achieved through the case management process; collaboration with hospital discharge planners, health care providers and other service providers, including informal caregivers and other case managers. It also includes, through case conferences, an exchange of clinical information which will assure:

1. the integration of clinical care plans throughout the case management process;
2. the continuity of service;
3. the avoidance of duplication of service (including case management services); and,
4. the establishment of a comprehensive case management plan that addresses the interdisciplinary needs of the recipient.

D. Implementation of the case management plan.

Implementation of the plan includes securing the services determined in the case management plan to be appropriate for a particular recipient through referral to those agencies or to persons who are qualified to provide the identified services; assisting the recipient with referral and/or application forms required for the acquisition of services; advocating for the recipient with all providers of service; and developing alternative services to assure continuity in the event of service disruption.

E. Crisis intervention.

Crisis intervention by a case management team includes when necessary: assessment of the nature of the recipient’s circumstances; determination of the recipient’s emergency service needs; and, revision of the case management plan, including any changes in activities or objectives required to achieve the established goal.

F. Monitoring and follow-up.

As dictated by the client’s needs and desires, case manager services include: assuring that quality services, as identified in the case management plan, are delivered in a cost-conscious manner; assuring the recipient’s satisfaction with the services provided and advising the preparer of the case.

TN #01-02
Supersedes TN NEW
Approval Date June 19, 2001
Effective Date January 1, 2001
management plan whether the recipient is satisfied; collecting data and documenting in the case record the progress of the recipient; making necessary revisions to the case management plan; making alternate arrangements when services have been denied or are unavailable to the recipient; and, assisting the recipient and/or provider of services to resolve disagreements, questions or problems with implementation of the case management plan.

G. Counseling and exit planning.

This function consists of: assuring that the recipient obtains, on an ongoing basis, the maximum benefit from the services received; developing support groups for the recipient, the recipient’s family and informal providers of services; mediating among the recipient, the family network and/or other informal providers of services when problems with service provision occur; facilitating the recipient’s access to other appropriate care if and when eligibility for the targeted services ceases; and, assisting the recipient to anticipate the difficulties which may be encountered subsequent to discharge from or admission to facilities or other programs, including other case management programs.

PROCEDURAL REQUIREMENTS FOR PROVISION OF SERVICE

1. Assessments.

The case management process must be initiated by the recipient and case manager (or practitioner as appropriate) through a written assessment of the recipient’s need for case management as well as medical, social, psychosocial, educational, financial and other services.

An assessment provides verification of the recipient’s current functioning and continuing need for services, the service priorities and evaluation of the recipient’s ability to benefit from such services. The assessment process includes, but is not limited to, those activities listed in paragraph B of CASE MANAGEMENT FUNCTIONS.

An assessment must be completed by a case management team within 30 days of the date of the referral or as specified in a referral agreement. The referral for service may include a plan of care containing significant information developed by the referral source which should be included as an integral part of the case management plan.

An assessment of the recipient’s need for case management and other services must be completed by the case manager every six months, or sooner if required by changes in the recipient’s condition or circumstances.

2. Case management plan.

A written case management plan must be completed by the
case management team for each recipient of case management services within 30 days of the date of referral or as specified in a referral agreement, and must include, but is not limited to, those activities outlined in paragraph C under CASE MANAGEMENT FUNCTIONS.

The recipient’s case management goals, with anticipated dates of completion, must be established in the initial case management plan, consistent with the recipient’s service needs and assessment and must be address those needs necessary to achieve and maintain stabilization.

The case management plan must be reviewed and updated by the case management team as required by changes in the recipient’s condition or circumstances, but not less frequently than every six months subsequent to the initial plan. Each time the case management plan is reviewed the goals established in the initial case management plan must be maintained or revised, and new goals and new time frames may be established with the participation of the recipient.

The case management plan must specify:

a. those activities which the recipient is expected to undertake within a given period of time for purposes of accomplishing each case management goal;

b. the name of the person or agency, including the individual and/or family members, who will perform needed tasks;

c. the type of treatment program or service providers to which the recipient will be referred;

d. the activities to be performed by a service provider or other person to achieve the recipient’s related goal and objective; and the method by which such services shall be provided;

e. the type, amount, frequency, and duration of services to be delivered or tasks to be performed; and

f. whether the program plans to place a client into transitional status during the next six month period covered by the plan.

3. **Continuity of service.**

Case management services must be ongoing from the time the recipient is accepted by the case management agency for services to the time when: the coordination of services provided through case management is not required or is
no longer required by the recipient; the recipient moves from the social services district; the long term goal has been reached; the recipient refuses to accept case management services; the recipient requests that his/her case be closed; the recipient is no longer eligible for services.

Contact with the recipient or with a collateral source on the recipient's behalf must be maintained by the case manager at least monthly or more frequently as specified in the provider’s agreement with the New York State Office of Mental Health.

LIMITATIONS TO THE PROVISION OF MEDICAID CASE MANAGEMENT SERVICES

Case management services must not:

1. be utilized to restrict the choice of a case management services recipient to obtain medical care or services from any provider participating in the Medical Assistance Program who is qualified to provide such services and who undertakes to provide such care or service(s), including an organization which provides such care or services or which arranges for the delivery of such care or services on a prepayment basis;

2. duplicate case management services currently provided under the Medical Assistance Program or under any other program;

3. be utilized by providers of case management to create a demand for unnecessary services or programs particularly those services or programs within their scope of authority;

4. be provided to persons receiving institutional care reimbursed under the Medical Assistance Program or to persons in receipt of case management services under a federal Home and Community Based Waiver except as addressed in the July 25, 2000 HCFA letter to State Medicaid Directors which informed the States that Targeted case management (TCM), defined in section 1915(g) of the Act, may be furnished as a service to institutionalized persons who are about to leave the institution, to facilitate the process of transition to community services and to enable the person to gain access to needed medical, social, educational and other services in the community.
While the activities of case management services secure access to an individual’s needed service for the client, the activities of case management do not include:

1. the actual provision of the service;
2. Medicaid eligibility determinations/redeterminations;
3. Medicaid preadmission screening;
4. prior authorization for Medicaid services;
5. required Medicaid utilization review;
6. EPSCT administration;
7. activities in connection with “lock-in” provisions under 1915(a) of the Social Security Act;
8. institutional discharge planning as required of hospitals, SNF, ICFs and ICF/MRs; and
9. client outreach considered necessary for the proper and efficient administration of the Medicaid State Plan.

LIMITATIONS SPECIFIC TO TARGET GROUP “D2”

In order to support an intensive, personal and proactive service, Blended and Flexible Case Managers will carry case loads based on their designation as Intensive Case Managers or Supportive Case Managers. Intensive Case Managers are responsible to provide a minimum of 48 total monthly face to face contacts per manager. Supportive Case Managers are required to provide in the aggregate a minimum of twice the number of visits as the number of Supportive Case management clients. For children’s programs, a maximum of 25% of the total aggregate visits can be face-to-face contacts with collaterals as defined in 14 NYCRR Part 587.

Individuals may be referred to case management by various community agencies, mental health agencies, (including State psychiatric facilities), and human service agencies with whom the client has been in contact. From these prospective clients, the Blended and Flexible Case Management Program will determine which clients are appropriate for case management services and at what level (i.e., that the client can be engaged in activities directed at fulfilling a case plan based on the goals of the program.)
Clients who appear ready for disenrollment from the program can be placed into transitional status for a period not to exceed two months. During that time period the program can bill for the client as long as at least one face-to-face contact per month is provided. Clients who are disenrolled may be placed back into active status expeditiously when the need arises.

E. QUALIFICATIONS OF PROVIDERS

1. Providers

New York State Office of Mental Health (OMH) will authorize as Case Management providers either OMH employees meeting the qualifications approved below or employees of those organizations determined by OMH and certified to the DOH to have the capacity to provide specialized Case Management Services and having written agreements with appropriate mental health providers and other human service providers so that DOH can enroll the providers in the Medicaid program. Case management services may be provided by social services agencies, facilities, persons and other groups possessing the capability to provide such services that are approved by OMH. Providers may include:

a. facilities licensed or certified under New York State law or regulation;

b. health care or social work professionals licensed or certified in accordance with New York State law;

c. state and local governmental agencies; and

d. home health agencies certified under New York State law.

2. Case Managers

Intensive Case Managers:

The Intensive Case manager must have two years experience in a substantial number of activities outlined under CASE MANAGEMENT FUNCTIONS, including the performance of assessments and development of case management plans. Voluntary or part-time experience which can be verified will be accepted on a pro-rata basis. The following may be substituted for this requirement:
a. one year of case management experience and a degree in a health or human services field; or

b. one year of case management experience and an additional year of experience in other activities with the target population; or

c. a bachelor’s or master’s degree which includes a practicum encompassing a substantial number of activities outlined under CASE MANAGEMENT FUNCTIONS, including the performance of assessments and development or case management plans; or

d. the individual meets the regulatory requirements for case manager of a State Department within New York State.

Supportive Case Managers:

Must have two years in providing direct services or in a substantial number of activities outlined under “Case Management Functions” to people who are mentally disabled, or homeless. The following may be substituted for this requirement:

a. One year of case management experience and an associate degree in a health or human services field; or

b. One year of case management experience and an additional year of experience in other activities with the target population; or

c. A bachelor's or master's degree which includes a practicum encompassing a substantial number of activities with the target population; or

d. The individual meets the regulatory requirements for case manager of a State Department within New York State.

Minimum Qualifications for Appointment As A Coordinator of Blended and Flexible Case Management Services

A master's degree in a human services field* and four years of experience in providing direct services to mentally disabled patients/clients or in linking mentally disabled patients/clients to a broad range of services essential to successfully living in a community setting (e.g. medical, psychiatric, social, educational, legal, housing
and financial services). Two years of this experience must have involved supervisory or managerial experience for a mental health program or major mental health program component.

* For purposes of qualifying for these titles a “Human Services Field” includes Social Work, Psychology, Nursing, Rehabilitation, Education, Occupational Therapy, Physical Therapy, Recreation or Recreation Therapy, Counseling, Community Mental Health, Child and Family Studies, Speech and Hearing, Sociology.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT
CASE MANAGEMENT SERVICES

A. Target Group:

See attached Target Group E

B. Areas of State in which services will be provided:

[X] Only in the following geographic areas (authority of section 1915(g)(1) of the Act is invoked to provide services less than Statewide:

Services to this target population may be provided to residents of Kings County (Zip Codes 11203, 11212, 11213, 11216, 11221, 11225, 11233 and 11235), Bronx County (Zip Codes 10454, 10455, 10451, 10474 and 10459), New York County (Zip Codes 10026, 10027, 10030, 10031, 10037, 10039)

C. Comparability of Services

[X] Services are not comparable in amount, duration, and scope. Authority of section 1915(g)(1) of the Act is invoked to provide services without regard to the requirements of section 1902(a)(10)(B) of the Act.

D. Definition of Services:

See attached

E. Qualification of Providers:

See attached

TN #15-0031
Supersedes TN #90-0056
Approval Date September 4, 2015
Effective Date April 1, 2015
[A. TARGET GROUP

This target group consists of any categorically needy or medically needy individual who meets the following criteria:

1. Women of child bearing age who are pregnant or parenting, and

2. Infants under 1 year of age.

One of the most serious public health problems we are facing today is that of infant mortality. The problem is especially severe in certain urban areas among poor minority groups where the infant mortality rate is up to 3 times that of the population at large. Other factors which contribute to this problem are women who receive late or no prenatal care. Recent changes to Federal and New York State Law have expanded eligibility benefits to pregnant women and infants. Case management programs are expected to identify women who are at risk and assist them in accessing health care and other resources which they need to assure positive birth outcomes.

In some areas of New York City almost twenty percent of the infants born to minority women are low birth weight babies who are vulnerable to infections and sudden infant death syndrome as well as complications related to low birth weight itself.

Certain upstate cities mirror these rates in their center city areas. Case management will assist in assuring that mothers in these areas can avail themselves of health and social services to properly care for their infants.

In the areas in question, about 20% of the births are to teenage mothers and up to 75% are out of wedlock. The mothers in question are often inexperienced at heading a family and do not have the social supports available in an intact family, and as such have a great need for case management services to assist them in obtaining needed services for themselves and their infants.

After years of steady decline, infant mortality rates have once again begun to climb since 1987. Much of this increase can be laid at the feet of increasing use of illegal drugs and alcohol on the part of poor women in urban areas. In births where toxicity for illegal drugs is found, in New York City, infant mortality is an astronomical 34 in 1,000.

New York State hopes to attack these problems in a site-specific manner using case managers to pull together both Title XIX services and services from other funding streams to meet the needs of pregnant women and infants.]
[STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

CASE MANAGEMENT SERVICES]

[F. The State assures that the provision of case management services will not restrict an individual’s free choice of providers in violation of section 1902(a)(23) of the Act.

1. Eligible recipients will have free choice of the providers of case management services.

2. Eligible recipients will have free choice of the providers of other medical care under the plan.

G. Payment for case management services under the plan does not duplicate payments made to public agencies or private entities under other program authorities for this same purpose.]
[B. AREAS OF THE STATE WHERE SERVICES MAY BE PROVIDED]

Services to this target population may be provided to residents of Kings County (Zip Codes: 11203, 11212, 11213, 11216, 11221, 11225, 11233 and 11238), Bronx County (Zip Codes: 10454, 10455, 10451, 10474 and 10459), New York County (Zip Codes: 10026, 10027, 10030, 10031, 10037 and 10039) and Onondaga County, New York.

[C. COMPARABILITY OF SERVICES]

Services will only be provided to those individuals who meet one or more of the criteria set forth in Section A, Target Group, of this Supplement.

Case management services will be provided without limitation as to amount, duration or scope.

[D. DEFINITION OF CASE MANAGEMENT SERVICES TO PREGNANT AND PARENTING WOMEN AND INFANTS]

Case management is a process which will assist persons eligible for medical assistance to access needed medical, social, educational, and other services in accordance with a written case management plan.

Case management for this target group will be provided in the following fashion.

1. Referral

Referrals of Medicaid eligible women and infants who are part of the target population are made by prenatal and pediatric care providers in the areas involved. Other possible referral sources include alcohol and substance abuse services providers, schools, social agencies and local governmental agencies administering the Medicaid program, child protective and preventive services, programs under Title V of the Social Security Act and Section 17 of the Child Nutrition Act.

Hospitals in the target areas are encouraged to refer women who deliver at their facilities, who have received little or no prenatal care, test positive for illicit drugs or deliver low birth weight babies to case management agencies. Other women from the target areas will also be encouraged to participate because of the higher level of risk which they and their infants face.

The referral activity as outlined is included to add dimension to the problems faced by the target population and to show the degree to which existing service providers will be involved in the identification and referral of such clients. Successful case management for these clients depends in great part on the ability of the case manager to develop good working relationships with service providers. This includes becoming a recognized resource within the broader provider community i.e., a service to which clients may be referred.]
[These referral activities are not a function of the case manager; begin prior to the receipt of case management services; and are not billed as Medicaid case management.

2. Engagement

Based on the referral from the hospital, prenatal care or other provider or local governmental agency, the case management agency attempts to interest the Medicaid eligible women/infant in case management services. Because women in high poverty areas, especially those who use illegal drugs or alcohol, are hard to engage for services, agencies are encouraged to make a number of attempts to contact the woman. If a woman accepts services, she is then enrolled by the case management agency. In areas where there are multiple agencies providing services, each agency will be required to explain to the woman that she has her choice of case management providers.

3. Assessment/Reassessment

Within 15 days of the acceptance of case management services, the case manager must complete an initial assessment. This will include an evaluation of the met and unmet needs of the woman and her children, her strengths and weaknesses, both formal and informal supports and identification of providers of service, including other case management resources.

It is anticipated that the initial assessment will concentrate on the immediate issues of the woman and her children’s health and safety, substance abuse problems and family functioning. Subsequent reassessments (required at four month intervals) will likely deal with the family’s longer term needs such as education, safe housing, training and employment for economic security.

4. Case Management Plan Development

Within 30 days of the acceptance of case management services; the case manager must complete development of an initial services plan for the woman and her family. Individuals residing together mutually impact upon each other in terms of their activities and their needs. To deliver effective case management, the family structure, whatever it may be, needs to be taken into account. Family supports and family stressors have a significant impact on the client. If a “parenting” woman (targeted) is having parenting problems with a 2 year old (non-targeted) or needs to arrange for child care in order to participate in a substance abuse treatment program, the case manager must address these needs in the woman’s case management plan.

Case managers will not do assessments or case management plans for non-Medicaid eligible persons and will only assist non-Medicaid eligibles in obtaining services, when obtaining that service has a direct impact on the Medicaid eligible member of the target group.]
[Medicaid funding will not be used to provide case management services to non-Medicaid eligible family members. Based on the assessment and developed in conjunction with the client, the services plan should include the type and frequency of services needed and the method of obtaining them. Also included in the plan should be timeframes for achieving the objectives and the anticipated frequency of case management.

As in the case of the initial assessment, the initial plan will likely focus on the immediate service needs to insure health and safety of the woman and her children. Once these objectives are achieved, longer term planning for improvements in housing, education and employment will become basic to the plan.

The services plan in question must indicate where and by whom each service is to be delivered; the case manager will be responsible for assuring the delivery of services outlined in the plan. Each woman will have only one Medicaid reimbursed case manager. The services plan should be signed by the women to show her agreement and willingness to participate.

5. **Plan implementation**

The case manager assists the woman in acquiring those services which have been identified in the plan as being necessary. In many instances this will required an advocacy role on the part of the case manager in attempting to obtain priorities for the woman and her children within services networks which are already seriously taxed.

The case manager might be required to escort the woman to appointments, at least initially, until she becomes familiar with the parties and processes involved in service provision.

Service acquisition to implement the case management plan will be crucial to the success of the program. It will be necessary to develop priority consideration for such services as clinic appointments, substance abuse services and day care for the program.

6. **Monitoring**

Monitoring includes assuring that the services were received and that they are appropriate and of acceptable quality and that the client is satisfied that they are meeting the needs of herself and her family. The primary source for obtaining this information is from the woman herself, but case managers should also maintain contact with service providers to assure that the client is making progress and utilizing services properly.

Certain services are dependent on other services. For instance, the case manager will want to be certain that a woman using child care is actually getting active drug or alcohol treatment during the times that the child is being cared for.]
[7. Crisis Intervention]

With a population which engages in substance abuse, does not respond to health needs until they become emergent and lives in dangerous, unsafe and unhealthy housing, the potential for crisis is measurably increased. For this reason, case management agencies should prepare a crisis plan for individual clients to advise them where to turn in an emergency, as well as having an agency plan to assist clients on a 24 hour a day basis, if necessary.

It is not essential that the case manager be available on a 24 hour basis, but only that the agency have a viable plan for dealing with after hour emergencies.

In addition, the agency must be prepared to revise the services plan almost immediately if the crisis has lasting repercussions or requires a change in the mix or intensity of services.

8. Counseling and Exit Planning

The best case management practices help build self-esteem and improve the client’s ability to function more independently thus reducing or eliminating the need for further case management. As the case management becomes less intense, the client should be encouraged to participate in the development and implementation of her own plan objective.

When the case manager determines, in conjunction with the client, that case management is no longer necessary or if the woman loses program eligibility or moves to a different area or service system, the case manager should assist her in moving to new providers or sources of services. With the client’s consent, a final assessment and case summary should be prepared and forwarded to the new case manager or services source.

E. QUALIFICATIONS

1. Provider Agency Qualifications

Agencies may be qualified in one of the following ways.

a. One year of experience in providing case management services to pregnant or parenting women or infants.

b. Two years of experience in providing health care or social services to pregnant or parenting women or infants.

c. Two years of experience in providing drug or alcohol abuse treatment services to pregnant or parenting women.

d. Two years of experience in providing protective services for children or services to prevent their placement in foster care.]
2. Staff Qualifications

a. Case Manager

An individual with a Bachelors or Masters degree in Nursing, Social Work, Health Education or a related field. If the degree is in a required field, one year of case management experience is required.

b. Associate Case Manager/Community Health Worker/Community Advocate

Associate Case Managers (ACM/Community Health Workers (CHW/Community Advocate (CA) describes persons residing in the community who assist case managers to monitor and reach clients who do not routinely access organized medical care or entitlements or who may be reluctant to access help from organizations. These individuals are not providers of case management, but are part of the team approach to case management encouraged by this program. They may assist case managers in locating individuals in the community, maintaining contact and gaining acceptance and cooperation for the program and its goals.

These individual's must have two years of experience as case aides or similar experience with the target group. One year of this experience may be fulfilled by an intensive training program, approved by the State Medicaid Agency.]
Effective December 1, 2011, the State is terminating the optional reimbursement of Medicaid case management services provided through CONNECT — Target Group E described on pages 1-E1 through 1-E6.
[STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT]

CASE MANAGEMENT SERVICES]

[A. Target Group:

See attached Target Group F

B. Areas of State in which services will be provided:

[ ] Entire State.

[X] Only in the following geographic areas (authority of section 1915(g)(1) of the Act is invoked to provide services less than Statewide:

City of Newburgh, Orange County
City of Fulton, Oswego County
Addison School District, Steuben County

C. Comparability of Services

[ ] Services are provided in accordance with section 1902(a)(10)(B) of the Act.

[X] Services are not comparable in amount, duration, and scope. Authority of section 1915(g)(1) of the Act is invoked to provide services without regard to the requirements of section 1902(a)(10)(B) of the Act.

D. Definition of Services:

See pages 1-F7 and 1-F8]
[STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

CASE MANAGEMENT SERVICES]

[F. The State assures that the provision of case management services will not restrict an individual’s free choice of providers in violation of section 1902(a)(23) of the Act.

1. Eligible recipients will have free choice of the providers of case management services.

2. Eligible recipients will have free choice of the providers of other medical care under the plan.

G. Payment for case management services under the plan does not duplicate payments made to public agencies or private entities under other program authorities for this same purpose.]
[A. TARGETED GROUP

The targeted group consists of the categorically needy or medically needy who meet one or more of the following criteria.

Certain individuals residing in area of New York State designated as underserviced and economically distressed through the State’s Neighborhood Based Alliance (NBA) initiative. Under Chapter 657 of the Laws of 1990, the NBA is targeting state money, resources and services to designated areas in order to alleviate the pervasive and detrimental effects of poverty, lack of access to services and lack of services. Case management targeted individuals are those residents of the NBA area who are experiencing chronic or significant individual or family dysfunctions which might be ameliorated through effective case management referral and monitoring of service provision. Such dysfunctions are assessed as chronic or significant by the case manager in accordance with an assessment tool approved by the State Department of Social Services. The assessment will determine chronic or significant dysfunction of the following categories or characteristics:

(i) school dropout
(ii) low academic achievement
(iii) poor school attendance
(iv) foster care placement
(v) physical and/or mental abuse or neglect
(vi) alcohol and/or substance abuse
(vii) unemployment/underemployment
(viii) inadequate housing or homelessness
(ix) family court system involvement
(x) criminal justice system involvement
(xi) poor health care
(xii) family violence or sexual abuse

B. AREAS OF STATE IN WHICH SERVICES WILL BE PROVIDED TO TARGET GROUP F

City of Newburgh, New York Addison School District, New York City of Fulton, New York

C. DEFINITION OF COMPREHENSIVE MEDICAID CASE MANAGEMENT REIMBURSABLE UNDER MEDICAID

Case management is a process which will assist persons eligible for Medical Assistance to access necessary services in accordance with goals contained in a written case management plan.

DEFINITION OF CASE MANAGEMENT RELATED TO TARGET GROUP “F”

Case managers will assess, and refer the target population to the existing services including these newly available resources and services concentrated in the defined NBA community.]
[Case management for Target Group “F” means linkage and referral activities performed by case management staff for individuals who are struggling with the effects of multiple problems compounded by poverty and poor access to services. Through case management, clients will have improved access to the comprehensive array of services and assistance available in the community. Individual needs of the client will be assessed and a case management plan developed.

Case management for Target Group “F” requires referral to and coordination with medical, social, educational, psychosocial, employment, habilitation, rehabilitation, financial, environmental, and legal services available within the community for the purpose of increasing the client's ability to function independently in the community. The ultimate purpose is to increase the client's level of self-sufficiency.

Case management services to individuals who are not Medicaid eligible will be supported by public and private grant funds. A sliding fee scale for clients based on income level will also be established. Case management will be the means to linking clients to the health, social, economic and educational resources of the community.

**CASE MANAGEMENT FUNCTIONS**

Case management functions are determined by the recipient’s circumstances and therefore must be determined specifically in each case. In no instance will case management include the provision of clinical or treatment services. A separate case record must be established for each individual recipient of case management services and must document each case management function provided, including but not limited to:

A. **Intake and screening.**

   This function consists of: the initial contact to provide information concerning case management; exploring the recipient’s receptivity to the case management process; determining that the recipient is a member of the provider’s targeted population; and identifying potential payers for services.

B. **Assessment and reassessment.**

   During this phase the case manager will determine what services the individual needs to access. This determination requires the case manager to secure, as appropriate to the presenting problem, either directly, or indirectly through collateral sources, with the recipient’s permission: a determination of the nature and degree of the recipient’s functional impairment through a medical evaluation; a determination of the recipient’s functional eligibility for services; information from other agencies/individuals required to identify the barriers to care and existing gaps in service needs including medical, social, psychosocial, educational, financial and other services; and a description of the recipient’s strengths, informal support]
[system and environmental factors relative to his/her care. Medical/psychological evaluations shall be obtained indirectly through collateral sources with the permission of the recipient and are not a compensated component of case management.

C. Case management plan and coordination.

The activities required to establish a comprehensive written case management plan and to effect the coordination of services include: identification of the nature, amount, type, frequency and duration of services to be provided to the recipient with the participation of the recipient; identification of the recipient's informal support network and providers of services; specification of the long term and short term goals to be achieved through the case management process; collaboration with other service providers, including informal caregivers and other case managers. It also includes through case management conferences an exchange of clinical information which will assure:

1. case management plans throughout the case management process;
2. the continuity of service;
3. the avoidance of duplication of service (including case management services); and,
4. the establishment of a comprehensive case management plan that addresses the interdisciplinary needs of the recipient.

D. Implementation of the case management plan.

Implementation of the plan means assisting clients in gaining access to necessary services. Case managers must secure the services determined in the case management plan appropriate for a particular recipient through referral to those agencies or to persons who are qualified to provide the identified services. Implementation may mean assisting the recipient with referral and/or application forms required for the acquisition of services; advocating for the recipient with all providers of service; and developing a plan to access alternative services to assure continuity in the event of service disruption.

E. Crisis intervention.

Crisis intervention by a case manager or practitioner includes when necessary: assessment of the nature of the recipient's circumstances; determination of the recipient's emergency service needs; and revision of the case management plan, including any changes in activities or objectives required to achieve the established goal.

F. Monitoring and follow-up.

The case manager is responsible for: assuring that quality services, as identified in the case management plan, are delivered by the provider to whom referral was made; assuring the recipient's satisfaction with the services provided and, if the plan has been formulated by a practitioner]
[advising the preparer of the case management plan of the findings; collecting data and documenting the progress of the recipient in the case record; making necessary revisions to the case management plan; making alternate arrangements when services have been denied or are unavailable to the recipient; and, assisting the recipient and/or provider of services to resolve disagreements, questions or problems with implementation and continuation of the case management plan.]

**PROCEDURAL REQUIREMENTS FOR PROVISION OF SERVICE**

1. **Assessments.**

   The case management process must be initiated by the recipient and case manager (or practitioner as appropriate) through a written assessment of the recipient's need for case management as well as medical, social, psychosocial, educational, financial and other services.

   An assessment provides verification of the recipient's current functioning and continuing need for services, the service priorities and evaluation of the recipient's ability to benefit from such services. The assessment process includes those activities listed in paragraph B of **CASE MANAGEMENT FUNCTIONS**.

   An assessment must be completed by a case manager within 15 days of the date of the referral or as specified in a referral agreement. The referral for service may include a plan of care containing significant information developed by the referral source which should be included as an integral part of the case management plan.

   An updated assessment of the recipient's need for case management and other services must be completed by the case manager every six months, or sooner if required by changes in the recipients condition or circumstances.

2. **Case management plan.**

   A written case management plan must be completed by the case manager for each recipient of case management services within 30 days of the date of referral or as specified in a referral agreement, and must include those activities outlined in paragraph C under **CASE MANAGEMENT FUNCTIONS**.

   The recipient's case management goals, with anticipated dates of completion, must be established in the initial case management plan, consistent with the recipient's service needs and assessment.

   The case management plan must be reviewed and updated by the case manager as required by changes in the recipient's condition or circumstances, but not less frequently than every six months subsequent to the initial plan. Each time the case management plan is reviewed the goals established in the initial case management plan must be maintained or revised, and new goals and new time frames may be established with the participation of the recipient.]
[The case management plan must specify:

a. those activities which the recipient is expected to undertake within a given period of time toward the accomplishment of each case management goal;

b. the name of the person or agency, including the individual and/or family members, who will perform needed tasks;

c. the type of treatment program or service providers to which the recipient will be referred;

d. the method of provision and those activities to be performed by a service provider or other person to achieve the recipient's related goal and objective; and

e. the type, amount, frequency, duration and cost of case management and other services to be delivered or tasks to be performed.

3. Continuity of service.

Case management services must be ongoing from the time the recipient is accepted by the case management agency for services to the time when: the coordination of services provided through case management is not required or is no longer required by the recipient; the recipient moves from the target area; the long term goal has been reached; the recipient refuses to accept case management services; the recipient request that his/her case be closed; the recipient is no longer eligible for services; or, the recipient's case is appropriately transferred to another case manager.

Contact with the recipient or with a collateral source on the recipient's behalf must be maintained by the case manager at least monthly or more frequently as specified in the provider’s agreement with the New York State Department of Social Services.

LIMITATIONS TO THE PROVISION OF MEDICAID CASE MANAGEMENT SERVICES

Case management services must not:

1. be utilized to restrict the choice of a case management services recipient to obtain medical care or services from any provider participating in the Medical Assistance Program who is qualified to provide such care or services and who undertakes to provide such care or services or which arranges for the delivery of such care or services on a prepayment basis;

2. duplicate case management services currently provided under the Medical Assistance Program or under and other program;

3. be utilized by providers of case management to create a demand for unnecessary services or programs particularly those services or programs within their scope of authority.]
[While the activities of case management services secure access to an individual's needed service, the activities of case management do not include:

1. the actual provision of the service;
2. Medicaid eligibility determinations/redeterminations;
3. Medicaid preadmission screening;
4. prior authorization for Medicaid services;
5. required Medicaid utilization review;
6. EPSDT administration;
7. activities in connection with “lock-in” provisions under 1915(a) of the Social Security Act;
8. institutional discharge planning as required of hospitals, NF's;
9. client outreach considered necessary for the proper and efficient administration of the Medicaid State Plan.

Contact with the client or with a collateral source on the client's behalf must be maintained by the case manager at least monthly, or more frequently as specified in the proposal document submitted for each site.

E. Qualifications of Providers

1. Providers

Under New York State Regulations (18 NYCRR 505.16) case management services may be provided by social services agencies, facilities, persons and other groups possessing the capabilities to provide such services who are approved by the New York State Commissioner of Social Services based upon approved proposal submitted to the New York State Department of Social Services.

2. Case Managers

The case manager must have two years experience in a substantial number of activities outlined under CASE MANAGEMENT FUNCTIONS, including the performance of assessments and development of case management plans. Voluntary or part-time experience which can be verified will be accepted on a pro-rata basis. The following may be substituted for this requirement:

a. one year of case management experience and a degree in a health or human services field; or]
New York
1-F8

[b. one year of case management experience and an additional year of experience in other activities with the target population; or

c. a bachelor’s or master’s degree which includes a practicum encompassing a substantial number of activities outlined under **CASE MANAGEMENT FUNCTIONS**, including the performance of assessments and development of case management plans; or

d. the individual meets the regulatory requirements for case manager of a State Department within New York State.

**Provider Qualifications Specific to Target Group “F”**

1. **Providers**

The State Department of Social Services designation of providers for this target group will be based upon a proposal document demonstrating the capacity to provide the described services to the target population. The proposal document must be submitted to SDSS, Division of Health and Long Term Care (HLTC) by the local social services district in which an NBA site is located. Qualified agencies will be enrolled as case management providers to serve target populations within the NBA service area.

The NBA lead agencies will provide case management themselves and/or solicit new case managers from community agencies with additional special expertise in the targeted subpopulations. New case managers solicited by the lead agency must meet all provider qualifications, must execute separate provider agreements with the State and must bill the Medicaid program in their own right. The NBA lead agencies are responsible for identification of clients needing case management and referral to the appropriate case management agency. Lead agencies will be responsible for recordkeeping and Medicaid claim preparation only for the case management services they themselves render.

2. **Case Managers**

Case managers will meet the general qualifications described in Item E.2.

Additionally, the staff recruited to work for the case management and crisis intervention program in both a supervisory and direct service capacity will be individuals who are highly committed to the community network concept and have experience working with the variety of cultural and ethnic groups represented in the community. A variety of educational, experiential, and cultural backgrounds will be sought.]
Effective December 1, 2011, the State is terminating the optional reimbursement of Medicaid case management services provided through NBA — Target Group F described on pages 1-F1 through 1-F8.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

CASE MANAGEMENT SERVICES

A. Target Group: G

See attached.

B. Areas of State in which services will be provided:

[X] Entire State.

[ ] Only in the following geographic areas (authority of section 1915(g)(1) of the Act is invoked to provide services less than statewide:

C. Comparability of Services

[ ] Services are provided in accordance with section 1902(a)(10)(B) of the Act.

[X] Services are not comparable in amount, duration, and scope. Authority of section 1915(g)(1) of the Act is invoked to provide services without regard to the requirements of section 1902(a)(10)(B) of the Act.

D. Definition of Services:

See attached

E. Qualification of Providers:

See attached

TN #93-50

Approval Date March 9, 1995

Supersedes TN NEW

Effective Date September 1, 1993
A. TARGET POPULATION G

The target group consists of any categorically needy or medically needy eligibles

1. who are infants or toddlers from birth through age two years who have or are suspected of having a developmental delay or a diagnosed physical or mental condition that has a high probability of resulting in developmental delay, such as, Down Syndrome or other chromosome abnormalities, sensory impairments, inborn errors of metabolism, or fetal alcohol syndrome.

2. who have been referred to the municipal early intervention agency and are known to the New York State Department of Health.

3. who are in need of ongoing and comprehensive rather than incidental case management.

Developmental delay means that a child has not attained developmental milestones expected for the child’s chronological age, as measured by qualified professionals (a multidisciplinary team) using appropriate diagnostic instruments and/or procedures and informed clinical opinion, in one or more of the following areas of development: cognitive, physical (including vision and hearing), communication, social/emotional, or adaptive development. A developmental delay is a delay that has been documented as:

1. a twelve month delay in one functional area, or

2. a 33% delay in one functional area or a 25% delay in each of two areas, or,

3. if appropriate standardized instruments are individually administered in the evaluation process, a score of at least 2.0 standard deviations below the mean in one functional area or a score of at least 1.5 standard deviations below the mean in each of two functional areas, or

4. if because of a child’s age, condition or type of diagnostic instruments available in specific domains, a standardized score is either inappropriate or cannot be determined, a child may be deemed eligible by the informed clinical opinion of the multidisciplinary team. Criteria such as functional status, recent rate of change in development, prognosis for change in the future based on anticipated medical/health factors and other factors relevant to the needs of that child and family shall also be considered.

B. AREAS OF STATE IN WHICH SERVICES WILL BE PROVIDED TO TARGET GROUP G

Entire State

| TN #93-50 | Approval Date | March 9, 1995 |
| Supersedes TN | NEW | Effective Date | September 1, 1993 |
D. **DEFINITION OF CASE MANAGEMENT RELATED TO TARGET GROUP “G”**

Case management for Target Group “G” means those initial an ongoing activities performed by case management staff related to ensuring that developmentally delayed infants and toddlers are provided access to services allowing them to:

1. resolve problems which will interfere with their independence or self-sufficiency;
2. resolve problems which will interfere with attainment or maintenance of self support or economic independence;
3. maintain themselves in the community rather than reside in, or return to an institution; or
4. prevent institutionalization from occurring.

Case management is a process which will assist Medicaid eligible infants and toddlers and their families to access necessary medical, social, psychological, educational, financial and other services in accordance with the goals contained in a written individualized family services plan (IFSP).

**CASE MANAGEMENT FUNCTIONS**

Case Management functions are determined by the recipient’s circumstances and therefore must be determined specifically in each case. In no instance will case management include the provision of clinical or treatment services. A separate case record must be established for each individual recipient of case management services and must document each case management service provided.

1. **Intake.**

   This function consists of: the initial contact to provide information concerning case management and early intervention to the parent of an eligible child or a child thought to be eligible for early intervention services at a time and place convenient to the family; exploration of the family’s receptivity to the early intervention program and the case management process; determine that the recipient is a member of the targeted population; ascertain if the child and family are presently receiving case management services or other services from public or private agencies, identification of potential payers for services; and review of due process rights concerning mediation and impartial hearing.

2. **Assessment.**

   The case manager must secure directly, or indirectly through collateral sources, with the family’s permission: a determination of the nature and degree of the recipient’s developmental status; must assist the family in accessing screening and evaluation services; review evaluation reports with the family; assist the family to identify their priorities, concerns, and resources; explore options and assist the family’s investigation of these options; inform the family of other program and services that may be of benefit and assist
in making referrals; assist the recipient in obtaining interim early intervention services when it is determined that the child has an obvious, immediate need and prepare an interim family services plan.

3. **Case management plan and coordination.**

For purposes of early intervention, the case management plan will be known as the individualized family services plan (IFSP). Development of the IFSP is the translation of specific goals and objectives, and specific services, providers and timeframes to reach each objective. The case manager shall convene a meeting at a time and place convenient to the family with 45 days of the child's referral to early intervention agency except under exceptional documented circumstances. Participants shall include: parent(s); early intervention official; case manager; the designated contact from the evaluation team; and other individuals the family invite or give consent to attend.

The IFSP shall be in writing and include the following:

a. A statement of the child's levels of functioning in each of the following domains: physical development; cognitive development; communication development; social or emotional development; and adaptive development.

b. A physician's order pertaining to early intervention services, which includes a diagnostic statement and purpose of treatment.

c. With parental consent, a statement of the family's strengths, priorities, concerns that relate to enhancing the development of their child.

d. A statement of the major outcomes expected to be achieved and for the child and family, including timelines, and criteria and procedures that will be used to determine whether progress toward achieving the outcomes is being made and whether modifications or revisions of the outcomes and services is necessary.

e. A statement of specific early intervention services necessary to meet the unique needs of the child and family, including the frequency, intensity, location and the method of delivering services.

f. A statement of the natural environments in which early intervention services will be provided.

g. When early intervention services are to be delivered to a recipient in a group setting without typically developing peers, the IFSP shall document the reason(s).

h. A statement of other services, including medical services, that are not required under the early intervention program but are needed by the child and the family and the payment mechanism for these services.

i. A statement of other public programs under which the child and family may be eligible for benefits, and a referral, where indicated.

---

**Approval Date** March 9, 1995

**Effective Date** September 1, 1993
j. The projected dates for initiation of services and the anticipated duration of these services.

k. The name of the case manager who will be responsible for the implementation of the IFSP.

l. If applicable, steps to be taken to support the potential transition of the recipient to special education or other services.

m. The IFSP shall reflect the family’s response to the plan, consent to case management and/or declination of any part of the plan by the family must be documented.

4. **Implementation of the IFSP.**

   In implementing the service plan, the case manager must assist the recipient and family, as needed, in securing the services determined in the plan to be appropriate through referral to agencies or to persons who are qualified to provide identified services; assist the family in making applications for services and entitlements; confirm service delivery dates with providers and supports; assist with family scheduling needs; advocate for the family with all service providers; document services that are not available or cannot be accessed; and developing alternatives services to assure continuity in the event of service disruption.

5. **Reassessment and IFSP update.**

   Reassessment is a scheduled or event generated formal reexamination of the client’s situation, functioning, clinical and psychosocial needs, to identify changes which have occurred since the initial or most recent assessment. The IFSP for a child and the child’s family must be reviewed at six months intervals and evaluated annually, or more frequently if conditions warrant, or if a parent requests such a review.

6. **IFSP update implementation.**

   The case manager is responsible for the implementation of the updated plan. Such implementation will include the same activities as described in subsection 4 above.

7. **Crisis intervention.**

   Crisis intervention by a case manager includes when necessary: assessment of the nature of the recipient’s circumstances; determination of the recipient’s emergency needs; and revision of the IFSP, including any changes in activities and objectives required to achieve the established goal.

8. **Monitoring and follow-up.**

   The case manager is responsible for:

   a. assuring that quality services, as identified in the IFSP, are delivered in a cost-conscious manner;
   b. assuring the family’s satisfaction with the services provided;
   c. collecting data and documenting the progress of the recipient in a case record;
   d. making necessary revisions to the plan in conjunction with the family, early intervention official, the designated representative of the evaluation team and the service provider(s);
e. making alternate arrangements when services have been denied or are unavailable; and

f. assisting both the family and providers of service to resolve disagreements, questions or problems relating to the implementation of the IFSP.

9. Counseling and exit planning.

The case manager must assure that the recipient obtains, on an ongoing basis, the maximum benefit from the services received; developing support groups for the recipient, the recipient’s family and informal providers of service; mediating among the recipient, the family network and/or other informal providers when problems with service delivery occur; facilitating the recipient’s access to other appropriate care when eligibility for targeted services ceases; and assisting the family to anticipate difficulties which may be encountered subsequent to from the early intervention program or admission to other programs, including other case management programs.

10. Supervisory Review/ Case Conferencing.

An important component of the required quality assurance process for each case management provider will be supervisory review of case management documentation. IFSPs and other products as well as peer review or case conferencing with other case managers.

PROCEDURAL REQUIREMENTS FOR PROVISION OF SERVICE

1. Assessments.

The case management process must be initiated by the family and the case manager through a written assessment of the child and family’s need for case management and early intervention services including medical, social, psychosocial, educational, financial and other services.

An assessment provides verification of the recipient’s current functioning and continuing need for services, the service priorities and evaluation of the child’s ability to benefit from such services. The assessment process includes, but is not limited to, those activities listed in paragraph 2 of CASE MANAGEMENT FUNCTIONS.

The case manager shall promptly arrange a contact with the family at a time, place and manner reasonably convenient for the parent(s) consistent with applicable timeliness requirements and initiate the assessment process. Information developed by the referral source should be included as an integral part of the case management plan.

An assessment of the recipient’s need for case management and early intervention services must be completed by the case manager every six months, or sooner if required by changes in the child’s condition or circumstances.

2. Case management plan.

A written IFSP must be completed by the case manager for each child eligible for early intervention services within 45 days of referral to the municipal early intervention agency and must include, but is not limited to, those functions outlined in paragraph 3 under CASE MANAGEMENT FUNCTIONS.
3. **Continuity of service.**

Case management services must be ongoing from the time the child is referred to the local early intervention agency for services to the time when: when the coordination of services provided through case management is not required or is no longer required by the child and his/her family; the child moves from the local social services district*; the long term goal has been reached; the family refuses to accept case management services; the family requests that its case be closed; the child is no longer eligible for services; or the child’s case is appropriately transferred to another case manager.

Contact with the child, his or her family or with a collateral source on the child’s behalf must be maintained by the case manager at least monthly or more frequently as specified in the provider’s agreement with the New York State Department of Social Services.

* The criteria for discontinuance by a particular entity when a client moves are inaccessibility and the provider's incapability to provide adequate service to someone removed from their usual service area due to a lack of intimate knowledge of the support system in the family's new community. The current case manager is responsible to help transition the family to a case manager in their new location. Clients are free to choose among the case managers qualified to provide early intervention case management services.

**LIMITATIONS TO THE PROVISION OF MEDICAID CASE MANAGEMENT SERVICES**

Case management services for Target Group “G”:

1. must not be utilized to restrict the choices of the case management services recipient to obtain medical care or services from any provider participating in the Medical Assistance Program who is qualified to provide such care or services and who undertakes to provide such care or service(s), including an organization which provides such care or services on a prepayment basis;

2. must not duplicate certain case management services services currently provided under the Medical Assistance Program or under any other funding sources;

3. must not be utilized by providers of case management to create a demand for unnecessary services or programs particularly those services or programs within their scope of authority;

4. must not be provided to persons receiving institutional care for more than 30 days or when discharge to community based care is not anticipated and care is reimbursed under the Medical Assistance Program or to persons in receipt of case management services under a federal Home and Community Based Services waiver or the Care At Home model waiver program.

While the activities of case management services secure access to, including referrals to and arrangements for, services for the Target Group, reimbursement for case management does not include:

8. institutional discharge planning;
9. client outreach.

E. QUALIFICATIONS OF PROVIDERS SPECIFIC TO TARGET GROUP “G”

1. Provider qualifications

Public or private agencies applying for participation in the Early Intervention Program must demonstrate the following:

a. character and competence, including fiscal viability;
b. the capacity to provide case management services;
c. availability to provide qualified personnel as defined in subsection 2 below;
d. adherence to applicable federal and state laws and regulations;
e. the capacity and willingness to ensure case managers participate in inservice training;
f. the assurance that all case managers will participate in training sponsored by the New York State Department of Health or another State early Intervention agency within the first twelve months of employment;
g. completion of an approved Medicaid provider agreement.

2. Case manager qualifications

Early Intervention case managers may be located within either public or private agencies, or may be individual qualified personnel. All case managers shall meet the following qualifications:

a. a minimum of one of the following educational or case management experience credentials:
   i. two years experience in case management activities (voluntary or part-time experience which can be verified will be accepted on a pro rata basis); or
   ii. one year of case management experience and an additional year of experience in a service setting with infants and toddlers with developmental delays or disabilities; or

TN #93-50
Supersedes TN NEW
Approval Date March 9, 1995
Effective Date September 1, 1993
iii. one year of case management experience and an associates degree in a health or human service field; or

iv. a bachelors degree in a health and human services field.

b. demonstrated knowledge and understanding in the following areas:

i. infants and toddlers who are eligible for early intervention services;

ii. State and federal laws and regulations pertaining to the Early Intervention Program;

iii. principles of family centered services;

iv. the nature and scope of services available under the Early Intervention Program and the system of payments and services in the State; and,

v. other pertinent information.

3. **Individual case managers**

Qualified personnel with appropriate licensure, certification, or registration shall apply to the State Department of Health for approval to provide case management services. In addition to the qualifications listed in subsection 2. above, the following factors are required for individuals not associated with a public or private agency in order to provide case management services:

a. current licensure, certification or registration in a discipline eligible to deliver services to children;

b. adherence to applicable federal and State laws and regulations;

c. the capacity and willingness to attend in-service training programs sponsored by the Department of Health and State early intervention agencies;

d. the assurance that all approved individual case managers will participate in the case manager training sponsored by the Department of Health or State early intervention agencies within the first twelve months of program participation;

e. completion of an approved Medicaid provider agreement.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

CASE MANAGEMENT SERVICES

A. Target Group: H

See attached.

B. Areas of State in which services will be provided:

[x] Entire State.

[ ] Only in the following geographic areas (authority of section 1915(g)(1) of the Act is invoked to provide services less than statewide:

C. Comparability of Services

[ ] Services are provided in accordance with section 1902(a)(10)(B) of the Act.

[X] Services are not comparable in amount, duration, and scope. Authority of section 1915(g)(1) of the Act is invoked to provide services without regard to the requirements of section 1902(a)(10)(B) of the Act.

D. Definition of Services:

See attached

E. Qualification of Providers:

See attached

TN #94-40 Approval Date July 20, 1995
Supersedes TN NEW Effective Date July 1, 1994
F. The State assures that the provision of case management services will not restrict an individual’s free choice of providers in violation of section 1902(a)(23) of the Act.

1. Eligible recipients will have free choice of the providers of case management services.

2. Eligible recipients will have free choice of the providers of other medical care under the plan.

G. Payment for case management services under the plan does not duplicate payments made to public agencies or private entities under other program authorities for this same purpose.
A. **TARGET GROUP H**

The targeted group consists of Medical Assistance eligibles who are served by the Office of Mental Health’s Supportive Case Management Program who:

(i) are seriously mentally ill, and,

(ii) require personal and proactive intervention to help them obtain and maintain services, which will permit or enhance functioning in the community; and,

(iii) either have symptomology which is difficult to treat in the existing mental health care system or need support to maintain their treatment connections and/or residential settings.

These individuals include:

(1) heavy service users who are known to staff in emergency rooms, acute inpatient units, psychiatric centers as well as to providers of other acute and crisis service. May have multiple disabilities including drug abuse, alcohol abuse or developmental disabilities, or,

(2) persons with recent hospitalization in either state psychiatric centers or acute care general hospital; or,

(3) mentally ill who are homeless and live on the streets or in shelters; or,

(4) seriously emotionally disturbed children and adolescents whose disability disrupts their ability to function in educational, social, vocational and interpersonal spheres and may, without intervention, be institutionalized, incarcerated or hospitalized; or,

(5) people in need of ongoing mental health support in order to maintain or enhance community tenure.

The aim is to benefit these recipients by reducing hospitalization and reliance on emergency psychiatric services, as well as increasing employment, encouraging better medication compliance and generally improving the individual’s quality of life within the community.

Supportive Case Management will address the needs and desires of those persons in Target Group “H”. Target Group “H” persons will be identified through the screening and intake process. The eligibility determination will be made based on individual factors in each person’s life. Factors which will be considered during this process include: status of mental illness, case management options available in the community, residential situation and available options, current linkage to mental health services (including type of service, frequency and duration), linkage or lack thereof to the health care system and/or the Social Services system, the role of the criminal justice system in a person’s life, as well as the individual’s personal needs and goals.

**Effective Date** July 1, 1994
an individual is generally not engaged in at least one of these service systems, he/she may be better served in an Intensive Case Management program and the SCM program will make the appropriate referral and work toward linking that person into ICM. Those persons determined to be in need of Intensive Case Management but who cannot be served due to lack of capacity in ICM program will be served by the SCM until the individual circumstances change or the ICM program has space available for the individual.

B. AREAS OF STATE IN WHICH SERVICES WILL BE PROVIDED TO TARGET GROUP H

Entire State

C. DEFINITION OF COMPREHENSIVE MEDICAID CASE MANAGEMENT REIMBURSABLE UNDER MEDICAID

Case management is a process which will assist persons eligible for Medical Assistance to access necessary services in accordance with goals contained in a written case management plan.

DEFINITION OF CASE MANAGEMENT RELATED TO TARGET GROUP “H”

Case management for Target Group “H” means those activities performed by case management staff related to ensuring that the individuals diagnosed with mental illness have full access to the comprehensive array of services and assistance which the individual needs to maintain community life and to attain or retain capability for maximum personal independence.

Case management for Target Group “H” requires referral to and coordination with medical, social, educational, psychosocial, employment, habilitation, rehabilitation, financial, environmental, and legal services available within the community appropriate to the needs of the person diagnosed with mental illness.

Supportive case management establishes programming directed toward a comprehensive person-centered view of recovery from mental illness. The Office of Mental Health has designed the SCM initiative to extend the personalized planning, linking, monitoring, and advocacy available through the Intensive Case Management Program target group “D” toward a wider group of persons in need. Called Supportive Case Management, this new program will be available to persons living in the community, homeless persons and persons in community support programs. The intent of the program is to provide for these individuals a comprehensive approach toward meeting their treatment, rehabilitation and support needs.

CASE MANAGEMENT FUNCTIONS

The case manager will assist the recipient in gaining access to each individual's specific area of need (ie. medical, social, education or other service). The case manager will perform needs assessments, develop a plan of care to meet the recipient’s needs and interests,
assist the recipient in accessing the services and perform monitoring and follow-up functions. In no instance will case management include the provision of clinical or treatment services. A separate case record must be established for each individual recipient of case management services and must document each case management function provided.

A. Intake and screening.

This function consists of: the initial contact to provide information concerning case management; exploring the recipient’s receptivity to the case management process; determining that the recipient is a member of the provider’s targeted population; and indentifying potential payors for services.

B. Assessment and reassessment.

During this phase the case manager must secure directly, or indirectly through collateral sources, with the recipient’s permission: a determination of the nature and degree of the recipient’s functional impairment through a medical evaluation; a determination of the recipient’s functional eligibility for services; information from other agencies/individuals required to identify the barriers to care and existing gaps in service to the recipient; assessment of the recipient’s service needs including medical, social, psychosocial, educational, financial and other services; and a description of the recipient’s strengths, informal support system and environmental factors relative to his/her care.

C. Case management plan and coordination.

The case management activities required to establish a comprehensive written case management plan and to effect the coordination of services include: identification of the nature, amount, frequency, and duration of the case management services required by a particular recipient; with the participation of the recipient, selection of the nature, amount, type, frequency and duration of services to be provided to the recipient; identification of the recipient’s informal support network and providers of services; specification of the long term and short term goals to be achieved through the case management process; collaboration with hospital discharge planners, health care providers and other service providers, including informal caregivers and other case managers. It also includes, through case conferences, an exchange of clinical information which will assure:

1. the integration of clinical care plans throughout the case management process;
2. the continuity of service;
3. the avoidance of duplication of service (including case management services); and
4. the establishment of a comprehensive case management plan that addresses the interdisciplinary needs of the individual.

TN #94-40 Approval Date July 20, 1995
Supersedes TN NEW Effective Date July 1, 1994
D. Implementation of the case management plan.

Implementation of the plan includes securing the services determined in the case management plan to be appropriate for a particular recipient through referral to those agencies or to persons who are qualified to provide the identified services; assisting the recipient with referral and/or application forms required for the acquisition of services; advocating for the recipient with all providers of service; and developing alternative services to assure continuity in the event of service disruption.

E. Crisis intervention.

Crisis intervention by a case manager or practitioner includes when necessary: assessment of the nature of the recipient's circumstances; determination of the recipient's emergency service needs; and, revision of the case management plan, including any changes in activities or objectives required to achieve the established goal.

F. Monitoring and follow up.

As dictated by the client's needs and desires, case manager services include: assuring that quality services, as identified in the case management plan, are delivered; assuring the recipient's satisfaction with the services provided and advising the preparer of the case management plan of the findings; collecting data and documenting in the case record the progress of the recipient; making necessary revisions to the case management plan; making alternate arrangements when services have been denied or are unavailable to the recipient; and, assisting the recipient and/or provider of services to resolve disagreements, questions or problems with implementation of the case management plan.

G. Counseling and exit planning.

This function consists of: assuring that the recipient obtains, on an ongoing basis, the maximum benefit from the services received; developing linkages to support groups for the recipient, the recipient's family and informal providers of services; coordinating among the recipient, the family network and/or other informal providers of services when problems with service provision occur; facilitating the recipient's access to other appropriate care if and when eligibility for the targeted services ceases; and, assisting the recipient to anticipate the difficulties which may be encountered subsequent to discharge from or admission to facilities or other programs, including other case management programs.

PROCEDURAL REQUIREMENTS FOR PROVISION OF SERVICE

1. Assessments.

The case management process must be initiated by the recipient and case manager (or practitioner as appropriate) through a written assessment of the recipient's need for case management as well as medical, social, psychosocial, educational, financial and other services.

TN #94-40 Approval Date July 20, 1995
Supersedes TN _NEW_ Effective Date July 1, 1994
An assessment provides verification of the individual's current functioning and continuing need for services, the service priorities and evaluation of the individual's ability to benefit from such services. The assessment process consists of those activities listed in paragraph B of **CASE MANAGEMENT FUNCTIONS**.

An assessment must be completed by a case manager within 15 days of the date of the referral or as specified in a referral agreement. The referral for service may include a plan of care containing significant information developed by the referral source which should be included as an integral part of the case management plan.

An assessment of the individual's need for case management and other services must be completed by the case manager every six months, or sooner if required by changes in the recipient's condition or circumstances.

2. **Case management plan.**

A written case management plan must be completed by the case manager for each individual receiving case management services within 30 days of the date of referral or as specified in a referral agreement, and must include those activities outlined in paragraph C, under **CASE MANAGEMENT FUNCTIONS**.

The individual's case management goals, with anticipated dates of completion, must be established in the initial case management plan, consistent with the recipient service needs and assessment.

The case management plan must be reviewed and updated by the case manager as required by changes in the individual's condition or circumstances, but not less frequently than every six months subsequent to the initial plan. Each time the case management plan is reviewed the goals established in the initial case management plan must be maintained or revised, and new goals and new time frames may be established with the participation of the recipient.

The case management plan must specify:

a. those activities which the individual is expected to undertake within a given period of time toward the accomplishment of each case management goal;

b. the name of the person or agency, including the individual and/or family members, who will perform needed tasks;

c. the type of treatment program or service providers to which the individual will be referred;

d. the method of provision and those activities to be performed by a service provider or other person to achieve the individual's related goal and objective; and

e. the type, amount, frequency, and duration of services to be delivered or tasks to be performed.
3. **Continuity of service.**

Case management services must be ongoing from the time the individual is accepted by the case management agency for services to the time when: the coordination of services provided through case management is not required or is no longer required by the individual; the recipient moves from the social services district*; the long term goal has been reached; the individual refuses to accept case management services; the individual requests that his/her case be closed; the individual is no longer eligible for services; or, the individual’s case is appropriately transferred to another case manager. Contact with the individual or with a collateral source on the individual’s behalf must be maintained by the case manager at least monthly or more frequently as specified in the provider’s agreement with the New York State Department of Social Services.

* The criteria for discontinuance by a particular entity when a client moves are inaccessibility and the provider’s incapability to provide adequate service to someone removed from their usual service area. Although equally qualified, each OMH entity is not capable of serving individuals in all other parts of the State since serving this clientele requires frequent contact and an intimate knowledge of the support system in the client’s community. The current case manager is responsible to help transition clients to case managers in their new location or, if a program is not available, to the best substitute. Clients are free to choose among qualified providers within the State.

**LIMITATIONS TO THE PROVISION OF MEDICAID CASE MANAGEMENT SERVICES**

Case management services must **not**:

1. be utilized to restrict the choice of a case management services recipient to obtain medical care or services from any provider participating in the Medical Assistance Program who is qualified to provide such care or services and who undertakes to provide such care or service(s), including an organization which provides such care or services or which arranges for the delivery of such care or services on a prepayment basis;

2. duplicate case management services currently provided under the Medical Assistance Program or under any other program;

3. be utilized by providers or case management to create a demand for unnecessary services or programs particularly those services or programs within their scope of authority;

4. be provided to persons receiving institutional care reimbursed under the Medical Assistance Program or to persons in receipt of case management services under a federal Home and Community Based Services waiver.

**TN #94-40**    Approval Date    **July 20, 1995**
Supersedes TN **NEW**    Effective Date    **July 1, 1994**
While the activities of case management services secure access to an individual’s needed service, the activities of case management do not include:

1. the actual provision of the service;
2. Medicaid eligibility determinations/redeterminations;
3. Medicaid preadmission screening;
4. prior authorization for Medicaid services;
5. required Medicaid utilization review;
6. EPSDT administration;
7. activities in connection with “lock in” provisions under 1915 (a) of the Social Security Act;
8. institutional discharge planning required of hospitals, SNFS, ICFs and ICF/MRs;
9. client outreach considered necessary for the proper and efficient administration of the Medicaid State Plan; and
10. representative payee services.

LIMITATIONS SPECIFIC TO TARGET GROUP “H”

In order to support a personal and proactive service, Supportive Case Managers will carry an average active case load of between 20-30 clients. Supportive Case Managers will see active clients a minimum of two times during a month. SCM employs a team approach to the provision of case management service. The inclusion of the SCM program in the service target group H will assure that the nature and intensity of services vary with individuals changing needs. These individuals may be referred to the SCM by various community agencies, mental health agencies, (including State psychiatric facilities), and human services agencies with whom the client has been in contact.

D. QUALIFICATIONS OF PROVIDERS SPECIFIC TO TARGET GROUP “H”

1. Providers

The New York State Office of Mental Health (OMH) will authorize as Case Management providers either employees of OMH meeting the qualifications described below or employees of those organizations determined by OMH and certified to the Department of Health (DOH) to have the capacity to provide specialized Case Management Services and

TN #01-02 Approval Date June 19, 2001
Supersedes TN #94-40 Effective Date January 1, 2001
having written agreements with appropriate mental health providers and other human service providers so that DOH can enroll the providers in the Medicaid program.
SCM Teams will vary in size and composition and may consist of one individual who may be a paraprofessional with adequate clinical supervision. Each supportive case manager must meet the minimum qualifications for Supportive Case Manager whether they serve a maximum 20 client caseload or a maximum 30 client caseload. The qualifications for Supportive Case Manager whether they serve a maximum 20 client caseload or a maximum 30 client caseload are the same. While supportive case management programs may provide services to individuals with only one staff member and a supervisor in the program, the more common model will utilize a team approach. The team may be comprised of professionals and paraprofessionals. All members of the team must meet the minimum qualifications for the SCM and will receive professional supervision, as detailed in this document. SCM teams will have a professional supervisor with both clinical and supervisory experience.

2. **Case Managers**

**Minimum Qualifications for Supportive Case Manager:**

Two years of experience in providing direct services or in a substantial number of activities outlined under CASE MANAGEMENT FUNCTIONS to people who are mentally disabled, or homeless. The following may be substituted for this requirement:

a) one year of case management experience and an associates degree in a health or human services field; or

b) one year of case management experience and an additional year of experience in other activities with the target population; or

c) a bachelor's or master's degree which includes a practicum encompassing a substantial number of activities with the target population; or

d) the individual meets the regulatory requirements for case manager of a State Department within New York State.

**Minimum Qualifications for Coordinator of Supportive Case Management Services:**

**Education:**

1. a master's degree in one of the below listed fields*

or

2. a master's degree in public administration, business administration, health care or hospital administration and a bachelor's degree in one of the below listed fields*;

or

3. NYS licensure and registration as a Registered Nurse plus a master's degree in 1 or 2 above

AND

**Experience:**

| TN #94-40 | Approval Date July 20, 1995 |
| Supersedes TN NEW | Effective Date July 1, 1994 |
**New York**

**1-H10**

Four years of experience:

1. in providing direct services to persons diagnosed with mental disabilities**;

or

2. in linking persons diagnosed with mental disabilities** to a broad range of services essential to successfully living in a community setting (e.g., medical, psychiatric, social, educational, legal, housing and financial services)

Two years of this experience must have involved:

1. supervisory or managerial experience for a mental health program or major mental health program component;

or

2. service as an Intensive Case Manager in a NYS Office of Mental Health registered ICM program.

* Qualifying education includes degrees in social work, psychology, nursing, rehabilitation, education, occupational therapy, physical therapy, recreation or recreation therapy, counseling, community mental health, child and family studies, sociology, speech and hearing.

** The term “mental disabilities” refers to persons properly diagnosed with mental illness, mental retardation, alcoholism or substance abuse.

**Minimum Qualifications for a Clinical Professional:**

Clinical professional staff are individuals who are qualified by credentials, training and experience to provide supervision and direct service related to the treatment of mental illness and shall include: a credentialed alcoholism counselor; registered or certified creative arts therapist; certified nurse practitioner; licensed occupational therapist, physician, psychiatrist, psychologist, or registered professional nurse; registered physician’s assistant or specialist's assistant; rehabilitation counselor with a Master's Degree in this field or current certification, pastoral counselor with a Master's Degree or equivalent in this field, certified social worker currently licensed or with a Master’s Degree in this field, therapeutic recreation specialist who is registered or has a Master's Degree in this field.

**Minimum Supervision Standard for Supportive Case Management Teams:**

Supervision of the SCM team will be provided by the SCM Team Coordinator, or an appropriate clinical professional.

Routine review of tasks performed by the SCM team members will focus on enrollment, planning, and service linkage and advocacy. An SCM team meeting for case review will take place monthly or more frequently, if needed. Supervision of the SCM team members with paraprofessional job titles will be provided by a professional, who will be available at all times for consultation with the SCM and will provide direct supervision at frequent intervals to assure that recipient needs are being addressed. Supervision of a paraprofessionals by a professional staff member will occur on a bi-weekly basis at a minimum and more frequently, if needed.

**TN #94-40**

Supersedes TN NEW

**Approval Date** July 20, 1995

**Effective Date** July 1, 1994
Additionally, the coordinator will review each recipient case record with the SCM team members on a semi-annual basis at a minimum and more frequently, as needed. The SCM Coordinator will post a progress note in the record at the time of the case record review.

CASE MANAGEMENT SERVICES
SERVICE COORDINATION FOR CHILDREN WITH DISABILITIES

A. TARGET GROUP I:

Children 3 through 21 years old who are federally eligible Medical Assistance Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) recipients and for whom free and appropriate education is provided under the Individuals with Disabilities Education Act (IDEA) or Section 504 of the Rehabilitation Act of 1973.

A child is eligible to receive the case management services, called Service Coordination for Children with Disabilities under New York’s Medical Assistance Program Comprehensive Medicaid Case Management regulations 18 NYCRR 505.16, when all of the following requirements are met:

1. It is determined through an assessment, in accordance with the New York State Education law and regulations for assuring a free, appropriate education for all students with disabilities, that:
   a. the child has temporary or long-term needs arising from cognitive, emotional, or physical factors, or any combination of these, which affects the child’s ability to learn, and
   b. the child’s ability to meet general education objectives is impaired to a degree whereby the services available in the general education program are inadequate in preparing the child to achieve his or her educational potential.

2. A multi-disciplinary team, called a Committee on Special Education (CSE) or Committee on Preschool Special Education (CPSE) in the New York State Department of Education regulations for Programs for Students with Disabilities, or Multi-Disciplinary Team (MDT) for programs and activities under §504 of the Rehabilitation Act of 1973 determines that the recipient is a child with disabilities who:
   a. Is eligible for special education and/or related services that are provided through two school Medicaid programs; the Preschool Supportive Health Services Program (PSHSP) for children age 3 and 4 and the School Supportive Health Services Program (SSHSP) for children age 5 through 21, and
   b. Needs an Individualized Education Program (IEP) under Part B (IDEA) or an Accommodation Plan (AP) under Section 504 of the Rehabilitation Act of 1973.

3. The child elects, or the child’s parent or other responsible individual elects on the child’s behalf, to receive Service Coordination for Children and Disabilities; and

4. The child is not receiving similar case management services under another Medical Assistance Program authority.

TN #96-41
Supersedes TN NEW
Approval Date January 21, 1998
Effective Date October 3, 1996
D. DEFINITION OF SERVICES:

Service Coordination for Children with Disabilities means those case management services which will assist children with or suspected of having disabilities in gaining access to evaluations and the services recommended in a child’s IEP or AP.

The New York Medical Assistance Program reimburses for the following services under Service Coordination for Children with Disabilities, when the following case management services have been documented as necessary and appropriate:

1. Initial IEP or AP

   a. A unit of service for the initial IEP or AP is defined as:

      (1) The activities leading up to and including writing a completed initial IEP or AP prepared by members of the CSE/CPSE/MDT, the multi-disciplinary team. An initial IEP is a written recommendation identifying the handicapping condition, a description of the child’s strengths and weaknesses, a list of goals and objectives that the child should reach in a years time, and an identification of the types of programs and services that the child will receive. An AP is a written document that describes the nature of the problem, evaluations completed, the basis for determining that the child has a disability, and the list of recommended accommodations; and

      (2) At least one contact by the child’s service coordinator or CSE/CPSE/MDT, in person or by telephone with the child or the child’s parent or other responsible individual, on the child’s behalf, relating to the development of the initial IEP or AP.

   b. The covered services include convening and conducting the CSE/CPSE/MDT conference to develop an initial IEP or AP. The conference will result in all of the following:

      (1) A statement of the child’s special education needs, and/or related services needs or accommodation needs and services, including the need for medical, physical, mental health, social, financial assistance, counseling, and other support services;

      (2) A statement of measurable annual goals and measurable short-term objectives for the child;

      (3) A statement of the specific special education and related services to be provided to the child;
Supplement 1 to Attachment 3.1-A

New York
1-14

(4) The projected dates for initiation of services and the anticipated duration of service;

(5) Appropriate objective criteria and evaluation procedures for determining, on at least an annual basis, whether the objectives set forth in the IEP or AP are being achieved; and

(6) Parental notification of the recommendation.

d. Administrative, directive, supervisory, and monitoring services are included as part of the service.

2. Triennial Evaluation - IEP

a. A triennial evaluation may occur every three years to provide current assessment information on children in special education pursuant to IDEA. A unit of service is defined as:

(1) The activities leading up to a recommendation based on an appropriate reexamination of each child with a disability by a physician, a school psychologist, and to the extent required by the CSE, by other qualified appropriate professionals; and

(2) At least one contact by the child’s service coordinator or CSE, in person or by telephone with the child or the child’s parent or other responsible individual, on the child’s behalf, relating to updating the IEP.

b. The covered services include convening and conducting the CSE conference to review the results of the triennial evaluation, assessment and revising the IEP, as necessary, that will result in:

(1) A statement of the child’s special education needs and/or related service needs, including the need for medical, mental health, social, financial assistance, counseling, and other support services;

(2) A statement of measurable annual goals and measurable short-term objectives for the child;

(3) A statement of the specific special education and/or related services to be provided to the child;

(4) The projected dates for initiation of services and the anticipated duration of service;
(5) Appropriate objective criteria and evaluation procedures for determining, on at least an annual basis, whether the objectives set forth in the IEP or AP are being achieved; and

(6) Parental notification of the recommendation.

c. Administrative, directive, supervisory, and monitoring services are included as part of the service.

3. Annual IEP or AP Review

a. An annual review is required CSE/CPSE/MDT meeting which must occur every year to determine whether the existing IEP or AP, is appropriately meeting the child’s needs. A unit of service is defined as follows:

(1) A CSE/CPSE/MDT meeting to discuss yearly progress and make recommendations to continue, change or terminate the program, and

(2) At least one contact by the child’s service coordinator or CSE/CPSE/MDT, in person or by telephone with the child or the child’s parent or other responsible individual, on the child’s behalf, relating to updating the IEP or AP.

b. The covered services include convening and conducting the CSE/CPSE/MDT conference to revise the IEP or AP, as necessary, that will result in:

(1) A statement of the child’s special education needs and/or related service needs or accommodation needs and services, including the need for medical, mental health, social, financial assistance, counseling, and other support services;

(2) A statement of measurable annual goals and measurable short-term objectives for the child;

(3) A statement of the specific special education and/or related services to be provided to the child;

(4) The projected dates for initiation of services and the anticipated duration of service;

(5) Appropriate objective criteria and evaluation procedures for determining whether the objectives set forth in the IEP or AP are being achieved; and

(6) Parental notification of the recommendation.

c. Administrative, directive, supervisory, and monitoring services are included as part of the service.
4. **Requested IEP or AP (Interim) Review**

   a. Regulations of the New York State Department of Education require that a child's IEP or AP be reviewed and, if appropriate, revised on an interim basis upon the request of the professionals on the CSE/CPSE/MDT or the request of the child's parent(s) or other responsible individual.

   b. A unit of service for IEP or AP review is defined as:

      (1) Reconvening the CSE/CPSE/MDT, and

      (2) At least one contact by the service coordinator or CSE/CPSE/MDT in person or by telephone with the child or the child's parent or other responsible individual, on the child's behalf, relating to review of the IEP or AP.

   c. The covered services include convening and conducting a CSE/CPSE/MDT meeting to review and revise, as necessary, the child's IEP or AP. The meeting will result in a review and parental notification, of the following:

      (1) The statement of the child's special education needs and/or related service needs or accommodation needs and services, including the need for medical, mental health, social, financial assistance, counseling, and other support services;

      (2) The statement of measurable annual goals and measurable short-term objectives for the child;

      (3) The statement of the specific special education and/or related services to be provided to the child;

      (4) The projected dates for initiation of services and the anticipated duration of service; and

      (5) The appropriate objective criteria and evaluation procedures to determining whether the objectives set forth in the IEP or AP are being achieved.

   d. Administrative, directive, supervisory, and monitoring services are included as part of the service.

5. **Ongoing Service Coordination**

   a. Ongoing service coordination is rendered subsequent to implementing a child's IEP or AP by the service coordinator employed by or under contract to a school district.

   __Supersedes TN __NEW________

   __Approval Date__ January 21, 1998

   __Effective Date__ October 3, 1996
b. A unit of service for ongoing service coordination includes:

   (1) At least two documented contacts per month by the service coordinator relating to the child’s ongoing service coordination, and

   (2) The provision of all other necessary covered services under ongoing service coordination.

c. These services may include:

   (1) Acting as a central point of contact relating to IEP or AP services for a child,

   (2) Maintaining contact with direct service providers and with a child and the child’s parent or other responsible individual through home visits, office visits, school visits, telephone calls, and follow-up services as necessary,

   (3) Assisting the child in gaining access to services specified in the IEP or AP, and providing linkage to agreed-upon direct service providers,

   (4) Discussing with direct service providers that the appropriate services are being provided, following up to identify any obstacles to a child’s utilization of services, coordinating the service delivery, and performing ongoing reviews to determine whether the services are being delivered in a consolidated fashion as recommended in the IEP or AP and meet the child’s current needs,

   (5) Providing a child and a child’s parent or other responsible individual with information and direction that will assist them in successfully accessing and using the services recommended in the IEP or AP, and

   (6) Informing a child’s parent or other responsible individual of the child’s and the family’s rights and responsibilities in regard to specific programs and resources recommended in the IEP or AP.

d. Administrative, directive, supervisory, and monitoring services are included as part of the service.

E. Qualifications of Providers of Service Coordination for Children with Disabilities:

1. A provider of Service Coordination for Children with Disabilities shall be a school district within the State that:

   a. Operates and contracts for programs with special education and/or related services/accommodations for children with disabilities, in accordance with Article 89 of Education Law, Section 504 of the Rehabilitation Act of 1973 and Programs for Students

TN #96-41 Approval Date January 21, 1998
Supersedes TN NEW Effective Date October 3, 1996
New York
1-18

with Disabilities. (8 NYCRR 200); and

b. Is enrolled in MMIS as a SSHSP or PSHSP provider.

F. Qualifications of Service Coordinators:

1. An individual recommended as a child’s service coordinator shall be:
   a. Employed by or under contract to a school district;
   b. Chosen by the CSE/CPSE/MDT, taking into consideration the:
      (1) Primary disability manifested by the child;
      (2) Child’s needs, and
      (3) Services recommended in the IEP or AP.

2. A service coordinator must be appropriately licensed or certified and could include
   an audiologist, school counselor, rehabilitation counselor, registered nurse, practical nurse, occupational therapist, physical therapist, psychologist, social worker, speech therapist, speech pathologist, teacher, school administrator, or
   school supervisor.

G. Payment for case management services under the plan shall not duplicate payments made to public agencies or private entities under other program authorities for this same purpose.

Reimbursement for the development of the IEP or AP is available even if the child’s condition is reviewed and not classified, or the parent, on the child’s behalf, does not consent to the recommendation and the services are not provided.
The New York State Department of Health (NYSDOH) School Supportive Health Services Program (SSHSP) Targeted Case Management (TCM) for Target Group I, which became effective October 3, 1996, will be terminated on July 1, 2010.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

State/Territory: New York

TARGETED CASE MANAGEMENT SERVICES
For First-time Mothers and Newborns

Target Group: M - First-time Mothers and their Newborn

The primary target group consists of low-income, pregnant women who will be first-time mothers and their newborn children up to each child's second birthday. A woman must be enrolled in the targeted case management program during pregnancy, as early as possible, but no later than twenty-eight weeks gestation.

The goals of this program are to improve pregnancy outcomes by providing comprehensive case management services including: 1) assessment of each woman's need for medical, educational, social and other services; 2) development of a care plan for each woman with goals and activities to help the woman engage in good preventive health practices; and 3) referral, follow-up and assistance in gaining access to needed services including obtaining prenatal care, improving diets, reducing use of cigarettes, alcohol and illegal substances, improving each child's health and development and reducing quickly recurring and unintended pregnancies.

Areas of State in which services will be provided (§1915(g)(1) of the Act):

___ Entire State.

__X__ Only in the following geographic areas (authority of section 1915(g)(1) of the Act is invoked to provide services less than Statewide:

   New York City, Monroe, Albany, Erie, Cayuga, Chautauqua, Nassau, Niagara, Chemung, Westchester, and Onondaga Counties

TN # _____16-0021_______ Approval Date: July 11, 2016

Supersedes TN # __12-0005____ Effective Date: April 01, 2016
New York
1-M2

Comparability of Services (Sections 1902(a)(10)(B) and 1915(g)(1))

[ ] Services are provided in accordance with Section 1902(a)(10)(B) of the Act.

[X] Services are not comparable in amount, duration, and scope. (Section 1915(g)(1)). By enrolling in this targeted case management program, first-time mothers and their newborns will be receiving comprehensive case management services that are not comparable to the amount, duration and scope of services provided to all Medicaid eligible pregnant women.

Definition of Services (42 CFR 440.169):

Case management services are services furnished to assist individuals, eligible under the State Plan, in gaining access to needed medical, social, educational and other services. This targeted case management program for first-time mothers and their newborns offers a comprehensive set of case management services through home visits by trained registered nurses. Case management services provided include the following:

1. Comprehensive assessment and period reassessment of the first-time pregnant woman and her newborn to determine the need for medical, educational, social or other services. These assessment activities include:
   a) taking the woman's history and assessing her risk for poor birth outcomes;
   b) identifying the needs of the first-time mother and her newborn and completing related documentation; gathering information from other sources such as family members, medical providers, social workers, and educators (if necessary), to form a complete assessment.

2. Development (and periodic revision) of a specific care plan.

   A care plan will be developed based on the comprehensive assessment conducted of the first-time mother. A written care plan must be completed by the case manager within 30 days of the date of the woman’s referral to the targeted case management program and must include, but not be limited to, the following activities:
   i. identification of the nature, amount, frequency and duration and cost of the case management services required by a particular recipient;
   ii. Selection of the long-term and short-term goals to be achieved through the case management process;

TN #09-57
Supersedes TN NEW
Approval Date April 6, 2010
Effective Date April 1, 2009
iii. Specification of the long-term and short-term goals to be achieved through the case management process;

iv. Collaboration with health care and other formal and informal service providers, including discharge planners and other case managers as appropriate, through case conferences to encourage exchange of clinical information and to assure:

a. the integration of clinical care plans throughout the case management process;

b. the continuity of service;

c. the avoidance of duplication of services (including case management services) and

d. the establishment of a comprehensive case management plan that addresses the medical, social, psychosocial, educational and financial needs of the recipient.

The care plan will state:

a) goals and actions to address the medical, social, educational, and other services needed by the woman and child;

b) activities to ensure the active participation of the first-time mother (or the woman’s authorized health care decision maker) and others to develop the goals;

c) a course of action identified to respond to the assessed needs of the first-time mother and child;

d) an agreed upon schedule for re-evaluating goals and course of action.

The plan will be reviewed and updated by the case manager as required by changes in the recipient's condition or circumstances, but not less frequently than every six (6) months subsequent to the initial plan. Each time the care plan is reviewed, the goals established in the initial plan will either be maintained or revised, and new goals and time frames established.

3. Referral and related activities (such as scheduling appointments for the mother and child) to help the first-time mother and newborn obtain needed services including:

a.) activities that help link the mother and child with medical, social, educational providers or other program and services in the community that are capable of providing needed services to address identified needs, and achieve goals as specified in the care plan.

TN #09-57 Approval Date April 6, 2010
Supersedes TN NEW Effective Date April 1, 2009
4. **Monitoring and follow-up activities**

Monitoring and follow-up activities may be with the first-time mother, other family members or providers. Home visits and other contacts that are necessary to ensure that the care plan is implemented and adequately addresses the mother and newborn’s needs will be conducted as frequently as necessary, or at least bi-weekly to determine whether the following conditions are met:

- services are being furnished in accordance with the care plan;
- services in the care plan are adequate and
- if there are changes in the needs or status of the woman and/or her child, then, necessary adjustments in the care plan and service arrangements with providers are made.

Case management includes contacts with non-eligible individuals (such as the newborn’s father) who are directly related to identifying the needs and care, for the purposes of helping the first-time mother and her child access services; identifying needs and supports to assist the mother and child in obtaining services; providing case managers with useful feedback and altering case managers to changes in the mother or child’s needs (42 CFR 440.169(e)).

**Qualifications of Providers (42 CFR 441.18(a)(8)(v) and 42 CFR 441.18(b)):**

1. **Provider Agencies**

Providers of targeted case management to first-time mothers and their children in the target groups may be public or private agencies and organizations, whether operated on a profit-making or not-for-profit basis.

---

**TN #09-57**

**Supersedes TN NEW**

**Approval Date** April 6, 2010

**Effective Date** April 1, 2009
New York
1-M5

Case management services may be provided by agencies, facilities, persons and other groups possessing the capability to provide services that are approved by the Commissioner of the New York State Department of Health (DOH), the single state Medicaid agency, based upon an approved proposal submitted to the New York State DOH. Providers may include:

a) facilities licensed or certified under New York State law or regulation as Licensed Home Care Services Agencies (LHCSA) or Certified Home Health Agencies (CHHA);

b) a county health department, including the health department of the City of New York;

2. Case Managers

Case managers must have the education, experience, training and/or knowledge in the areas necessary to conduct case management services including: assess the needs and capabilities of the pregnant or parenting woman and her child; develop a care plan based on the assessment; assist the first-time mother/child in obtaining access to medical, social, educational and other services; make referrals to medical, social, educational and other providers; and monitor activities to ensure that the care plan is effectively implemented and addresses the assessed needs. Case managers under this program are required to be registered nurses with BSN degrees; and be licensed as professional nurses with the New York State Department of Education. In limited circumstances, an RN who does not have a BSN degree but is competent in a foreign language may be hired as a case manager in the First-time Mothers/Newborn program to provide TCM services to first-time mothers and their newborns who speak a language other than English (including, but not limited to Spanish, Chinese or Russian). There are specific criteria for this exception:

- The RN must be fluent in English and a foreign language (such as Spanish, Chinese etc.) and should work exclusively with participants who speak that same target language;

- The RN must be enrolled in a Bachelor's degree program in nursing at an accredited institution of higher learning; and

- The RN must sign a memorandum of understanding with the provider agency which stipulates the expected completion date for obtaining the BSN degree. The provider agency will inform the county and the New York State Department of Health when the BSN degree is obtained.

Certification by a nationally-recognized organization, with an evidence-based program in nurse home visits and case management for high risk, first-time mothers and their newborn is preferred.

Case managers in this targeted case management program will meet or exceed the standards set by the single State Medicaid Agency. The case manager must have two years experience in a substantial number of case management activities. Voluntary or part-time experience which can be verified will be accepted on a pro-rata basis.

Supersedes TN #09-57

Approval Date September 6, 2012

Effective Date January 1, 2012
The two years of experience may be substituted by:

a) one year of case management experience and a degree in a health or human services field;

b) one year case management experience and an additional year of experience in other activities with the target population; or

c) a bachelor's or master's degree which includes a practical encompassing a substantial number of activities with the target population.

As a single state Medicaid agency, criteria for case managers is stated in Administrative Directive 89 ADM-29 for case management provider entities and case management staff under section D entitled Provider Qualifications and Participation Standards.

**Freedom of Choice (42 CFR 441.18(a)(1)):**

The State assures that the provision of case management services will not restrict an individual's free choice of providers in violation of section 1902(a)(23) of the Act.

1. Eligible recipients will have free choice of the providers of case management services within the specified geographic area identified in this plan.

2. Eligible recipients will have free choice of the providers of other medical care under the plan.

**Freedom of Choice Exception (Section 1915(g)(1) and 42 CFR 441.18(b)):**

[ ] Target group consists of eligible individuals with development disabilities or with chronic mental illness. Providers are limited to providers of case management services capable of ensuring that individuals with developmental disabilities or with chronic mental illness receive needed services.

**Access to Services (42 CFR 441.18(a)(2), 42 CFR 441.18(a)(3), 42 CFR 441.18(a)(6)):**

The State assures the following:

- Case management (including targeted case management) services will not be used to restrict an individual's access to other services under the plan;
- Individuals will not be compelled to receive case management services, condition receipt of case management (or targeted case management) services on the receipt of other Medicaid services, or condition receipt of other Medicaid services on receipt of case management (or targeted case management) services; and

- Providers of case management services do not exercise the agency’s authority to authorize or deny the provision of other services under the plan.

**Payment (42 CFR 441.18(a)(4))**:  
Payment for case management services under the plan does not duplicate payment made to public agencies or private entities under other program authorities for this same purpose.

Case management providers are paid on a unit-of-service basis that does not exceed 15 minutes. A detailed description of the reimbursement methodology identifying the data used to develop the rate is included in Attachment 4.19B.

**Case Records (42 CFR 18(a)(7))**:  
Providers maintain case records that document for all recipients receiving targeted case management services as follows: (i) The name of the individual; (ii) The dates of the case management services; (iii) The name of the provider agency (if relevant) and the person providing the case management service; (iv) The nature, content, units of case management services received and whether goals specified in the care plan have been achieved; (v) Whether the individual has declined services in the care plan; (vi) The need for, and occurrences of, coordination with other case managers; (vii) The timeline for obtaining needed services; and (viii) A timeline for reevaluation of the plan.
Limitations

Case Management does not include, and Federal Financial Participation (FFP) is not available in expenditures for, services defined in Section 441.169 when the case management activities are an integral and inseparable component of another Medicaid service (State Medicaid Manual (SMM) 4302.F.).

Case management does not include, and Federal Financial participation (FFP) is not available in expenditures for, services defined in Section 441.169 when the case management activities constitute the direct delivery of underlying medical, educational, social, or other services to which an eligible individual has been referred, including for foster care programs, services such as, but not limited to, the following: research gathering and completion of documentation required by the foster care program; assessing adoption placements; recruiting or interviewing potential foster care parents; serving legal papers; home investigations; providing transportation; administering foster care subsidies; making placement arrangements (42 CFR 441.18(c)). First-time mothers who are in foster care or under the jurisdiction of the juvenile justice system or the criminal justice system will not be eligible for targeted case management services under this program.

FFP only is available for case management services or targeted case management services if there are no other third parties liable to pay for such services, including as reimbursement under a medical, social educational or other program except for case management that is included in an individualized education program or individualized family service plan consistent with Section 1903(c) of the Act. (Sections 1902(a)(25) and 1905(c)).

4. ___ The following percentage of the following standard that is not greater than the standards above: ___% of ___ standard.

5. ___ The amount is determined using the following formula:

6. ___ Other

7. ___ Not applicable (N/A)

(b) Medical and remedial care expenses specified in 42 CFR 435.735.

Spousal Post Eligibility

3. ___ State uses the post-eligibility rules of Section 1924 of the Act (spousal impoverishment protection) to determine the individual’s contribution toward the cost of PACE services if it determines the individual’s eligibility under section 1924 of the Act. There shall be deducted from the individual’s monthly income a personal needs allowance (as specified below), and a community spouse’s allowance, a family allowance, and an amount for incurred expenses for medical or remedial care, as specified in the State Medicaid plan.

(a.) Allowances for the needs of the:

1. Individual (check one)

   (A). ___ The following standard included under the State plan (check one):

   1. ___ SSI
   2. ___ Medically Needy
   3. ___ The special income level for the institutionalized
   4. ___ Percent of the Federal Poverty Level: ____%
   5. ___ Other (specify): _______________________

   (B). ___ The following dollar amount: $50*

   Note: If this amount changes, this item will be revised.

   * For non-institutionalized participants, the PNA is equal to the difference between the amount of the

TN #02-01 Approval Date September 3, 2002
Supersedes TN NEW Effective Date January 1, 2002
medical assistance eligibility standard for one person and two person households.

(C) ___ The following formula is used to determine the needs allowance:

If this amount is different than the amount used for the individual's maintenance allowance under 42 CFR 435.726 or 42 CFR 435.735, explain why you believe that this amount is reasonable to meet the individual's maintenance needs in the community:

The amount for non-institutionalized participants is the same incremental difference used under the community eligible rules when a household of one increases to a household of two. The amount covers the additional cost for food, shelter and personal incidentals of a second individual in the household. Married couples not living together will be determined as individuals under the Medically Needy criteria.

II. Rates and Payments

A. The State assures CMS that the capitated rates will be equal to or less than the cost to the agency of providing those same fee-for-service State plan approved services on a fee-for-service basis, to an equivalent non-enrolled population group based upon the following methodology. Please attach a description of the negotiated rate setting methodology and how the State will ensure that rates are less than the cost in fee-for-service.

Refer to Attachment 4.19-B, page 17

1. ___ Rates are set at a percent of fee-for-service costs

2. ___ Experience-based (contractors/State's cost experience or encounter date) (please describe)
3. ___ Adjusted Community Rate (please describe)

4. _X_ Other (please describe)

Refer to Attachment 4.19-B, page 17

B. The State Medicaid Agency assures that the rates were set in a reasonable and predictable manner. Please list the name, organizational affiliation of any actuary used, and attestation/description for the initial capitation rates.

C. The State will submit all capitated rates to the CMS Regional Office for prior approval.

III. Enrollment and Disenrollment

The State assures that there is a process in place to provide for dissemination of enrollment and disenrollment data between the State and the State Administering Agency. The State assures that it has developed and will implement procedures for the enrollment and disenrollment of participants in the State’s management information system, including procedures for any adjustment to account for the difference between the estimated number of participants on which the prospective monthly payment was based and the actual number of participants in that month.

NEW YORK STATE – TITLE XIX STATE PLAN

AMOUNT, DURATION AND SCOPE OF SERVICES PROVIDED TO MEDICALLY NEEDY GROUPS: all

NOTE: By prior approval, when indicated below, is meant that prior approval/authorization of the local professional director and/or the local social services commissioner is required for that service.

1. Inpatient care, services and supplies in a general hospital shall, in the case of a person admitted to such a facility on a Friday or Saturday, be deemed to include only those inpatient days beginning with and following the Sunday after such date of admission, unless such care, services and supplies are furnished for an actual medical emergency or pre-operative care for surgery as provided in paragraph (d) of subdivision five of section 363a of the Social Services Law, or are furnished because of the necessity of emergency or urgent surgery for the alleviation of severe pain or the necessity for immediate diagnosis or treatment of conditions which threaten disability or death if not promptly diagnosed or treated; provided, however, inpatient days of a general hospital admission beginning on a Friday or a Saturday shall be included commencing with the day of admission in a general hospital which the commissioner or his designee has found to be rendering and which continues to render full service on a seven day a week basis which determination shall be made after taking into consideration such factors as the routine availability of operating room services, diagnostic services and consultants, laboratory services, radiological services, pharmacy services, staff patterns consistent with full services and such other factors as the commissioner or his designee deems necessary and appropriate.

Inpatient care, services and supplies in a general hospital shall not include care, services and supplies furnished to patients for certain uncomplicated procedures which may be performed on an outpatient basis in accordance with regulations of the commissioner of health, unless the person or body designated by such commissioner determines that the medical condition of the individual patient requires that the procedure be performed on an inpatient basis.

1. Limits other than medical necessity are not applicable to EPSDT recipients in accord with 1905 (r) 3.
2. We have received the State plan and reviewed it and determined that we are in compliance with EPSDT requirements.
2a. **Outpatient Hospital Services**

Outpatient Hospital Services provided by hospitals licensed pursuant to Article 31 of the Mental Hygiene Law and Article 28 of the Public Health Law are in accordance with 42 CFR § 440.20(a) title Outpatient Hospital Services. Such services include Clinic Treatment Services, Partial Hospitalization, Continuing Day Treatment, and Day Treatment Services for Children, as set forth in item 9a of the Supplement to Attachment 3.1-A of the Plan.
2a. **Outpatient Hospital Services (continued)**

Outpatient Hospital Services provided by hospitals licensed pursuant to Article 28 of the Public Health Law are in accordance with 42 CFR § 440.20(a) title Outpatient Hospital Services. Effective January 1, 2015, such services include Collaborative Care Services as set forth in item 9 of the Supplement to Attachment 3.1-B of the Plan.
4a. Prior approval is required for all out-of-state placements at Specialized Care Facilities for difficult to place individuals or High level Care facilities for the head injured.

Medicaid payments shall not be authorized for nursing facilities which are not certified or have not applied for certification to participate in Medicare.

Care days in nursing facilities is reimbursed for Medicaid patients requiring and receiving medically necessary lower level of care services. Medical Assistance is provided until such time as the appropriate level of care becomes available.

4d.i. **Face-to-Face Counseling Services**
4d.ii. **Face-to-Face Tobacco Cessation Counseling Services for Pregnant Women**

Effective October 1, 2013, Medicaid coverage of comprehensive counseling and pharmacotherapy for cessation of tobacco use by all Medicaid eligible recipients, including pregnant women, will be provided. Such services will be provided face-to-face, by or under the supervision of a physician and no cost sharing (co-pays) will apply. In accordance with section 4107 of the Patient Protection and Affordable Care Act, current coverage of smoking cessation services for all Medicaid recipients, including pregnant women, will be modified to include a maximum of two quit attempts per 12 months, which will include a maximum of four face-to-face counseling sessions per quit attempt.

5. Prior approval is required for certain procedures which may be considered cosmetic or experimental. Physicians are informed of the specific prior approval requirements in the MMIS Physician Provider Manual.

5a. **Lactation consultant services:** effective September 1, 2012, reimbursement will be provided to physicians for breastfeeding health education and counseling services. Physicians must be currently registered and licensed by the State in accordance with 42 CFR 440.60(a) and also International Board Certified Lactation Consultants (IBCLC). Date of implementation will occur on the first day of the month following 30 days after Federal approval of this provision of the State Plan.

**Collaborative Care Services:** Effective January 1, 2015, Physician services shall include Collaborative Care Services as set forth in item 9 of the Supplement to Attachment 3.1-B of the Plan. Physician Services are in accordance with 42 CFR §440.50 and requirements for claim submission comply with the State Medicaid Manual, §4281 titled Restriction on Payments for Physician Services.

6. Care and services will be provided only if they are in accordance with regulations of the Department of Health.

---

**TN#: 14-0027**  **Approval Date: November 28, 2017**  
**Supersedes TN#: 13-0010**  **Effective Date: January 1, 2015**
6a. Medicaid does not cover routine hygienic care of the feet in the absence of pathology.

Payment for podiatry services will be made for services provided to Medicaid eligibles under twenty-one years of age under the EPSDT program and only by written referral from a physician, physician assistant, nurse practitioner or certified nurse midwife. Effective September 1, 2012, payment for podiatry services will include services provided to Medicaid recipients age 21 and older with a diagnosis of diabetes mellitus and only with a written referral from a physician, physician assistant, nurse practitioner or certified nurse midwife. Date of implementation will occur on the first day of the month following 30 days after Federal approval of this provision in the State Plan.

Only a qualified podiatrist, per 18 NYCRR Section 505.12(a)(1), who is licensed and currently registered to practice podiatry in New York State by the State Education Department, can provide podiatry services.

Such podiatry care and services may only be provided upon written referral by a physician, physician’s assistant, nurse practitioner or nurse midwife, per their individual scope of practice consistent with New York State Education Law and the rules of the Commissioner of Education.

Nursing facilities, Intermediate Care Facilities for Individuals with Intellectual Disabilities, and Article 28 or Article 31 inpatient facilities and certified clinics which include foot care services in the rate established for medical care for Medicaid recipients will continue to receive payments for these services through their rates. Additionally, Medicaid will continue to pay for medically necessary items and supplies (e.g., prescription drugs) for all recipients when ordered by a private practicing podiatrist.

In the office setting, a podiatrist may only provide a limited number of clinical laboratory tests. Podiatrists are informed of the specific clinical laboratory tests they may perform, in their office setting, in the MIS Podiatrists Manual. A podiatrist may only provide radiological services which are within the scope of podiatric practice. Amputation and bunion surgery may be performed by a podiatrist in a hospital setting.

TN#: 13-10 Approval Date: November 6, 2013
Supersedes TN#: 12-16 Effective Date: October 1, 2013
4b. Early and Periodic Screening, Diagnostic and Treatment Services (EPSDT).

School Supportive Health Services and Pre-School Supportive Health Services

School Supportive Health Services (SSHS) and Pre-School Supportive Health Services (PSSHS) are services provided by or through a school district[, a Section 4201 school], a county in the State, or New York City to children with disabilities, who attend public or State Education Department approved schools or preschools. The services must be:

- medically necessary and included in a Medicaid covered category in accordance with 1905(a), 1905 (r)(5), 1903(c) of the Social Security Act;
- ordered or prescribed by a physician or other licensed practitioner acting within his or her scope of practice under New York State Law;
- included in the child's Individualized Education Program (IEP);
- provided by qualified professionals under contract with or employed by a school district[, a Section 4201 school,] or a county in the State or the City of New York;
- furnished in accordance with all requirements of the State Medicaid Program and other pertinent state and federal laws and regulations; including those for provider qualifications, comparability of services, and the amount, duration and scope of provisions; and
- included in the state's plan or available under Early Periodic Screening, Diagnostic and Treatment (EPSDT) services.

Effective September 1, 2009, the services covered by the SSHS and PSSHS Program for Medicaid eligible children under the age of 21 who are eligible for Early and Periodic Screening, Diagnostic and Treatment Services (EPSDT) include medically necessary physical therapy services, occupational therapy services, speech therapy services, psychological counseling, skilled nursing services, psychological evaluations, medical evaluations, medical specialist evaluations, audiological evaluations, and special transportation within the limits of EPSDT services. A school district[, Section 4201 school,] a county in the State, and New York City must be enrolled as a Medicaid provider in order to bill Medicaid.

1. Physical Therapy Services

Definition: Physical therapy services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42 CFR 440.110(a).
Services: Physical therapy services provided by or through; a school district[; a Section 4201 school]; a county in the State or the City of New York, must have a written order or prescription from a physician, physician assistant, or nurse practitioner who is acting within the scope of his or her practice under NYS law and must be provided to a child by or under the direction of a qualified physical therapist. Physical therapy services must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE). These services include any necessary supplies and equipment utilized during the therapy session.

Medically necessary EPSDT services are health care, diagnostic services, treatments and other measures necessary to correct or ameliorate physical defects, mental illnesses, and other disabilities.

Physical therapy services include but are not limited to:

- Identification of children with physical therapy needs;
- Evaluation for the purpose of determining the nature, extent and degree of the need for physical therapy services;
- Provision of physical therapy services for the purpose of preventing or alleviating movement dysfunction and related functional problems;
- Obtaining, interpreting, and integrating information appropriate to program planning;
- Diagnosis and treatment of physical disability, injury or disease using physical and mechanical means, including but not limited to heat, cold, light, air, water, sound, electricity, massage, mobilization and therapeutic exercise with or without assistive devices, and
- The performance and interpretation of tests and measurements to assist pathopsychological, pathomechanical and developmental deficits of human systems to determine treatment and assist in diagnosis and prognosis.

Physical therapy services may be provided in an individual or group setting.

Providers: Services must be provided by:

- a New York State licensed and registered physical therapist qualified in accordance with 42 CFR 440.110(a) and with applicable state and federal laws and regulations, acting within his or her scope of practice under New York State Law; or
- a certified physical therapy assistant “under the direction of” such a qualified licensed and registered physical therapist, acting within his or her scope of practice under New York State Law.
“Under the direction of” means that, with respect to each Medicaid beneficiary, the qualified therapist:

- sees the participant at the beginning of and periodically during the course of treatment;
- is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State law;
- has continued involvement in the care provided, and reviews the need for continued services throughout treatment;
- assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
- spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards of practice;
- ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment; and
- keeps documentation supporting the supervision of services and ongoing involvement in the treatment.

Services may be rendered in the setting in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Educational Services (BOCES) programs, approved preschool programs, public schools, approved private schools, Section 4201 schools, state operated schools, in private practitioner’s offices, at home and/or in community based settings.

2. Occupational Therapy Services

Definition: Occupational therapy services as outlined in this section of the State Plan are available to Medicaid eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42 CFR 440.110(b).

Services: Occupational therapy services provided by or through; a school district[; a Section 4201 school]; a county in the State or the City of New York must have a written order or prescription from a physician, physician assistant, or nurse practitioner who is acting within the
New York
2(xii)(D)

scope of his or her practice under New York State Law and must be provided to a child by or under the direction of a qualified occupational therapist. Occupational therapy services must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE). These services include any necessary supplies and equipment utilized during the therapy session.

Medically necessary EPSDT services are health care, diagnostic services, treatments, and other measures necessary to correct or ameliorate physical defects, mental illnesses, and other disabilities.

Occupational therapy services include but are not limited to:

- Identification of children with occupational therapy needs;
- Evaluation for the purpose of determining the nature, extent and degree of the need for occupational therapy services;
- Improving, developing or restoring functions impaired or lost through illness, injury, or deprivation;
- Preventing through early intervention initial or further impairment or loss of function; and
- Planning and utilization of a program of activities to develop or maintain adaptive skills designed to achieve maximal physical and mental functioning of the student in daily life tasks.

Occupational therapy services may be provided in an individual or group setting.

Providers: Services must be provided by:

- a New York State licensed and registered occupational therapist qualified in accordance with 42CFR 440.110(b) and applicable state and federal laws and regulations, acting within his or her scope of practice under New York State Law; or
- a certified occupational therapy assistant (COTA) “under the direction of” such a qualified licensed and registered occupational therapist, within his or her scope of practice under New York State Law.

“Under the direction of” means that, with respect to each Medicaid beneficiary, the qualified therapist:

- sees the participant at the beginning of and periodically during the course of treatment;
New York
2(xii)(E)

- is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State law;
- has continued involvement in the care provided, and reviews the need for continued services throughout treatment;
- assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
- spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards of practice;
- ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment and
- keeps documentation supporting the supervision of services and ongoing involvement in the treatment.

Services may be rendered in the settings in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Education Services (BOCES) programs, approved preschool programs, public schools, approved private schools, 4201 schools, state operated schools, in private practitioner’s offices, at home and/or in community based settings.

3. Speech Therapy Services

Definition: Speech therapy services as outlined in this section of the State Plan are available to Medicaid eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42 CFR 440.110(c).

Services: Speech therapy services provided by or through: a school district; a section 4201 school; a county in the State or the City of New York must have a written order or prescription from a physician, physician assistant, nurse practitioner, or a speech-language pathologist who is acting within his or her scope of practice under New York State law and must be provided to a child by or under the direction of a qualified speech-language pathologist. Speech therapy services must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE).

Medically necessary EPSDT services are health care, diagnostic services, treatments and other measures to correct or ameliorate physical defects, mental illnesses, and other disabilities.
Speech therapy services include but are not limited to:

- Identification of children with speech disorders;
- Diagnosis and appraisal of specific speech disorders;
- Referral for medical or other professional attention as necessary for the habilitation of speech disorders;
- Provision of speech or language services for the habilitation or prevention of communicative disorders;
- Evaluation and application of principles, methods and procedures of measurement, prediction, diagnosis, testing, counseling, consultation, rehabilitation and instruction, related to development of disorders of speech, voice, and/or language, and;
- Preventing, ameliorating or modifying speech disorder conditions in children and/or groups of children.

Speech therapy services may be provided in an individual or group setting.

**Providers:** Services must be provided by:

- A licensed and registered speech-language pathologist qualified in accordance with 42CFR Section 440.110(c) and applicable state and federal laws and regulations, acting within his or her scope of practice under New York State law; or
- A teacher certified to provide speech and language services, under the documented direction of such a qualified licensed and registered speech language pathologist (ASHA-Certified or equivalent), acting within his or her scope of practice under New York State Law.

"Under the reaction of" means that, with respect to each Medicaid beneficiary, the qualified therapist:

- Sees the participant at the beginning of and periodically during the course of treatment;
- Is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State law;
- Has continued involvement in the care provided; and reviews the need for continued services throughout treatment;
- Assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
New York
2(xii)(G)

- spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards of practice;
- ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment; and
- keeps documentation supporting the supervision of services and ongoing involvement in the treatment.

Services may be rendered in the setting in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Educational Services (BOCES) programs, approved preschool programs, public schools, approved private schools, Section 4201 schools, state operated schools, in private practitioner’s offices, at home and/or in community based settings.

4. Psychological Counseling

**Definition:** Psychological counseling services outlined in this section of the State Plan are available to Medicaid-eligible beneficiaries under 21 years of age who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42 CFR Section 440.60(a) and 440.50(a)(2).

**Services:** Psychological counseling provided by or through a school district[; a Section 4201 school]; a county in the State or City of New York must have a referral from a physician, physician assistant, or nurse practitioner who is acting within the scope of his or her practice under NYS law or an appropriate school official or other voluntary health or social agency and must be provided to a child by or under the direction of a qualified practitioner. Psychological counseling services must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE).

Medically necessary EPSDT services are health care, diagnostic services, treatments and other measures to correct or ameliorate physical defects, mental illnesses, and other disabilities.

Psychological counseling services include:

- treatment services using a variety of techniques to assist the child in ameliorating behavior and emotional problems that are severe enough to require treatment.

Psychological counseling services may be provided in an individual or group setting.
New York
2(xii)(H)

Providers: Psychological counseling services must be provided by a qualified practitioner, within his or her scope of practice in accordance with New York State Law and with the qualification requirements of 42 CFR Section 440.60(a) and 440.50(a)(2) and with other applicable state and federal laws or regulations. Psychological counseling services may only be provided by a professional whose credentials are comparable to those of providers who are able to provide psychological counseling services within the community.

Services may be provided by:

- a New York State licensed and registered psychiatrist qualified in accordance with 42 CFR Section 440.50(a) and other applicable state and federal law or regulations, acting within his or her scope of practice under New York State Law;
- a New York State licensed and registered psychologist qualified in accordance with 42 CFR Section 440.60(a) and other applicable state and federal law or regulations acting within his or her scope of practice under New York State Law;
- a New York State licensed clinical social worker (LCSW), qualified in accordance 42 CFR Section 440.60(a) and other applicable state and federal law or regulations, acting within his or her scope of practice under NYS law; or
- a licensed master social worker (LMSW), qualified in accordance with 42 CFR Section 440.60(a) and other applicable state and federal law or regulations, acting within his or her scope of practice under New York State Law, under the supervision of such a qualified licensed clinical social worker, a qualified licensed and registered psychologist, or a qualified licensed and registered psychiatrist as described above.

Supervision of the clinical social work services provided by the licensed master social worker, with respect to each Medicaid beneficiary, shall consist of contact between the licensed master social worker and supervisor during which:

- the licensed master social worker apprises the supervisor of the diagnosis and treatment of each client;
- the licensed master social worker’s cases are discussed;
- the supervisor provides the licensed master social worker with oversight and guidance in diagnosing and treating clients;
- the supervisor regularly reviews and evaluates the professional work of the licensed master social worker; and
- the supervisor provides at least one hour per week or two hours every other week of in-person individual or group clinical supervision, provided that at least two hours per month shall be individual clinical supervision.
Services may be rendered in the setting in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Educational Services (BOCES) programs, approved preschool programs, public schools, approved private schools, Section 4201 schools, state operated schools, in private practitioner’s offices, at home and/or in community based settings.

5. Skilled Nursing

**Definition:** Skilled nursing services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42 CFR 440.60(a).

**Services:** Skilled nursing services provided by or through: a school district[; a Section 4201 school]; a county in the State or the City of New York, must have a written order or prescription from a physician, physician assistant, or nurse practitioner acting within his or her scope of practice under New York State law and must be provided to a child by a registered nurse acting within his or her scope of practice under New York State law, or by a NYS licensed practical nurse acting within his or her scope of practice under New York State law “under the direction of” a NYS licensed and registered nurse or licensed physician, dentist or other licensed health care provider authorized under the Nurse Practice Act. Skilled nursing services must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE) when there is a specific need based on a medical condition of the child.

Medically necessary EPSDT services health care, diagnostic services, treatments and other measures necessary to correct ameliorate physical defects, mental illnesses and other disabilities.

Skilled nursing services include the promotion of health, prevention of illness, care of the ill and disabled people through the provision of services essential to the maintenance and restoration of health. Skilled nursing services may include:

- health assessments and evaluations;
- medical treatments and procedures;
- administering and/or monitoring medication needed by the student during school hours; and
- consultation with licensed physicians, parents and staff regarding the effects of medication.
Providers: Skilled nursing services must be provided by:

- a New York State licensed registered nurse qualified in accordance with the requirements at 42 CFR 440.60(a) and other applicable state and federal law and regulations, acting within his or her scope of practice; or
- a New York State licensed practical nurse qualified in accordance with 42 CFR 440.60(a) and other applicable state and federal law or regulations, acting within his or her scope of practice “under the direction of” a licensed registered nurse, a physician, dentist or other licensed health care provider authorized under the Nurse Practice Act.

“Under the direction of” means that the licensed registered nurse, physician or other licensed health care provider authorized under the Nurse Practice Act:

- sees the participant at the beginning of and periodically during the course of treatment;
- is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State law;
- has continued involvement in the care provided; and reviews the need for continued services throughout treatment;
- assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
- spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards of practice;
- ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment; and
- keeps documentation supporting the supervision of services and ongoing involvement in the treatment.

Services may be provided by:

- a New York State licensed and registered nurse; or
- a New York State licensed practical nurse, under the direction of a New York State licensed and registered nurse, or licensed physician, dentist or other licensed health care practitioner legally authorized under the Nurse Practice Act.

Services may be rendered in the setting in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Educational Services (BOCES).
New York  
2(xii)(K)

programs, approved preschool programs, public schools, approved private schools, Section 4201 schools, state operated schools, in private practitioner’s offices, and/or in community based settings.

6. Psychological Evaluations

**Definition:** Psychological evaluations outlined in this section of the State Plan are available to Medicaid-eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42CFR Section 440.50(a) and 42CFR Section 440.60(a).

Psychological evaluations provided by or through a school district; a Section 4201 school; a county in the State or the City of New York must have a referral from a physician, physician assistant, or a nurse practitioner acting within his or her scope of practice under New York State law or an appropriate school official or other voluntary health or social agency and must be provided to a child by a qualified practitioner. Psychological evaluations must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE). If a psychological evaluation is used to identify a child’s health related needs as part of the IEP process, the evaluation is eligible for Medicaid coverage once the evaluation is reflected in the child’s IEP.

**Services:** Medically necessary EPSDT services are health care, diagnostic services, treatments, and other measures to correct or ameliorate physical defects, mental illnesses, and other disabilities.

Psychological evaluations include but are not limited to:

- Administering psychological tests and other assessment procedures;
- Interpreting testing and assessment results, and
- Evaluating a Medicaid recipient for the purpose of determining the needs for specific psychological, health or related services.

**Providers:** Psychological evaluations must be provided by a qualified provider who meets the requirements of 42 CFR Section 440.60 or 42 CFR Section 440.50(a) and other applicable state and federal laws and regulations. Psychological evaluation services may only be provided by a professional whose credentials are comparable to those of providers who are able to provide psychological evaluation services in the community.
New York
2(xii)(L)

Services may be provided by:

- a New York State licensed and registered psychiatrist, qualified in accordance with 42 CFR Section 440.50(a) and other applicable state and federal law or regulations, acting within his or her scope of practice under NYS law; or
- a New York State licensed and registered psychologist, qualified in accordance with 42 CFR Section 440.60(a) and other applicable state and federal law or regulations, acting within his or her scope of practice under NYS law.

Services may be rendered in the setting in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Education Services (BOCES) programs, approved preschool programs, public schools, approved private schools, Section 4201 schools, state operated schools, in private practitioner’s offices, and/or in community based settings.

7. Medical Evaluations

**Definition:** Medical evaluations outlined in this section of the State Plan are available to Medicaid-eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42CFR Section 440.50(a), 440.60(a), and 440.166(a).

**Services:** Medically necessary EPSDT services are health care, diagnostic services, treatments, and other measures to correct or ameliorate physical defects, mental illnesses and other disabilities.

Medical evaluations provided by or through: a school district[; a Section 4201 school]; a county in the State or the City of New York must be performed by a physician, physician assistant, or nurse practitioner acting within the scope of his or her practice under New York State law. A medical evaluation must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE). If a medical evaluation is used to identify a child’s health related needs as a part of the IEP process, the evaluation is eligible for Medicaid coverage once the evaluation is reflected in the child’s IEP.

A medical evaluation is the recording of:

- chief complaints;
- present illness;
past medical history;
personal history and social history;
a system review;
a complete physical evaluation;
ordering of appropriate diagnostic tests and procedures, and
recommended plan of treatment.

**Providers:** A medical evaluation must be provided by a New York State licensed and registered, physician, physician assistant, or nurse practitioner qualified in accordance with 42 CFR Section 440.50(a), 440.60(a) and 440.166(a) and other applicable state and federal laws and regulations, acting within his or her scope of practice under NYS law.

Services may be rendered in the setting in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Educational Services (BOCES) programs, approved preschool programs, public schools, approved private schools, Section 4201 schools, state operated schools, in private practitioner’s officers, and/or in community based settings.

### 8. Medical Specialist Evaluations

**Definition:** Medical specialist evaluations outlined in this section of the State plan are available to Medicaid-eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42 CFR Section 440.50(a), 440.60(a), and 440.166(a).

**Services:** Medically necessary EPSDT services are health care, diagnostic services, treatments, and other measures to correct and ameliorate physical defects, mental illnesses, and other disabilities.

Medical specialist evaluations provided by or through: a school district; a Section 4201 school; a county in the State or the City of New York must be provided by a New York State licensed and registered physician, physician assistant, or nurse practitioner specialist acting within his or her scope of practice and related area of specialization. A medical specialist evaluation must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE). If a medical specialist evaluation is used to identify a child’s health related needs as part of the IEP process, the evaluation is eligible for Medicaid coverage once the evaluation is reflected in the child’s IEP.
A medical specialist evaluation is:

- an examination of the affected bodily area or organ system and other symptomatic or related organ systems;
- the ordering of appropriate diagnostic tests and procedures, and
- the reviewing of the results and reporting on the tests and procedures.

Providers: A medical specialist evaluation must be provided by a qualified New York State licensed and registered physician, physician assistant, or nurse practitioner specialist practicing in the related area of specialization within his or her scope of practice under NYS law, in accordance with 42 CFR Section 440.50(a), 440.60(a), and 440.166(a) and other applicable state and federal laws and regulations.

Services may be rendered in the setting in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Educational Services (BOCES) programs, approved preschool programs, public schools, approved private schools, Section 4201 schools, state operated schools, in private practitioner’s offices, and/or in community based settings.

9. Audiological Evaluations

Definition: Audiological evaluations as outlined in this section of the State Plan are available to Medicaid-eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary. These services are provided in accordance with 42 CFR Section 440.60(a) and 42 CFR Section 440.110(c)(3).

Services: Audiological evaluations provided by or through: a school district; a Section 4201 school; a county in the State or the City of New York must have a written order from a physician, physician assistant, or nurse practitioner who is acting within the scope of his or her practice under NYS law and provided to a child by a qualified practitioner. An audiological evaluation must be included in the IEP as recommended by the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE). If an audiological evaluation is used to identify a child’s health related needs as part of the IEP process, the evaluation is eligible for Medicaid coverage once the evaluation is reflected in the child’s IEP.

Medically necessary EPSDT services are health care, diagnostic services, treatments, and other measures to correct and ameliorate physical defects, mental illnesses, and other disabilities.
Medically necessary audiology services include but are not limited to:

- Identification of children with hearing loss;
- Determination of the range, nature and degree of hearing loss, including the referral for medical or other professional attention for the amelioration of hearing; and
- Determination of the child’s need for group and individual amplification.

An audiological evaluation is the determination of the range, nature and degree of the hearing loss including:

- measurement of hearing acuity;
- tests related to air and bone conduction;
- speech reception threshold;
- speech discrimination;
- conformity evaluations;
- pure tone audiometry.

**Providers:** Audiology evaluation services must be provided by a New York State licensed and registered audiologist, qualified in accordance with 42 CFR Section 440.60(a) and 42 CFR Section 440.110 (c)(3) and other applicable state and federal law or regulations, acting within his or her scope of practice under NYS law.

Services may be rendered in the setting in which the child’s IEP will be implemented, including but not limited to Article 28 facilities, Board of Cooperative Educational Services (BOCES) programs, approved preschool programs, public schools, approved private schools, Section 4201 schools, state operated schools, in private practitioner’s offices, and/or in community based settings.

**10. Special Transportation**

**Definition:** Special transportation outlined in this section of the State Plan is available to Medicaid-eligible beneficiaries under 21 years of age, who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary.

Medically necessary EPSDT services are health care, diagnostic services, treatments, and other measures to correct and ameliorate physical defects, mental illnesses, and other disabilities.
**New York**  
**2(xii)(P)**

**Services:** Special transportation provided by or through a school district; a section 4201 school; a county in the State or the City of New York must be included in the IEP as recommended by the Committee on Special Education (CSE), or the Committee on Preschool Special Education (CPSE). Special transportation arrangements must be identified in the IEP.

Special transportation is provided when a child requires specialized transportation equipment, supports or services because of his/her disability as cited in 34 CFR 300.34 (c) (16) (iii).

Special transportation is limited to those situations where the child receives transportation to obtain a Medicaid covered service (other than transportation), and both the Medicaid covered service and the need for special transportation are included in the child’s IEP. Special transportation can only be billed on a day that a Medicaid reimbursable service was delivered and may only be billed at the rate for each one way trip.

**Providers:** Special transportation services must be provided by a qualified Medicaid provider. Attendance documentation (bus logs) is required in order to bill Medicaid. In order to receive payment for services provided to a Medicaid recipient, a vendor must be lawfully authorized to provide transportation services on the date the services are rendered.

**TN #17-0057 Approval Date November 28, 2017**

**Supersedes TN #09-0061 Effective Date July 1, 2017**
6.d(i). Early and Periodic Screening, Diagnostic and Treatment services (EPSDT).

**Early Intervention Services**

“Early Intervention” Services are provided to children who have a developmental delay or disability and are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary.

These services must be:

- Medically necessary and included in a Medicaid covered category in accordance with 1905(a), 1905(r)(5), 1903(c) of the Social Security Act;
- Ordered or prescribed by a physician or other licensed practitioner acting within his or her scope of practice under New York State law;
- Included in the child's Individualized Family Service Plan (IFSP);
- Provided by qualified professionals working independently or employed by or under contract with an approved early intervention agency;
- Furnished in accordance with all requirements of the State Medicaid Program and other pertinent state and federal laws and regulations, including those for provider qualifications, comparability of services, and the amount, duration and scope provisions; and
- Included in the state's plan or available under Early Periodic Screening, Diagnostic and Treatment (EPSDT) services.

Services may be rendered in the setting in which the child’s IFSP will be implemented, including but not limited to Article 28 facilities, approved preschools, daycare settings, in private practitioners’ offices, and natural environments including homes or other community settings.

Collateral visits: Collateral services are services that are provided to the child/family (caregiver) or to the parent (caregiver) in accordance with the child’s IFSP. Collateral services are reimbursed as early intervention services and are provided to a family member or significant other of a Medicaid-eligible member, regardless of the family member or significant other’s eligibility for Medicaid, who has an interim or final individualized family service plan (IFSP). For purposes of this section, a significant other is a person who substitutes for the recipient’s family, interacts regularly with the recipient, and affects directly the recipient's developmental status. Collateral services must be included in the child's and family's IFSP, and include psychological services, social work services, and special instruction services provided to infants and toddlers and/or their families/caregivers with an interim or final IFSP. Payment is available for collateral services furnished pursuant to an interim or final individualized family service plan and which are provided by a qualified professional working independently or employed by or under contract with and approved early intervention agency. Collateral services must relate to the medical treatment.
specifying in the recipient's interim or final individualized family service plan and must be for the beneficiary's direct benefit. Persons who receive collateral services to support the child's development must be identified in the interim or final individualized family service plan.

Early Intervention services, limited to EPSDT, which are provided by qualified professionals employed by or under contract to an Early Intervention agency or approved by the State pursuant to an interim or final Individualized Family Service Plan (IFSP) include:

1. Screening Services

**Definition:** Screening is a process involving those instruments, procedures, family information and observations, and clinical observations used by qualified, state-approved early intervention providers to assess a child's developmental status to indicate what type of evaluation, if any, is warranted.

**Services:** Screening services are provided in accordance with 42 CFR section 440.130(b). Screening services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.

**Providers:** Screening services are provided by qualified licensed practitioners, within their scope of practice in accordance with New York State law. Practitioners of EPSDT EI screening services include:

New York State licensed and registered audiologists, qualified in accordance with 42 CFR Section 440.110(c)(3) and other applicable state and federal law or regulations, acting within his or her scope of practice under NYS law.

New York State licensed and registered occupational therapist qualified in accordance with 42 CFR 440.110(b) and applicable state and federal laws and regulations, acting within his or her scope of practice under New York State Law; or

A certified occupational therapy assistant “under the direction of” such a qualified licensed and registered occupational therapist, within his or her scope of practice under New York State Law.

New York State licensed and registered physical therapist qualified in accordance with 42 CFR 440.110(a) and with applicable state and federal laws and regulations, acting within his or her scope of practice under New York State Law; or

A certified physical therapy assistant “under the direction of” such a qualified licensed and registered physical therapist, acting within his or her scope of practice under New York State Law.

TN __#18-0039________ Approval Date __June 13, 2019________
Supersedes TN ___NEW____ Effective Date __July 1, 2018________
New York State licensed and registered physicians, acting within his or her scope of practice under NYS law.

New York State licensed and registered psychologists, qualified in accordance with applicable state and federal laws and regulations, acting within his or her scope of practice under NYS law.

New York State licensed and registered speech-language pathologists, qualified in accordance with 42 CFR Section 440.110(c) and applicable state and federal laws and regulations, acting within his or her scope of practice under New York State law; or

A teacher certified to provide speech and language services, under the documented direction of such a qualified licensed and registered speech-language pathologist (ASHA certified or equivalent), acting within his or her scope of practice under New York State law.

A New York State licensed clinical social worker (LCSW) qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or

A licensed master social worker (LMSW) qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law, under the supervision of such a qualified licensed clinical social worker, a qualified licensed and registered psychologist, or a qualified licensed and registered psychiatrist as described above.

New York State certified teachers of special education, with master's degrees and certified by the New York State Education Department's Office of Teaching Initiatives.

2. Evaluation Services

**Definition:** Evaluation services are the procedures used by appropriately qualified, state-approved early intervention providers to determine a child’s initial and continuing eligibility for early intervention services.

**Services:** Evaluation services determine the child's level of functioning and needs in the areas of cognitive, physical, communication, social or emotional, and adaptive development and include a health assessment including a physical examination, routine vision and hearing screening, and where appropriate, a neurological assessment. When indicated, evaluation services include diagnostic procedures and review of medical and other records to identify a diagnosed physical or mental condition with a high probability of resulting in developmental delay.
Evaluation services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.

Providers: Providers of EPSDT EI evaluation services include:

New York State licensed and registered audiologists, qualified in accordance with 42 CFR Section 440.110(c)(3) and other applicable state and federal law or regulations, acting within his or her scope of practice under NYS law.

New York State licensed and registered occupational therapists qualified in accordance with 42 CFR 440.110(b) and applicable state and federal laws and regulations, acting within his or her scope of practice under New York State Law; or

A certified occupational therapy assistant “under the direction of” such a qualified licensed and registered occupational therapist, within his or her scope of practice under New York State Law.

New York State licensed and registered physical therapist qualified in accordance with 42 CFR 440.110(a) and with applicable state and federal laws and regulations, acting within his or her scope of practice under New York State Law; or

A certified physical therapy assistant “under the direction of” such a qualified licensed and registered physical therapist, acting within his or her scope of practice under New York State Law.

New York State licensed and registered physicians, acting within his or her scope of practice under NYS law.

New York State licensed and registered nurses qualified in accordance with applicable state and federal law and regulations, acting within his or her scope of practice.

New York State licensed and registered psychologists, qualified in accordance with applicable state and federal laws and regulations, acting within his or her scope of practice under NYS law.

New York State licensed and registered speech-language pathologists, qualified in accordance with 42 CFR Section 440.110(c) and applicable state and federal laws and regulations, acting within his or her scope of practice under New York State law; or

A teacher certified to provide speech and language services, under the documented direction of such a qualified licensed and registered speech-language pathologist (ASHA certified or equivalent), acting within his or her scope of practice under New York State law.
A New York State licensed clinical social worker (LCSW) qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or

A licensed master social worker (LMSW) qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law, under the supervision of such a qualified licensed clinical social worker, a qualified licensed and registered psychologist, or a qualified licensed and registered psychiatrist as described above;

Licensed Mental Health Practitioners (Mental Health Counselors, Marriage and Family Therapists, Creative Arts Therapists, and Psychoanalysts,) acting within their scope of practice under New York State law.

New York State certified teachers of special education, with master's degrees and certified by the New York State Education Department's Office of Teaching Initiatives.

Teacher of Students with Disabilities (birth through grade 2) certified by the New York State Education Department's Office of Teaching Initiatives in the subject area of Early Childhood Education, for birth through grade 2, for students with disabilities.

Teachers of the Blind and Visually Impaired (Partially Sighted) certified by the New York State Education Department's Office of Teaching Initiatives in the subject area Blind and Visually Impaired, for pre-Kindergarten through Grade 12 (all grade levels).

Teachers of the Deaf and Hard of Hearing (Hearing Impaired) certified by the New York State Education Department's Office of Teaching Initiatives in the subject area Deaf and Hard of Hearing, for pre-Kindergarten through Grade 12 (all grade levels).

New York State registered certified dieticians/nutritionists who meet the education and experience requirements set forth by the New York State Education Department under applicable NYS law and regulations.
3. **Audiology Services**

**Definition:** Audiological services as outlined in this section of the State Plan are available to Medicaid-eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) services and for whom services are medically necessary.

**Services:** Audiology services are provided in accordance with 42 CFR section 440.110 (c). Audiology services include services provided to an individual child and instruction provided to child’s parent or caregiver when these contacts directly benefit the needs of the child as described in his or her treatment plan, the IFSP, and pursuant to a written order or prescription from a physician, physician assistant or nurse practitioner acting within his or her scope of practice under New York State law as appropriate. Covered services include services to identify, evaluate, and treat hearing loss, including identification of children with auditory impairment using at risk criteria and appropriate audiologic screening techniques; determination of the range, nature, and degree of hearing loss and communication functions, by use of audiological evaluation procedures; referral for medical and other services necessary for the habilitation or rehabilitation of children with auditory impairment; provision of auditory training, aural rehabilitation, speech reading and listening device orientation and training, and other services; and, provision of services for prevention of hearing loss; and, determination of the child's need for individual amplification, including selecting, fitting, and dispensing appropriate listening and vibrotactile devices, and evaluating the effectiveness of those devices.

**Providers:** Audiology services must be provided by a New York State licensed and registered audiologist, qualified in accordance with 42 CFR Section 440.110(c)(3) and other applicable state and federal law or regulations, acting within his or her scope of practice under NYS law.

4. **Nursing Services**

**Definition:** Nursing services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.

**Services:** Nursing services are provided in accordance with 42 CFR section 440.70(b)(1). Nursing services include services provided to an individual child and instruction to the child’s parent or caregiver when such contacts directly benefit the needs of the child as described in his or her treatment plan, the IFSP, and pursuant to a written order or prescription from a physician acting within his or her scope of practice under New York State law.

Nursing services include the promotion of health, prevention of illness, care of the ill and disabled people through the provision of services essential to the maintenance and restoration of health. Nursing services may include:

- Health assessments and evaluations;
- Medical treatments and procedures;
- Administering and/or monitoring medication, treatments or regimens needed by the child; and
- Consultation with licensed physicians, parents and other service / health care providers regarding the effects of medication.
Providers: Nursing services are provided by New York State licensed registered nurses qualified in accordance with applicable state and federal law and regulations, acting within his or her scope of practice; or a New York State licensed practical nurse qualified in accordance with applicable state and federal law and regulations, acting within his or her scope of practice under the direction of a licensed registered nurse, a physician, dentist or other licensed health care provider authorized under the Nurse Practice Act.

“Under the direction of” means that, with respect to each Medicaid beneficiary, the qualified clinician:

- Sees the participant at the beginning of and periodically during the course of treatment;
- Is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State law;
- Has continued involvement in the care provided, and reviews the need for continued services throughout treatment;
- Assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
- Spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards of practice;
- Ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment and
- Keeps documentation supporting the supervision of services and ongoing involvement in the treatment.

5. Nutrition Services

Definition: Nutrition services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary. Nutrition services outlined in this section of the state plan are provided in accordance with 42 CFR section 440.130(c).

Services: Nutrition services include services provided to an individual child and instruction provided to the child’s parent or caregiver when such contacts directly benefit the needs of the child as described in his or her treatment plan, the IFSP, and pursuant to a written order or prescription from a physician, physician assistant or nurse practitioner acting within his or her scope of practice under New York State law.

Covered services include individual assessments in nutritional history and dietary intake; anthropometric, biochemical, and clinical variables; feeding skills and feeding problems; and, food habits and food preferences; developing and monitoring appropriate plans to address the nutritional needs of an eligible child; and, making referrals to appropriate community resources to carry out nutrition goals.
New York  
2(xii)(Q.7)

Providers: Nutrition services are provided by qualified New York State registered certified dieticians/nutritionists acting within the scope of their profession.

6. Occupational Therapy Services

Definition: Occupational therapy services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.

Services: Occupational therapy services are provided in accordance with 42 CFR section 440.110(b). Occupational therapy services include services provided to an individual child and instruction provided to the child’s parent or caregiver, and services provided to children individually or in a group when such contacts directly benefit the needs of the child as described in his or her treatment plan, the IFSP, and pursuant to a written order or prescription from a physician, physician assistant or nurse practitioner acting within his or her scope of practice under New York State law.

Covered services include services to address the functional needs of a child related to adaptive development, adaptive behavior and play, and sensory, motor, and postural development. These services are designed to improve the child’s functional ability to perform tasks in home, school, and community settings, and include identification, assessment, and intervention; adaptation of the environment, and selection, design and fabrication of devices to facilitate development and promote the acquisition of functional skills; and prevention or minimization of the impact of initial or future impairment, delay in development, or loss of functional ability.

Providers: Services must be provided by:

- A New York State licensed and registered occupational therapist qualified in accordance with 42 CFR 440.110(b) and applicable state and federal laws and regulations, acting within his or her scope of practice under New York State Law; or

- A certified occupational therapy assistant “under the direction of” such a qualified licensed and registered occupational therapist, within his or her scope of practice under New York State Law.

“Under the direction of” means that, with respect to each Medicaid beneficiary, the qualified therapist:

- Sees the participant at the beginning of and periodically during the course of treatment;
- Is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State law;
- Has continued involvement in the care provided, and reviews the need for continued services throughout treatment;

- Assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
- Spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards of practice;
- Ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment and
- Keeps documentation supporting the supervision of services and ongoing involvement in the treatment.

7. Physical Therapy Services

**Definition:** Physical therapy services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.

**Services:** Physical therapy services are provided in accordance with 42 CFR section 440.110(a). Physical therapy includes services provided to an individual child and instruction provided to the child’s parent or caregiver, either individually or in a group, when such contacts directly benefit the needs of the child as described in his or her treatment plan, the IFSP, and pursuant to a written order or prescription from a physician, physician assistant or nurse practitioner acting within his or her scope of practice under New York State law.

Covered services include services to address the promotion of sensory motor function through enhancement of musculoskeletal status, neurobehavioral organization, perceptual and motor development, cardiopulmonary status and effective environmental adaptation. These services include evaluation and assessment of infants and toddlers to identify movement dysfunction; obtaining, interpreting, and integrating information appropriate to prevent, alleviate, or compensate for movement dysfunction and related functional problems; and providing individual and group services or treatment to prevent, alleviate, or compensate for movement dysfunction and related functional problems.

**Providers:** Services must be provided by:

- A New York State licensed and registered physical therapist qualified in accordance with 42 CFR 440.110(a) and with applicable state and federal laws and regulations, acting within his or her scope of practice under New York State Law; or

- A certified physical therapy assistant “under the direction of” such a qualified licensed and registered physical therapist, acting within his or her scope of practice under New York State Law.

8. Psychological Services

Definition: Psychological services outlined in this section of the State Plan are provided in accordance with 42 CFR 440.60 and are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.

Providers: Psychological services must be provided by a qualified licensed practitioner, within his or her scope of practice in accordance with New York State law. Services may be provided by:

- A New York State licensed and registered psychiatrist qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or
- A New York State licensed and registered psychologist qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or
- A New York State licensed clinical social worker (LCSW) qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or
New York
2(xii)(Q.10)

- A licensed master social worker (LMSW) qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law, under the supervision of such a qualified licensed clinical social worker, a qualified licensed and registered psychologist, or a qualified licensed and registered psychiatrist as described above; or
- A New York State licensed Mental Health Counselor qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or
- A New York State licensed Marriage and Family Therapist qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or
- A New York State licensed Psychoanalyst qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or
- A New York State licensed Creative Arts Therapist qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law.

Supervision of the clinical social work services provided by the licensed master social worker, with respect to each Medicaid beneficiary, shall consist of contact between the licensed master social worker and supervisor during which:

- The licensed master social worker apprises the supervisor of the diagnosis and treatment of each client;
- The licensed master social worker's cases are discussed;
- The supervisor provides the licensed master social worker with oversight and guidance in diagnosing and treating clients;
- The supervisor regularly reviews and evaluates the professional work of the licensed master social worker; and
- The supervisor provides at least two hours per month of in-person individual or group clinical supervision.

The supervision shall be provided by a New York State licensed and registered psychiatrist, psychologist, or licensed clinical social worker. The supervisor shall be responsible for maintaining records of the client contact hours in diagnosis, psychotherapy and assessment-based treatment planning and supervision hours provided to the qualified individual.
9. Social Work Services

**Definition:** Social work services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary. Social work services outlined in this section of the state plan are provided in accordance with 42 CFR 440.60(a).

**Providers:** Social work services must be provided by a qualified licensed practitioner, within his or her scope of practice in accordance with New York State law. Social work services may be provided by:

- A New York State licensed clinical social worker (LCSW) qualified in accordance applicable state and federal law or regulations, acting within his or her scope of practice under New York State law; or

- A licensed master social worker (LMSW) qualified in accordance with applicable state and federal law or regulations, acting within his or her scope of practice under New York State law, under the supervision of such a qualified licensed clinical social worker, a qualified licensed and registered psychologist, or a qualified licensed and registered psychiatrist as described above.

Supervision of the clinical social work services provided by the licensed master social worker, with respect to each Medicaid beneficiary, shall consist of contact between the licensed master social worker and supervisor during which:

- The licensed master social worker apprises the supervisor of the diagnosis and treatment of each client;
- The licensed master social worker’s cases are discussed;
- The supervisor provides the licensed master social worker with oversight and guidance in diagnosing and treating clients;
- The supervisor regularly reviews and evaluates the professional work of the licensed master social worker; and
- The supervisor provides at least two hours per month of in-person individual or group clinical supervision.

The supervision shall be provided by a New York State licensed and registered psychiatrist, psychologist, or licensed clinical social worker. The supervisor shall be responsible for maintaining records of the client contact hours in diagnosis, psychotherapy and assessment-based treatment planning and supervision hours provided to the qualified individual.

10. Special Instruction/Developmental Services

**Definition:** Special instruction services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.
Services: Special instruction services are provided in accordance with 42 CFR 440.130(c). Special instruction services include working with the child and family to correct deficits in motor development, physical growth and development, sensory perception and information processing, behavioral interactions, cognitive processes, and social interactions that are caused by medical, developmental, or other health-related concerns. Special instruction services include working directly with the child to enhance the child’s development. Special instruction services are provided to an individual child and instruction provided to the child’s parent or caregiver, and services provided to children and/or family in a group when such contacts directly benefit the developmental needs of the child as described in his or her treatment plan, the IFSP. Special instruction includes the design of environments and activities that extend the benefits of intervention/therapy into the child’s daily routine and which promote the child’s acquisition of skills in a variety of developmental areas, including motor development, physical growth and development, sensory perception and information processing; behavioral interactions; cognitive processes; and, social interactions.

Special instruction also includes the provision of instruction, information, and support to parents and primary caregivers in assisting them in planning and maintaining a daily therapeutic regime related to enhancing the child’s developmental progress, including skills such as fine and gross motor, feeding, and other adaptive skills.

Providers: Special instruction services are provided by qualified individuals possessing the following certification issued by the State Education Department pursuant to State regulations; special education teachers, teachers of students with disabilities - birth to grade two, teachers of the blind and partially sighted, teachers of the blind and visually handicapped, teachers of the blind and visually impaired, and teachers of the deaf and hard of hearing, acting within the scope of practice of their professions.

11. Speech-Language Pathology Services

Definition: Speech-language pathology services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.

Services: Speech-language pathology services are provided in accordance with 42 CFR section 440.110(c). Speech-language pathology services are provided to an individual child and instruction provided to the child’s parent or caregiver, either individually or in a group, when such contacts directly benefit the needs of the child as described in his or her treatment plan, the IFSP, and pursuant to a written order or prescription from a speech-language pathologist, physician, physician assistant or nurse practitioner acting within his or her scope of practice under New York State law.

These services include the identification of children with communicative or oropharyngeal disorders and delays in development of communication skills, including the diagnosis and appraisal of specific disorders and delays in those skills; referral for medical or other professional
services necessary for the habilitation or rehabilitation of children with communicative or oropharyngeal disorders and delays in development of communication skills; and provision of services for the habilitation, rehabilitation, or prevention of communicative or oropharyngeal disorders and delays in development of communication skills.

**Providers:** Services must be provided by:
- A licensed and registered speech-language pathologist qualified in accordance with 42 CFR Section 440.110(c) and applicable state and federal laws and regulations, acting within his or her scope of practice under New York State law; or
- A teacher certified to provide speech and language services, under the documented direction of such a qualified licensed and registered speech-language pathologist (ASHA certified or equivalent), acting within his or her scope of practice under New York State law.

“Under the Direction of” means that, with respect to each Medicaid beneficiary, the qualified therapist:
- Sees the participant at the beginning of and periodically during the course of treatment;
- Is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State Law;
- Has continued involvement in the care provided, and reviews the need for continued services throughout treatment;
- Assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
- Spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards;
- Ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment; and
- Keeps documentation supporting the supervision of services and ongoing involvement in the treatment.

**12. Medical Equipment and Appliances**

**Definition:** Medical equipment and appliances outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary.

Medical equipment and appliances are provided in accordance with 42 CFR section 440.70(b), and include medical supplies, equipment and appliances suitable for use in any setting in which normal life activities take place, other than a hospital, nursing facility, or intermediate care facility for individuals with intellectual disabilities, or any setting in which payment is or could be made under Medicaid for inpatient services that include room and board. Under the EPSDT EI benefit, such equipment is used to increase, maintain, or improve the functional capabilities of the child.
Services: Assistive technology services are provided in accordance with 42 CFR section 440.70(b) and 42 CFR section 441.57. Assistive technology services are services provided to an individual child and include instruction to the child’s parent or caregiver when such contacts directly benefit the needs of the child as described in his or her treatment plan, the IFSP. Assistive technology services are services that directly assist a child with a disability in the selection, acquisition, or use of an assistive technology device. Assistive technology services include: the evaluation of the needs of a child with a disability, including a functional evaluation of the child in the customary environment; purchasing, leasing, or otherwise providing for the acquisition of assistive technology devices by children with disabilities; selecting, designing, fitting, customizing, adapting, applying, maintaining, repairing, or replacing assistive technology devices; coordinating and using other therapies, interventions, or services with assistive technology devices, such as those associated with existing education and rehabilitation plans; training or technical assistance for a child with disabilities or, if appropriate, that family; and, training or technical assistance for professionals (including individuals providing early intervention services) or other individuals who provide services to, or are otherwise substantially involved in, the major life functions of individuals with disabilities.

Providers: Assistive technology services are provided by medical equipment and supply dealers, clinics, hospitals, pharmacies, residential health facilities, and certified home health agencies enrolled in the medical assistance program as a medical equipment dealer. Assistive technology services may also be provided by state-licensed licensed audiologists, speech-language pathologists, physical therapists and assistants, occupational therapists and assistants, orientation and mobility specialists, physicians, practical nurses, registered nurses, and nurse practitioners and other individuals with licensure, certification, or registration in a professional medical, health-related, and/or developmental discipline, within the scope of their professions and to the extent authorized by their licenses.

13. Vision Services

Definition: Vision services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary. Vision services are provided in accordance with 42 CFR section 440.130(c).

Services: Vision services are provided to an individual child and include instruction provided to the child’s parent or caregiver, and services provided to children and/or family members in a group when such contacts directly benefit the needs of the child as described in his or her treatment plan, the IFSP, pursuant to a written order or prescription from a physician, physician assistant or nurse practitioner acting within his or her scope of practice under New York State law.

Vision services include evaluation and assessment of visual functioning, including the diagnosis and appraisal of specific visual disorders, delays, and abilities; professional services necessary for the treatment of visual functioning disorders; communication skills training, orientation and
mobility training for all environments, visual training, independent living skills training, and additional training necessary to activate visual motor abilities.

**Providers:** Vision services are provided by certified low vision specialists, orientation and mobility specialists and vision rehabilitation therapists certified by the Academy for the Certification for Vision Rehabilitation and Education Professionals, state licensed physicians including ophthalmologists; and licensed optometrists, and orientation and mobility specialists, within the scope of their profession and to the extent authorized by their license or certification.

14. **Applied Behavioral Analysis (ABA) Services**

**Definition:** ABA services outlined in this section of the State Plan are available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary. ABA services outlined in this section of the state plan are provided in accordance with 42 CFR 440.60(a).

**Providers:** ABA services must be provided by a qualified practitioner, within his or her scope of practice in accordance with New York State law. ABA services are provided by:

- A licensed and registered behavior analyst qualified in accordance with applicable state and federal laws and regulations, acting within his or her scope of practice under New York State law, Education Law Article 167; or
- A certified behavior analyst assistant, under the documented direction of such a qualified licensed and registered behavior analyst, acting within his or her scope of practice under New York State law, Education Law Article 167.

“Under the Direction of” means that, with respect to each Medicaid beneficiary, the qualified therapist:

- Sees the participant at the beginning of and periodically during the course of treatment;
- Is familiar with the treatment plan as recommended by the referring physician or other licensed practitioner of the healing arts practicing under State Law;
- Has continued involvement in the care provided, and reviews the need for continued services throughout treatment;
- Assumes professional responsibility for the services provided under his or her direction and monitors the need for continued services;
- Spends as much time as necessary directly supervising services to ensure beneficiaries are receiving services in a safe and efficient manner in accordance with accepted standards;
- Ensures that individuals working under his or her direction have contact information to permit him or her direct contact with the supervising therapist as necessary during the course of treatment; and
- Keeps documentation supporting the supervision of services and ongoing involvement in the treatment.
15. **Transportation Services**

**Definition:** Transportation outlined in this section of the State Plan is available to Medicaid eligible beneficiaries who are eligible for Early and Periodic Screening Diagnostic and Treatment (EPSDT) services and for whom services are medically necessary. Transportation for family members who are not Medicaid eligible is not considered non-emergency medical transportation but may be part of the cost of the service.

**Services:** Transportation delivered by the State’s designated transportation provider pursuant to prior authorization by a municipal Early Intervention Official or Early Intervention Official Designee in the State or the City of New York must be included in the IFSP as recommended by the IFSP Team. Transportation arrangements must be identified in the IFSP.

Transportation is limited to those situations where the child and an accompanying parent or guardian receive transportation to obtain a Medicaid covered early intervention service other than transportation and both the Medicaid covered service and the need for transportation are included in the child’s IFSP. Transportation can only be billed on a day that a Medicaid reimbursable service was delivered and may only be billed at the rate for each one-way trip.

**Providers:** Transportation services must be provided by a qualified, Medicaid-enrolled provider. Each one-way trip must be documented in accordance with Medicaid record keeping requirements in order to bill Medicaid. To receive payment for services provided to a Medicaid recipient, a vendor must be an enrolled Medicaid transportation provider authorized to provide transportation services on the date the services are rendered.
6b. Prior approval is required for orthoptic training.

6c. Chiropractor services. Provision of chiropractic services shall be limited to EPSDT recipients by medical necessity. Services shall be provided to the extent that such services result from the referral of the recipient’s physician or primary care clinic.

6d. Clinical psychologists. Provision of clinical psychology services shall require referral by:
1. The patient’s personal physician or medical resource, such as a clinic, acting as the patient’s physician;
2. the medical director in an industrial concern;
3. an appropriate school official;
4. an official or voluntary health or social agency.
6d. **Other Practitioner Services** (Continued)

**Pharmacists as Immunizers**
1. Reimbursement will be provided to pharmacies for vaccines and anaphylaxis agents administered by certified pharmacists within the scope of their practice.

2. **Service setting**
   Services will be provided by a certified pharmacist in a pharmacy or in other locations where mass immunization may take place, such as retail stores/outlets, assisted living centers, and health fairs.

3. **Provider qualifications**
   Pharmacists must be currently licensed, registered and certified by the NYS Department of Education Board of Pharmacy to administer immunizations.

**Diabetes Self-Management Training by Pharmacists**
1. Reimbursement will be provided to pharmacies for Diabetes Self-Management Training (DSMT) when provided by licensed pharmacists within the scope of their practice.

2. **Service setting**: Services will be provided by a licensed pharmacist in a pharmacy that is accredited by a CMS approved national accreditation organization (NAO), such as the American Diabetes Association (ADA), the American Association of Diabetes Educators (AADE), or Indian Health Services (IHS).

3. **Provider qualifications**: Pharmacists must be currently licensed and registered by the NYS Department of Education Board of Pharmacy. Pharmacies must be accredited by a CMS approved national accreditation organization.

4. **Coverage parameters**: A beneficiary with newly diagnosed diabetes or a beneficiary with diabetes who has a medically complex condition will be allowed up to 10 hours of Diabetes Self-Management Training (DSMT) during a continuous 6-month period. A beneficiary with diabetes who is medically stable may receive up to 1 hour of DSMT in a continuous 6-month period.

---

**TN#: #11-73**  **Approval Date: December 16, 2011**

**Supersedes TN#: #09-63**  **Effective Date: July 1, 2011**
New York
2(xv)

6d. Nurse Practitioners' Services

New York State covers all nurse practitioner specialties recognized under State Law with no limitations.

April 8, 2010
Approval Date
November 15, 2009
Effective Date
6.d(i). **Other Licensed Practitioners (EPSDT only).** A non-physician licensed behavioral health practitioner (NP-LBHP) who is licensed in the State of New York operating within the scope of practice defined in State law and in any setting permissible under State practice law.

NP-LBHPs include individuals licensed and able to practice independently as a:
- Licensed Psychoanalyst
- Licensed Clinical Social Worker (LCSW)
- Licensed Marriage & Family Therapist; or
- Licensed Mental Health Counselor

An NP-LBHP also includes the following individuals who are licensed to practice under supervision or direction of a Licensed Clinical Social Worker (LCSW), a Licensed Psychologist, or a Psychiatrist:
- Licensed Master Social Worker (LMSW)

In addition to licensure, service providers that offer addiction services must demonstrate competency as defined by state law and regulations. Any practitioner above must operate within a child serving agency that is licensed, certified, designated and/or approved by OCFS, OMH, OASAS or DOH or its designee, in settings permissible by that designation.

Inpatient hospital visits by these licensed practitioners are limited to those ordered by the child's physician. Visits to nursing facilities are allowed for licensed professionals other than social workers if a Preadmission Screening and Resident Review (PASRR) indicates it is medically necessary treatment. Social worker visits are included in the Nursing Facility Visit and may not be billed separately. Visits to ICF-IDD facilities are non-covered. All NP-LBHP services provided while a person is a resident of an (Institution for Mental Diseases) (IMD), such as a free standing psychiatric hospital or psychiatric residential treatment facility, are part of the institutional service and not otherwise reimbursable by Medicaid.

Non-physician licensed behavioral health practitioners (NP-LBHPs) will assess the child prior to developing a treatment plan for the child. Authorization of the treatment plan is required by the DOH or its designee. Evidence-based practices (EBPs) require approval, designations, and fidelity reviews on an ongoing basis as determined necessary by New York State. Treatment services must be part of a treatment plan including goals and activities necessary to correct or ameliorate conditions discovered during the initial assessment visits.

**Assurances:**
The State assures that all NP-LBHP services are provided to, or directed exclusively toward the treatment of, the Medicaid eligible individual in accordance with section 1902(a)(10)(A)(i) of the Act.

The State assures that NP-LBHP services do not include and FFP is not available for any of the following:
- educational, vocational and job training services;
- room and board;
- habilitation services;
- services to inmates in public institutions as defined in 42 CFR § 435.1010;
- services to individuals residing in institutions for mental diseases as describe in 42 CFR § 435.1009;
- recreational and social activities; and
- services that must be covered elsewhere in the state Medicaid plan.
6.d(i). Other Licensed Practitioners (EPSDT only).

**Applied Behavior Analysis**
In accordance with 42 CFR 440.60(a), the following licensed providers are covered within their scope of practice as defined by state law: Licensed Behavior Analyst (LBA). Effective on or after October 1, 2019, Medical assistance shall include applied behavior analysis where such service is provided by a Licensed Behavior Analyst (LBA) or under the supervision of an LBA.
[6b. **Prior approval is required for orthoptic training.**

6c. **Chiropractor services.**

Provision of chiropractic services shall be limited to EPSDT recipients by medical necessity. Services shall be provided to the extent that such services result from the referral of the recipient's physician or primary care clinic.

6d. **Clinical psychologists.**

Provision of clinical psychology services shall require referral by:

1. the patient's personal physician or medical resource, such as a clinic, acting as the patient's physician;
2. the medical director in an industrial concern;
3. an appropriate school official;
4. an official or voluntary health or social agency.

7a. Home care services are medically necessary services (physician order required) provided by a Certified Home Health Agency (CHHA) to individuals, regardless of residence, in the home and community. Such services include both part time and intermittent skilled health care and long-term nursing and home health aide services. Home (health) care services include nursing, home health aide, physical therapy, occupational therapy, and speech therapy. [Patients must be assessed as being appropriate for intermittent or part-time nursing services ordered by a physician pursuant to a written plan of care provided by a home health agency upon admission to an Assisted Living Program (ALP), no later than 45 days from the date of admission, and at least once during each subsequent six month period. The social services district must review the assessment and prior authorize the service].

Providers of home (health) care services must possess a valid certificate of approval issued pursuant to the provisions of Article 36 or the Public Health Law, be certified in accordance with certified home health agency, long term home health care program and AIDS home care program certification and authorization and provide services in accordance with minimum standards.

Home (health) care services provider qualifications are provided for registered professional nurse, home health aide, physical therapist, occupational therapist and speech pathologist.

Registered professional nurse shall mean a person who is licensed and currently registered as a registered professional nurse pursuant to Article 139 of the New York State Education Law.

The State assures the provision of Home Health services will be provided in accordance with 42 CFR 440.70.
Home Health aide will mean a person who carries out health care tasks under the supervision of a registered nurse or licensed therapist and who may also provide assistance with personal hygiene, housekeeping and other related supportive tasks to a patient with health care needs in his/her home. Home health aides will have successfully completed a basic training program in home health aide services or an equivalent exam approved by the Department and possess written evidence of such completion.

Certified home health agencies (CHHA) may provide home health services pursuant to the requirements of 42 CFR 440.70(b)(2). Home health services may be provided to income and/or medically eligible participants in home and community based settings, which could be the individual's home.
New York
2(a)(ii)

AIDS home health care services providers qualifications are provided pursuant to Article 36 of the PHL.

The [S]tate assures the provision of AIDS home care services will be provided in accordance with 42 CFR 440.70 (for the provision of home health services).
Home Telehealth Services

Beginning on October 1, 2007, the Commissioner of Health is authorized to establish fees to reimburse the cost of home telehealth services provided by a certified home health agency, including those that provide AIDS home care services.

The Commissioner shall reimburse for telehealth services if such services are provided only in connection with federal Food and Drug Administration approved and interoperable devices, which are incorporated as part of the patient's plan of care.

The purpose of providing telehealth services shall be to assist in the effective monitoring and management of patients whose medical, functional, and/or environmental needs can be appropriately and cost-effectively met at home through the application of telehealth intervention.

Reimbursement for home telehealth services is to be provided for Medicaid patients with conditions or clinical circumstances associated with the need for frequent monitoring, and/or the need for frequent physician, skilled nursing or acute care services, and where the provision of telehealth services can appropriately reduce the need for on-site or in-office visits or acute long term care facility admissions. Conditions or clinical circumstances shall include, but not limited to, congestive heart failure, diabetes, chronic pulmonary obstructive disease, wound care, polypharmacy, mental or behavioral problems limiting self-management, and technology-dependent care such as continuous oxygen, ventilator care, total parenteral nutrition or enteral feeding.
Telehealth Services - Remote Patient Monitoring

Effective on or after [June 1, 2016] April 1, 2018, the Commissioner of Health is authorized to establish fees to reimburse the cost of telehealth services provided by remote patient monitoring.

The purpose of providing telehealth remote patient monitoring services is to assist in the effective monitoring and management of patients whose medical needs can be appropriately and cost-effectively met at home through the application of telehealth intervention.

Telehealth remote patient monitoring services use synchronous or asynchronous electronic information and communication technologies to collect personal health information and medical data from a patient at an “originating site”; this information is then transmitted to a provider at a “distant site” for use in treatment and management of unstable/uncontrolled medical conditions that require frequent monitoring. Such conditions include, but are not limited to, congestive heart failure, diabetes, chronic obstructive pulmonary disease, wound care, polypharmacy, mental or behavioral problems and technology-dependent care such as continuous oxygen, ventilator care, total parenteral nutrition or enteral feeding. Telehealth remote patient monitoring services [may be provided] will be ordered by a [facility licensed under Article 28 of Public Health Law or by a] physician, nurse practitioner, or a midwife [, or physician assistant who has examined the patient and] with whom the patient has an established, substantial and ongoing relationship. [Payment for remote patient monitoring while receiving home health services through a Certified Home Health Agency (CHHA) is pursuant to public health law 3614 section (3-c) (a-d).] Telehealth remote patient monitoring services are based on medical necessity and should be discontinued when the patient’s condition is determined to be stable/controlled.

[The Commissioner will reimburse for telehealth remote patient monitoring services if such services are provided with federal Food and Drug Administration approved interoperable devices, which are incorporated as part of a patient’s plan of care.]

All services delivered via telehealth remote patient monitoring must be performed on dedicated secure transmission linkages that meet the minimum federal and state requirements, including but not limited to 45 CFR, Parts 160 and 164 (HIPAA Security Rules). All existing confidentiality requirements that apply to written medical records will apply to services delivered by remote patient monitoring, including the actual transmission of health care data and any other electronic information/records.
Telehealth Services - Store and Forward

Effective on or after [June 1, 2016] **April 1, 2018**, the Commissioner of Health is authorized to establish fees to reimburse the cost of telehealth store and forward technology.

Telehealth store and forward technology is the asynchronous, secure electronic transmission of a patient’s health information in the form of patient-specific digital images and/or pre-recorded videos from a [qualified physician, nurse practitioner, midwife, or physician assistant] provider at an originating site to a consulting [physician] provider at a distant site.

[Telehealth store and forward technology may be utilized in the specialty areas of dermatology, ophthalmology and other disciplines, as determined by the Commissioner.]

Reimbursement for telehealth store and forward services is to be provided for Medicaid patients with conditions or clinical circumstances where the provision of telehealth services can appropriately reduce the need for on-site or in-office visits.

[The Commissioner shall reimburse for services, specifically telehealth store and forward technology, if such services are provided with federal Food and Drug Administration approved interoperable devices, which are incorporated as part of a patient’s plan of care.]

All services delivered via telehealth store and forward technology must be performed on dedicated secure transmission linkages that meet the minimum federal and state requirements, including but not limited to 45 CFR, Parts 160 and 164 (HIPAA Security Rules). All existing confidentiality requirements that apply to written medical records will apply to services delivered by store and forward technology, including the actual transmission of health care data and any other electronic information/records.
7c. Certain specialty items require prior approval. These items are identified for equipment dealers in the MMIS DME Provider Manual. Prior approval is required for most repairs to durable medical equipment. Personal Emergency Response Services (PERS) are provided according to [LDSS] Local Social Services District (LSSD) written authorization for recipients of personal care services and home health services ordered by a physician pursuant to a written plan of care.

7d. Physical therapist shall mean a person who is licensed by and currently registered with the New York State Education Department or who has been issued a valid limited permit by that Department. The state assures the provision of physical therapy services will be provided in accordance with 42 CFR 440.110 (a)(2)(i) and 440.110(a)(2)(ii).

Occupational therapist shall mean a person who is registered with the American Occupational Therapy Association, or either a graduate of a program in occupational therapy approved by the Council on Medical Education of the American Medical Association in collaboration with the American Occupational Therapy Association or a graduate of a curriculum in occupational therapy which is recognized by the World Federation of Occupational Therapists and is eligible for a registration with the American Occupational Therapy Association. The state assures the provision of occupational therapy services will be provided in accordance with 42 CFR 440.110 (b)(2)(i) and 440.110 (b)(2)(ii).

Speech pathologist shall mean a person who is licensed as required by Article 159 of the New York State Education Law. The state assures the provision of speech therapy services will be provided in accordance with 42 CFR 440.110 (c)(2).

8. Private Duty Nursing (PDN) is medically necessary nursing services, ordered by and in accordance with a written physician’s treatment plan, provided in a person’s home on a continuous basis normally considered beyond such nursing services available from a Certified Home Health Agency (CHHA) or intermittent nursing services normally provided through a CHHA but which are unavailable. Prior approval is required for private duty nursing services either in a person’s home or in a hospital except in an urgent situation in which the attending physician may order the services for no more than two nursing days.

Care and services of a private duty nurse will be provided only if they are in accordance with the regulations of the Department of Health.
New York
2(a)(iv)

Service providers who provide private duty nursing include a Licensed Home Care Services Agency’s (LHCSA) registered nurses (RN) or licensed practical nurses (LPN) enrolled on an independent practitioner basis.

Nurses providing PDN must possess a license to practice in the State of New York and be currently registered by the New York State Education Department (NYSED). In addition, nurses providing an appropriate attestation regarding their training and ability to care for medically fragile children may receive a Specialty code on their file entitling them to increased reimbursement for the provision of such care.

The [S]tate assures that the provision of PDN will be provided in accordance with 42 CFR 440.80.

9. Clinic services provided in Article 28 clinics are in accordance with 42 CFR §440.90 titled clinic services. Requirements for physicians supervision comply with the [S]tate Medicaid Manual, §4320B titled Physician Direction Requirement.
Effectively January 1, 2015, Freestanding Clinics licensed pursuant to Article 28 of the Public Health Law will provide Collaborative Care Services for purposes of providing integrated physical and mental health care to patients diagnosed with mental illness. Freestanding Clinics must obtain prior approval from the New York State Department of Health and the New York State Office of Mental Health to furnish Collaborative Care Services. Collaborative Care Services include screening, diagnostic, preventative and therapeutic services to treat the symptoms of mental illness.

Collaborative Care Services include a minimum of one clinical contact between the Collaborative Care Manager and the patient per month, and the completion of the screening tool for the patient’s specific mental illness diagnosis specified by the New York State Office of Mental Health. The clinical contact with the Collaborative Care Manager may be by phone or in person. Collaborative Care Services also include a minimum of at least one face-to-face contact between a licensed provider and the patient once every three months.

A patient is limited to 12 months of Collaborative Care Services, which are not required to be consecutive. With the prior approval of the New York State Office of Mental Health, a patient may receive an additional 12 months of Collaborative Care Services, which are not required to be consecutive.
9a. Clinic Services provided in Article 31 clinics licensed by the New York State Office of Mental Health (OMH) are in accordance with 42 CFR § 440.90 title clinic services. Such services include Clinic Treatment Services, Partial Hospitalization, Continuing Day Treatment, and Day Treatment Services for Children. Any limitations on the amount, duration or scope of these services may be exceeded based on medical necessity for Medicaid beneficiaries under the age of 21.

OMH-licensed clinic services are provided under the direction of a physician in accordance with 42 CFR § 440.90 and comply with § 4320B of the State Medicaid Manual. A physician must see the patient at least once, approve the patient's treatment plan, and periodically review the need for continued care. The physician assumes professional responsibility for the services provided and assures that the services are medically appropriate and provided in a safe and efficient manner in accordance with accepted medical standards. The physician may be either an employee of the OMH-licensed clinic service provider or affiliated with the provider. OMH-licensed clinic service providers choosing to utilize affiliated physicians must enter into a contractual agreement or some other type of formal arrangement obligating the physician to supervise the care provided to the OMH-licensed clinic service provider's patients.

1. **Clinic Treatment Services**

Clinic Treatment Services are preventive, diagnostic, therapeutic, and rehabilitative mental health services. Clinic Treatment Services are provided based upon the clinical assessment of an individual's mental, physical and behavioral condition and history, which is the basis for establishing the individual’s diagnosis. Medically necessary Clinic Treatment Services are documented in a treatment plan which is signed by a physician and reviewed on a periodic basis. Medically necessary Clinic Treatment Services include: Initial Assessment; Psychiatric Assessment; Psychotherapy; Psychotropic Medication Treatment; Injectable Psychotropic Administration and Monitoring; Crisis Intervention; Complex Care Management; Developmental Testing, Psychological Testing; Psychiatric Consultation; Health Physical; Health Monitoring; Smoking Cessation Treatment; and Screening, Brief Intervention, and Referral to Treatment.

2. **Partial Hospitalization Services**

Partial Hospitalization Services are preventive, diagnostic, therapeutic, and rehabilitative intensive mental health services which are designed to stabilize and ameliorate acute symptoms and serve as an alternative to inpatient hospitalization or to reduce the length of a hospital stay within a medically supervised program. Partial Hospitalization Services are provided based upon the clinical assessment of an individual’s mental, physical and behavioral condition and history, which is the basis for establishing the individual’s diagnosis, functional deficits, and recovery goals. Medically necessary Partial Hospitalization Services are documented in a treatment plan which is signed by a physician and reviewed on a periodic basis. Medically necessary Partial Hospitalization Services include: Health Screening and Referral; Preadmission
Screening; Symptom Management; Medication Therapy; Medication Skill-Building; Verbal Therapy; Rehabilitation Readiness Assessment and Development; Crisis Intervention Services; Functional Skill Development; Clinical Support Services; and Discharge Planning Services.

Partial Hospitalization services are provided in preadmission visits for individuals prior to formal enrollment. Preadmission visits are limited to a maximum of three visits which must occur over a period of time not to exceed the remaining days of the month in which the first preadmission visit occurred and the next full calendar month.

Clinical Support Services may also be provided to collaterals, who are members of the individual’s family or household, or others who regularly interact with the individual and are directly affected by or can affect the individual’s condition and are identified in the treatment plan as having a role in the individual’s treatment. Clinical support services that are provided to collaterals are for the direct benefit of the Medicaid beneficiary. Collateral and group collateral visits are limited to two hours per day.

Other limitations on amount and duration of Partial Hospitalization Services include:

i. Reimbursement is limited to no more than 180 hours per course of treatment. A course of treatment shall not exceed six calendar weeks, unless during the course of treatment the recipient is admitted to an inpatient psychiatric facility. Such course of treatment may be extended to include the number of days of inpatient treatment, up to a maximum of 30 days. Partial Hospitalization Services provided during crisis, collateral or group collateral visits do not count towards the 180 hour maximum.

ii. Reimbursement is limited to 360 hours per calendar year. Services provided during crisis, collateral or group collateral visits do not count towards the 360 hour maximum.

iii. Reimbursement is limited to one visit, including preadmission visits (of up to 7 hours) and one individual or group collateral visit (of up to 2 hours) per individual per day. Additional Partial Hospitalization Services may be provided on the same day during a crisis visit.

3. Continuing Day Treatment Services

Continuing Day Treatment Services are mental health preventive, diagnostic, therapeutic, and rehabilitative services. Continuing Day Treatment Services are provided based upon the clinical assessment of an individual’s mental, physical and behavioral condition and history, which is the basis for establishing the individual’s diagnosis, functional deficits, and recovery goals. Medically necessary Continuing Day Treatment Services are documented in a treatment plan which is signed by a physician and reviewed on a periodic basis. Medically necessary Continuing Day
Treatment Services include: Health Screening and Referral; Preadmission Screening; Symptom Management; Medication Therapy; Medication Skill-Building; Verbal therapy; Rehabilitation Readiness Assessment and Development; Crisis Intervention Services; Functional Skill Development; Clinical Support services; and, Discharge Planning Services.

Continuing Day Treatment Preadmission Screening services are provided in preadmission visits for individuals prior to formal enrollment. Preadmission visits are limited to a maximum of three visits which must occur over a period of time not to exceed the remaining days of the month in which the first preadmission visit occurred and the next full calendar month.

Clinical Support Services may be provided to collaterals, who are members of the individual’s family or household, or others who regularly interact with the individual and are directly affected by or can affect the individual’s condition and are identified in the treatment plan as having a role in the individual’s treatment. Clinical support services that are provided to collaterals are for the direct benefit of the Medicaid beneficiary.

Other limitations on amount and duration of Continuing Day Treatment Services include:

i. Reimbursement is limited to one visit, including preadmission visits and one individual or group collateral visit per recipient per day. Additional Continuing Day Treatment Services may be provided on the same day during a crisis visit.

ii. Continuing Day Treatment services are not reimbursable if an individual is concurrently receiving Clinic Treatment Services, except where either:
   a. an individual is in transition from Clinic Treatment Services to Continuing Day Treatment Services, in which case reimbursement is permitted for a maximum of three Continuing Day Treatment preadmission visits; or
   b. an individual is enrolled in Clinic Treatment Services solely for the purpose of Clozapine Medication Therapy.

4. Day Treatment Services for Children

Day Treatment Services for Children are preventive, diagnostic, therapeutic, and rehabilitative mental health services designed to stabilize children’s adjustment to educational settings, prepare children for return to educational settings, and transition children to educational settings. Medicaid reimbursement is not available for educational activities, which are the sole responsibility of the school district of the child’s residence. Day Treatment Services for Children may be provided in free-standing clinics located within schools. Medically necessary Day Treatment Services for Children include: Medication Therapy; Verbal Therapy; Crisis

TN #10-0018 Approval Date November 1, 2017
Supersedes TN NEW Effective Date July 1, 2010
Intervention Services; Clinical Support Services; Task and Skill Development; Social Skill Development; Recreational Rehabilitation Services; and Discharge Planning Services.

Day Treatment Services for Children are provided in preadmission visits for children prior to formal enrollment. Preadmission visits are limited to a maximum of three visits which must occur over a period of time not to exceed the remaining days of the month in which the first preadmission visit occurred and the next full calendar month.

Clinical Support Services may also be provided to collaterals, who are members of the child’s family or household, or others who regularly interact with the child and are directly affected by or can affect the child's condition and are identified in the treatment plan as having a role in the child's treatment. Clinical support services that are provided to collaterals are for the direct benefit of the Medicaid beneficiary.

Other limitations on amount and duration of Day Treatment Services for Children include:

i. Reimbursement is limited to one visit, including preadmission visits and one collateral visit per child per day. Additional Day Treatment Services for Children may be provided on the same day during a crisis visit.

ii. Day Treatment Services for Children are not reimbursable if a child is concurrently receiving Clinic Treatment Services, except where either:
   a. a child is in transition from Clinic Treatment Services to Day Treatment Services for Children, in which case reimbursement is permitted for a maximum of three Day Treatment Services for Children preadmission visits; or
   b. a child is enrolled in Clinic Treatment Services solely for the purpose of Clozapine Medication Therapy.
Prior authorization or dispensing validation is required for some prescription drugs. The State has established a preferred drug program with prior authorization for drugs not included on the preferred drug list. The prior authorization complies with the requirements of Section 1927(d)(5) of the Social Security Act and provides for a 24-hour turnaround by either telephone or other telecommunications device from receipt of request and provides for a 72-hour supply of drugs in emergency circumstances. In addition, brand-name drugs that have a FDA approved, A-rated generic equivalent must be prior authorized unless exempted by the Commissioner of Health. Prior authorization is required for a generic equivalent of a brand name drug, including a generic equivalent that is on the preferred drug list or the clinical drug review program, when the net cost of the brand name drug, after consideration of all rebates, is less than the cost of the generic equivalent.

Drugs for which Medical Assistance reimbursement is available are limited to the following:

1. Outpatient drugs of any manufacturer which has entered into and complies with a rebate agreement under Sections 1902(a)(54) and 1927(a) of the Act with the Centers for Medicare and Medicaid Services (CMS) which are prescribed for a medically accepted indication. All drugs covered by the National Drug Rebate Agreements remain available to Medicaid beneficiaries, although some may require prior authorization. Drugs for the treatment of erectile dysfunction, as set forth in 42 U.S.C. §1396r-8(d)(2)(K), are not a covered service, on and after April 1, 2006, unless such drugs are used to treat conditions other than sexual or erectile dysfunction and these uses have been approved by the Food and Drug Administration.

2. Supplemental Rebate Programs

The State is in compliance with Section 1927 of the Social Security Act. The State has the following policies for the Supplemental Rebate Programs for the Medicaid population.

a) CMS has authorized the State of New York to enter into the National Medicaid Pooling Initiative (NMPI) for drugs provided to Medicaid beneficiaries. The NMPI Supplemental Rebate Agreement (SRA) and the Amendment to the SRA submitted to CMS on March 30, 2006 have been authorized for pharmaceutical manufacturers’ existing agreements through their current expiration dates. The updated NMPI SRA submitted to CMS on June 30, 2013 has been authorized for renewal and new agreements with pharmaceutical manufacturers for drugs provided to Medicaid beneficiaries.

b) CMS has authorized the State of New York to enter into Medicaid State-specific Supplemental Rebate Agreement directly with manufacturers to receive supplemental rebates of covered outpatient drugs for Medicaid beneficiaries. The State-specific Supplemental Rebate Agreement was submitted to CMS on [March 31, 2010] December 31, 2014 and has been authorized by CMS.
c) The prior authorization process complies with the requirements of Section 1927 of the Social Security Act and provides for a 24-hour turn-around response by either telephone or telecommunications device from the receipt of a prior authorization request. In emergency situations, providers may dispense a 72-hour supply of medications.

d) The terms of the supplemental rebate programs apply only to covered outpatient drugs for which the State is eligible for federal financial participation. Supplemental rebates received by the State in excess of those required under the National Drug Rebate Program will be shared with the Federal Government on the same percentage basis as applied under the National Drug Rebate Agreement.

e) Any Supplemental Rebate Agreement not authorized by CMS will be submitted to CMS for authorization.

f) All drugs covered by the programs will comply with the provisions of the national drug rebate agreement.

3. Any changes to the NMPI Supplemental Rebate Agreement must be submitted to CMS for authorization. Any changes to the State-specific Supplemental Rebate Agreement NY State holds directly with the manufacturer must be submitted to CMS for authorization.

4. As provided by the Act, a new drug manufactured by a company which has entered into a rebate agreement may be covered subject to prior approval, unless the drug is subject to the allowable exclusion categories provided by the Act.

5. As specified in Section 1927(b)(3)(D) of the Act, notwithstanding any other provisions of law, rebate information disclosed by a manufacturer shall not be disclosed by the state for purposes other than rebate invoicing and verification.
6. Effective January 1, 2006, the Medicaid agency will not cover any Part D drug for full-benefit dual eligible individuals who are entitled to receive Medicare benefits under Part A or Part B.

7. The Medicaid agency provides coverage for the following excluded or otherwise restricted drugs or classes of drugs or their medical uses to all Medicaid recipients, including full benefit dual eligible beneficiaries under the Medicare Prescription Drug Benefit—Part D.

☒ The following excluded drugs are covered:

☐ (a) agents when used for anorexia, weight loss, weight gain
☒ (b) agents when used to promote fertility: Some – bromocriptine, clomiphene citrate, letrozole, and tamoxifen only.
☒ (c) agents when used for the symptomatic relief cough and colds: Some - benzonatate only
☒ (d) prescription vitamins and mineral products, except prenatal vitamins and fluoride: Some - select B Vitamins (niacin, pyridoxine, thiamine, cyanocobalamin); Folic Acid; Vitamin K; Vitamin D (ergocalciferol, cholecalciferol); Iron (including polysaccharide iron complex); Iodine
☒ (e) nonprescription drugs: Some - select allergy, asthma and sinus products; analgesics; cough and cold preparations; digestive products; insulin; feminine products; topical products, minerals and vitamin combinations
☐ (f) covered outpatient drugs which the manufacturer seeks to require as a condition of sale that associated tests or monitoring services be purchased exclusively from the manufacturer or its designee

8. The State will cover APIs that are included in extemporaneously compounded prescriptions when the API serves as the active drug component in the compounded formulation. A current list of covered APIs can be found at the following at:

https://www.emedny.org/info/formfile.aspx

13c. Preventive Services

New York State Medicaid covers and reimburses all United States Preventive Services Task Force (USPSTF) grade A and B preventive services and approved vaccines recommended by the Advisory Committee on Immunization Practices (ACIP), and their administration, without cost-sharing, when provided in a practitioner’s office.

Preventive Services specified in section 4106 of the Affordable Care Act are all available under the State Plan and are covered under the physician, other practitioner, nurse-midwife and nurse practitioner service benefits and are reimbursed according to the methodologies provided in Attachment 4.19-B.

The State will maintain documentation supporting expenditures claimed for these Preventive Services and ensure that coverage and billing codes comply with any changes made to the USPSTF or ACIP recommendations.
**Other Licensed Practitioners.** A non-physician licensed behavioral health practitioner (NP-LBHP) who is licensed in the State of New York, operating within the scope of practice defined in State law and in any setting permissible under State practice law.

NP-LBHPs include individuals licensed and able to practice independently as a:
- Licensed Clinical Social Worker (LCSW)

NP-LBHPs also includes the following individuals who practice psychotherapy services:
- *Licensed Master Social Worker (LMSW)*;
- *Applied Behavioral Sciences Specialist (ABSS)* - An Applied Behavioral Sciences Specialist (ABSS) with a Master’s degree in a clinical and/or treatment field of psychology from an accredited institution and/or a NYS license in Mental Health Counseling, who has training in assessment techniques and behavioral program development.
- **Supervision requirement:** Services delivered by an ABSS must be performed under the supervision of a NYS Licensed Psychologist in accordance with the supervisory functions described in the scope of practice in state law. Services delivered by an ABSS will be billed under the NPI of the supervising Licensed Psychologist who is ultimately responsible for services rendered. Services delivered by an LMSW must be performed under the supervision of a NYS Licensed Psychologist or LCSW in accordance with the supervisory functions described in the scope of practice in state law. Services delivered by an LMSW will be billed under the NPI of the supervising Licensed Psychologist or LCSW (whichever is applicable), who is ultimately responsible for services rendered.

**Limitations:** Services cannot duplicate services available through other State Plan options and must be prior authorized. An annual prior authorization for a maximum of 50 visits for psychotherapy service will be granted based upon attestation of medical necessity by a qualified billing provider. Further visits beyond the initial 50 visits can be prior authorized upon the State’s review and approval of documentation supporting medical necessity.
13c. Preventive Services

National Diabetes Prevention Program (NDPP)

For dates of service on or after July 1, 2019, Medicaid will begin covering diabetes prevention services as outlined in the Centers for Disease Control and Prevention (CDC)-recognized National Diabetes Prevention Program (NDPP). The NDPP is an evidence-based, educational and support program designed to assist at-risk individuals from developing Type 2 diabetes. Diabetes services are provided as preventive services pursuant to 42 C.F.R. Section 440.130(c) and must be recommended by a physician or other licensed practitioner of the healing arts within his or her scope of practice under state law to prevent diabetes, prolong life, and promote the physical and mental health of the beneficiary.

The CDC grants NDPP recognition only to organizational entities. Therefore, only organizations that have achieved CDC recognition can be enrolled in Medicaid as an NDPP provider. Individuals who wish to participate in the Medicaid NDPP program may do so as a trained “Lifestyle Coach” once they meet the standards and guidelines specified in the CDC’s Diabetes Prevention Recognition Program (DPRP). Only the organizations that are enrolled in Medicaid as NDPP providers may bill for NDPP services. The CDC-recognized organization will supervise Lifestyle Coaches and must ensure that the individual Lifestyle Coaches providing NDPP services on behalf of the organization have been formally trained and have complied with the requirements outlined by the CDC.

A Lifestyle Coach may be a physician, non-physician practitioner, or an unlicensed person who has received formal training on a CDC-approved curriculum for at least 12 hours and is recognized as having met the NDPP requirements specified in the CDC’s Diabetes Prevention Recognition Program (DPRP) standards and guidelines.

Lifestyle Coaches will work with Medicaid members to provide them with a practical understanding of the positive impacts of healthier, sustained dietary habits; increased physical activity; and behavior change strategies for weight control; and will offer the following services with the goal to prevent Type 2 diabetes:

- Counseling related to long-term dietary change, increased physical activity, and behavior change strategies for weight control;
- Counseling and skill building to facilitate the knowledge, skill, and ability necessary to prevent the onset of Type 2 diabetes; and
- Nutritional counseling.
13d. Harm Reduction Services

Harm reduction services represent a fully integrated client-oriented approach to care. Such services are remedial services recommended by a physician or other licensed practitioner and are for maximum restoration of a beneficiary to his or her best possible functional level. The role of the harm reduction service is to ensure that clients obtain needed services at the appropriate time by assessing and reducing any barriers to accessing these programs. Harm reduction services begin immediately as service needs are assessed. The determination of the type(s) of service, frequency, and intensity is an ongoing responsibility of the harm reduction staff, and there is no limitation in the amount, duration, and scope of services. Harm reduction services continue until the staff determine that the service goals have been met or if the client decides he/she no longer wants to participate in programming.

Harm reduction programs will provide the following:
1. Development of a Treatment Plan
2. Individual/Group Supportive Counseling
3. Medication management and Treatment Adherence Counseling
4. Psychoeducation - Support groups

1. Development of a Treatment Plan

Definition: Development of a treatment plan through either an initial assessment or a scheduled or event-generated reassessment for harm reduction services is part of a package of remedial services recommended by a physician or other licensed practitioner and are for maximum restoration of a beneficiary to his or her best possible functional level. Referrals may be made for more intensive behavioral interventions, support groups, wellness services, substance use disorder (SUD) treatment, and overdose prevention as needed.

A reassessment is a scheduled or event-generated formal re-examination of the client’s situation, functioning, substance use, and medical and psychosocial needs to identify changes which have occurred since the initial or most recent assessment. The reassessment measures progress toward the desired goals and is used to prepare a new or revised harm reduction program plan or confirm that current services remain appropriate.

There are no limitations on the amount, duration, and scope of these services.

Providers: Services must be provided by:
- a direct service provider who has a high school diploma or has passed the general educational development (GED) test or the Test Assessing Secondary Completion (TASC™) and has earned a high school equivalency credential or has at least three (3) years’ experience either 1) providing community-based services to active substance users or persons living with a history of substance use or 2) providing harm reduction or community-based social services to women, children and families; substance users; mentally ill chemical abusing clients; homeless persons; adolescents; or parolees and other high-risk populations:
Supplement

New York
2(c.3)

- or a case worker who has a high school diploma or has passed the general educational development (GED) test or the Test Assessing Secondary Completion (TASC™) and has earned a high school equivalency credential or has at least three (3) years’ experience in case management or related supportive services position serving women, children and families; substance users; mentally ill chemical abusing clients; homeless persons; adolescents; or parolees and other high-risk populations, including one year of HIV-related experience; or
- director of harm reduction services who may be a clinical social worker; possess a master of social work degree; be a licensed clinical or masters social worker; or has a bachelor’s degree and at least three (3) years’ experience in the provision of supportive services to women, children and families; substance users; mentally ill chemical abusing clients; homeless persons; adolescents; or parolees and other high-risk populations; or
- a peer who has been certified through a Department-approved certification program or one conducted by another entity recognized by the Department and who is supervised by the director of harm reduction services. A person seeking harm reduction peer certification is required to complete 68 training hours of core courses such as Introduction to HIV, STIs, and Viral Hepatitis; Sex, Gender, and HIV; and Overview of Harm Reduction Counseling, as well as courses addressing health and medical needs and cultural competency among at-risk populations and health literacy. An additional 22 hours of training are required in topics specific to harm reduction among substance users and include promoting PrEP; retention in care; opioid overdose prevention; HCV prevention; safer injection and wound care; and addressing sexual risk. Other requirements for certification include completing a 500-hour practicum and passing a knowledge assessment. Certified peers must complete at least 10 hours of training annually to maintain their certification.

2. Individual/Group Supportive Counseling

**Definition:** Supportive counseling services are part of a package of remedial services recommended by a physician or other licensed practitioner and are for maximum restoration of a beneficiary to his or her best possible functional level. Effective supportive counseling assists individuals in understanding how to reduce the behaviors that interfere with their ability to lead healthy, safe lives and to restore them to their best possible functional level. Supportive counseling may be provided to an individual or in a group setting and can cover such topics as HIV/HCV/STD status or substance use disclosure to family members and friends; addressing stigma for drug users in accessing services; how to maximize health care services interactions; how to reduce substance use or use more safely and avoid overdose; and how to address anxiety, anger, and depressive episodes. There are no limitations on the amount, duration, and scope of these services.

**Providers:** Services must be provided by:
- a direct service provider who has a high school diploma or has passed the general educational development (GED) test or the Test Assessing Secondary Completion (TASC™) and has earned a high school equivalency credential or has at least three (3) years’ experience either 1) providing community-based services to active substance users or persons living with a history of substance use or 2) providing harm reduction or community-based social services to women, children and families; substance users; mentally ill chemical abusing clients; homeless persons; adolescents; or parolees and other high-risk populations;
• or a case worker who has a high school diploma or has passed the general educational development (GED) test or the Test Assessing Secondary Completion (TASC™) and has earned a high school equivalency credential or has at least three (3) years’ experience in case management or related supportive services position serving women, children and families; substance users; mentally ill chemical abusing clients; homeless persons; adolescents; or parolees and other high-risk populations, including one year of HIV-related experience; or
• director of harm reduction services who may be a clinical social worker; possess a master of social work degree; be a licensed clinical or masters social worker; or has a bachelor’s degree and at least three (3) years’ experience in the provision of supportive services to women, children and families; substance users; mentally ill chemical abusing clients; homeless persons; adolescents; or parolees and other high-risk populations.

3. Medication Management and Treatment Adherence Counseling
Medication management and treatment adherence counseling assists clients to recognize the need for medication to address substance use or psychiatric issues, reinforce the importance of adherence to treatment regimens, and identify tools to follow the prescribed regimens. Such services are remedial services recommended by a physician or other licensed practitioner and are for maximum restoration of a beneficiary to his or her best possible functional level. There are no limitations on the amount, duration, and scope of these services.

Providers: Services must be provided by:
• a direct service provider who has a high school diploma or has passed the general educational development (GED) test or the Test Assessing Secondary Completion (TASC™) and has earned a high school equivalency credential and has at least three (3) years’ experience in case management or related supportive services position; or
• director of harm reduction services who may be a clinical social worker; possess a master of social work degree; be a licensed clinical or masters social worker; or has a bachelor’s degree and has at least three (3) years’ experience in the provision of supportive services and supervision of staff; or
• a peer who has achieved Department-approved certification and is supervised by the director of harm reduction services.

4. Psychoeducation - Support Groups
Definition: Support groups are stand-alone services that may also be used to supplement individual and/or group supportive counseling. Such services are remedial services recommended by a physician or other licensed practitioner. Support groups restore individuals to his or her best possible functional level by focusing on group members’ issues and experiences relative to substance use, finances, medical/health care, support system, incarceration history and other factors that contribute to risk behaviors for HIV/STD/HCV. Support groups may be facilitated by a direct service provider, a case worker, or the director of harm reduction services or co-facilitated by a peer. There are no limitations on the amount, duration, and scope of these services.

TN #13-0019 Approval Date August 10, 2017
Supersedes TN NEW Effective Date April 01, 2014
Providers: Services must be provided by:
- a direct service provider who has a high school diploma or has passed the general educational development (GED) test or the Test Assessing Secondary Completion (TASC™) and has earned a high school equivalency credential or has at least three (3) years’ experience as a direct service provider in a supportive services position; or
- a case worker who has a high school diploma or has passed the general educational development (GED) test or the Test Assessing Secondary Completion (TASC™) and has earned a high school equivalency credential or has at least three (3) years’ experience in case management or a related supportive services position; or
- director of harm reduction services who may be a clinical social worker; possess a master of social work degree; be a licensed clinical or masters social worker; or has a bachelor’s degree and at least three (3) years’ experience in the provision of supportive services to women, children and families; substance users; mentally ill chemical abusing clients; homeless persons; adolescents; or parolees and other high-risk populations and
- a peer who has achieved Department-approved certification and is supervised by the director of harm reduction services.

Qualifications of Provider Organizations

Community-based organizations, including local health units, facilities licensed under Article 28 of New York State Public Health Law, and non-profit organizations that have been approved by the Commissioner of Health with a waiver to conduct a comprehensive harm reduction program, including syringe exchange.

Freedom of Choice – Access to Services

The State assures that the provision of harm reduction services will not restrict an individual’s free choice of providers in violation of section 1902(a)(23) of the Act.
1. Access to services will be limited to the authorized syringe exchange programs.
2. Eligible recipients will have free choice of the providers of harm reduction services within the specified geographic area identified in this Plan.
3. Eligible recipients will have free choice of the providers of other medical care under the Plan.
4. Eligible recipients who refuse harm reduction services will not be denied access to other services offered under the Plan.
5. Harm reduction program services will not be used to restrict an individual's access to other services under the Plan.
Limitations

Harm reduction program services do not include the following:

- case management activities that are an integral component of another covered Medicaid service; and
- substance use disorder treatment services.

Harm reduction program services:

- must not be utilized to restrict the choice of services a recipient can obtain, including medical care or services from any provider participating in the Medical Assistance program that is qualified to provide such or who undertakes to provide such care or service(s) including an organization which provides such care or services or which arranges for the delivery of such care or services on a prepayment basis; and
- must not duplicate certain services currently provided under the Medical Assistance Program or other funding sources such as the Long Term Home Health Care program, AIDS Home Care program under 622 of the Laws of 1988, and the Care at Home Program (Katie Beckett Model Waivers).
[ (1) Directly Observed Therapy (DOT) - Clients must be accessed as medically appropriate for DOT based upon the client’s risk of non adherence to a medication regimen necessary to cure an active, infectious, potentially fatal disease process and to prevent the development and spread of an infectious, potentially fatal disease which may not respond to conventional therapies.

“Off-site” services shall be provided to developmentally disabled persons whose therapeutic requirements are most effectively satisfied in an appropriate environment that is specific to the treatment needs of the developmentally disabled individual. Such services shall be provided by persons authorized pursuant to NYCRR Title 14 Part 679. “Off-site” shall not be provided at the location of a clinic certified by NYCRR Title 14 Part 679.

“Early Intervention” Services are provided to children who have or who are suspected of having a developmental delay or disability. These services, limited to EPSDT, which are provided by or on behalf of a county or the City of New York pursuant to an Individualized Family Services Plan (IFSP) include:

1. Screening  
2. Evaluation  
3. Audiology  
4. Nursing  
5. Nutrition Services

6. Occupational Therapy  
7. Physical Therapy  
8. Psychological Services  
9. Social Work Services

10. Anticipatory Guidance  
    (Special Instruction and Allied Health Professional Assistance)  
11. Speech Pathology Services  
12. Assistive Technology Services  
13. Vision Services

14. Collateral contacts for all of the above services

November 1, 2017

12a. Prior authorization or dispensing validation is required for some prescription drugs. In addition, brand-name drugs that have a FDA approved, A-rated generic equivalent must be prior authorized unless exempted by the Commissioner of Health.

Drugs for which Medical Assistance reimbursement is available are limited to the following:

1. those non-prescription drugs contained on a list established by the New York State Commissioner of Health.
2. covered outpatient drugs of any manufacturer which has entered into and complies with an agreement under Sections 1902(a) (54) and 1927 (a) of the Act which are prescribed for a medically accepted indication. (As provided by Section 1927 (d) (2) of the Act certain outpatient drugs may be excluded from coverage).

12b. Prior approval is required for all dentures.

12c. Prior approval is required for prosthetic and orthotic devices over a dollar amount established by the State Department of Health and identified for providers in the MMIS DME Provider Manual.

Prior approval is required for artificial eyes as specified in the MMIS Ophthalmic Provider Manual. Program also includes coverage of orthotic appliances including hearing aids. All hearing aids require prior approval.

12d. Prior approval is required for certain special lenses and unlisted eye services as specified for providers in the MMIS Ophthalmic Provider Manual.

13b. Screening Services (see 13.d Rehabilitative Services – Early Intervention).

13d. Rehabilitative Services

[(1) Directly Observed Therapy (DOT) – Clients must be assessed as medically appropriate for DOT based upon the client’s risk of non-adherence to a medication regimen necessary to cure an active, infectious, potentially fatal disease process and to prevent the development and spread of an infectious, potentially fatal disease which may not respond to conventional therapies.]

Off-site services shall be provided to developmentally disabled persons whose therapeutic requirements are most effectively satisfied in an appropriate environment that is specific to the treatment needs of the developmentally disabled individual. Such services shall be provided by persons authorized pursuant to NYCRR Title 14 Part 679. “Off-site” services shall not be provided at the location of a clinic certified by NYCRR Title 14 Part 679. Coverage of “off-site” services shall end effective December 31, 2015.

[“Early Intervention” Services are provided to children who have or who are suspected of having a developmental delay or disability. These services, limited to EPSDT, which are provided by or on behalf of a county or the City of New York pursuant to an Individualized Family Services Plan (IFSP) include:

5. Nutrition Services 10. Anticipatory Guidance (Special Instruction and Allied Health Professional Assistance)
[13d. Rehabilitative Services:

**School Supportive Health Services**

School Supportive Health Services are services provided by or through local school districts or the New York City Board of Education to children with, or suspected of having disabilities, who attend public or State Education Department approved private schools. These services, which are provided to children with special needs pursuant to an Individualized Education Program (IEP) and are limited to EPSDT, are:

1. Physical therapy services
2. Occupational therapy services
3. Speech pathology services
4. Audiological evaluations
5. Evaluations for all available services
6. Nursing Services
7. Psychological and social work services (psychological counseling)
8. Transportation see Supplement to Attachment 3.1.A, Item 24a
9. Medical evaluations (physician, physician assistant and nurse practitioner)

**Preschool Supportive Health Services**

Preschool Supportive Health Services are services provided by or through counties or the New York City Board of Education to children, with or suspected of having disabilities, who attend State Education Department approved preschools. These services, which are provided to children with special needs pursuant to an Individual Education Program (IEP) and are limited to EPSDT, are:

1. Physical therapy services
2. Occupational therapy services
3. Speech pathology services
4. Audiological evaluation
5. Evaluations for all available services
6. Nursing services
7. Psychological and social work services (psychological counseling)
8. Transportation see Supplement to Attachment 3.1.A, Item 24a
9. Medical evaluations (physician, physician assistant and nurse practitioner)
13d. (Cont’d) Rehabilitative services for residents of community-based residential programs licensed by the Office of Mental Health (CMH) are of three types:

1. Community residences of sixteen beds or less;
2. Family-based treatment and
3. Teaching family homes.

1. **Community Residences**

Rehabilitative services in community residences are interventions, therapies and activities which are medically therapeutic and remedial in nature, and are medically necessary for the maximum reduction of functional and adaptive behavior deficits associated with the person’s mental illness. Community residences for adults may be either a congregate-type arrangement or apartment-based. Community residence services are also provided to children.

Limitations on services include the following:

- [ ] All providers must be currently licensed by CMH as community residences under 14 NYCRR 586 and 594. Congregate locations have sixteen beds or less.
- [ ] Adults admitted must be determined to have a severe and persistent mental illness, as defined by the Commissioner of CMH.
- [ ] Children admitted must be determined to have a serious emotional disturbance, as defined by the Commissioner of CMH.
- [ ] Services are limited to those described in 14 NYCRR 593.
- [ ] All services must be provided pursuant to a physician’s written authorization and provided in accordance with an approved service plan, as described in 14 NYCRR 593.

2. **Family-based treatment**

Rehabilitative services in family-based treatment programs are intended to provide treatment to seriously emotionally disturbed children and youth to promote their successful functioning and integration into the natural family, community, school or independent living situations. Such services are provided in consideration of a child’s developmental stage. Those children determined eligible for admission are placed in surrogate family homes for care and treatment.
Limitations on services include the following:

[ ] all providers must be currently licensed by CMH as family-based treatment programs under 14 NYCRR 594.

[ ] children admitted must be determined to have a serious emotional disturbance, as defined by the Commissioner of CMH.

[ ] services are limited to those described in 14 NYCRR 593.

[ ] all services must be provided pursuant to a physician’s written authorization and provided in accordance with an approved service plan, as described in 14 NYCRR 593.

3. Teaching Family Homes

Rehabilitative services in teaching family homes are intended to provide treatment to seriously emotionally disturbed children and youth to promote their successful functioning and integration into the natural family, community, school or independent living situations. Such services are provided in consideration of a child’s developmental state. Eligible children are placed in small congregate care homes (4 children or less) in a supervised living arrangement with approved teaching parents, based on the National Teaching Family Model.

This program is different from family based treatment because some children are not able to tolerate the family closeness of family based treatment programs, and, therefore, are more appropriately treated in teaching family homes.

Limitations on services include the following:

[ ] All providers must be currently licensed by OMH as teaching family homes under 14 NYCRR 594.

[ ] Children admitted must be determined to have a serious emotional disturbance, as defined by the Commissioner of OMH.

[ ] Services are limited to those described in 14 NYCRR 593.

[ ] All services must be provided pursuant to a physician’s written authorization and provided in accordance with an approved service plan, as described in 14 NYCRR 593.
New York 3b-1

Assertive Community Treatment (ACT)

Assertive Community Treatment (ACT) programs will provide case management, treatment and rehabilitation to persons with a serious psychiatric disorder who exhibit a pattern of institutional utilization and/or are at risk of a severely dysfunctional lifestyle; present symptoms and impairments not effectively remedied by other available treatment; do not or cannot be engaged in treatment in other outpatient settings as a result of their mental illness; or cannot maintain consistency in treatment through other outpatient services.

Programs will be licensed under 14 NYCRR Part 508. Services will be provided primarily in the community. Services will be provided under the supervision of a psychiatrist by a multi-disciplinary team which meets with the recipient or the recipients significant others a minimum of six times per month. Of these six contacts, at least three of the contacts must be with the Medicaid recipient. Step down services may be provided to clients found by the team to be no longer in need of full ACT team services. A client who is receiving ACT step down must receive a minimum of two face to face contacts per month. Individuals shall be allowed to alternate between the full ACT team services and step-down services depending on the level of services needed to remain in the community.
13d. Rehabilitative Services

Personalized Recovery Oriented Services

[A comprehensive] Personalized Recovery Oriented Services (PROS) programs [will] provide Community Rehabilitation and Support, Intensive Rehabilitation and Ongoing Rehabilitation and Support services to individuals for whom such services have been recommended by a licensed practitioner of the healing arts (LPHA). PROS providers may, at their option and with approval from the Office of Mental Health, also provide Clinical Treatment Services to individuals enrolled in PROS for whom such services are determined to be necessary and appropriate by a physician or psychiatric nurse practitioner. [A “limited license” will be made available for free-standing Intensive Rehabilitation and Ongoing Rehabilitation and Support programs that are operated by a provider that does not have the capability to offer Community Rehabilitation and Support.

Community Rehabilitation and Support (CRS) is designed to engage and assist individuals in managing their mental illness and in restoring those skills and supports necessary to live successfully in the community. Intensive Rehabilitation (IR) is a customized package of rehabilitation and support services designed to intensely assist an individual in attaining specific life goals such as successful completion of school, attainment of stable and independent housing, and gainful employment.

Intensive Rehabilitation services may also be used to provide targeted interventions to reduce the risk of hospitalization, loss of housing, involvement in the criminal justice system, and to help individuals manage their symptoms. Ongoing Rehabilitation and Support (ORS) will provide interventions designed to assist in managing symptoms in an integrated workplace setting.

PROS programs will offer a comprehensive menu of services, customized for each client through development of an individualized recovery plan. Services provided by the CRS component of a PROS program will include but are not limited to: engagement; assessment; wellness self-management; basic living skills training; benefits and financial management; community living skills exploration; crisis intervention; individual recovery planning; information and education regarding self help; and structured skill development and support. Services provided by the IR component of a PROS program will include but are not limited to: family psychoeducation; intensive rehabilitation goal acquisition; clinical counseling and therapy; and intensive relapse prevention. Service provided in the IR component of a “limited license” PROS program will include, but is not limited to, intensive rehabilitation goal acquisition for employment and education-oriented goals. Services provided by the ORS component of a PROS program will include, but not limited to, vocational support services, defined as the ongoing provision of counseling, mentoring and advocacy services designed to sustain an individual’s role in integrated employment by providing supports which assist the individual in symptom management. PROS services will be provided both onsite and offsite, but ORS services will always be provided off-site in the community.

Programs may, at their option, provide clinical treatment services designed to stabilize ameliorate and control the disabling symptoms of mental illness. Programs that provide clinical treatment services will be reimbursed at a higher rate for the clinic component than programs which do not provide clinical treatment services.]
13d. **Rehabilitative Services**  
**Personalized Recovery Oriented Services - continued**

[The goal of the program is to provide integrated services, but clients can choose to receive service from different service components in more than program. Clients enrolled in a PROS program which provides clinical treatment services will be given free choice as to whether they wish to receive clinical treatment through the PROS program, or receive those services from a clinic licensed under 14 NYCRR Part 587.

Programs will be licensed and reimbursed under criteria set forth in 14 NYCRR Part 512. Staffing requirements will include differing staff to client ratios depending on the component of services the program offers.]

PROS provider agencies are licensed by the New York State Office of Mental Health to offer a comprehensive menu of services, customized for each individual through the development of an Individualized Recovery Plan.

PROS services are delivered in accordance with documented Individualized Recovery Plans which, at a minimum, must include a description of the individual’s strengths, resources, including collaterals, and mental health-related barriers that interfere with functioning; a statement of the individual’s recovery goals and program participation objectives; an individualized course of action to be taken, including the specific services to be provided, the expected frequency of service delivery, the expected duration of the course of service delivery, and the anticipated outcome; criteria to determine when goals and objectives have been met; a relapse prevention plan; and a description and goals of any linkage and coordination activities with other service providers.

For individuals receiving Intensive Rehabilitation, Ongoing Rehabilitation and Support or Clinical Treatment Services, the Individualized Recovery Plan shall identify the reasons why these services are needed, in addition to Community Rehabilitation and Support services, to achieve the individual's recovery goals.

PROS services provided to collaterals are provided solely for the benefit of Medicaid beneficiaries.

Individualized Recovery Plans must be approved by a Professional Staff member as well as the individual recipient. For individuals receiving Clinical Treatment Services, either a physician or a psychiatric nurse practitioner shall approve the Individualized Recovery Plan.
13d. **Rehabilitative Services**

**Personalized Recovery Oriented Services (PROS) - continued**

**Practitioner qualifications:**

A PROS must employ a minimum of one full-time LPHA. LPHAs include:

- Nurse Practitioner;
- Physician;
- Physician Assistant;
- Psychiatric Nurse Practitioner;
- Psychiatrist;
- Psychologist;
- Registered Professional Nurse;
- Licensed Mental Health Counselor;
- Licensed Clinical Social Worker (LCSW);
- Licensed Master Social Worker, under the supervision of a LCSW, licensed psychologist, or psychiatrist employed by the agency;
- Licensed Creative Arts Therapist;
- Licensed Marriage and Family Therapist;
- Licensed Psychoanalyst.

Each licensed PROS must have a minimum of 40% full-time equivalents of Professional Staff, including:

- **Creative Arts Therapist** - an individual who is currently licensed or permitted as a creative arts therapist by the New York State Education Department, or who has a master's degree in a mental health field from a program approved by the New York State Education Department and registration or certification by the American Art Therapy Association, American Dance Therapy Association, National Association of Music Therapy or American Association for Music Therapy;

- **Credentialed Alcoholism and Substance Abuse Counselor** - an individual who is currently credentialed by the New York State Office of Alcoholism and Substance Abuse Services in accordance with Part 853 of Title 14 of the NYCRR;

- **Marriage and Family Therapist** - an individual who is currently licensed or permitted as a marriage and family therapist by the New York State Education Department;

- **Mental Health Counselor** - an individual who is currently licensed or permitted as a mental health counselor by the New York State Education Department;

- **Nurse Practitioner** - an individual who is currently certified or permitted to practice as a nurse practitioner by the New York State Education Department;

- **Nurse Practitioner in Psychiatry** - an individual who is currently certified as a nurse practitioner in psychiatry by the New York State Education Department. For purposes of this Attachment, nurse practitioner in psychiatry will have the same meaning as psychiatric nurse practitioner, as defined by the New York State Education Department;

13d. Rehabilitative Services

PROS – continued

- **Occupational Therapist** - an individual who is currently licensed or permitted to practice as an occupational therapist by the New York State Education Department and who meets the qualifications set forth in 42 CFR § 440.110(b)(2);

- **Pastoral Counselor** - an individual who has a master's degree or equivalent in pastoral counseling or is registered as a Pastoral Care Specialist of the American Association of Pastoral Counselors;

- **Physician** - an individual who is currently licensed or permitted to practice as a physician by the New York State Education Department;

- **Physician Assistant** - an individual who is currently registered or permitted to practice as a physician assistant or a specialist's assistant by the New York State Education Department;

- **Psychiatrist** - an individual who is currently licensed or permitted to practice as a physician by the New York State Education Department and who is certified by, or eligible to be certified by, the American Board of Psychiatry and Neurology;

- **Psychoanalyst** - an individual who is currently licensed or permitted as a psychoanalyst by the New York State Education Department;

- **Psychologist** - an individual who is currently licensed or permitted as a psychologist by the New York State Education Department. Individuals with at least a master's degree in psychology who do not meet this definition may not be considered licensed practitioners of the healing arts, and may not be assigned supervisory responsibility. However, individuals who have obtained at least a master's degree in psychology may be considered professional staff for the purposes of calculating professional staff and full time equivalent professional staff;

- **Registered Professional Nurse** - an individual who is currently licensed or permitted to practice as a registered professional nurse by the New York State Education Department;

- **Rehabilitation Counselor** - an individual who has either a master's degree in rehabilitation counseling from a program approved by the New York State Education Department or current certification by the Commission on Rehabilitation Counselor Certification;

TN #16-0041 Approval Date 11/22/2019

Supersedes TN NEW Effective Date 04/01/2016
13d. Rehabilitative Services
PROS – continued

- **Social Worker** - an individual who is currently licensed or permitted as a master social worker (LMSW) or clinical social worker (LCSW) by the New York State Education Department. LMSWs must be supervised by a LCSW, licensed psychologist, or psychiatrist employed by the agency. Social workers who do not meet this criteria may not be considered licensed practitioners of the healing arts. However, social workers who have obtained at least a master's degree in social work from a program approved by the New York State Education Department may be considered professional staff for the purposes of calculating professional staff and full-time equivalent professional staff; and

- **Therapeutic Recreation Specialist** - an individual who has either a master's degree in therapeutic recreation from a program approved by the New York State Education Department or certification as a therapeutic recreation specialist by the National Council for Therapeutic Recreation Certification.

A PROS program licensed to provide Clinical Treatment Services must have a minimum of .125 FTE psychiatrist and .125 FTE registered professional nurse for every 40 individuals receiving clinical treatment services. Additional psychiatry staff must be added, as necessary, to meet the volume and clinical needs of participants receiving clinical treatment services.

**Minimum Qualifications for Paraprofessional Staff**
Paraprofessional Staff are PROS staff members who are not professional staff, as specified above. Paraprofessional Staff must possess a combination of educational and professional and/or personal experience in a mental health or human services setting. Paraprofessional Staff shall have attained at least 18 years of age, possess at least a High School diploma or GED, and demonstrate six (6) months professional and/or personal experience in a mental health or human services field.

**Paraprofessional Staff Training**
PROS programs shall ensure Paraprofessional Staff demonstrate competency in rehabilitation practices and PROS service components through formal and informal training practices, including job-shadowing of Professional Staff and experienced Paraprofessional Staff, as appropriate, based on the educational background and professional experience of the Paraprofessional Staff member.

**Required Supervisory Arrangements**
Initial service recommendations and Individualized Recovery Plans must be developed and documented under the supervision of Professional Staff. Professional Staff must provide direct supervision to Paraprofessional Staff in the delivery of service components identified herein. Professional Staff supervision must also be available at all times to address any issues related to quality of care in the provision of any PROS service components. Additionally, PROS Programs must demonstrate a formal plan for the provision of professional supervision of group-delivered services as a condition of program licensure.

13d. Rehabilitative Services
PROS – continued

Community Rehabilitation and Support (CRS) Services
Community Rehabilitation and Support (CRS) services are an array of recovery-oriented assessment, psychosocial rehabilitation, counseling, family psychoeducation, and crisis intervention services designed to restore, rehabilitate and support individuals to regain skills and functionality lost due to mental illness, and manage the symptoms of their mental illness so that they may live successfully in the community.

Service Components:

- **Psychiatric Rehabilitation Assessment**
  With the active involvement of the individual, the Rehabilitation Assessment process involves a multi-disciplinary review of the individual’s strengths and barriers encountered as a result of his or her psychiatric condition and identifies life role goals to be addressed in the individual’s Individualized Recovery Plan.

  **Practitioner qualifications:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Alcohol, Tobacco and Other Drug Assessment**
  An assessment service designed to gather data concerning an individual’s substance-related history and current use and assess such data to determine the individual’s substance abuse status, the need for substance abuse services or referral.

  **Practitioner qualifications:** Professional Staff.

- **Basic Living Skills**
  A psychosocial rehabilitation service designed to improve an individual’s ability to perform the basic skills necessary to achieve maximum independence and acceptable community behaviors that are critical to his or her recovery. This service focuses on the reacquisition of capabilities and skills, and strategies for appropriate use of skills.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Benefits and Financial Management**
  A psychosocial rehabilitation service which assists individuals in reacquiring skills and capabilities that were lost as a result of the onset of mental illness and that are necessary to manage their own finances. This service is designed to support an individual’s functioning in the community through understanding, and skill in handling, his or her own financial resources.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.
13d. **Rehabilitative Services**

PROS — continued

- **Cognitive Remediation**
  A counseling service designed to improve and restore an individual's functioning by restoring the cognitive skill that is the target of the remediation task. Cognitive remediation is an optional PROS service, subject to prior review and written approval of the Office of Mental Health.

  **Practitioners:** Professional Staff who have had training approved by the Office of Mental Health.

- **Community Living Exploration**
  A psychosocial rehabilitation service designed to help an individual understand the demands of specific community life roles, in order to make decisions regarding participation and to overcome barriers to participate and perform in desired roles. This service also includes motivating individuals to explore and increase their knowledge of opportunities available in the community.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Crisis Intervention**
  A service designed to safely and respectfully de-escalate situations of acute distress or agitation which require immediate attention.

  **Practitioners:** Professional Staff.

- **Engagement in Recovery**
  A psychosocial rehabilitation service designed to motivate and support individuals receiving PROS to continue to participate in the rehabilitation and recovery process. This includes: fostering therapeutic relationships supportive of the individual's recovery, evaluating recovery goals, readiness, and overall satisfaction of life roles and the individual recovery plan.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Individualized Recovery Planning**
  A continuous, dynamic process that engages each person as an active partner in developing, reviewing and modifying a care plan that supports his or her progress towards recovery. The individualized recovery planning process also includes working with the individual in the development of a relapse prevention plan and advance directive, where appropriate.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

TN #16-0041 Approval Date 11/22/2019

Supersedes TN NEW Effective Date 04/01/2016
13d. **Rehabilitative Services**

**PROS – continued**

- **Skill Building for Self-help**
  A psychosocial rehabilitation service designed to help individuals restore the skills necessary to identify and participate in or take advantage of appropriate self-help resources or mutual aid groups.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Pre-admission screening**
  A service including engaging, interviewing and evaluating an individual to determine whether the individual is appropriate for the program and identifying and addressing any unique circumstances and functional limitations which may impact the individual's ability and desire to receive PROS services.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Structured Skill Development and Support**
  A psychosocial rehabilitation service designed to assist individuals to regain the skills necessary for performing normative life roles associated with group membership, work, education, parenting, or living environments by modeling and practicing skills in actual community settings off-site or community environments replicated at the program site and through the use of structured activities.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Wellness Self-management**
  Psychosocial rehabilitation services designed to develop or improve personal coping strategies, prevent relapse, and promote recovery. Services may be provided to recipients and/or collaterals for the benefit of the recipient, and may include, but are not limited to coping skills training, disability education, dual disorder education, medication education and self-management, problem-solving skills training, and relapse prevention planning.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

Supersedes TN  **NEW**  Effective Date  **04/01/2016**
13d. Rehabilitative Services
PROS – continued

- **Clinical Treatment**
  If an individual attending a PROS that does not include Clinical Treatment services requires those services, the individual may receive Clinical Treatment services at an OMH licensed clinic or an independent practitioner. If the individual is not receiving Clinical Treatment services directly within the PROS, the PROS documents that the services provided by the OMH licensed clinic are integrated with those provided by the PROS.

  Clinical Treatment Services are designed to stabilize, ameliorate, and control the disabling symptoms of mental illness. In order to be licensed to offer Clinical Treatment services within a PROS, the PROS staffing plan must meet minimum clinical treatment staffing requirements as described under the PROS practitioner requirements, the PROS staffing must include sufficient qualified staff to deliver clinical treatment services and additional space to perform services is required.

  Clinical Treatment services include:

- **Clinical Counseling and Therapy**
  A service designed to provide goal-oriented verbal counseling or therapy, including individual, group, and family counseling or therapy, for the purpose of addressing the emotional, cognitive, and behavioral symptoms of a mental health disorder or for engaging, motivating, and stabilizing persons with a co-occurring mental health and substance abuse (including alcohol) disorder, and the related effects on role functioning.

  **Practitioners:** Licensed Practitioners of the Healing Arts, as defined in this section and Professional Staff under the supervision of a Licensed Practitioner of the Healing Arts, as defined in this section.

- **Health Assessment**
  A service designed to gather data concerning an individual's medical history and any current signs and symptoms, and assess such data to determine his or her physical health status and need for referral.

  **Practitioners:** Nurse practitioner, nurse practitioner in psychiatry, physician, physician's assistant, psychiatrist or registered professional nurse.

---

TN #16-0041 Approval Date 11/22/2019
Supersedes TN NEW Effective Date 04/01/2016
**13d. Rehabilitative Services**

**PROS – continued**

- **Medication Management**
  A service designed to prescribe or administer medication to treat the primary symptoms of an individual's psychiatric condition. This service is intended to include medication trials which are adequate in dose and duration, as well as assessments of the appropriateness of the individual's existing medication regimen through record reviews, ongoing monitoring, and consultation with the PROS participant and/or collateral. Medication management may include monitoring the side effects of prescribed medications including, but not limited to, extrapyramidal, cardiac and metabolic side effects, and may include providing individuals with information concerning the effects, benefits, risks and possible side effects of a proposed course of medication. The Medication itself is reimbursable under separate State Plan authority.

  **Practitioners:** Psychiatrist and/or psychiatric nurse practitioner.

- **Psychiatric Assessment**
  A service designed to gather data concerning an individual's psychiatric history and current mental health symptoms, assess such data for determination of the individual's current mental health status, and identify the need for clinical treatment services.

  **Practitioners:** Psychiatrist or psychiatric nurse practitioner.

- **Symptom Monitoring**
  A service designed to identify the ongoing effects of an individual's course of care. This service involves the continuous process of monitoring a recipient's symptoms of mental illness, as identified in his or her individualized recovery plan, and his or her response to treatment, within the context of other support and rehabilitation services.

  **Practitioners:** Licensed Practitioners of the Healing Arts, as defined in this section and Professional or Paraprofessional Staff under the supervision of a Licensed Practitioners of the Healing Arts, as defined in this section.

- **Intensive Rehabilitation (IR)**
  Intensive Rehabilitation services include the following four psychosocial rehabilitation and counseling services which are designed to be delivered with greater frequency, in smaller group sizes or by specifically qualified staff. Individuals may require IR when they experience episodes of acute loss of functioning increasing their risk of hospitalization, loss of housing or involvement in the criminal justice system or heightened urgency and motivation to work towards a specific rehabilitation goal over a short period of time.
13d. **Rehabilitative Services**  
**PROS – continued**

**Service Components:**

- **Intensive Rehabilitation Goal Acquisition**  
  A psychosocial rehabilitation service designed to assist an individual expressing heightened urgency and motivation to restore functionality and achieve a personally meaningful life role goal. This service may be delivered one-on-one and outside of normally scheduled group programming.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Intensive Relapse Prevention**  
  A rehabilitation counseling service designed to address an exacerbation of acute symptoms or manage existing symptoms that have not been responsive to the current service formulation. This service may also include the execution of a series of predetermined steps identified in the relapse prevention plan. Individuals who are experiencing an exacerbation of symptoms that is interfering with their recovery process and that is not responding to the current plan of care are assisted in implementing their relapse prevention plan or in using other methods to either minimize their symptoms or permit the individual to continue to work towards their recovery notwithstanding their symptomatology.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.

- **Integrated Treatment for Dual Disorders**  
  A rehabilitation counseling service based on evidence-based practices that include motivational, cognitive-behavioral and harm reduction techniques designed to restore functionality and promote recovery for persons with both mental health and substance use disorders. This specialty service is integrated as the focus is to overcome barriers/impairments caused by both mental health and substance use disorders.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff, who have completed a core set of “Focused Integrated Treatment” (FIT) training modules.
13d. **Rehabilitative Services**  
PROS – continued  

- **Family Psychoeducation/ Intensive Family Support**  
  A psychosocial education service designed to provide information, clinical guidance and support to collateral(s) of individuals receiving PROS as well as the individual when desired and appropriate, for the purpose of assisting and enhancing the capacity of a collateral to reduce an individual's symptomatology, restore functioning, and facilitate an individual's overall recovery.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff, who have completed OMH approved training.

- **Ongoing Rehabilitation and Support**  
  Ongoing Rehabilitation and Support (ORS) services are psychosocial rehabilitation services including rehabilitation counseling, social, coping, and basic living skills training services designed to assist an individual manage the disabling symptoms of mental illness in the workplace, develop strategies for resolving workplace issues, and maintain other functional skills necessary to sustain competitive employment. These services are customized to the individual and necessary to help the individual achieve a rehabilitation goal defined in his or her individualized recovery plan. ORS is provided to individuals who are working in integrated employment settings. ORS does not include educational, vocational or job training services.

  **Practitioners:** Professional Staff or Paraprofessional Staff under the supervision of Professional Staff.
Other Diagnostic, Screening, Preventive, and Rehabilitative Services - Rehabilitative Services
1905(a) (13)
42 CFR 440.130(d)

Item 4.b. EPSDT services - **Rehabilitative Services: 42 CFR 440.130(d)**

The State provides coverage for this benefit as defined at 42 CFR 440.130(d) and as described in this section:

Provided as an Early and Periodic Screening, Diagnostic and Treatment service for individuals who are eligible under the plan and are under the age of 21 1902(a) (43), 1905(a) (4) (B) and 1905(r)).

**Rehabilitative Services Description**

The rehabilitative service (or services) described below is:
- Community Psychiatric Support and Treatment
- Psychosocial Rehabilitation
- Family Peer Support

**Assurances:**

The State assures that all rehabilitative services are provided to, or directed exclusively toward the treatment of, the Medicaid eligible individual in accordance with section 1902 (a) (10)(A)(i) of the Act.

The State assures that rehabilitative services do not include and FFP is not available for any of the following in accordance with section 1905(a) (13) of the Act.

- A. educational, vocational and job training services;
- B. room and board;
- C. habilitation services;
- D. services to inmates in public institutions as defined in 42 CFR §435.1010;
- E. services to individuals residing in institutions for mental diseases as described in 42 CFR§435.1010;
- F. recreational and social activities; and-
- G. services that must be covered elsewhere in the state Medicaid plan.

**Approval Date  02/07/2019**
**Effective Date  01/01/2019**
Rehabilitative Services: EPSDT only (Continued)

Crisis Intervention (Continued):

Description (Continued):

not additional crisis response services are required to further evaluate, resolve, and/or stabilize the crisis. CI services are designed to interrupt and/or ameliorate the crisis experience and include an assessment that is culturally and linguistically sensitive and result in immediate crisis resolution and de-escalation, and development of a crisis plan. The goals of CI are engagement, symptom reduction, stabilization, and restoring individuals to a previous level of functioning or developing the coping mechanisms to minimize or prevent the crisis in the future. Family is a birth, foster, adoptive, or self-created unit of people residing together, with significant attachment to the individual, consisting of adult(s) and/or child (ren), with adult(s) performing duties of parenthood/caregiving for the child(ren) even if the individual is living outside of the home. The service is recommended by any of the following licensed practitioners of the healing arts operating within the scope of their practice of their State license, who may or may not be part of the crisis intervention team: Psychiatrist, Physician, Licensed Psychoanalyst, Registered Professional Nurse, Nurse Practitioner, Clinical Nurse Specialist, Licensed Clinical Social Worker (LCSW), Licensed Marriage and Family Therapist, Licensed Mental Health Counselor, or Licensed Psychologist. CI is a face-to-face intervention and can occur in a variety of settings including community locations where the beneficiary lives, works, attends school, engages in services (e.g. provider office sites), and/or socializes. CI includes engagement with the child, family/caregiver or other collateral sources (e.g., school personnel) that is culturally and linguistically sensitive, child centered, and family focused in addition to trauma informed to determine level of safety, risk, and to plan for the next level of services. All activities must occur within the context of a potential or actual behavioral health crisis with a desired outcome of diverting an emergency room visit and/or inpatient admission, when appropriate. Service is available with 24/7 availability and capacity to respond within one hour of call.

Practitioner qualifications: Services should be provided by a culturally competent, trauma-informed, and linguistically responsive multidisciplinary team (of at least two professionals unless noted below), for programmatic or safety purposes. One member of a two-person crisis intervention team must be a behavioral health professional and have experience with crisis intervention service delivery. If determined through triage only one team member is needed to respond to a psychiatric crisis, that team member must be a behavioral health professional and have experience with crisis intervention. If determined through triage only one team member is needed to respond to a substance use disorder (SUD) crisis, the team member may be a Credentialed Alcoholism and Substance Abuse Counselor (CASAC) and a licensed practitioner must be available via phone. A peer support specialist may not respond alone. Behavioral health professionals are practitioners possessing a license or a permit from the New York State Education Department who are qualified by credentials, training, and experience to provide direct services related to the treatment of mental illness. For Crisis Intervention, these behavioral health professionals include: Psychiatrist, Physician, Licensed Psychoanalyst, Licensed Clinical Social Worker (LCSW), Licensed Master Social Worker (LMSW), Licensed Mental Health Counselor, Licensed Psychologist, Licensed Marriage and Family Therapist, or Nurse Practitioner with experience/background treatment mental health and/or substance use disorders OR one practitioner from the above list and one practitioner from the following who is]
not considered a behavioral health professional: Certified alcoholism and substance abuse counselor, Credentialed family peer advocate with lived experience as a family member, Certified Recovery Peer Advocate-Family, Certified rehabilitation counselor, or a Registered Professional Nurse.

If one member of the crisis intervention team is a Peer support specialist, the Peer support provider must have a credential/certification as either:

1) An OMH established Family Peer Advocate credential, or
2) An OASAS established Certified Recovery Peer Advocate - Family.

**Family Peer Support will be delivered by a New York State Credentialed Family Peer Advocate (FPA). To be eligible for the FPA Credential, the individual must:**

- Demonstrate ‘lived experience’ as a parent or primary caregiver who has navigated multiple child serving systems on behalf of their child (ren) with social, emotional, developmental, health and/or behavioral healthcare needs.
- Have a high school diploma, high school equivalency preferred or a State Education Commencement Credential (e.g. SACC or CDOS). This educational requirement can be waived by the State if the person has demonstrated competencies and has relevant life experience sufficient for the peer certification.
- Completed Level One and Level Two of the Parent Empowerment Program Training for Family Peer Advocates training or approved comparable training.
- Submitted three letters of reference attesting to proficiency in and suitability for the role of a Family Peer Advocate (FPA) including one from the FPAs supervisor.
- Documented 1000 hours of experience providing Family Peer Support services.
- Agreed to practice according to the Family Peer Advocate Code of Ethics.
- Completed 20 hours of continuing education and renew their FPA credential every two years.

An FPA may obtain a provisional credential and complete all other requirements of the professional family peer advocate credential that will allow services they provide to be billed if the applicant has:

- Demonstrate ‘lived experience’ as a parent or primary caregiver who has navigated multiple child serving systems on behalf of their child(ren) with social, emotional, developmental, health and/or behavioral healthcare needs.
[13d. Rehabilitative Services: EPSDT only (Continued)
Crisis Intervention (Continued):
Practitioner qualifications (Continued):

An FPA may obtain a provisional credential if the applicant has (Continued)
• Have a high school diploma, high school equivalency preferred or a State Education
Commencement Credential (e.g. SACC or CDOS). This educational requirement can be
waived by the State if the person has demonstrated competencies and has relevant life
experience sufficient for the peer credential.
• Completed Level One of the Parent Empowerment Program Training for Family Peer
Advocates or approved comparable training.
• Submitted two letters of reference attesting to proficiency in and suitability for the role
of a Family Peer Advocate (FPA).

An FPA with a provisional credential must complete all other requirements of the Professional
Family Peer Advocate Credential within 18 months of commencing employment as an FPA OR
Family Peer Support will be delivered by a Certified Recovery Peer Advocate (CRPA) with a
Family Specialty.

To be certified as CRPA-Family, the individual must be at least 18 years of age and
have the following:
• Have ‘lived experience’ as a family member impacted by youth substance use
disorders. The CRPA – Family may be in recovery themselves.
• Have a high school diploma or a State Education Commencement Credential or General
Equivalency Degree (GED).
• Completed a minimum of 46 hours of content specific training, covering the topics:
advocacy, mentoring/education, recovery/wellness support, medication assisted
 treatment and ethical responsibility.
• Documented 1,000 hours of related work experience, or document at least 500 hours
of related work experience if they: have a bachelor’s degree; are credentialed by OASAS
as a CASAC, CASAC Trainee, or Prevention Professional; or completed the 30-Hour
Recovery Coach Academy training.
• Provided evidence of at least 25 hours of supervision specific to the performance
domains of advocacy, mentoring/education, recovery/wellness support, and ethical
responsibility. Supervision must be provided by an organization documented and
qualified to provide supervision per job description.
• Passed the NYCB/IC & RC Peer Advocate Exam or other exam by an OASAS designated
certifying body.
• Submitted two letters of recommendation.
• Demonstrated a minimum of 16 hours in the area of Family Support.
• Completed 20 hours of continuing education earned every two years, including six
hours of Ethics.]
[13d. Rehabilitative Services: EPSDT only (Continued):
Crisis Intervention (Continued):
Practitioner qualifications (Continued):

Certified Recovery Peer Advocate with a Family Specialty as defined in the NYS OASAS: An individual who is supervised by a credentialed or licensed clinical staff member to provide outreach and peer support services based on clinical need as identified in the patient’s treatment/recovery plan

Crisis Intervention Team Training: All members of the Crisis Intervention team are required to have training in first aid, CPR, Mandated Reporting, Crisis De-escalation, Resolution and Debriefing, Suicide Prevention (e.g. SAFETALK), and crisis plan development.

Supervisor Qualifications: The supervisor is a competent mental health professional and must provide regularly scheduled supervision for all team members including peers. The supervisor must have the qualifications of at least a Licensed Clinical Social Worker (LCSW), Licensed Mental Health Counselor, Licensed Creative Arts Therapist, Licensed Marriage and Family Therapists, Licensed Psychoanalyst, Licensed Psychologist, Physician’s Assistant, Psychiatrist, Physician, Registered Professional Nurse, or Nurse Practitioner operating within the scope of their practice, with at least 2-3 years of work experience. The supervisor must practice within the State health practice laws and ensure that providers are supervised as required under state law. For example, if a psychiatric nurse practitioner is on the team with fewer than 3,600 hours of experience, a psychiatrist must be on the team and supervise him/her. Supervisors must also be aware of and sensitive to trauma informed care and the cultural needs of the population of focus and how to best meet those needs, and be capable of training staff regarding these issues.

Provider Agency Qualifications: CI practitioners must work within agencies that possess a current license to provide crisis and/or crisis treatment services or any child serving agency or agency with children’s behavioral health and health experience that is licensed, certified, designated and/or approved by OMH, OASAS, OCFS or DOH or its designee to provide comparable and appropriate crisis services referenced in the definition.]
[13d. Rehabilitative Services: EPSDT only (Continued)
    Crisis Intervention Components:

Mental Health and Substance Abuse Services Assessment:
Description: Assessment of risk and mental status and the need for further evaluation and/or other health/behavioral health services.

Practitioner qualifications: Assessments may be provided by any member of a culturally competent, trauma-informed, and linguistically responsive multidisciplinary crisis intervention team except for a peer including: Psychiatrist, Physician, Licensed Psychoanalyst, Licensed Clinical Social Worker (LCSW), Licensed Master Social Worker (LMSW), Licensed Mental Health Counselor, Licensed Psychologist, Licensed Marriage and Family Therapist, Nurse Practitioner with experience/background in treatment mental health and/or substance use, Certified alcoholism and substance abuse counselor, Certified rehabilitation counselor, or a Registered Professional Nurse.

Service Planning:
Description: Development of a safety plan, which addresses the immediate circumstances and the prevention of future crises, and signing of appropriate releases.

Practitioner qualifications: Service Planning may be provided by any member of a culturally competent, trauma-informed, and linguistically responsive multidisciplinary crisis intervention team except for a peer including: Psychiatrist, Physician, Licensed Psychoanalyst, Licensed Clinical Social Worker (LCSW), Licensed Master Social Worker (LMSW), Licensed Mental Health Counselor, Licensed Psychologist, Licensed Marriage and Family Therapist, Nurse Practitioner with experience/background in treatment mental health and/or substance use, Certified alcoholism and substance abuse counselor, Certified rehabilitation counselor, or a Registered Professional Nurse.

Individual Counseling/Therapy
Describe: Crisis resolution and debriefing with the identified Medicaid eligible child, the child’s family/caregiver and treatment provider.

Practitioner qualifications: Individual Counseling/Therapy may be provided by any member of a culturally competent, trauma-informed, and linguistically responsive multidisciplinary crisis intervention team including: Psychiatrist, Physician, Licensed Psychoanalyst, Licensed Clinical Social Worker (LCSW), Licensed Master Social Worker (LMSW), Licensed Mental Health Counselor, Licensed Psychologist, Licensed Marriage and Family Therapist, Nurse Practitioner with experience/background in treatment mental health and/or substance use, Certified alcoholism and substance abuse counselor, Credentialed family peer advocate with lived experience as a family member, Certified Recovery Peer Advocate-Family, Certified rehabilitation counselor, or a Registered Professional Nurse.]
[13d. Rehabilitative Services: EPSDT only (Continued)
Crisis Intervention (Continued)

Family Counseling/Therapy
Describe: Crisis resolution and debriefing with the child’s family/caregiver and the treatment provider.

Practitioner qualifications: Family Counseling/Therapy may be provided by any member of a culturally competent, trauma-informed, and linguistically responsive multidisciplinary crisis intervention team including: Psychiatrist, Physician, Licensed Psychoanalyst, Licensed Clinical Social Worker (LCSW), Licensed Master Social Worker (LMSW), Licensed Mental Health Counselor, Licensed Psychologist, Licensed Marriage and Family Therapist, Nurse Practitioner with experience/background treatment mental health and/or substance use, Certified alcoholism and substance abuse counselor, Credentialed family peer advocate with lived experience as a family member, Certified Recovery Peer Advocate-Family, Certified rehabilitation counselor, or a Registered Professional Nurse.

Care Coordination:
Description: Care coordination includes:
1) Consultation with a physician or other licensed practitioner of the healing arts to assist with the child’s specific crisis and planning for future service access.
2.) It is the expectation that there will be documented follow-up.
3.) Follow-up with the child and family/caregiver within 24 hours of initial contact/response, including informing existing supports/providers of the developed crisis plan. The entity that the child is referred to conducts an evaluation/assessment for additional longer term services.

Practitioner qualifications: Care Coordination may be provided by any member of a culturally competent, trauma-informed, and linguistically responsive multidisciplinary crisis intervention team except for a peer including: Psychiatrist, Physician, Licensed Psychoanalyst, Licensed Clinical Social Worker (LCSW), Licensed Master Social Worker (LMSW), Licensed Mental Health Counselor, Licensed Psychologist, Licensed Marriage and Family Therapist, Nurse Practitioner with experience/background treatment mental health and/or substance use, Certified alcoholism and substance abuse counselor, Credentialed family peer advocate, Certified Recovery Peer Advocate-Family, Certified rehabilitation counselor, or a Registered Professional Nurse.

Peer/Family Peer Support:
Describe: Crisis resolution with the identified Medicaid eligible child, the child’s family/caregiver and the treatment provider.

Practitioner qualifications: Family Peer Support will be delivered by a New York State Credentialed Family Peer Advocate (FPA) or a Certified Recovery Peer Advocate-Family as defined above in this section.]
13d. Rehabilitative Services: EPSDT only (Continued)

Program Name: Community Psychiatric Support and Treatment (CPST)

Description: Community Psychiatric Support and Treatment (CPST) services are goal-directed supports and solution-focused interventions intended to address challenges associated with a behavioral health need and to achieve identified goals or objectives as set forth in the child's treatment plan. This includes the implementation of interventions using evidence-based techniques, drawn from cognitive-behavioral therapy and/or other evidence-based psychotherapeutic interventions approved by New York State. CPST is a face-to-face intervention with the child, family/caregiver or other collateral supports. This service is recommended by any of the following licensed practitioners of the healing arts operating within the scope of their practice under State license: Licensed Master Social Worker (LMSW), Licensed Clinical Social Worker (LCSW), Licensed Mental Health Counselor, Licensed Creative Arts Therapist, Licensed Marriage and Family Counselor, Licensed Psychoanalyst, Licensed Psychologist, Physician's Assistant, Psychiatrist, Physician, Registered Professional Nurse, or Nurse Practitioner. CPST is designed to provide community-based services to children and families who may have difficulty engaging in formal office settings, but can benefit from community based rehabilitative services. CPST allows for delivery of services within a variety of permissible settings including community locations where the child lives, works, attends school, engages in services (e.g. provider office sites), and/or socializes. Family is a birth, foster, adoptive or self-created unit of people residing together, with significant attachment to the individual, consisting of adult(s) and/or child (ren), with adult(s) performing duties of parenthood/caregiving for the child (ren) even if the individual is living outside of the home. CPST face-to-face interventions may include other collateral supports beyond the individual or family/caregiver, as necessary.

Practitioner qualifications: CPST may be provided by an individual who has at least a bachelor's degree level with a minimum of two years of applicable experience in children's mental health, addiction, and/or foster care/child welfare/juvenile justice. These practitioners may include: Registered Professional Nurses with one year of behavioral health experience, Licensed Occupational Therapists, and Licensed Creative Arts Therapists to the extent they are operating under the scope of their license.

Practitioners with a bachelor's degree may only perform the following activities under CPST: Family and Group Counseling/Therapy (Rehabilitative psychoeducation), Service Planning (Strengths-based treatment planning), or the Rehabilitative Supports portion of Individual and Group Counseling/Therapy.

Practitioners with at least a bachelor's degree level, certified in an Evidenced Based Practice consistent with the CPST component being delivered, and designated by the State OR a master's degree level in social work, psychology, or in related human services plus one year of applicable experience OR who has been certified in an Evidenced Based Practice may perform any of the activities under CPST listed above without any exclusions.

The interventions and skill building identified by the CPST practitioner and family may be implemented by the child and family with the assistance of a peer (under Peer Supports Services), Psychosocial Rehabilitation practitioner (under Psychosocial Rehabilitation Services) or the CPST practitioner, if necessary.
13d. **Rehabilitative Services: EPSDT only (Continued)**  

**Community Psychiatric Support and Treatment (CPST) Description (Continued)**  

**Practitioner Qualifications (Continued)**

**Supervisor Qualifications:** Individuals providing services under CPST must receive regularly scheduled supervision from a professional meeting the qualifications of at least a Licensed Clinical Social Worker (LCSW), Licensed Mental Health Counselor, Licensed Creative Arts Therapist, Licensed Marriage and Family Therapists, Licensed Psychoanalyst, Licensed Psychologist, Physician’s Assistant, Psychiatrist, Physician, Registered Professional Nurse, or Nurse Practitioner operating within the scope of their practice, with at least 2-3 years of work experience. Supervisors must also be aware of and sensitive to trauma informed care and the cultural needs of the population of focus and how to best meet those needs, and be capable of training staff regarding these issues.

**Provider Agency Qualifications:** Any child serving agency or agency with children’s behavioral health and health experience that is licensed, certified, designated and/or approved by OCFS, OMH, OASAS or DOH or its designee, to provide comparable services referenced in the definition.

The provider agency will assess the child prior to developing a treatment plan for the child. Authorization of the treatment plan is required by the DOH or its designee. Treatment services must be part of a treatment plan including goals and activities necessary to correct or ameliorate conditions discovered during the initial assessment visits. CPST service delivery may also include collateral contact. Evidence-based practices (EBPs) require approval, designations, and fidelity reviews on an ongoing basis as determined necessary by New York State.

**Service Planning (Strengths-based treatment planning):**

**Description:** Strengths-based treatment planning - Facilitate participation in and utilization of strengths-based planning for Medicaid services and treatments related to child’s behavioral health/health needs which include assisting the child and family members, caregiver or other collateral supports with identifying strengths and needs, resources, natural supports, within the context of the client’s culture and developing goals and objectives to utilize personal strengths, resources, and natural supports to address functional deficits associated with their behavioral health disorder.

**Practitioner Qualifications:** Strengths-based treatment planning may be provided by an individual who has at least a bachelor's degree level with a minimum of two years of applicable experience in children’s mental health, addiction, and/or foster care/child welfare/juvenile justice OR At least a bachelor's degree level, certified in an Evidenced Based Practice consistent with the CPST component being delivered, and designated by the State OR A master's degree level in social work, psychology, or in related human services plus one year of applicable experience OR who has been certified in an Evidenced Based Practice.
13d. Rehabilitative Services: EPSDT only (Continued)
Program Name: Community Psychiatric Support and Treatment (CPST) (Continued):

**Individual Counseling/Therapy (Intensive Interventions):**
*Description:* Intensive Interventions - Provide individual supportive treatment and counseling; solution-focused interventions consistent with cognitive behavior therapy and psycho-educational therapy; harm reduction; emotional, cognitive and behavioral management; and problem behavior analysis with the child and family/caregiver, with the goal of assisting the child with social, interpersonal, self-care, daily functioning, and independent living skills to restore stability, to support functional gains and to adapt to community living. This includes the implementation of interventions using evidence-based techniques, drawn from cognitive-behavioral therapy and/or other evidence based psychotherapeutic interventions with prior authorization from NYS that ameliorate targeted symptoms and/or recover the person’s capacity to cope with or prevent symptom manifestation.

**Individual Counseling/Therapy (Crisis Avoidance):**
*Description:* Crisis Avoidance - Assist the child and family/caregiver with effectively responding to or preventing identified precursors or triggers that would risk their ability to remain in a natural community location, including assisting the child and family members, caregivers or other collateral supports with identifying a potential psychiatric or personal crisis; practicing de-escalation skills; developing a crisis management plan; assessing the step-by-step plan before a crisis occurs; developing strategies to take medication regularly; and seeking other supports to restore stability and functioning.

**Individual Counseling/Therapy (Rehabilitative Supports):**
*Description:* Rehabilitative Supports - Restoration, rehabilitation, and support to minimize the negative effects of behavioral health symptoms or emotional disturbances that interfere with the individual's daily functioning. Counseling helps restore life safety skills such as ability to access emergency services, basic safety practices and evacuation, physical and behavioral health care (maintenance, scheduling physicians appointments) recognizing when to contact a physician, self-administration of medication for physical and mental health or substance use disorder conditions, understanding purpose and possible side effects of medication prescribed for conditions, other common prescription and non-prescription drugs and drug uses. Group face-to-face counseling may occur in rehabilitative supports.

**Practitioner qualifications:**
Rehabilitative Supports components of Individual Counseling/Therapy may be provided by an individual who has at least a bachelor’s degree level with a minimum of two years of applicable experience in children’s mental health, addiction, and/or foster care/child welfare/ juvenile justice OR at least a bachelor’s degree level, certified in an Evidenced Based Practice consistent with the CPST component being delivered, and designated by the State OR a master’s degree level in social work, psychology, or in related human services plus one year of applicable experience OR who has been certified in an Evidenced Based Practice.

TN #19-0003 Approval Date 02/07/2019
Supersedes TN __ #18-0053 Effective Date 01/01/2019
13d. **Rehabilitative Services: EPSDT only (Continued)**

Community Psychiatric Support and Treatment (CPST) (Continued):

CPST Components (Continued):

**Individual, family and Group Counseling/Therapy (Rehabilitative Supports) (Continued):**

**Practitioner Qualifications (Continued):**

Intensive Interventions and Crisis avoidance may only be performed by practitioners who have at least a bachelor's degree level, certified in an Evidenced Based Practice consistent with the CPST component being delivered, and designated by the State OR a master's degree level in social work, psychology, or in related human services plus one year of applicable experience OR who has been certified in an Evidenced Based Practice.

**Family and Group Counseling/Therapy (Rehabilitative psychoeducation):**

**Description:** Rehabilitative psychoeducation - Assist the child and family members, caregivers or other collateral supports to identify appropriate strategies or treatment options for the child's behavioral health needs, with the goal of minimizing the negative effects of mental illness symptoms or emotional disturbances, substance use or associated behavioral health stressors that interfere with the child's life.

**Practitioner qualifications:** Rehabilitative psychoeducation may be provided by an individual who has at least a bachelor's degree level with a minimum of two years of applicable experience in children's mental health, addiction, and/or foster care/child welfare/juvenile justice OR At least a bachelor's degree level, certified in an Evidenced Based Practice consistent with the CPST component being delivered, and designated by the State OR a master's degree level in social work, psychology, or in related human services plus one year of applicable experience OR who has been certified in an Evidenced Based Practice.

**Family and Group Counseling/Therapy (Rehabilitative supports in the community):**

**Description:** Rehabilitative supports in the community - Provide restoration, rehabilitation, and support to the child and family members, caregivers or other collateral supports to develop skills necessary to meet the child's goals and to sustain the identified community goals.

**Practitioner qualifications:** Rehabilitative supports in the community may be provided by an individual with at least a bachelor's degree level, certified in an Evidenced Based Practice consistent with the CPST component being delivered, and designated by the State OR a master's degree level in social work, psychology, or in related human services plus one year of applicable experience OR who has been certified in an Evidenced Based Practice.
13d. **Rehabilitative Services: EPSDT only (Continued)**

**Community Psychiatric Support and Treatment (CPST) (Continued):**

**CPST Components (Continued):**

**Crisis Intervention (Intermediate term crisis management):**

**Description:** Intermediate term crisis management - Provide intermediate-term crisis management to the child and family following a crisis (beyond 72 hour period) as stated in the crisis management plan. The purpose of this activity is to stabilize the child/youth in the home and natural environment. Goal setting is focused upon the issues identified from crisis intervention, emergency room crisis and other referral. The service is intended to be stability focused and for existing clients of CPST services or for children needing longer term crisis managements services.

**Practitioner qualifications:** Intermediate term crisis management may be provided by an individual who has at least a bachelor's degree level, certified in an Evidenced Based Practice consistent with the CPST component being delivered, and designated by the State OR a master's degree level in social work, psychology, or in related human services plus one year of applicable experience OR who has been certified in an Evidenced Based Practice.

**Rehabilitative Services: EPSDT only**

**Program Name: Psychosocial Rehabilitation**

**Description:** Psychosocial Rehabilitation Services (PSR) are designed for children and their families to assist with implementing interventions outlined on a treatment plan to compensate for or eliminate functional deficits and interpersonal and/or behavioral health barriers associated with a child/youth's behavioral health needs. The intent of PSR is to restore, rehabilitate, and support a child/youth’s functional level as possible and as necessary for integration of the child/youth as an active and productive member of their community and family with minimal ongoing professional intervention. PSR can occur in a variety of settings including community locations where the child/youth lives, works, attends school, engages in services (e.g. provider office sites), and/or socializes. Family is a birth, foster, adoptive, or self-created unit of people residing together, with significant attachment to the individual, consisting of adult(s) and/or child(ren), with adult(s) performing duties of parenthood/caregiving for the child(ren) even if the individual is living outside of the home.

Activities included must be intended to achieve the identified goals or objectives as set forth in the child/youth individualized treatment plan. PSR is an individual or group face-to-face intervention and may include collateral contact. PSR is recommended by any of the following licensed practitioners of the healing arts operating within the scope of their practice under State license: Licensed Master Social Worker (LMSW), Licensed Clinical Social Worker (LCSW), Licensed Mental Health Counselor, Licensed Creative Arts Therapist, Licensed Marriage and Family Therapist, Licensed Psychoanalyst, Licensed Psychologist, Physician's Assistant, Psychiatrist, Physician, Registered Professional Nurse, or Nurse Practitioner.
13d. **Rehabilitative Services: EPSDT only (Continued)**  
**Psychosocial Rehabilitation (Continued)**

**Description (Continued):**

The professional uses partnerships and mutual support, as well as hands-on implementation of rehabilitation interventions to improve personal independence and autonomy including:

1) **Restoration, rehabilitation and support to reduce the effect of the child’s behavioral health diagnosis and re-establish social and interpersonal skills to increase community tenure, enhance personal relationships, establish support networks, increase community awareness, develop coping strategies and effective functioning in the individual’s social environment, including home, work and school.** This includes learning to confidently manage stress, unexpected daily events and disruptions, and behavioral health and physical health symptoms. It also includes support to establish and maintain friendships/supportive social networks, improve interpersonal skills such as social etiquette and anger management.

2) **Restoration, rehabilitation and support to reduce the effect of the child’s diagnosis and re-establish daily functioning skills to improve self-management of the negative effects of psychiatric or emotional symptoms that interfere with a person’s daily functioning.** This includes supporting the individual with implementation of interventions to re-establish daily functioning skills and daily routines necessary to remain in home, school, work and community, including managing medications and learning self-care. It also includes development of constructive and comfortable interactions with healthcare professionals, develop relapse prevention strategies, and re-establishing good health routines and practices.

3) **Restoration, rehabilitation and support to reduce the effect of the child’s diagnosis and re-establish social skills so that the person can remain in a natural community location and re-achieve developmentally appropriate functioning including using collaboration, partnerships and mutual supports to strengthen the individual’s community integration in areas of personal interests as well as other domains of community life including home, work and school.** This includes assisting the individual with generalizing coping strategies and social and interpersonal skills in community settings. The professional may assist the individual with effectively responding to or avoiding identified precursors or triggers that result in functional impairments.

**Practitioner Qualifications:** Must be 18 years old and have a high school diploma, high school equivalency preferred, or a State Education Commencement Credential (e.g. SACC or CDOS); with a minimum of three years’ experience in children’s mental health, addiction and/or foster care.
13d. **Rehabilitative Services: EPSDT only (Continued)**

**Psychosocial Rehabilitation (Continued):**

**Description (Continued):**

**Supervisor Qualifications:**
The PSR provider must receive regularly scheduled supervision from a Licensed Clinical Social Worker (LCSW), Licensed Mental Health Counselor, Licensed Creative Arts Therapist, Licensed Marriage and Family Therapist, Licensed Psychoanalyst, Licensed Psychologist, Physician’s Assistant, Psychiatrist, Physician, Registered Professional Nurse, or Nurse Practitioner operating within the scope of their practice. Supervisors must also be aware of and sensitive to trauma informed care and the cultural needs of the population of focus and how to best meet those needs, and be capable of training staff regarding these issues.

**Provider Agency qualifications:** Any child serving agency or agency with children’s behavioral health and health experience that is licensed, certified, designated and/or approved by OCFS, OMH, OASAS OR DOH or its designee, to provide comparable services referenced in the definition. The caseload size must be based on the needs of the child/youth and families with an emphasis on successful outcomes and individual satisfaction and must meet the needs identified in the individual treatment plan.

The provider agency will assess the child prior to developing a treatment plan for the child. A licensed CPST practitioner or OLP must develop the treatment plan, with the PSR worker implementing the interventions identified on the services/plan. Group should not exceed more than 8 members. Authorization of the treatment plan is required by the DOH or its designee. Treatment services must be part of a treatment plan including goals and activities necessary to correct or ameliorate conditions discovered during the initial assessment visits.
Youth Peer Support and Training is recommended by any following licensed practitioners of the healing arts operating within the scope of their practice under State license: a Licensed Master Social Worker (LMSW), Licensed Clinical Social Worker (LCSW), Licensed Mental Health Counselor, Licensed Creative Arts Therapist, Licensed Marriage and Family Therapist, Licensed Psychoanalyst, Licensed Psychologist, Physician’s Assistant, Psychiatrist, Physician, Registered Professional Nurse, Nurse Practitioner, operating within the scope of their practice with the youth, family/caregiver or other collateral supports. Activities may include: Restoration, rehabilitation, and support to develop skills for coping with and managing psychiatric symptoms, trauma and substance use disorders; promote skills for wellness and recovery support; develop skills to independently navigate the service systems; develop skills to set goals; and build community living skills. To enhance resiliency/recovery-oriented attitudes such as hope, confidence and self-efficacy; Self-Advocacy & Empowerment skill building to develop, link to and facilitate the use of formal and informal resources, including connection to peer support groups in the community; serve as an advocate, mentor or facilitator for resolution of issues; and, assist in navigating the service system including assisting with engagement and bridging during transitions in care.

Practitioner qualifications:
YPST is delivered by a New York State Credentialed Youth Peer Advocate. To be eligible for the Youth Peer Advocate Professional Credential, an individual must:

- Be an individual 18 to 30 years who has self-identified as a person who has first-hand experience with social, emotional, medical, developmental, substance use, and/or behavioral challenges.
- Have a high school diploma, high school equivalency preferred or a State Education Commencement Credential (e.g. SACC or CDOS). This educational requirement can be waived by the credentialing agency if the person has demonstrated competencies and has relevant life experience sufficient for the youth peer-credential.
- Completed Level One (online) and Level Two (online and in person) training of the Youth Peer Support Services Advisory Council recommended and State approved training for YPAs followed by a minimum of three consultation calls.
- Submitted three letters of reference attesting to proficiency in and suitability for the role of a YPA including one from YPAs supervisor.
- Agree to practice according to the Youth Peer Advocate Code of Ethics.
- Documented 600 hours of experience providing Youth Peer Support services.
- Completed 20 hours of continuing education every 2 years.
- Demonstrates qualities of leadership, including: Knowledge of advocacy and group development and/or facilitation of peer-to-peer groups or activities.
- Is able to use lived experience with a disability, mental illness, juvenile justice, special education, substance use disorder, and/or foster care to assist in supporting youth in their resiliency/recovery and wellness.
- Be supervised by a credentialed YPA OR a credentialed Family Peer Advocate, both with four years direct service experience OR an individual who meets the criteria for a "qualified mental health staff person" found in 14 NYCRR 594 or 14 NYCRR 595.
[13d. Rehabilitative Services: EPSDT only (Continued)
Youth Peer Support and Training (Continued):
Practitioner qualifications (Continued):

A YPA may obtain a provisional credential that will allow services they provide to be billed if the applicant:

• Is an individual 18 to 30 years who has self-identified as a person who has first-hand experience with social, emotional, medical, developmental, substance use, and/or behavioral challenges.
• Has a high school diploma, high school equivalency preferred or a State Education Commencement Credential (e.g. SACC or CDOS). This educational credential can be waived by the certifying agency if the person has demonstrated competencies and has relevant life experience sufficient for the peer certification.
• Has completed Level One of the Youth Peer Support Services Advisory Council recommended and State approved training for YPAs.
• Demonstrates qualities of leadership, including: Knowledge of advocacy and group development and/or facilitation of peer-to-peer groups or activities.
• Is able to use lived experience with a mental illness, juvenile justice, special education, substance use disorder, and/or foster care to assist in supporting youth in their resiliency/recovery and wellness.
• Submits two letters of reference attesting to proficiency in and suitability for the role of an YPA.
• Be supervised by a credentialed YPA OR a credentialed FPA, both with four years direct service experience OR an individual who meets the criteria for a "qualified mental health staff person" found in 14 NYCRR 594 or 14 NYCRR 595. Refer to Supervisor Qualifications for specificity.
• Agree to practice according to the YPA Code of Ethics.

A YPA with a provisional credential must complete all other requirements of the professional credential within 18 months of employment as an YPA OR a Certified Recovery Peer Advocate - Youth who is an individual 18 to 30 years of age and has:

• Lived experience defined as having been impacted or affected by substance use disorders and/or be in recovery from substance use disorders.
• Has a high school diploma, high school equivalency preferred or a State Education Commencement Credential (e.g. SACC or CDOS).
• Completed a minimum of 46 hours content specific training, covering topics of advocacy, mentoring/education, recovery/wellness support and ethical responsibility.
• Documented 1,000 hours of relative work experience or document at least 500 hours of related work experience if they:
  • Have a Bachelor’s Degree, is certified by OASAS as a CASAC or CASAC trainee or Prevention Professional or completed the 30 hour Recovery Coach Academy training.]
[13d. Rehabilitative Services: EPSDT only (Continued):
Youth Peer Support and Training (Continued):

A YPA with a provisional credential must complete all other requirements of the professional credential within 18 months of employment as an YPA OR a Certified Recovery Peer Advocate – Youth who is an individual 18 to 30 years of age and has:

(Continued)

• Provided evidence of at least 25 hours of supervision specific to the performance domains of advocacy, mentoring/education, recovery/wellness and ethical responsibility. Supervision must be provided by an organization documented and qualified to provide supervision per job description.
• Passed the NYCB/IC & RC Peer Advocate exam or other exam by an OASAS designated certifying body.
• Submitted two letters of recommendations.
• Demonstrated a minimum of 16 hours specifically related to Youth Peer Support.
• Completed 20 hours of continuing education earned every two years, including 6 hours of ethics.

**Supervisor Qualifications:** YPAs will be supervised by:

1) A credentialed YPA with four years of direct YPST service experience with access to clinical consultation as needed. The clinical supervision may be provided by a staff member or through a contract with another organization OR
2) A credentialed FPA with 4 years of experience providing FPSS that has been trained in YPST services and the role of the YPAs and efforts are made as the YPST service gains maturity in NYS to transition to supervision by an experienced credentialed YPAs within the organization.
3) A qualified “mental health staff person” found in 14 NYCRR 594 or 14 NYCRR 595 that has training in YPST services and the role of YPAs and efforts are made as the YPST service gains maturity in NYS to transition to supervision by an experienced credentialed YPA within the organization.

Additional Supervisor Qualifications:

• The individual providing consultation, guidance, mentoring, and on-going training need not be employed by the same agency.
• Supervision of these activities may be delivered in person or by distance communication methods.
• It is required that one hour of supervision be delivered for every 40 hours of Peer Support and Training duties performed.
• There may be an administrative supervisor who signs the youth peer specialist’s timesheet and is the primary contact on other related human resource management issues.
• Supervisors must also be aware of and sensitive to the cultural needs of the population of focus and how to best meet those needs, and be capable of training staff regarding these issues.]
[13d. Rehabilitative Services: EPSDT only (Continued):
Youth Peer Support and Training (Continued):

Provider Agency Qualifications: Any child serving agency or agency with children’s behavioral health and health experience that is licensed, certified, designated and/or approved by OCFS, OMH, OASAS OR DOH or its designee, to provide comparable services referenced in the definition.

The provider agency will assess the child prior to developing a treatment plan for the child. Authorization of the treatment plan is required by the DOH or its designee. Treatment services must be part of a treatment plan including goals and activities necessary to correct or ameliorate conditions discovered during the initial assessment visits. Group should not exceed more than 8 members. Medicaid family support programs will not reimburse for the following:

- 12-step programs run by peers.
- General outreach and education including participation in health fairs, and other activities designed to increase the number of individuals served or the number of services received by individuals accessing services; community education services, such as health presentations to community groups, PTA's, etc.
- Contacts that are not medically necessary.
- Time spent doing, attending, or participating in recreational activities.
- Services provided to teach academic subjects or as a substitute for educational personnel such as, but not limited to, a teacher, teacher’s aide, or an academic tutor.
- Time spent attending school (e.g. during a day treatment program).
- Habilitative services for the beneficiary (child) to acquire self-help, socialization, and adaptive skills necessary to reside successfully in community settings.
- Child Care services or services provided as a substitute for the parent or other individuals responsible for providing care and supervision.
- Respite care.
- Transportation for the beneficiary or family. Services provided in the car are considered transportation and time may not be billed under rehabilitation.
- Services not identified on the beneficiary’s authorized treatment plan.
- Services not in compliance with the service manual and not in compliance with State Medicaid standards.
- Services provided to children, spouse, parents, or siblings of the eligible beneficiary under treatment or others in the eligible beneficiary’s life to address problems not directly related to the eligible beneficiary’s issues and not listed on the eligible beneficiary’s treatment plan.
- Any intervention or contact not documented or consistent with the approved treatment plan/recovery plan goals, objectives, and approved services will not be reimbursed.]

Supersedes TN #17-0004
Approval Date December 17, 2018
Effective Date July 01, 2018
13d. **Rehabilitative Services: EPSDT only (Continued):**

**Family Peer Support:**

**Description:** Family Peer Support Services (FPSS) are an array of formal and informal activities and supports provided to families caring for/raising a child who is experiencing social, emotional, medical, developmental, substance use and/or behavioral challenges in their home, school, placement, and/or community. FPSS provide a structured, strength-based relationship between a Family Peer Advocate (FPA) and the parent/family member/caregiver for the benefit of the child/youth. Family is defined as the primary care-giving unit and is inclusive of the wide diversity of primary caregiving units in our culture. Family is a birth, foster, adoptive, or self-created unit of people residing together, with significant attachment to the individual, consisting of adult(s) and/or child(ren), with adult(s) performing duties of parenthood/caregiving for the child(ren) even if the individual is living outside of the home.

Activities included must be intended to achieve the identified goals or objectives as set forth in the child/youth’s treatment plan. FPSS is a face-to-face intervention, a group face-to-face intervention. A group is a composition of members should share common characteristics, such as related experiences, developmental age, chronological age, challenges or treatment goals. The Service is directed to the child, and includes contacts necessary for treatment with the family/caregiver or other collateral supports. FPSS is recommended by a licensed practitioner of the healing arts including: Licensed Master Social Worker (LMSW), Licensed Clinical Social Worker (LCSW), Licensed Mental Health Counselor, Licensed Creative Arts Therapist, Licensed Marriage and Family Therapist, Licensed Psychoanalyst, Licensed Psychologist, Physician’s Assistant, Psychiatrist, Physician, Registered Professional Nurse, or Nurse Practitioner, operating within the scope of their practice. FPSS can be provided through individual and group face-to-face work and can occur in a variety of settings including community locations where the beneficiary lives, works, attends school, engages in services (e.g. provider office sites), and/or socializes. Components of FPSS include:

- **Engagement, Bridging and Transition Support:** Provide a bridge between families and service providers, support a productive and respectful partnership by assisting the families to express their strengths, needs and goals.
- **Self-Advocacy, Self-Efficacy and Empowerment:** Coach and model shared decision-making and skills that support collaboration, in addition to providing opportunities for families to self-advocate.
- **Parent Skill Development:** Support the efforts of families in caring for and strengthening their children’s mental, and physical health, development and well-being.
- **Community Connections and Natural Supports:** Enhance the quality of life by supporting the integration of families into their own communities.
13d. Rehabilitative Services: EPSDT only (Continued):
Family Peer Support (Continued):

**Practitioner qualifications:** Family Peer Support will be delivered by a New York State Credentialed Family Peer Advocate (FPA); FPA with a provisional credential; or a Certified Recovery Peer Advocate (CRPA) with a Family Specialty.

- **FPA Credential:** To be eligible for the FPA Credential, the individual must:
  - Demonstrate ‘lived experience’ as a parent or primary caregiver who has navigated multiple child serving systems on behalf of their child(ren) with social, emotional, developmental, health and/or behavioral healthcare needs.
  - Have a high school diploma, high school equivalency preferred or a State Education Commencement Credential (e.g. SACC or CDOS). This educational requirement can be waived by the State if the person has demonstrated competencies and has relevant life experience sufficient for the peer credential.
  - Completed Level One and Level Two of the Parent Empowerment Program Training for Family Peer Advocates approved comparable training.
  - Submitted three letters of reference attesting to proficiency in and suitability for the role of a Family Peer Advocate (FPA) including one from the FPAs supervisor.
  - Documented 1000 hours of experience providing Family Peer Support services.
  - Agreed to practice according to the Family Peer Advocate Code of Ethics.
  - Completed 20 hours of continuing education and renew their FPA certification every two years.

- **A provisional FPA credential:**
  - Demonstrated ‘lived experience’ as a parent or primary caregiver who has navigated multiple child serving systems on behalf of their child(ren) with social, emotional, developmental, health and/or behavioral healthcare needs.
  - A high school diploma, high school equivalency preferred or a State Education Commencement Credential (e.g. SACC or CDOS). This educational requirement can be waived by the State if the person has demonstrated competencies and has relevant life experience sufficient for the peer certification.
  - Completed Level One of the Parent Empowerment Program Training for Family Peer Advocates or approved comparable training.
  - Submitted two letters of reference attesting to proficiency in and suitability for the role of a Family Peer Advocate (FPA). The provisional FPA must complete all other requirements of the Professional Family Peer Advocate Credential within 18 months of commencing employment as an FPA.
  - Agreed to practice according to the Family Peer Advocate Code of Ethics.
13d. Rehabilitation Services: EPSDT only (Continued):

Family Peer Support (Continued):

Certified Recovery Peer Advocate (CRPA) with a Family Specialty:

To be certified as CPRA-Family, the individual must be at least 18 years of age and have the following:

- Have ‘lived experience’ as a family member impacted by youth substance use disorders. The CRPA – Family may be in recovery themselves.
- Have a high school diploma or a State Education Commencement Credential or General Equivalency Degree (GED).
- Completed a minimum of 46 hours of content specific training, covering the topics: advocacy, mentoring/education, recovery/wellness support and ethical responsibility.
- Documented 1,000 hours of related work experience, or document at least 500 hours of related work experience if they: Have a Bachelor's Degree; Are certified by OASAS as a CASAC, CASAC Trainee, or Prevention Professional; or Completed the 30-Hour Recovery Coach Academy training.
- Provide evidence of at least 25 hours of supervision specific to the performance domains of advocacy, mentoring/education, recovery/wellness support, and ethical responsibility. Supervision must be provided by an organization documented and qualified to provide supervision per job description.
- Pass the NYCB/IC & RC Peer Advocate Exam or other exam by an OASAS designated certifying body.
- Submitted two letters of recommendation.
- Demonstrated a minimum of 16 hours in the area of Family Support.
- Completed 20 hours of continuing education earned every two years, including 6 hours of Ethics.

Certified Recovery Peer Advocate with a Family Specialty as defined in the NYS OASAS: An individual who is supervised by a credentialed or licensed clinical staff member to provide outreach and peer support services based on clinical need as identified in the patient’s treatment/recovery plan.

Supervisor Qualifications: FPAs will be supervised by:

1) Individuals who have a minimum of 4 years’ experience providing FPSS services, at least 1 year of which is as a credentialed FPA with access to clinical consultation as needed. The clinical consultation may be provided by a staff member or through a contract OR
2) A “qualified mental health staff person” with a) training in FPSS and the role of FPAs b) efforts are made as the FPSS service gains maturity in NYS to transition to supervision by experienced credentialed FPA within the organization OR
3) From a competent behavioral health professional meeting the criteria for a "qualified mental health staff person" found in 14 NYCRR 594 or 14 NYCRR 595 OR
4) A Certified Alcohol and Substance Abuse Counselor (CASAC) working within an OASAS certified program.
13d. **Rehabilitative Services: EPSDT only (Continued):**

*Family Peer Support (Continued):*

**Supervisor Qualifications: (Continued)** The individual providing consultation, guidance, mentoring, and on-going training need not be employed by the same agency. Supervision of these activities may be delivered in person or by distance communication methods. It is the expectation that 1 hour of supervision be delivered for every 40 hours of Family Peer Support Services duties performed. There may be an administrative supervisor who signs the family peer specialist’s timesheet and is the primary contact on other related human resource management issues.

**Provider Agency Qualifications:** Any practitioner providing behavioral health services must operate within an agency licensed, certified, designated and/or approved by Any child serving agency or agency with children’s behavioral health and health experience that is licensed, certified, designated and/or approved by OCFS, OMH, OASAS OR DOH or its designee, to provide comparable services referenced in the definition.

The provider agency will assess the child prior to developing a treatment plan for the child. Authorization of the treatment plan is required by the DOH or its designee. Treatment services must be part of a treatment plan including goals and activities necessary to correct or ameliorate conditions discovered during the initial assessment visits. A group is composed may not exceed more than 12 individuals total. Medicaid family support programs will not reimburse for the following:

- 12-step programs run by peers.
- General outreach and education including participation in health fairs, and other activities designed to increase the number of individuals served or the number of services received by individuals accessing services; community education services, such as health presentations to community groups, PTA’s, etc.
- Contacts that are not medically necessary.
- Time spent doing, attending, or participating in recreational activities.
- Services provided to teach academic subjects or as a substitute for educational personnel such as, but not limited to, a teacher, teacher's aide, or an academic tutor.
- Time spent attending school (e.g. during a day treatment program).
- Habilitative services for the beneficiary (child) to acquire self-help, socialization, and adaptive skills necessary to reside successfully in community settings.
- Child Care services or services provided as a substitute for the parent or other individuals responsible for providing care and supervision.
- Respite care.
- Transportation for the beneficiary or family. Services provided in the car are considered transportation and time may not be billed under rehabilitation.
- Services not identified on the beneficiary’s authorized treatment plan.
- Services not in compliance with the service manual and not in compliance with State Medicaid standards.

**TN #19-0003**

**Supersedes TN__ #18-0053**

**Approval Date 02/07/2019**

**Effective Date 01/01/2019**
Limitations:

- Services provided to children, spouse, parents, or siblings of the eligible beneficiary under treatment or others in the eligible beneficiary’s life to address problems not directly related to the eligible beneficiary’s issues and not listed on the eligible beneficiary’s treatment plan.
- Any intervention or contact not documented or consistent with the approved treatment plan/recovery plan goals, objectives, and approved services will not be reimbursed.
Rehabilitative Services (Continued)

Directly Observed Therapy (DOT)

Directly Observed Therapy for Tuberculosis (TB/DOT) is the direct observation of oral ingestion of tuberculosis medications to assure patient adherence and tolerance with the prescribed medication regimen. Directly observed therapy is the standard of care for every individual with active tuberculosis and for some persons on treatment for latent TB infection. TB/DOT may be provided on an outpatient basis in a community setting (including the home) or on an inpatient basis.

Services

Outpatient TB/DOT involves the administering of medication and observation thereof, assessing any adverse reactions to the medications, and case follow up.

Providers

Servicing providers for TB/DOT include New York State licensed and registered professionals acting within their scope of practice: nurses (both Licensed Practical Nurses (LPN) and Registered Professional Nurses (RN)), nurse practitioners, physician assistants, and physicians, as well as non-licensed individuals specially trained to do DOT.
13d. Rehabilitative Services

Other Diagnostic, Screening, Preventive, and Rehabilitative Services
1905(a)(13); 42 CFR 440.130(d)

The State provides coverage for Outpatient and Residential Addiction Rehabilitative Services as defined at 42 CFR 440.130(d) and in this section. The State assures that all rehabilitative services are provided to, or directed exclusively toward the treatment of, the Medicaid eligible individual in accordance with section 1902(a)(10)(A)(i) of the Act. The State assures that rehabilitative services do not include and FFP is not available for any of the following in accordance with section 1905(a)(13) of the Act.

a. educational, vocational and job training services;
b. room and board;
c. habilitation services;
d. services to inmates in public institutions as defined in 42 CFR §435.1010;
e. services to individuals residing in institutions for mental diseases as described in 42 CFR§435.1010;
f. recreational and social activities; and
g. services that must be covered elsewhere in the state Medicaid plan.

Outpatient Addiction Rehabilitative Services

Outpatient addiction services include individual-centered activities consistent with the individual's assessed treatment needs with a rehabilitation and recovery focus designed to promote skills for coping with and managing symptoms and behaviors associated with substance use disorders. These activities are designed to help individuals achieve and maintain recovery from Addictions. Services should address an individual's major lifestyle, attitudinal, and behavioral problems that have the potential to undermine the goals of treatment. Face-to-face interventions may include other collateral supports beyond the individual or family/caregiver, as necessary.

Outpatient addiction services are delivered on an individual or group basis in a wide variety of settings including provider offices, in the community or in the individual's place of residence. These outpatient addiction services may be provided on site or on a mobile basis as defined by the New York State Office of Alcoholism and Substance Abuse Services (OASAS). Addiction services may not be provided in inpatient or outpatient hospital settings. The setting in which the service is provided will be determined by the identified goal to be achieved in the individual's written treatment plan.

Outpatient services are individualized interventions which may include more intensive treatment any time during the day or week, essential skill restoration and counseling services, and rehabilitation skill-building when the client has an inadequate social support system to provide the emotional and social support necessary for recovery, physical health care needs or substantial deficits in functional skills. Medication-assisted therapies (MAT) should only be utilized when a client has an established opiate or alcohol dependence condition that is clinically appropriate for MAT. Opioid treatment includes the dispensing of medication and all needed counseling services including a maintenance phase of treatment for as long as medically necessary. Reimbursement for the medication is covered under the Medicaid pharmacy benefit.
Provider Qualifications:
Services are provided by licensed and unlicensed professional staff, who are at least 18 years of age with a high school or equivalent diploma, according to their areas of competence as determined by degree, required levels of experience as defined by state law and regulations and OASAS approved guidelines and certifications. All outpatient Addiction agencies are licensed or certified under state law.

Licensed practitioners are licensed by the New York State Department of Education and include licensed master social workers (LMSWs), licensed clinical social workers (LCSWs), licensed mental health counselors (LMHCs), licensed marriage and family therapists (LMFTs), licensed psychoanalysts; registered nurses (RNs); licensed creative arts therapists, physician assistants (PAs), licensed practical nurses (LPNs); nurse practitioners (NPs); physicians and psychologists. Only physicians, Psychiatrists, nurse practitioners, physician assistants, and registered nurses may provide medication management functions as permitted under state law with any supervision required. All agencies with MAT interventions must comply with federal and state laws regarding controlled substance prescriber availability. Reimbursement for the medication is covered under the Medicaid pharmacy benefit.

Any staff who is unlicensed and providing addiction services must be credentialed by OASAS as a credentialed alcoholism and substance abuse counselor (CASAC); a credentialed alcoholism and substance abuse counselor – trainee (CASAC-T); Certified Recovery Peer Advocate (CRPA); or be under the supervision of a qualified health professional (QHP).

State regulations require supervision of CASAC-T, Certified Recovery Peer Advocate and non-credentialed counselors by a QHP, meeting the supervisory standards established by OASAS. A QHP includes the following professionals who are currently licensed by the New York State Department of Education or credentialed by OASAS: Credentialed Alcoholism and Substance Abuse Counselor (CASAC); LMSW; LCSW; NP; occupational therapist (OT); physician; physician assistants; RN; psychologist; rehabilitation counselor certified by the Commission of Rehabilitation Counselor Certification; a therapeutic recreation specialist who holds a baccalaureate degree in a field allied to therapeutic recreation and, either before or after receiving such degree, has five years of full-time, paid work experience in an activities program in a health care setting or an equivalent combination of advanced training, specialized therapeutic recreation education and experience, or is a recreational therapist certified by the National Council on Therapeutic Recreation or the American Therapeutic Recreation Association; licensed marriage and family therapists (LMFTs); a licensed mental health counselor licensed by the New York State Education Department (Title VIII, Article 163); and a counselor certified by and currently registered as such with the National Board of Certified Counselors. The QHP provides clinical/administrative oversight and supervision of non-credentialed staff as permitted under the statutory and/or regulatory scopes of practice. All the stated above requirements for certified and credentialed practitioners are overseen and/or coordinated by OASAS.
CASAC must be at least 18 years of age; have earned at least a high school diploma or a General Equivalency Diploma (GED); and reside or work in New York State at least 51 percent of the period during which their application is being processed to be issued a credential. In addition, a CASAC must:

1. provide three references attesting to the attainment of specific competency and ethical conduct requirements;

2. document a minimum of 6,000 hours of supervised, full-time equivalent experience in an approved OASAS work setting or substitute a) a Master's Degree in a Human Services field for 4,000 hours experience; b) a Bachelor's Degree in a Human Services field for 2,000 hours experience; c) an Associate's Degree in a Human Services field for 1,000 hours experience;

3. meet minimum education and training requirements including a minimum of 350 hours which address the full range of knowledge, skills and professional techniques related to chemical dependence counseling. *Note: A formal internship or formal field placement may be claimed as work experience OR education and training, but not both. Work experience claimed may not include any experience gained as part of, or required under, participation as a patient in a formal alcoholism and/or substance abuse or problem gambling treatment/aftercare program and/or plan and*

4. pass the International Certification and Reciprocity Consortium (IC&RC) examination for Alcohol and Drug Counselors. The International Certification & Reciprocity Consortium (IC&RC) examination for Alcohol and Drug Counselors is comprised of 150 multiple-choice questions derived from the counselor tasks identified in the IC&RC Candidate Guide.

Credentialed Alcoholism and Substance Abuse Counselor (CASAC-T) Trainee must be at least 18 years of age; have earned at least a high school diploma or a General Equivalency Diploma (GED); and reside or work in New York State at least 51 percent of the period during which their application is being processed to be issued a credential. Applicants may be considered for a CASAC Trainee certificate upon satisfying a minimum of:

- 350 hours of the required education and training; OR
- 4,000 hours of appropriate work experience and the 85 clock hours in Section 1 of the education and training related to knowledge of alcoholism and substance abuse.

The CASAC Trainee certificate is effective from the date that any of the above eligibility requirements are approved until the end of the five-year period that the application is active. The CASAC Trainee certificate is not renewable. However, if the CASAC-T is an examination candidate when the CASAC Trainee certificate expires, a three year extension may be requested.
Certified Recovery Peer Advocate (CPRA) as defined in the NYS OASAS regulations is:

- An individual who is supervised by a credentialed or licensed clinical staff member as identified in the patient’s treatment/recovery plan working under the direction of a certified agency.
- CRPA is a self-identified consumer who is in recovery from mental illness and/or substance use disorder.
- To be eligible for the CRPA, the applicant must:
  
  - Demonstrate they have completed appropriate education and training relevant to the performance domains identified in the Recovery Coach Job Task Analysis Report.
  - Hold a high school diploma or jurisdictionally certified high school equivalency.
  - 46 hours specific to the domains, with 10 hours each in the domains of Advocacy, Mentoring/Education, and Recovery/Wellness Support and 16 hours in the domain of Ethical Responsibility.
  - Complete 500 hours of volunteer or paid work experience specific to the PR domains.
  - Receive 25 hours of supervision specific to the domains. Supervision must be provided by an organization’s documented and qualified supervisory staff per job description.
  - Pass the NYCB/IC&RC Peer Advocate Exam.
  - Complete 20 hours of continuing education earned every two years, including six hours in Ethics.

All providers listed may provide any component of the outpatient Addiction services consistent with State law and practice act with three exceptions: Certified Recovery Peer Advocates can only perform peer supports, service planning, care coordination, and assistance in a crisis intervention; unlicensed and/or uncredentialed professionals may assist with the performance of any activity listed here so long as supervised as noted above; and all agencies with MAT interventions must comply with federal and state laws regarding controlled substance prescriber availability.

Service Limitations:
Services must be medically necessary and must be recommended by a licensed practitioner or physician, who is acting within the scope of his/her professional license and applicable state law (Licensed practitioners include licensed by the New York State Department of Education, licensed master social worker (LMSW), licensed clinical social worker (LCSW), licensed mental health counselor (LMHC), licensed marriage and family therapists (LMFTs), licensed psychoanalysts; licensed creative arts therapists, physician assistants, nurse practitioners (NPs); physicians and psychologists), to promote the maximum reduction of symptoms and/or restoration of an individual to his/her best age-appropriate functional level according to an individualized treatment plan. No more than one medication management may be billed per day.

Components include:

- **Assessment** - The purpose of the assessment is to provide sufficient information for problem identification, Addiction treatment or referral for the beneficiary to gain access to other needed Medicaid Addiction or mental health services.
Service Planning - The treatment plan for Medicaid Addiction and mental health services must be patient-centered and developed in collaboration with the patient and patient's family/collaterals, where appropriate.

Counseling/Therapy - Counseling/Therapy to address a beneficiary's major lifestyle, attitudinal, and behavioral problems. Counseling/Therapy includes highly structured psychosocial therapy to address issues that have the potential to undermine the goals of treatment; skill development for coping with and managing symptoms and behaviors associated with Addiction, such as the participant's perspective and lack of impulse control or signs and symptoms of withdrawal. Collateral contact is permitted as needed to address the therapeutic goals of the Medicaid beneficiary receiving treatment. The following activities are excluded: financial management, supportive housing, supportive employment services, and basic skill acquisition services that are habilitative in nature.

Medication Management - Psychotropic and other medication management as permitted under State Law. Medication Assisted Therapies (MAT) when medically necessary, including the direct administration of medication.

Care Coordination - Care coordination includes: 1) Consultation to assist with the individual’s needs and service planning for Medicaid behavioral health services. 2) Referral and linkage to other Medicaid behavioral health services to avoid more restrictive levels of treatment.

Peer/Family Peer Support - Peer counseling to address a beneficiary's major lifestyle, attitudinal, and behavioral problems. Peer counseling includes highly structured psychosocial therapy to address issues that have the potential to undermine the goals of treatment; skill development for coping with and managing symptoms and behaviors.

Crisis Intervention - Assist the individual with effectively responding to or avoiding identified persecutors or triggers that would risk their remaining in the community location or that result in functional impairments, including assisting the individual and family members or other collaterals with identifying a potential psychiatric or personal crisis, developing a crisis management plan, and/or, as appropriate, seeking other supports to restore stability and functioning.
13d. Rehabilitative Services

Residential Addiction Rehabilitative Services
Residential addiction services include individual centered residential treatment consistent with the individual's assessed treatment needs, with a rehabilitation and recovery focus designed to promote skills for coping with and managing substance use disorder symptoms and behaviors. These services are designed to help individuals achieve changes in their substance use disorder behaviors. Services should address an individual's major lifestyle, attitudinal, and behavioral problems that have the potential to undermine the goals of treatment. Residential services are delivered on an individual or group basis in a wide variety of settings including treatment in residential settings of 16 beds or less designed to help individuals achieve changes in their substance use disorder behaviors. Face-to-face interventions may include other collateral supports beyond the individual or family/caregiver, as necessary.

Provider Qualifications:
Services are provided by licensed and unlicensed professional staff, who are at least 18 years of age with a high school or equivalent diploma, according to their areas of competence as determined by degree, required levels of experience as defined by state law and regulations and departmentally approved guidelines and certifications. All residential agencies are certified under state law. Non-credentialed counselors must be at least 18 years of age with a high school or equivalent diploma. Licensed practitioners are licensed by the New York State Department of Education and include licensed master social workers (LMSWs), licensed clinical social workers (LCSWs), licensed mental health counselors (LMHCs), licensed marriage and family therapists (LMFTs), licensed psychoanalysts; registered nurses (RNs); licensed practical nurses (LPNs); nurse practitioners (NPs); medical doctors (MDs and DOs) and psychologists. Any staff who is unlicensed and providing addiction services must be credentialed by OASAS as a CASAC or a CASAC-T; Certified Recovery Peer Advocate; or be under the supervision of a QHP. State regulations require supervision of CASAC-T, Certified Recovery Peer Advocate, and non-credentialed counselors by a QHP meeting the supervisory standards established by OASAS.

A QHP includes the following professionals who are licensed by the New York State Department of Education or credentialed by OASAS: CASAC; LMSW; LCSW; NP; OT; physician (MD); physician assistants (PA); RN; psychologist; rehabilitation counselor certified by the Commission of Rehabilitation Counselor Certification; a therapeutic recreation specialist who holds a baccalaureate degree in a field allied to therapeutic recreation and, either before or after receiving such degree, has five years of full-time, paid work experience; licensed marriage and family therapists (LMFTs); and a licensed mental health counselor (Title VIII, Article 163); and a counselor certified by and currently registered as such with the National Board of Certified Counselors. The QHP provides clinical/administrative oversight and supervision of non-credentialed staff as permitted under the statutory and/or regulatory scopes of practice. All the stated requirements above are overseen and/or coordinated by the Office of Alcoholism and Substance Abuse Services (OASAS).

Only physicians, Psychiatrists, nurse practitioners, physician assistants, and registered nurses may perform medication management as permitted under state law with any supervision as required. All agencies with MAT interventions must comply with federal and state laws regarding controlled substance prescriber availability.
Credentialed Alcoholism and Substance Abuse Counselor (CASAC) must be at least 18 years of age; have earned at least a high school diploma or a General Equivalency Diploma (GED); and reside or work in New York State at least 51 percent of the period during which their application is being processed to be issued a credential. In addition, a CASAC must:

1. Provide three references attesting to the attainment of specific competency and ethical conduct requirements;

2. Document a minimum of 6,000 hours of supervised, full-time equivalent experience in an approved OASAS work setting or substitute a) a Master’s Degree in a Human Services field for 4,000 hours experience; b) a Bachelor’s Degree in a Human Services field for 2,000 hours experience; c) an Associate’s Degree in a Human Services field for 1,000 hours experience;

3. Meet minimum education and training requirements including a minimum of 350 hours which address the full range of knowledge, skills and professional techniques related to chemical dependence counseling. Note: A formal internship or formal field placement may be claimed as work experience OR education and training, but not both. Work experience claimed may not include any experience gained as part of, or required under, participation as a patient in a formal alcoholism and/or substance abuse or problem gambling treatment/aftercare program and/or plan. And

4. Pass the International Certification and Reciprocity Consortium (IC&RC) examination for Alcohol and Drug Counselors. The IC&RC examination for Alcohol and Drug Counselors is comprised of 150 multiple-choice questions derived from the counselor tasks identified in the IC&RC Candidate Guide.

CASAC-Trainee must be at least 18 years of age; have earned at least a high school diploma or a General Equivalency Diploma (GED); and reside or work in New York State at least 51 percent of the period during which their application is being processed to be issued a credential. Applicants may be considered for a CASAC Trainee certificate upon satisfying a minimum of:

- 350 hours of the required education and training; OR
- 4,000 hours of appropriate work experience and the 85 hours in Section 1 of the education and training related to knowledge of alcoholism and substance abuse.

The CASAC Trainee certificate is effective from the date that any of the above eligibility requirements are approved until the end of the five-year period that the application is active. The CASAC Trainee certificate is not renewable. However, if the CASAC-T is an examination candidate when the CASAC Trainee certificate expires, a three year extension may be requested.

Certified Recovery Peer Advocate (CRPA) as defined in the NYS OASAS is:
An individual who is “supervised by a credentialed or licensed clinical staff member to provide outreach and peer support services based on clinical need as identified in the patient’s March 25, 2019

TN #16-0004 Approval Date March 25, 2019
Supersedes TN NEW Effective Date July 1, 2016
treatment/recovery plan which occur on the premises of a certified agency.” Peer Advocates may also provide other types or forms of peer support that go beyond those services provided in a certified setting.

CRPA is a self-identified consumer who is in recovery from mental illness and/or substance use disorder.

To be eligible for the CRPA, the applicant must:

- Demonstrate they have completed appropriate education and training relevant to the performance domains identified in the Recovery Coach Job Task Analysis Report.
- Hold a high school diploma or jurisdictionally certified high school equivalency.
- 46 hours specific to the domains, with 10 hours each in the domains of Advocacy, Mentoring/Education, and Recovery/Wellness Support and 16 hours in the domain of Ethical Responsibility.
- Completed 500 hours of volunteer or paid work experience specific to the PR domains.
- Received 25 hours of supervision specific to the domains. Supervision must be provided by an organization’s documented and qualified supervisory staff per job description.
- Pass the NYCB/IC&RC Peer Advocate Exam.
- Complete 20 hours of continuing education earned every two years, including six hours in Ethics.

All providers listed may provide any component of the residential Addiction services consistent with State law and practice act with three exceptions: Certified Recovery Peer Advocates may only perform peer supports, service planning, care coordination, and assistance in a crisis intervention; unlicensed and/or uncredentialed professionals may assist with the performance of any activity listed here so long as supervised as noted above; and all agencies with MAT interventions must comply with federal and state laws regarding controlled substance prescriber availability.

Service Limitations:
Services are subject to prior approval, must be medically necessary and must be recommended by a licensed practitioner or physician, who is acting within the scope of his/her professional license and applicable state law (licensed practitioners include licensed by the New York State Department of Education and include licensed master social worker (LMSW), licensed clinical social worker (LCSW), licensed mental health counselor (LMHC), licensed marriage and family therapists (LMFTs), licensed psychoanalysts; licensed creative arts therapists, physician assistants PAs); nurse practitioners (NPs); physicians and psychologists, to promote the maximum reduction of symptoms and/or restoration of an individual to his/her best age-appropriate functional level according to an individualized treatment plan.
Components include:

- **Assessment** - The purpose of the assessment is to provide sufficient information for problem identification, Addiction treatment or referral for the beneficiary to gain access to other needed Medicaid Addiction or mental health services.

- **Service Planning** - Clinical treatment plan development - The treatment plan for Medicaid Addiction and mental health services must be patient-centered and developed in collaboration with the patient.

- **Counseling/Therapy** - Counseling/Therapy to address a beneficiary’s major lifestyle, attitudinal, and behavioral problems. Counseling/therapy includes highly structured psychosocial therapy to address issues that have the potential to undermine the goals of treatment; skill development for coping with and managing symptoms and behaviors associated with Addiction such as the participant’s perspective and lack of impulse control or signs and symptoms of withdrawal. Collateral contact is permitted as needed to address the therapeutic goals of the Medicaid beneficiary receiving treatment. The following activities are excluded: financial management, supportive housing, supportive employment services, and basic skill acquisition services that are habilitative in nature.

- **Medication Management** - Psychotropic and other medication management as permitted under State Law. Medication Assisted Therapies (MAT) when medically necessary, including the direct administration of medication.

- **Care Coordination** - Care coordination includes: 1) Consultation other practitioners to assist with the individual’s needs and service planning for Medicaid services. 2) Referral and linkage to other Medicaid services to avoid more restrictive levels of treatment.

- **Peer/Family Peer Support** - Peer counseling to address a beneficiary’s major lifestyle, attitudinal, and behavioral problems. Peer counseling includes highly structured psychosocial therapy to address issues that have the potential to undermine the goals of treatment; skill development for coping with and managing symptoms and behaviors associated with substance use disorders (Addiction) such as the participant’s perspective and lack of impulse control or signs and symptoms of withdrawal; The following activities are excluded: financial management, supportive housing, supportive employment services, and basic skill acquisition services that are habilitative in nature.

- **Crisis Intervention** - Assist the individual with effectively responding to or avoiding identified precursors or triggers that result in functional impairments, including assisting the individual and family members or other collaterals with identifying a potential psychiatric or personal crisis, developing a crisis management plan, and/or, as appropriate, seeking other supports to restore stability and functioning.

13d. Rehabilitative Services

Crisis Services for Individuals with Intellectual and/or Developmental Disabilities (CSIDD)

Office for People With Developmental Disabilities (OPWDD)

The services described below are: CSIDD Clinical Team Services

Assurances

The State assures that all Crisis Services for Individuals with Intellectual and/or Developmental Disabilities (CSIDD) services are provided to, or directed exclusively toward the treatment of, Medicaid eligible individuals in accordance with Section 1902(a)(10)(A)(i) of the Act.

The State assures that CSIDD services do not include and FFP is not available for any of the following:

A. educational, vocational and job training services;
B. room and board except when furnished as part of respite care services;
C. habilitation services;
D. services to inmates in public institutions as defined in 42 CFR § 435.1010;
E. services to individuals residing in institutions for mental diseases as described in 42 CFR § 435.1009;
F. recreational and social activities; and
G. services that must be covered elsewhere in the Medicaid State Plan.

Description

Crisis Services for Individuals with Intellectual and/or Developmental Disabilities (CSIDD) are rehabilitative, short-term targeted services for individuals with intellectual and/or developmental disabilities (I/DD) who have significant behavioral or Mental Health (MH) needs. Services are delivered by multi-disciplinary teams that provide personalized and intensive, time-limited services for those age 6 and older. This is a high intensity service recommended for individuals who experience frequent hospitalizations, crisis visits, and use of mobile emergency services and are at risk of losing placement and/or services. Services will be provided to all individuals who meet medical necessity criteria for this service. Teams provide clinical consultation and treatment and will maintain 24/7 service accessibility throughout the course of treatment for those individuals enrolled in CSIDD. CSIDD is a short-term tertiary care service designed to help stabilize individuals with MI/DD within their existing care networks using specially trained behavior support professionals to build skills and de-escalate the individual’s behaviors. Once the individual is stabilized, the CSIDD team will discharge the individual from the team’s caseload.

All services provided are for the direct benefit of the individual in accordance with the individual’s needs and treatment goals identified in the individual’s treatment plan, and for the purpose of assisting in the individual’s recovery.

TN #19-0014 Approval Date December 16, 2019
Supersedes TN NEW Effective Date January 01, 2019
The CSIDD must be recommended by one of the following licensed practitioners operating within the scope of their practice of their State license: a licensed professional (MD, DO or APRN) or licensed psychologist (Clinical Director).

**Qualification of Providers**

The CSIDD designated provider(s) are State providers or not-for-profit agency(ies) that meet all qualifications and program standards as outlined by OPWDD. Each provider must be qualified to participate in the Medicaid program, certified by OPWDD to operate CSIDD services, have sufficient professional staffing to operate in the region, and the ability to coordinate a network of providers to ensure coordination of services for CSIDD recipients.

The CSIDD provider must be certified by New York State for the provision of CSIDD services in at least one OPWDD service region. The following disciplines with expertise in the behavioral health aspects of I/DD are required team members.

**CSIDD Team Membership**

The CSIDD Team will be staffed by a CSIDD Team Leader and support staff and an interdisciplinary team as outlined below. Team membership must represent an array of clinical behavioral health disciplines likely to be required in providing multidisciplinary assessment and treatment. The CSIDD services are delivered by Clinical Team Leaders and Clinical Team Coordinators under the supervision of the Clinical and/or Medical Director. All CSIDD staff must have at least one year of relevant experience with the behavioral health aspects of I/DD. CSIDD staff must complete training in the mental health aspects of individuals with developmental disabilities. The following disciplines are required to participate as core constituents of the interdisciplinary treatment team:

- **Clinical Director** (Ph.D. in Psychology and licensed by the State's Psychology Board). The Clinical Director is licensed by the State of New York and operates within the scope of the practice of their State license. The Clinical Director consults with the Medical Director, and also reviews CSIDD Treatment Plans and recommends services.

- **Medical Director** (M.D./D.O. or APRN, licensed to practice in the State). The Medical Director is licensed by the State of New York and operates within the scope of the practice of their State license. The Medical Director consults with the Clinical Director, and also reviews CSIDD Treatment Plans and recommends services.

- **Clinical Team Leaders** (Doctorate or Master’s Degree in Social Work, Counseling, Psychology or human service field). This position is not required to be licensed and operates under the supervision of the Clinical and/or Medical Director.

- **Clinical Team Coordinators** (Doctorate or Master’s Degree in Social Work, Psychology, Counseling or other human service field). This position is not required to be licensed and operates under the supervision of the Clinical and/or Medical Director.
Service Description

Crisis Services for Individuals with Intellectual and/or Developmental Disabilities (CSIDD) is a high intensity service recommended for individuals with significant behavioral or Mental Health (MH) needs who experience frequent hospitalizations, crisis visits, and use of mobile emergency services and are at risk of losing placement and/or services. Teams include licensed professionals from appropriate behavioral health disciplines who provide clinical consultation and initial assessment within 2 hours of referral from OPWDD. All elements of the service are conducted by clinical professionals and are under the supervision of licensed Clinical and/or Medical Directors. Teams will maintain 24/7 service accessibility throughout the course of treatment.

Assessment

The Clinical Team Leader or Clinical Team Coordinator under the supervision of the Clinical or Medical Director will clinically assess the individual prior to developing a treatment plan, any time the individual experiences a significant change (improvement or decompensation) in his or her behavioral and/or Mental Health symptom presentation or is discharged from CSIDD services. The clinical assessment will include the Aberrant Behavior Checklist, the Matson Evaluation for Medication Side Effects (MEDS), and other standardized clinical questionnaires required by the State. Qualifications: Clinical Team Leader or Clinical Team Coordinator under the supervision of the Clinical or Medical Director. All CSIDD staff must have, at least one year of relevant experience with the behavioral health aspects of I/DD. CSIDD staff must complete training in the mental health aspects of individuals with developmental disabilities.

Treatment Planning

Based on clinical assessments, the Clinical Team Leader or Clinical Team Coordinator, under the supervision of the Clinical and/or Medical Director, will develop an individualized clinical crisis plan and treatment plan. The CSIDD Clinical Team Coordinator consults with the team to identify which CSIDD services the enrolled individual should receive. These services are listed on the CSIDD treatment plan. The ultimate responsibility for the content of the treatment plan is the Clinical Director or Medical Director, who may designate a different team member to develop a crisis plan or treatment plan for particular individual cases. The treatment services must be part of a treatment plan including goals and activities necessary to reduce the symptoms associated with behavioral health conditions discovered during the assessments and restore the individual to his or her best possible function level. Qualifications: Clinical Team Leader or Clinical Team Coordinator under the supervision of the Clinical or Medical Director. All CSIDD staff must have, at least one year of relevant experience with the behavioral health aspects of I/DD. CSIDD staff must complete training in the mental health aspects of individuals with developmental disabilities.

Stabilization

Stabilization includes: skill building and restoration, medication monitoring, and counseling to assist the individual and family/caregiver with effectively responding to identified precursors or triggers that would risk their ability to remain in a natural community location. Stabilization also includes assisting the individual and family members, caregivers or other collateral supports with identifying a potential psychiatric or personal crisis; practicing de-escalation skills; and seeking other supports to restore stability and functioning. Qualifications: Clinical Team Leader or Clinical Team Coordinator under the supervision of the Clinical or Medical Director. All CSIDD staff must have, at least one year of relevant experience with the behavioral health aspects of I/DD. CSIDD staff must complete training in the mental health aspects of individuals with developmental disabilities.
Monitoring

CSIDD Team Members will monitor the efficacy of the Treatment Plan in supporting the beneficiary’s stabilization in preparation for discharge from CSIDD services. Monitoring may also include service referral as needed. The team reviews the CSIDD treatment plan at least monthly to assess the needs of the individual and to ensure services are provided in a timely manner. Qualifications: Clinical Team Leader or Clinical Team Coordinator under the supervision of the Clinical or Medical Director. All CSIDD staff must have, at least one year of relevant experience with the behavioral health aspects of I/DD. CSIDD staff must complete training in the mental health aspects of individuals with developmental disabilities.

CSIDD Treatment Plan

The CSIDD treatment plan:

1. Identifies the intensity of the needs of the person enrolled in services as well as the person’s system of support. It is geared towards preventing the occurrence of similar events in the future.

2. Provides clear, concrete, and realistic set of treatment and supportive interventions that prevents, de-escalates, and protects an individual from experiencing a behavioral health crisis.

CSIDD recipients receive CSIDD Stabilization services commensurate with their identified level of need based on the Assessment, Service Planning and Reporting process. The level of involvement informs the level of CSIDD services intensity. Levels of intensity vary, depending on the needs identified in the initial CSIDD assessment and ongoing re-assessment. As a person responds to the service and gains clinical stability, the level of involvement from the CSIDD team is reduced. If the individual receives home and community-based services (HCBS), the CSIDD Team will coordinate with the person’s HCBS Care Manager and ensure needed services are incorporated into the HCBS Life Plan to support the fading of CSIDD supports, as applicable.

Level of Involvement and Intensity: As a person responds to the service and gains clinical stability, the level of involvement from the clinical team is reduced. The levels of involvement and intensity are categorized as follows:
Level of CSIDD Clinical Team Involvement:

1. **Stable**: individual is clinically stable and only needs periodic clinical team outreach and plan review. Stabilization intervention and monitoring is provided at least quarterly.

2. **Mild**: individual is showing clear improvements in level of clinical stability and has Stabilization intervention and monitoring is provided once a month.

3. **Moderate**: individual is not yet stable and has clinical needs that require multiple monitoring contacts per month with active Stabilization interventions and reassessment of the plan, consultations, system engagement and linkages to other resources and or supports/services. Stabilization intervention and monitoring are provided multiple times per month.

4. **Intensive**: individual has acute clinical needs that require active crisis planning and system engagement with contact weekly or more often. Stabilization intervention and monitoring are provided weekly or more often.

The system of support for the individual, including his/her involved family member/caregiver(s) are active participants in all aspects of the CSIDD service while the person is enrolled. Active participation is the full engagement of the family member/caregiver(s) in ongoing person-centered planning, discussions and participation in the delivery of CSIDD services. All services provided are for the direct benefit of the individual, in accordance with the individual's needs and treatment goals identified in the individual's treatment plan, and for the purpose of assisting in the individual's recovery. As clinical improvement is demonstrated, based on the ongoing reassessment process, the individual and his/her involved family member/caregiver(s) are engaged in the process and trained in the revisions to the CSIDD treatment plan and movement to less intense levels of CSIDD Clinical team involvement. CSIDD staff also are also responsible for working with the individual's HCBS Care Manager, if applicable, to make appropriate referrals to other community integrated services.
[Rehabilitative Services (cont.)]

“Off-site” services shall be provided to developmentally disabled persons whose therapeutic requirements are most effectively satisfied in an appropriate environment that is specific to the treatment needs of the developmentally disabled individual. Such services shall be provided by persons authorized pursuant to NYCRR Title 14 Part 679. “Off-site” services shall not be provided at the location of a clinic certified by NYCRR Title 14 Part 679.

18. Limitations on Hospice Services:

Hospice services are provided to individuals who are certified [Recipients must be diagnosed] by a physician as being, terminally ill, [that is, having] with a life expectancy of approximately six months or less [to live].

Recipients must sign an informed consent electing hospice over conventional care, subject to periodic review.

Services [must be] provided [In accordance with pertinent Department of Health regulations are palliative in nature as opposed to curative; Services include supportive medical, social, emotional, and spiritual services to terminally ill individuals as well as emotional support for family members. Hospice services may be delivered at home, in a nursing home or in a hospice residence.

Recipients who elect hospice care waive all rights to Medicaid reimbursement made on their behalf for the duration of the election of any services covered under the Medicaid State Plan that are related to the treatment of the terminal condition for which hospice care was elected, or related condition.

Hospice services provider qualifications are provided for registered professional nurse, home health aide, physical therapist, occupational therapist, speech pathologist, personal care aide, housekeeper/homemaker, pastoral care coordinator, social worker, nutritionist, audiologist, and respiratory therapist, personal care aid housekeeper/homemaker, pastoral care coordinator, social workers, nutritionist, audiologist, and respiratory therapist.

Registered professional nurse shall mean a person who is licensed and currently registered as a registered professional nurse pursuant to Article 139 of the New York State Education Law.
New York
3(c)(i)

Home Health aide shall mean a person who carries out health care tasks under the supervision of a registered nurse or licensed therapist and who may also provide assistance with personal hygiene, housekeeping and other related supportive tasks to a patient with health care needs in his/her home. Home health aides shall have successfully completed a basic training program in home health aide services or an equivalent exam approved by the Department and possess written evidence of such completion.

Physical therapist shall mean a person who is licensed by and currently registered with the New York State Education Department or who has been issued a valid limited permit by that Department.

Occupational therapist shall mean a person who is registered with the American Occupational Therapy Association, or either a graduate of a program in occupational therapy approved by the Council on Medical Education of the American Medical Association in collaboration with the American Occupational Therapy Association or a graduate of a curriculum in occupational therapy which is recognized by the World Federation of Occupational Therapists and is eligible for a registration with the American Occupational Therapy Association.

Speech pathologist shall mean a person who is licensed as required by Article 159 of the New York State Education Law.

Personal care aide shall mean a person who, under professional supervision, provides patients assistance with nutritional and environmental support and personal hygiene, feeding and dressing and/or, as an extension of self-directed patients, selects health-related tasks. A personal care aide shall have successfully completed:

(i) a training program in home health aide services or equivalent exam as specified in the description for home health aide above; or
(ii) one full year of experience in providing personal care services through a home care services agency within three years preceding the effective date of an initial license issued pursuant to Article 36 of the Public Health Law; or
(iii) a training program in personal care services approved by the New York State Department of Health, which shall include basic training, periodic and continuing in-service training, and on-the-job instruction and supervision; and

Supersedes TN  NEW

Approval Date  September 8, 2008
Effective Date  April 1, 2007
New York
3(c)(ii)

in those instances where the personal care aide is to be providing assistance with health-related tasks, such aide shall be trained as described in subparagraph (iii) of this paragraph and training in health-related tasks shall be completed in full prior to the personal care aide’s assignment to any patient, as evidenced by written documentation of such completion.

Homemaker shall mean a person who meets the standards established by the Department of Social Services and assists and instructs persons at home because of illness, incapacity or absence of a caretaker relative in providing assistance with environmental and nutritional tasks.

Pastoral care coordinator shall mean a person who has had a minimum of one year of training and experience in pastoral/spiritual counseling, and has a baccalaureate degree from a regionally accredited college or university or one recognized by the New York State Department of Education.

Social worker shall mean a person who holds a master’s degree in social work after successfully completing a prescribed course of study at a graduate school of social work accredited by the Council on Social Work Education and the Education Department, and who is certified or licensed by the Education Department to practice social work in the State of New York. When employed by a certified home health agency, long-term home health care program or hospice, such social worker must have had one year of social work experience in a health care setting.

Nutritionist shall mean a person who applies the principles of normal and therapeutic nutrition and of the physical, biological, social and behavioral sciences to the assessment and management of those factors in the personal community environment which influence nutritional status. A nutritionist must possess a baccalaureate degree, with major studies in food and nutrition, from a regionally accredited or New York State registered four-year college or university and be registered or be eligible for registration by the American Dietetic Association.
Audiologist shall mean a person who is licensed as required by Article 159 of the New York State Education Law.

Respiratory therapist shall mean a person who is licensed and currently registered as a respiratory therapist pursuant to Article 164 of the New York State Education Law.

Providers of Hospice Services must be certified in accordance with Article 40 of the PHL. Services are provided in accordance with 42 CFR Part 418.

The State assures the provision of Hospice services will be provided in accordance with 42 CFR Part 418.

19. **Limitations on Tuberculosis related services:** Directly Observed Therapy (DOT) will be provided to clients who are being treated for Tuberculosis Disease.

21. **Lactation consultant services:** effective September 1, 2012, reimbursement will be provided for breastfeeding health education and counseling services by pediatric or family nurse practitioners. Pediatric or family nurse practitioners must be currently registered and licensed by the State in accordance with 42 CFR 440.60(a) and also International Board Certified Lactation Consultants (IBCLC). Date of implementation will occur on the first day of the month following 30 days after Federal approval of this provision of the State Plan.

22. **Limitation on Respiratory Care:** Services may be rendered to EPSDT population by medical necessity and that services is furnished through the clinic and home benefits to this population.

TN#: 12-16  Approval Date: December 28, 2012  
Supersedes TN#: 07-13  Effective Date: September 2, 2012
New York
3(d)

23a. Prior approval is required for non-emergent transportation, including the services and subsistence of the attendant. Requests can be made by recipients or their family members; or medical practitioners acting on behalf of a recipient.

Transportation providers are assigned to requests for non-emergency transportation services based upon first, a recipient's choice of available participating vendors at the medically appropriate level of transportation; then, if the recipient indicates no preference, the ordering practitioner's choice among available participating vendors at the medically appropriate level of transportation; and finally, if no choice is made by the ordering practitioner, the request is given via rotation among the medically available and appropriate mode of transportation providers.

1. To assure comparability and statewideness, each county's local department of social services manages transportation services on behalf of a recipient's assigned to the county.

2. Recipient, family member, or volunteer reimbursement is made as an administrative expense of the Medicaid Program. This applies to any personal vehicle mileage reimbursement, lodging, airfare, or other expense borne on behalf of the Medicaid recipient by a non-direct vendor.

23d. Prior approval is required for skilled nursing facility services except when admitted directly from a hospital, another skilled nursing facility or from a health related facility.

Medicaid payments shall not be authorized for skilled nursing facilities which are not certified or have not applied for certification to participate in Medicare.

25. Personal care services means some or total assistance with personal hygiene, dressing and feeding and nutritional and environmental support functions. Prior approval is required for all personal care services. The authorization period and amount of personal care services authorized depends upon patient need, as indicated in the patient’s assessment.

TN #12-33 Approval Date April 29, 2013
Supersedes TN #09-47 Effective Date October 1, 2012
New York
3(d)(A)

Personal care services, shared aide and individual aide, furnished to an individual who is not an inpatient or a resident of a hospital, nursing facility, intermediate care facility for the mentally retarded, or institution for mental disease, as determined to meet the recipient's needs for assistance, and when prescribed by a physician, in accordance with the recipient's plan of treatment and provided by individuals who are qualified to provide such services, who are supervised by a registered nurse and who are not members of the recipient's family, and furnished in the recipient's home or other location.

Providers of personal care services (personal care aides) must have:

- maturity, emotional and mental stability, and experience in personal care or homemaking;
- the ability to read and write, understand and carry out directions and instructions, record messages, and keep simple records;
- a sympathetic attitude toward providing services for patients at home who have medical problems;
- good physical health, as indicated by the documentation in the personal file of all persons providing personal care services. This documentation must include the same assurances and proof of good physical health that the Department of Health requires for employees of certified home agencies’
- a criminal history check performed to the extent required under section 124 of the PHL; and
- successfully completed a training program approved by the Department.

Personal care aides must be supervised by a registered professional nurse who is licensed and currently certified to practice in New York State and who has at least two years satisfactory recent home health care experience. Nursing supervision includes orienting the personal care aide to his/her job assignment(s); providing needed on-the-job training; making nursing supervisory visits to the patient's homes PRN, but at least every 90 days; and, annually conducting an overall job performance evaluation of the aide.

New York State's Personal Care Services are provided in accordance with 42 CFR 440.167.
25 (Cont.) Consumer Directed Personal Assistance Program

The Consumer Directed Personal Assistance Program (CDPAP) is a consumer directed home care services delivery model. The program serves Medicaid recipients who have a medical need for home care services and who choose to participate in this model. It has operated under the State's Personal Care Services benefit since 1990. As such, the eligibility, assessment and prior authorization of services processes mirror that of the Personal Care Services Program (PCSP). In the traditional PCSP, the local social services district (LSSD) contracts with home care agencies for provision of services. The home care agency is responsible for hiring, training, supervising and providing the home care worker with salary and benefits. In the CDPAP a local social services district contracts with a CDPAP agency and there is a co-employer relationship between the CDPAP agency and the consumer that encompasses these functions. The CDPAP consumer is responsible for hiring/training/supervising and firing his/her aides. The CDPAP agency acts as the co-employer of each aide hired by the consumer for the purpose of setting wage levels and fringe benefits, including health insurance coverage and other benefits, e.g. unemployment and workers compensation. It is the CDPAP agency that actually pays each aide and administers related fringe benefits. The CDPAP agency also submits claims for payment to the Department's agent that processes and pays claims for services provided to Medicaid recipients.
The State elects to provide medical assistance services to eligible individuals through a Primary Care Case Management Program. PCCMs are responsible for locating, coordinating, and monitoring covered primary care to all individuals enrolled with a case manager.

PCCM providers may be physicians, physician group practices, entities employing or having other arrangements with physicians to provide PCCM Services under contract. Nurse practitioners may also be a PCCM provider.

A PCCM will provide for arrangements with, or referrals to a sufficient number of physicians and other appropriate health care professional to ensure that services under the contract can be furnished to enrollees promptly and without compromise to quality of care.

PCCMs are required to be accessible 24 hours/seven days per week to provide information, referral and treatment to enrollees. PCCMs may not restrict an enrollees access to emergency services, or require prior authorization of emergency services.

A PCCM shall be geographically accessible to enrollees. Primary care providers must meet State standards for travel time and distance.
General

a) Prior approval of the local professional director shall be required for medical care and services which are to be provided outside New York State, except in the following situations:

1. When it is customary for the inhabitants of the district generally to use medical care resources and facilities outside New York State.

2. When out-of-state care was provided in an emergency.

b) When a request subject to prior approval has been modified or denied in whole or in part because of disagreement with the proposed plan of treatment, recipients are notified that they may request a fair hearing.
28. **Lactation consultant services:** effective September 1, 2012, reimbursement will be available for breastfeeding health education and counseling services by physician assistants. Physician assistants must be currently registered and licensed by the State in accordance with 42 CFR 440.60(a) and also International Board Certified Lactation Consultants (IBCLC). Date of implementation will occur on the first day of the month following 30 days after Federal approval of this provision of the State Plan.

29. **Lactation consultant services:** effective September 1, 2012, reimbursement will be available for breastfeeding health education and counseling services by registered nurses. Registered nurses must be currently registered and licensed by the State in accordance with 42 CFR 440.60(a) and also International Board Certified Lactation Consultants (IBCLC). Date of implementation will occur on the first day of the month following 30 days after Federal approval of this provision of the State Plan.
AMOUNT, DURATION AND SCOPE OF MEDICAL AND REMEDIAL CARE SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

In addition to the limitations specified on pages 1 through 4 regarding services, the following limitations also apply to the noted services:

2a; 2b; 2c; 2d;

Services will be provided in accordance with the utilization threshold requirements described in departmental regulations, which are based on medical necessity and identified for providers in the MMIS Clinic Provider Manual. Such threshold requirements are applicable to specific provider service types including medical clinics, dental clinics and mental health clinics certified under Article 28 of the Public Health Law and/or Article 31 of the Mental Hygiene Law. The requirements mandate that providers obtain prior authorization based on medical necessity for the provision of services in excess of prescribed utilization thresholds per recipient per benefit year, unless the services provided were urgent or emergent in nature, or otherwise excluded.

3. Services will be provided in accordance with the utilization threshold requirements described in departmental regulations, which are based on medical necessity and identified for providers in the MMIS Laboratory Provider Manual. Such threshold requirements are applicable to specific provider service types including laboratories. The requirements mandate that providers obtain prior authorization based on medical necessity for the provision of services in excess of prescribed utilization thresholds per recipient per benefit year, unless the services provided were urgent or emergent in nature, or otherwise excluded.

5. Services will be provided in accordance with the utilization threshold requirements described in departmental regulations, which are based on medical necessity and identified for providers in the MMIS Physician Provider Manual. Such threshold requirements are applicable to specific provider service types including physicians, for services furnished in the office or patient’s home. The requirements mandate that providers obtain prior authorization based on medical necessity for the provision of services in excess of prescribed utilization thresholds per recipient per benefit year, unless the services provided were urgent or emergent in nature, or otherwise excluded.

TN #05-26 Approval Date March 18, 2010
Supersedes TN #93-53 Effective Date April 1, 2005
A utilization threshold service is decremented each time a patient is seen by a physician including those times when the patient is seen by a physician and an electronic prescription/fiscal order is transmitted for medically necessary pharmaceuticals and select over the counter medications.
9. Services will be provided in accordance with the utilization threshold requirements described in departmental regulations which are based on medical necessity and identified for providers in the MMIS Clinic Provider Manual. Such threshold requirements are applicable to specific provider service types including adult day health services, medical clinics, dental clinics and mental health clinics certified under Article 28 of the Public Health Law and/or Article 31 of the Mental Hygiene Law. The requirements mandate that providers obtain prior authorization based on medical necessity for the provision of services in excess of prescribed utilization thresholds per recipients per benefit year, unless the services provided were urgent or emergent in nature, or otherwise excluded.

Physical Therapy Services

11a. Effective on or after [October 1, 2011] July 1, 2018, services are limited to coverage of [twenty] forty visits per year; however, this limitation does not apply to enrollees who are less than 21 years of age, to individuals with traumatic brain injury, to persons with developmental disabilities, or to Medicare/Medicaid dually eligible recipients when that service is covered by Medicare. The benefit limit does not apply to inpatient hospital settings, services provided by a certified home health agency, or to nursing home inpatients receiving therapy in skilled nursing facilities in which they reside. The benefit limit is not subject to review or exception.

Occupational Therapy Services

11b. Effective on or after October 1, 2011, services are limited to coverage of twenty visits per year; however, this limitation does not apply to enrollees who are less than 21 years of age, to individuals with traumatic brain injury, to persons with developmental disabilities, or to Medicare/Medicaid dually eligible recipients when that service is covered by Medicare. The benefit limit does not apply to inpatient hospital settings, services provided by a certified home health agency, or to nursing home inpatients receiving therapy in skilled nursing facilities in which they reside. The benefit limit is not subject to review or exception.
Speech-Language Therapy Services

11c. Services will be provided in accordance with the utilization threshold requirements described in departmental regulations which are based on medical necessity and identified for providers in the MMIS Clinic Provider Manual. Such threshold requirements are applicable to specific provider service types including medical clinics, dental clinics and mental health clinics certified under Article 28 of the Public Health Law and/or Article 31 of the Mental Hygiene Law. The requirements mandate that providers obtain prior authorization for the provision of services based on medical necessity in excess of prescribed utilization thresholds per recipients per benefit year, unless the services provided were urgent or emergent in nature, or otherwise excluded.

12a. Services will be provided in accordance with the utilization threshold requirements described in departmental regulations which are based on medical necessity and identified for providers in the MMIS Pharmacy Provider Manual. Such threshold requirements are applicable to specific provider service types including pharmacy for prescription items and their refills, over the counter medications, and medical/surgical supplies dispenses by a community or outpatient pharmacy. The requirements mandate that providers obtain prior authorization for the provision of services based on medical necessity in excess of prescribed utilization thresholds per recipient per benefit year, unless the services provided were urgent or emergent in nature, or otherwise excluded.
New York
1

STANDARDS AND METHODS OF ASSURING HIGH QUALITY CARE

The following is a description of the methods that will be used to assure that the medical care and services are of high quality, and a description of the standards established by the State to assure high quality care:

a. Medical assistance will be provided in accordance with the individual’s medical needs based on the prescription or recommendation of the attending physician, dentist or other licensed practitioner eligible to participate in the program.

b. All professional persons providing service must be properly licensed under State Law. For certain paramedical services such as occupational therapy, speech therapy, etc., where there are no State licensing requirements, the persons providing such services must be qualified or certified by the appropriate national professional association.

c. Medical institutions such as hospitals, nursing homes, etc.: health related facilities such as intermediate care facilities, medical facilities such as clinics, private laboratories, etc.; and health agencies (such as community visiting nurse associations) which provide care to recipients in the medical assistance program must be licensed or approved by the appropriate State authority.

d. Services ordinarily interpreted to be specialist’s procedures or care must be provided by practitioners who are qualified specialists.

e. Home nursing services provided must conform to standards approved by the State Department of Health.

f. For certain care or services the recommendation of an appropriate specialist is required. (i.e., the more unusual prosthetic devices, rehabilitation therapies, orthodontic care, etc.).

g. Requirement that each local welfare district establish and maintain an adequate system of individual patient medical records showing diagnoses and services provided.

h. Collection of other medical information such as, at the State level, expenditures for various items of medical care and gross utilization data by categories. At the local level similar expenditure data related to individual medical attendants and vendors, and utilization data, particularly for physicians and hospital care. Drug records for individual patients are also maintained in a number of local welfare districts.

TN #74-2 Approval Date December 31, 1974
Supersedes TN ---- Effective Date January 1, 1974
3.1 **Amount, Duration, and Scope of Services**

Medicaid is provided in accordance with the requirements of sections 1902(a), 1902(e), 1902(z), 1903(i), 1905(a), 1905(p), 1905(r), 1905(s), 1906, 1915, 1916, 1920, 1925, 1929 and 1933 of the Act; section 245(h) of the Immigration and Nationality Act; and 42 CFR Parts 431, 440, 441, 442, and 483.

C. **Benchmark Benefit Package and Benchmark Equivalent Benefit Package**

(provided in accordance with 1937 of the Act and 42 CFR Part 440).

The State elects to provide alternative benefits:

- [ ] Not Provided

| X | Title of Alternative Benefit Plan A- Medication Therapy Management (MTM) Program |
| [ ] | Title of Alternative Benefit Plan B |

1. Populations and geographic area covered

The State will provide the benefit package to the following populations:

a) [x] Populations who are full benefit eligibility individuals in a category established on or before February 8, 2006, that may be required to enroll in an alternative benefit plan to obtain medical assistance.

For full benefit Medicaid eligibility groups included in the alternative benefit plan, please indicate in the chart below:

- Each eligibility group the state will require to enroll in the alternative benefit plan;
- Each eligibility group the state will allow to voluntarily enroll in the alternative benefit plan;
- Specify any additional targeted criteria for each included group (e.g., income standard);
- Specify the geographic area in which each group will be covered.

**Targeting Criteria:**
The MTM program will provide focused one-on-one, face-to-face medication management by a qualified pharmacist to Medicaid enrollees (voluntarily enrolled) to improve overall health outcomes and to decrease overall healthcare costs.

---

**TN #09-08** Approval Date **December 16, 2009**

**Supersedes TN NEW** Effective Date **June 11, 2009**
Asthma will be the initial chronic medical condition to be addressed in the Medicaid MTM program. Beginning as a pilot program, MTM will be offered to Medicaid enrollees with continuous coverage under Medicaid for the last 180 days and who are ages 21-63 with asthma, living in the Bronx. Excluded from the program are dual eligible Medicaid/Medicare enrollees, institutionalized enrollees and managed care enrollees. The MTM program will be offered to eligible individuals meeting program criteria. Medicaid enrollees will be identified as eligible for MTM services using the following selection criteria, based on an analysis of Medicaid medication claims and other Medicaid paid claims including hospital and emergency room claims. This group will be refined to contain patients with persistent asthma by applying determinants of disease severity based on resource utilization or suboptimal chronic therapy. All target enrollees must have at least one asthma related hospital or emergency room visit during the past year or suboptimal chronic medication therapy related to asthma.

b). The following populations will be given the option to voluntarily enroll in an alternative benefit plan:
- Each eligibility group the state will allow to voluntarily enroll in the alternative benefit plan,
- Specify any additional targeted criteria for each included group (e.g., income standard).
- Specify the geographic area in which each group will be covered.

For optional populations/individuals (checked above in 1a. & 1b.), describe in the text box below the manner in which the State will inform each individual that:

- Enrollment is voluntary;
- Each individual may choose at any time not to participate in an alternative benefit package and;
- Each individual can regain at any time immediate enrollment in the standard full Medicaid program under the State plan.

The New York State Medicaid program is sending an invitation letter to all eligible enrollees residing in the Bronx stating MTM services are available and enrollment is voluntary. Enrollees are also advised that if they choose to enroll in the MTM program, they may opt out of this program at any time. Invitation letters and enrollment materials will be available in Spanish. All State Plan services will continue to be included for enrollees opting to participate in the MTM program; no State Plan services will be excluded.
2. Description of the Benefits

[ ] The State will provide the following alternative benefit package (check the one that applies).

a) [ ] Benchmark Benefits

[ ] **FEHBP-equivalent Health Insurance Coverage** - The standard Blue Cross/Blue Shield preferred provider option services benefit plan, described in and offered under section 8903(l) of Title 5, United States Code.

[ ] **State Employee Coverage** - A health benefits coverage plan that is offered and generally available to State employees within the State involved.

In the text box below please provide either a World Wide Web URL (Uniform Resource Locator) link to the State's Employee Benefit Package or insert a copy of the entire State's Employee Benefit Package.

[ ] **Coverage Offered Through a Commercial Health Maintenance Organization (HMO)** - The health insurance plan that is offered by an HMO (as defined in section 2791(b)(3) of the Public Health Service Act), and that has the largest insured commercial, non-Medicaid enrollment of such plans within the State involved.

In the text box below please provide either a World Wide Web URL link to the HMO's benefit package or insert a copy of the entire HMO's benefit package.

[ ] **X Secretary-approved Coverage** - Any other health benefits coverage that the Secretary determines provides an appropriate coverage for the population served. Provide a full description of the benefits in the plan, including any applicable limitations. Also include a benefit by benefit comparison to services in the State plan or to services in any of the three Benchmark plans above.

1) The new State Plan service, MTM, will be available to all eligible enrollees, identified in the SPA, residing in the Bronx meeting specific State defined inclusion criteria. MTM services will be provided in addition to all State Plan services. These services will continue to be included for enrollees opting to participate in the MTM program; no State Plan services will be excluded.

**TN #09-08**

**Supersedes TN NEW**

**Approval Date** December 16, 2009

**Effective Date** June 11, 2009
2) **Medication Therapy Management** will provide one-on-one, face-to-face medication therapy services provided by trained, qualified NYS Medicaid MTM pharmacists who possess a New York State Pharmacy license. The services will be rendered in Medicaid enrolled retail pharmacies that have received a NYS Medicaid MTM-designation. Asthma will be the initial chronic medical condition to be addressed in the Medicaid MTM program. The services to be provided include:

- patient assessment (medical history as related by the patient);
- comprehensive patient medication therapy review;
- personal medication record (retained by the patient);
- medication action plan (for the patient to follow);
- assistance in finding a primary care physician (if needed);
- documentation of problems, resolutions, education and evaluation of patient response to medication therapy including adverse events; and
- follow-up to ensure patient adherence with medication action plan and;
- encourage patient self-management.

Enrollees will be provided MTM services from State trained, qualified Medicaid MTM pharmacists performing within their scope of practice pursuant to NYS Education Law. Pharmacists will not be providing medical advice to enrollees but will be conferring with the enrollee's prescriber to share recommendations. These pharmacists are expected to also facilitate linkage of the enrollee with a primary care provider (PCP) when the enrollee does not have a PCP.

3) **Enrollee choice and consent**

The MTM program will be offered to eligible individuals meeting program criteria. Enrollee eligibility for MTM services is based on specific inclusion criteria developed by the New York State Medicaid program described in the targeting criteria. Eligible enrollees will be invited to voluntarily opt into the Medicaid MTM program and will receive notification containing the name and contact information for Medicaid MTM-designated pharmacies in their area. The notification will encourage the enrollee to contact the Medicaid MTM-designated pharmacy of their choice to set up their initial visit.

Medicaid enrollees who agree to participate in the MTM program will be required to sign a consent form, prior to the enrollee's first visit with a qualified Medicaid MTM pharmacist, releasing identifiable health information to practitioners and pharmacists involved in the enrollee's care and MTM program. Enrollees receiving MTM services may choose to change either their Medicaid MTM designated pharmacy, change their qualified Medicaid MTM pharmacist at any time or opt out of MTM services at any time.

4) **Service setting**

Services will be provided face-to-face by a qualified pharmacist in an area of Medicaid MTM-designated community pharmacy separate from the dispensing area to afford privacy for discussion of the enrollee's medical and pharmaceutical issues. MTM services will only be available at designated MTM pharmacies in the Bronx.

5) **Frequency of service**

Enrollees will be eligible for one initial visit and 6 subsequent visits per 12 month period.
6) Provider qualifications

Medicaid MTM-designated Pharmacies- In order to participate in the MTM program, a pharmacy must: (1) be licensed and registered and in good standing with the Department of Education Board of Pharmacy, (2) be enrolled and in good standing with the NYS Medicaid program, (3) provide a current (and updated, as required) list of qualified MTM pharmacist(s) in its employment and (4) provide a separate and private MTM counseling area.

Qualified Medicaid MTM Pharmacists- In order to participate in the New York State Medicaid MTM program, a pharmacist must: (1) be registered and in good standing with the New York State Department of Education Board of Pharmacy and (2) be in good standing with the NYS Medicaid program and (3) have completed the NYS Medicaid MTM training.

b) [ ] Benchmark-Equivalent Benefits.

Specify which benchmark plan or plans this benefit package is equivalent to:

(i) Inclusion of Required Services – The State assures the alternative benefit plan includes coverage of the following categories of services: (Check all that apply).

[ ] Inpatient and outpatient hospital services;

[ ] Physicians’ surgical and medical services;

[ ] Laboratory and x-ray services;

[ ] Well-baby and well-child care services as defined by the State, including age-appropriate immunizations in accordance with the Advisory Committee on Immunization Practices;

[ ] Other appropriate preventive services including emergency services and family planning services included under this section.

(ii) [ ] Additional services

Insert a full description of the benefits in the plan including any limitations.

| TN #09-08 | Approval Date December 16, 2009 |
| Supersedes TN NEW | Effective Date June 11, 2009 |
The State assures that the benefit package has been determined to have an aggregate actuarial value equivalent to the specified benchmark plan in an actuarial report that:

- Has been prepared by an individual who is a member of the American Academy of Actuaries;
- Using generally accepted actuarial principles and methodologies;
- Using a standardized set of utilization and price factors;
- Using a standardized population that is representative of the population being served;
- Applying the same principles and factors in comparing the value of different coverage (or categories of services) without taking into account any differences in coverage based on the method of delivery or means of cost control or utilization used; and
- Takes into account the ability of a State to reduce benefits by taking into account the increase in actuarial value of benefits coverage without taking into account any differences in coverage based on the method of delivery or means of cost control or utilization used and taking into account the ability of the State to reduce benefits by considering the increase in actuarial value of health benefits coverage offered under the State plan that results from the limitations on cost sharing (with the exception of premiums) under that coverage.

Insert a copy of the report.

The State assures that if the benchmark plan used by the State for purposes of comparison in establishing the aggregate value of the benchmark-equivalent package includes and of the following four categories of services, the actuarial value of the coverage for each of these categories of services in the benchmark-equivalent coverage package is at least 75% of the actuarial value of the coverage for that category of service in the benchmark plan used for comparison by the State:

- Prescription drugs;
- Mental health services;
- Vision services, and/or
- Hearing services,

In the text box below provide a description of the categories of benefits included and the actuarial value of the category as a percentage of the actuarial value of the coverage for the category of services included in the benchmark benefit plan.

**c Additional Benefits**

[ ] Insert a full description of the additional benefits including any limitations.
3. Service Delivery System

Check all that apply.

X The alternative benefit plan will be provided on a fee-for-service basis consistent with the requirements of section 1902(a) and implementing regulations relating to payment and beneficiary free choice of provider.

[ ] The alternative benefit plan will be provided on a fee-for-service basis consistent with the requirements cited above, except that it will be operated with a primary care case management system consistent with section 1905(a)(25) and 1905(t).

[ ] The alternative benefit plan will be provided through a managed care organization consistent with applicable managed care requirements. (42 CFR 438, 1903(m), and 1932).

[ ] The alternative benefit plan will be provided through PIHPs (Pre-paid Inpatient Health Plan) consistent with 42 CFR 438.

[ ] The alternative benefit plan will be provided through PAHPs (Pre-paid Ambulatory Health Plan).

[ ] The alternative benefit plan will be provided through a combination of the methods described above. Please describe how this will be accomplished.

4. Employer Sponsored Insurance

[ ] The alternative benefit plan is provided in full or in part through premiums paid for an employer sponsored health plan.
5. Assurances

N\A The State assures EPSDT services will be provided to individuals under 21 years old who are covered under the State Plan under section 1902(a)(10)(A).

[ ] Through Benchmark only

[ ] As an Additional benefit under section 1937 of the Act

X The State assures that individuals will have access to Rural Health Clinic (RHC) services and Federally Qualified Health Center (FQHC) services as defined in subparagraphs (B) and (C) of section 1905(a)(2).

X The State assures that payment for RHC and FQHC services is made in accordance with the requirements of section 1902(bb) of the Act.

X The State assures transportation (emergency and non-emergency) for individuals enrolled in an alternative benefit plan. Please describe how and under which authority(s) transportation is assured for these beneficiaries.

All modes of transportation are available to Medicaid enrollees, when necessary to access care and service covered under the Medicaid Program. Medicaid transportation is an optional item of medical assistance, per New York Social Services Law at § 365-a. Implementation of this law is found at Title 18 New York Code of Rules and Regulation at section 505.10 and is on file in New York’s State Plan.

6. Economy and Efficiency of Plans

X The State assures that alternative benefit coverage is provided in accordance with Federal upper payment limits procurement requirements and other economy and efficiency principles that would otherwise be applicable to the services or delivery system through which the coverage and benefits are obtained.

7. Compliance with the Law

X The State will continue to comply with all other provisions of the Social Security Act in the administration of the State plan under this title.

8. Implementation Date

X The State will implement this State Plan amendment on January 6, 2010 (date).

Provisions for Providing
Medical Assistance Transportation

The following provisions set forth the Department's policy concerning transportation services provided to Medical Assistance (MA) recipients for the purpose of obtaining necessary medical care and services which can be paid for under the MA program. These provisions set forth the standards which the Department will use in determining when the MA program will pay for transportation and describes the prior authorization process for obtaining payment.

The MA program covers all modes of transportation, including, but not limited to: emergency ambulance and non-emergency modes of transportation. Transportation is provided by service providers at Department-established fee schedules set at levels where the Department can successfully assure the availability of medically necessary transportation to services covered by the MA program.

A. Prior Authorization

1. Prior authorization is required for the following:

   a. all transportation to obtain medical care and services, except emergency ambulance transportation or Medicare approved transportation by ambulance service provided to an MA-eligible person who is also eligible for Medicare Part B payments.

   b. transportation expenses of an attendant for the MA recipient.

The provisions set forth the standards to be used in evaluating prior authorization requests and provides the prior authorization official (i.e., the Department or its contracted agents, the county department of social services[,] or their designated agents) with the authority to approve or deny reimbursement to MA recipients for the use of private vehicles (personal cars) or mass transportation which the recipient uses for the usual activities of daily living. A prior authorization official may approve reimbursement for the use of personal cars or mass transportation, however, if, in the opinion of the prior authorization official, circumstances so warrant. A prior authorization official may also approve reimbursement for the use of some other mode of transportation, such as ambulance, wheelchair or stretcher van, or taxi/livery, as required by the MA recipient.

2. Criteria to be used by the prior authorization official in making prior authorization determinations are:

   a. the MA recipient has access to necessary medical care or services by use of a private vehicle or by means of mass transportation which is used by the recipient for the usual activities of daily living;

   b. the frequency of visits or treatments within a short period of time whereby the recipient would suffer financial hardship if required to make payment for the transportation;

   c. the nature and severity of the MA recipient's illness which necessitates transportation by a mode other than that ordinarily used by the MA recipient (such as an acute event wherein an otherwise ambulatory recipient becomes physically disabled);

TN#: 12-33 Approval Date: ___December 20, 2012___
Supersedes TN#: 09-47 Effective Date: ___September 1, 2012___
d. the geographic locations of the MA recipient and the provider of medical care and services;

e. the medical care and services available within the common medical marketing area of the MA recipient’s community;

f. the need to continue a regimen of medical care or service with a specific provider; and,

g. any other circumstances which are unique to a particular MA recipient and which the prior authorization official determines have an effect on the need for payment of transportation services.

The decision to require the MA recipient to travel using a personal vehicle, public transit, or taxi is made by the prior authorization official based upon the prior authorization official's knowledge of personal vehicle ownership and the local public transit routes. When a more specialized mode of transportation is required, such as wheelchair or stretcher van, or ambulance, the prior authorization official will make a decision on the proper mode of transport after consideration of information obtained from a medical practitioner, supervisors, the Department, program guidance materials, and any other source available, that will help the official to make a reasoned decision.

B. Payment

1. Criteria to be used when establishing payment for medical assistance transportation:

   a. Social services districts, except those where the Commissioner of Health has assumed the management of transportation services, have the authority to establish payment rates with vendors of transportation services which will ensure the efficient provision of appropriate transportation for MA recipients in order for the recipients to obtain necessary medical care or services. Social services districts may establish such rates in a number of ways, which may include negotiation with the vendors. However, no established rate will be reimbursed unless that rate has been approved by the Department as the Department established rate.

   i. The State defines “department established rate” as the rate for any given mode of transportation which the department has determined will ensure the efficient provision of appropriate transportation to MA recipients in order for the recipients to obtain necessary medical care and services.

   ii. The department may either establish rate schedules at which transportation services can be assured or delegate such authority to the social services districts. Delegation of authority exists only in episodic circumstances in which immediate transportation is needed at a cost not considered in the established fee schedule. In order to ensure access to needed medical care and service, the social services districts will approve a rate to satisfy the immediate need.

   iii. Plans, rate schedules or amendments may not be implemented without departmental approval.

   iv. Social services districts have no authority to establish a fee schedule without the Department’s involvement; there is no incongruity between the Department’s and social services district’s fee schedules.
v. Payment for reimbursement of the MA recipient's use of a personal vehicle will be made at the Internal Revenue Service's established rate for Medical Mileage. Payment of reimbursement for use of a personal vehicle of a volunteer driver or family member of a MA recipient will be made at the Internal Revenue Service's established rate for Standard Mileage.

b. Payment for transportation is only available for transportation to and from providers of necessary medical care and services which can be paid for under the MA program. MA payment for transportation will not be made if the care or services are not covered under the MA program.

c. MA payment to vendors of transportation services is limited to situations where an MA recipient is actually being transported in the vehicle.

d. MA payment will not generally be made for transportation which is ordinarily made available to other persons in the community without charge. If federal financial participation is available for the costs of such transportation, the MA program is permitted to pay for the transportation.

e. Vendors of transportation services must provide pertinent cost data to a social services district upon request or risk termination from participation in the MA program.

Finally, the provisions require social services districts to notify applicants for and recipients of MA of the procedures for obtaining prior authorization of transportation services.

C. Transportation Management

The following table depicts, for each county, whether the county department of social services or State manages the transportation program.

TN #15-0052

Supersedes TN #14-0037

Approval Date: November 30, 2015

Effective Date: July 1, 2015
STANDARDS FOR THE COVERAGE OF ORGAN TRANSPLANT SERVICES

- Organ and tissue transplantation services must be performed in hospitals approved by the Commissioner of Health and the hospital must be a member of the Organ Procurement and Transplantation Network approved by the Secretary, U.S. Department of Health and Human Services and must abide by its rules and requirements.

- The hospital must participate in a patient registry program with an organ procurement organization designated by the Secretary, U.S. Department of Health and Human Services.

- The hospital must ensure that written policies are developed and that the written criteria used for the selection of patients for transplant services must be consistent with professional standards of practice and applied consistently.

- Chapter 589 of the Laws of 1990 amended the Public Health Law to provide for more equitable access to donated organs. To ensure equitable access to human organs to persons in need of transplants:

  - Each Organ Procurement Organization (OPO) must maintain a single waiting list for each type of organ and the policies and procedures for distributing organs to potential recipients must take into account patient factors such as tissue type.

  - No OPO designated to serve any part of New York State shall place any person on a waiting list for the allocation of organ(s) for transplantation if that person is listed on another waiting list for the same organ. The OPO must insure that the patient is not already listed by another OPO.

  - Each facility performing transplant services shall inform every transplant candidate that no patient may place his or her name on a waiting list maintained by an OPO designated to serve any part of New York State if the person is listed on any other waiting list maintained by another such OPO.

- The hospital must maintain a record of all patients who are referred for transplantation and the date of their referral, the results of the evaluation of all candidates for transplantation which documents the reasons a candidate is determined to be either suitable or unsuitable for transplantation, the date suitable candidates are selected for transplantation, the date the transplantation surgery occurred, the organs utilized, and the donor.

<td><strong>A.</strong> Section 1932(a)(1)(A) of the Social Security Act</td>
<td>The State of New York enrolls Medicaid beneficiaries into managed care entities (managed care organizations (MCOs) and/or primary care case managers (PCCMs)) in the absence of section 1115 or section 1915(b) waiver authority. This authority is granted under section 1932(a)(1)(A) of the Social Security Act (the Act). Under this authority, a state can amend its Medicaid state plan to require certain categories of Medicaid beneficiaries to enroll in managed care entities without being out of compliance with provisions of section 1902 of the Act on statewideness (42 CFR 431.50), freedom of choice (42 CFR 431.51) or comparability (42 CFR 440.230). This authority may not be used to mandate enrollment in Prepaid Inpatient Health Plans (PIHPs), Prepaid Ambulatory Health Plans (PAHPs), nor can it be used to mandate the enrollment of Medicaid beneficiaries who are Medicare eligible, who are Indians (unless they would be enrolled in certain plans-see D.2.ii. below), or who meet certain categories of “special needs” beneficiaries (see D.2.iii.-vii. below)</td>
</tr>
<tr>
<td><strong>B.</strong> General Description of the Program and Public Process</td>
<td>In April 2007, the New York legislature authorized the Department of Health (DOH) to establish Chronic Illness Demonstration Projects (CIDPs) to test models of care management and coordination to address the complex health and social needs of Medicaid fee-for-service recipients with complex behavioral and medical health conditions. Enrollment into the program will be voluntary in select geographical areas across the state. NY DOH will award a contract to a CIDP entity that will function as the overall Primary Care Case Management entity. Each CIDP entity will be responsible for ensuring the provision of primary care services in accordance with 1905(t)(1). CIDP entities will be responsible for the following functions: locate eligible beneficiaries; complete an initial health assessment and periodic reassessments; develop and update a care/service plan; coordinate care/discharge/referral among multiple providers; maintain state-specified frequency of contact (telephonic and in-home/provider office) with beneficiaries; and report specified process and outcome measures.</td>
</tr>
</tbody>
</table>

For B.1 and B.2, place a check mark on any or all that apply.

1. The State will contract with an i. MCO

- **ii.** PCCM (including capitated PCCMs that qualify as PAHPs)
- **iii.** Both

2. The payment method to the contracting entity will be:

- **i.** fee for service;
- **ii.** capitation;
- **iii.** a case management fee;
- **iv.** a bonus/incentive payment;
- **v.** a supplemental payment, or
- **vi.** other. (Please provide a description below).

Contractors will be at-risk for a portion of the monthly care coordination fee (MCCF) if quality, reporting and performance standards are not achieved. Any necessary recoupment of the MCCF will be withheld from future payments due to the contractor, and the federal portion of the recoupment will be returned to CMS.

In addition, the DOH will make available funds for shared cost savings incentive payments. Only contractors that have met all quality, reporting and performance standards will be eligible to participate in the shared savings. Shared savings incentive payments will not exceed 105% of the aggregate payment for Medicaid services received.

Reconciliation of at-risk and shared savings will be done annually, after the first contract year.

3. For states that pay a PCCM on a fee-for-service basis, incentive payments are permitted as an enhancement to the PCCM’s case management fee, if certain conditions are met.

If applicable to this state plan, place check mark to affirm the state has met all of the following conditions (which are identical to the risk incentive rules for managed care contracts published in 42 CFR 438.6(c)(5)(iv)).

- **i.** Incentive payments to the PCCM will not exceed 5% of the total FFS payments for those services provided or authorized by the PCCM for the period covered.
- **ii.** Incentives will be based upon specific activities and targets.

</tbody>
</table>

The demonstrations are to be established by a competitive procurement or discretionary grant. Prior to the development of the RFP document, the DOH Office of Health Insurance Programs (OHIP) consulted with many stakeholders, including: New York State (NYS) DOH public health experts in chronic disease, sister agencies such as the Office of Mental Health (OMH) and the Office of Alcohol and Substance Abuse Services (OASAS); experts in public health policy; experts in Medicaid quality improvement, public health research scientists; and medical and behavioral health providers. The purpose of this collaboration was to solicit input and expertise to assist in the design of a solicitation document that would support the development of CIDP programs that would address the complex needs of this population and fulfill the intent of the legislation. Based upon the input received, the RFP document was developed and made available for comment to many of the aforementioned entities.

In accordance with procurement regulations, an advertisement was placed in the “New York State Contract Reporter” informing the public that the CIDP RFP was to be released. The RFP and supportive documentation were also made available on the DOH website. Interested parties and potential bidders were sent letters via both the US Postal system and electronic mail informing them of the release of the RFP and inviting them to the Pre-Bid Conference. The Pre-Bid Conference, held after the RFP release, offered interested parties and potential bidders an opportunity to seek clarification and ask questions regarding the solicitation. All questions and answers discussed at the Pre-Bid Conference or submitted post-Conference were made public on the DOH website and sent to all interested parties, potential bidders and those entities that had submitted a letter of interest. A press release was issued from

C. **State Assurances and Compliance with the Statute and Regulations**

If applicable to the state plan, place a check mark to affirm that compliance with the following statutes and regulations will be met.

1. ___ The State assures that all of the applicable requirements of section 1903(m) of the Act, for MCOs and MCO contracts will be met.
2. ✓ The state assures that all the applicable requirements of section 1905(t) of the Act for PCCMs and PCCM contracts will be met.
3. ✓ The state assures that all the applicable requirements of section 1932 (including subpart (a)(1)(A) of the Act, for the state’s option to limit freedom of choice by requiring recipients to receive their benefits through managed care entities will be met.
4. ___ The state assures that all applicable requirements of 42 CFR 431.51 regarding freedom of choice for family planning services and supplies as defined in section 1905(a)(4)(C) will be met.
5. ✓ The state assures that all applicable managed care requirements of 42 CFR Part 438 for MCOs and PCCMs will be met.
6. ___ The state assures that all applicable requirements of 43 CFR 438.6(c) for payments under any risk contracts will be met.

---

**TN #08-62**

**Supersedes TN NEW**

**Approval Date** November 13, 2008

**Effective Date** July 1, 2008
### Citation | Condition or Requirement
---|---
1932(a)(1)(A)  42 CFR 447.362  42 CFR 438.50(c)(6) | 7. The state assures that all applicable requirements of 42 CFR 447.362 for payments under any nonrisk contracts will be met.
45 CFR 74.40 | 8. The state assures that all applicable requirements of 45 CFR 92.36 for procurement of contracts will be met.

**D. Eligible Groups**

**Enrollment will be voluntary**

1932(a)(1)(A)(i) | 1. List all eligible groups that will be enrolled on a mandatory basis.
Use a check mark to affirm if there is voluntary enrollment any of the following mandatory exempt groups.

1932(a)(2)(B)  42 CFR 438(d)(1) | i. Recipients who are also eligible for Medicare.
If enrollment is voluntary, describe the circumstances of the enrollment.
*(Example: Recipients who become Medicare eligible during mid-enrollment, remain eligible for managed care and are not disenrolled into fee-for-service.)*

1932(a)(2)(A)(i)  42 CFR 438.50(d)(3)(i) | ii. Indians who are members of Federally recognized Tribes except when the MCO or PCCM is operated by the Indian Health Service or an Indian Health program operating under a contract, grant or cooperative agreement with the Indian Health Service pursuant to the Indian Self Determination Act; or an Urban Indian program operating under a contract or grant with the Indian Health Service pursuant to title V of the Indian Health Care Improvement Act.

1932(a)(2)(A)(ii) | iii. Children under the age of 19 years, who are eligible for Supplemental Security Income (SSI) under Title XVI.

1932(a)(2)(A)(v) | v. Children under the age of 19 years who are in foster care or other out-of-

### E. Identification of Mandatory Exempt Groups

**Enrollment will be voluntary; children under age 19 are excluded**

1. Describe how the state defines children who receive services that are funded under section 501(a)(1)(D) of title V. *(Examples: children receiving services at a specific clinic or enrolled in a particular program.)*

2. Place a check mark to affirm if the state's definition of title V children is determined by:

   - [ ] i. program participation,
   - [ ] ii. special health care needs, or
   - [ ] iii. both

3. Place a check mark to affirm if the scope of these title V services is received through a family-centered, community-based, coordinated care system.

   - [ ] i. yes
   - [ ] ii. no

4. Describe how the state identifies the following groups of children who are exempt from mandatory enrollment: *(Examples: eligibility database, self-identification)*

   - i. Children under 19 years of age who are eligible for SSI under title XVI;
   - ii. Children under 19 years of age who are eligible under section 1902(e)(3) of the Act;

### H. Enrollment process

**Not Applicable (no default enrollment)**

1. **Definitions**
   
   i. An existing provider-recipient relationship is one in which the provider was the main source of Medicaid services for the recipient during the previous year. This may be established through state records of previous managed care enrollment or fee-for-service experience, or through contact with the recipient.

   ii. A provider is considered to have “traditionally served” Medicaid recipients if it has experience in serving the Medicaid population.

2. **State process for enrollment by default.**

### TN #08-62

- **Approval Date**: November 13, 2008
- **Effective Date**: July 1, 2008
New York

</tr>
<tr>
<td></td>
<td>ii. the relationship with providers that have traditionally served Medicaid recipients (as defined in H.2.ii).</td>
</tr>
<tr>
<td></td>
<td>iii. the equitable distribution of Medicaid recipients among qualified MCOs and PCCMs available to enroll them, (excluding those that are subject to intermediate sanction described in 42 CFR §438.702(a)(4)); and disenrollment for cause in accordance with 42 CFR §438.56 (d)(2). (Example: No auto-assignments will be made if MCO meets a certain percentage of capacity.)</td>
</tr>
</tbody>
</table>

3. As part of the state's discussion on the default enrollment process, include the following information:

   i. The state will ___ will not ___ use a lock-in for managed care.

   ii. The time frame for recipients to choose a health plan before being auto-assigned will be ________________.

   iii. Describe the state's process for notifying Medicaid recipients of their auto-assignment. (Example: state generated correspondence.)

   iv. Describe the state's process for notifying the Medicaid recipients who are auto-assigned of their right to disenroll without cause during the first 90 days of their enrollment. (Examples: state generated correspondence, HMO enrollment packets, etc.)

   v. Describe the default assignment algorithm used for auto-assignment. (Examples: ratio of plans in a geographic service area to potential enrollees, usage of quality indicators.)

</tr>
</tbody>
</table>

**I. State assurances on the enrollment process**

Recipient enrollment in a CIDP will be on an “opt-in”, voluntary basis. Recipients will be notified by two consecutive mailings, first from the DOH and second from the CIDP contractor regarding their eligibility to enroll in a CIDP and providing information on the demonstration program. Other Department approved methods of outreach to recipients not responsive to mailings will be utilized as needed, e.g. telephoning, utilizing community outreach workers, and outreach and enrollment during network provider visits. All contractor communications with recipients will be approved by the DOH, including letters of notification, brochures and educational materials and telephonic scripts.

Recipient enrollment may be conducted face to face or telephonically. At the time of enrollment the recipient must provide their written consent to participate in the CIDP program. At the time of enrollment each enrollee will be notified of their right to disenroll or “opt out” of the CIDP at anytime. The enrollee will be notified that enrollment in a CIDP will not limit or impair their ability to access Medicaid services to which they are entitled.

Place a check mark to affirm the state has met all of the applicable requirements of choice, enrollment, and re-enrollment.

1. **✓** The state assures it has an enrollment system that allows recipients who are already enrolled to be given priority to continue that enrollment if the MCO or PCCM does not have capacity to accept all who are seeking enrollment under the program.

2. ____ The state assures that, per the choice requirements in 42 CFR 438.52, Medicaid recipients enrolled in either an MCO or PCCM model will have a choice of a least two entities unless the area is considered rural as defined in 42 CFR 438.52(b)(3).

3. ____ The state plan program applies the rural exception to choice requirements of 42 CFR 438.52(a) for MCOs and PCCMs.

</tbody>
</table>

**J. Disenrollment**

1. The state will✓/will not✓ use lock-in for managed care.
2. The lock-in will apply for___ months (up to 12 months).
3. Place a check mark to affirm state compliance.

4. ✓ The state assures that beneficiary requests for disenrollment (with and without cause) will be permitted in accordance with 42 CFR 438.56(c).
4. Describe any additional circumstances of “cause” for disenrollment(if any).

**K. Information requirements for beneficiaries**

Place a check mark to affirm state compliance.

5. ✓ The state assures that its state plan program is in compliance with 42 CFR 438.10(i) for information requirements specific to MCOs and PCCM programs operated under section 1932(a)(1)(A)(i) state plan amendments. (Place a check mark to affirm state compliance).

**L. List all services that are excluded for each model (MCO & PCCM)**

</tr>
</tbody>
</table>

**M. Selective contracting under a 1932 state plan option**

To respond to items #1 and #2, place a check mark. The third item requires a brief narrative.

1. The state will ✅/will not ☐ intentionally limit the number of entities it contracts under a 1932 state plan option.

2. ✅ the state assures that if it limits the number of contracting entities, this limitation will not substantially impair beneficiary access to services.

3. Describe the criteria the state uses to limit the number of entities it contracts under a 1932 state plan option.
   (Example: a limited number of providers and enrollees.)

To establish the CIDP programs NYS utilized a request for proposal (RFP) competitive procurement. Eligible bidders authorized to submit a proposal submission for a CIDP were mandated in Social Services Law § 364-1 that authorized the demonstrations. The RFP document included detailed specifications and technical requirements. Each bidder was required to submit a Technical Proposal and a Financial Proposal, which were evaluated by separate teams following criteria developed from RFP requirements, detailed specification and cost requirements. All evaluation and selection documents were reviewed and approved by the DOH Procurement Division prior to receipt of the proposals. The results of the evaluation were then reported to the selection committee, who made the final award(s) determination. Oversight of the procurement and contractor selection process is done by the NYS Office of the State Comptroller who must review and approve all processes, documents and contracts for accuracy and compliance with NYS financial and procurement laws.

4. The selective contracting provision is not eligible to this state plan.

Health Homes Intro
MEDICAID - Health Homes - NYS Health Home Program - NY - 2016

Program Authority

1945 of the Social Security Act
The state elects to implement the Health Homes state plan option under Section 1945 of the Social Security Act.

Name of Health NYS Health Home Program
Program

Executive Summary

Provide an executive summary of this Health Homes program including the goals and objectives of the program, the population, providers, services and service delivery model used.

Summary description including goals and objectives:
New state plan amendment.
Supersedes transmittal # 15-0020
Transmittal # 16-0034
This State Plan Amendment is in Attachment 3.1-H of the State Plan, except for the Payment Methodologies section, which is in Attachment 4.19-B of the State Plan.

Part I: Summary of new State Plan Amendment (SPA) #16-0034
The Department of Health proposes to amend the Title XIX (Medicaid) State Plan for non-institutional services. The following changes are proposed:

Effective September 1, 2016 through November 30, 2016 the State will continue to reimburse converted Targeted Case Management (TCM) providers at their existing Health Home Legacy rates. Health Home per member rates, for Health Home providers including TCM providers, that are based on three tiers “High, Medium, Low”, acuity, functional status, and region and a uniform case finding fee, which were currently scheduled to take effect on September 1, 2016, will now become effective on December 1, 2016. Health Home per member rates to implement court orders for Assisted Outpatient population (Health Home Plus) and the Adult Home population will remain in effect and unchanged.

Amendment change located in MACPRO Unit 7 p. 2 of 3
Key: [ ] represents deleted text and underlined represents new text.

On September 1, 2016 the case finding fee will be set at $135.
Effective January 1, 2015 TCM programs for adults will be paid their existing TCM rates until [August 31, 2016] November 30, 2016.

Part II: Summary of Changes Concerning MMDL to MACPro Conversion

https://macpro.cms.gov/suite/tempo/records/type/EZlOsA/item/isB9Co0jznkfJL+yQCg3q05... 1/3/2017

TN# 16-0034 Approval Date: 12/22/16
Supersedes TN # 15-0020 Effective Date: 09/01/16
In migrating information from New York State Health Home approved SPA #15-0020 housed in CMS’ MMDL application to the newly released MACPro application, the following transactions/edits were executed with the assistance and agreement of CMS. Highlights of this conversion and subsequent decisions have been summarized in the following categories:

- Omitted language from previously approved SPA #15-0020;
- Suggested changes by CMS and NYS response;
- Acceptance of all assurances - new CMS requirement in MACPros that all assurances must be accepted in order to validate and complete submission;
- Completion of Monitoring, Quality Measurement and Evaluation; and
- Other: Required documentation, flowcharts, etc.

General Assurances

- The state provides assurance that eligible individuals will be given a free choice of Health Homes providers.
- The state provides assurance that it will not prevent individuals who are dually eligible for Medicare and Medicaid from receiving Health Homes services.
- The state provides assurance that hospitals participating under the state plan or a waiver of such plan will be instructed to establish procedures for referring eligible individuals with chronic conditions who seek or need treatment in a hospital emergency department to designated Health Homes providers.
- The state provides assurance that FMAP for Health Homes services shall be 90% for the first eight fiscal quarters from the effective date of the SPA. After the first eight quarters, expenditures will be claimed at the regular matching rate.
- The state provides assurance that it will have the systems in place so that only one 8-quarter period of enhanced FMAP for each health homes enrollee will be claimed.
- The state provides assurance that there will be no duplication of services and payment for similar services provided under other Medicaid authorities.

PRA Disclosure Statement: According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. This valid OMB control number for this information collection is 0938-1166. The time required to complete this information collection is estimated to average 40 hours per response, including the time to read instructions, search existing data sources, gather the data needed, and complete and review the information collection. TN# 16-0034
Supersedes TN # 15-0020

Approval Date: 12/22/16
Effective Date: 09/01/16
Health Homes Population and Enrollment Criteria

The state will provide Health Homes services available to the following categories of Medicaid participants:

- Categorically Needy (Mandatory and Options for Coverage) Eligibility Group
- Medically Needy Eligibility Group

Mandatory Medically Needy
- Medically Needy Pregnant Women
- Medically Needy Children under Age 18

Optional Medically Needy (select the groups included in the population)
- Families and Adults
- Medically Needy Children Age 18 through 20
- Medically Needy Parents and Other Caretaker Relatives
- Aged, Blind and Disabled
- Medically Needy Aged, Blind or Disabled
- Medically Needy Blind or Disabled Individuals Eligible in 1973

Population Criteria

The state elects to offer Health Homes services to individuals with:

- Two or more chronic conditions

Specify the conditions included:
- Mental Health Condition
- Substance Use Disorder
- Asthma
- Diabetes
One chronic condition and the risk of developing another

Specify the conditions included
- Mental Health Condition
- Substance Use Disorder
- Asthma
- Diabetes
- Heart Disease
- BMI over 25
- Other (specify)

Specify the criteria for at risk of developing another chronic condition
HIV, Serious Mental Illness (SMI) and Serious Emotional Disturbance (SED) and complex trauma are each single qualifying conditions for which NYS was approved. Providers do not need to document a risk of developing another condition in these cases.

New York's Medicaid program serves over 6 million enrollees with a broad array of health care needs and challenges. While many Medicaid enrollees are relatively healthy and access practitioners to obtain episodic and preventive health care, the Medicaid program also has several population groups who have complex medical, behavioral, and long term care needs that drive a high volume of high cost services including inpatient and long term institutional care.

Of the 6 million Medicaid enrollees who access services on a fee for service or managed care basis, 975,000 (including dual eligibles) have been identified as high cost/high need enrollees with two or more chronic conditions and/or a Serious Persistent Mental Illness. These high cost/high need enrollees are categorized into four groups representing enrollees with intellectual disabilities, enrollees in need of long term care services, enrollees with behavioral health issues, and enrollees with two or more chronic medical conditions. One of NYS's first health home initiatives will focus on enrollees with behavioral health and/or chronic medical conditions.

The NYS Medicaid program plans to certify health homes that build on current provider partnerships. Applicant health home providers will be required to meet State defined health home requirements that assure access to primary, specialty and behavioral health care that support the integration and coordination of all care. Recently passed New York State Law provides the Commissioners of Health, Mental Health, Alcoholism and Substance Abuse Services, and People with Developmental Disabilities the authority to integrate care delivery by synchronizing health care, substance abuse services, and mental health certification requirements for health homes. Approved health homes will directly provide, or contract for, health home services to the identified eligible beneficiaries. To meet this goal, it is expected that health home providers will develop health home networks with primary, medical, specialty and mental health providers, substance abuse service providers, community based organizations, managed care plans and others to provide enrollee access to needed services.

To facilitate the use of health information technology by health homes to improve service delivery and coordination across the care continuum, NY has developed initial and final HIT standards for health homes that are consistent with NYS' Operational Plan for Health Information Technology and Exchange approved by CMS. Providers must meet initial HIT standards to implement a health home. Furthermore, applicants must provide a plan to achieve the final standards within eighteen months of program initiation in order to be approved as a health home provider.

https://maapro.cms.gov/suite/tempo/records/type/EZhOsA/item/lsB9CoOjznkFjLYQCG3q05... 1/3/2017

TN# 16-0034
Supersedes TN # 15-0020
Approval Date: 12/22/16
Effective Date: 09/01/16
To the extent possible, health care providers will be encouraged to utilize regional health information organizations or qualified entities to access patient data and to develop partnerships that maximize the use of HIT. Health care providers will be encouraged to utilize HIT as feasible to create, document, execute and update a plan of care that is accessible to the interdisciplinary team of providers for every patient. Health care providers will also be encouraged to utilize HIT as feasible to process and follow-up on patient testing, treatments, community-based services and provider referrals.

NY will target populations for health home services in the major categories and the associated 3M Clinical Risk Group categories of chronic behavioral and medical conditions listed below.

Major Category: Alcohol and Substance Abuse
3M Clinical Risk Group (3M CRGs) Category
1. Alcohol Use Disorder
2. Chronic Alcohol Abuse
3. Cocaine Abuse
4. Drug Abuse - Cannabis/NOS/NEC
5. Substance Abuse
6. Opioid Abuse
7. Other Significant Drug Abuse

Major Category: Mental Health
3M Clinical Risk Group (3M CRGs) Category
1. Bipolar Disorder
2. Conduct, Impulse Control, and Other Disruptive Behavior Disorders
3. Dementing Disease
4. Depressive and Other Psychoses
5. Eating Disorder
6. Major Personality Disorders
7. Psychiatric Disease (Except Schizophrenia)
8. Schizophrenia

Major Category: Cardiovascular Disease
3M Clinical Risk Group (3M CRGs) Category
1. Advanced Coronary Artery Disease
2. Cerebrovascular Disease
3. Congestive Heart Failure
4. Hypertension
5. Peripheral Vascular Disease

Major Category: HIV/AIDS
3M Clinical Risk Group (3M CRGs) Category
1. HIV Disease

Major Category: Metabolic Disease
3M Clinical Risk Group (3M CRGs) Category
1. Chronic Renal Failure
2. Diabetes

Major Category: Respiratory Disease
3M Clinical Risk Group (3M CRGs) Category
1. Asthma
2. Chronic Obstructive Pulmonary Disease

Major Category: Other
3M Clinical Risk Group (3M CRGs) Category
1. Other Chronic Disease - conditions listed above as well as other specific diagnoses of the population.

Description of population selection criteria

The target population to receive health home services under this amendment includes categorically needy and medically needy beneficiaries served by Medicaid managed care or fee for service and Medicare/Medicaid dual eligible beneficiaries who meet health home selection criteria. NY will offer Health Home Services to individuals with two or more chronic conditions, individuals with HIV/AIDS, individuals with one serious mental illness, individuals with SED, and individuals with complex trauma.

Enrollees in the behavioral health category have been identified through claims and encounter data analysis as having received mental health or substance abuse services and/or having select mental health diagnoses. These enrollees often have co-morbid chronic, medical conditions. In addition, based on experience in working with this population, many of these enrollees have social issues, such as lack of permanent housing, that take priority to these individuals over their health care conditions. Enrollees in the chronic medical condition category have been identified through claims and encounter data analysis as having two or three chronic medical conditions.

Complex trauma exposure in childhood has been shown to impair brain development and the ability to learn and develop social and emotional skills during childhood, consequently increasing the risks of developing serious or
chronic diseases in adolescence and adulthood. Children who have experienced complex trauma and who are not old enough to have experienced long-term impacts are uniquely vulnerable. Childhood exposure to child maltreatment, including emotional abuse and neglect, exposure to violence, sexual and physical abuse are often traumatic events that continue to be distressing for children even after the maltreatment has ceased, with negative physical, behavioral, and/or psychological effects on the children. Since child maltreatment occurs in the context of the child's relationship with a caregiver, the child's ability to form secure attachment bonds, sense of safety and stability are disrupted. Without timely and effective intervention during childhood, a growing body of research shows that a child's experience of these events (simultaneous or sequential maltreatment) can create wide-ranging and lasting adverse effects on developmental functioning, and physical, social, emotional or spiritual well-being. Enrolling children who are experiencing complex trauma in Health Homes will work to prevent, while an individual is still in childhood, the development of other more complex chronic conditions in adulthood.

Enrollees in the complex trauma category will be identified for referral to Health Homes by various entities, including child welfare systems (i.e., foster care and local departments of social services), health and behavioral health care providers, and other systems (e.g., education) that impact children.

Enrollees in the behavioral health category have been identified through claims and encounter data analysis as having received mental health or substance abuse services and/or having select mental health diagnoses. These enrollees often have co-morbid chronic medical conditions. In addition, based on experience working with this population, many of these enrollees have social issues, such as lack of permanent housing, that take priority to these individuals over their health care conditions. Enrollees in the chronic medical condition category have been identified through claims and encounter data analysis as having two or three chronic medical conditions.

Specify the criteria for a serious and persistent mental health condition

The guidance on complex trauma draws upon the domains within the definition of serious emotional disturbance (SED). While there may be similarities in the condition(s) and symptoms that arise in either complex trauma or SED, the therapeutic approaches associated with the same diagnoses may vary significantly when the symptoms arising from traumatic experiences are identified as such. Trauma experts indicate that with complex trauma, the clinical diagnoses may be severe and typically present as comorbidities or multiple diagnoses. 1. Definition of Complex Trauma a. The term complex trauma incorporates at least: i. Infants and children's exposure to multiple traumatic events, often of an invasive, interpersonal nature, and ii. The wide-ranging long-term impact of this exposure. b. Nature of the traumatic events: i. Often is severe and pervasive, such as abuse or profound neglect. ii. Usually begins early in life. iii. Can be disruptive of the child's development and the formation of a healthy sense of self (with self-regulating, executive functioning, self-perceptions, etc.). iv. Often occur in the context of the child's relationship with a caregiver. v. Can interfere with the child's ability to form a secure attachment bond, which is considered a prerequisite for healthy social-emotional functioning. c. Many aspects of a child's healthy physical and mental development rely on this secure attachment, a primary source of safety and stability. d. Wide-ranging, long-term adverse effects can include impairments in i. Physiological responses and related neurodevelopment, ii. Emotional responses, iii. Cognitive processes including the ability to think, learn, and concentrate; and iv. Impulse control and other self-regulating behavior. v. Self-image, and vi. Relationships with others. Effective October 1, 2016 complex trauma and SED will each be a single qualifying condition.

Enrollment of Participants

Participation in a Health Home is voluntary. Indicate the method the state will use to enroll eligible Medicaid individuals into a Health Home.

- Opt-In to Health Homes provider
- Referral and assignment to Health Homes provider with opt-out
- Other (describe)

Describe the process used

Individuals eligible for health home services will be identified by the State. Individuals will be assigned to a health home provider based on existing relationships with health care providers or health care delivery system relationships, geography, and/or qualifying condition. Individuals will be enrolled into an appropriate health home and be given the option to choose another health home when available, or opt out of enrollment in a health home. Individuals will be notified by U.S. mail of their health home enrollment. The notification letter will identify the assigned health home, describe the individual's option to select another health home or opt out of receiving health home services in a designated time period, and briefly describe health home services. The State will provide health home providers a roster of assigned enrollees and current demographic information to facilitate outreach and engagement.

Individuals that are under 21 years of age, including those for which consent to enroll in a health home will be provided by a parent or guardian, will be referred to health homes by health homes, care managers, managed care plans and other providers and entities, including local departments of social...
services, and local government units. Referrals will be processed for assignment, and such assignments will take into account existing relationships with health care providers or health care delivery system relationships, geography, and/or qualifying condition. Such individuals/parents/guardians will be given the option to choose another health home when available, or opt out of enrollment of a health home.

✓ The state provides assurance that it will clearly communicate the individual's right to opt out of the Health Homes benefit or to change Health Homes providers at any time and agrees to submit to CMS a copy of any letter or communication used to inform the individuals of the Health Homes benefit and their rights to choose or change Health Homes providers or to elect not to receive the benefit.

Service Definitions

Provide the state's definitions of the following Health Homes services and the specific activities performed under each service

Comprehensive Care Management

Definition
A comprehensive individualized patient centered care plan will be required for all health home enrollees. The care plan will be developed based on the information obtained from a comprehensive health risk assessment used to identify the enrolled patient's physical, mental health, chemical dependency and social service needs. The individualized care plan will be required to include and integrate the individual's medical and behavioral health services, rehabilitative, long term care, social service needs, as applicable. The care plan will be required to clearly identify the primary care physician/nurse practitioner, specialists, behavioral health care provider(s), care manager and other providers directly involved in the individual’s care. The individual's plan of care must also identify community networks and supports that will be utilized to address their needs. Goals and timeframes for improving the patient's health, their overall health care status and the interventions that will produce this effect must also be included in the plan of care.

The care manager will be required to make sure that the individual (or their guardian) plays a central and active part in the development and execution of their plan of care, and that they are in alignment with the goals, interventions and time frames contained in the plan. Family members and other supports involved in the patient's care should be identified and included in the plan and execution of care as requested by the individual.

The care plan must also include outreach and engagement activities which will support engaging the patient in their own care and promote continuity of care. In addition, the plan of care will include periodic reassessment of the individual's needs and goals and clearly identify the patient's progress in meeting goals.

Changes in the plan of care will be made based on changes in patient need.

Describe how Health Information Technology will be used to link this service in a comprehensive approach across the care continuum

To facilitate the use of health information technology by health homes to improve service delivery and coordination across the care continuum, NY has developed initial and final HIT standards. Providers must meet the initial HIT standard to implement a health home, as feasible. NY anticipates that a portion of health home providers may not utilize HIT in their current programs. These providers will be encouraged to utilize regional health information organizations (RHIo) or a qualified entity to access patient data and to develop partnerships that maximize the use of HIT across providers (i.e. hospitals, TCs). Applicants must provide a plan in order to achieve the final HIT standards within eighteen months of program initiation in order to be approved as a health home provider.

Health home providers will be encouraged to utilize HIT as feasible to create, document and execute and update a plan of care for every patient that is accessible to the interdisciplinary team of providers. Health home providers will also be encouraged to utilize HIT as feasible to process and follow up on patient testing, treatments, services and referrals.

Scope of service

The service can be provided by the following provider types

https://macpro.cms.gov/suite/tempo/records/type/EZhOsA/item/isB9Co0jznklJyQCg3q05... 1/3/2017

TN# 16-0034

Effective Date: 09/01/16
NY - Submission Package - NY2016MH00020 - (NY-16-0034)

Attachment 3.1-H

Multidisciplinary teams
NY health homes will use multidisciplinary teams of medical, mental health, chemical dependency treatment providers, social workers, nurses and other care providers led by a dedicated care manager who will assure that enrollees receive needed medical, behavioral, and social services in accordance with a single plan of care.

Care Coordination

Definition
The health home provider will be accountable for engaging and retaining health home enrollees in care, as well as coordinating and arranging for the provision of services, supporting adherence to treatment recommendations, and monitoring and evaluating the enrollee’s needs. The individualized plan of care will identify all the services necessary to meet goals needed for care management of the enrollee such as prevention, wellness, medical treatment by specialists and behavioral health providers, transition of care from provider to provider, and social and community services where appropriate.

In order to fulfill the care coordination requirements, the health home provider will assign each individual enrollee one dedicated care manager who is responsible for overall management of the enrollee’s plan of care. The assigned health home care manager will be clearly identified in the patient record and will have overall responsibility and accountability for coordinating all aspects of the individual’s care. The health home provider will be responsible to assure that communication will be fostered between the dedicated care manager and treating clinicians to discuss as needed enrollee’s care needs, conflicting treatments, change in condition, etc. which may necessitate treatment change (i.e., written orders and/or prescriptions).

The health home provider will be required to develop and have policies, procedures and accountabilities (contractual agreements) in place, to support and define the roles and responsibilities for effective collaboration between primary care, specialist, behavioral health providers and community-based organizations. The health home provider will be required to develop and implement successful collaboration through use of evidence-based referrals, follow-up consultations, and regular, scheduled case review meetings with all members of the interdisciplinary team. The health home provider will have the option of utilizing technology conferencing tools including audio, video and/or web deployed solutions when security protocols and precautions are in place to protect PHI to support care management/coordination activities.

The health home provider will be required to develop and utilize a system to track and share patient information and care needs across providers, monitor patient outcomes, and initiate changes in care as necessary to address patient need.

Describe how Health Information Technology will be used to link this service in a comprehensive approach across the care continuum
Health home providers will be encouraged to utilize RHIOs or a qualified entity to access patient data and to develop partnerships that maximize the use of HIT across providers (i.e. hospitals, TCMs). Health home providers will utilize HIT as feasible to create, document and execute and update a plan of care for every patient that is accessible to the interdisciplinary team of providers. Health home providers will also be encouraged to utilize HIT as feasible to monitor patient outcomes, initiate changes in care and follow up on patient testing, treatments, services and referrals.

The service can be provided by the following provider types

- Behavioral Health Professionals or Specialists
- Nurse Practitioner
- Nurse Care Coordinators
- Nurses
- Medical Specialists
- Physicians

Provider Type  Description

multidisciplinary teams  NY health homes will use multidisciplinary teams of medical, mental health, chemical dependency treatment providers, social workers, nurses and other care providers led by a dedicated care manager who will assure that enrollees receive needed medical, behavioral, and social services in accordance with a single plan of care.

Health Promotion

Definition
Health promotion begins for eligible health home enrollees with the commencement of outreach and engagement activities. NYS' health home plan for outreach and engagement will require a health home provider to actively seek to engage patients in care by phone, letter, HIT and community "in reach" and outreach. Each of these outreach and engagement functions will all include aspects of comprehensive care management, care coordination, and referral to community and social support services. All of the activities are built around the notion of linkages to care that address all of the clinical and non-clinical care needs of an individual and health promotion. The health home provider will support continuity of care and health promotion through the development of a treatment relationship with the individual and the interdisciplinary team of providers. The health home provider will promote evidence-based wellness and prevention by linking health home enrollees with resources for smoking cessation, diabetes, asthma, hypertension, self-help recovery resources, and other services based on individual needs and preferences. Health promotion activities will be utilized to promote patient education and self-management of their chronic condition.

Describe how Health Information Technology will be used to link this service in a comprehensive approach across the care continuum.
Health home providers will be encouraged to utilize RHIOs or a qualified entity to access patient data and to develop partnerships that maximize the use of HIT across providers (i.e., hospitals, TCMs). The health home providers will utilize HIT as feasible to promote, link, manage and follow up on enrollee health promotion activities.

Comprehensive Transitional Care from Inpatient to Other Settings (including appropriate follow-up)

Definition

Comprehensive transitional care will be provided to prevent enrollee avoidable readmission after discharge from an inpatient facility (hospital, rehabilitative, psychiatric, skilled nursing or treatment facility) and to ensure proper and timely follow-up care. To accomplish this, the health home provider will be required to develop and have in place with hospitals and residential/rehabilitation facilities in their network to provide the health home care manager prompt notification of an enrollee's admission and/or discharge to/from an emergency room, inpatient, or residential/rehabilitation setting.

The health home provider will also have policies and procedures in place with local practitioners, health facilities including emergency rooms, hospitals, and residential/rehabilitation settings, providers and community-based services to ensure coordinated, and safe transition in care for its patients who require transfer to/from sites of care.

The health home provider will be required to develop and have a systematic follow-up protocol in place to assure timely access to follow-up care post-discharge that includes at a minimum receipt of a summary care record from the discharging entity, medication reconciliation, and a plan for timely scheduled appointments at recommended outpatient providers.

The health home care manager will be an active participant in all phases of care transition including discharge planning and follow-up to assure that enrollees received follow up care and services and re-engagement of patients who have become lost to care.

Describe how Health Information Technology will be used to link this service in a comprehensive approach across the care continuum.

Health home providers will be encouraged to utilize RHIOs or a qualified entity to access patient data and to develop partnerships that maximize the use of HIT across providers (i.e., hospitals, TCMs). The health home provider will utilize HIT as feasible to communicate with health facilities and to facilitate interdisciplinary collaboration among all providers, the patient, family, care givers and local supports.

Scope of service

The service can be provided by the following provider types:

- Behavioral Health Professionals or Specialists
- Nurse Practitioner
- Nurse Care Coordinators
- Nurses
- Medical Specialists

Individual and Family Support (which includes authorized representatives)

Definition

The patient's individualized plan of care will reflect and incorporate the patient and family or caregiver preferences, education and support for self-management, self help recovery, and other resources as appropriate. The provider will share and make accessible to the enrollee, their families or other caregivers (based on the individual's preferences), the individualized plan of care by presenting options for accessing the enrollee's clinical information.

Peer support, support groups, and self-care programs will be utilized by the health home provider to increase patients and caregivers knowledge about the individual's disease(s), promote the enrollee's engagement and self-managed capabilities, and help the enrollee improve adherence to their prescribed treatment. The provider will discuss and provide the enrollee, the enrollee's family and care givers, information on advance directives in order to allow them to make informed end of life decisions ahead of time.

The health home provider will ensure that all communication and information shared with the enrollee, the enrollee's family and caregivers is language, literacy and culturally appropriate so it can be understood.

Describe how Health Information Technology will be used to link this service in a comprehensive approach across the care continuum.

Health home providers will be encouraged to utilize RHIOs or a qualified entity to access patient data and to develop partnerships that maximize the use of HIT across providers (i.e., hospitals, TCMs). The health home provider will utilize HIT as feasible to provide the patient access to care plans and options for accessing clinical information.

Referral to Community and Social Support Services

Definition
The health home provider will identify available community-based resources and actively manage appropriate referrals, access to care, engagement with other community and social supports, coordinate services and follow-up post engagement with services. To accomplish this, the health home provider will develop policies, procedures and accountabilities (through contractual agreements) to support effective collaboration with community-based resources, that clearly define the roles and responsibilities of the participants.

The plan of care will include community-based and other social support services, appropriate and ancillary healthcare services that address and respond to the patient's needs and preferences, and contribute to achieving the patient's goals.

Describe how Health Information Technology will be used to link this service in a comprehensive approach across the care continuum

Provider Infrastructure

Describe the infrastructure of provider arrangements for Health Home Services.

New York's health home provider infrastructure will include designated providers working with multidisciplinary teams as described below. NYS Medicaid providers eligible to become health homes include managed care plans, hospitals, medical, mental, and chemical dependency treatment clinics, primary care providers that meet health home provider standards. To assure that NY health homes meet the proposed federal health home model of service delivery and NYS hospitals, clinics, physicians, mental health experts, chemical dependency treatment experts and housing providers. Representatives from the Department of Alcoholism and Substance Abuse Services also participated in the development of these standards. The standards set the groundwork for assuring that health home enrollees will receive appropriate, and timely access to medical, behavioral, and social services in a coordinated and integrated manner.

NY health homes will use multidisciplinary teams of medical, mental health, chemical dependency treatment providers, social workers, nurses and other care planning of care. Optional team members may include nutritionists, dietitians, pharmacists, outreach workers, including peer specialists, and other representatives as the care manager on patient status, treatment options, actions taken and outcomes as a result of those interventions. All members of the team will also be responsible for ensuring that care is person-centered, culturally competent and linguistically capable.

A single care management record will be agreed to and shared by all team professionals and care reviews will be conducted on a regular basis. The care manager will be responsible for overall management and coordination of the enrollee's care plan which will include both medical/behavioral health and social service needs and goals.

In order to ensure the delivery of quality health home services, the State will provide educational opportunities for health home providers, such as webinars, regional meetings and/or collaboration of stakeholders to foster shared learning, information sharing and problem solving. Educational opportunities will be provided to support the provision of timely, comprehensive, high-quality health homes services that are whole person focused and that integrate medical, behavioral health and other needed supports and social services. The State will maintain a highly collaborative and coordinated working relationship with individual health home providers through frequent communication and feedback. Learning activities and technical assistance will also support providers of health home services to address the following health home functional components:

1. Provide quality-driven, cost-effective, culturally appropriate, and person- and family-centered health home services
2. Coordinate and provide access to high-quality health care services informed by evidence-based clinical practice guidelines
3. Coordinate and provide access to preventive and health promotion services, including prevention of mental illness and substance use disorders
4. Coordinate and provide access to mental health and substance abuse services
5. Coordinate and provide access to comprehensive care management, care coordination, and transitional care across settings. Transitional care includes appropriate follow-up from inpatient to other settings, such as participation in discharge planning and facilitating transfer from a pediatric to an adult system of health care
6. Coordinate and provide access to chronic disease management, including self-management support to individuals and their families
7. Coordinate and provide access to individual and family supports, including referral to community, social support, and recovery services
8. Coordinate and provide access to long-term care supports and services
9. Develop a person-centered care plan for each individual that coordinates and integrates all of his or her clinical and non-clinical health-care related needs and services
10. Demonstrate a capacity to use health information technology to link services, facilitate communication among team members and between the health team and individual and family caregivers, and provide feedback to practices, as feasible and appropriate; and
11. Establish a consistent quality improvement program, and collect and report on data that permits an evaluation of increased coordination of care and chronic disease management on individual-level clinical outcomes, experience of care outcomes, and quality of care outcomes at the population level.

The Department of Health in partnership with the Office of Mental Health and the Office of Alcoholism and Substance Abuse Services will closely monitor health home providers to ensure that health home services are being provided that meet the NYS health home provider standards and CMS health home care requirements. Oversight activities will include, but not be limited to: medical chart and care management record review, site audits, team composition analysis, and review of types and number of contacts, etc.

Supports for Health Homes Providers

Describe the methods by which the state will support providers of Health Homes services in addressing the following components:

1. Provide quality-driven, cost-effective, culturally appropriate, and person- and family- centered Health Homes services
2. Coordinate and provide access to high quality health care services informed by evidence-based clinical practice guidelines
3. Coordinate and provide access to preventive and health promotion services, including prevention of mental illness and substance use disorders
4. Coordinate and provide access to mental health and substance abuse services
5. Coordinate and provide access to comprehensive care management, care coordination, and transitional care across settings. Transitional care includes appropriate follow-up from inpatient to other settings, such as participation in discharge planning and facilitating transfer from a pediatric to an adult system of health care
6. Coordinate and provide access to chronic disease management, including self-management support to individuals and their families
7. Coordinate and provide access to individual and family supports, including referral to community, social support, and recovery services
8. Coordinate and provide access to long-term care supports and services
9. Develop a person-centered care plan for each individual that coordinates and integrates all of his or her clinical and non-clinical health-care related needs and services
10. Demonstrate a capacity to use health information technology to link services, facilitate communication among team members and between the health team and individual and family caregivers, and provide feedback to practices, as feasible and appropriate; and
11. Establish a continuous quality improvement program, and collect and report on data that permits an evaluation of increased coordination of care and chronic disease management on individual-level clinical outcomes, experience of care outcomes, and quality of care outcomes at the population level.

Other Health Homes Provider Standards

The state’s minimum requirements and expectations for Health Homes providers are as follows:

1. Health home providers must be enrolled in the NYS Medicaid program and agree to comply with all Medicaid program requirements.
2. Health home providers must either directly provide, or subcontract for the provision of, health home services. The health home provider remains responsible for all health home program requirements, including those performed by the subcontractor.
3. Care coordination and integration of health care services will be provided to all health home enrollees by an interdisciplinary team of providers, where each individual care is under the direction of a dedicated care manager who is accountable for ensuring access to medical and behavioral health care services and community social services as defined in the care plan.
4. Hospitals that are part of a health home network must have procedures in place for reporting any eligible individual with chronic conditions who seek or need treatment in a hospital emergency department to a DOH-designated health home provider.
5. Health home providers must demonstrate their ability to perform each of the eleven CMS health home core functional components. (Refer to section VII: Provider infrastructure) including:
6. Please note whenever the individual patient is stated when applicable, the term is interchangeable with guardian.

I. Comprehensive Care Management

Policies and procedures are in place to create, document, execute and update an individualized, patient-centered plan of care for each individual:

1a. A comprehensive health assessment that identifies medical, mental health, chemical dependency and social service needs is developed.
1b. The individual’s plan of care integrates the continuum of medical, behavioral health care services, rehabilitative, long-term care and social service needs and clearly identifies the primary care provider, specialist(s), behavioral health care provider(s), care manager and other providers directly involved in the individual’s care.
1c. The individual (or their guardian) play a central and active role in the development and execution of their plan of care and should agree with the goals, interventions and timelines contained in the plan.
1d. The individual’s plan of care clearly identifies primary, specialty, behavioral health and community supports and services that address their needs.
1e. The individual’s plan of care clearly identifies family members and other supports involved in the patient’s care. Family and other supports are included in the plan and execution of care as requested by the individual.
1f. The individual’s plan of care clearly identifies goals and timelines for improving the individual’s health and health care status and the interventions that will produce this effect.
1g. The individual’s plan of care must include outreach and engagement activities that support engaging patients in care and promoting continuity of care.
1h. The individual’s plan of care includes periodic reassessment of the individual needs and clearly identifies the patient’s progress in meeting goals and changes in the plan of care based on changes in patient’s need.

II. Care Coordination and Health Promotion

2a. The health home provider is accountable for enrolling and retaining health home enrollees in care, coordinating and arranging for the provision of services, supporting adherence to treatment recommendations, and monitoring and evaluating a patient’s needs, including prevention, wellness, medical, specialist and behavioral health treatment, care transitions, and social and community services where appropriate through the creation of an individual plan of care.
2b. The health home provider will assign each individual a dedicated care manager who is responsible for overall management of the patient’s care plan. The health home care manager is clearly identified in the patient record. Each individual enrolled with a health home provider has one dedicated care manager who has overall responsibility and accountability for coordinating all aspects of the individual’s care. The individual cannot be enrolled in more than one care management program funded by the Medicaid program.
2c. The health home provider must describe the relationship and communication between the dedicated care manager and the treating clinicians that assure that the care manager can discuss with clinicians on an as-needed basis, changes in patient condition that may necessitate treatment change (i.e., written orders and/or prescriptions).
2d. The health home provider must define how patient care will be directed when conflicting treatment is being provided.
2e. The health home provider has policies, procedures and accountabilities (contractual agreements) to support effective collaborations between primary care, specialist and behavioral health providers, evidence-based referrals and follow-up and consultation that clearly define roles and responsibilities.
2f. The health home provider supports continuity of care and health promotion through the development of a treatment relationship with the individual and the interdisciplinary team of providers.
2g. The health home provider supports care coordination and facilitates collaboration through the establishment of regular care review meetings, including all members of the interdisciplinary team on a schedule determined by the health home provider. The health home provider has the option of utilizing technology incorporating tools including audio, video and web deployed solutions when secure protocols and precautions are in place to protect PHI.
2h. The health home provider ensures 24 hours/seven days a week availability to a care manager to provide information and emergency consultation services.

https://macpro.cms.gov/suite/tempo/records/type/EZhOsA/item/isB9Co0jznkfJlYQCg3q05... 1/3/2017

TN## 16-0034
Supersedes TN # 15-0020
Attachment 3.1-H

Approval Date: 12/22/16
Effective Date: 09/01/16
2. The health home provider will ensure the availability of priority appointments for health home enrollees to medical and behavioral health care services within their health home provider network to avoid unnecessary, inappropriate utilization of emergency room and hospital services.

2. The health home provider promotes evidence based wellness and prevention by linking health home enrollees with resources for smoking cessation, diabetes, asthma, hypertension, self help recovery resources, and other services based on individual needs and preferences.

2k. The health home provider has a system to track and share patient information and care needs across providers and to monitor patient outcomes and initiate changes in care, as necessary, to address patient need.

III. Comprehensive Transitional Care

3a. The health home provider has a system in place with hospitals and residential/rehabilitation facilities in their network to provide the health home prompt notification of an individual’s admission and/or discharge to/from an emergency room, inpatient, or residential/rehabilitation setting.

3b. The health home provider has policies and procedures in place with local practitioners, health facilities including emergency rooms, hospital, and transfers in the site of care.

3c. The health home provider utilizes HIT as feasible to facilitate interdisciplinary collaboration among all providers, the patient, family, care givers, and local supports.

3d. The health home provider has a systematic follow-up protocol in place to assure timely access and follow-up care after discharge that includes a minimum care manager verification with outpatient provider that the patient attended the appointment, and a plan to outreach and reengage the patient in care if the appointment was missed.

IV. Patient and Family Support

4a. Patient’s individualized plan of care reflects patient and family or caregiver preferences, education and support for self-management, self help recovery, and other resources as appropriate.

4b. Patient’s individualized plan of care is accessible to the individual and their family or other caregivers based on the individual’s preference.

4c. The health home provider utilizes peer supports, support groups and self-care programs to increase patients’ knowledge about their disease, engagement and self management capabilities, and to improve adherence to prescribed treatments.

4d. The health home provider discusses advance directives with enrollees and their families or caregivers.

4e. The health home provider communicates and shares information with individuals and their families and other caregivers with appropriate consideration for language, literacy and cultural preferences.

4f. The health home provider gives the patient access to care plans and options for accessing clinical information.

V. Referral to Community and Social Support Services

5a. The health home provider identifies available community-based resources and actively manages appropriate referrals, access, engagement, follow-up and coordination of services.

5b. The health home provider has plans and resources to support effective collaborations with community-based providers and improve patient outcomes.

5c. The plan of care should include community-based and other social support services as well as healthcare services that respond to the patient’s needs and preferences and contribute to achieving the patient’s goals.

IV. Use of Health Information Technology to Link Services

Health home providers will make use of available HIT and access services data through the regional health information organization (RHIOs)/Qualified Entities (QE) to conduct these processes as feasible. To comply with the initial standards cited in Items 6a, 6d for implementation of health homes. In order to be approved as health home provider, applicants must provide a plan to achieve the final standards cited in Items 6b, 6e, within eighteen (18) months of program initiation.

Initial Standards

6a. Health home provider has structured information systems, policies, procedures and practices to create, document, execute, and update a plan of care for every patient.

6b. Health home provider has an electronic system to follow-up on tests, treatments, services and, referrals which is incorporated into the patient plan of care.

6c. Health home provider has a health record system which allows the patient’s health information and plan of care to be accessible to the interdisciplinary team of providers and which allows for population management and identification of gaps in care including preventive services.

6d. Health home provider makes available HIT and access data through the RHIO/QE to conduct these processes, as feasible.

Final Standards

6e. Health home provider has structured interoperable health information technology systems, policies, procedures and practices to support the creation, documentation, execution, and ongoing execution of a plan of care for every patient.

6f. Health home provider uses an electronic health record system that satisfies the Meaningful Use provisions of the HWITECH Act, which allows the patient’s health information and plan of care to be accessible to the interdisciplinary team of providers. If the provider does not currently have such a system, they will provide a plan for when and how they will implement it.

6g. Health home provider will be required to comply with the current and future version of the statewide policy guidance (http://health.ny.gov/technology/statewide_policy_guidance.htm) which includes common information policies receive technical approaches governing health information exchange.

6h. Health home provider commits to joining regional health information networks or qualified health IT entities for data exchange and includes a commitment to share information with all providers participating in a care plan. RHIOs/QE provides policy and technical services required for health information exchange through the Statewide Health Information Network of New York (SHIN-NY).

6i. Health home provider supports the use of evidence-based clinical decision making tools, consensus guidelines, and best practices to achieve optimal outcomes and cost avoidance. One example of such a tool is PSYCKES.

VII. Quality Measures Reporting to State

7a. The health home provider has the capability of sharing information with other providers and collecting and reporting specific quality measures as required by WYS and CMS.

7b. The health home provider is accountable for reducing avoidable health care costs specifically preventable hospital admissions/readmissions and avoidable emergency room visits, providing timely post discharge follow up, and improving patient outcomes as measured by WYS and CMS required quality measures.

Identify the service delivery system(s) that will be used for individuals receiving Health Homes services

✓ Fee for Service

☐ PCCM

☐ Risk Based Managed Care

✓ Other Service Delivery System

Describe if the providers in this other delivery system will be a designated provider or part of the team of health care professionals and how payment will be delivered to these providers.

Describe if the providers in this other delivery system will be a designated provider or part of the team of health care professionals and how payment will be delivered to these providers.

Managed Care Considerations

Similar to the NY patient centered Medical Home program, it is the intention of the State to coordinate and pay for health home services through health plans but at State set rates for the service. The State will address any existing care management resources in the current plan premium for health home enrollees under CMS guidelines (bring this resource out of the capitation and create federal matching for those resources under the health home payment). Plans will pay health home providers State set rates when providers are contracted to provide all health home services. In the case where the plan does a portion of the health home service (e.g. telephonic post discharge tracking) and downstream providers do a separate portion (e.g. face to face care management) the plan will then split the State generated PMPM proportional to the contracted effort.

✓ The State provides assurance that any contract requirements specified in this section will be included in any new or the next contract amendment submitted to CMS for review.

Health Homes Payment Methodologies

The State's Health Homes payment methodology will contain the following features:

- Fee for Service
  - Individual Rates Per Service
  - Per Member, Per Month Rates
  - Fee for Service Rates based on
    - Severity of each individual's chronic conditions
    - Capabilities of the team of health care professionals, designated provider, or health team
    - Other
  - Describe below
    - see text box below regarding rates

- Comprehensive Methodology Included in the Plan
- Incentive Payment Reimbursement

Describe any variations in payment based on provider qualifications, individual care needs, or the intensity of the services provided

PCCM (description included in Service Delivery section)

NY - Submission Package - NY2016MH0002O - (NY-16-0034)

Agency Rates

Describe the rates used:
- FFS Rates included in plan
- Comprehensive methodology included in plan
- The agency rates are set as of the following date and are effective for services provided on or after that date.

Rate Development

Provide a comprehensive description in the SPA of the manner in which rates were set:
1. In the SPA please provide the cost data and assumptions that were used to develop each of the rates.
2. Please identify the reimbursable unit(s) of service.
3. Please describe the minimum level of activities that the state agency requires for providers to receive payment per the defined unit.
4. Please describe the state's standards and process required for service documentation, and
5. Please describe in the SPA the procedures for reviewing and rebasing the rates, including:
   - the frequency with which the state will review the rates, and
   - the factors that will be reviewed by the state in order to understand if the rates are economic and efficient and sufficient to ensure quality services.

Comprehensive Description

Provide a comprehensive description of the rate-setting policies the State will use to establish Health Homes provider reimbursement fee for service or PMPM rates. Explain how the methodology is consistent with the goals of efficiency, economy and quality of care. Within your description, please explain the reimbursable unit(s) of service, the cost assumptions and other relevant factors used to determine the payment amount, the minimum level of activities that the State agency requires for providers to receive payment per the defined unit, and the State's standards and process required for service documentation.

Provider Type

NYS Medicaid providers eligible to become health homes include managed care plans, hospitals, medical, mental and chemical dependency treatment clinics, primary care practitioner practices, PCMHs, FQHCs, Targeted Case Management (TCM) providers, certified home health care agencies and any other Medicaid enrolled provider that meet health home provider standards.

Care Management Fee:

Health Homes meeting State and federal standards will be paid a per member per month care management fee that is adjusted based on region and case mix from 3M Clinical Risk Groups (CRG) method for adults, or the Child and Adolescent Needs and Strength Assessment of New York (CANS-NY) for children age 0 through 20). This fee will eventually be adjusted by (after the data is available) patient functional status. Until such time as the behavioral health benefit is moved to managed care the fee will include a fee for conducting the CANS-NY assessment. The risk adjusted payments will allow providers to receive a diverse population of patients and assign patients to various levels of care management intensity without having to meet preset standards for contact counts. Providers will be able to respond to and adjust the intensity and frequency of intervention based on patient's current condition and needs (from tracking to high touch). All rates will be published on the DOH website. Except as otherwise noted in the plan, state developed fee schedule rates are the same for both governmental and private providers. Rates for Health Home Services to children are effective October 1, 2016 and apply to services furnished on and after October 1, 2016 through September 30, 2018. Rates for Health Home services furnished to other populations are set October 1, 2016 and apply to services furnished on and after that date.

State Health Home rates may be found at:
http://www.health.ny.gov/health_care/medicaid/program/medicaid_health_homes/rate_information.htm

This care management fee will be paid in two increments based on whether a patient is in (1) the case finding group or (2) the active care management group. The case finding group will receive a PMPM rate that is a reduced percentage (60%) of the active care management PMPM through [August 31, 2016]. November 30, 2016. On [September 1, 2016] December 1, 2016, the case finding fee will be set at $135. The case finding PMPM will be available for the three months after a patient has been assigned to a health home. Then, nothing can be billed for that patient for the next three months. Following this interval, case finding can be billed for another three months while outreach and engagement is attempted once again. This PMPM is intended to cover the cost of outreach and engagement.

Effective August 1, 2014, the per member per month care management fee will be adjusted by a temporary rate add-on to distribute the annual amounts authorized under the State's Medicaid Redesign Team (MRT) Waiver and as shown below.

August 1, 2014 to March 31, 2015: $80 million
April 1, 2015 to December 31, 2015: $60.7 million
January 1, 2016 to December 31, 2016: $43.9 million

(SEE TABLE LOCATED UNDER SECTION ON NON-DUPICATION OF PAYMENT MOVED DUE TO SPACE CONSTRAINTS)

The temporary rate add-on will be paid to State-designated Health Homes. Funds received through this rate add-on must be used to support costs related to one or more of the following authorized purposes: 1) Member engagement and promotion of Health Homes, 2) Workforce training and retaining, 3) Health information technology (HIT) and clinical connectivity, and 4) Joint governance technical assistance.

Each Health Home will be required to submit semi-annual reports documenting how the funds were used in accordance with the four authorized purposes. Semi-annual reports shall be submitted until such time as it is verified that all funds have been used in accordance with authorized purposes. Funds that are not disbursed in accordance with authorized purposes will be recouped by the Department within 90 days of such finding.

https://macpro.cms.gov/suite/tempo/records/type/EBhOsA/item/isB9Co0jznk7JlyQGc3qG5... 1/3/2017

TN# 16-0034 Approval Date: 12/22/16
Supersedes TN # 15-0020 Effective Date: 09/01/16
A unit of service will be defined as a billable unit per service month. In order to be reimbursed for a billable unit of service per month, health home providers must, at a minimum, provide one of the core health home services per month. The monthly payment will be paid via the case finding and active care management PPM. Once a patient has been assigned a care manager and is enrolled in the health home program, the active care management PPM may be billed.

Managed Care Considerations: Similar to the NY patient centered Medical Home program, it is the intention of the State to coordinate and pay for health home services through health plans but at State set rates for the service. The State will address any existing care management resources in the current plan premium for health home enrollees under CMS guidelines (being this resource out of the capitation and create federal matching for those resources under the health home payment). Plans will pay health home providers State set rates when providers are contracted to provide all health home services. In the case where the plan does a portion of the health home service (e.g. telephonic post discharge tracking) and downstream providers do a separate portion (e.g. face to face care management) the plan will then split the State generated PPM proportional to the contracted effort.

The Medicaid/FHP Model Contract will be modified at the next scheduled amendment to include language similar to that outlined below which will address any duplication of payment between the MCO capitation payments and health home payments. The delivery design and payment methodology will not result in any duplication of payment between Health Homes and managed care.

- The managed care plan is not required to provide services that would duplicate the CMS reimbursed Health Home services for members participating in the State’s Health Home program.
- The managed care organization will be informed of members assigned to a Health Home or will assign its members to a Health Home for health home services. Plans may need to expand their networks to include additional State designated health home providers to ensure appropriate access.
- Plans will need to have signed contracts including clearly established responsibilities with the provider based health homes.
- The managed care plan will be required to inform either the individual’s Health Home or the State of any inpatient admission or discharge of a Health Home member that the plan learns of through its inpatient admission initial authorization and concurrent review processes as soon as possible to promote appropriate follow-up and coordination of services.
- Plans will assist State designated Health Home providers in their network with coordinating access to data, as needed.
- Plans will assist, if appropriate, with the collection of required care management and patient experience of care data from State designated Health Home providers in its network.

The State has a health home advisory committee of providers and managed care plans through which any issues with payment would be raised and addressed. Directions have been given to health homes to match health home payment to providers based on relative health care management effort. Further information on specific construction on health home rates includes specific administration compensation to guide rate differential construct.

Targeted Case Management (TCM) and Chronic Illness Demonstration Projects (CIDPs) Conversion Considerations:

The State envisions that eventually all targeted care management programs operating in New York will convert to or become part of health homes, and these providers will require time to meet State and Federal health home standards. The State will allow TCM providers that can meet health home standards to convert to health homes or join with larger health homes. TCM providers that convert to health homes will be governed under NYS Health Home Provider Qualification Standards, not TCM standards. The payment method will be designed to transition all existing TCM capacity from the current rates to the new Health Home payment structure. Effective January 1, 2015 TCM programs for adults will be paid their existing TCM rates until [August 31, 2016] November 30, 2016. Effective October 1, 2016 through September 30, 2018 TCM programs for children will be paid a transitional rate that is as financially equivalent as practicable to their current rate.

Health Home care management services may be provided to children that are eligible and enrolled in both the Early Intervention Program and Health Home, and will meet and fulfill the requirements of the ongoing service coordination required to be provided to children enrolled in the Early Intervention Program.

All payments will be made under the health home payment detailed above in the care management fee section if they convert to or become part of a health home. This existing TCM rate will be paid for both case finding and active care management. The case finding PMPM will be available for the first three months after a patient has been assigned to a health home. Thereafter, nothing can be billed for that patient for the next three months. Following this interval, case finding can be billed for another three months while outreach and engagement is attempted once again. This rate would be paid for both case finding and active care management.

New York State’s health home services are set as of January 1, 2012 and are effective for services on or after that date. All rates will be published on the DCH website. Except as otherwise noted in the plan, state developed fee schedule rates are the same for both governmental and private providers. All of the above payment policies have been developed to assure that there is no duplication of payment for health homes services.

CIDPs information has been moved to non-duplication of payment for similar services section.

Assurances

- The State provides assurance that it will ensure non-duplication of payment for services similar to Health Homes services that are offered/covered under a different statutory authority, such as 1915(c) waivers or targeted case management.

Describe below how non-duplication of payment will be achieved

All rates are published on the DCH website. Except as otherwise noted in the plan, state developed fee schedule rates are the same for both governmental and private providers. All of the above payment policies have been developed to assure that there is no duplication of payment for health home services.

http://www.health.ny.gov/health_care/medicaid-program/medicaid_health_homes/rate_information.htm

The State anticipates that most of the six CIDPs will convert to health homes. The CIDP providers are well positioned to become health homes and meet State and Federal health home standards. The CIDPs that convert to health homes will be paid at their existing CIDP rate for a period of one (1) year from the effective date of the SPA. If they convert to health home, they will be paid at their existing CIDP rate for a period of one (1) year from the effective date of the SPA. If they convert to health home at the beginning of the second year after the effective date of the SPA, they will be paid at their existing CIDP rate for a period of one (1) year from the effective date of the SPA. If they do not convert to health homes, or any other reason, they will be paid under the State's health home program.

Health Home Development Rate Add on Schedule from Previous Section Placed Here Due to Space Constraints:

Payments will be applicable to claims with dates of service on and after August 1, 2014 and will be paid beginning March 2015, and quarterly thereafter as shown below. The rate add-on for each period will be calculated by dividing the authorized payment amount by total number of claims for such period.

✓ The State meets the requirements of 42 CFR Part 447, Subpart A, and sections 1902(a)(4), 1902(a)(6), 1902(a)(30)(A), and 1903 with respect to non-payment for provider-preventable conditions.

✓ The State provides assurance that all governmental and private providers are reimbursed according to the same rate schedule, unless otherwise described above.

✓ The State provides assurance that it shall reimburse providers directly, except when there are employment or contractual arrangements consistent with section 1902(a)(32).

PRA Disclosure Statement: According to the Paperwork Reduction Act of 1980, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1166. The time required to complete this information collection is estimated to average 40 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. Initial Submission Date 8/29/2016
Effective Date 10/1/2016

Monitoring

Describe the state's methodology for calculating cost savings (and report cost savings annually in Quality Measure Report). Include savings that result from improved coordination of care and chronic disease management achieved through the Health Homes Program, including data sources and measurement specifications, as well as any savings associated with dual eligibles, and if Medicare data was available to the state to utilize in arriving at the cost savings estimates.

NYS will monitor cost savings from health homes through measures of preventable events, including PPRs, preventable hospital admissions and potentially avoidable ER visits. These metrics are the same metrics for evaluation in section IX. Measures of preventable hospitalizations and avoidable ER visits will be calculated for the entire Medicaid program. Similar to Section VII A, NYS will use health home rosters to calculate potential cost savings for enrollees in health homes.

NYS will also compare total costs of care for enrollees in health homes, including all services costs, health home costs and managed care capitation to similar cohorts that are not receiving health home services.

Describe how the state will use health information technology in providing Health Homes services and to improve service delivery and coordination across the care continuum (including the use of wireless patient technology to improve coordination and management of care and patient adherence to recommendations made by their provider).

To facilitate the use of health information technology by health homes to improve service delivery and coordination across the care continuum, NY has developed initial and final HIT standards. Providers must meet the initial HIT standard to implement a health home. In addition, provider applicants must provide a plan in to achieve the final standards within eighteen months of program initiation in order to be approved as a health home provider.

The initial standards require health home providers to make use of available HIT for the following processes, as feasible:
1. Have a structured information systems, policies, procedures and practices to create, document, execute, and update a plan of care for every patient;
2. Have a systematic process to follow-up on tests, treatments, services and, and referrals which is incorporated into the patient's plan of care;
3. Have a health record system which allows the patient health information and plan of care to be accessible to the interdisciplinary team of providers and allow for population management and identification of gaps in care including preventive services, and
4. Is required to make use of available HIT and access members' data through the RHIO or QE to conduct all processes, as feasible.

The final standards require health home provider to use HIT for the following:
1. Have structured interoperable health information technology systems, policies, procedures and practices to support the creation, documentation, execution, and ongoing management of a plan of care for every patient;
2. Utilize an electronic health record system that qualifies under the Meaningful Use provisions of the HITECH Act that allows the patient's health information and plan of care to be accessible to the interdisciplinary team of providers. If the provider does not currently have such a system, they will have to provide a plan for when and how they will implement it. Health home providers will comply with all current and future versions of the Statewide Policy Guidance (http://health.ny.gov/technology/statewide_policy_guidance.htm) which includes common information policies, standards and technical approaches governing health information exchange;
3. Join regional health information networks or qualified health IT entities for data exchange and make a commitment to share information with all providers.

https://macpro.cms.gov/suite/tempo/records/type/EZhOsA/item/isB9Co0jznkfjLYQCG3q05... 1/3/2017

TN# 16-0034
Supersedes TN # 15-0020

Approval Date: 12/22/16
Effective Date: 09/01/16
participating in a care plan. Regional Health Information Organization (Qualified Entities will be provided policy and technical services required for health information exchange through the Statewide Health Information Network of New York (ShIN-NY)) and:

4. Support the use of evidence-based clinical decision-making tools, consensus guidelines, and best practices to achieve optimal outcomes and cost avoidance.

For example, in New York the Office of Mental Health has a web and evidence-based practices system, known as Psychiatric Services and Clinical Knowledge Enhancement System (PSYCKES), which utilizes information to improve the quality of care, accountability, and cost-effectiveness of mental health prescribing practices in psychiatric centers.

New York health care providers will be encouraged to use wireless technology as available to improve coordination and management of care and patient adherence to recommendations made by their provider. This may include the use of cell phones, peripheral monitoring devices, and access patient care management records, as feasible.

To facilitate state reporting requirements to CMS, NY is working toward the development of a single portal to be used by health homes for submission of functional assessment and quality measure reporting to the State. Consideration is being given to also include a care management record, also accessed via the portal as an option for health care providers who currently do not have an electronic care management record system.

Significant investment has been made in New York’s Health Information Infrastructure to ensure that medical information is in the hands of clinicians and New Yorkers to guide medical decisions and supports the delivery of coordinated, preventive, patient-centered and high-quality care. Ongoing statewide evaluation designed to evaluate the impact of HIT on quality and outcomes of care is underway by the Office of Health Information Technology and Transformation.

Quality Measurement and Evaluation

✓ The state provides assurance that all Health Homes providers report to the state on all applicable quality measures as a condition of receiving payment from the state.

✓ The state provides assurance that it will identify measurable goals for its Health Homes model and intervention and also identify quality measures related to each goal to measure its success in achieving the goals.

✓ The state provides assurance that it will report to CMS information submitted by Health Homes providers to inform evaluations, as well as reports to Congress as described in Section 2703(b) of the Affordable Care Act and as described by CMS.

✓ The state provides assurance that it will track avoidable hospital readmissions and report annually in the Quality Measures report.

Go to HHOM Reports.

PRA Disclosure Statement: According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0956-1180. The time required to complete this information collection is estimated to average 45 hours per response. Including the time to review instructions, search existing data resources, gather the needed data, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-109.
Community First Choice Option

On December 18, 2013, New York State convened a meeting of its appointed Development and Implementation Council, comprised of a majority of individuals who are aged and/or physically, mentally/behaviorally, or developmentally/intellectually disabled or their representatives, as required by federal statute. The Council reviewed and unanimously approved the below proposed State Plan Amendment to implement the Community First Choice Option in New York State.

Notwithstanding anything else in this State Plan provision, the coverage will be subject to such other requirements that are promulgated by Centers for Medicare and Medicaid Services (CMS) through interpretive issuance or final regulation.

i. Eligibility

Community First Choice Option (CFCO) services are available to (New York) State Plan eligible groups as described in Section 2.2-A of the State Plan. These individuals are eligible for medical assistance under the State plan and are in an eligibility group that includes nursing facility services, or, if an eligibility group under the State plan that does not include such nursing facility services, have an income that is at or below 150 percent of the Federal poverty level (FPL). In determining whether 150% of the FPL requirement is met, States must apply the same methodologies as would apply under their Medicaid State plan, including the same income disregards in accordance with section 1902(r)(2) of the Act.

Individuals who are receiving medical assistance under the special Home and Community-Based (HCB) waiver eligibility group defined at section 1902(a)(10)(A)(ii)(VI) of the Act must continue to meet all 1915(c) requirements and must receive at least one HCB waivered service per month. Individuals receiving services through CFCO will not be precluded from receiving other HCB Long Term Care (LTC) services and supports through other Medicaid State Plan, waiver, grant or demonstration, as appropriate, but will not be allowed to receive duplicative services in CFCO or any other available community-based services.

During the five year period that begins January 1, 2014, spousal improvement rules are used to determine the eligibility of individuals with a community spouse who seek eligibility for home and community based services provided under 1915(k), as directed by the guidance in the CMS State Medicaid Directors’ letter #15-001, ACA #32, dated May 7, 2015.

For individuals eligible under section 1902(a)(10)(A)(ii)(VI) of the Act who continue to meet all of the 1915(c) waiver requirements and who are receiving the minimum frequency services needed – at least monthly or require monthly monitoring when services are furnished on less than a monthly basis, excess income determined under 42 C.F.R. 435.726 is applied, in addition to the

TN #13-0035 Approval Date October 23, 2015
Supersedes TN NEW Effective Date July 1, 2015
AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

cost of 1915(c) waiver services, to the cost of 1915(k) services. Therefore, excess income is applied to both 1915(c) waiver and 1915(k) services.

The State will ensure that a determination is made initially, and at least annually, that individuals require the Level of Care (LOC) provided in a hospital, a nursing facility, an intermediate care facility for Individuals with Intellectual Disabilities (ICF/IID), an institution providing psychiatric services for individuals under age 21, or an institution for mental diseases for individuals age 65 or over. LOC for individuals between ages 21 and 65 needing psychiatric services is determined using hospital, ICF or nursing facility LOC criteria. Various functional assessment tools in use across disability populations in New York State (NYS) will include a LOC outcome either as part of the assessment or separately and will also be used to inform a person-centered plan of care. Different tools are utilized in order to accurately assess an individual’s specific needs based on the relevant institutional LOC being assessed (i.e. a skilled nursing facility, hospital, intermediate care facility, institute for mental disease, etc.).

A person-centered plan of care, also known as the Service Plan (SP) will be developed for CFCO-eligible individuals based on a comprehensive functional assessment that, in part, identifies the individual's needs and goals related to living independently in the community. The agent of state government (i.e. local district for social services, regional developmental disability office or service coordinator or their delegate, etc.) or managed care entity must review the individual's service needs at least annually, upon a significant change in the individual's condition or if requested by the individual. The date of review and signature is required on the SP. The update to the SP will occur no less than annually and as informed by the assessment. Also, annually a review is conducted to assure that the individual continues to meet the LOC criteria.

ii. Service Delivery Models

Service delivery model options under CFCO are described below. New York State will offer both an Agency Model and an Agency with Choice model. These are described in detail below.

X Agency Model - The Agency Model is based on the person-centered assessment of need. The Agency Model is a delivery method in which the services and supports are provided by personal care aides, personal attendants, home health aides, or direct service professionals (collectively referred to as direct care workers throughout the SPA pages) employed by a traditional agency or provider. CFCO participants will still exercise as much control over the selection, management and, if necessary, dismissal of their direct care worker as they desire. The Local Department of
AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

Social Services, a managed care entity, or a non-profit organization, which includes not-for-profit corporations formed under New York State Law or authorized to do business in New York, may contract with home care agencies or providers to deliver CFCO services.

**X Agency with Choice Model** - this model is also based on the person-centered assessment of need and will be used when the individual seeking CFCO services wants to directly hire his or her own attendant. This attendant may be a relative other than a parent or a spouse, a neighbor, a friend or an independent attendant. In this delivery model, the individual will select, manage, train and, if necessary, dismiss his or her own attendant. A fiscal intermediary will be used to keep track of the attendant’s hours, pay the attendant and deduct required amounts for taxes and insurance from the attendant’s check. Fiscal intermediaries can be licensed home care services agencies, independent living centers, or other entities that pay attendants/direct care workers who are employed directly by the recipient of CFCO LTSS. CFCO participants must have a free choice of fiscal intermediaries.

There is no budget authority under either of these models.

Self-Directed Model with service budget - This Model is one in which the individual has both a SP and service budget based on the person-centered assessment of need.

- Direct Cash
- Vouchers
- Financial Management Services in accordance with 441.545(b)(1)
- Other Service Delivery Model as described below:

**iii. Service Package**

**A. The following are included CFCO services (including service limitations):**

Services may be provided in the individual’s home and in the community by direct care workers.

1. **Assistance with ADLs, IADLs and health-related tasks through hands-on assistance, supervision, and/or cueing.**

   The State will cover personal care services and supports related to core ADLs including: assistance with bathing/personal hygiene/grooming, dressing, eating, mobility (ambulation, transferring and positioning), and toileting.
AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDED

In addition, personal care services and supports will be available related to core IADLs including: managing finances; providing or assisting with transportation (in conjunction with approved service noted in service plan); shopping for food, clothes and other essentials; meal preparation; using the telephone and/or other communication devices; medication management; light housekeeping; and laundry.

Health-related tasks are specific tasks related to the needs of an individual, which can be delegated or assigned by licensed health-care professionals under State law to be performed by a direct care worker. These tasks include, but are not limited to: performing simple measurements and tests; assisting with the preparation of complex modified diets; assisting with a prescribed exercise program; pouring, administering and recording the administration of medications; assisting with the use of prescribed medical equipment, supplies and devices; assisting with special skin care; assisting with a dressing change; and assisting with Ostomy Care.

CFCO participants will have continued access to other health-related services and long term services and supports through the State plan, waivers or demonstrations, for which the enhanced FMAP available under CFCO will not accrue.

Providers: Personal Care Aides, Personal Attendants, Personal Assistants, Home Health Aides, and Direct Service Professionals that meet the licensure and certification requirements under NYCCR Title 18 and the guidance of the Department of Health and/or the Office for People With Developmental Disabilities and the Office of Mental Health are qualified providers of personal care services and supports under CFCO.

2. Acquisition, maintenance, and enhancement of skills necessary for the individual to accomplish ADLs, IADLs and health-related tasks.

The State will cover services and supports related to assistance with functional skills training through hands-on assistance, supervision and/or cueing to accomplish the ADL, IADL and health-related tasks. Services will be specifically tied to the functional needs assessment and person-centered SP and are a means to maximize independence and integration in the community, preserve functioning and defer or eliminate the likelihood of future institutional placement.
These services may include: assessment, training, and supervision of, or assistance to, an individual with issues related to self-care, life safety, medication management, communication skills, mobility, community transportation skills, community integration, reduction/elimination of maladaptive behaviors including inappropriate social behaviors, problem solving skills, money management, and skills to maintain a household, as it relates to the provision of ADLs, IADLs, and health-related tasks.

A direct care worker whose qualifications are approved by the Department of Health (DOH), the Office for People With Developmental Disabilities (OPWDD) or the Office of Mental Health (OMH) may provide training and maintenance activities under the following conditions:

- The need for skill training or maintenance activities has been determined through the assessment process and has been authorized as part of the person-centered SP;
- The activities are for the sole benefit of the individual and are only provided to the individual receiving CFCO services;
- The activities are designed to preserve or enhance independence or slow/reduce the loss of independence when the person has a progressive medical condition;
- The activities provided are consistent with the stated preferences and outcomes in the person-centered SP;
- The activities provided are concurrent with the performance of ADLs, IADLs and health-related tasks as described in the earlier section;
- Training and skill maintenance activities that involve the management of behavior during the training of skills must use positive reinforcement techniques; and
- The provider is authorized to perform these services for CFCO recipients and has met any required training, certification and/or licensure requirements.

Providers: Personal Care Aides, Personal Attendants, Personal Assistants, Home Health Aides, and Direct Service Professionals that meet the licensure and certification requirements under NYCCCR Title 18 and the guidance of the Department of Health and/or the Office
State Plan under Title XIX of the Social Security Act
State/Territory: New York

AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

for People With Developmental Disabilities and the Office of Mental Health are qualified providers of functional skills training under CFCO.

3. Back-up systems or mechanisms to ensure continuity of services and supports.

The State will cover back-up systems and mechanisms to ensure the continuity of services and supports and the safety and well-being of the individual. These systems and mechanisms include:

- **Electronic back-up systems:**
  - Personal Emergency Response Systems (PERS) provide back-up for individuals who live alone or are alone for significant periods of time in their own homes.
  - Electronic devices to secure help in an emergency for safety in the community and other reminders that will help an individual with activities such as medication management, eating or other monitoring activities.
  - Examples of electronic devices include PERS, medication reminders, medical monitoring devices, and alert systems for meal preparation, ADL and IADL supports that increase an individual's independence.
  - Mobile electronic devices and other assistive technology will be reviewed on a case-by-case basis to determine the potential to replace human interventions as identified in the person-centered SP.

Relief Care: Service Coordinators (SC) will assist with identifying regularly-scheduled direct care workers as part of the Service Plan (SP). Identified back-up direct care workers or care setting alternatives (such as the home of a relative or other private home) are part of the plan of care.

Providers: Personal Care Aides, Personal Attendants, Personal Assistants, Home Health Aides, and Direct Service Professionals that meet the licensure and certification requirements under NYCCR Title 18 and the guidance of the Department of Health and/or the Office for People With Developmental Disabilities and the Office of Mental Health are qualified providers of relief care services and supports under CFCO.

TN #13-0035 Approval Date October 23, 2015
Supersedes TN NEW Effective Date July 1, 2015
AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

4. **Voluntary training on how to select, manage and dismiss attendants:**

   The State will make a training program to assist individuals in selecting, managing and dismissing personal care attendants available to CFCO participants. During the initial functional needs assessment, training programs will be identified and made available to individuals. In addition, on an annual basis, training programs will again be identified and made available to individuals. Training formats range from in-person to web-based and will be made specific to CFCO. All formats suggested will be deemed appropriate and accessible to individuals.

**iv. Support System Activities**

The following steps will be taken to support an individual in both a fee-for-service model and a managed care model. Fee-for-service: services provided by a local district or a regional office of OPWDD or its delegates. Managed Care (MC) or Managed Long Term Care (MLTC) plans conduct these activities on their own. The State ensures that these activities take place through its model contracts, MOUs, Administrative Agreements, and quality assurance efforts.

Support activities will include the following:

a) Functional needs assessment and counseling prior to enrollment in CFCO;

b) Information, counseling, training and assistance to ensure that an individual is able to manage the services;

c) Information communicated to the individual in a manner and language understandable by the individual, including needed auxiliary aids and/or translation services;

d) Conducting person-centered planning;

e) Range and scope of available choices and options;

f) Process for changing the person-centered SP;

g) Grievance process;

h) Risks and responsibilities of self-direction;

i) Free Choice of Providers;

j) Individual rights and appeal rights;

---

TN #13-0035  Approval Date October 23, 2015
Supersedes TN NEW  Effective Date July 1, 2015
State Plan under Title XIX of the Social Security Act  
State/Territory: New York

AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

k) Reassessment and review schedules;
l) Defining goals, needs and preferences;
m) Identifying and accessing services, supports and resources;
n) Development of risk management agreements;
o) Development of personalized backup plan;
p) Recognizing and reporting critical events, including abuse investigations; and
q) Information about advocates or advocacy systems and how to access advocates and advocacy systems.

Conflict of Interest Standards
The State will ensure that the individuals conducting the functional needs assessment and person-centered SP for CFCO participants are not:
a) A parent or spouse of the individual, or to any paid caregiver of the individual.
b) Financially responsible for the individual.
c) Empowered to make financial or health-related decisions on behalf of the individual.
d) Individuals who would benefit financially from the provision of assessed needs and services.
e) Providers of State Plan HCBS for the individual, or those who have an interest in or are employed by a provider of State Plan HCBS for the individual, [unless the CFCO recipient chooses to receive State Plan HCBS services from the same agency as employs the Care Coordinator who develops the SP.] The State invokes the Conflict of Interest Exception when the only willing and qualified entity performing assessments of functional need and/or developing the person-centered service plan also provide home and community-based services.

Firewalls exist in both the FFS and MC/MLTC environments. First, standardized assessments determine the individual recipient’s level of care and functional needs. In addition, all recipients of personal care are required to have a doctor’s order establishing the need to address specific ADLs, IADLs and health-related tasks. These protections ensure that objective criteria inform the service plan for individuals participating in the Community First Choice Option.

TN__#17-0050____________ Approval Date ________________
Supersedes TN__#13-0035__ Effective Date ________________
State Plan under Title XIX of the Social Security Act
State/Territory: New York

AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

Additional firewalls help the State ensure that those conducting the functional needs assessment and person-centered SP for CFCO participants do so independent of those providing services. In many cases under the managed care model, this is assured through managed care entities contracting out for services. By sub-contracting out for the provision of CFCO services and supports, such as personal care, the managed care organization remains conflict-free by only conducting the functional needs assessment and developing the person-centered SP with the consumer. [Where this is not the practice, and the Service Coordinator or assessor works for the Plan, the State will assure that there is separation of the roles between the Coordinator and other duties at the provider agency accordingly:

• The Service Coordinator will not be employed as a CFCO direct care worker at the provider agency;

• The Service Coordinator will not have the authority to authorize CFCO services except on a temporary basis where presumed eligibility is permitted (not to exceed 29 days); and

• The Service Coordinator will not have a majority ownership stake in the provider agency.]

• In the FFS environment, the Local Department of Social Services (LDSS) will assure that there is separation between the function as Coordinator or assessor and the other functions the same individual performs at the LDSS or agency/provider. Firewalls ensure that the individual conducting the functional needs assessment and/or developing the person-centered SP is independent of those who are providing the services. Accordingly, the Coordinator or assessor will not:
  • provide services as a CFCO direct care worker for the CFCO consumer; nor
  • have a majority ownership stake in the provider agency.

In all cases, service recipients are made aware of appeals processes and due process protections to assure their needs are met in the fairest manner possible.

[Providers: Service Coordinators have a masters of social work or psychology, are a registered professional nurse, or a licensed or certified teacher, rehabilitation counselor and/or therapist with a minimum of one year of experience providing service coordination and information, linkages and referrals to the elderly and/or disabled regarding community based services or an individual with a bachelor's degree and two years of related experience or someone with none of the educational requirements with three years of related experience. Individuals who do not meet the requirements may be supervised by those who meet both experience and educational requirements.

Care Managers typically have a background in nursing, social work and/or human services. Case Managers have similar backgrounds and the title is used interchangeably.

Risk Management Plans

An in-person risk assessment is conducted for all individuals during the person-centered care planning process. Based on the results of the risk assessment, a risk management plan is developed for each individual and is detailed in the SP.

Safeguards are supports needed to keep the participant safe from risk and harm and actions to be taken when the health or welfare of the participant is at risk.]

TN _ #17-0050________ Approval Date September 19, 2017
Supersedes TN _ #13-0035__ Effective Date June 1, 2017
State Plan under Title XIX of the Social Security Act  
State/Territory: New York

**AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY**

In the FFS environment, consumers are informed of their Medicaid Fair Hearing Rights with any Notice of Decision, including denial of their application, denial of requested provider, reduction in services, or termination from the waiver. An informal discussion (Administrative Meeting) is also offered to explain the reasoning behind a decision and negotiate an agreement prior to the Fair Hearing.

In the Managed Care environment, members are also informed of their Medicaid Fair Hearing Rights. In addition, Managed Care Organizations are contractually obligated to provide its members with a grievance system. The Grievance System regulations in Subpart F of 42 CFR Part 438 apply to both “expressions of dissatisfaction” by Enrollees (grievances) and to requests for a review of an “action” (as defined in 438.400) by a managed long term care plan (an appeal). For managed care plans, the Grievance System processes identified in Subpart F have been combined with the grievance requirements in New York State Public Health Law (PHL) 4408-a and the utilization review and appeal requirements in Article 49 of the PHL.

The State provides direct oversight of the Managed Care plans and the LDSSs to ensure that all conflicts are avoided and firewalls are in place. It is the responsibility of the Managed Care plans and the LDSSs to ensure that there are appropriate firewalls in place between the entity that is developing the plan of care and the entity providing the services.

In the fee-for-service and managed care environments, the state monitors service plan development through surveillance efforts that are aimed at identifying non-compliance with State mandates. These efforts include the ongoing review of a sample of person-centered service plans, on-site LDSS audits, and routine monitoring of the quality assurance and performance improvement program that both Managed Care plans and the LDSSs must develop, receive state approval, and successfully implement. Plans and LDSSs are expected to comply with all State mandates.

If the State identifies deficiencies in service plan development by the managed care organizations, the plans will be subject to actions that include but are not limited to, statements of deficiency and corrective action plans.

If the State identifies deficiencies in service plan development by the LDSSs, the local districts will receive notices of deficiency and will be subject to actions that include but are not limited to, statements of deficiency and corrective action plans.

In all occurrences of inadequacies and/or deficiencies in service plan development, the State will conduct a follow up training on person-centered service planning to ensure compliance going forward.

**Providers:** Service Coordinators have a masters of social work or psychology, are a registered professional nurse, or a licensed or certified teacher, rehabilitation counselor and/or therapist with a minimum of one year of experience providing service coordination and information, linkages and referrals to the elderly and/or disabled regarding community based services or an individual with a

AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

bachelor’s degree and two years of related experience or someone with none of the educational requirements with three years of related experience. Individuals who do not meet the requirements may be supervised by those who meet both experience and educational requirements.

Care Managers typically have a background in nursing, social work and/or human services. Case Managers have similar backgrounds and the title is used interchangeably.

**Risk Management Plans**

An in-person risk assessment is conducted for all individuals during the person-centered care planning process. Based on the results of the risk assessment, a risk management plan is developed for each individual and is detailed in the SP.

Safeguards are supports needed to keep the participant safe from risk and harm and actions to be taken when the health or welfare of the participant is at risk.

---

TN__#17-0050________ Approval Date September 19, 2017

Supersedes TN ___NEW___ Effective Date June 1, 2017
AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

Safeguards are significant issues discovered during the planning process that are individualized and specific to the participant. The SP includes a description of the supervision and oversight that may be required in such areas as fire safety, medication management, allergies, community inclusion activities, diet, behavioral concerns, financial transactions, natural disaster preparation, bathing safety and vulnerabilities at home and in the community. Providers monitor and document safeguards as services are provided and through routine checks by direct care workers and their supervisors in accordance with the schedule established by the local district or the (managed or managed long term care) plan. In addition, they must report incidents to state authorities.

Providers: The risk assessment is conducted by the nurse or social worker conducting the functional assessment and/or the individual developing the person-centered service plan.

v. The State elects to include the following CFCO permissible service(s):

1. Expenditures relating to a need identified in an individual's person-centered plan of services that increases an individual's independence or substitutes for human assistance, to the extent that expenditures would otherwise be made for human assistance. These include:

   Environmental Modifications: Modifications are provided in accordance with 441.520(b)(2).

   Assistive Devices: Any category of durable medical equipment, mechanical apparatus, electrical appliance, or instrument of technology used to assist and enhance an individual's independence in performing any activity of daily living. Examples of assistive technology include, but are not limited to: motion and sound sensors, two way communication systems, automatic faucet and soap dispensers, toilet flush sensors, incontinent sensors and fall sensors.

   Congregate and/or home delivered meal services: up to two meals per day for individuals who cannot prepare or access nutritionally adequate meals for themselves and the cost of this service is less than it would be to have someone provide in-home meal preparation.

2. Expenditures for transition costs in accordance with 441.520(b)(1) such as rent and utility deposits, first month's rent and utilities, bedding, basic kitchen supplies, and other necessities required for an individual to make the transition from a nursing facility, institution for mental diseases, or intermediate care facility for individuals with developmental/intellectual disabilities, or a provider controlled residence certified by OPWDD to a community-based non-certified home setting where the individual resides. These expenditures are limited to individuals transitioning from a nursing facility, IMD, or an ICF/IID to a home or community-based setting where the individual resides.
AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

**Providers:** Environmental modifications and Vehicle modifications must be completed by individuals who are qualified and/or licensed to comply with State and local rules; all materials and products used must meet any State and local construction requirements and providers must adhere to any State and local safety standards pursuant to Article 18 of the New York State Uniform Fire Prevention and Build Code Act as well as local building codes.

Assistive Technology (AT) services are purchased through vendors who sell the needed medical, communication and adaptive equipment or supplies.

Providers of AT must be:
1. Approved by DOH under Section 504 of Title 18 NYCRR;
2. Providers of AT services approved by OPWDD;
3. A licensed pharmacy; or
4. For Personal Emergency Response Systems (PERS), an approved provider of PERS which have existing contracts with the LDSS or managed care organization.

Providers of AT must ensure that all devices and supplies meet standards established by Underwriters Laboratory and/or comply with FCC Regulations, if appropriate. The provider is responsible for training the CFCO participant, natural and paid supports who will be assisting the participant in using the equipment and/or supplies.

Congregate and Home Delivered Meal providers include Meals on Wheels and other meal delivery services contracted by local area agencies on aging or arranged by managed care organizations or local departments of social services. Any facility or agency used to provide this service must comply with 10 NYCRR Part 14 for Food Service Establishments.

Moving services are provided by moving companies appropriately licensed/certified by the New York State Department of Transportation.

**vi. Service Limits**

Service levels for community based services and allowable activities for in-home services are based on the individualized functional assessment of service needs and are to be provided without other limitation on their scope, duration or cost. See 18 NYCRR 505.14(a)(6)(i)(b).1

---

1 Except where individuals require only services and supports to address environmental and nutritional supports (light housekeeping tasks; shopping and/or meal preparation). These services and supports will be limited to 8 hours per week. Any changes in an individual’s condition or service needs will result in a reassessment to determine the need for additional services.
Transition services will be limited to necessary services for individuals transitioning from an institution into a community-based or in-home program. Services will be based on an assessed need, determined during the person-centered service planning process and will support the desires and goals of the individual receiving services and supports. Costs will be limited to a one-time expense of up to $5,000 and service coordinators will fill out and maintain forms detailing the projected and final expenses and what items and/or services were purchased.

Transition services will be limited to: moving and move-in costs including; movers, cleaning and security deposits, payment for background/credit check (related to housing), initial deposits for apartments, heating, lighting and phone; and payment of previous utility bills that may prevent the individual from receiving utility services and basic household furnishing (i.e. bed) and other items necessary to re-establish a home.

Contracts for environmental modifications may not exceed $15,000 without prior approval of DOH.

Contracts for vehicle modifications are limited to the primary vehicle of the recipient and may not exceed $15,000 without prior approval of DOH.

Assistive Technology costs cannot exceed $15,000 per year. Items that cost up to $1,000 a year only require one bid; those over $1,000 a year require three bids. Coverage will be limited to assistive technology devices that are not available through the State Plan Durable Medical Equipment included in the eMedNY Manual at https://www.emedny.org/ProviderManuals/DME/index.aspx, and cannot duplicate a device purchased through a 1915(c) waiver.

In all cases, service limits are soft limits that may be exceeded due to medical necessity.

Individuals will work with their service planners and/or care managers to determine whether or not their needs can be met within the limits established under the Community First Choice Option as they are completing the person-centered service plan. If the individual’s needs cannot be met within these limits, the individual may appeal to the Department of Health for consideration of the additional costs.

Distinct service elements, procedure codes and claim modifiers will differentiate whether the services are State plan services or other Medicaid Services under 1915(c) or other authorities. This will control and mitigate duplication of services.

**vii. Use of Direct Cash Payments**

TN    #13-0035    Approval Date    October 23, 2015
Supersedes TN    NEW    Effective Date    July 1, 2015
State Plan under Title XIX of the Social Security Act
State/Territory: New York

AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

viii. Assurances

A. The State assures that any individual meeting the eligibility criteria for CFCO will receive CFCO services.

B. The State assures there are necessary safeguards in place to protect the health and welfare of individuals provided services under this State Plan Option, and to assure financial accountability for funds expended for CFCO services including adherence to section 1903(i) of the Act that Medicaid payment shall not be made for items or services furnished by individuals or entities excluded from participating in the Medicaid program.

C. The State assures the provision of eligible individual controlled HCB attendant services and supports to individuals on a statewide basis, in a manner that provides such services and supports in the most integrated setting appropriate to the individual's needs, and without regard to the individual's age, type or nature of disability, severity of disability, or the form of HCB attendant services and supports that the individual requires in order to lead an independent life.

D. With respect to expenditures during the first full 12 months in which the State plan amendment is implemented, the State will maintain or exceed the level of State expenditures for HCB attendant services and supports provided under section 1905(a), section 1915, section 1115, or otherwise to individuals with disabilities or elderly individuals attributable to the preceding 12 month period.

E. The State assures the establishment and maintenance of a comprehensive, continuous quality assurance system with respect to community-based attendant services and supports that includes:

i. A quality improvement strategy;

ii. Methods to continuously monitor the health and welfare of each individual who receives home and community-based attendant services and supports, including a process for the mandatory reporting, investigation, and resolution of allegations of neglect, abuse, or exploitation in connection with the provision of such services and supports.

F. The State assures the collection and reporting of information, including data regarding how the State provides HCB attendant services and supports and other HCBS, the cost of such services and supports, and how the State provides individuals with disabilities who otherwise qualify for institutional care under the State plan or under CFCO the choice to instead receive HCBS in lieu of institutional care.
AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

G. The State will provide the Secretary with the following information regarding the provision of HCB attendant services and supports under this subsection for each fiscal year for which such services and supports are provided:
   i. The number of individuals who are estimated to receive HCB attendant services and supports under this option during the federal fiscal year.
   ii. The number of individuals that received such services and supports during the preceding federal fiscal year.
   iii. The specific number of individuals served by type of disability, age, gender, education level, and employment status.
   iv. The specific number of individuals previously served under any other home and community based services program under the State plan or under a CFCO.
   v. Data regarding the impact of Community First Choice services and supports on the physical and emotional health of individuals.
   vi. Other data as determined by the Secretary.

H. The State assures that HCB attendant services and supports are provided in accordance with the requirements of the Fair Labor Standards Act of 1938 and applicable Federal and State laws consistent with 441.570(d)(1)-(5).

I. The State assures it established a Development and Implementation Council prior to submitting a State Plan Amendment in accordance with section 1915(k)(3)(A). The council is primarily comprised of eligible individuals who are individuals with disabilities, elderly individuals and their representatives. The membership and meeting dates are available at this link: http://www.health.ny.gov/facilities/long_term_care/#cfco.

J. The State assures that individuals receiving services through Community First Choice will not be precluded from receiving other home and community-based long-term care services and supports through other Medicaid State Plan, waiver, grant or demonstration authorities.

K. The State provides an assurance that at least annually, it will submit to the regional office as part of their capitated rate Actuarial certification, a separate Community First Choice section which outlines the following:
   i. Any program changes based on the inclusion of Community First Choice services in the health plan benefits
   ii. Estimates of, or actual (base) costs to provide Community First Choice services (including detailed a description of the data used for the cost estimates)
   iii. Assumptions on the expected utilization of Community First Choice services and number of eligible beneficiaries (including detailed description of the data used for utilization estimates)
   iv. Any risk adjustments made by plan that may be different than overall risk adjustments
   v. How the final capitation amount is determined in either a percent of the total capitation or an actual PMPM.
L. Transportation services will only be available to a location that is identified in the person-centered service plan pursuant to a functional need identified in the person’s assessment. Specifically, New York makes the following assurances:

i. The functional needs assessment and the person-centered service plan indicate the need for a medical escort, the need for transportation to medical appointments and traveling around and participating in the community;

ii. There is a checks and balances system in place to monitor services to ensure that duplicate billing doesn't take place; and

iii. CFCO SPAs that allow personal care attendants to provide transportation to medical appointments should follow the guidelines that Non-Emergency Medical Transportation (NEMT) uses to ensure the integrity of the transportation services.

ix. **Assessment and the SP**

**Assessment Process**

Eligibility for New York State’s Medicaid-supported home and community based long term services and supports is determined by a number of federally-approved assessments. The State will not seek additional FMAP for this administrative function.

These assessment tools will assess individuals across dozens of critical domains such as: function, cognition, behavior, communication, informal supports, clinical, etc. While the UAS-NY determines LOC, not all functional needs assessments in use do, so it will be determined separately. All functional needs assessments will record the individual’s needs, strengths, preferences and goals for maximizing their independence and community integration through questions geared to elicit this information, which is essential to the person-centered planning process. They will be completed face-to-face with each individual by assessor(s) who are specifically trained in the use of the functional needs assessment. The service recipient will be able to request the participation of any one he or she wants involved in the functional needs assessment and service planning process.

Registered nurses or a Qualified Intellectual Disabilities Professional (QIDP) will conduct the functional needs assessment prior to the person centered planning process in a face-to-face meeting with the individual in his or her home or chosen community or service setting, in an institutional setting from which he or she wishes to transfer to the community, or as part of his or her discharge from clinical or acute care. Depending on whether the individual is enrolled in a Care Management for All environment (managed care, managed long term care, health home, ACO, waiver, etc.) or is receiving or seeking fee-for-service assistance, the nurse or QIDP will be employed by a provider agency, the State, county or local government or designee, or the managed care entity.

Individuals will be reassessed at least annually, or as needed when the individual's support needs or
circumstances change significantly necessitating revisions to the person-centered service plan, and at the request of the individual. Individuals will be informed that if they would like to be reassessed due to such changes, they need to notify their coordinator of the change and request a reassessment.

**Development of the Person-Centered Service Plan (SP)**

The results of the assessments will inform the development of a SP. The State will also not seek additional FMAP for this administrative function. The individual selects the people he or she wants to participate in the service planning process. A trained service coordinator will meet with each individual to assist them in identifying strengths and needs as well as identifying measurable goals and desired outcomes utilizing the results of the standardized assessment tool(s) and the person centered planning process. The SP will identify specific services and service providers used to meet stated goals; as well as their frequency, amount, and duration. During this process, natural supports will be identified and contingency plans will be developed. Natural Supports are defined as resources available to an individual from their relatives, friends, significant others, neighbors, roommates and the community. Natural supports are determined to be available when an individual is willing to voluntarily provide the identified services and the service recipient is willing to accept services from the natural support. If the natural support is unwilling or unable to provide the identified services, paid supports will be provided. Nothing in the natural support determination prevents DOH from paying qualified family members who are performing paid work. The State will not provide services or supports that are within the range of activities that a parent/legally responsible individual would ordinarily perform on behalf of a child without a disability or chronic illness of the same age.

If natural supports that were available and willingly provided become unavailable for any reason, this would be an event that would trigger a call to the service coordinator for immediate attention. The individual may require back-up supports or relief care and/or reassessment to ensure his or her continued safety and well-being as well as the maximization of independence and community integration. The individual and his or her natural supports will be made aware of the process to follow in the case of a change in the supports’ availability during the person-centered planning process.

As noted in the previous section, a risk assessment plan will also be completed and considered a key component of the SP. Most importantly, the SP will be person-centered and understandable to the individual. Service Plans will be reviewed at least annually, and more often as indicated. The State will assure that the person-centered SP is completed in a manner that:

1. Provides necessary information and support to ensure that the individual directs the process to the maximum extent possible, and is enabled to make informed choices and decisions;
2. Is timely and occurs at times and locations of convenience to the individual;
3. Reflects cultural considerations of the individual;
4. Includes strategies for solving conflict or disagreement within the process, including clear conflict-of-interest guidelines for all planning participants;

AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

v. Offers choices to the individual regarding the services and supports they receive and from whom;

vi. Includes a method for the individual to request updates to the plan; and

vii. Records the alternative home and community-based settings that were considered by the individual.

Person-Centered SP Requirements: The person-centered SP will reflect the services and supports that are important for the individual to meet the needs identified through an assessment of functional need, as well as what is important to the individual with regard to preferences for the delivery of such services and supports. The plan must:

1. Reflect that the setting in which the individual resides is chosen by the individual;
2. Reflect the individual's strengths and preferences;
3. Reflect clinical and support needs as identified through an assessment of functional need;
4. Include individually identified goals and desired outcomes;
5. Reflect the services and supports (paid and unpaid) that will assist the individual to achieve identified goals, and the providers of those services and supports, including natural supports. (Natural supports cannot supplant needed paid services unless the natural supports are unpaid supports that are provided voluntarily to the individual.);
6. Reflect risk factors and measures in place to minimize them, including individualized backup plans;
7. Be understandable to the individual receiving services and supports, and the individuals important in supporting him or her;
8. Identify the individual and/or entity responsible for monitoring the plan; and
9. Be finalized and agreed to in writing by the individual and signed by all individuals and the staff person responsible for writing the person-centered service plan.
10. Be distributed to the individual and other people involved in the plan.
11. Incorporate the service plan requirements for the self-directed model with service budget at § 441.550, when applicable.
12. Prevent the provision of unnecessary or inappropriate care.
13. Other requirements as determined by the Secretary.
State Plan under Title XIX of the Social Security Act
State/Territory: New York

AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

x. HCBS Settings

All CFCO services will be provided in a home or community-based setting, which does not include a nursing facility, hospital providing long-term care services, institution for mental disease, intermediate care facility for individuals with an intellectual disability or related condition, or setting with the characteristics of an institution. All services will be provided in settings that will comply with 42 CFR §441.530. The State has processes and procedures to ensure ongoing compliance with the setting requirements outlined in 42 CFR 441.530. Settings include the individual’s own home or a family member’s home that meets the settings criteria outlined in 42 CFR 441.530. Settings do not include provider-owned or controlled residential settings. The State will amend this SPA once it determines that other settings meet the settings criteria outlined in 42 CFR 441.530.

xi. Qualifications of Providers of CFCO Services

The State CFCO utilizes the agency-provider model for the provision of service delivery. As such, contracted entities must be approved by DOH, OPWDD or OMH. Approved agencies must meet and maintain standards for CFCO and all related state and federal regulations.

Personal Care Aides, also called personal care attendants, are certified by the State Education Department and must complete a minimum 40 hour training course with 6 hours of continuing education annually.

Home health aides are also certified by the State Education Department and must complete a minimum 75 hour training course with 12 hours of continuing education annually.

Aides in each of the above titles must meet the following minimum requirements in addition to the training requirements described above:

(i) maturity, emotional and mental stability, and experience in personal care or homemaking;
(ii) ability to read and write, understand and carry out directions and instructions, record messages, and keep simple records;
(iii) sympathetic attitude toward providing services for individuals at home who have medical problems;
(iv) good physical health, as indicated by the documentation in the personnel file of all persons providing personal care services;
(v) a criminal history record check to the extent required by 10 NYCRR Part 402; and
(vi) compliance with Part 403 of Title 10 NYCRR (Home Care Registry), as required in that Part.

TN #13-0035 Approval Date October 23, 2015
Supersedes TN NEW Effective Date July 1, 2015
AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

All of these aides provide personal care under the direction of a registered professional nurse or licensed practical nurse or therapist if the aide is to carry out simple procedures as an extension of physical, occupational, speech or language therapy. Supervising personnel visits are not eligible for the additional FMAP under CFCO.

Personal assistants are individuals that are directly hired by an individual in the agency with choice model. While they may be certified personal care or home health aides, they are not required to have these credentials. They must be adults that are not parent/guardians or spouses of the CFCO recipient. They are not required to undergo a criminal background check under state law unless they are certified aides.

Direct service professionals must be cleared through existing background check systems (ex. DOH, OPWDD and the Justice Center) where required by law and meet the additional qualifications listed below:

18 years or older and ability to:

• Follow both oral and written directions;
• Maintain simple records;
• Communicate effectively;
• Provide appropriate care;
• Safeguard personal information and maintain confidentiality; and
• Understand and follow emergency procedures.

Direct Service Professionals may work under the direction of supervising clinical personnel and these supervisory activities will not accrue the additional FMAP under CFCO.

Registered Nurses licensed by the State Education Department or Qualified Intellectual Disabilities Providers assessing individuals for services. The QIDP title is reserved for individuals with a bachelor’s degree in a human services field and one year experience working with people with developmental or intellectual disabilities.

Medicaid Service Coordinators (who are involved in the person-centered planning process and development and monitoring of an individual's service plan) must complete training in the individual service plan, and in three of the following areas: home and community based waiver, introduction to person centered planning, self advocacy/self determination, quality assurance, and benefits and entitlements. They also must complete professional development hours annually.

New York State will also permit individuals to hire their own aide directly in addition to using agencies and/or the registry and in this case may waive the qualifications above to give the service recipient flexibility to hire a relative or someone in his or her personal network who can meet his or her needs without specific prior training.

Supersedes TN NEW Effective Date July 1, 2015
State Plan under Title XIX of the Social Security Act  
State/Territory: New York

AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

xii. Quality Assurance and Improvement Plans

The State’s quality assurance and improvement plan is described below. It includes a quality improvement strategy, standards for agency-based models, feedback mechanisms for ensuring and maximizing consumer independence and consumer control, and risk management agreements established to monitor the health and well-being of each individual receiving CFCO supports and services.

A. Quality Improvement Strategy:

The primary measure of success of the quality assurance and improvement plan is whether the individual has been able to achieve his/her desired outcomes. Is the individual getting what he/she needs to live life as independently as possible and fully integrate into the community? The philosophy of CFCO, its policies and procedures have been developed to assure the greatest opportunity for individuals to be successful in the pursuit of their desired outcomes.

CFCO will adopt a Quality Management Program (QMP) that assures participant access, participant-centered service planning, provider capacity and capabilities, and participant safeguards, rights and responsibilities. CFCO will have a QMP designed to review operations on an ongoing basis, discover issues with operations, remediate those issues, and develop quality improvement initiatives to prevent the repeat of operational problems.

Entities involved in every aspect of CFCO will have responsibilities in implementing this QMP from the state in a policy development and oversight role, to providers, managed care and managed long term care plans and local representatives of the state (such as fiscal intermediaries, regional resource centers, and contracted agencies) in training service coordinators and other care managers and monitoring both service plans and participant satisfaction, to participants themselves, who retain the authority to dismiss attendants who fail to meet the standard established by the participant for his or her care as described in the service plan.

B. Standards for service delivery models for:

i. Training. Local representatives of the state office/agency and contracted entities are responsible for person-centered planning and other critical care management activities. Among these activities are monitoring the progress of each participant to ensure that the services provided are appropriate and in accord with the person-centered service plan and that the service plan continues to meet the participants needs.

ii. Denials and Reconsiderations. The State has standardized processes for informing individuals/representatives of their rights, recording hearing requests, completing pre-hearing summaries, conducting hearings, and notifying individuals/representatives of fair hearing outcomes. Data reflecting these issues will be maintained.

TN #13-0035 Approval Date October 23, 2015
Supersedes TN NEW Effective Date July 1, 2015
State Plan under Title XIX of the Social Security Act
State/Territory: New York

AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

The State communicates additions or revisions to processes to local, state or contracted case management entities through formal electronic transmittals and/or written guidance.

Individual service recipients and applicants, and their representatives, are provided timely written notices of any planned change in services or benefits, including denial, closure or reduction. For denials, the time frame varies between 30 and 90 days depending on the oversight agency/office in the State. For closure or reduction of benefits or services the time frame is 10 calendar days prior to the effective date of the proposed action. The notice includes the reason for the decision, administrative rules that support the decision and the individual's/representative's right to due process through a fair hearing process.

iii. Appeals. The local district or contracted entity notifies the individual about the Fair Hearing process during the initial assessment/service planning. As part of the notification of Fair Hearings procedure, the Service coordinator informs the individual that continuation of services must be requested by the individual within the specified timeframes. Results of the hearing are provided to the individual.

Service coordinators fully inform individuals of all available choices and service options. Documentation requirements and automated systems support QA efforts.

C. Feedback Mechanisms to ensure and maximize consumer independence and consumer control

The service planning process of CFCO participants will assure that individuals receive information, and assistance if necessary, to make a determination regarding the level of control they wish to exercise over their long term services and supports, either directly or through a chosen representative. Regular meetings with service coordinators will assure that the goals established in the service plan, including the level of control over these services and supports, are realized. Surveys and/or questions posed during assessment and reassessment will capture the degree to which each participant is satisfied with their independence and control, and measures chosen will reflect both quality of care and recipient satisfaction.

In 2012, DOH convened the Commissioner's Advisory Group on the Community First Choice Option, the majority of which was comprised of individuals with disabilities, elderly individuals and their representatives. In December of 2013, this group was designated the official Development and Implementation Council to consult and collaborate with the state in implementing CFCO. The state consults and collaborates with the Council periodically to inform and elicit feedback regarding the services and supports provided to individuals receiving CFCO services.

D. The methods used to continuously monitor the health and welfare of CFCO individuals.

Local entities, OPWDD or contracted entities will regularly monitor Service Plans to ensure the health and welfare of individuals receiving CFCO services. Through the use of risk management agreements, a monitoring plan will be developed with the individual to review services and supports. Individuals
AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

receiving CFCO services will be informed of their right to request a review of their SP to ensure that their health and safety needs are being met through their self-directed SP.

In accordance with the NYS Protection of People with Special Needs Act, all entities associated with CFCO are required to report alleged or actual neglect, abuse, or exploitation in connection with the provision of such services and supports. Additionally, abuse investigation service is provided through the NYS Justice Center as a means of monitoring the health and welfare of all vulnerable populations in NYS, including CFCO service recipients.

In addition, participants in CFCO will have access to the federally mandated Home Health Hotline (1-800-628-5972), which can be called 24 hours per day, seven days per week. Alternatively, complaints may be mailed to the Department of Health or faxed. All complaints are investigated by the Department's regional office with jurisdiction over the area from which the call originated. The most serious complaints require Department investigators to conduct interviews, review clinical/patient care records and other provider documentation, and perform other activities during the onsite visit to the agency.

Finally, through self-direction, CFCO participants have the ability to seek alternative aides to assist with their ADLs, IADLs and health-related tasks that may be performed under state law. The power to control your own attendant services to the extent desired may best maximize the individual’s ability to ensure that his or her needs are being met and goals advanced.

E. The methods for assuring that individuals are given a choice between institutional and community-based services

The State assures all individuals eligible for services under CFCO are informed of feasible alternatives for community-based services. Consistent with the Olmstead Report filed with Governor Andrew Cuomo in October of 2013, self-direction is a critical goal of assuring that individuals are served in the most integrated setting whenever possible and individuals who are determined to be able to self-direct their services directly or through a representative will be determined potential candidates for New York's CFC State Plan Option. When an individual is determined to require the LOC provided in an institution, the individual or his or her representative will be:

1. Informed of any feasible alternatives available under CFCO or other HCB Service, and
2. Given the choice of either institutional or HCB services. The choice of institutional or HCB services is documented on each eligible individual’s SP. The service coordinator is responsible for completion of the appropriate Freedom of Choice documentation.

F. The individual outcome measures associated with the receipt of community-based attendant services and supports that the State will monitor and evaluate.

The State has decided to choose measures that represent both quality of care and recipient satisfaction.
AMOUNT, DURATION, AND SCOPE OF MEDICAL AND REMEDIAL CARE AND SERVICES PROVIDED TO THE CATEGORICALLY NEEDY

1. Consumer Satisfaction Survey

On an annual basis, a statistically significant number representing individuals in all level of care who receive CFCO services and supports will be surveyed. The survey will be a comprehensive tool employed to gain valuable information related to consumer satisfaction and quality of care. In addition, the survey will also include an assessment of the individual’s opinion in progress towards goals identified by the individual in their person-centered service plan. The State has chosen to implement the Money Follows the Person (MFP) Quality of Life survey amended with several questions from the Participant Experience Survey (PES). The State may use the services of an independent contractor to perform these surveys with CFC participants to address staff needs and objectivity. Upon completion of each survey, percentages will be calculated and reviewed, and the results analyzed to determine if CFCO recipients are indeed satisfied with their home and community-based service and support needs. Are their support needs being met by the program? Are they able to satisfactorily self-direct their services? A report of survey findings will be disseminated to all CFCO participants, contracted service providers, county departments of social services, relevant state agencies and offices, and lastly, posted on the state’s CFCO website.

2. UAS-NY utilization

The State has elected to use the Uniform Assessment System of New York (UAS-NY), a tool customized for the state’s aged and physically disabled population based on the InterRAI Suite, to measure the individual outcomes associated with the receipt of community-based attendant services and supports. The UAS-NY provides the State with access to quality data reports that will allow us to monitor and track pertinent information such as the individual’s needs, strengths, preferences and goals for maximizing their independence and community integration. We will also be able to generate reports to determine if these personal goals are being met related to living an independent life integrated to the fullest extent in the community. Because the UAS-NY assessment tool is equipped to track data across years and report based on aggregate data by jurisdiction or program, as well as tracking individual participant outcomes and changes throughout time, we will be able to monitor and track long term changes in the clinical/functional status and needs of CFCO participants.
# Alternative Benefit Plan

## Alternative Benefit Plan Populations

Identify and define the population that will participate in the Alternative Benefit Plan.

### Alternative Benefit Plan Population Name:

**Adult Group under Section 1902(a)(10)(A)(i)(VIII) of the Act**

Identify eligibility groups that are included in the Alternative Benefit Plan's population, and which may contain individuals that meet any targeting criteria used to further define the population.

### Eligibility Groups Included in the Alternative Benefit Plan Population:

<table>
<thead>
<tr>
<th>Eligibility Group:</th>
<th>Enrollment is mandatory or voluntary?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Adult Group</td>
<td>Yes</td>
</tr>
</tbody>
</table>

Enrollment is available for all individuals in these eligibility group(s). Yes

### Geographic Area

The Alternative Benefit Plan population will include individuals from the entire state/territory. Yes

Any other information the state/territory wishes to provide about the population (optional)

---

**PUBLIC NOTICE**

Department of Health

Pursuant to 42 CFR Section 440.305(d), the Department of Health hereby gives public notice of the following:

The Department of Health proposes to amend the Title XIX (Medicaid) State Plan for public health insurance coverage that will impact certain non-disabled, non-pregnant adults, ages 19 – 64 for whom New York already provides public health insurance coverage to comply with federal requirements under the Patient Protection and Affordable Care Act (ACA). The following Medicaid Benefit Changes under the ACA are proposed:

The ACA established a new Medicaid eligibility category that provides coverage to non-elderly, non-pregnant individuals with family income below 133 percent Federal Poverty Level (FPL) who are not entitled to or enrolled in Medicare Part A, not enrolled in Medicare Part B, and not eligible under any other Medicaid eligibility category. The ACA required that most individuals covered under the new eligibility group be enrolled in Medicaid Alternative Benefit Plans (ABP). Medicaid Alternative Benefit Plans must provide a minimum set of standard health benefits known as Essential Health Benefits (EHB).

The New York State Department of Health will provide the Medicaid State Plan as the Alternative Benefit Plan to the new Medicaid eligible population group. This will allow for continuity of coverage for individuals currently enrolled, provide for equity of coverage for new enrollees coming into the program and assure the

**TN:** 13-0060  
**New York**  
**Approval Date:** 06/05/2014  
**Effective Date:** 01/01/2014
health care needs of the population are met by a cost effective benefit plan that complies with the EHB requirement. State Medicaid expenditures will decrease for State Fiscal Year 2013-2014 as a result of adopting the Alternative Benefit Plan. The State will receive enhanced federal financial participation for the new adult group eligibility category provided the benefits conform to the ABP requirements of the ACA. Federal financial participation will be 100 percent for newly eligible individuals and 75 percent for current enrollees. The public is invited to review and comment on this proposed State Plan Amendment. Additional information concerning the Alternative Benefit Plan can be obtained by writing to: Department of Health, Division of Eligibility and Marketplace Integration, One Commerce Plaza, Suite 1200, Albany, NY 12237, Attention: Dawn Oliver

PRA Disclosure Statement
According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1148. The time required to complete this information collection is estimated to average 5 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1850.
The state/territory has fully aligned its benefits in the Alternative Benefit Plan using Essential Health Benefits and subject to 1937 requirements with its Alternative Benefit Plan that is the state’s approved Medicaid state plan that is not subject to 1937 requirements. Therefore the state/territory is deemed to have met the requirements for voluntary choice of benefit package for individuals exempt from mandatory participation in a section 1937 Alternative Benefit Plan.

Explain how the state has fully aligned its benefits in the Alternative Benefit Plan using Essential Health Benefits and subject to 1937 requirements with its Alternative Benefit Plan that is the state’s approved Medicaid state plan that is not subject to 1937 requirements.

The state first chose the Standard Blue Cross/Blue Shield Preferred Provider Option offered through the Federal Employee Health Benefit Program as the benchmark plan and compared it to the Essential Health Benefits and to the Medicaid State Plan. The Medicaid State Plan covers all the benefits in the benchmark plan except chiropractic services. The state is proposing to substitute personal care services from the Medicaid State Plan for this benchmark covered benefit. In addition to EHBs, the ABP includes the 1937 covered benefits in the Medicaid State Plan.

PRA Disclosure Statement

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1148. V.20130807
Select one of the following:

- The state/territory is amending one existing benefit package for the population defined in Section 1.

- The state/territory is creating a single new benefit package for the population defined in Section 1.

Name of benefit package: Adult Group Benefit

Selection of the Section 1937 Coverage Option

The state/territory selects as its Section 1937 Coverage option the following type of Benchmark Benefit Package or Benchmark-Equivalent Benefit Package under this Alternative Benefit Plan (check one):

- Benchmark Benefit Package.

- Benchmark-Equivalent Benefit Package.

The state/territory will provide the following Benchmark Benefit Package (check one that applies):

- The Standard Blue Cross/Blue Shield Preferred Provider Option offered through the Federal Employee Health Benefit Program (FEHBP).

- State employee coverage that is offered and generally available to state employees (State Employee Coverage):

- A commercial HMO with the largest insured commercial, non-Medicaid enrollment in the state/territory (Commercial HMO):

- Secretary-Approved Coverage.

The state/territory offers benefits based on the approved state plan.

The state/territory offers an array of benefits from the section 1937 coverage option and/or base benchmark plan benefit packages, or the approved state plan, or from a combination of these benefit packages.

The state/territory offers the benefits provided in the approved state plan.

Benefits include all those provided in the approved state plan plus additional benefits.

Benefits are the same as provided in the approved state plan but in a different amount, duration and/or scope.

The state/territory offers only a partial list of benefits provided in the approved state plan.

The state/territory offers a partial list of benefits provided in the approved state plan plus additional benefits.

Please briefly identify the benefits, the source of benefits and any limitations:

Medicaid State Plan section 3.1 A Categorically Needy
Alternative Benefit Plan

The state/territory must select a Base Benchmark Plan as the basis for providing Essential Health Benefits in its Benchmark or Benchmark-Equivalent Package.

The Base Benchmark Plan is the same as the Section 1937 Coverage option. No

Indicate which Benchmark Plan described at 45 CFR 156.100(a) the state/territory will use as its Base Benchmark Plan:

- [ ] Largest plan by enrollment of the three largest small group insurance products in the state’s small group market.
- [ ] Any of the largest three state employee health benefit plans by enrollment.
- [ ] Any of the largest three national FEHBP plan options open to Federal employees in all geographies by enrollment.
- [ ] Largest insured commercial non-Medicaid HMO.

Plan name: Standard Blue Cross Blue Shield Federal Employee

Other Information Related to Selection of the Section 1937 Coverage Option and the Base Benchmark Plan (optional):

The state assures that all services in the base benchmark have been accounted for throughout the benefit chart found in ABP5.

The state assures the accuracy of all information in ABP5 depicting amount, duration and scope parameters of services authorized in the currently approved Medicaid state plan.

Medicaid state plan attachment 3.1A, (9)

Clinic services provided to Medicaid recipients enrolled in managed care plans are exempt from the NYS Utilization Threshold program. Individuals in the new adult group will be enrolled in managed care plans. This population will not be subject to the service limits defined in the UT Program.

Medicaid enrollees who access their covered benefits via the Fee-For-Service delivery system are subject to service limits for non-exempt clinic services as defined in the NYS Medicaid Utilization Threshold (UT) Program. The UT Program places limits on the number of non-exempt clinic services a Medicaid member may receive in a benefit year. These service limits are established based on each member's clinical information. This information includes diagnoses, procedures, prescription drugs, age and gender. As a result, most Medicaid members have clinically appropriate service limit levels and will not need additional services authorized through the Threshold Override Application (TOA) process. Medicaid enrollees may receive services in excess of the UT Program limits upon the request of the licensed provider for additional services and the submission of documentation supporting the need for continued medical care above the threshold limit. Non-exempt clinic services may be provided to an enrollee who has exceeded the threshold without a request for additional services submitted by the licensed provider (outside the TOA process) in the following instances: immediate/urgent need, services rendered in retroactive period, emergency care, member has temporary Medicaid, request from county for second opinion to determine if member can work, or a request for UT override is pending. These exemptions along with the TOA process ensures that no one receives less than the benchmark benefit or the Medicaid state plan benefit, whichever is greater.

Clinic services, by specialty code that are subject to the UT Program threshold (non-exempt) in the FFS delivery system are: 321, 901, 902, 903, 905, 909, 914 THRU 917, 919 THRU 921, 923 THRU 933, 935, 950 THRU 958, 965, 966, 999. For code definitions see: DATA DICTIONARY, NEW YORK STATE DEPARTMENT OF HEALTH Office of Health Insurance Programs, Provider Network Data System (PNDS), Version 6.7 revised (January 2014)

Clinic services exempt from the UT Program: pediatric general medicine and specialties, child teen health program (CTHP), school supportive health services program, dialysis, oncology, OPWDD clinic treatment and specialty programs, TB/Directly Observed Therapy, Prenatal Care.

#### Hospice Services
- **Authorization:** Prior Authorization
- **Amount Limit:** No limitation
- **Scope Limit:** Services are palliative in nature, include supportive medical, social, emotional and spiritual services to terminally ill persons as well as emotional support for family members. Services may be delivered at home, nursing home or hospice residence.

Other information regarding this benefit, including the specific name of the source plan if it is not the base benchmark plan:

- Medicaid state plan attachment 3.1A. (18)
- Hospice services are provided to an individual who has been certified (diagnosed) by a physician as being terminally ill, with a life expectancy of approximately twelve months or less. Services include curative treatment for children under age 21.
- Medicaid Managed Care Enrollees receive coverage for hospice services through the Medicaid fee-for-service program.

#### Personal care services - provided in the home
- **Authorization:** Prior Authorization
- **Amount Limit:** No limitation
- **Scope Limit:** In-home and community services prescribed in accordance with a plan of treatment, provided by a qualified person under supervision of a registered nurse. Attendant services and supports to assist in accomplishing (ADLs) and health related tasks.

Other information regarding this benefit, including the specific name of the source plan if it is not the base benchmark plan:

- Medicaid state plan attachment 3.1A.(26)

#### Other laboratory and x-ray services

</tr>
</tbody>
</table>

Other information regarding this benefit, including the specific name of the source plan if it is not the base benchmark plan:

Medicaid state plan attachment 3.1A (11) (a) limitations and BC/BS Standard Optional limitations apply:

Any enrollee who reaches 75 outpatient visits across combined therapies without reaching 20 physical therapy visits in a benefit year may access additional physical therapy services up to 20 visits. Physical therapy provided in an inpatient setting (hospital, rehab facility or nursing home) or in the home care setting does not count toward the 20 physical therapy visits per year limitation.

Any enrollee who reaches 20 physical therapy visits in a benefit year without reaching the outpatient visit maximum of 75 visits per year across all therapies may access additional physical therapy services up to the 75 PT/OT/ST outpatient visit maximum. Therapy services provided in the home care setting are counted as outpatient visits across combined PT/OT/ST services for purposes of applying the 75 visit per year limitation.

The limit ensures that no one receives less than the benchmark benefit or the Medicaid state plan benefit, whichever is greater.

There is no outpatient visit limit for physical therapy for persons with a developmental disability or persons with a traumatic brain injury.

Includes Cognitive Rehabilitative Therapy services.

Habilitative services are not provided as part of the home care benefit.

TN: 17-0068  
NEW YORK  
Approval Date: 03/16/2018  
Effective Date: 12/01/2017
### Scope Limit:

Interventions, therapies and activities which are medically therapeutic and remedial in nature, and are medically necessary for the maximum reduction of functional and adaptive behavior deficits associated with the individual's mental disease.

### Other:

Medicaid State Plan 3.1 A (13)(d)
Rehabilitative residential services are provided to persons residing in community residences licensed by the NYS Office of Mental Health. Services provided to persons other than those residing in New York State certified psychiatric centers and institutions for mental diseases.
Alternative Benefit Plan

☐ Additional Covered Benefits (This category of benefits is not applicable to the adult group under section 1902(a)(10)(A)(i)(VIII) of the Act.)

PRA Disclosure Statement
According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1148. The time required to complete this information collection is estimated to average 5 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1850.
EPSDT Assurances

If the target population includes persons under 21, please complete the following assurances regarding EPSDT. Otherwise, skip to the Prescription Drug Coverage Assurances below.

The alternative benefit plan includes beneficiaries under 21 years of age. [ ] Yes [ ]

☑ The state/territory assures that the notice to an individual includes a description of the method for ensuring access to EPSDT services (42 CFR 440.345).

☑ The state/territory assures EPSDT services will be provided to individuals under 21 years of age who are covered under the state/territory plan under section 1902(a)(10)(A) of the Act.

Indicate whether EPSDT services will be provided only through an Alternative Benefit Plan or whether the state/territory will provide additional benefits to ensure EPSDT services:

☒ Through an Alternative Benefit Plan.

☐ Through an Alternative Benefit Plan with additional benefits to ensure EPSDT services as defined in 1905(r).

Other Information regarding how EPSDT benefits will be provided to participants under 21 years of age (optional):

There is no visit limit for rehabilitative or habilitative services for persons aged 21 or younger. Persons age 21 and younger may receive chiropractic services.

Prescription Drug Coverage Assurances

☑ The state/territory assures that it meets the minimum requirements for prescription drug coverage in section 1937 of the Act and implementing regulations at 42 CFR 440.347. Coverage is at least the greater of one drug in each United States Pharmacopeia (USP) category and class or the same number of prescription drugs in each category and class as the base benchmark.

☑ The state/territory assures that procedures are in place to allow a beneficiary to request and gain access to clinically appropriate prescription drugs when not covered.

☑ The state/territory assures that when it pays for outpatient prescription drugs covered under an Alternative Benefit Plan, it meets the requirements of section 1927 of the Act and implementing regulations at 42 CFR 440.345, except for those requirements that are directly contrary to amount, duration and scope of coverage permitted under section 1937 of the Act.

☑ The state/territory assures that when conducting prior authorization of prescription drugs under an Alternative Benefit Plan, it complies with prior authorization program requirements in section 1927(d)(5) of the Act.

Other Benefit Assurances

☑ The state/territory assures that substituted benefits are actuarially equivalent to the benefits they replaced from the base benchmark plan, and that the state/territory has actuarial certification for substituted benefits available for CMS inspection if requested by CMS.

☑ The state/territory assures that individuals will have access to services in Rural Health Clinics (RHC) and Federally Qualified Health Centers (FQHC) as defined in subparagraphs (B) and (C) of section 1905(a)(2) of the Social Security Act.

☑ The state/territory assures that payment for RHC and FQHC services is made in accordance with the requirements of section 1902(bb) of the Social Security Act.
Alternative Benefit Plan

The state/territory assures that it will comply with the requirement of section 1937(b)(5) of the Act by providing, effective January 1, 2014, to all Alternative Benefit Plan participants at least Essential Health Benefits as described in section 1302(b) of the Patient Protection and Affordable Care Act.

The state/territory assures that it will comply with the mental health and substance use disorder parity requirements of section 1937(b)(6) of the Act by ensuring that the financial requirements and treatment limitations applicable to mental health or substance use disorder benefits comply with the requirements of section 2705(a) of the Public Health Service Act in the same manner as such requirements apply to a group health plan.

The state/territory assures that it will comply with section 1937(b)(7) of the Act by ensuring that benefits provided to Alternative Benefit Plan participants include, for any individual described in section 1905(a)(4)(C), medical assistance for family planning services and supplies in accordance with such section.

The state/territory assures transportation (emergency and non-emergency) for individuals enrolled in an Alternative Benefit Plan in accordance with 42 CFR 431.53.

The state/territory assures, in accordance with 45 CFR 156.115(a)(4) and 45 CFR 147.130, that it will provide as Essential Health Benefits a broad range of preventive services including: “A” and “B” services recommended by the United States Preventive Services Task Force; Advisory Committee for Immunization Practices (ACIP) recommended vaccines; preventive care and screening for infants, children and adults recommended by HRSA’s Bright Futures program/project; and additional preventive services for women recommended by the Institute of Medicine (IOM).

PRA Disclosure Statement

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1148. V.20130807
Service Delivery Systems

Provide detail on the type of delivery system(s) the state/territory will use for the Alternative Benefit Plan's benchmark benefit package or benchmark-equivalent benefit package, including any variation by the participants' geographic area.

Type of service delivery system(s) the state/territory will use for this Alternative Benefit Plan(s).

Select one or more service delivery systems:

☒ Managed care.

☐ Managed Care Organizations (MCO).

☐ Prepaid Inpatient Health Plans (PIHP).

☐ Prepaid Ambulatory Health Plans (PAHP).

☐ Primary Care Case Management (PCCM).

☒ Fee-for-service.

☐ Other service delivery system.

Managed Care Options

Managed Care Assurance

☒ The state/territory certifies that it will comply with all applicable Medicaid laws and regulations, including but not limited to sections 1903(m), 1905(t), and 1932 of the Act and 42 CFR Part 438, in providing managed care services through this Alternative Benefit Plan. This includes the requirement for CMS approval of contracts and rates pursuant to 42 CFR 438.6.

Managed Care Implementation

Please describe the implementation plan for the Alternative Benefit Plan under managed care including member, stakeholder, and provider outreach efforts.

☑ The state has provided Medicaid recipients enrollment in managed care plans since 1997. Medicaid Managed Care enrollment statewide is three million households. Another 400,000 adults are enrolled in managed care through an 1115 waiver program. Family Health Plus. Over 90 percent of Family Health Plus enrollees will be eligible for Medicaid under the new eligibility levels and are already enrolled in managed care. The state anticipates that only 77,000 enrollees will be newly eligible statewide in the adult group. As such, there was no need for an implementation plan for member or provider outreach. The state has engaged stakeholders in all aspects of ACA implementation, including the Medicaid expansion and the Alternative Benefit Plan.

MCO: Managed Care Organization

The managed care delivery system is the same as an already approved managed care program.

☑ The managed care program is operating under (select one):

☐ Section 1915(a) voluntary managed care program.

☐ Section 1915(b) managed care waiver.

☐ Section 1932(a) mandatory managed care state plan amendment.

☐ Section 1115 demonstration.
Alternative Benefit Plan

Section 1937 Alternative (Benchmark) Benefit Plan state plan amendment.

Identify the date the managed care program was approved by CMS: April 1, 2013

Describe program below:
The Section 1115 demonstration Partnership Plan and the F-SHRP transfer of authority advanced the statewide managed care delivery system to create efficiencies in the Medicaid program and enable the extension of coverage to certain individuals who would otherwise be without health insurance.

Additional Information: MCO (Optional)

Provide any additional details regarding this service delivery system (optional):

Fee-For-Service Options

Indicate whether the state/territory offers traditional fee-for-service and/or services managed under an administrative services organization:

☒ Services managed under an administrative services organization (ASO) arrangement

Please describe this fee-for-service delivery system, including any bundled payment arrangements, pay for performance, fee-for-service care management models/non-risk, contractual incentives as well as the population served via this delivery system:

Traditional fee-for-service payment model. Providers are reimbursed at established rates for covered medically necessary services provided to enrollees prior to enrollment in managed care. Persons determined eligible for coverage have ten (10) days to select a health plan prior to auto assignment to a health plan. Enrollees may access state certified fee-for-service providers for medically necessary covered services not included in the managed care benefit package or not covered by the enrollee's health plan. These services include: non-emergency transportation services, nursing home services, hospice services, routine adult dental services and certain mental health and substance use disorder services. Managed care plans do not impose treatment limitations on MH/SUD services that are more restrictive than limitations defined in 3.1 A of the New York Medicaid state plan. MH and SUD benefits in the managed care benefit package are aligned with the state plan.

Additional Information: Fee-For-Service (Optional)

Provide any additional details regarding this service delivery system (optional):

All New York Medicaid Managed Care health plans provide members with a Member Handbook. The handbook explains the services covered by the health plan and the non-plan covered services that the enrollee must access via the fee for service delivery system. The New York Medicaid Managed Care Model Member Handbook is used by all participating health plans as an enrollee resource tool. Language in the handbook explains how to access both health plan covered services and services covered in the state plan that are not covered by the MMC plan contract; "Medicaid managed care provides a number of services you get in addition to those you get with regular Medicaid. [Insert Plan Name] will provide or arrange for most services that you will need. You can get a few services, however, without going through your PCP. These include emergency care; family planning/HIV testing and counseling; and specific self referral services, including those you can get from within the plan and some that you can choose to go to any Medicaid provider of the service."

There are medical services managed care enrollees must access via the FFS delivery system these include residential health care facility service, emergency/non-Emergency Transportation and hospice.

Certain mental health, substance use disorder and supportive services are not covered by health plans participating in the NYS Medicaid Managed Care program. Enrollees access these services via the FFS delivery system. This represents a full list to date, of behavioral health services not covered by the managed care benefit package: (recognizing some services listed serve children)

a) Chemical Dependence Services:
   Outpatient Rehabilitation and Treatment Services Provided by OASAS Licensed Clinics:
   Opioid Treatment Programs
   Medically Supervised Ambulatory Chemical Dependence Outpatient Clinic Programs
Alternative Benefit Plan

Medically Supervised Ambulatory Chemical Dependence Outpatient Rehabilitation Programs
Outpatient Chemical Dependence for Youth Programs
Chemical Dependence Ordered by the LDSS

b) Mental Health Services:
   Intensive Psychiatric Rehabilitation Treatment Programs (IPRT)
   Day Treatment
   Continuing Day Treatment
   Day Treatment Programs Serving Children
   Home and School Based Services Waiver for Seriously Emotionally Disturbed Children
   Case Management - target population SPMI
   Partial Hospitalization
   Services Provided Through OMH Designated Clinics for Children With A Diagnosis of Serious Emotional Disturbance (SED)
   Assertive Community Treatment - ACT
   Personalized Recovery Orientated Services - PROS

c) Rehabilitation Services Provided to Residents of OMH Licensed Community Residences and Family Based Treatment Programs

d) OPWDD Services (Office of Persons with Developmental Disabilities)
   Long Term Article 16 Clinic Services
   Day Treatment
   Medicaid Service Coordination - MSC
   Home and Community Based Services Waiver (HCBS)
   Care at Home Program

e) Community First Choice Option (CFCO) services will be accessible to enrollees in both the managed care and the Fee For Service delivery systems. The Managed Care/Managed Long Term Care benefit plan currently available to enrollees in the managed care delivery systems include the following CFCO services:
   - personal care
   - home health care (provided by an aide)
   - consumer directed personal assistance program
   - transportation (must relate directly to a functional need specified in the person-centered service plan)
   - PERS
   - durable medical equipment (must relate directly to a functional need specified in the person-centered service plan)

   The following CFCO services will be accessible via the FFS delivery system until the state plan amendment is approved. At that time, the services listed below will be included in the managed care/managed long term care benefit. Although, the services may not retain the same title when included, (for example, home and community support services is covered under waivers currently but will be incorporated into personal care under CFCO to include supervision and cueing).
   - community habilitation (services must be delivered in a non-certified setting)
   - home and community support services (supervision and cueing related to personal care)
   - home delivered and congregate meals (where substituted for paid attendant care; *home delivered meals are covered under MLTC but not MC)
   - assistive technology (as specified in the person-centered service plan; must increase independence or substitute for human assistance)
   - environmental modifications (must relate directly to a functional need specified in the person-centered service plan; $15,000/year limit)
   - vehicle adaptation (must relate directly to a functional need specified in the person-centered service plan)
   - moving assistance (limited to a one-time expenditure of $5,000)
   - community transitional services (must be transitioning from institutional care to home and community based setting; limited to a one-time expenditure of $5,000)
   - fiscal intermediaries

f) Other Non-Covered Services:
The Early Intervention Program
Preschool Supportive Health Services
School Supportive Health Services
School Based Health Centers

## Alternative Benefit Plan

### Employer Sponsored Insurance and Payment of Premiums

<table>
<thead>
<tr>
<th>The state/territory provides the Alternative Benefit Plan through the payment of employer sponsored insurance for participants with such coverage, with additional benefits and services provided through a Benchmark or Benchmark-Equivalent Benefit Package.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
</tr>
</tbody>
</table>

Provide a description of employer sponsored insurance, including the population covered, the amount of premium assistance by population, employer sponsored insurance activities including required contribution, cost-effectiveness test requirements, and benefit information:

Medicaid will pay the cost of employer sponsored insurance if it is cost effective. The scope of the employer sponsored benefit package is provided by the applicant. The employer's health plan must meet certain standards for covered benefits and costs. The state assesses cost effectiveness by comparing the ESI premium to the average Medicaid managed care rate which can vary by sex, age and location in the state. Medicaid fee-for-service will reimburse providers for any medically necessary service covered in the ABP that is not covered by the employer sponsored plan. No employer contribution is required.

The state/territory otherwise provides for payment of premiums.

Other Information Regarding Employer Sponsored Insurance or Payment of Premiums:

Section 4.22 C of the New York Medicaid State Plan defines the state method for determining the cost effectiveness of employer sponsored health insurance. ESI enrollees may access fee-for-service providers for medically necessary services covered in the Medicaid state plan that are limited by their employer sponsored benefit package. ESI enrollees are not enrolled in the NYS Medicaid Managed Care Program. All ESI enrollees receive a program guide that explains how to access medically necessary services via the FFS delivery system.

V.20130807
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

COORDINATION OF TITLE XIX WITH PART A AND PART B OF TITLE XVIII

The following method is used to provide benefits under Part A and Part B of title XVIII to the groups of Medicare-eligible individuals indicated:

A. Part B buy-in agreements with the Secretary of HHS. This agreement covers:

1. [ ] Individuals receiving SSI under title XVI or State supplementation, who are categorically needy under the State’s approved title XIX plan.

   Persons receiving benefits under title II of the Act or under the Railroad Retirement Systems are included:

   Yes [ ] No [ ]

2. [X] Individuals receiving SSI under title XVI, State supplementation, or a money payment under the State’s approved title IV-a plan, who are categorically needy under the State’s approved title XIX plan.

   Persons receiving benefits under title II of the Act or under the Railroad Retirement System are included.

   Yes [X] No [ ]

3. [ ] All individuals eligible under the State’s approved title XIX plan.

4. [X] Qualified Medicare beneficiaries provided by section 301 of PL.100-360 as amended by section §434 of PL.100-647.

B. Part A group premium payment arrangement entered into with the Social Security Administration. This arrangement covers the following groups:

   Qualified Medicare beneficiaries provided by section 301 of PL. 100-360 as amended by section §434 of PL.100-647.

C. Payment of Part A and Part B deductible and coinsurance costs. Such payments are made in behalf of the following groups.

   1. Qualified Medicare beneficiaries provided by section 301 of PL.100-360 as amended by section §434 of PL.100-647.

   2. All Title XIX recipients covered under Part A or B of Title XVIII and eligible for Part A or B services covered by Medicaid.
STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

COORDINATION OF TITLE XIX WITH PART B OF TITLE XVIII

[Dual eligibles (Medicaid and Medicare eligible) who are not Qualified Medicare Beneficiaries: The MA program will pay on behalf of MA recipients who are not qualified Medicare beneficiaries the full amount of any deductible and coinsurance costs incurred under Part B of Title XVIII of the Social Security Act, provided that such costs were incurred for care, services or supplies included in the MA Program.]

STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

MEDICAL ASSISTANCE PROGRAM

STATE OF NEW YORK

Summary of Cooperative Arrangements with State Health and State Vocational Rehabilitation Agencies and with Title V Grantees:
COOPERATIVE AGREEMENT

BY AND BETWEEN

The State Department of Health, hereinafter referred to as “Health” and the State Department of Social Services, hereinafter referred to as “Social Services”.

WITNESSETH:

WHEREAS, On July 30, 1965, the “Social Security Amendments of 1965” were enacted into law as Public Law 89-97, which among its provisions included the enactment of Title XIX making additional funds available to the states for Medical Assistance provided to eligible individuals; and

WHEREAS, Title XIX makes provision for the submission of a “State plan” by a “single State agency”;

WHEREAS, Chapter 256 of the Laws of 1966, added a new Title 11 to Article 5 of the Social Services Law (sections 363, et seq.) promoting the State’s goal of making available to everyone regardless of race, age, national origin, or economic standing, uniform high quality medical care, makes provisions for a program of Medical Assistance for Needy Persons, hereinafter referred to as “Medical Assistance” and designated Social Services the “single State agency” for purposes of Title XIX; and

WHEREAS, such a State plan heretofore has been developed by Social Services pursuant to Title XIX and Title 11 and has been submitted to, and approved by, the Health Care Financing Administration (HCFA), the federal agency responsible for administration of Title XIX; and

WHEREAS, Title XIX makes provision for a state agency to be designated to establish and maintain standards for institutions in which recipients of Medical Assistance may receive care or services and permits certain functions and services to be performed under such Title for the “single State agency” by other state and local agencies; and

WHEREAS, Health is the State agency which licenses health institutions, health maintenance organizations and agencies, the primary health service agency, and the agency designed to determine whether providers under Title XVIII of the Social Security Act meet the standards for participation in such program; and

WHEREAS, Chapter 474 of the Laws of 1996 amended Title 11, by designating Health as the “single State agency” having overall responsibility for the Medical Assistance program under Title XIX of the Social Security Act and Title 11 of Article 5 of the Social Services Law; for maintaining the “State plan” for Medical Assistance and submitting amendments thereto to HCFA; and for taking such steps, not inconsistent with law, as may be necessary to obtain and retain approval of such plans by HCFA; and

TN #96-45 Approval Date January 31, 1997
Supersedes TN #89-43 Effective Date October 1, 1996
WHEREAS, Title 11, as amended, also designates Health as the agency responsible for establishing and maintaining standards for hospital and related services and non-institutional care, reviewing and approving local social services medical plans, establishing a uniform system of reports relating to quality of medical care, reviewing the quality and availability of medical care and services furnished under local social services medical plans, and providing consultative services to providers of care under the plan; and

WHEREAS, Title 11, as amended,designates Social Services as the agency responsible for determining the eligibility for Medical Assistance of applicants therefore, and for auditing payments to providers of care, services and supplies under the Medical Assistance program; and

WHEREAS, Health and Social Services, pursuant to Title 11, as amended, are authorized to enter into such cooperative arrangements as shall be necessary to assure that the purposes and objectives of the Medical Assistance program are effectively accomplished, and

WHEREAS, the Commissioner of Health has the authority, pursuant to Title 11, as amended, to delegate responsibility under Title 11 to other state departments and agencies and to enter into memoranda of understanding as may be necessary to carry out the provisions of Title 11; and

WHEREAS, Health and Social Services have been cooperating in carrying out the directives of the Legislature in implementing the Federal requirements under Title XIX and in defining the respective functions and responsibilities of Social Services and Health under Title 11, as amended;

NOW, THEREFORE, in order to implement the Medical Assistance Program and the Federal requirements applicable thereto, to define the respective functions and responsibilities of Social Services and Health under such program, to improve access to primary care for all recipients, to assure the delivery of high quality care, to provide comprehensive care for the health needs of all recipients and to improve the cost effectiveness of the Medical Assistance program, Social Services and Health agree as follows:

I. FEDERAL RELATIONS

A. Health shall be responsible for submitting amendments of the “State plan” to HCFA necessary to implement the Medical Assistance program and for conducting negotiations with respect thereto and appealing denials thereof, in consultation with and with the participation of Social Services, as may be necessary.

B. Health shall be responsible for submitting Medical Assistance-related demonstration and waiver applications to the federal Department of Health and Human Services (HHS) and/or HCFA. However, Health shall consult with Social Services in the development and revision of any such applications that may affect Social Services responsibilities under the Social Services Law or this Agreement. Social Services shall assist Health in developing, revising and securing approval of any applications initiated by Health where such applications affect Social Services’ responsibilities under the Social Services Law or this Agreement.

TN #96-45 Approval Date January 31, 1997
Supersedes TN #89-43 Effective Date October 1, 1996
C. Health shall submit a summary of this Agreement to HCFA in accordance with HCFA requirements.

D. In the event of a deferral or disallowance of federal Medical Assistance funds associated with the activities of Health or any other State agency, the defense against said Federal action shall be the responsibility of Health. However, Health shall consult with Social Services, and such other State agencies as may be necessary or appropriate, in the development and implementation of such defense and with regard to any appeal, settlement or discontinuance of appeal of any deferral or disallowance related to Title XIX.

II. MEDICAL ASSISTANCE ELIGIBILITY

A1. Health shall be responsible for establishing and revising the standards and policies relating to persons’ eligibility for Medical Assistance and for requiring adherence to the standards and policies relating to persons’ eligibility for Medical Assistance by the social services districts of the State.

A2. Social Services, as the single state agency under Title IV-A of the federal Social Security Act, shall, through the social services districts, be responsible for determining the eligibility of persons for Medical Assistance. Health shall be responsible for determining eligibility for Medical Assistance for residents of the Oxford Home and for individuals who are the fiscal responsibility of the Office of Mental Health or the Office of Mental Retardation and Developmental Disabilities.

A3. Social Services may involve other State agencies in the eligibility determination process through cooperative agreements with the approval of Health.

B1. Social Services shall have responsibility for maintenance, operation and future systems development of the Welfare Management System (WMS) and associated subsystems. This responsibility includes notification to, and coordination with, Health for all changes to this system. Reasonable accommodation will be afforded to Health to allow development of systems initiatives in consultation with Social Services to support the Medical Assistance Program.

B2. Health shall have responsibility for maintenance, operation and future systems development of the Electronic Medicaid Eligibility Verification System (EMEV S). This responsibility includes coordination with Social Services for all systems changes. Reasonable accommodation will be provided to Social Services to allow development of systems initiatives to support operation and development of Social Services’ programs.

B3. Health shall have responsibility for maintenance, operation and future systems development of the Medicaid Management Information System (MMIS) and associated systems as defined by the federal General Systems Design (GSD). Social Services shall retain

responsibility for the Provider Surveillance and Utilization Review System (SURS). Health shall be responsible for notification to and coordination with Social Services of any systems changes to MMIS. Social Services will consult with Health on any Provider SURS initiatives. Reasonable accommodations will be provided to Social Services to support operation and development of Social Services’ programs.

C1. Health shall maintain a system of Fair Hearings in accordance with federal requirements to hear the appeals of applicants for and recipients of Medical Assistance who are adversely affected by the actions of Health or social services districts.

C2. Under such Fair Hearing system, social services agencies, including local social services districts, shall continue to be responsible for issuing notices of agency action with respect to matters affecting recipient eligibility. Social Services shall continue to receive requests for fair hearings, shall conduct administrative hearings and shall recommend appropriate actions with respect thereto to Health which shall issue the final administrative decisions thereon. Health shall designate appropriate staff of Social Services to issue final administrative decisions on behalf of Health, and to review issued fair hearing decisions for the purpose of correcting any error found in such decisions, including the reopening of a previously closed fair hearing record for purposes of completing such record.

III. MEDICAL STANDARDS AND PROGRAM OVERSIGHT

A. Health shall be responsible for establishing and maintaining, in conformance with any standards established by HHS, health standards for medical providers, as may be licensed by the State of New York, from which recipients of Medical Assistance may receive medical care or health-related services.

B. Health and Social Services shall share the responsibility for requiring adherence by providers of medical care and health services to the regulations promulgated by Health concerning the standards of medical care and health-related services, as reflected below.

C. Health shall, pursuant to the Public Health Law, certify managed care plans, and in consultation with the responsible special needs agency, special needs plans, for participation in the Medical Assistance program.

D. Health shall periodically review the utilization, appropriateness, availability and quality of medical care and services furnished to recipients of Medical Assistance under the program and shall make such reports as required by law of the findings together with any recommendations in accordance with State law, the federal Social Security Act and regulations promulgated thereunder.

E. Health shall be responsible for the administration of the Drug Utilization Review Program. Health and Social Services shall share

the responsibility for conducting medical and drug review activity to control inappropriate utilization identified in conformance with established regulations and policies and commonly accepted medical practice.

F1. Social Services shall be responsible for conducting audits of managed care providers and other providers of care, services and supplies enrolled in the Medical Assistance program including the responsibility for on-going fraud and abuse monitoring, investigation and referral. In this regard, Social Services shall consult with Health to ensure that such audits are conducted in accordance with Medical Assistance policy as established by Health. Social Services shall maintain a system to review and audit provider performance under the program, to recover inappropriate payments to providers and to assess provider sanctions for program violations, shall maintain a system of provider hearings to review contested audit findings, recoveries, penalties and provider sanctions, shall maintain a system for withholding payments to providers, and shall maintain a system for the final recovery of overpayments and penalties and for sanctioning and excluding enrolled providers for program violations.

F2. Social Services audit responsibility shall include but not be limited to fiscal audits of providers (including billing audits and audits of rates conducted under Section 368-c of the Social Services Law), audits relating to provider unacceptable practices, other audits which relate to the ability of a provider to continue to participate in the Medical Assistance Program and activities related to Medical Assistance recipient fraud. Such responsibility shall also include the administration of contracts related to Social Services audit and revenue maximization responsibilities.

G. Social Services shall continue to be responsible for the audit and review of claims paid under the Medical Assistance Program to individuals who are not enrolled as providers.

H. Social Services and Health shall have joint responsibility for the pre-payment review of claims submitted by providers for payment under the Medical Assistance Program. Such joint responsibility shall include the effectuation of edits on claims for payments pending resolution of the review in conformance with policies and standards of Health. Reasonable accommodation will be provided to Social Services to allow development of systems to support any such initiatives.

I. Social Services, as part of its audit and fraud control responsibility, shall be responsible for Medical Assistance third party operations and recoveries. Health shall be responsible for third party policy as it relates to Medical Assistance eligibility. Each agency shall consult and coordinate with the other to ensure an effective third party recovery program.
IV. PROGRAM MANAGEMENT AND ADMINISTRATION

A. Health shall be responsible for the supervision of the administration, management and overall operation of the Medical Assistance Program.

B. Health shall be responsible for the establishment of the Medical Assistance delivery network; and recruitment, selection and procurement of providers and managed care plans; provided, however, nothing herein shall prohibit social services districts or groups of districts from procuring providers or managed care plans with the approval of Health.

C. Social Services shall be responsible for conducting management assessment reviews and audits, and for performing Medical Assistance quality control review of social services districts.

D. Social Services shall assure that medical care and health-related services, under Medical Assistance, be made available in all social services districts to the extent required by law and the regulations of Health and, where Health has determined that sufficient capacity exists in the managed care entities serving a district, assure that recipients receive such care under the managed care program in accordance with the regulations of Health.

E. Health shall be responsible for enrolling medical care providers into the Medical Assistance program, instructing them with respect to participation requirements and assuring payment and shall provide for agreements with providers of services under the State plan, in accordance with applicable Federal requirements. Nothing herein shall preclude Health from delegating to Social Services the responsibility for making an initial determination with respect to provider enrollment applications for those groups or types of providers that Health deems appropriate and for instructing such providers with respect to participation requirements.

F. Either Social Services or Health may terminate a provider’s enrollment under the Medical Assistance program upon advance notice to the provider. Any such termination instituted by Social Services shall be upon advance written notice to and approval by Health. Health and Social Services shall establish a mechanism to provide for the notification to each other of any such terminations.

G. Health, in consultation with Social Services, shall be responsible for the design, development and operation, either directly or by contract, of the information systems which are necessary to support provider enrollment and payment functions under the Medical Assistance program. Provided, however, that, prior to entering into any contracts with fiscal agents, or extending the current contract, Health shall ensure that such contracts make adequate provision for assuring proper integration of Social Services’ responsibilities, including Medical Assistance eligibility determination, fiscal audits, fraud and abuse under this Agreement information systems shall be at a minimum be

IV. PROGRAM MANAGEMENT AND ADMINISTRATION

A. Health shall be responsible for the supervision of the administration, management and overall operation of the Medical Assistance Program.

B. Health shall be responsible for the establishment of the Medical Assistance delivery network; and recruitment, selection and procurement of providers and managed care plans; provided, however, nothing herein shall prohibit social services districts or groups of districts from procuring providers or managed care plans with the approval of Health.

C. Social Services shall be responsible for conducting management assessment reviews and audits, and for performing Medical Assistance quality control review of social services districts.

D. Social Services shall assure that medical care and health-related services, under Medical Assistance, be made available in all social services districts to the extent required by law and the regulations of Health and, where Health has determined that sufficient capacity exists in the managed care entities serving a district, assure that recipients receive such care under the managed care program in accordance with the regulations of Health.

E. Health shall be responsible for enrolling medical care providers into the Medical Assistance program, instructing them with respect to participation requirements and assuring payment and shall provide for agreements with providers of services under the State plan, in accordance with applicable Federal requirements. Nothing herein shall preclude Health from delegating to Social Services the responsibility for making an initial determination with respect to provider enrollment applications for those groups or types of providers that Health deems appropriate and for instructing such providers with respect to participation requirements.

F. Either Social Services or Health may terminate a provider’s enrollment under the Medical Assistance program upon advance notice to the provider. Any such termination instituted by Social Services shall be upon advance written notice to and approval by Health. Health and Social Services shall establish a mechanism to provide for the notification to each other of any such terminations.

G. Health, in consultation with Social Services, shall be responsible for the design, development and operation, either directly or by contract, of the information systems which are necessary to support provider enrollment and payment functions under the Medical Assistance program. Provided, however, that, prior to entering into any contracts with fiscal agents, or extending the current contract, Health shall ensure that such contracts make adequate provision for assuring proper integration of Social Services’ responsibilities, including Medical Assistance eligibility determination, fiscal audits, fraud and abuse under this Agreement information systems shall be at a minimum be

TN #96-45

Approval Date January 31, 1997
Effective Date October 1, 1996
accessible by Social Services and shall permit Social Services, upon notification to
Health, to initiate withholding of payments, recoveries, terminations of
enrollment and sanctions, as they relate to Medicaid providers. Social Services
and Health shall develop procedures for the input and retrieval of information by
Social Services related to such system and for the development of reports
required by Social Services in its audit and fraud control responsibilities. Social
Services shall have the right to disseminate information obtained from such
systems in the course of its responsibilities and consistent with federal and state
confidentiality requirements.

H. Social Services shall be responsible for provider fraud control mechanisms
including but not limited to “post and clear” and “card swipe”. Social Services
shall consult with Health during the development of any new initiatives.

I. Social Services shall be responsible for the development, implementation and
monitoring of the Social Services Medical Assistance audit plan. Social Services
shall consult with Health in the development of such plan and shall periodically
advise Health of the status of all initiatives contained in the plan. All recoveries
received by Social Services shall be processed and deposited in a manner to be
developed by Social Services and Health.

J. Social Services shall continue to be responsible for medical support enforcement
activities pursuant to the provisions of Title IV-D of the Social Security Act.

K. Social Services shall continue to be responsible for interaction with local services
districts regarding local district Medical Assistance fiscal activities. Such
responsibility shall include the processing of administrative and program claims,
interception of funds for local district escrow accounts, recoupment of
intergovernmental transfer revenue, issuance of disproportionate share
payments, and maintenance of local district cost allocation plans.

L. Health shall be responsible for interaction with other state agencies regarding
Medical Assistance claiming and the processing of reimbursement requests.
Health shall be responsible for the filing of the Medical Assistance Quarterly
Expenditure Report.

M. Social Services shall be responsible for the administration of the existing training
contract with the State University College at Buffalo. Health shall be responsible
for all training functions under the contract which are related to Medical
Assistance.

N. Social Services shall be responsible for all Medical Assistance disability
determination functions, including establishment of disability policy and, where
applicable, review of social service district procedures.

---

Supersedes TN #95-49

October 1, 1996
V. RATES AND FEES
A. Health shall establish fees, rates and payment methodologies for providers of medical care and health-related services and shall establish the range of acceptable rates of payment for managed care providers, under the Medical Assistance Program. Provided, however, that nothing herein shall be interpreted as affecting the authority of local social services districts or other state agencies to establish rates of payment where such authority existed prior to the date of this Agreement.

B. Methodologies and levels of payment for physician case management programs, for comprehensive health services programs with special purpose certificates of authority and for special needs plans or programs shall be developed by Health in consultation with the responsible special needs agency.

VI. REPORTS, FORMS AND PROCEDURES
A. Through cooperative efforts, Social Services and Health shall develop mutually satisfactory forms and procedures for carrying out their respective responsibilities under Title 11 of Article 5 of the Social Services Law and this Agreement. Such forms and procedures shall include those necessary for determining eligibility for Medical Assistance and claiming Federal reimbursement.

B. Health shall require such reports as are or may be necessary to comply with Federal requirements and Social Services shall do whatever may be necessary to assure that such requirements may be met.

C1. Health, in consultation with Social Services, shall determine the nature and extent of the information which should be collected from providers and shall design reports required to monitor the health care provided under the Medical Assistance program. Health shall determine the nature and extent of the information which should be collected from providers for the purpose of establishing rates of payment and shall design such reports as are necessary to establish rates of payment and acceptable ranges of payment, including the collection and reporting of encounter data from managed care programs and HMOS. Social Services shall have access to any such information needed to carry out its responsibilities under this Agreement.

C2. Social Services shall provide advice and assistance to Health in the determination of the nature and extent of information to be collected from and design of reports for social services districts affecting their program and fiscal responsibilities.

D. In order to effectively monitor the quality and appropriateness of the care provided, to identify patterns of under-utilization or aberrant care practices, to provide information necessary for plan quality assurance and improvement activities, and to streamline multiple reporting activities, Health in consultation with Social
New York
1h

Services, shall be responsible for the design and implementation of an encounter data system sufficient to meet the needs of the State agencies and social services districts having responsibility for the implementation of the Medical Assistance program. These responsibilities shall include: identification of key clinical and utilization variables, data collection, and maintenance and training and technical assistance to providers. Social Services shall have access to all such data and information.

E. Health shall be responsible for obtaining data relating to the quality and availability of medical care and health services furnished under the Medical Assistance program and shall have the responsibility for collection of encounter data for the managed care program. Social Services shall continue to collect and process encounter data from providers currently enrolled in the Medical Assistance program until such time as the universal encounter data set is established, new provider agreements are executed with the providers, or Health has assumed responsibility for enrolling providers into the Medical Assistance program. Social Services shall have access to all such data and information.

F. Health shall provide encounter data and payment reports to Social Services, at such times and in such manner as may be necessary, to enable Social Services to carry out its functions and its responsibilities to supervise the social services districts under the Medical Assistance program and to carry out its functions and responsibilities with respect to financial audits, fraud and abuse, and provider sanctions.

G. Until such time as Health establishes a formal process for the communication of Medical Assistance policy to social services districts, Health shall have access to existing methods within Social Services for such communications. Communications included under the terms of this paragraph include but are not limited to Administrative Directives, Local Commissioners Memoranda, and the General Information System. Health and Social Services shall cooperate in this regard such that there is no interruption in the flow of Medical Assistance communications to the social services districts. Health shall use best efforts to establish a Medical Assistance policy communications process as soon as practicable.

VIII. GRIEVANCE PROCEEDINGS AND APPEALS - RECIPIENTS
A. As provided for hereinabove and consistent with relevant federal and State law with respect thereto, upon designation by Health, Social Services shall make provisions for hearing appeals by applicants for, or recipients of Medical Assistance with respect to their eligibility for Medical Assistance and any adverse agency action taken with respect thereof; holding fair hearings on such appeals when hearings are requested; recommending final decisions and determinations; issuing final administrative decisions on behalf of Health through staff designated by the Commissioner of Health; and taking such steps as may be necessary to enforce Health’s final determinations and decisions.

TN #96-45
Supersedes TN NEW

Approval Date January 31, 1997
Effective Date October 1, 1996
B. Health, as the single state agency, shall decide and issue final administrative decisions on appeals reviewed or heard by Social Services in accordance with the requirements of the Social Services Law and federal law and regulations, as applicable. Health shall designate appropriate individuals in Social Services to issue final administrative decisions on behalf of the Commissioner of Health and to review issued fair hearing decisions for the purpose of correcting any error found in such decisions, including the reopening of a previously closed fair hearing record for purposes of completing such record. Health delegates to Social Services the responsibility for deciding and issuing those decisions in which Medicaid eligibility is dependent upon or is affected by an individual’s eligibility for public assistance. Health also delegates to Social Services the authority to respond on its behalf to any correspondence, contacts or inquiries relating to medical assistance hearings which are directed to Social Services, to Health or to the Commissioner of Health.

C. Health, consistent with its responsibility under the Public Health Law, this Agreement and the federal requirements therefor, shall assure that recipients, who are enrollees in managed care plans under the Statewide managed care program, shall have access to grievance and appeal procedures regarding services by their respective managed care plans, as specified in section 4403(1)(g) of the Public Health Law, 10 NYCRR 98.14 and the federal laws and regulations governing such procedures.

VIII. MONITORING AND ENFORCEMENT OF AGREEMENT
Except as otherwise specified to the contrary herein, Health, in consultation with Social Services, shall establish and implement policies and procedures reasonably necessary to monitor and evaluate the effectiveness and efficiency of the activities performed under this Agreement and the Medical Assistance program, appropriate to its responsibilities under State law and in accordance with applicable requirements of federal law and regulation.

IX. ADMINISTRATIVE PROCEEDINGS - PROVIDERS
A. Consistent with its responsibilities hereunder, Social Services shall be responsible and have authority for determining the amount of any restitution or administrative penalty due from a managed care plan or other provider, resulting from receipt of overpayment, fraud, abuse, or an unacceptable practice, and other administrative penalties, including but not limited to suspension, disqualification or limitation of such provider's participation in the program. The Commissioner of Social Services, or designees, shall be delegated to perform any and all of the functions and shall have the authority for all actions described in 18 NYCRR Parts 515, 516, 517, and 518 and for the conduct of administrative proceedings to review such actions as described in 18 NYCRR Part 519 including the authority to render a final administrative decision.

TN #96-45
Supersedes TN NEW
Approval Date January 31, 1997
Effective Date October 1, 1996
B. Notwithstanding the foregoing provisions hereof regarding Social Services’ responsibilities with respect to fraud and abuse, Health shall retain its jurisdiction with respect to licensure of hospitals, as defined under Article 28 of the Public Health Law, HMOs and home health agencies, and physicians, physician assistants and specialists’ assistants.

C. Health retains its authority regarding any providers’ violation of Article 33 of the Public Health Law. This will also pertain when the provider’s violations occur when providing services in the Medical Assistance program. For the purposes of effectuating penalties designed to deter violations of Article 33 of the Public Health Law, Social Services shall be responsible for monitoring compliance by Medical Assistance providers with orders issued pursuant to Public Health Law Article 33.

X. CIVIL PROCEEDINGS

A. Social Services shall have authority in those proceedings involving any provider’s violation of Article 33 of the Public Health Law for recovery of such sums of money obtained by a provider or other vendor as the result of fraud, abuse, or unacceptable practice in the Medical Assistance program and to perform such other acts as may be necessary to enforce other civil penalties provided for in law. Social Services shall have primary responsibility and authority for interacting with the Department of Law in the defense of those actions brought against Social Services as a result of a determination made relating to its audit functions and in any action brought seeking recovery of overpayments or penalties identified in an audit or review conducted by Social Services.

B. Health delegates to Social Services the responsibility and authority to defend state and federal litigation involving appeals of final administrative hearing decisions issued by Social Services staff designated by Health. This delegation shall be limited to cases where the primary issue is whether the decision was based on substantial evidence, or where the fair hearing process itself is challenged, either systematically or in individual cases. Health also delegates to Social Services the authority to approve the payment of attorney’s fees by Health in appropriate cases, in the course of settlement negotiations, or where directed by a court’s decisions.

XI. CRIMINAL PROSECUTION

Social Services shall be responsible and shall have the authority for the preparation of cases involving fraud, abuse or unacceptable practice in the Medical Assistance program for referral to an appropriate prosecuting agency or agencies. Nothing herein shall be construed as precluding Health from consulting with or referring matters to such prosecuting agency or agencies.

XII. FEDERAL ADVANCES

A. Health will periodically obtain, in conformity with applicable Federal regulations and practices, advances against Federal funds.

| TN #96-45 | Approval Date | January 31, 1997 |
| Supersedes TN NEW | Effective Date | October 1, 1996 |
provided for the conduct of the functions and activities herein prescribed and authorized under the Medical Assistance program. Such funds may be received by the State Comptroller and, upon allocation in accordance with applicable provisions of law, shall become available to Health and Social Services in anticipation of Federal reimbursement to which they may become entitled as a result of reasonable and necessary costs incurred in performing the functions authorized by this Agreement.

B. Health will submit estimates of anticipated costs and entitlement to Federal reimbursement as a result thereof for such periods in accordance with federal requirements. Such costs shall be limited to costs allowable for the functions and activities herein provided in accordance with records maintained by Health or submitted by Social Services, including, but not limited to, the names of employees, salaries paid, hours of performance and specification of such activities; provided, however that where Health or Social Services utilize services or materials in the execution of this Agreement for purposes which include purposes other than those encompassed by Title XIX, the cost of those services or materials shall be claimed for federal financial participation in accordance with one or more cost allocation plans which meet the requirements of OMB Circular A-87 and 45 CFR 95.507.

C. At such intervals as Health may reasonably require, Social Services will submit a report of its actual expenses in executing the functions and activities authorized under such Title XIX. Health will determine whether such expenditures were necessary for the performance of the functions authorized by this Agreement and will compare such expenditures and Social Services’ entitlement to Federal funds, as a result thereof, to the advances received from Federal funds for the period. If Health’s examination of such expenditures determines that any such expenditure was not necessary to the purposes of this Agreement, Health shall inform Social Services of such determination. Social Services will be given a reasonable length of time, but not less than thirty (30) days, to justify such expenditures. If Health thereafter finds that such expenses are not necessary to the performance of such purposes, Social Services’ entitlement to Federal reimbursement shall be reduced by an amount so determined and subsequent Federal advances adjusted, by increase or reduction, to compensate for such expense and for any difference between entitlements reported for the prior period and the advance for that period.

XIII. STAFFING

A. As required by Civil Service Law and regulations, Social Services shall identify and assign to Health such staff, who are substantially engaged in functions related to the supervision of the State’s Medical Assistance program, in such numbers as may be required to perform the functions assigned to Health under this Agreement. Staff so identified and assigned shall have relevant background, knowledge, skills and abilities necessary to the performance and of such functions and must be acceptable to Health. Staff identified for assignment to Health will have the legally
prescribed time frames from their notification of assignment to Health to protest such assignment. Health and Social Services shall have joint responsibility for determining the disposition of any such protest.

B. On an ongoing basis, Social Services and Health shall determine the nature and extent of the staffing needs of each agency with respect to their roles and responsibilities under this Agreement and may develop such staff deployment and redeployment plans to provide for the permanent transfer of such staff as is deemed necessary to effectively perform their respective functions hereunder. Social Services and Health shall effect the permanent reassignment and redeployment of such staff as is deemed necessary to effectively perform their respective functions hereunder in accordance with applicable provisions of the Civil Services Law and related statutes.

XIV. MISCELLANEOUS

A. Social Services and Health shall observe and require the observance of the applicable requirements relating to confidentiality of records and information and each agrees not to allow examination of records or to disclose information, except as may be necessary for the purpose of obtaining medical care and health services, assuring the propriety of such care and service, or the proper discharge of responsibilities relating thereto, and except as provided by applicable State and Federal laws and regulations.

B. Social Services and Health shall observe and require the observance of the requirements of Title V of the Civil Rights Act of 1964.

XV. TERMS OF AGREEMENT

A. This Agreement shall be effective only to the extent that it is found by HCFA to be permitted under applicable Federal law and to the extent that Federal aid is not impaired thereby.

B. Social Services and Health shall designate specific personnel in each State agency responsible for continuous liaison activities, including regular meetings and summaries thereof provided to the signatories hereto, to evaluate policies that affect the Medical Assistance program.

C. This Agreement shall run from the date hereof for a period of one year, at which time Health and Social Services shall review the Agreement for any needed changes and jointly plan to incorporate any such changes in the Agreement. If no changes are deemed appropriate, this Agreement shall automatically be renewed upon the same terms for additional periods of one year unless amended in writing by mutual agreement of the parties.

D. To the extent permitted by law, either party may terminate this Agreement on 30 days advance notice in writing to the other party. If terminated, any funds paid to Health under the provisions of this Agreement which have not been expended or encumbered in

TN #96-45 Approval Date January 31, 1997

accordance with the provisions of this Agreement prior to the date on which the Agreement was terminated and property purchased with funds paid to Health under the provisions of this Agreement, shall be accounted for in accordance with standards established by Social Services governing disposition of such property and funds.

E. This Agreement may be amended from time to time; however, no such agreement shall be effective unless signed by the Commissioners of Health and Social Services and shall be effective only to the extent set forth in Paragraph A. above.

F. The Memorandum of Understanding entered into between the parties on August 4, 1987 is hereby terminated. Provided, however, such August 4, 1987 Memorandum shall guide the parties in resolving any unforeseen problems or issues arising hereunder and in resolving any ambiguities herein.

TN #96-45

Approval Date January 31, 1997

Effective Date October 1, 1996
Summary of Agreement between New York State Department of Social Services (DSS) and New York State Office of Mental Health (OMH) (within the New York State Department of Mental Hygiene) dated September 29, 1982 and superceding all previous Agreements. Such agreement serves also as a Provider Agreement between the two agencies.

This Agreement makes provision of coverage under Medical Assistance for the following:

- persons under care in a general acute care hospital while on release from an OMH facility
- persons placed in family care on conditional release from an OMH facility
- persons age 65 or older who are in an OMH facility
- persons age 21 or younger who are in an OMH facility or a private not-for-profit facility duly certified for such by the OMH
- persons found in a psychiatric section of a general acute care hospital duly certified by the OMH and the New York State Department of Health

New York State Department of Social Services is responsible for:

1. Furnishing public and/or medical assistance.
2. Established standards of eligibility.
3. Determining eligibility within appropriate time frames.
4. Authorizing public and/or medical assistance.
5. Making provision for appeals and fair hearings.
6. Developing, in cooperation with the OMH, a system of reports to be made periodically to DSS relating to necessary data in connection with medical assistance provided.
7. Observing and requiring confidentiality of all records pertaining to client care.
8. Issuing policy, rules and regulations pertaining to the Medicaid program and for interpretation of the State Plan as the Single State Agency.
9. Forwarding to the OMH, in a timely fashion, any communications relating to OMH’s performance or responsibilities as an authorized medical provider.
10. In cooperation with the OMH jointly plan for developing alternate methods of care for the mentally ill.
11. Periodically transferring Federal Funds to OMH under an advance system.

TN ______ #85-11 Supersedes TN ______ #74-2 Approval Date ______ July 17, 1985
Effective Date ______ April 1, 1985
The New York State Office Mental Health is responsible for:

1. Establishing mental health standards for inpatient and outpatient services furnished by public and private facilities.

2. Requiring adherence by State institutions to such standards.

3. Making application to Social Services for public and/or medical assistance on behalf of patients.

4. The marshalling, exploration and verification of all income and resources of patients.

5. Prompt application to Social Security Administration for appointment of Representative Payee as indicated.

6. Notify Social Services within 30 days of any change affecting eligibility.

7. Maintaining records necessary to fully disclose the nature, amount and duration of services reimbursed by medical assistance.

8. Assuring that each OMH facility has in effect a utilization review plan including medical care evaluations as required by applicable statute and/or regulation.

9. Furnishing DSS with notices of adverse utilization review determinations made on behalf of their facility's patients.

10. Billing DSS only for actual and necessary care rendered.

11. OMH agrees to comply with federally mandated disclosure requirements.

12. Conducting periodic medical reviews either directly or through contract of Medicaid clients need for or continued care in public or private hospital facilities under OMH’s licensure.

13. Participation in fair hearings as advisors or expert witnesses.
Summary of Agreement between New York State Department of Social Services (DSS) and the New York State Office of Mental Retardation and Developmental Disabilities (within the NYS Department of Mental Hygiene) (OMR/DD) dated April 19, 1993 and April 30, 1993.

The New York State Department of Social Services shall be responsible for:

1. Establishing or revising standards, policies and procedures for determining eligibility for Medical Assistance.

2. Maintaining, through training programs and prompt updating of procedural changes, ongoing responsibility for the eligibility determination process.

3. Determining eligibility within 30 days of receipt of all information necessary to complete such determination from OMR/DD.

4. Maintaining free access to all eligibility documentation gathered by OMR/DD and periodically auditing the documentation to assure the accuracy and completeness thereof, as the basis for eligibility determinations made by DSS; complete system eligibility information shall be maintained by DSS subject to system purges/limitation.

5. Providing fair hearings in accordance with applicable DSS and HHS regulations for Medical Assistance applicants or recipients served by OMR/DD operated or licensed facilities.

6. Submitting amendments to “State Plan” and submitting this agreement as required by federal rules and serving as liaison with respect to all State Plan amendments, issues of compliance, or any other federal inquiry.

7. Entering into written provider agreements for the provision of Medical Assistance to eligible individuals only with providers certified by the Department of Health as meeting applicable standards for the provision of such services under federal and State law, which agreements will be in the form established and approved by DSS and shall comply with federal survey and certification requirements; DSS shall have the right to refuse to enter into such agreements, cancel, or suspend such agreements, with any provider should it determine that such provider is not in compliance with such requirements or that the provider has failed to comply with any of the terms thereof.

8. Providing a printout of annual redetermination cases at least 90 days prior to the expiration of the current authorization period.
The New York State Office of Mental Retardation and Developmental Disabilities shall be responsible for:

1. Making application for Medical Assistance benefits on behalf of potentially eligible clients, and on behalf of those on release from an OMR/DD facility to receive care in a medical facility, application to be made no later than 30 days after receipt of all information needed to support an eligibility determination by DSS.

2. Marshalling, exploring, developing and verifying all income, resources, third-party benefits, and other eligibility information in order that DSS may accurately determine eligibility.

3. Notifying Social Services immediately upon receiving knowledge of any change that affects eligibility for Medical Assistance.

4. Timely notifying Social Services of any newly certified providers, of those providers which are decertified, and of any changes in addresses, ownership program capacity or otherwise.

5. On request, participating in Fair Hearings as advisors and witnesses.

6. Certifying to DSS that all facilities operated or licensed by OMR/DD for which reimbursement is claimed meet applicable federal standards.

7. Supplying Social Services in a timely manner with any documentation requested hereunder.

8. Conducting utilization review activities, required for all medical care and services including:
   a. development of forms, criteria, training and technical assistance; approval of UR plans; placement planning, level of care determinations; and assuring that the general federal requirements are met (42 CFR 456.1 – 456.23)
   b. In the case of ICF/DD/s assuring that, in addition to meeting general federal criteria, they meet requirements of 42 CFR 456.350 – 456.438 as to –
      (1) Certificate of need,
      (2) Evaluation and pre-admission reviews,
      (3) Plan of care,
      (4) Written UR review plans,
      (5) Continued stay review,
      (6) Description of UR review function.

Supersedes TN #85-11  Effective Date April 30, 1993

Approval Date September 13, 1993
9. Assuring the Independent Professional Reviews (IPR’s) are conducted on a regular basis; consulting with Social Services as to their conduct and the contracting therefor; and initiating corrective action for problems identified thereby.

10. Surveying all facilities and programs under its jurisdiction and periodically evaluating all services for the developmentally disabled delivered under the auspices of these facilities and programs, as pertains to Medical Assistance.

11. Establishing regulations and procedures for all facilities and services under its jurisdiction and consulting Social Services regarding same prior to promulgation or implementation thereof, as pertains to Medical Assistance.

12. To ensure high quality provision of services, providing consultative services through its regional offices (District/Borough Developmental Services Office) to all Medical Assistance services administered by OMRDD.

13. Where appropriate, OMR/DD shall seek recoveries of Medical Assistance and credit such recoveries to DSS.

14. Sharing appropriate training materials with DSS when those materials pertain to the delivery of Medicaid services, so that DSS input can be made.

15. Consistent with the delegation of authority accepted by this agreement, where applicable, OMR/DD will establish reimbursement rates, fees and schedules for residential and non-residential care services in consultation with DSS and with the approval of the State Division of the Budget.

Summary of Agreement between the New York State Department of Social Services (DSS) and the New York State Division of Alcoholism and Alcohol Abuse (within the Department of Mental Hygiene) (DAAA) being dated December 30, 1981.

This agreement relates to the provision of Medicaid benefits to such persons who are admitted for either inpatient or outpatient care and services in facilities that fall under jurisdiction of the Division of Alcoholism and Alcoholism Abuse.

**The New York State Department of Social Services shall be responsible for:**

1. Establishing standards and criteria of eligibility for Medical Assistance.
2. Authorizing public and/or Medical Assistance.
3. Furnishing public and/or Medical Assistance.
5. Observing and requiring the confidentiality of records according to applicable statutes and regulations.
6. Administering the Medicaid program and verifying the quality and appropriateness of care rendered and reimbursed under this agreement.
7. Reimbursing all allowable and direct and indirect expenditures incurred.

**The Division of Alcoholism and Alcohol Abuse either directly or through contract with the Office of Mental Health is responsible for:**

1. Developing standards and policy governing the provision of medical care and/or rehabilitation relating to alcoholism.
2. Requiring adherence to such standard in state operated and voluntary operated facilities and settings.
3. Making application to Social Services for public or medical assistance on behalf of its patients.
4. The marshalling, exploring and verification of all income and resources of patients.
5. Maintaining records and reports that disclose the amount and duration of care supplied under the Medicaid program including indirect service costs under the Agreement.
6. Conducting annual periodic medical reviews and quality assurance reviews.
7. Billing Social Services only for actual allowable days of care as services provided under Medicaid.
8. Maintaining with Social Services an accurate and updated list of all providers eligible under Title XIX.
9. Participating in fair hearings as advisor or expert witness.

A. Summary of the Agreement between the New York State Department of Social Services on behalf of the Division of Medical Assistance (DMA) and the New York State Department of Health on behalf of the Center for Community Health (CCH) dated June 12, 1989.

The New York State Department of Social Services shall:

1. Provide local social services with CCH supplied lists and descriptions of current MCH primary and preventive health care programs for CSN (including Maternal and Child Health Block Grant funded programs) operating in the local social services district.

2. Disseminate CCH supplied brochures describing program services and eligibility requirements to local social services districts.

3. Ensure that the local social services districts refer individuals who may be eligible for medical, nutritional or dental services to the local MCH primary and preventive health care programs.

4. Authorize payment of Medical Assistance funds for care, services and supplies covered under the Medical Assistance Program and provided to Medicaid recipients by MMIS enrolled MCH primary and preventive health care and CSN providers.

TN #89-43
Supersedes TN #85-11

Approval Date March 13, 1992
Effective Date July 1, 1989
5. Coordinate and defend the deferral and disallowance of Medicaid funds associated with the activities of DMA and CCH.
6. Conduct periodic evaluations of local social services districts to ensure that protocols established in accordance with this Agreement are implemented effectively.

The New York State Department of Health shall:

1. Disseminate written information describing the Child/Teen Health Plan (C/THP) and other Medical Assistance services and eligibility requirements to local MCH primary and preventive health care programs and programs for CSN.
2. Provide local MCH primary and preventive health care programs and programs for CSN with DMA supplied brochures describing C/THP and other Medical Assistance services.
3. Ensure procedures are in place for referral of all persons who may be eligible for Medicaid benefits but whose eligibility has not been determined.
4. Ensure that MCH primary and preventive health care program providers receiving Medicaid reimbursement for primary ambulatory care services covered by the C/THP program and rendered to C/THP eligibles participate and report.
New York
5b

such services as Child/Teen Health Plan examinations.

5. Be responsible within limits of the appropriations for payment for care, services, and supplies provided to MCH primary and preventive health care programs and programs for CSN participants not fully eligible for Medical Assistance as found in 18 NYCRR Part 360.

6. Conduct periodic evaluations of local MCH primary and preventive health care programs and programs for CSN to ensure that the quality of care is accordance with DCH standards.

Jointly the New York State Department of Social Services and the New York State Department of Health shall:

1. Make training programs available to local health care program providers and local social services districts to enable them to coordinate efforts of eligibility determination and increasing access to services.

2. Provide to each other, upon request, available data on clients participating in MCH primary and preventive health care programs and programs for CSN and the Medical Assistance Program.
